**POTASSA FUSA, Potassa, Kali caus'ticum, Fused potass, Caus'ticum commune acerrimum, Kali purum, Alkali vegetabile flavum caus'ticum, Caus'ticum alkalinum, C. commune, C. potentiale, C. Salinum, Hydras kalium, Hydras potassæ puræ fusa, Potassæ hydras, Lapis caus'ticus, Lapis causticus chirurgorum, Lapis infernalis alcalinus, L. septicus, Ruptorium commune, (F.) Potassæ caustique.** (Prepared by evaporating solution of potass to dryness in an iron vessel.) This preparation is generally run into cylindrical moulds, covered with paper, and kept in well corked vessels. It is powerfully escharotic, and is used for forming issues, curing strictures, &c.

**POTASSA, HYDROBROMATE OF, see Bromine**—p. Hydrocyanate of, Potassii cyanuretum—p. Hyperoxalates, Potassæ, oxalate of—p. Hypertartaras, P. supertartaras—p. Impura, Potash of commerce—p. Liquida, Liquor potassæ—p. Ope calcis parata et igne fusa, Potassæ cum calce—p. Prussiate of, Potassii ferrocyanuretum.

**POTASSÆ ACETAS, Acetas kali, Oxytartarus, Acetas licivissimus kalium, Alkali tartari acetate saturatum, Alkali vegetabile cum aceto, Magisterium tartari purgans, Terra foliata Tartari, Kali acetatum, Sal diureticus, Sal Sennæ, Acetate de potassæ, Arcaenum tartari, (F.) Acetate de potassæ. (Acid. acetic. Oj, Potassæ carbon. q. s. Mix and add, by degrees, enough acetic acid to saturate the alkali. Then filter**

and evaporate till a pellicle is formed which is to be dried upon bibulous paper; evaporate again in a water bath, and, removing the pellicles: dry.—Ph. U. S.)

It is cathartic and diuretic. Dose, ʒj to ʒij or more.

**POTASSÆ ET ALUMINÆ SULPHAS, Alumen**—p. Bicarbonas, Potassæ carbonas—p. Bisulphas, P. supersulphas—p. Bitartaras, P. supertartaras.

**POTASSÆ CARBONAS, Kali abssinthii, Bicarbonas potassæ, Potassæ bicarbonas** (Ph. U. S.) *Deutocarbonas potassii, Carbonate of potass, Supercarbonate of potass.* This is not caustic, like the subcarbonate of potass, and hence, has been preferred to relieve acidity. (Potass. carbon. ℞ij, Aquæ destillat. ℞. Pass carbonic acid through the solution until it is saturated, and filter. Evaporate at a heat not exceeding 160°, and dry the crystals on bibulous paper. Carbonic acid is obtained from marble by the addition of dilute sulphuric acid.—Ph. U. S.) Dose, gr. x to ʒss. It is used in forming the soda powders, as well as for its antacid properties.

**POTASSÆ CARBONAS** (Ph. U. S.), P. subcarbonas—p. Carbonas impurus, P. subcarbonas—p. Carbonas purus, see P. subcarbonas—p. Chloras, P. murias hyperoxygenatus—p. Chloruretum oxydatum, P. murias hyperoxygenatus—p. et Ferri tartaras, Ferri tartarizatum—p. Hydras, Potassæ fusa.

**POTASSÆ HYDRIODAS, Potassæ Protohydriodas, Potassii protoxidi hydriodas, Hydriodate of potass.** If a solution of potass be poured on iodine in its metallic state, an iodate and hydriodate are formed. These may be separated by means of alcohol, which only dissolves the latter of these salts. The hydriodate, or rather the *Podide* of Potassium, *Kalium Iodatum, Kali Hydriodinum, K. Hydriodicum, Hydriodas Kalicus, Potassii Iodatum seu Iodidum, (F.) Iodure de potassium,* may be obtained by evaporation. When the *Iodide of potassium* is dissolved in water, it becomes the *Hydriodate of Potassa*. The following is the formula in the Ph. U. S. Iodin. ʒvj; Ferrament. ʒij; Potass. carbon. ʒiv vel. q. s. *Aquæ destillat. Oiv.* Mix the iodine with three pints of the distilled water, and add the iron filings, stirring frequently with a spatula for half an hour. Apply a gentle heat, and when the liquor assumes a greenish colour, add gradually the carbonate of potass, previously dissolved in half a pint of the water, until it ceases to cause a precipitate. Continue the heat for half an hour, and filter. Wash the residuum with half a pint of the distilled water boiling hot, and filter. Mix the filtered liquors and evaporate, that crystals may form. Pour off the liquid, and dry the crystals on bibulous paper. The *Hydriodate of soda* is made in the same way. Virtues,—those of iodine.

**POTASSÆ MURIAS, Sal Digestivus vel Sal sibiricus Syllii, Muriate of Potass, Spiritus salis marini coagulatus.** Bitter and refrigerant.

**POTASSÆ MURIAS HYPEROXYGENATUS, Potassæ Chloras, P. ozymurias, Ozymuriate or hyperozymuriate of potass, Chlorate of potassæ, Euechlorate of potass, Alkali vegetabile salitodephlogisticatum, Chloruretum potassæ oxydatum, Halodum oxygenatum, Oxygeno-chloruretum potassii, Protochlorate of potassæ,**

*Kali chloricum, Chloras Kallicus depuratus, (F.) Chlorate de potass.* It has been regarded as antineuropathic, and as an alternative purifier of the blood and humours. It is of doubtful efficacy. Dose, 3 to 6 grains or more.

POTASSÆ NITRAS, *Nitrate of Potass, Nitrum, Sal nitrum, Nitre, Saltetre, Sal petre, Sal se'do mucrum, Sanguin'ea, Beronic'ium, Halin'itrum, Protom'itrate of Potas'sium, Nitrate of protox'ide of Potas'sium, Kali ni'tricum, Nitras ka'licum, Nitras lixiv'is, (F.) Nitrate de potasse.* Obtained from the putrefaction of animal matters, in contact with calcareous or alkaline earths, by elixivation; adding, if necessary, wood ashes to supply the alkaline basis. It is formed, in an impure state, by nature, in warm climates.

It is diuretic and refrigerant, and, in large doses, purgative; externally, cooling and detergent. Dose, gr. x to ʒss. In large doses it is an acrid poison.

POTASSÆ NITRAS FUSUS SULPHATIS PAUCILLO MIXTUS, *Sal prunellæ, Crystal'us mineralis, Nitras potas'sicum sulphur'atum, Nitrum tabulatum, Lapis Prunellæ, Sora-throat salt, Mineral crystal, Anod'ynum mineral'e.* Nitrate of potass, mixed with a little sulphate of potass and run into moulds. Its properties are those of nitre.

POTASSÆ OXALAS, *Superoxalate of Protox'ide of Potas'sium, Ox'alas Acid'ulum Potas'se seu Potas'sæ acid'uli seu ba'sicis, Superoxalate kallicum, S. Potassa, Hyperoxalate Potassæ, Sal Acetoesel'ia, Oza'lium, Kali ozal'icum acid'ulum, Ox'alas subpotas'sicis, Oxalate of Potass, Salt of Sorrel.* Prepared from the juice of wood sorrel. It is refrigerant, and is used to make lemonade, &c.

POTASSÆ OXALAS ACIDULUM, Potass, oxalate of—p. Oxymurias, P. murias hyperoxygenatus —p. Protohydriodas, P. hydriodas—p. Puræ fusæ hydras, Potassa fusa—p. et Sodæ tartaras, Soda, tartrate of.

POTASSÆ SUBCÆR'ONAS, P. Car'bonas (Ph. U. S.), *Subcar'bonas Kali, Car'bonas Potassæ, Kali præparatum, Sal Herbd'rum, Calca'reous Tartar, Sal Planta'rum, Subcarbonate of Potass, Sal Tartari, Sal Abini'thii, Mephitis of Potass, &c.* (See Potash.) A filtered solution of the impure subcarbonate, *Potas'sæ car'bonas impu'rus* (Ph. U. S.), *Pearl-ash* (see Potash,) evaporated to dryness. This deliquescent salt is given in the same cases as the potassæ carbonas, than which it is more caustic and disagreeable.

The Parisian codex has a *Subcar'bonas Potas'sæ ex tart'aro combusto, vulgo Sal Tartari* or *Salt of Tartar*:—a *Subcarbonas Potassæ ex deflagran'tibus simul tart'ratè acid'ulo et Nitrate Potassæ paratus, vulgo Nitrum ex tartaro fixum*, which is the *Potassæ carbonas purus* or *Salt of Tartar* of the Pharmacopœia of the United States,—and a *Subcarbonas potassæ ex deflagran'tè cum Carbo'nibus Nitratè Potassæ paratus, vulgo Nitrum fixum*. They are all used like the preceding.

POTASSÆ SUBCÆR'ONAS IMPURUS, Potash of commerce.

POTASSÆ SULPHAS, *Kali vitriola'tum, Sulphas Kali, Kali sulphu'ricum, Lixiv'ia vitriola'ta, Nitrum vitriola'tum Schroederi, Sal Sapientiz, Sal Tartari Sulphuratum, Specificum Paracel'si, Spi'ritus vitrioli coagulatus Mynsiehti, Protosulphate of Potas'sium, Al'kali*

*vegetabilè vitriola'tum, Sal de duobus, Arc'd-num duplicatum, Nitrum vitriola'tum, Tartarum vitriola'tum, Panac'ea Ducis Holsat'ia, Panac'ea duplicata, Sal Polychrestus, Sulphate of Potass, (F.) Sulfate de potasse.* (The salt, that remains after the distillation of nitric acid, dissolved; the excess of acid saturated with subcarbonate of potass and crystallized.) Purgative and diuretic. Dose, ʒss to ʒj as a laxative. In a large dose it has proved an irritant poison.

POTASSÆ SULPHAS CUM SULPHURÈ; *Sal Polychrestus Glas'ri, Lixiv'ia Vitriola'ta Sulphu'rea.* (Formed by deflagrating nitrate of potass with sublimed sulphur.) Same virtues as the last. Dose, gr. xv to xxx.

POTASSÆ SULPHUR'ETUM, *Potas'sii Sulphur'etum, Kali sulphuratum, Hepar Sulphu'ris salinum, H. sulphu'ris vulgare, Sulphur'etum lixiv'ia, S. kalicum, Hepar Sulphuris, Liver of Sulphur, Sulphuret of Potass, (F.) Sulfure de potasse, Sulfure de potassium sulfaté, Fois de Soufre.* (Sulphur. loc. ʒj, Potassa carb. ʒij. Rub them together, and place the mixture in a covered crucible upon the fire until they unite.) It has been employed in affections of the chest, as an expectorant, in the dose of from ʒss to ʒj, largely diluted; but it is chiefly used as a bath or wash in cases of itch, tinea capitis, and other cutaneous affections.

POTASSÆ SUPEROXALAS, Potass, oxalate of.

POTASSÆ SUPERSULPHAS, P. Bisulphas, *Sal enic'um, Supersulphate of Potass, Sal febrifugus of Lem'ery, Acid Sulphate of Potass, Bisulphate of Potass, Super-protosulphate of Potas'sium, (F.) Bisulfate, de Potasse.* (The salt remaining after the distillation of nitric acid, dissolved, strained, and crystallized.) It is refrigerant and purgative. Dose, ʒss to ʒij.

POTASSÆ SUPERTARTRAS IMPURUS, *Tartarus crudus, Tartarum, Lapis vini, Magneti'us, Pedagra, Tartar, (F.) Tartro cru, T. brut.* It is called, also, *Tartarum rubrum* and *Red Argol*, when obtained from red wines; *Tartarum album* or *White Argol*, when from white wines. Tartar is the saline deposit from wines as they become aged; which attaches itself to the sides of the casks and bottles in which they are kept. It consists of a considerable quantity of acidulous tartrate of potass, tartrate of lime, silica, alumen, oxyd of iron, manganese, and a red colouring matter, if the wine be red. It is chiefly used for the preparation of cream of tartar.

POTASSÆ SUPERTARTRAS, *Crystal'is Tartari, Tartaras Acid'ulum Potassæ purus, Supertart'rate of Protox'ide of Potas'sium, Potas'sæ Bisar'tras* (Ph. U. S.), *Bitartrate of Potass, Hypertartaras Potassæ, Tartaras superpotas'sicis, T. subpotas'sicis, Crystals of Tartar, Cremor Tartari, Cream of Tartar* (when in powder,) *Supertart'rate of Potass, (F.) Tartrate acide de potasse, Crème de Tartra.* (The tartar of wine purified.) It requires 120 parts of water at 60° to dissolve it. It is mildly purgative, refrigerant, and diuretic. Dissolved in water, with a small quantity of white wine, some sugar and lemon peel, it forms an agreeable beverage in febrile diseases, under the name of *imperial*. Dose, as a diuretic ʒj to ʒij; as a purgative, ʒss to ʒj.

POTASSÆ TARTRAS, *Kali tartarizatum, Al'kali fixum tartarizatum, Tartarum solu'bile, Tartarus tartarizatus, Lixiv'ia Tartarizata,*

*Sal Panchres'tum, Tartras Kalinus, T. lixiv'ise, Sal vegetabilis, Alkali vegetabil' tartarizatum, Tartrate of Potass, Soluble Tartar, (F.) Tartrate de Potasse. (Potassæ carbon. ʒxvij; Potassæ Bitartrat. in pulv. subtiliss. ℥ij, vel q. s., aquæ bullientis, cong. Dissolve the carbonate of potassa in the water, add the bitartrate to saturation, and boil; filter, evaporate till a pellicle forms, and set aside to crystallize. Pour off the liquid; dry the crystals on bibulous paper, and keep in closely stopped bottles.—Ph. U. S.) A saline cathartic in the dose of ʒij to ʒj.*

POTASSÆ TARTRAS ACIDULUS PURUS, P. super-tartras—p. Tartras stibialis seu stibiosus, Antimonium tartarizatum.

POTASSÆ ACÉTATE DE, Potassæ acetat —p. *Bisulfate de, Potassæ supersulphas—p. Caustique, Potassa fusa—p. à la Chaux, Potassa cum calce—p. Chlorate de, Potassæ murias hyperoxygenatus—p. Laquide, Liquor potassæ—p. Nitrate de, Potassæ nitras—p. Préparé avec la chaux, Potassa cum calce—p. et de Soude, tartrate de, Soda, tartate of—p. Sulfate de, Potassæ sulphas—p. Sulfure de, Potassæ sulphuretum—p. Tartrate de, Potassæ tartras—p. Tartrate acide de, Potassæ supertartras.*

POTASSII CYANIDUM, P. Cyanuretum.

POTASSII CYANURETUM, P. Cyan'idum, Cyanuret of Potassium, Hydrocyanate of Potassa, (Potassii Ferrocyannur., in pulv. ʒvii; Aquæ destillat. f. ʒvj. Expose the ferrocyanuret to a moderate heat until it becomes nearly white, and is deprived of its water of crystallization. Put the residue in an earthen retort, with the beak loosely stopped, and expose it to a red heat for two hours, or till gas ceases to be disengaged. Take the retort from the fire, close the orifice with lute, and let the whole remain till cold. Break the retort, reduce the black mass to a coarse powder, put it into a twelve ounce bottle, and add the distilled water. Agitate occasionally for half an hour; throw it on a filter, evaporate the filtered solution to dryness, and keep the dry mass in a closely stopped bottle.—Ph. U. S.) Used in the same cases as the hydrocyanic acid. Dose, a quarter of a grain.

POTASSII DEUTO-CARBONAS, Potassæ carbonas.

POTASSII FERROCYANURETUM, P. Ferrocyann'idum, Ferrocy'anide or Ferrocyannuret of Potassium, Ferrocyannate of Potassa, Ferropروسيا of Potassa, Prussiate of Potassa, (F.) Protocyanure jaune de fer et de potassium, Cyanure de fer et de potassium. The yellow double cyanuret of potassium and iron, the salt from which the cyanuret of potassium is obtained by calcination. It is not much used in medicine. It has been advised as an astringent in the colliquative sweats of phthisis, in leucorrhœa, &c.; but it does not seem to be possessed of much activity. Dose, 10 or 15 grains every four or five hours.

POTASSII HYDRARGYRO-IODIDUM, see Iodine—p. Ioduretum, see Potassæ hydriodas—p. Oxogeno-chloruretum, Potassæ murias hyperoxygenatus—p. Protoxidi hydriodas, Potassæ hydriodas—p. Sulphuretum, Potassæ sulphuretum.

POTASSIUM. Same etymon as potash.

The metallic base of potassa.

POTASSIUM, BROMURE DE, see Bromine—p. Cyanuret of, Potassii cyanuretum—p. Ferrocyannide of, Potassii ferrocyannuretum—p.

Ferrocyannuret of, Potassii Ferrocyannuretum—p. Iodide of, see Iodine, and Potassii iodidum—p. Iodide of, see Potassæ hydriodas—p. Iodohydrargyrate of, see Iodine—p. Iodure de, Potassæ hydriodas—p. POTELÉE, Hyoscyamus.

POTENTIA, Force.

POTENTIA seu POTESTAS COEUNDI, Capability of copulation.

POTENTIA GENERANDI. The power of procreation.

POTENTIA IRRITANS, Stimulus.

POTENTIAL, Potentialis; from potens, 'able.' An epithet for remedies, which, although energetic, do not act till some time after their application. The caustic alkalies, for instance, are called *Potential cauterics* in contradistinction to the hot iron, which is termed *actual*.

POTENTILLA ANSERINA, Argentine, Chenobos'con, Argenta'ria, Anser'ina, Silver Weed, Wild Tansey, (F.) Argentine, Potentilla. The leaves are mildly astringent and tonic.

POTENTILLA REPTANS, Pentaphyllum, Quinquifolium, Common cinquefoil, (F.) Quintesfeuille. The roots are possessed of astringent properties.

POTENTILLA TORMENTILLA, Tormentilla.

POTERIUM SANGUISORBA, Pimpinella saxifraga.

POTESTAS COEUNDI, Potentia coeundi—p. Generandi, Potentia generandi.

POTEX, Anus.

POTHOS FETIDA, Dracontium fetidum—p. Putorii, Dracontium fetidum.

POTIMOS, Potable.

POTIO, Drink, Haustus, Potion—p. Calcis carbonatis, Mistura creta—p. Effervesces anti-emetica, Potion of Riverius—p. Leniens, Looch ex ovo—p. Oleosa, Looch ex ovo—p. Picea, see Pinus sylvestris.

POTION (F.), Potio; from poto, 'I drink.' A liquid medicine, from 4 to 8 ounces or more in quantity, the composition of which varies, and which is administered in divided doses. It corresponds to the English *mixture*.

POTION PECTORALE, Looch ex ovo.

POTION OF RIVERIUS. A mixture of Lemon Juices and Subcarbonate of Potass,—generally given in a state of effervescence. It is the *Patio effervesces anti-emetica dicta Riverii*, of the Parisian codex. The name in the codex indicates its use.

POTIONIS DESIDERIUM, Thirst.

POTIRON, Cucurbita pepo.

POTIUNCULA, Haustus.

POTOPARANĒA, Delirium tremens.

POTOS, Potable.

POTOTROMOPARANĒA, Delirium tremens.

POTT'S DISEASE, Vertebral disease.

POTUS, Drink—p. Hippocraticus, Claret.

POU, Pediculus.

POUCE, Pollex, see Digitus.

POUDRE, Powder, Pulvis—p. *Absorbante et anti-acide*, p. Pulvis de magnesiâ compositus

POUDRE SUBTIL DE DELCROIX. A fashionable depilatory "for removing superfluous hair in less than ten minutes." It is said to consist of *Quicklime* and *Sulphuret of Arsenic*, with some vegetable powder.—Paris.

POUDRE TEMPÉRANTE DE STAHL, Pulvis de Sulphate potassæ compositus—p. *de Tennant*, Calcis chloridum—p. *de Valentini*, Magnesii carbonas—p. *Vermifuge mercurielle*, Pulvis e sulphureto hydrargyri nigro et scammonio—p. *Vermifuge sans mercure*, Pulvis ex helminthoerto compositus.

POUGUES, MINERAL WATERS OF. These alkaline waters are in the department of Nièvre, France. They contain carbonic acid, carbonates of soda, lime and magnesia; chloride of sodium; alumina and silica, with protoxide of iron.

POULAIN, Bubo.

POULET, VIN DE (F.), *Pullet Wine*. A disgusting preparation, made by infusing the excrement of the pullet in white wine. According to Nysten, it is employed by the vulgar in France in a number of diseases, and especially in falls, contusions, &c.

POULIOT, Mentha pulegium.

POULS, Pulse—p. *Abdominal*, Pulsus inferior—p. *des Adultes*, Pulse, natural—p. *Agiti*, Pulsus fortis—p. *Bas*, Pulse, low—p. *Capital*, Pulse, nasal—p. *Combiné*, Pulse, complex—p. *Compliqué*, Pulse, complex—p. *Composé*, Pulse, complex—p. *Concentré*, Pulse, contracted—p. *Défaillant*, Pulsus deficiens—p. *Depressé*, Pulse, depressed—p. *de La Diarrhée*, Pulse, intestinal—p. *Dur*, Pulse, hard—p. *Élevé*, Pulse, ardent—p. *Embarrassé*, Pulsus intricatus—p. *de l'Estomac*, Pulse, stomachal—p. *Étroit*, Pulsus strictus—p. *de l'Expectoration*, Pulse, pectoral—p. *Faible*, Pulse, feeble—p. *du Foie*, Pulse, hepatic—p. *Grand*, Pulse, large—p. *Inconvenable*, Pulsus deficiens—p. *Intercadent*, Pulse, intermittent—p. *des Intestins*, Pulse, intestinal—p. *Langueissant*, Pulse, languid—p. *Lent*, Pulse, slow—p. *de la Matrice*, Pulsus uterinus—p. *Modéré*, Pulse, natural—p. *Mou*, Pulse, soft—p. *de Nez*, Pulse, nasal—p. *Ondoyant*, Pulse, undulating—p. *Ondulant*, Pulse, undulating—p. *Palpitant*, Pulse, tremulous—p. *Parfait*, Pulse, natural—p. *Petit*, Pulse, small—p. *Plain*, Pulse, full—p. *Précipité*, Pulse, frequent—p. *Profond*, Pulse, deep—p. *Prompt*, Pulse, sharp—p. *Rare*, Pulse, slow—p. *Rebondissant*, Pulsus dicrotus—p. *Redoublé*, Pulsus dicrotus—p. *des Règles*, Pulsus uterinus—p. *Ruide*, Pulse, tense—p. *Serratile*, Pulsus serrinus—p. *Serré*, Pulse, contracted—p. *de la Sueur*, Pulsus sudoralis—p. *Tardif*, Pulse, slow—p. *Tendu*, Pulse, tense—p. *Tremblant*, Pulse, tremulous—p. *de l'Urine*, Pulsus urinalis—p. *Véhément*, Pulsus fortis—p. *Ventral*, Pulsus inferior—p. *Vide*, Pulsus vacuus—p. *Vif*, Pulse, sharp—p. *Vite*, Pulse, sharp.

POULTICE, see Cataplasm.

POUNCE, Sandarac.

POUND, *Libra*, *Litra*, *ᾠρα*, Lat. *Pondo*, *Baga'dia* (of twelve oz.), *Barda'dia*, (F.) *Livre*, from *pondere*, 'to weigh.' A weight, consisting of twelve ounces Troy,—sixteen ounces avoirdupoise. See Weights and Measures.

POURPIER CULTIVÉ, Portulaca.

POURPRE BLANC, Miliary fever.

POURRIURE, Putrefaction—p. *D'Hôpital*, Hospital gangrene.

POUS, Pes.

POUSSE, Pursineas.

POUSSÉE, Lichen.

POUSSIERE TUBERCULEUSE (F.), 'Tuberculous Dust.' A name given by MM. Rilliet and Barthez to fine white or yellow minute points of tuberculous matter occurring in myriads, so as to be likened to dust.

POWDER, (F.) *Poudre*. See Pulvis.

POWDER OF ÆTHIOPIA, GUY'S. A once celebrated anthelminthic, which consisted of *pure rasped tin*, *mercury*, and *sulphur*, triturated together.

POWDER OF ALOES, COMPOUND, Pulvis aloes compositus—p. Alum, compound, Pulvis sulphatis aluminis compositus—p. of Aloes with canella, Pulvis aloes cam canellâ—p. Scammony and aloes, Pulvis scammonii cum aloë—p. Scammony compound, Pulvis scammonis compositus—p. of Senna, compound, Pulvis sennæ compositus—p. Sneezing, see Veratrum album—p. Spruce beer, see Spruce beer—p. Tennant's, Calcis chloridum—p. Tooth, Dentifricium—p. Tragacanth, compound, Pulvis tragacanthæ compositus.

**POWDER, VIEN'NA,** is composed of equal parts of quicklime and potassa cum calce. In using it, it is made into a paste—*Vienna pasto*, (F.) *Caustique de Vienne*—with spirits of wine, and is applied on the diseased part, previously circumscribed by a hole cut in a sticking plaster.

To be left on from 10 to 20 minutes, according to the depth of the eschar required. Used in cases of lupous ulceration.

By fusing the potass and lime, and raising the heat so as to cause ebullition, the caustic may be run into cylinders:—when it is called *Caustique-Filhos*; from the name of the author of the process.

**POWDERS, CASTILLO,** so called from the name of the physician who first proposed them. They are formed of *sago*, in powder; *saley*, in powder; *tragacanth*, in powder, of each, four parts; *prepared oyster-shells*, one part, *cochineal*, half a part, divided into powders of one drachm each; one of which is given three or four times a day as a demulcent in diarrhœa and dysentery.

**POWDERS, SODA,** *Pulveres effervescentes*, (F.) *Poudres gazeuses simples*. *Sodæ carb.* ʒss, in each *blus paper*; *tartaric acid*, gr. xxv. in each *white paper*; for half a pint of water. A pleasant, cooling drink; taken during the effervescence.

*Soidlitz Powders*, (F.) *Poudres gazeuses laxatives* ou *Poudres de Soidlitz*, contain one or

two drachms of tartrate of potassa and soda, added to the alkali in the blue paper.

**POWER, Faculty**—p. Inherent, Irritability—p. Tonic, Irritability.

**POX,** Syphilis, Variola—p. Chicken, Variella—p. Doctor, Syphilidiater—p. French, Syphilis—p. Nodde, Syphilomania—p. Small, Variola—p. Swine, see Variella—p. Water, see Variella.

**POZZUOLI, MINERAL WATERS OF.** Pozzuoli is in the neighbourhood of Naples. The springs are, 1. *Acqua della pietra*, Temp. 91° Fah. 2. *Acqua di Cavalcanti*, Temp. 100°. *A. di subveni homini*, Temp. 102°. *A. del cantarello*, Temp. 86 to 89°; and that of the Temple of Serapis in Pozzuoli, Temp. 102 to 107°. The last contains carbonic acid, carbonates of lime, magnesia, alumina, and iron, carbonate of soda, chloride of sodium, sulphate of lime, and silica.

**PRACTICE OF PHYSIC,** Therapeutica.

**PRACTITIONER, GENERAL,** Surgeon apothecary.

**PRÆBIUM,** Dose.

**PRÆCAUTIO,** Prophylaxis.

**PRÆCIPITANS MAGNUM,** Sepia.

**PRÆCIPITATUM ALBUM,** Hydrargyrum præcipitatum.

**PRÆCIPITATUS RUBER,** Hydrargyri nitrico-oxydum.

**PRÆCISIO PRÆPUTII,** Circumcision.

**PRÆCOCIA,** Prunus Armeniaca.

**PRÆCOCITY,** Præotia.

**PRÆCORDIUM,** Prognosis.

**PRÆCORDIA,** from *præ*, 'before,' and *cor*, 'the heart.' The diaphragm; also, the thoracic viscera, and the epigastrium.

**PRÆCORDIAL OR PRÆCORDIAL REGION,** *Re'gio præcordi'aca seu præcordi'alis*, is the epigastric region. Also, and more properly, the region of the heart. A line drawn from the inferior margins of the third ribs across the sternum, passes over the valves of the pulmonary artery a little to the left of the mesial line, and those of the aorta are behind them, but about half an inch lower down. A vertical line, coinciding with the left margin of the sternum, has about one-third of the heart, comprising the upper portion of the right ventricle, on the right,—and two-thirds, comprising the lower portion of the right ventricle and the whole of the left, on the left. This is the præcordial region.

**PRÆCORDIUM,** *Fossetto du cœur*—p. Pedis, Metatarsus.

**PRÆCOX MATURITAS,** Præotia.

**PRÆCUSTODIA,** Prophylaxis.

**PRÆDICTIO,** Prognosis.

**PRÆDISPOSITIO,** Predisposition.

**PRÆDIVINATIO,** Mantia.

**PRÆDOMINIUM;** from *præ*, 'before,' and *dominus*, 'a lord.' Predominance of one thing over another.

**PRÆDOMINIUM AQUÆ.** A predominance of watery fluid,—*Tenu'itas aquosa*.

**PRÆDOMINIUM SAN'GUINIS ARTERIO'SI.** A predominance of arterial blood, *Asterios'itas sanguinis*.

**PRÆDOMINIUM SAN'GUINIS VENO'SI,** *Venos'itas San'guinis*. Predominance of venous blood.

**PRÆFOCATIO,** Orthopnoea, Suffocation—p. Faucium, Angone—p. Matricis, Angone—p. Uterina, Angone.

**PRÆFOCATION,** Strangulatio uterina.

**PRÆGNANS,** Pregnant.

PRÆGNAS, Pregnant.

PRÆGNATIO, Fecundation, Pregnancy.

PRÆGNATUS, Fecundation, Pregnancy.

PRÆGNAX, Pregnant.

PRÆGUSTATIO, *Avant-gout*.

PRÆHENSIO, Prehensio.

PRÆLINGUA. The anterior part or tip of the tongue.

PRÆLIUM, Press, Tourniquet—p. *Arteriale*, Tourniquet.

PRÆLUMBARIS, Prelumbar.

PRÆNOTIO, Prognosis.

PRÆNUNTIATIO, Prognosis.

PRÆPARATIO, Preparation—p. *Chyli*, Chylification.

PRÆPARATUM, Preparation.

PRÆPOTENTIA, from *præ*, 'before,' and *potens*, 'powerful.' Great power or strength.

PRÆPOTENTIA VIRI'LIS. Great, or too great procreative power on the part of the male.

PRÆPOTIO, Propotismos.

PRÆPUTIUM, Prepuce.

PRÆSAGIUM, Mantia.

PRÆSCIENTIA, Prognosis.

PRÆSCITIO, Prognosis.

PRÆSCRIPTIO, Prescription.

PRÆSEPIOLUM, Alveolus.

PRÆSEPIUM, Alveolus.

PRÆSERVATIO, Prophylaxis.

PRÆSERVATIVUM, Amuletum.

PRÆSERVATORIA INDICATIO. A preservative indication: one proper for preventing the development of disease.

PRÆSERVATORIUS, Prophylactic.

PRÆSPINALIS, Prespinal.

PRÆTIBIALIS, Pretibial.

PRAIRIE PINES, Liatris.

PRASINUM VIRIDE, Cupri subacetat.

PRASINUS, Porraceous.

PRASITES, from *prasium*, 'horehound.'

Wine in which the leaves of horehound have been infused.

PRASIMUM, Marrubium.

PRASUM, Allium Prasum.

PRAXIS, Action.

PRAXIS MED'ICA. The practical exercise of the healing art.

PRÆCIPITATE, RED, Hydrargyri nitricooxydum—p. White, Hydrargyrum præcipitatum.

PRÆCIPITATION, *Præcipitatio*, (F.) *Præcipité*, from *præcipitare*, (*præ*, 'before,' and *caput*, 'the head,') 'to throw headlong.' The action by which a body abandons a liquid in which it is dissolved; and becomes deposited at the bottom of the vessel. The matter so thrown down or precipitated, is called a *præcipitate*.

PRÆCIPITATION DE LA MATRICE, *Præcipitatie uteri*.

PRÆCIPITÉ BLANC, Hydrargyrum præcipitatum.

PRÆCORDIAL, Præcordial.

PRÆCUR'SORY, *Præcurso'rius*; from *præ*, 'before,' and *curro*, *cursum*, 'I run.' That which precedes.

PRÆCUR'SORY OR PRÆMON'ITORY SIGNS OR SYMPTOMS, (F.) *Signes précurseurs*, *S. avant-coueurs*, are those which indicate an approaching disease.

PREDISPONENT CAUSES, see *Causes*, predisponent.

PREDISPOSIT'ION, *Prædisposit'io*, from

*præ*, 'before,' and *disponere*, 'to dispose.' (F.) *Imminens morbida*. That constitution or condition of the body, which disposes it to the action of disease under the application of an exciting cause. Thus, in hereditary diseases, the conformation is such, that but a slight exciting cause may be required to produce them. When the disease arises, solely, from the predisposition, or under the additional influence of an extremely slight exciting cause, it is, by some, termed a *disposition*.

PREDORSAL, *Prædorsalis*, from *præ*, 'before,' and *dorsum*, 'the back.'

PRÆDORSAL REGION of the vertebral column is the anterior surface of the dorsal region.

PRÆ-DORSO-ATLOÏDIEN, *Longus colli*.

PRÆ-DORSO-CERVICAL, *Longus colli*.

PREGNANCY, *Utero-gestatio*, *Prægnatio*, *Prægnatus*, *Imprægnatio*, from *præ*, 'before,' and *genero*, 'to beget.' *Hysterocyc'sis*, *Graviditas*, *G. uterina*, *En'tymon*, *Cyc'sis*, *Encyc'sis*, *En'cyc'sis*, *Encymo'sia*, *Cyopho'ria*, *Gestatio*, *Fatatio*; (F.) *Grossesse*. The state of a female who has within her a fecundated germ, which gradually becomes developed in or out of the uterus. When placed in the cavity of the uterus,—by virtue of the vital principle which animates it, it becomes attached to the inner surface of that viscus, and obtains from it indirectly the nutriment necessary for its gradual development, during the space of ten lunar months or two hundred and eighty days,—the ordinary term of gestation, although the period may be protracted to 300 days or upwards,—at the expiration of which parturition occurs. Pregnancy is commonly limited to a single fœtus: at times, the uterus contains two or three.—See *Reproduction*. Occasionally, one or two moles—the degenerated products of conception—alone occupy the uterus:—at other times, a fœtus likewise exists. In certain cases, and owing to accidental circumstances, the fecundated ovum remains in the ovarium, or is arrested in the Fallopian tube. Pregnancy has, accordingly, been distinguished into, 1. *Natural* or *uterine*, when the fœtus is carried in the cavity of the womb: and 2. *Prænatural* or *extra-uterine*, *Esfatatio*, *Conceptio vitio'sa*, *Paracyc'sis* seu *Eccyc'sis*, *Echysterocyc'sis*, *Echysterocyc'sis*, *Dysto'cia*, *Dyscyc'sis* seu *Graviditas extra-uterina*, (F.) *Grossesse contre-nature*,—when it occurs in the ovarium, tube, or cavity of the abdomen.

During pregnancy, the female experiences remarkable changes in the condition of her organs and functions. The genital apparatus is, of course, most affected. The uterus changes its shape, situation, size, and texture. The usual signs of pregnancy are,—suppression of the catamenia; the abdomen gradually enlarging and forming a hard tumour; the umbilicus prominent in the latter months; the breasts increasing in size; the areola round the nipple becoming darker and the follicles more developed; kyestein in the urine from an early period; a bluish tint of the vagina after the fourth week; about the fifth month, the evidence by *ballotement*, and the placental *soffle* and sound of the fetal heart heard on auscultation; the motion of the fœtus perceptible, and the neck of the uterus diminishing in length at the advanced periods.

PREGNANCY, ABDOM'INAL, *Eccyc'sis abdomi-*

*na'lis, Catiocye'sis, Gravid'itas abdominal'is,* (F.) *Grossesse abdominale.* That in which the ovum has escaped into the cavity of the abdomen.

**PREGNANCY, AFETAL, Pregnancy without a fetus,** (F.) *Grossesse afatale, G. sans fetus.* Pregnancy produced by a false or degenerate conception, or any other affection, which has given place to unusual development of the uterus. Madame Boivin includes in this class, *sarco-hysteric, hydro-hysteric, gazo-hysteric, and hemato-hysteric pregnancies.*

**PREGNANCY, BIGEM'INAL, (F.) Grossesse bigéminal, Double pregnancy.** Pregnancy in which there are twins in utero.—Madame Boivin.

**PREGNANCY, COMPLEX, (F.) Grossesse complexe, G. inter-extra-utérine,** is when the womb, besides a fetus, contains much water, hydatids, a mole, &c.

**PREGNANCY, COMPOUND, Polybreph'ia, Polyey'e'sia, Polycye'sis, (F.) Grossesse composée,** is when there are two or three fetuses in the cavity of the uterus.

**PREGNANCY, DOUBLE, Pregnancy, bigeminal**—p. Extra-uterine, see Pregnancy.

**PREGNANCY, FALSE, Gravid'itas spu'ria, (F.) Grossesse fausse ou apparente, Pseudocye'sis.** Authors have called thus different affections of a more or less serious character, which resemble pregnancy; so as, at times, to impose upon the best informed practitioners. These diseases may be seated in the uterus or its dependencies, in the intestines or some other part of the abdomen. They may be;—a mole, hydatids, water, blood, or polypus distending the parietes of the uterus;—chronic enlargement of the uterus; development of tumours, &c., in its substance;—scirrhous; dropsy of the ovaria; ascites; tympanites, &c.

**PREGNANCY, FETAL, (F.) Grossesse fatale.** Pregnancy in which there is a fetus, or more than one, in the uterus or out of it. Madame Boivin puts in this class—the *solitary, bigeminal, trigeminal, and sarco-fatal pregnancies,* which form the first order; and the *tubal, ovarial, and abdominal,* which constitute the second.

**PREGNANCY, GAZO-HYSTER'IC, (F.) Grossesse Gazo-hystérique.** Afetal pregnancy, caused by development of air or gas in the cavity of the womb.—Madame Boivin.

**PREGNANCY, HEMATO-HYSTER'IC, (F.) Grossesse hémato-hystérique.** Afetal pregnancy, caused by accumulation of blood in the uterus.—Madame Boivin.

**PREGNANCY, HYDRO-HYSTER'IC, (F.) Grossesse hydro-hystérique.** Afetal pregnancy, occasioned by the secretion and accumulation of serous fluid in the uterus.

**PREGNANCY, INTERST'IAL, Gravid'itas in nteri substantiâ, Gravid'itas interstitialis.** The development of the embryo in the proper substance of the uterus. The case generally terminates fatally at an early period of gestation; the thin external paries of the uterus being ruptured, and the ovum passing into the abdominal cavity.

**PREGNANCY, MORBID, Parocye'sis, Dysto'cia, Dycye'sis.** The progress of pregnancy disturbed or endangered by the supervention of general or local disorder.—Good.

**PREGNANCY, OVA'RIAN, (F.) Grossesse ovarii-**

**enne ou de l'ovaire, Eccye'sis ova'ria, Oâriocye'sis, Obcye'sis, Gravid'itas extra-uteri'na in ova'rio.** Pregnancy in which the fetus is developed in the interior of the ovary.

**PREGNANCY, PRETEND'ED.** The criminal act of a female, who, not having been delivered, presents an infant as having been born of her. (F.) *Supposition de part.* (This term, in French, likewise includes the case of a female, who, having been delivered of a dead child, substitutes for it a living child which is not hers.)

**PREGNANCY, SARCO-FETAL, (F.) Grossesse sarco-fatale.** Pregnancy in which there are one or more fetuses, and one or more moles.—Madame Boivin.

**PREGNANCY, SARCO-HYSTER'IC, (F.) Grossesse Sarco-hystérique.** Afetal pregnancy formed by moles, hydatids, or a false conception.—Madame Boivin.

**PREGNANCY, SOL'ITARY, (F.) Grossesse solitaire ou simple.** Pregnancy in which there is a single fetus.—Madame Boivin.

**PREGNANCY, TRIGEM'INAL, (F.) Grossesse trigéminal ou triple.** Pregnancy in which there are three fetuses in the cavity of the uterus.—Madame Boivin.

**PREGNANCY, TUBAL, (F.) Grossesse tubaire, Eccye'sis tuba'lis.** Pregnancy where the fetus remains and is developed in the Fallopian tube.

**PREGNANCY, UTERINE,** see Pregnancy.

**PREGNANCY, UTERO-ABDOM'INAL, (F.) Grossesse utéro-abdominale.** Pregnancy consisting of two fetuses; one in the uterus—the other in the abdominal cavity.—Madame Boivin.

**PREGNANCY, UTERO-OVA'RIAL, (F.) Grossesse utéro-ovarienne.** Pregnancy with two fetuses, one in the womb, the other in the ovary.

**PREGNANCY, UTERO-TUBAL, (F.) Grossesse utéro-tubaire.** Pregnancy in which there is at the same time a fetus in the womb and another in the Fallopian tube.

**PREGNANT, Prægnans, Prægnas, Prægnax, Encar'pos, Grav'ida, Plena vu'lier, (F.) Encointe.** One in a state of pregnancy;—one with child.

**PREHENSIO, Catalepsy, Epilepsy.**

**PREHENS'ION, Præhens'io, from præhendere, 'to lay hold of.'**

**PREHENSION OF FOOD** is the act of carrying it to the mouth, and introducing it into that cavity. It is, also, called *Assumptio, Proslap'sis, Proslaphora.*

**PRÊLE, Hippuris vulgaris.**

**PRÉLOMBAIRE, Prelumbar.**

**PRÉLOMBO-PUBIEN, Psoas parvus—p. Trochantin, Psoas magnus.**

**PRELUM, Press—p. Arteriale, Tourniquet**  
**PRELUM'BAR, Pralumba'ris, (F.) Prélombaire, from præ, 'before,' and lumbi, 'the loins.'** That which is placed before the loins. The prelumbar surface of the spinal column is the anterior surface of the lumbar portion.

**PREMONITORY, see Precursory.**

**PRENANTHES, Gall of the Earth, Devitt Snakeroot, Lion's Foot.** There are many species of this indigenous plant, whose root and milky juice are very bitter. They are used in popular practice in dysentery; and in the form of cataplasm to bites of serpents.

**PRÉPARATION, Præparatio, from præ, 'before,' and parare, paratum, 'to get ready.'**

The act of making ready any substance whatever that has to be employed for any purpose.

Also, the product of any pharmaceutical operation;—*Præparatum*.

Any part of the human body, preserved for the uses of the anatomist, is so called.

PREPUCE, *Præputium*, perhaps from *πρῆς*, and *πρόθυ*, 'the foreskin.' *Epagógium*, *Posthè*, *Pella*, *Posthium*, *Putium*, *Forskin*. The prolongation of the integuments of the penis, which covers the glans. The prepuce is composed of two membranous layers: one external or cutaneous; the other internal or mucous, separated by cellular membrane. The mucous membrane lines the inner surface of the cutaneous layer till beyond the glans, when it is reflected over the latter; forming, behind the corona, a small *cul-de-sac* above the corpora cavernosa, which is interrupted by a triangular duplicature of the mucous membrane, called the *frænum*, fixed in the furrow at the inferior part of the glans, and terminating at a little distance from the orifice of the urethra. The clitoris is covered by a semilunar fold formed by a continuation of the skin of the labia. It is called *Præputium clitoridis*.

PRESBYODOCHIUM, Gerocomium.

PRESBYONOSI, from *πρῆς* but, 'old,' and *νόσος*, 'disease.' Diseases of old age.

PRESBYOPIA, Presbytia.

PRESBYSPHACELUS, Gangrene of old people.

PRESBYTIA, *Presbyopia*, *Amblyopia proximorum*, *Visus senilis*, (F.) *Vus longus*; from *πρῆς* but, 'an old person.' A very high degree is termed *Hyperpresbytia*. A condition of vision, common in old persons, which consists in the circumstance of near objects being confusedly seen, whilst those at a greater distance are clearly distinguished. It is supposed to depend generally on diminution of the convexity of the cornea; whence results an alteration in the convergency of the rays, so that they form a focus behind the retina. This defect is remedied by the use of convex glasses, which augment the convergence of the luminous rays. It is, also, called *Long-sightedness*, *Paropsis longinqua*, *Dysopia proximorum*.

PRESCRIPTION, *Præscriptio*, *Anagraphe*, from *πρῆς*, 'before,' and *scribere*, 'to write.' *Formula medicæ*, *Præscriptio medicæ*, *Receptum*, (F.) *Formule*, *Ordonnances*. The formula which the physician writes for the composition of medicine adapted to any case of disease. A prescription should be as simple as possible, and should bear upon its face the evidence of the objects to be fulfilled by it. No article should form part of it, unless adapted for serving some useful purpose. A compound prescription should be divided into four parts:—the *basis* or principal ingredient of the prescription; the *adjuvans*, or that which is designed to promote the action of the former; the *corrigens*, or that intended to correct its operation or obviate any unpleasant symptom which it may be apt to produce; and the *constituens*, *excipient*, or substance which gives to the other ingredients consistence or form. All these are seen in the following formula for cathartic pills:—

Aloes,	ʒj.	<i>Basis</i> .
Hyd. Chlorid. mit.	gr. x.	<i>Adjuvans</i> .
Olei Carui,	gtt. v.	<i>Corrigens</i> .
Syrupi,	q. s.	<i>Constituens</i> .
fiant. Pilulæ xx.		

It is obvious, however, that most prescriptions are more simple than this. The basis, for example, may require neither adjuvant, corrigent, nor constituent.

Dr. Paris has given the following synopsis of the principles of medicinal combination, *Isamataxiolog'ia*, *Isamatosyntaxiolog'ia*, which may serve as an instructive guide to the prescriber:—

### OBJECT I.

TO PROMOTE THE ACTION OF THE BASIS.

A. By combining the several different forms or preparations of the *same substance*. B. By combining the basis with substances which are of the same nature; i. e. which are individually capable of producing the same effects, with less energy than when in combination with each other. C. By combining the basis with substances of a *different nature*, and which do not exert any chemical influence upon it, but are found by experience, or inferred by analogy, to be capable of rendering the stomach or system more susceptible of its action.

### OBJECT II.

TO CORRECT THE OPERATION OF THE BASIS BY OBVIATING ANY UNPLEASANT EFFECTS IT MIGHT BE LIKELY TO OCCASION, AND WHICH WOULD PERVERT ITS INTENDED ACTION, AND DEFEAT THE OBJECT OF ITS EXHIBITION.

A. By *chymically* neutralizing or *mechanically* separating the offending ingredient. B. By adding some substance calculated to guard the stomach or system against its deleterious effects.

### OBJECT III.

TO OBTAIN THE JOINT OPERATION OF TWO OR MORE MEDICINES.

A. By uniting those medicines which are calculated to produce the *same ultimate* results, but by modes of operation totally different. B. By combining medicines which have entirely different powers; and which are required to obviate different symptoms, or to answer different indications.

### OBJECT IV.

TO OBTAIN A NEW AND ACTIVE REMEDY, NOT AFFORDED BY ANY SINGLE SUBSTANCE.

A. By combining medicines which excite different actions in the stomach and system, in consequence of which *new* or *modified results* are produced. B. By combining substances which have the property of acting *chymically* upon each other; the results of which are:—a. The formation of new compounds; b. The decomposition of the original ingredients, and the development of the more active elements. C. By combining substances, between which no other change is induced than a diminution or increase in the *solubility* of the principles in which their medicinal virtues reside. a. By the intervention of substances that act *chymically*. b. By the addition of ingredients whose operation is entirely *mechanical*.

### OBJECT V.

TO AFFORD AN ELIGIBLE FORM.

a. By which the *efficacy* of the remedy is enhanced. b. By which its *aspect* or *flavour* is rendered more agreeable, or its mode of administration more convenient. c. By which it is *preserved* from the spontaneous decomposition to which it is liable.

[The vocabulary in the author's "Medical Student," Philad. 1844, will aid the student, not only in translating, but in writing his prescriptions *mors solito*.]

**PRESENTATION**, from (Lat.) *præsens*, (*præ*, 'before,' and *ens*, 'being.') The part of a fœtus which is felt *presenting*, on examination *per vaginam*. When the head presents, and especially the vertex, or the feet, knees, or breech, the presentation is said to be *natural*: when any other part, *preternatural*; and the labour is styled *perverse* or *preternatural*, *Parodynia perversa*, *Dystocia perversa*, *Cross-birth*, (F.) *Accouchement contra nature*. When any part besides the head, feet, knees, or breech presents, the operation of *turning* becomes necessary. See Parturition.

**PRESIS**, Swelling.

**PRÊSLE**, *Hippuris vulgaris*.

**PRESMA**, Swelling.

**PRESPI'NAL**, *Præspinalis*; from *præ*, 'before,' and *spina*, 'the spine.' That which is situate before the spine. The preapinal surface of the vertebral column is the anterior surface.

**PRESS**, *Prælium*, *Prælium*, *Pressorium*, *Pîster*, *Piostë'ron*, (F.) *Pressoir*, *Presse*. An instrument for subjecting matters to considerable pressure, for the purpose of separating their juices or oils.

**PRESS OF HEROPHILUS**, Torcular Herophili.

**PRESSE-ARTÈRE**. An instrument invented by Deschamps for the immediate compression of arteries. It is composed of a plate six or seven lines long, and three broad, and of a rod or stem two inches long, placed perpendicularly above the plate and riveted. At each extremity of the plate is a hole, through which each of the ends of the ligature, to be placed upon the artery, is passed. The ligature is then to be tightened by drawing the ends, and fixing them to the perpendicular rod. This *presse-artère* or *serre-artère*, surrounded with charpie, remains in the wound, until there is no longer danger of hemorrhage. The ligature is then cut, and the instrument withdrawn. It is an unnecessary instrument.

**PRESSE-URÈTHRE**, *Jugum Penis*. A kind of forceps of elastic iron, the branches of which, padded, may be approximated or separated by means of a screw. The penis is introduced between the branches, one of them being applied to the urethra, and the screw is tightened so as to exercise a degree of pressure sufficient to bring the parietes of the canal in contact. This instrument is sometimes used in incontinence of urine, to prevent the constant discharge of that fluid.

**PRESSIO**, Pressure.

**PRESSION ABDOMINALE**, Pressure, abdominal.

**PRESSOIR**, Press—*p. d'Hérophile*, Torcular Herophili.

**PRESSORIUM**, Press.

**PRESSURE**, *Præs'io*, from *promo*, *pressum*, 'I press.' The action of pressing.

**PRESSURE, ABDOMINAL**, (F.) *Pression abdominale*. A mode of examination by means of which the sensibility, size, suppleness, or hardness of any morbid abdominal viscus may be compared, in these respects, with its healthy condition. Bichat proposed, with the view of exploring the state of the thoracic organs, to exert a pressure from below upwards on the

abdominal organs, so as to crowd them upon the diaphragm, and thus to diminish the dimensions of the cavity of the chest, noticing to what extent respiration was affected by this action. No great information can of course be derived from it.

**PRETENDED DISEASES**, Feigned diseases.

**PRETIBIAL**, *Prætibiālis*; from *præ*, 'before,' and *tibia*, 'the tibia.' That which is situate before the tibia; as the *ilio-prætibiālis* and *ischio-prætibiālis* muscles.

**PREVENTIVE, ROYAL**; from *prævenire*, (*præ*, and *venire*), 'to come before.' An empirical preparation used as a prophylactic against the venereal virus. It is a solution of *acetate of lead*,—the *Liquor Plumbi Subacetatis dilutus*.

**PREVERTEBRAL APONEUROSIS**. The aponeurosis which covers the muscles of the prevertebral region.

**PREVERTEBRAL ARTERY**. A ramus of the meningeal branch, and sometimes even of the trunk, of the pharyngeal artery, which is distributed to the prevertebral region.

**PREVERTEBRAL MUSCLES**, see Cervical region, anterior—*p. Region, Cervical region, anterior*.

**PRIAPEIA**, *Nicotiana rustica*.

**PRIAPIS'COS**. Same etymon as the next. Name of a piece of wood which forms part of the *scamnum Hippocraticum*. Paulus of Ægina calls this a tent of linen shaped like the penis.

**PRIAPISMUS**, *Tenti'go*, *T. Penis*, *Priapism*, *Horn-colic* (vulg.), *Ento'sia Priapismus*, *Rhopali'smus*, *Satyri'asis*, *Styma*, *Sty'sis*, from Πριάπτις, Priapus, 'the male organ.' Constant and distressing erection, without any voluptuous idea or desire for venery. It is often symptomatic; and sometimes the immediate result of morbid causes,—of the action of cantharides, for example. The application of cold liquids to the penis, and the internal use of opium and camphor are the means usually had recourse to for its removal.

**PRIAPITIS**, Phallitis.

**PRIAPUS, Penis**—*p. Cervi*, see Cervus—*p. Ceti*, Leviathan penis.

**PRICKING**, Sax. *pricccan*, (D.) *pricken*, (F.) *Picotement*. A variety of pain, compared to that which pointed bodies would occasion.

**PRIDE OF CHINA**, *Melia azedarach*—*p. of India*, *Melia azedarach*—*p. Tree*, *Melia azedarach*.

**PRIEST'S PINTLE**, *Arum maculatum*.

**PRIMA CELLA COLI**, Cæcum.

**PRIMÆ VÆ**. The *first passages*. The stomach and intestinal canal:—the lacteals being the *secundæ viæ*, or *second passages*. See Ways, digestive.

**PRIMEVÈRE**, *Primula veris*.

**PRIMIP'ARA**, *Primipartu'riens*, from *primus*, 'first,' and *parere*, 'to bring forth.' A name given to a female who brings forth for the first time.

**PRIMIPARTURIENS**, Primipara.

**PRIMI-STERNAL**, *Primi-sternalis*, from *primus*, 'the first,' and *sternum*, 'the sternum.' M. Béclard has called *os primi-sternal* or *clavi-sternal*, the bony portion of the sternum.

**PRIMIT'Æ**. The *first waters*, or the waters discharged before the extrusion of the fœtus.

**PRIMORDIUM**, Arche.

**PRIMROSE, EVENING**, *Oenothera biennis*—*p. Tree*, *Oenothera biennis*.

**PRIMULA VERIS**, from *primulus*, 'the beginning;' so called, because it flowers in the beginning of the spring; *Verbas'ulum*, *Paralytica*, *Herba paralytica* seu *paralytica*; the *Cowslip*, *Paisil*, or *Peagle*, (F.) *Primevère*. *Family*, Primulaceæ. *Sex. Syst.* Pentandria Monogynia. The flowers have been considered to be mildly tonic, antispasmodic, and anodyne.

**PRIMULA VULGARIS**. The leaves and roots of this plant have been used as sternutatories.

**PRINCEPS, Rectum.**

**PRINCEPS CERVICIS (Artery), Cervical Artery.** A branch of the occipital artery, which descends between the splenius and complexus muscles, and may be followed down to the lower part of the neck.

**PRINCEPS POLLICIS (Arteria), Arteria magna pollicis.** When the two collateral arteries of the thumb take origin from a common trunk—the trunk is the *Princeps pollicis*.

**PRINCEPE CRYSTALLIZABLE DE DÉROSNE**, Narcotine.

**PRINCIPES IMMÉDIATS**, Principles, immediate.

**PRINCIPIUM**, Arche, Element—p. Acidificans, Oxygen—p. Adstringens, Tannin—p. Bysodepsicum, Tannin—p. Coriaceum, Tannin—p. Hydrogeneticum, Hydrogen—p. Hydroticum, Hydrogen—p. Oxygenans, Oxygen—p. Salivale, see Saliva—p. Scytodepsicum, Tannin—p. Urinosum, Urea.

**PRINCIPLE, COLOURING, OF THE BLOOD.** A name, given to the immediate principle in animals, to which the blood owes its red colour. It is solid, inodorous, and insipid. When recently separated from blood, it has a purple-red colour. When distilled, it furnishes, amongst other products, a purple oil. It is insoluble in water; but, if diluted with that liquid, acquires a vinous red hue. It communicates a red colour to the albumen of the blood, and affords, on analysis, iron, to which the colour has been ascribed. See *Hæmaphæin*, and *Hæmatin*.

**PRINCIPLE, VITAL**, see Vital principle.

**PRINCIPLES, IMMEDIATE, (F.) Principes immédiats, Matériaux immédiats.** A name given to a considerable number of substances, composed of at least three elements, and which are obtained from animals and vegetables without alteration, by simple processes, and, in some measure, immediately.

**PRINCIPLES, IMMEDIATE, OF ANIMALS, Proximate principles, Organic Elements, Compounds of Organisation.** These are divided into acid principles, fatty principles, and principles which are neither fat nor acid. The first include the *uric*, *rosacic*, *purpuric*, *allantoic*, *casic*, *butyric*, &c. The fatty principles are—*stearin*, *elain*, *cholesterin*, &c.; and the last division includes the most important compounds of organization:—*fibrin*, *gelatin*, *albumen*, *urea*, *picromel*, *osmazome*, &c.

**PRINCIPLES, PROXIMATE, P. immediate.**

**PRINOS**, *P. verticillatus*, *Alcan'na major latifolia dentata*, *Aquifolium foliis deciduis*, *Prinos Gronovii*, *Prinos padifolius*, *Black Alder*, *Virginia Winter Berry*, *Whorled winter berry*, *Fever bush*, (F.) *Apalachine à feuilles de Prunier*. *Nat. Ord.* Rhamnii. *Sex. Syst.* Hexandria Monogynia. The bark of this common shrub of the United States is astringent, bitter and pungent. The berries are, likewise,

bitter. The bark has been used as a substitute for the cinchona, in intermittents, and as a tonic.

**PRINOS GRONOVII**, Prinos—p. *Padifolius*, Prinos.

**PRINON, Saw.**

**PRINON'DES**, from *πριον*, 'a saw,' and *ουδρ*, 'shape.' *Serrated*. Applied to the sutures of the head.

**PRIOR ANNULARIS, Interos'seus quartus** of Winslow. An internal interosseous muscle, which arises from the outside of the metacarpal bone of the ring finger, and is inserted into the outside of the tendon on the back of the ring finger. Its use is to draw the ring finger outwards.

**PRIOR INDICIS, Extensor tertii interos'seus indicis**; (F.) *Sous-métacarpo-phalangien*. It arises from the outer or radial side of the metacarpal bone of the fore finger, and is inserted into the outside of the tendon on the back of the fore finger. *Action*:—to draw the finger outwards, towards the thumb.

**PRIOR INDICIS PEDIS, Adductor Indicis pedis.** An external, interosseous muscle of the foot, which arises from the contiguous sides of the metatarsal bones of the great and fore toes, and is inserted into the inside of the root of the first bone of the fore toe. *Action*:—to pull the fore toe inwards.

**PRIOR MEDII, Prior medii digiti.**

**PRIOR MEDII DIGITI, Prior Medii, Second interos'seus** of Douglas. An external, interosseous muscle of the hand, which arises from the corresponding sides of the metacarpal bones of the fore and middle fingers, and is inserted into the outside of the tendon on the back of the middle finger. *Action*:—to draw the middle finger outwards.

**PRIOR MEDII DIGITI PEDIS, Abductor medii digiti pedis.** An internal, interosseous muscle of the foot, which arises from the inside of the metatarsal bone of the middle toe, and is inserted into the inside of the root of the first bone of the middle toe. *Use*:—to pull the middle toe inwards, or towards the inner side of the foot.

**PRIOR MINIMI DIGITI, Abductor minimi digiti.** An internal interosseous muscle of the foot; which originates from the inside of the metatarsal bone of the little toe; and is inserted into the inside of the root of the first bone of the little toe. *Action*:—to pull the little toe inwards.

**PRIOR TERTII DIGITI PEDIS, Adductor tertii digiti pedis.** An internal interosseous muscle of the foot, which arises from the inner and under part of the metatarsal bone of the third of the small toes, and is inserted into the inside of the root of the first bone of the third of the small toes. *Action*:—to pull the third of the small toes inwards.

**PRISIS, Brygmus, Trepanning.**

**PRISMA, Scoba.**

**PRISMUS, Brygmus, Trepanning.**

**PRIVATE PARTS, Genital organs.**

**PRIVET, Ligustrum vulgare.**

**PRIVITIES, Genital organs.**

**PRIVY, Ligustrum vulgare**—p. *Members*, Genital organs—p. *Parts*, Genital organs.

**PRO, pro**, 'before.' A common prefix to words, as in *Procatartecis*, *Prostate*, &c.

**PROAGOREUSIS, Prognosis.**

**PROBANG**, *Detrusorium ex baleña*. A long slender rod of whalebone, with a piece of sponge at its extremity, intended to push down extraneous bodies, arrested in the œsophagus, into the stomach. A similar instrument is called by J. L. Petit, *Repoussoir d'artères*.

**PROBARBIUM**, *Genieas*.

**PROBASCANTIUM**, *Amuletum*.

**PROBASCANTIUM**, *Amuletum*.

**PROBE**, *Specillum*—p. Eyed, see *Specillum*.

**PROBING**, see *Melosis*.

**PROBOLE**, *Processus*.

**PROCARDIUM**, *Scrobiculus cordis*.

**PROCEDE**, *Processus*.

**PROCEDURE**, *Procedé*.

**PROCEPHALI**, *Capitones*.

**PROCERUS NASI**, *Pyramidalis nasi*.

**PROCES CILIAIRES**, *Ciliary processes*.

**PROCESS**, *Apophysis, Processus*.

**Proc'ess**, (F.) *Procedé, Ratio*, from *procedere*, to march forwards. *Procedure*,—method of performing any operation, chemical, pharmaceutical, or surgical.

**Process**, *Cuneiform*, *Basillary process*—p. *Modelling*, see *Modelling Process*—p. of *Rau*, see *Malleus*—p. *Vertical superior longitudinal*, *Falx cerebri*.

**PROCES'SUS**. A *process*; same etymon; *Processura, Probole*. An apophysis or eminence of a bone; see *Apophysis*. Also, any part which seems prolonged beyond others with which it is in connexion; as the *Ciliary processes*.

**Processus Anconæus**, *Olecranon*—p. *Annularis*, *Pons Varolii*—p. *Belenoides*, see *Belenoides*—p. *Caudatus*, *Lobulus caudatus*—p. à *Cerebello ad medullam oblongatam*, *Corpora restiformia*—p. *Cerebelli ad pontem*, *Peduncles of the cerebellum*—p. *Cerebelli ad testes*, *Peduncles of the cerebellum*—p. *Cerebri lateralis*, *Cornu ammonis*—p. *Ciliares*, *Ciliary processes*—p. *Cochleariformis*, see *Tympanum*—p. *Cuneiformis ossis occipitis*, *Basillary process*—p. *Enteroides cerebri*, *Convulsions (cerebral)*—p. *Falciformis cerebelli*, *Falx cerebelli*—p. *Faleiformis duræ matris*, *Falx cerebri*—p. *Gracilis of Rau*, see *Malleus*—p. *Laterales uteri*, *Tubæ Fallopiæ*—p. *Mamillares*, *Papillæ of the kidney*, *Olfactory nerves*—p. *Mamillares cerebri*, *Mamillary tubercles*—p. *Olivaris*, *Olivary Process*—p. *Orbicularis cerebri*, *Infundibulum of the brain*—p. *Papillares*, *Olfactory nerves*—p. *Papillarum*, *Olfactory nerves*—p. *Rachidianus*, *Medulla spinalis*—p. *Sterni xiphoidæus*, *Xiphoid*—p. ad *Testes*, see *Valvula Viennensis*—p. *Transversus duræ matris*, *Tentorium*—p. *Uvifer*, *Uvula*—p. *Ventriculi*, *Duodenum*—p. *Xiphoides*, *Xiphoid cartilage*—p. *Xipho-sternalis*, *Xiphoid cartilage*—p. *Zygomatikus*, *Zygomatikus process*.

**PROCHEILA**, *Antelabia*.

**PROCHEILIDION**, *Procheilon*.

**PROCHEILON**, *Procheilidion, Prolabium, Antilabium*. The extreme projecting part or margin of the lips.

**PROCHEUMA**, *Parenchyma*.

**PROCIDENCE DE L'ŒIL**, *Exophthalmia*.

**PROCIDENTIA**, *Prolapsus*—p. *Ani*, *Proctocele*—p. *Intestini recti*, *Proctocele*—p. *Iridis*, *Staphyloma of the Iris*—p. *Oculi*, *Exophthalmia*—p. *Sedis*, *Proctocele*—p. *Uteri*, *Prolapsus uteri*.

**PROCNEME**, *Tibia*.

**PROCNEMIUM**, *Tibia*.

**PROCNEMIUS**, *Procnemius*, from *προ*, 'before,' and *κοιλια*, 'belly.' One who has a large pendulous abdomen.

**PROCELUS**, *Procelusius*.

**PROCONDYLLUS**, *περοκονδυλος*, from *προ*, 'before,' and *κονδυλος*, 'a knot.' The first joint of the fingers; the second being called *κονδυλος*; and the third *μετακονδυλος*.

**PROCREATIO**, *Generation*—p. *Sanguinis*, *Hæmatisia*.

**PROCTAGRA**, from *περσικος*, 'anus,' and *αγγε*, 'seizure.' Gout in the rectum. *Proctalgia*.

**PROCTAL'GIA**, *Proctica simplex, Proctagra, Dolor ani, Proctodyn'ia*, from *περσικος*, 'the anus,' and *αλγος*, 'pain.' Pain in the anus. Generally symptomatic of disease, as of hemorrhoids, scirrhus, &c.

**PROCTALGIA**, *Clunisia*—p. *Hæmorrhoidalis*, *Hæmorrhoids*—p. *Inflammatoria*, *Rectitis*—p. *Intertriginea*, *Chafing*—p. *Rheumatica*, *Proctorrhœma*.

**PROCTATRE'SIA**, *Imperforatio ani*, from *περσικος*, 'the anus,' and *ατραησια*, 'imperforation.' Imperforate state of the anus.

**PROCTICA**. Pain or derangement about the anus, without primary inflammation. A genus in the class *Caliaca*, order *Enterica*, of *Good*.

**PROCTICA EXANIA**, *Proctocele*—p. *Marisca*, *Hæmorrhoids*—p. *Simplex*, *Proctalgia*—p. *Tenesmus*, *Tenesmus*.

**PROCTITIS**, *Proctitis*.

**PROCTITIS**, *Proctitis, Archi'tis, Clunisia, Cysso'tis*, from *περσικος*, 'the anus.' Inflammation of the anus and rectum. *Rectitis*.

**PROCTITIS GANGRÆNOSA**, *Proctocæca*.

**PROCTOC'ACÆ**, *Proctitis gangrænosa*, from *περσικος*, 'the anus,' and *κακος*, 'evil.' A disease of the rectum, so called by *Fuchs*, which, according to him, is common in Peru, in the neighbourhood of Quito and Lima, on the Honduras and Mosquito coasts, in Brazil, and on the Gold coast, &c. It is called by the Portuguese, *Bicho*, and *Bicho do Culo*; by the people of Quito, *Mal del Valle*, from its prevalence in the valleys; and in Africa, *Bisios de Kis*. It is an adynamic, inflammatory condition, frequently ending in gangrene. It has been attributed to bad food, and the use of spices.

**PROCTOCELË**, from *περσικος*, 'the anus,' and *κηλη*, 'hernia.' *Prolapsus Ani, Proctoptoma, Proctoptosis, Proctosis, Hedrocel'le, Arthrooptoma, Archoceptoma, Archoptoma, Archoptell, Archoptosis, Ead'nia, Hamorrhoids procdens, Hamorrhoids ad ead'nia, Procidencia Ani, P. intestini recti, P. sedis, Ecto'gia Ani, Sedes procid'ua, Falling down of the Fundament, Coming down of the Body*, (F.) *Chute du rectum, C. du Fondement, Renvoissement du rectum*. Inversion and prolapse of the mucous coat of the rectum, from relaxation of the sphincter with more or less swelling. In the treatment, the application of cold water and astringent lotions must be recommended: and if other means fail, one of the radii of skin, which converge at the anus, may be snipped off. On cicatrizing, the verge of the anus will be contracted, and the cure probably complete. In the way of palliation, the parts may be retained by an appropriate bandage.

PROCTOCYSTOTOMIA, see Lithotomy.

PROCTODYNIA, Proctalgia.

PROCTON'CUS, from *πρωκτος*, 'anus,' and *οηκος*, 'swelling.' Swelling of the anus.

PROCTOPTOMA, Proctocele.

PROCTOPTOSIS, Proctocele.

PROCTORRHAGIA, Hæmorrhoidal flux.

PROCTORRHEU'MA, from *πρωκτος*, 'anus,' and *ρρημα*, 'defluxion.' Rheumatism of the anus.

PROCTORRHE'A, from *πρωκτος*, 'the anus,' and *ρρω*, 'I flow.' A discharge of blood or slime from the anus. See Hæmorrhoids.

PROCTOS, Anus.

PROCTOSIS, Proctocele.

PROCTOSPASMUS, Tenesmus.

PROCTOSTENOSIS ORGANICA, Stricture of the rectum.

PROCTOTOREU'SIS, from *πρωκτος*, 'anus,' and *τορευω*, 'to perforate.' Perforation of a closed anus.

PROCTUS, Anus.

PROCURATIO ABORTÛS. The promotion of abortion.

PRO'DROMUS, from *πρω*, 'before,' and *δρομος*, 'course.' The period immediately preceding an attack of disease; in which the *pre-cursory signs* occur.

PROD'UCT, from *produco*, 'I produce.' (F.) *Produit*. The result sought to be attained by any pharmaceutical operation.

PRODUCTIO, Prolapsus—p. Uvulæ à pitiuità, Staphylœdema.

PRODUCTION, *Productio*; same etymon. This word is used, especially by the French, synonymously with *prolongation*. The mesentery is, in this sense, a production of the peritoneum.

PRODUCTION ACCIDENTELLE. An accidental or adventitious structure.

PRODUCTIVITAS, Fecundity.

PRODUIT, Product.

PROEGUMENÆ CAUSÆ, Causes, predilection.

PRÆLIUM, Press, Tourniquet.

PROE'MINENT, *Proëminens*, from *pro*, 'forwards,' and *eminere*, 'to project.' Some anatomists call the 7th cervical vertebra the *prominent vertebra*, on account of the length of its spinous process, which passes the level of the neighbouring vertebrae.

PRÆO'TIA, *Pro'otes*, *πρωοτης*, or *πρωοτης*, from *πρωι*, 'early,' 'precocity.' *Præcox maturitas*, *Præcocious maturity*. Premature development of sexual organization or power.—Good.

PROFLUVII CORFEX, Nerium antidysentericum.

PROFLU'VIUM, *Discharge*, *Fluxus*, *Polyrrha'ia*, *Flux*; from *profluo*, 'I run down.' A term under which some nosologists have comprised all morbid discharges or fluxes:—others, increased excretions attended by fever.

PROFLUVIUM ALVI, Diarrhœa—p. Genitale mulieb're, Menses—p. Mucosum urethræ, Gonorrhœa—p. Mulieb're, Leucorrhœa, Menses—p. Sanguinis, Hæmorrhagia—p. Sanguinis è Renibus, Nephrorrhagia—p. Sanguinis ex Ore, Stomatorrhagia—p. Sanguinis ex Utero, Metrorrhagia—p. Seminis, Pollution—p. Ventris, Diarrhœa.

PROFUNDUS, (*pro*, and *fundus*, 'base.') *Alnus*, 'having a deep base.' A name given to

different parts, which are seated profoundly as regards others.

PROFUNDA ARTE'RIA FEM'ORIS, *A. vasta posterior seu muscularis fem'oris*, *Artère-grande musculaire de la cuisse*. (Ch.) This large branch arises commonly from the posterior part of the crural, between the pubis and lesser trochanter. It descends deeply, situate before the adductors; passes through the third adductor above the opening in it for the trunk of the femoral; and terminates in the short portion of the biceps. The *muscularis profunda* gives off, 1. The *external circumflexa*: 2. The *internal circumflexa*: and, 3. The three *perforantes*.

PROFUNDA ARTE'RIA HU'MERI, *P. superior*, *Art'ria spiralis*, (F.) *Artère humérale profonde*, *A. collatérale externe*, *Grand musculaire du bras*, (Ch.) Its origin is variable. When it arises from the brachial artery, it is given off opposite the groove of the humerus destined for the radial nerve, and descends backwards between the three portions of the triceps, accompanied by the nerve; giving branches to that muscle and to the humerus. When it reaches the posterior part of the bone, it divides into two branches, which are distributed to the triceps, supinator longus, &c.

PROFUNDA ARTERIA INFERIOR vel MINOR is often a branch of the last; but, commonly, is given off from the brachial, near the middle of the arm. It gives off branches to the muscles, &c., about the inner side of the os humeri. It is, also, called *large communicating ulnar* or *profundo-ulnar*.

PROFUNDA ARTERIA PENIS. Chaussier has given this name to the *cavernous artery*, which arises from the artery of the penis, furnished by the internal pudic.

PROFUNDA ARTERIA SUPERIOR, *Profunda humeri*.

Certain muscles are distinguished by the names *profound* or *deep-seated*, and *superficial*. Thus, we speak of the *superficial* and *deep-seated* muscles of the neck, &c.; the *flexor profundus perforans*, &c.

PROFUSIO, Hæmorrhagia.

PROFUSIO AQUÆ. The discharge or breaking of the waters at birth.

PROFUSIO SANGUINIS, Hæmorrhagia—p. Seminis, Ejaculation—p. Subcutanea, Purpura simplex.

PROGASTOR, from *πρω*, 'before,' and *γαστρο*, 'belly.' One who has a pendulous belly.

PROGENIES, Epigone.

PROGENY, Epigone.

PROGLOS'SIS, from *πρω*, 'before,' and *γλωσσα*, 'the tongue;' *Apex linguæ*. The extremity or tip of the tongue.

PROGNO'SIS, *Proëgoreu'sis*, *Prorrh'is*, *Præcognit'io*, *Prognostic'el*, *Præno'tio*, *Prænuntiat'io*, *Præsent'ia*, *Præsci'tio*, *Prona'ta*, *Præph'asis*, *Prædict'io*, (F.) *Prognostic*, *Prono'tic*, from *πρω*, 'before,' and *γινωσκω*, 'I know.' The judgment formed by the physician regarding the future progress and termination of any disease.

PROGNOSIS, GENERAL. The opinion formed of a disease in the abstract. Thus, we say, the *General prognosis of Cynanche tonsillaris* is favourable;—of *Phthisis pulmonalis*, unfavourable, &c.

PROGNOSIS, PARTICULAR. The opinion formed of any particular case of disease. The *parti-*

ular prognosis of one case of typhus, for example, may be favourable, whilst that of another may be unfavourable.

PROGNOSIS EX LINGUÀ, Glossomania.

PROGNOSTIC, Prognosis.

PROGNOSTICE, Prognosis.

PROGRESSIO, Augmentation.

PROGRESSUS, Augmentation.

PROIOTES, Frœtia.

PROJECTURA, Process.

PROLABIUM, Procheilon.

PROLAPSUS, from *prolabor*, *prolapsus*, (*pro*, and *labor*, *lapsus*, 'to slide,') 'I slip down.' *Procidencia*, *Delapsio*, *Delapsus*, *Hypor'rhysis*, *Propto'ma*, *Propto'sis*, *Productio*, *Propendencia*, *Prominentia*, *Ptosia*, *Casus*, (F.) *Chute*; a protrusion; a falling down. A genus of diseases in the class *Locales* and order *Ectopie* of Cullen, distinguished by the falling down of a part through the orifice with which it is naturally connected.

PROLAPSUS ANI, Proctocœle—p. Bulbi oculi, Exophthalmia—p. Cornæ, Staphyloma of the cornea—p. Iridis, Ptosia iridis—p. Lingvæ, Glossocœle, Paraglossa—p. Œsophagi, Pharyngoœle—p. Palpebræ, Blepharoptosis—p. Pharyngis, Pharyngoœle—p. Umbilici, Exomphalus.

PROLAPSUS UTERI, *Exometra*, *Metropto'sis*, *Metropropto'sis*, *Orthysteropto'sis*, *Orthysteropto'ma*, *Falling down of the womb*, *Ædopto'sis uteri*, *Hysteropto'sis*, *Hystero'cèle nuda*, *Procidencia uteri*, (F.) *Abaisement de la matrice*, *Chute de la matrice*, *Descente de la matrice*, *Préispitiation de la matrice*. Some use the term, 'Procidencia Uteri' for a minor degree of the affection than prolapsus;—*Relaxatio uteri* expressing the slightest state of all. A falling down of the uterus, owing to relaxation of the parts about the utero-vaginal region. In the treatment, the horizontal posture must be insisted upon; the injection of astringent substances *per vaginam* be advised; and if the affection be not remedied by these means, a pessary may be employed as a palliative, or the operation of *Episioraphy* be performed.

PROLAPSUS UVULÆ, Staphylœdema.

PROLAPSUS VAGINÆ, *Hysteropto'sis Vaginæ*, *Prolapsus Ædoptosis Vaginæ*, *Colo'opto'sis*, *Colopopto'sis*, *Elythropto'sis*—Protrusion of the upper part of the vagina into the lower. This, like the descent of the uterus, may be *relaxation*, *procidencia*, *prolapsus*, or complete *inversion*.

PROLAPSUS VESICÆ, Exocyste.

PROLECTATIO; from *pro*, and *legere*, *lectum*, 'to gather.' Action of separating the finer parts of a body from the grosser.

PROLEPTICS, *Prolepticæ*, from *pro*, 'before,' and *λαμβάνω*, 'I seize hold of.' A term proposed recently by Dr. Laycock to signify the art and science of predicting in medicine.

PROLEPTICUS, Anticipating.

PROLES, Epigone.

PROLICIDE, *Prolucidium*; from *proles*, 'offspring,' and *caedere*, 'to kill.' Destruction of offspring. A term, which includes fœticide as well as infanticide.

PROLIFIC, *Prolif'icus*; from *proles*, 'offspring,' and *facio*, 'I make.' That which has the faculty of engendering; applied to man, and animals, and to their sperm or seed; as well as to remedies, which, by strengthening

the genital organs, increase the secretion of sperm.

PROLIG'EROUS, *Pro'liger*, *Prolig'erus*, from *proles*, 'offspring,' and *gero*, 'I carry.' That which is connected with carrying the offspring.

PROLIGEROUS DISC OF LAYER, *Discus prolig'erus*, *Discus vitelli'nus*, *Stratum prolig'erum*, *Gonostro'ma*. A granular layer, situate generally towards the most prominent part of the ovarian vesicle, in the centre of which the true ovum or ovule exists.—Von Baer.

PROLONGEMENT RACHIDIEN, *Medulla spinalis*—p. *Sous-occipital*, Basiliary process.

PROMALACTE'RIMUM, from *πρῶ*, 'before,' and *μαλαρῶ*, 'I soften.' The room, in the ancient gymnasium in which the body was softened and anointed. One of the operations in bathing.

PROMANUS, see *Digitus*, *Pollex*.

PROMETOPIDIA, Frontal bandages.

PROMETOPIS, *Prometopid'ion*, from *πρῶ*, 'before,' and *μετωρον*, 'the forehead.' The skin of the forehead.

PROMINENTIA, Prolapsus, Protuberance—p. *Annularis Cerebri*, *Pons Varolii*—p. *Cornæ*, *Ceratoœle*—p. *Ossis Continua*, *Apo-physis*.

PROMINENTIÆ ALBICANTES, Mammillary tubercles—p. *Semiövales Medullæ Oblongatæ*, *Corpora olivaria*.

PROMONTORIUM, Promontory—p. *Faciæ*, *Nasus*—p. *Ossis Sacri*, see *Sacrum*.

PROMONTORY, *Promontorium*, *pro* and *mons*, *montis*, 'a mountain,' seu *Tuber* seu *Tuberosititas Tym'pani*. A small projection at the inner paries of the cavity of the tympanum, which corresponds to the external scala of the cochlea, and especially to the outer side of the vestibule.

PROMONTORY OF THE SACRUM, see *Sacrum*.

PRONATEUR CARRÉ, *Pronator radii quadratus*—p. *Grand ou rond*, *Pronator radii teres*—p. *Petit*, *Pronator radii quadratus*.

PRONATION, *Pronatio*, from *pronus*, 'inclined forwards.' Anatomists understand, by pronation, the motion by which the inferior extremity of the radius passes before the ulna, and thus causes the hand to execute a kind of rotation from without inwards.

PRONATOR. That which produces the motion of pronation. This name has been given to two of the muscles of the forearm.

PRONATOR OBLIQUUS, *P. radii teres*—p. *Quadratus*, *P. radii quadratus*.

PRONATOR RADII QUADRATUS, *P. quadratus*, *Quadratus rad'ii*, *P. quadratus* seu *transversus* (Winslow), *Pronator radii brevis* seu *quadratus* (Cowper), (F.) *Cubito-radial* (Ch.), *Petit ou carré pronateur*. This muscle is situate at the anterior, inferior, and profound part of the forearm. It is flat and square, and is attached, within, to the inferior quarter of the anterior surface of the ulna; and, without, to the inferior quarter of the anterior surface of the radius. It produces the motion of pronation.

PRONATOR RADII TERES, *P. teres* sive *obliquus* (Winslow), (F.) *Epitrochleo-radial* (Ch.), *Grand ou rond pronateur*. A muscle seated at the upper and anterior part of the forearm. It is long, flat, and larger above than below. It

is attached, above, to the inner tuberosity of the humerus and to the coronoid process of the ulna. From thence it passes obliquely downwards and outwards, and terminates at the middle of the outer surface of the radius. It causes the radius to turn on the ulna, to produce the motion of pronation. It can, also, bend the forearm on the arm, and conversely.

PRONATOR TERES, P. radii teres.

PRONAUS, Vestibulum.

PRONERVATIO, Aponeurosis, Tendon.

PRONCEA, Prognosis.

PRONOSTIC, Prognosis.

PROPENDINGIA, Prolapsus.

PROPERTIES, PHYSICAL OF THE TISSUES. These are *flexibility, extensibility and elasticity, racornissement and imbibition.*

PROPERTIES, VITAL. Those which depend upon organization, as *contractility.*

PROPHASIS, Prognosis.

PROPHYLACTIC, *Prophylacticus, Diaphylactic, Diastotic, Synteroticus, Præservatorius*, from *προ*, and *φύλασσω*, 'I defend.' A preservative.

PROPHYLAXIS, *Prophylact, Prophylactic, Synteroticus*. Same etymon. *Præservatio, Præcautio, Præcustodia*. Preservative or preventive treatment.

PROPOLIS, from *προ*, 'before,' and *πολις*, 'city,' literally, 'that which is before the city.' *Ceranthemus, Commois, Bee-bread*. A red, resinous matter, with which the bees cover the bottom of the hive. Its fume has been esteemed antiasthmatic.

PROPOMA, from *προ*, 'before,' *πομα*, 'a drink.' Ancient name of a medicine, composed of seven parts of *honey* and four of *wine*. It was drunk before a meal.—Paulus of Ægina.

PROPORTIO, Symmetry.

PROPOSITUM, Intention.

PROPOTISMOS. Same etymon. *Præpotio*. An ancient name for medicines which were given to the patients before purging them, and, in some sort, to prepare them.

PROPRIUS AURIS EXTERNÆ, Retrahens auris.

PROPTOMA, Prolapsus.

PROPTOMA AURICULÆ, *Parastoticus auriculae facca, Flap Ear*. Lobe of the ear broad, loose, and pendent from birth.—Good.

PROPTOMA SCOTTI, Rachoasis.

PROPTOSIS, Prolapsus—p. Palpebræ, Blepharoptosis—p. Uvula, Staphylodema.

PROPTYSIS, Expectoration.

PRORA, Occiput.

PRORRHESIS, Prognosis.

PRORUPTIO SANGUINIS, Hæmorrhagia.

PROS, *προς*. In composition, this prefix generally signifies 'in addition to,' 'over and above,' 'besides.'

PROSARTHROSIS, Diarthrosis.

PROSOLE, Impression.

PROSCHYSIS, Afusion.

PROSCOLLESIS, Adherence, Agglutination.

PROSECTEUR, Dissector.

PROSECTIO, Anatomy.

PROSECTOR, Dissector.

PROSELEPSIS, Prehension.

PROSODOS, Aditus.

PROSOPALGIA, Neuralgia, facial.

PROSOPANTRA, Frontal sinuses.

PROSOPANTRITIS, from *Prosopatra*, the

frontal sinuses, and *itis*, denoting inflammation. Inflammation of the frontal sinuses.

PROSOPIS DULCIS. A tree of rather large size, native of Peru. The fruit of this tree—*Pacay*—is a pod, from 20 to 24 inches long, containing black seeds imbedded in a white, soft, flaky substance; which last is eaten by the Limeños with pleasure.—Tschudi.

PROSOPODYNIA, Neuralgia, facial.

PROSOPODYSMORPHIA, from *πρόσωπον*, 'the face,' *δυσ*, 'with difficulty,' and *μορφή*, 'shape.' Malformation or atrophy of the face, —as where the process of nutrition suffers from diminished nervous influence.

PROSOPOMOGIA, Physiognomy.

PROSOPOMANTIA, Physiognomy.

PROSOPON, Face.

PROSOPORRHEUMA, *Rheumatismus faciei*, from *πρόσωπον*, 'face,' and *ρῆμα*, 'defluxion,' 'rheumatism.' Rheumatism affecting the face.

PROSOPOSIS, Physiognomy.

PROSPERITAS VALETUDINIS, Sanitas.

PROSPHORA, Prehension.

PROSPHYSIS, *Adhaesentia, Coalitio*, 'adhesion, adherence, connexion,' from *προς*, and *φω*, 'I grow.' In a more limited sense, this word means morbid adhesion of the eyelids, either between themselves, or with the globe of the eye; *Ankyloblepharon*.

PROSTASIS, *πρόστασις*, (*προς*, and *στασις*, 'station,') 'superiority, preponderance;' same etymon as *Prostata*. A predominance or abundance of excrementitious humour.—Hippocr.

PROSTATA BARTHOLINI, Cowper's glands in the female—p. Muliebris, Cowper's glands in the female.

PROSTATAL, Prostatic.

PROSTATALGIA, from *πρόστατα*, 'the prostate,' and *αλγος*, 'pain.' Pain in the prostate.

PROSTATE, *πρόστατα*, from *προ*, 'before,' and *ιστημι*, 'I stand.'—*Prostata glandula, Prostata, P. glandulosa, Parastata adenoïdes seu glandulosa, Adstans, Parastata, P. glandular, Prostata adenoïdes, Testis minor, Corpus glandulosum seu glandosum, C. adenoïformē, C. glandiformē, C. glandulosum, C. adenoïdes, Assistentes glandule, Adstites glandulari*; the *Prostate gland*. A glandular, cordiform body, of the size of a chestnut, situated before the neck of the bladder, behind the symphysis pubis, and surrounding the first portion of the urethra. Its excretory outlets, to the number of 10 or 12, open into the part of the urethra that traverses it, and pour into it a whitish viscid humour, intended to lubricate the interior of the urethra, and to serve as a vehicle for the sperm in its ejaculation.

PROSTATELCOISIS, from *πρόστατα*, 'prostate,' and *ἕλκος*, 'an ulcer.' Ulceration of the prostate.

PROSTATES INFÉRIEURES, Cowper's glands—p. *Petites*, Cowper's glands.

PROSTATIC, *Prostaticus, Prostatal*. That which relates to the prostate. Winslow has named—*Superior Prostatic Muscles*—ligaments which pass from the pubis to the lateral parts of the prostate. He, also, calls—*Inferior prostatic Muscles*—the fleshy fibres, which, from the lateral parts of the urethra, near its membranous portion, pass to be inserted into the pubis.

**PROSTATIC BISCUTOR.** An instrument employed by Dr. Stevens, of New York, in the bilateral operation of lithotomy. In form it resembles a large olive, with a beak at the extremity, with cutting edges at the sides parallel to its longest axis, and with a straight handle.

**PROSTATIC LIQUOR,** *Liquor prostaticus.* The fluid secreted by the prostate, which mixes with the sperm during emission.

**PROSTATIC PORTION OF THE URETHRA.** The part of the canal of the urethra included by the prostate: it is about 15 lines long.

**PROSTATICUS SUPERIOR,** Compressor prostaticus.

**PROSTATITIS,** *Inflammatiō Prostatica,* from *πρωστατα*, 'the prostate,' and *itis*, denoting inflammation. Inflammation of the prostate.

**PROSTATOCELE,** Prostatocœcus.

**PROSTATOCUS,** *Prostatocœlis, Tumor prostaticus,* from *πρωστατα*, 'the prostate,' and *κύστωρ*, 'a tumour.' Swelling of the prostate.

**PROSTATOPARECTASIS,** from *πρωστατα*, 'prostate,' and *παρεκτεσις*, 'to extend.' Enlargement of the prostate; also, induration of the same, *Prostatocœcirrhosis.*

**PROSTATOSCIRRHUS,** see Prostatoparectasis.

**PROSTERNIDIUM,** from *πρω*, 'before,' and *στέρνον*, 'the sternum.' Any agent applied to the anterior part of the chest; a plaster to the breast.

**PROTHESIS,** Prothesis.

**PROSTHETA,** Subdita.

**PROSTHIUM,** Penis.

**PROSTOMIA,** *Commissuræ labiorum;* from *πρω*, 'before,' and *στόμα*, 'mouth.' The commissure of the lips.

**PROSTRATION,** *Prostratiō virium,* (F.) *Prostration des forces, Abatement.* Great depression of strength. Almost total loss of power over the muscles of locomotion.

**PRO'TEAN,** *Pro'teiform, Proteiformis,* from *Proteus*, who could assume various shapes. Assuming different shapes.

**PROTEIFORMIS,** Protean.

**PROTEIFORMIS MORBUS.** A disease which assumes various characters.

**PRO'TEIN,** *Proteina, Protœina;* from *πρωτείνω*, 'I take first rank.' A product of the decomposition of albumen, &c., by potassa. When animal albumen, fibrin or casein is dissolved in a moderately strong solution of caustic potassa, and the solution is exposed for some time to a high temperature, these substances are decomposed. The addition of acetic acid causes, in all three, the separation of a gelatinous translucent precipitate which has exactly the same characters and composition. This is protein.—Mulder.

Protein is the basis of animal and vegetable fibrin, albumen, and casein, and of gluten, which have been, consequently, classed under the "proteinaceous alimentary principle," by Dr. Pereira.

**PROTEINACEOUS,** Proteinous.

**PROTEINOUS,** *Proteina'ceous, Proteino'sus.* Of, or belonging to protein;—as "a proteinous alimentary principle."

**PROTENSIONES GLANDULARES,** Mamillary eminences.

**PROTHESIS,** *Prosthesis, Adjunctio, Adjectio, Appositio,* 'addition, application; from *πρω*, 'in addition to,' and *τιθημι*, 'I put.' That

part of surgery whose object is to add to the human body some artificial part, in place of one that may be wanting, as a wooden leg, an artificial eye, &c.

**PROTMESIS,** Umbilicus, Kidney.

**PROTOGALA,** Colostrum.

**PROTOIATROS,** Archiater.

**PROTOMEDICUS,** Archiater.

**PROTOMUS,** Dissector.

**PROTOPATHIA,** Idiopathia.

**PROTOSPOROS,** Os uteri.

**PROTRUSION,** Prolapsus.

**PROTUBERANCE,** *Protuberantia, Exuberantia, Prominentia, Excrescentia, Entuberantia,* from *pro*, 'before,' and *tuber*, 'a projection.' (F.) *Bassa.* A name given to rough, unequal protuberances, seen at the surface of certain organs; the *parietal protuberances, occipital protuberances, annular protuberances, &c.*

**PROTUBERANCE, ANNULAR,** Pons Varolii—p. Cerebral, Medulla oblongata, Pons Varolii—p. *Cylindricæ,* Cornu ammonis.

**PROTUBERANTIA,** Eminence—p. Annularis Willisii, Pons Varolii—p. *Cylindrica,* Cornu ammonis.

**PROTUSOR,** Detrusor urinae.

**PROULIMATE'SIS.** A word employed by Forestus for hernia of the stomach.

**PROUNE,** *Prunus domestica.*

**PROVERBS, MEDICAL.** A proverbial expression frequently contains sound sense in its directions. In medicine, the greatest collection is in the *Regimen of Health of the School of Salerno*, composed in the 11th century, by John of Milan. Yet, although good sense is often inculcated, we frequently meet with the reverse. Most of the proverbs are hygienic. The following are a few.

1. *Qu' après la soupe un coupe d' excellent vin Tire un écu de la poche du médecin.*
2. *Surge quintâ, grande nonâ, cama quintâ, dormi nonâ, nec est morti vita prona.*
3. *Nunquam rectè corpus exerceari sine animo, neque animum sine corpore posses.*
4. *Viandè bien machéè est à demi digéris.*
5. *Optimum condimentum famas.* Appetite is the best sauce.
6. *Plures occidit gula quam gladius.*
7. Early to bed and early to rise, Makes a man healthy, wealthy, and wise.
8. One man's meat's another man's poison.
9. An ounce of prevention is better than a pound of cure.

**PROVERSIO,** Anteversio.

**PROVINS, MINERAL WATERS OF.** Chalybeate springs in the department of Seine et Marne, France, which contain carbonic acid and iron.

**PROVOCATORIUS,** Intercalary.

**PRUNA,** Anthrax.

**PRUNE,** Prunum.

**PRUNELLA,** Angina pectoris, Aphthæ, Cyananche, Pupil.

**PRUNELLA, P. vulgaris, Consolida minor, Symphytum minus, Self-heal, Heal-all, Bugle,** (F.) *Prunella, Brunella;* Family, Labiatæ. *Sex. Syst.* Didymia Gymnospermia. This plant has been recommended as an astringent, in hemorrhages and fluxes; and, also, in gar-

gles against aphthæ, and in inflammation of the fauces.

**PRUNELLÆ SAL**, Potassæ nitræ fusus sulphatis paucillo mixtus.

**PRUNELLE**, Prunella, Pupil.

**PRUNELLIER**, Prunus spinosa.

**PRUNELLOE**, Prunum Brignolense.

**PRUNES**, see Prunum—p. Pulp of, Pruni Pulpa.

**PRUNI PULPA**, Pulp of prunes. Take of prunes a sufficient quantity, soften them in the vapour of boiling water, and having separated the stones, beat the remainder in a marble mortar and press it through a hair-sieve.—Ph. U. S.

**PRUNIER**, Prunus domestica—p. *Sauvage*, Prunus spinosa.

**PRUNUM**. A Plum, a Prune. Three sorts of plums have been usually ranked amongst the articles of the materia medica. 1. The *Prunum Brignolensè*; the *Brignole plum* or *Prunel'los*; from Brignole in Provence. It is of a reddish-yellow colour; and has a very grateful, sweet, subacid taste. 2. The *Prunum Gallicum*, Prunum (Ph. U. S.), the *French Prune*; and 3. The *Prunum Damascenum* or *Damson*, *Brab'ylon*. All these possess the same general qualities as the other summer fruits. They are emollient and laxative.

**PRUNUM STELLATUM**, *Averrhoa carambola*.

**PRUNUS ARMENIACA**. The *Apricot*, *Apricoek*, *Bericoek*, *βερικοκκη*, *Pracoc'ia*, (F.) *Apricot*. Family, Rosaceæ. *Sec. Syst.* Icosandria Monogynia. The apricot, *Melum Armeniacum*, when ripe, is easily digested, and considered as a great delicacy.

**PRUNUS AVIUM**.—The *Black Cherry Tree*, *Cerasus Avium*, (F.) *Mérisier*. The fruit is eaten; and a gum exudes from the tree, the properties of which are similar to those of gum Arabic.

**PRUNUS CAPULIN**, (S.) *Copulies*, grows in the open fields of Peru; and is cultivated in gardens in the towns. The fruit is acid, and not often eaten; but on account of its agreeable odour it is used in making *Pucheros de flores*; or with odoriferous flowers to perfume linen.—Tschudi.

**PRUNUS CERASUS**. The *Red Cherry Tree*; (F.) *Cérissier*. The fruit *Cerasum*, *Cerasion*, has a pleasant, acidulous sweet flavour. It is wholesome.

**PRUNUS DOMESTICA**. The *Plum* or *Damson tree*, *Coccyne'lea*, *Prouns*, (F.) *Prunier ordinaire*. The damson, when perfectly ripe, affords a wholesome fruit for pies, tarts, &c. It is gently laxative. See Prunum.

**PRUNUS INVITIA**. The *Bullace Plum Tree*. The fruit of this tree is used like the damson.

**PRUNUS LAURO-CERASUS**, *Poison Laurel*, *Cherry Laurel*, *Common Laurel*, *Lauro cerasus*, *Cerasus Lauro-Cerasus*, (F.) *Laurier-crisse*, *L. amandier*. The leaves have a bitter, styptic taste, with the flavour of bitter almonds. The flowers have a similar flavour. The powdered leaves, applied to the nostrils, excite sneezing. The flavour of the leaves has given occasion to their being employed in tarts, custards, &c.; but in large quantities they are poisonous. The poisonous principle is the Prussic acid: The distilled water, called *Laurel-water*, is poisonous. (See Poisons, Table of.)

**PRUNUS PADUS**, *Padus*, *Cerasus Padus*, *Cer'*

*asus racemosus sylvestris*, *Wild cluster* or *Bird Cherry Tree*, (F.) *Cérissier à grappes*, *Bois puant*. The bark of the tree has a fragrant smell, and a bitter subastringent taste, somewhat similar to that of bitter almonds. It has been recommended in intermittents, &c. in the form of decoction. The berries have been used in dysentery.

**PRUNUS SEBESTINA**, *Sebestina*.

**PRUNUS SPINOSA**. The *Sloe Tree*, *P. sylvestris*, *Agriococcime'lea*, *Agru'na*, *Agrume'la*, (F.) *Prunellier*, *Prunier sauvage*. The fruit—the *sloe*—is sometimes employed in gargles, and was formerly much used in hemorrhage, owing to its astringent properties. The *Acacia nostras*, *A. Germanica*, *Succus acaciz nostratis*, *S. Germanicæ inspissatus*, is obtained from this.

**PRUNUS SYLVESTRIS**, *P. Spinosa*.

**PRUNUS VIRGINIANA**, *Cerasus serotina*, *C. Virginia'na*, *Wild Cherry Tree*, (F.) *Cérissier de Virginie*. The bark of this tree has been found useful in intermittents. The leaves are poisonous to certain animals, and the berries intoxicate different kinds of birds. The Indians use the bark in the cure of syphilis. It is bitter and astringent, and possesses some aromatic warmth, and, likewise, a narcotic quality. It is stimulant and tonic. The leaves contain Prussic acid. The distilled oil of the bark is very nearly identical with that of the bitter almond. A strong decoction of the bark is anthelmintic.

**PRURIGO**, *Pruritus*, *Chris'ma*; from *prurio*, 'I itch.' This word is often used synonymously with *itching*. Willan and Bateman use the term for a genus of cutaneous diseases, the characteristic symptoms of which are a severe itching, accompanied by an eruption of papule of nearly the same colour as the adjoining cuticle; *Cnemos*, *Scabies papuliformis*, *Eozymia prurigo*. It affects the whole surface of the skin, under three varieties of form;—the *P. mitis*, *P. formicantis*, *P. semi'lis*, &c. as well as some parts of the body, as the *P. pod'icis*, and *P. pudendi mulie'bris* seu *Pudenda'gra pruriens*.

**PRURIGO PEDICULARIS**, Phtheiriasis.

**PRURIT**, Itching.

**PRURITUS**, Gargale, Itching, Prurigo.

**PRUSSIAN BLUE**, *Ferrum Zoët'icum*, *F. Borussicum*, *F. Cyanogenatum*, *F. oxydulatum hydrocyanicum*, *Ferri Ferrocyanas*, *F. Ferrocyanuratum*, *Borussias Ferri*, *Ceruleum Borussicum*, *C. Barolinensè*, *Prussias Ferri*, *Hydrocyanas Ferri*, *Ferri Cyanuratum*, *Ferri percyanidum*, *Trio-hydro-ferrocyanate of iron*, *Ferrocyanuret of iron*, *Ferro-prussiate of iron*, (F.) *Bleu de Prusse*. In the Pharmacopœia of the United States, (1842) the pure salt is directed to be made as follows: *Ferri Sulph. ʒiv. acid sulph. f. ʒiiiss, acid nitric. f. ʒvj or q. s., potassii ferrocyanuret. ʒivss, aquæ, Oij*. Dissolve the sulphate in a pint of water, and having added the sulphuric acid, boil the solution. Pour into it the nitric acid, in small portions, boiling the liquid for a minute or two after each addition, until it no longer produces a dark colour; then allow the liquid to cool. Dissolve the ferrocyanuret of potassium in the remainder of the water, and add this solution gradually to the first liquid, agitating the mixture after each addition; then

pour it upon a filter. Wash the precipitate with boiling water until the washings pass tasteless. Lastly, dry and rub into powder. This salt is chiefly used in the preparation of the hydrocyanic acid and the cyanuret of mercury. It has been advised in the treatment of intermittents, and in epilepsy and scrophulosis. Externally, it has been applied to ill-conditioned ulcers. (℞ to ℥j, of cerate.) Dose, four to six grains.

PSALIDIUM, Fornix.

PSALIS, Fornix, Scissors.

PSALTERIUM, Lyra.

PSAMMA, see Gravel.

PSAMMIS'MUS, *Ammis'mus*, *Gammis'mus*, from ψαμμος, 'sand;' *Arenati'o*. The application of sand to any part of the body for the cure of disease.—Paulus.

PSAMMODES, Sabulous.

PSAMMUS, see Gravel.

PELLISMUS, ψαλλισμος, from ψαλλίζω, 'I stutter.' Imperfect or depraved state of the articulation. A genus in the class *Pneumatica*; order *Phonica*, of Good.

PELLISMUS NASITAS, Rhinophonia.—p. Rhacismus, Rotacium.

PELLOTES, Balbuties.

PSEUDAC'OE, *Pseudaco'o*, *Pseudoco'o*, from ψευδης, 'false,' and αυνη, 'audition.' *Pseudaco'o'sis*; False hearing.

PSEUDACORUS, Iris pseudacorus.

PSEUDÆSTHES'IA, *Sensus perver'sus*, from ψευδης, 'false,' and αισθανομαι, 'I feel.' *Parapsis illus'o'ria*, *Pseudaph'e*, *Pseudaph'ia*. Depraved feeling. Imaginary sense of touch or general feeling in organs that have no existence. Common to those who have suffered amputation; and in hypochondriacs and the insane.

PSEUDALEI MORBI, Feigned diseases.

PSEUDANGUSTURINUM, Brucine.

PSEUDAPHE, Pseudæsthesia.

PSEUDARTHRO'SIS, *Pseudarticula'tio*, *Pseudartic'ulus*; *Articula'tio notha* seu *artificia'lis*, from ψευδης, 'false,' and αρθρον, 'a joint.' A false joint or articulation.

PSEUDARTICULATIO, Pseudarthrosis.

PSEUDECO'IA, Pseudæcoe.

PSEUDENCEPH'ALUS, *Paraceph'alus*, from ψευδης, 'false,' and ενκεφαλον, 'the encephalon.' A monster whose cranium is open in its whole extent from before to behind, its base supporting a vascular tumour.—G. St. Hilaire.

PSEUDO, False.—p. Asthma, Dyspnea.

PSEUDOBLEPS'IA, *Pseudoblepsis*, *Pseudora'sis*, *Suffu'sio oculi*, from ψευδης, 'false,' and βλεψις, 'sight;' *Pseudops'ia*, *Parop'sis illus'o'ria*, *Suffu'sio*, *Phanta'sma*, *False sight*. A generic name, used by Cullen for perversion of vision. See *Metamorphopsia*.

PSEUDOBLEPSIS, Paropsis.

PSEUDOCARCINOMA LABII, Cancer aquaticus.

PSEUDOCROUP, Asthma thymicum.

PSEUDOCYESIS, Pregnancy, false.—p. Cystis molaris, Mole.

PSEUDOENCEPHALITIS, Hydrancephaloid disease.

PSEUDOGEU'SIA, *Pseudoge'u'sis*, *Pseudoge'u'sia*, from ψευδης, 'false,' and γευσις, 'taste.' *Hallucina'tio gustu's*. False taste.

PSEUDOGEUST'IA, Pseudogeusia.

PSEUDOLI'EN, *Pseudosplen*. Glands situ-

ate in the neighbourhood of the spleen; probably, lymphatic glands.

PSEUDOMECHOACANA, *Convolvulus panduratus*.

PSEUDOMEDICUS, Charlatan.—p. *Membrana*, *Membrana*, false.—p. *Meninx*, *Membrana*, false.—p. *Metamorphosis polyposa*, *Polypos*.

PSEUDOMEMBRANA, Membrane, false.

PSEUDOPERIPNEUMONIA, *Peripneumonia notha*.

PSEUDOPHLOGOSIS VENTRICULI RESOLUTIVA ET COLLIQUATIVA, *Gastro-malacia*.

PSEUDOPHTH'ISIS, False phthisis. Emaciation occasioned by other cause than organic lesion of the lungs.

PSEUDOPLAS'MATA, from ψευδης, 'false,' and πλασσω, 'I form.' A term applied to malignant heterologous tumours.—Vogel.

PSEUDOPLEURITIS, *Pleurodynia*—p. *Polypi*, see *Polypi*—p. *Pyrethrum*, *Achillea ptarmica*—p. *Spleen*, *Pseudolien*.

PSEUDOPNEUMONIA, *Peripneumonia notha*.

PSEUDOPNEUMONITIS, *Peripneumonia notha*.

PSEUDOPSIA, *Pseudoblepsia*.

PSEUDORASIS, *Pseudoblepsia*.

PSEUDOREX'IA, *Pseudora'e'sis*; from ψευδης, 'false,' and ορεξις, 'appetite.' False appetite.

PSEUDOSM'IA, *Pseudosphre'sia*, *Pseudosphre'sia*, from ψευδης, 'false,' and σμα, 'smell.' False sense of smell.

PSEUDOSPHERESIA, *Pseudosmia*.

PSEUDOSYPHILIS, *Syphilis pseudosyphili's*.

PSEUDOTHANATOS, *Asphyxia*.

PSEUDOVARIOLÆ, *Variella*.

PSEUDYMEN, Membrana, false.

PSIDIUM POMIF'ERUM. The *Apple Guava*, *Guava*, *Guayava*. This plant and *P. Pyrif'erum* bear fruits; those of the former like apples,—of the latter like pears. The apple kind has an acid flavour, the other is sweet. Of the inner pulp of either, the natives of the Indies make jellies; and, of the outer rind, tarts, marmalades, &c. They are somewhat astringent; this quality, indeed, exists in every part of the tree, and abundantly in the leaf buds, which are occasionally boiled with barley and liquorice as an excellent drink in diarrhœa. A simple decoction of the leaves is said to be useful in the itch and most cutaneous eruptions.

PSILOSIS, Depilation.

PSILOTHRUM, *Bryonia alba*, Depilatory.

PSIMMYTHON, *Plumbi subcarbonas*.

PSOA, *Dysodia*.

PSOÆ, *Psœia*, *Psyæ*, *Lumbi*, 'the loins,' *Alop'œes*, *Nephrome'træ*, *Neuromet'res*. The *psœæ* muscles.

PSOAS MAGNUS, *Psoas seu lumb'a'ris inter'nus*, *Præ-lombo-trochantin*, *Præ-lombo-trochantinien* (Ch.) *Femur moven'tium sextus*. A muscle, seated on the lateral parts of the lumbar portion of the vertebral column; and passing down to the superior and anterior part of the thigh. It is long; fusiform; and attached, above, to the body and transverse processes of the first four lumbar vertebræ, and last dorsal. Below, it terminates, by a very thick tendon, common to it and the iliacus muscle,—which is inserted into the top of the lesser trochanter.

This muscle bends the thigh upon the pelvis, and carries it in rotation outwards. It may, also, bend the pelvis on the thigh, and the loins on the pelvis. It acts considerably in station and progression.

**PEOAS PARVUS, Præ-lombo-pubium, (Ch.)** A muscle situate anteriorly to the last. It is long, thin, flat, and narrow; and is attached, above, to the body of the last dorsal vertebra, and below, to the linea ilio-pectinea, by means of a slender tendon, which furnishes two expansions—one to the *Iliac aponeurosis*, and the other to the *pelvis*. This muscle bends the vertebral column on the pelvis; and, reciprocally, the pelvis on the vertebral column.

**PSODYMUS, Gastrodidymus.**

**PSOLE, Psœ.**

**PSOITE, Psœitis.**

**PSOÏTES, Inflammatio musculi, Psœas, Lumbar'go, Inflammatio'ria spasmodica, (F.) Psœite, Inflammation du muscle Psœas.** From *psœa*, 'the loins,' and *itis*, denoting inflammation. Inflammation of the psœas muscles and of the parts situate before the lumbar vertebrae: accompanied, from its commencement, by considerable fever, violent pains in the part affected and in the thigh of the same side, which remains commonly half bent. Psœitis may terminate by suppuration, and form lumbar abscess.

**PSOLE, ψωαλ,** 'the male organ:' also, the glans when uncovered.

**PSOLON, Membrosus.**

**PSOLONCUS, from ψωλγ, and ογκος,** 'a tumour.' Swelling of the glans, or of the penis generally.

**PSOLUS, from ψωλη.** One who has the glans uncovered. One who has been circumcised.

**PSOPHOMETER, Stethoscope.**

**PSOPHOS, ψωφες,** 'a noise.' A loud noise; a hollow sound.

**PSORA, from ψωα,** 'I touch, I feel.' *Scabies, Phlysis Scabies, Ecpye'sis scabies, Scabiola, Itch, Scratch, (F.) Gals, Mal Sabins-Main, Rogne.* A contagious eruption of very minute pimples—pustular, vesicular, papular, intermixed, and alternating, itching intolerably and terminating in scabs. It seems to be connected with an insect of the genus *Acarus*;—the *Acarus seu Sarcop'tes seu Sarcop'tus seu Phthi'rium Scabies, Ac'arus Ciro, (F.) Ciron.* The itch occupies, particularly, the spaces between the fingers, the back of the hands, wrists, elbows, axillæ, groins, hams, &c., and rarely affects the face. The best applications, for its cure, are,—the *Unguentum Sulphuris* or *Ung. Sulph. comp.* night and morning; but the unpleasant smell of the sulphur has given occasion to the use of other means;—as the *White Hellebore, Potass in deliquescence, Muriate of Ammonia, Sulphuric Acid, &c.* The repugnance to the smell of sulphur ought not, however, to be regarded; especially as, in the course of four or five days, it will, in almost all cases, produce a perfect cure.

**PSORA AGRIA, Psoriasis inveterata—p. Leprosa, Psoriasis—p. Squamosa, Psoriasis.**

**PSORALEA GLANDULOSA, Alvaquill'a.** Family, Leguminosæ. *See Syst. Diadelphia Decandria.* A shrub, used in Chili as a vulnerary.

**PSORALEA PENTAPHYL'LA, Psora'ia, Contray'va nova, Mexican Contray'va.** The root is little, if at all, inferior to the contra-

yer'va in its medical properties; which, by the by, are unimportant.

**PSORALIA, Psoralea pentaphylla.**

**PSORENTERIA, Cholera.**

**PSORI'ASIS, formerly, the state of being affected with ψωα.** *Lepide'sia psori'asis, Sery'do, Sery'go, Impoti'go (of some), Scab'ias sic'ca, S. feri'na, Psora lepro'sa, P. squamo'sa, Sealy Tetter, Dry Scals, Dry Scall, (F.) Dartre squameuse lichenoidé, D. scailleuse, Grotelle, Gals miliare, G. canine ou sèche.* A cutaneous affection, consisting of patches of rough, amorphous scales; continuous or of indeterminate outline: skin often chappy. Psoriasis occurs under a considerable variety of forms. The surface, under the scales, is more tender and irritable than in lepra, which psoriasis, in some respects, resembles. Dr. Willan has given names to eleven varieties of psoriasis: the chief of which are the *Psoriasis guttata, P. diffusa* (one form of which is the *Baker's Itch*, and *Grocer's Itch*, and another the *Washerwoman's Scall*), the *P. gyrata*, and *P. inveterata seu Psora agria*. The treatment of psoriasis must be antiphlogistic, with the internal use of the fixed alkalis, sulphur, &c. The irritable kinds do better without any local application. The more local and less inflammatory are ameliorated by emollient and soothing applications; or by slightly stimulating means, sea-bathing, the *Ung. hydrarg. nitrico-oxyd.*, *Ung. oxid' zinci, &c.*

**PSORICUS.** That which has the nature of itch. A medicine for curing the itch.

**PSOROPHTHALMIA, Ophthalmia tarsi.**

**PSYÆ, Psœ.**

**PSYCHAGOGA, Psychagogica.**

**PSYCHAGO'GICA, Psychago'ga, from ψυχη,** 'life,' 'soul,' and *γωα,* 'I lead.' Medicines which resuscitate, when life seems extinct; as in syncope and apoplexy.

**PSYCHE, Anima.**

**PSYCHIATRIA, from ψυχη,** 'mind,' and *ιατρεια,* 'healing.' Treatment of diseases of the mind.

**PSYCHICAL; Psy'chicus, from ψυχη,** 'mind.' That which relates to the mind or mental endowments.

**PSYCHOL'OGY, Psycholog'ia, from ψυχη,** 'mind,' and *λογος,* 'discourse.' A treatise on the intellectual and moral faculties. Also, the intellectual and moral faculties or sphere.

**PSYCHONOSOL'OGY, Psychonosolog'ia, from ψυχη,** 'mind,' *νοσος,* 'disease,' and *λογος,* 'a description.' The doctrine of, or a treatise on, diseases of the mind.

**PSYCHORAGES, Agoni'ans, Moribundus, Moribund, from ψυχη,** 'mind,' and *ραγη,* 'rupture.' Dying. *In Articulo Mortis.*

**PSYCHORAGIA, Agony, Death.**

**PSYCHORRHAGIA, Agony, Death.**

**PSYCHOS, Cold.**

**PSYCHOSSES, from ψυχη,** 'mind.' Neuroses of the intellect. Diseases of the mind.

**PSYCHOTICA, Analeptica.**

**PSYCHOTRIA, Analeptica—p. Emetica, Ipecacuanha.**

**PSYCHOTROPHUM, Betonica officinalis.**

**PSYCHROLU'SIA, Psychrolu'tron, from ψυχη,** 'cold,' and *λουα,* 'I wash.' A cold bath.

**PSYCHROPHOBIA, from ψυχη,** 'cold,' and *φοβος,* 'fear.' Dread of cold, especially of cold water. Impressibility to cold.

## PSYCHTICA, Refrigerants.

PSYDRA'CIA, *quasi*, ψυδρα 'υδρανια, 'cold drops.' The ancients sometimes used this term for *pimples*; at others, for *vesicles*. Willan and Bateman define *Psychracium* to be, a small pustule, often irregularly circumscribed, producing but a slight elevation of the cuticle, and terminating in a laminated scab. Many of the psychracia usually appear together, and become confluent; and, after the discharge of pus, they pour out a thin, watery humour; which frequently forms an irregular incrustation. Frank limits the term to a psoriform eruption, which differs from itch in not originating from an insect, and which is not contagious;—perhaps the lichen. Authors have differed regarding its acceptance.

PSYDEACIA ACNE, Acne.

PSYLLIUM, *Plantago psyllium*.

PTARMICA, *Achillea ptarmica*—p. *Montana*, *Arnica montana*.

PTARMICUM, Erhine, Sternutatory.

PTARMOS, Sneezing.

PTELEA, Ulmus.

PTERIGO-STAPHYLINUS INTERNUS, Levator palati—p. *Syndesmo-staphyli-pharyngien*, Constrictor pharyngis.

PTERIS, *Polypodium filix mas*.

PTERIS AQUILINA, 'Eagles' Wings,' so called from its leaves. *Pteris*, *Thelypteris*, *Filix Nymphea*, *Common Brake* or *Female Fern*; *Filix foemina*, (F.) *Fougère femelle*, *La grande Fougère*. *Nat. Ord.* Filices. The root is considered to be anthelmintic; and as efficacious as that of the male fern in cases of tape-worm.

PTERNA, Calcaneum.

PTERNIUM, Calcaneum.

PTERNOBATES, Calcigradus.

PTEROCARPUS ERINACEA, see *Kino*—p. *Sandalinus*, P. *Santalinus*.

PTEROCARPUS SANTALINUS, P. *Sandalinus*, *Santalum* seu *Sandalum Rubrum*, *Red Sanders* or *Saunders Tree*. *Family*, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. *Red Sanders* wood, *Santalum* (Ph. U. S.), *Lignum sandalinum* is used only as a colouring matter: it gives to rectified spirit a fine deep red. The juice of this tree, like that of P. *Draco*, affords a species of *Dragon's blood*.

PTEROSPORA ANDROMEDEA, *Scaly Dragon claw*, *Dragon root*, *Fever root*, *Albany beach-drop*. An indigenous plant, *Nat. Ord.* *Monotropæ*, *Sex. Syst.* Decandria Monogynia;—found in the state of New York, which blossoms in July. The root has been regarded as an anthelmintic, diuretic, emmenagogue, &c.: but it is not used.

PTERYGION, *Pterygium*, *Ala*, from πτερυξ, 'a wing.' A small wing. *Onga*, *Pyo'sis*, *Unguis*, (F.) *Drapsau*, *Onglet*. A varicose excrescence of the conjunctiva, of a triangular shape, and commonly occurring at the inner angle of the eye; whence it extends over the cornea. Sometimes two or three pterygia occur on the same eye, and cover the whole cornea with a thick veil, which totally prevents vision. According to Scarpa, the ancients gave the name *Panniculus* to this last complication. If the pterygium cannot be dispelled by means of discentic collyria, it must be removed by the scissors.

PTERYGIUM, *Pterygion*, *Scapula*—p. *Lardaceum*, *Pinguicula*—p. *Pingue*, *Pinguicula*.

PTERYGO-ANGULI-MAXILLARE, *Pterygoideus internus*—p. *Colli-maxillare*, *Pterygoideus externus*—p. *Maxillare, grande*, *Pterygoideus internus*—p. *Maxillare, petit*, *Pterygoideus externus*—p. *Palatine canal*, *Pterygoid canal*—p. *Pharyngeus*, *Constrictor pharyngis*—p. *Staphylinus*, *Circumflexus*.

PTERYGO-PALATINE, *Pterygo-palatine*. That which belongs to the pterygoid process and palate.

PTERYGO-PALATINE ARTERY of *Superior pharyngeal* is a very small artery, and is given off by the internal maxillary at the bottom of the zygomatic fossa: after having passed through the pterygo-palatine canal, it is distributed to the superior part of the pharynx, the sphenoid bone, and the Eustachian tube.

PTERYGO-PALATINE CANAL. A small canal, formed by the internal ala of the pterygoid process, and the palate bone. It gives passage to the vessels of the same name.

PTERYGOIDES, *Alatus*.

PTERYGOID, *Pterygol'des*, *Pterygoides*, *Aliformis*; from πτερυξ, 'a wing,' and αιδος, 'form.' A name given to two processes at the inferior surface of the sphenoid bone; the two laminae which form them having been compared to wings. These *alæ* or *wings* or *processes*,—*Processus aliformes*,—have been distinguished, according to their position, into *internal* and *external*.

PTERYGOID ARTERY, *Vidian Artery*, *Ramulus Ductus Pterygoidei*, *Arteria pharyngea superior*, arises from the internal maxillary artery, at the bottom of the zygomatic fossa, and enters the pterygoid canal with the nerve of the same name, to proceed to be distributed on the Eustachian tube and velum palati. The name, *pterygoid arteries*, is likewise given to the branches, which the internal maxillary and some of its divisions, as the meningeæ media, and posterior temporalis profunda, furnish to the pterygoid muscles, behind the neck of the lower jaw.

PTERYGOID BONE, Sphenoid.

PTERYGOID CANAL, *Vidian canal*, *Ductus pterygoideus*, *Canalis Vidianus*, (F.) *Conduit pterygoïdien* ou *Vidian*, *Pterygo-palatine canal*, is a narrow channel, which traverses, in a direction from before to behind, the base of the pterygoid process, and gives passage to the pterygoid nerve. The *foramina* of the sphenoid, which terminate the canals, have the same epithets applied to them.

PTERYGOID FOSSA, *Fossa Pterygoidea*, (F.) *Fosse pterygoïdienne* ou *pterygoïde*, is the depression which separates the two laminae or alæ of the pterygoid process.

PTERYGOID MUSCLES, *Alares musculi*, *Aliformes musculi*, are two in number. 1. *Thé Pterygoideus externus*, P. *minor*, (F.) *Pterygo-colli-maxillaire*, *Petit Pterygo-maxillaire* (Ch.) *Petit pterygoïdien*, *Pterygoïdien externus*, is a thick, short muscle, which arises, by short aponeuroses, from the outer surface of the external ala of the pterygoid process, and from the outer surface of the great ala of the sphenoid bone; and is inserted at the anterior part of the neck of the lower jaw-bone, and the corresponding part of the inter-articular fibro-cartilage. This muscle draws the condyle of the lower jaw and

the inter-articular ligament forwards. It carries the chin forwards, and to the opposite side. If the two external pterygoids act together, the jaw is carried directly forwards. 2. The *Pterygoideus internus*, *P. major*, *Masseter internus*, *Latens in Oré*, (F.) *Grand Pterygo-maxillaire*, *Pterygo-anguli maxillaire*, *Grand Pterygoïdien* ou *Pterygoïdien interne*. A thick, quadrilateral muscle, which is attached by short and very strong aponeuroses; above, to the pterygoid fossa, whence it proceeds downwards, backwards, and outwards, to be inserted into the inner surface of the ramus of the lower jaw, near its angle. This muscle raises the lower jaw, and carries it a little forwards. It also performs the grinding motion.

**PTERYGOID NERVES.** These are two in number. 1. The *Pterygoid* or *Vidian Nerve*. It arises from the posterior part of the sphenopalatine ganglion; traverses the Vidian canal of the sphenoid; and, beyond, divides into two filaments. 1. A *superior* or *cranial*, *Nervus superficialis sive petrosus*, which ascends into the cranium, and enters the hiatus of Fallopius to unite with the facial nerve. 2. An *inferior* or *carotid*, *Nervus profundus sive major*, which traverses the carotid canal, and unites with the ascending branches of the superior cervical ganglion of the triplanchnic. 11. The *Pterygoid Nerve*, properly so called, *Nervus musculi pterygoidei*, is given off by the inferior maxillary branch of the 5th pair.

**PTERYGOÏDIEN GRAND** ou **INTERNE**, *Pterygoideus internus*—*p. Externe*, *Pterygoideus externus*—*p. Petit*, *Pterygoideus externus*.

**PTERYGOMA.** Same etymon. A wing; a projecting or pendulous body. A swelling of the vulva, which prevents coition.—*M. A. Severinus*.

**PTERYX**, Ala.

**PTILOSI**, Deplumatio, Madarosis.

**PTISANA**, Tisane—*p. Communis*, Decoctum hordei compositum—*p. Hippocratica*, Decoctum hordei.

**PTISSANA**, Tisane.

**PTOCHIA'TER**, *Ptochid'rus*, same etymon as the next. A physician to the poor, or to an establishment for the poor.

**PTOCHIATRI'A**, from *πτωχος*, 'poor,' and *ιατρία*, 'healing.' Practice amongst the poor. Also, an institution for the treatment of the diseases of the poor.

**PTOCHOCOMI'UM**, from *πτωχος*, 'a poor person,' and *κομω*, 'I take care of; *Ptochodochi'um*, *Ptochotrophe'um*. An almshouse.

**PTOCHODOCHIUM**, Ptochocomium.

**PTOCHOTROPHEUM**, Ptochocomium.

**PTOMA**, Cadaver.

**PTOSIS**, Prolapsus—*p. Bulbi oculi*, Exophthalmia.

**PTOSIS IRIDIS**, *Iridoc'le*, *Hernia Iridis*, *Iridopt'osis*, *Prolap'sus Iridis*, from *πτωσις*, 'a falling.' A prolapsus of the iris through a wound of the cornea. It is known by a blackish tubercle, which projects a little from the cornea in various forms.

**PTOSIS PALPEBRÆ**, Blepharoptosis.

**PTYALAGOGUE**, Sialogogue.

**PTYALIN**, see Saliva.

**PTYALISM**, Salivation.

**PTYALISME MERCURIEL**, Salivation, mercurial.

**PTYALISMUS**, Salivation—*p. Acutus melilitus*, see Salivation—*p. Acutus sympatheticus*, see Salivation—*p. Hydrargyratus*, Salivation, mercurial—*p. Iners*, Slaving—*p. Mercurialis*, Salivation, mercurial—*p. Pyroscicus*, Pyrosis.

**PTYALOGOGUE**, Sialogogue.

**PTYALON**, Saliva.

**PTYASMAGOGUE**, Expectoant, Sialogogue.

**PTYELON**, Saliva, Sputum.

**PTYSIS**, Exspuition.

**PTYSMA**, Exspuition.

**PTYSMATIS'CHESIS**, *Ptyematos'chasis*, from *πτυσμα*, 'sputum,' and *σχοριν*, 'to retain.' Suppression of pulmonary expectoration.

**PTYSMATOSCHESIS**, Ptyematischesis.

**PUNTEUR**, Dysodia.

**PUBENS**, Ephebus.

**PUBER**, Ephebus.

**PUBÈRE**, Ephebus.

**PUBERTAS**, Ephebia.

**PUBERTY**, *Pubertas*, *Hæb*, *Pubes*, *Aphrodisia*, *Ephèbi'a*, *Ephèbi'a*, *Ephèbotas*, *Ephèbo'synth*, *Pubes'centis*, from *pubescere*, 'to begin to have hair on the chin and sexual organs.' The period of life at which young people of both sexes are *pubes'cent* or *nubile*. According to the civil law puberty occurs at 12 years in females, and 14 in males. The period, however, varies somewhat in different climates, and in different individuals of the same climate.

**PUBES**, *Epis'chion*, *Epicten'ion*, *Cteis*, *Pæton*; the *Pubic region*. Same etymon. The middle part of the hypogastric region; so called, because it is covered with hair, in both sexes, at the period of puberty. The hair is also called *Pubes*, *Lanu'go Pudendo'rum*; and, of old, *pubertas* signified the same.

**PUBES**, Puberty.

**PUBESCENCE**, Puberty.

**PUBESCENT**, see Puberty.

**PUBIÆUS**, Pubic.

**PUBIC**, *Pu'bian*, *Pu'bicus*, *Pubia'us*, (F.) *Pubien*. That which belongs to or concerns the pubis.

**PUBIC ARCH** or *Arch of the Pubis*, (F.) *Arcade pubienne*. The arch at the anterior part of the inferior circumference of the pelvis. It is more expanded in the female than in the male; to correspond with the additional functions which she has to execute.

**PUBIC ARTICULA'TION**, or *Sym'physis Pubis*, results from the junction of the ossa pubis. The medium of union is cartilage.

**PUBIC LIG'AMENTS** are two very solid, fibrous fasciæ, situate before and beneath the symphysis pubis, which they strengthen. The one is called the *anterior pubic ligament*; the other the *inferior or subpubic*.

**PUBIC REGION**, *Re'gio Pubis*. The region of the pubes.

**PUBIEN**, Pubic.

**PUBIO-COCYGIEN-ANNULAIRE**, *Pubio-coccyg'us annularis*. Dumas gave this name to the levator ani and ischio-coccygeus, which he considers a single muscle.

**PUBIO-COCYGIEN-ANNULAIRE**, *Levator Ani*—*p. Femoral*, *Pectinalis*—*p. Femoralis*, *Adductor longus femoris*—*p. Umbilical*, *Pyramidalis abdominis*—*p. Prostaticus*, *Compressor prostatae*—*p. Sous-ombilical*, *Pyramidalis abdominis*—*p. Sternal*, *Rectus abdominis*.

**PUBIS, OS**, *Episi'on, Episi'on, Epis'chion, Share Bone, Os Pectinis*. The anterior part of the os innominatum; so called because it corresponds to the genital organs and pubic region. The *angle of the pubis* is formed by the union of the body and rami of each side.

**PUBLICÆ PARTES**. Those organs are so called, the object of whose functions is the nutrition of all the others. Such are the digestive and respiratory organs.

**PUCCOON**, *Sanguinaria Canadensis*—p. Red, *Sanguinaria Canadensis*—p. Yellow, *Hydrastis Canadensis*.

**PUCE**, *Pulex irritans*—p. *Maligna*, see Anthrax—p. *Pénétrante, Chique*.

**PUDDING-GRASS**, *Mentha pulegium*.

**PUDENDA**, Genital organs.

**PUDEND'AGRA**. A hybrid word; from *pu'denda*, (*pu'dere*, 'to be ashamed,') 'the genital organs,' and the Greek *αγρα*, 'a seizure.' According to some, this term means pain in the genital parts: *Dolor pudendo'rum, Men'tulagra, Adæodyn'ia*; according to others, it is synonymous with syphilis.

**PUDENDAGRA PRURIENS**, Prurigo pudendi muliebris.

**PUDENDAL HERNIA**. Hernia, which descends between the vagina and ramus ischii, and forms an oblong tumour in the labium; traceable in the pelvis, as far as the os uteri.

**PUDENDUM, FEMALE**, Vulva—p. Muliebre, Vulva.

**PUDENDUS**, Pudic.

**PUDIC**, *Pudicus, Pudendus*, (F.) *Honteux*. Same etymon. That which causes shame. A name given to the genital organs as well as to different other parts.

**PUDIC ARTERIES** are distributed to the organs of generation. They are,—1. The *internal Pudic, Arteria Pudica, A. pudenda communis*, (F.) *Artère honteuse interne, A. Sous-pubienne* (Ch.), *Genital Artery*. It is furnished by the hypogastric, and divides into two branches; the one—the *inferior or perineal*—which gives off the inferior hemorrhoidal and the artery of the septum; and the other—the *superior*, (F.) *Ischiopénienne*—which furnishes the transverse perineal artery, and divides into two branches; the *artery of the corpus cavernosum*, and the *dorsalis penis*. This latter, in the female, has the name *Dorsalis Clitoridis*. 2. The *external Pudic Arteries*, (F.) *Artères scrotales ou vulvaires* (Ch.), *A. honteuses externes*, which are two in number. The one is *superficial or subcutaneous*, and the other *deep-seated or subaponeurotic*. They are given off from the femoral artery or some one of its branches; and are distributed to the external parts of generation.

**PUDIC NERVE**, (F.) *Nerf honteux, Nerf ischiopénien ou Ischio-clitorien* (Ch.) is a branch furnished by the sacral plexus, which is distributed to the genital organs; and especially, to the penis in man, and the clitoris in the female.

**PURILE**, *Puerilis*, from *puer*, 'a child.' (F.) *Respiration purilis, R. exagérée, R. supplémentaire, R. hypervésiculaire*. A term applied to the respiration when it is heard loud through the stethoscope, as in healthy children.

**PUERILITAS**, Dementia of the aged.

**PUERITIA**, see Age.

**PUER'PERA**, from *puer*, 'a child,' and *perere*, 'to bring forth.' *Tokas, Lochos, Eniz'a,*

*Lecho, a lying-in woman*, (F.) *Femme en Couché, Accouchée*. A female in child-bed. One recently delivered.

**PUER'PERAL**, *Puerperalis*; from *puerpera*. Relating to parturition and its consequences.

**PUERPERAL CONVULSIONS**, *Eclampsia gravidarum et parturientium*.

**PUERPERAL FEVER**. Any fever occurring during the puerperal state—*Febis Puerperarum, Lachop'gra, Lochiocaliitis, Lochiop'gra, Child-bed fever*. Most commonly restricted to a malignant variety of Peritonitis.

**PUERPERIUM**, Child-bed state.

**PUFF-BALL**, *Lycoperdon, Leontodon taraxacum*.

**PUFFINESS**, from (D.) *puffen*, 'to blow.' *Inflatio, Sufflatio; Tumesfactio mollis*, (F.) *Bouffissure, Boursouffure*. A soft intumescence, without redness, which may be partial or general; and be produced by accumulation of serous fluid, extravasation of blood, effusion of air into the subcutaneous cellular tissue, &c. Puffiness is most frequently seen in the face and legs; and sometimes appears around a wound.

**PUGIL'US**, *Draz, Dra'chion*, from *pugnus*, 'the fist.' *Dragma, Dragmis*, (F.) *Pincée*. The quantity of any substance, which may be taken with the end of two or three fingers. The eighth part of a handful.

**PUKE**, Emetic.

**PUKEWEED**, *Lobelia inflata*.

**PUKING**, Vomiting, Regurgitation.

**PULEGIUM**, *Mentha pulegium*—p. Cervinum, *Mentha cervina*.

**PULEX IRRITANS**, The *common flea*. (F.) *Puce*. A parasitic insect found on the bodies of man and animals.

**PULEX PENETRANS**, *Chique*.

**PULICAR'IS**, *Pulicaria'ris*, from *pulex*, 'a gnat.' An epithet given to cutaneous eruptions resembling gnat-bites;—and, also, to the diseases in which such eruptions occur.

**PULICARIS HERBA**, *Plantago psyllium*.

**PÜLLNA, MINERAL WATERS OF**. These Bohemian springs contain sulphates of soda and magnesia, and chloride of magnesium.

**PULMO**, *Pulmo'nes*, by transposition of the letter l from *pleumon, πνευμων; Pneumon, Pleumon, Spiramentum animæ, Ergasterion spiritus, Flabellum et ventila'brum cordis, the Lung*. The essential organ of respiration, which is double, and occupies the two sides of the chest. The lungs, which are of a spongy, soft, flexible, compressible, and dilatible structure, fill exactly the two cavities of the thorax, and are separated from each other by the mediastinum and the heart. The right lung, which is shorter and broader than the left, is divided, by two oblique fissures, into three unequal lobes, *Lobi seu Alve pulmo'num*. The left has only two lobes, and consequently only one fissure. At the internal surface of those organs, which is slightly concave, there is, about the middle, a pedicle, formed by the bronchia and pulmonary vessels, and called, by anatomists, the *root of the lungs*, (F.) *Racine des Poumons*. Essentially, the lungs are composed of prolongations and ramifications of the bronchia, and of the pulmonary arteries and veins,—the divisions of which are supported by a fine, cellular tissue.

When the surface of the lungs is examined in

a clear light, we may see, even through the pleura, that their parenchyma is formed by the aggregation of a multitude of small vesicles, of an irregularly spheroid or ovoid shape, full of air, and separated by white and opaque septa. These vesicles are called *air-cells*, *Spiramenta* seu *Spiramina* seu *Cellula Pulmonum*. Along the partitions or septa is deposited, in greater or less quantity, the *black pulmonary matter*, (F.) *Matière pulmonaire noire*, as it has been called, which seems to be natural. Sometimes it is seen in points; at others, in spots. The colour of the lungs varies according to age and other circumstances. In youth, it is more red; and afterwards, grayish or bluish; often, as if marbled. The pleura pulmonalis is their investing membrane. The air is carried to the lungs by means of the trachea and bronchia. The black venous blood, which requires oxygenation, is conveyed to them from the heart, by the pulmonary artery; and when it has undergone this change, it is returned to the heart by the pulmonary veins. The blood-vessels inservient to the nutrition of the lungs, are the *bronchial arteries and veins*. The pulmonary lymphatics are very numerous. Some are superficial; others, deep-seated. They pass, for the most part, into the *bronchial ganglions or glands*. The nerves are furnished by the pulmonary plexus.

**PULMONAIRE DES FRANÇAIS**, Hieracium murorum.

**PULMONARIA**, *P. officinalis*, *P. Maculata*, *P. Maculosa*, Lungwort, Spotted Lungwort, Jerusalem Cowslip, Jerusalem Sage, Spotted Comfrey, (F.) *Sauge de Jerusalem*. Family, Boraginæ. *Sex. Syst.* Pentandria Monogynia. The leaves of this plant have been used as demulcents and pectorals; partly from their resemblance to lungs; and, partly, because they manifest a slightly mucilaginous taste. The plant is not worthy of notice.

**PULMONARIA**, Pneumonia—*p.* Arborea, Lichen pulmonarius—*p.* Gallica, Hieracium murorum.

**PULMONARY**, *Pulmonaris*, *Pulmonalis*. That which relates or belongs to the lungs. A name given to various parts.

**PULMONARY ARTERY**, *Arteria pulmonaris*, *Vena arteriosa*, arises from the upper and left part of the right ventricle of the heart; whence it passes obliquely upwards and to the left side; dividing into two trunks, opposite the second dorsal vertebra—one passing to each lung. At its origin, it is furnished with three sigmoid or semilunar valves. It carries the blood to the lungs for aeration.

**PULMONARY MATTER**, BLACK, see Pulmo.

**PULMONARY PLEXUS**, *Plexus pulmonaris*. A considerable nervous network, situate behind the bronchia, which is formed by the filaments of the pneumogastric nerve or par vagum, and by other filaments from the inferior cervical ganglion and the first thoracic ganglia. This plexus forms a kind of areolar web, with numerous meshes of different sizes, in which vessels are lodged, surrounded by much cellular tissue. This plexus sends filaments to the bronchia, which they accompany to their extremities.

**PULMONARY VEINS**, *Venæ pulmonares*, *Arteriae venosæ*. These arise in the lungs from

the final terminations of the arteries of the same name; collect in ramusculi and rami of greater and greater size, and ultimately unite in four trunks; two of which issue from each lung to open into the left auricle of the heart. The pulmonary veins have the same structure as the other veins of the body; from which they differ, in containing arterial blood, as the pulmonary artery differs from the others in conveying venous blood. They carry the blood back to the heart after aeration.

**PULMONES TARTARIZATI**, Lithiasis pulmonum.

**PULMONIA**, Phthisis pulmonalis, Pneumonia.

**PULMONIC**, *Pulmonicus*, *Pneumonicus*, *Pulmonarius*. One affected with phthisis—one labouring under diseases of the lungs. Any thing relating or belonging to the lungs. A medicine for the lungs.

**PULP**, *Pulpa*, *Pulpa'men*, *Sarc.* The soft and parenchymatous parts of vegetables reduced to a paste by the operation of pulping.

**PULP OF THE TOOTH**, Dental pulp.

**PULPA CASSIÆ**, see Cassia fistula—*p.* Dentis, Dental pulp—*p.* Prunorum sylvestrium condita, Conserva pruni sylvestris.

**PULPA TESTIS**, *Parsenchyma testis*. The parenchyma of the testis.

**PULPAMEN**, Pulp.

**PULPE DENTAIRE**, Dental pulp.

**PULPEZIA**, Apoplexy.

**PULPING**, *Pulpa'tion*, *Pulpa'tio*. An operation—the object of which is to reduce certain vegetable substances to a pulp. For this purpose, they are bruised in a mortar, and then passed through a hair sieve, by the aid of a wooden spatula, called a *Pulpor*, (F.) *Pulpoirs*.

**PULPOIRE**, see Pulping.

**PULQUE**, see Agave Americana.

**PULS EX OVIS ET LACTE**, Oogala.

**PULSATILLA NIGRICANS**, Anemone pratensis—*p.* Vulgaris, Anemone pulsatilla.

**PULSATILLE NOIRE**, Anemone pratensis—*p. des Prés*, Anemone pratensis.

**PULSATIO**, Pulsation—*p.* Cordis, Palpitation.

**PULSATIÖN**, *Pulsa'tio*, *Sphygmus*, *Sphysis*, *Pedest'is*, *Pedest'mos*, (F.) *Battement*. The beating of the heart and arteries. Also, the beating felt in an inflamed part.

**PULSATIVUS**, Throbbing.

**PULSATORY**, Throbbing.

**PULSE**, from *pulso*, 'I beat'; *Pulsus*, *Pulsa'tio*, *Pulsus cordis et arteriarum*, *Ictus cordis et arteriarum*, *Incur'sus arteriarum*, *Sphygmus*, *Sphygma*, *Diasphyxis*, (F.) *Pouls*. Beating of the arteries, produced by the afflux of the blood propelled by the heart in its contractions. For the sake of convenience, we choose the radial artery at the wrist to detect the precise character of the pulse. These characters relate to the number of pulsations in a given time; to their degrees of quickness; hardness; and strength; to the equality or inequality either of the pulsations themselves or of their intervals; to the development or fulness of the artery, and to the different impressions it may produce on the finger.

The following estimates have been made of the pulse at various ages :

Ages.	Number of beats per minute, according to		
	HÄSERDEN.	SOMMERING.	MÜLLER.
In the embryo,.....	—	—	150
At birth,.....	130 to 140	Do.	Do.
One month,.....	120	—	—
One year,.....	120 to 108	150	115 to 130
Two years,.....	103 to 90	110	100 to 115
Three years,.....	90 to 80	90	90 to 100
Seven years,.....	72	—	85 to 90
Twelve years,.....	70	—	—
Puberty,.....	—	80	80 to 85
Adult age,.....	—	70	70 to 75
Old age,.....	—	60	50 to 65

It does not appear, from recent researches, that the pulse of the aged is less frequent, but the contrary. In general, the pulse is more frequent in females and in irritable persons, than in males and those of an opposite temperament. In the healthy state, the pulse, besides having the proper number of pulsations, is neither hard nor unusually soft; it is moderately developed; of a medium strength; and perfectly equal, both as regards the pulsations and their intervals. In diseases it wanders, more or less, from these physiological conditions. The different characters of the pulse that have been enumerated, are remarkably numerous. In a dictionary, it is necessary to detail them, although many of them are not now regarded; and some are ridiculous. At times, when an impediment exists to the flow of blood along the pulmonary arteries, either owing to mechanical obstruction or to diminished force of the ventricle, a reflux takes place along the veins, giving rise to the 'venous pulse.'

**PULSE, ARDENT, *Pulsus ardens*, (F.) *Pouls ardent*, *Pouls élevé*.** One which seems to raise itself to a point in order to strike the finger.

**PULSE, CAPRIZANT, *Pulsus Caprizans*, *P. dorcadis'sans*, *P. gazell'ans*, *P. fusa'tis*, *Goat-leap pulse*, (F.) *Pouls caprisant*.** One, which seems to leap, as it were; an imperfect dilatation of the artery being succeeded by a fuller and a stronger one.

**PULSE, COMPLEX, (F.) *Pouls combiné* ou *composé*, *P. compliqué*.** A pulse which has the character of several critical pulses united.

**PULSE, CONTRACT'ED, (F.) *Pouls serré*, *P. concentré*.** One whose pulsations are narrow, deep, and slightly hard.

**PULSE, CONVULSIVE, *Pulsus convulsivus*, (F.) *Pouls convulsif*.** That which is unequally frequent or unequally hard; in short, which resembles the irregular pulsations of a muscular fibre in a state of convulsion.

**PULSE, CRITICAL, *Pulsus criticus*.** A pulse which, after having possessed the characters of irritation, becomes free, open, soft, &c.

**PULSE, DECURV'ATE, *Pulsus Myurus*:** see, also, *Myurus*.

**PULSE, DEEP, *Pulsus profundus*, (F.) *Pouls profond*.** One which cannot be felt without difficulty, and without strong pressure by the finger.

**PULSE, DEFICIENT, *Pulsus deficiens*, *P. Flickering*, *Pulsus an'nuens* et *circum'nuens*, (F.) *Pouls défaillant*, *P. insensible*.** One which seems, every instant, about to cease.

**PULSE, DEPRESSED, *Pulsus depressus*, (F.) *Pouls déprimé*.** That which is deep and weak.

**PULSE, DEVELOPED, (F.) *Pouls développé*.**

That which is broad, full, strong, and frequent.

**PULSE, DICROTIC, *Pulsus Dicrotus*, *P. bif'arotus*, *P. intestina'lis*, *P. bif'riens*, *P. mallea'ris*, *P. interci'sus*, (F.) *P. dicrota*, *P. rebondis'sant*, *P. redoublé*.** That in which the finger is struck twice at each pulsation; once lightly, the other time more strongly.

**PULSE, EQUAL, *Pulsus aqualis*.** That in which the pulsations resemble each other, and return at equal intervals.

**PULSE, FEBRILE, *Pulsus febrilis*.** One very frequent.

**PULSE, FEBBLE, WEAK, *Pulsus debilis*, (F.) *Pouls faible*.** One which strikes the finger feebly.

**PULSE, FILIFORM, *P. thready*.** One which resembles a thread slightly vibrating.

**PULSE, FLICKERING, *Pulse*, deficient.**

**PULSE, FORMICANT, *Pulsus formicans*, (F.) *Pouls formicant*.** One which resembles, by being small and scarcely perceptible, the motion of an ant.

**PULSE, FREQUENT, (F.) *P. agité*, *P. précipité*.** One which strikes more frequently than usual in a given time.

**PULSE, FULL, *Pulsus plenus*, (F.) *Pouls plein*.** One which gives the notion of great repletion in the vessel.

**PULSE, GOAT-LEAF, *P. Caprizant*.**

**PULSE, GUTTURAL, *Pulsus gutturalis*, (F.) *Pouls guttural*.** A pulse which has been supposed to indicate the termination of affections of the throat.

**PULSE, HARD, *Pulsus durus*, (F.) *Pouls dur*.** That in which the pulp of the finger seems to yield to the pulsation.

**PULSE, HECTIC, *Pulsus hecticus*.** The weak, frequent pulse observed in hectic fever.

**PULSE, HEMORRHOIDAL, (F.) *Pouls des Hé-morrhoides*.** A critical pulse, announcing the appearance of the hemorrhoidal flux. It is described as unequal;—the pulsations not being alike in force, and still less the intervals.

**PULSE, HEPATIC, (F.) *Pouls du Foie*.** A pulse imagined to indicate affections of the liver. It is not worthy of description.

**PULSE, INFERIOR, (F.) *Pouls inférieur*, *P. abdominal*, *P. ventral*.** One supposed to announce evacuations below the diaphragm.

**PULSE, INTERCURENT, *Pulsus intercur'rens* seu *inter'cidens*.** One in which a superfluous pulsation seems to occur from time to time.

**PULSE, INTERMITTENT, (F.) *Pouls intercalent*.** One in which the pulsations fail from time to time.

**PULSE, INTES'TINAL, (F.) *Pouls des intestins*,**

*P. de la diarrhée.* A critical pulse, presumed to announce an evacuation by the intestines.

**PULSE, INTRICATE,** *Pulsus Intricatus*, (F.) *Pouls embarrassé.* That which is but little developed and unequally slow.

**PULSE, IRREGULAR,** *Pulsus anormalis.* One whose pulsations are equal, and return at unequal intervals.

**PULSE OF IRRITATION,** *Pulsus ab irritatione seu nervi seu acritivus.* One which is frequent, hard, and contracted.

**PULSE, JARRING,** *P. vibrans*—*p. Jerking*, *Pulse, sharp.*

**PULSE, LANGUID,** (F.) *Pouls languissant.* A slow and feeble pulse.

**PULSE, LARGE,** *Pulsus crassus, P. magnus*, (F.) *Pouls grand, P. large.* That which is large and full.

**PULSE, LONG.** One which strikes the finger to a great extent in length.

**PULSE, LOW,** *Pulsus humilis*, (F.) *Pouls bas.* One in which the pulsations are scarcely perceptible.

**PULSE, NASAL,** (F.) *Pouls nasal, P. capital, P. du Nez.* One supposed to announce the end of an irritation in the nasal fossæ.

**PULSE, NATURAL,** (F.) *Pouls naturel des adultes, P. parfait, P. des adultes, P. modéré.* One that is equal and regular in strength and frequency; compressible, and devoid of hardness.

**PULSE, ORGANIC,** (F.) *Pouls organique.* One which indicates the affected organ, or the organ by which an evacuation will take place.

**PULSE, PECTORAL,** (F.) *Pouls de l'expectoration.* A critical pulse, announcing the termination of some pulmonary irritation.

**PULSE, QUICK.** One which strikes sharply, but not forcibly, against the finger.

**PULSE, REGULAR,** *Pulsus normalis aut regularis.* One whose pulsations are equal, and succeed each other at equal intervals.

**PULSE, RESISTING,** (F.) *Pouls résistant.* One a little tense, a little hard.

**PULSE, SHARP,** (F.) *Pouls prompt, P. vite, P. vif.* One which strikes the finger sharply, rapidly. When to a greater extent, it is called a *jerking pulse.*

**PULSE, SHARP-TAILED,** *Pulsus myurus*: see *Myurus.*

**PULSE, SIMPLE,** *Pulsus simplex.* A critical pulse, indicating an evacuation by one organ only.

**PULSE, SLOW,** *Pulsus tardus, P. rarus*, (F.) *Pouls lent, P. tardif, P. rare.* One which strikes the finger slowly.

**PULSE, SMALL,** *Pulsus parvus*, (F.) *Pouls petit.* One whose pulsations are slender and weak.

**PULSE, SOFT,** *Pulsus mollis*, (F.) *Pouls mou.* One which yields under the finger.

**PULSE, STOMACHAL,** (F.) *Pouls stomacal, P. de l'estomac.* One supposed to announce an evacuation by the stomach.

**PULSE, STRONG,** *Pulsus fortis*, (F.) *Pouls fort, P. véhément.* One which strikes the finger strongly.

**PULSE, SUPERIOR,** *Pulsus Superior*, (F.) *Pouls supérieur.* A critical pulse, supervening on irritation of organs situate above the diaphragm.

**PULSE, SUPPLE,** *Pulsus elasticus*, (F.) *Pouls*

*soUPLE.* One in which the pulsations have strength without hardness.

**PULSE OF SWEAT,** *Pulsus Sudoralis*, (F.) *Pouls Sudoral, P. de la sueur.* A critical pulse, indicating an approaching perspiration.

**PULSE, TENSE,** *P. Cordy, Pulsus tensus*, (F.) *Pouls tendu, P. roide.* One in which the artery resembles a cord fixed at its two extremities. When resembling a wire, it is called *wiry.*

**PULSE, TREADDY,** *P. filiform.*

**PULSE, TREMULOUS,** *Pulsus tremulus*, (F.) *Pouls tremblant, P. palpitant.* One in which each pulsation oscillates.

**PULSE, UN'DULATING,** *Pulsus fluctuosus, P. fluens, P. incidens Solani*, (F.) *Pouls ondulant, P. ondoyant.* One which resembles, in its movements, those of the waves.

**PULSE, UNEQUAL,** *Pulsus inaequalis*, (F.) *Pouls inégal.* One whose pulsations are not alike, or return at unequal intervals.

**PULSE, URINAL,** *Pulsus urinarius*, (F.) *Pouls de l'Urina.* A critical pulse, fancied to denote an approaching evacuation of urine.

**PULSE, UTERINE,** *Pulsus uterinus*, (F.) *Pouls Utrine, P. de la Matrice, P. des Règles.* One which indicates the flow of the menses, or the occurrence of metrorrhagia.

**PULSE, VENOUS,** *Pulsus venarum.*

**PULSE, VERMICULAR.** That which imitates the movement of a worm.

**PULSE, VIBRATING; Jarring Pulse.** One in which the artery seems to vibrate like a musical string.

**PULSE, WIRY,** see *Pulse, tense.*

**PULSILEGIUM,** *Pulsilegium, Pulsimeter*, from *pulsus*, 'the pulse,' and *lego*, 'I tell.' *Sphygmometer, Sphygmoscopium.* Any instrument for measuring the quickness or force of the pulse.

**PULSIMANTIA;** from *pulsus*, and *mantra*, 'divination.' The art of predicting or prognosticating by the pulse.

**PULSIMETER,** *Pulsilegium.*

**PULSUS,** *Pulse*—*p. Acriticus*, *Pulse of irritation*—*p. Aequalis*, *Pulse, equal*—*p. Annuus* et *circumnuus*, *Pulse, deficient*—*p. Anormalis*, *Pulse, irregular*—*p. Bicrotus*, *Pulse, dicrotic*—*p. Biferiens*, *P. dicrotus*—*p. Caprizans*, *Pulse, caprizant*—*p. Crassus*, *Pulse, large*—*p. Debilis*, *Pulse, feeble*—*p. Deficiens*, *Pulse, deficient*—*p. Dicrotus*, *Pulse, dicrotic*—*p. Dorsadissans*, *Pulse, caprizant*—*p. Durus*, *Pulse, hard*—*p. Elasticus*, *Pulse, supple*—*p. Fluctuosus*, *Pulse, undulating*—*p. Fluens*, *Pulse, undulating*—*p. Formicans*, *Formicant*, and *Pulse, formicant*—*p. Fortis*, *Pulse, strong*—*p. Fusalis*, *Pulse, caprizant*—*p. Gazellans*, *Pulse, caprizant*—*p. Heterochronicus*, see *Heterochronicus*—*p. Humilis*, *Pulse, low*—*p. Incidens Solani*, *Pulse, undulating*—*p. Intercidens*, *Pulse, intercurrent*—*p. Mallearis*, *Pulse, dicrotic*—*p. Intercisus*, *Pulse, dicrotic*—*p. Intercurrens*, *Pulse, intercurrent*—*p. Intestinalis*, *Pulse, dicrotic*—*p. Intricatus*, *Pulse, intricate*—*p. Magnus*, *Pulse, large*—*p. Mollis*, *Pulse, soft.*

**PULSUS MYURUS,** *Pulse, decurtate, P. sharp-tailed*, (F.) *Pouls myrus.* One which goes on diminishing. See *Myurus.*

**PULSUS NERVINUS,** *Pulse of irritation*—*p. Normalis*, *Pulse, regular*—*p. Parvus*, *Pulse, small*—*p. Plenus*, *Pulse, full*—*p. Rarus*, *Pulse, slow.*

**PULSUS SERRINUS,** (F.) *Pouls serrin, P. ser-*

*ratile*. One which strikes, sometimes strongly, at others feebly, and recalls the idea of a saw.

**PULSUS STRICTUS**, (F.) *Pouls étroit*. One that strikes the finger to a small extent in breadth.

**PULSUS SUDORALIS**, Pulse of sweat—p. Tardus, Pulse, slow—p. Urinalis, Pulse, urinal—p. Uterinus, Pulse, uterine.

**PULSUS VACUUS**, (F.) *Pouls vide*. One which gives the idea of emptiness of the artery.

**PULSUS VENA'RUM**, *Venous Pulse, Phlebopaltia*. A pulsation occasionally noticed in the jugular veins. It is owing to some of the blood of the right ventricle reflowing into the right auricle, and communicating an impulse to the venous blood arriving in the auricle through the descending cava. It is often a sign of impediment to the flow of blood along the pulmonary artery.

**PULTATIO**, Atheroma.

**PULTICE**, Catapasm.

**PULTICULA**, *Bouillie*.

**PULVERES EFFERVESCENTES**, Powders, soda.

**PULVERIZATION**, *Pulverisatio, Pulveratio*, from *pulvis*, 'dust;' *Coniatio/sis*. The operation of dividing substances, so as to reduce them to powder.

**PULVILLUS**, Pad, *Bourdonnet*—p. e. Linamentis confectus, *Bourdonnet*—p. Rotundus, *Bourdonnet*.

**PULVINAR**, *Pulvinarium*. A pillow.

**PULVINAR HUMULI**, see *Humulus lupulus*.

**PULVINAR MEDICATUM** seu *MEDICINALĒ, Sacculus medicinalis*. A medicated pillow; as of hops.

**PULVINAR PARVUM**, Pad—p. Ventriculi, *Pancreas*.

**PULVINULUS**, Pad.

**PULVIS**, *Conis*, (F.) *Poudre*. A substance, reduced into small particles by pulverization. *Simple powders* are those of a single substance; *compound*, those which result from a mixture of several different powders. An *impalpable powder* is one which is so fine that it can scarcely be felt under the finger. A *compound powder* was, formerly, called *Spécies*, (F.) *Espèce*.

**PULVIS ABSORBENS**, P. de magnesiâ compos.—p. Adspersorius, *Catapasma*—p. Alexiterius, P. contrayervæ comp.—p. Alexiterius, P. ipecacuanhæ compositus—p. Algarothi, *Algaroth*.

**PULVIS ALOES COMPOSITUS**, *Compound powder of Aloes, Pulvis Aloës cum Guaiaco, P. aloëticus cum Guaiaco*. (*Aloës spicat. ext. ʒiiss, guaiac. gum. res. ʒj, pulv. cinnam. comp. ʒiiss*. Rub the aloes and guaiacum separately, then mix the whole. *Ph. L.*) Cathartic, stomachic, and sudorific. Dose, gr. x to ʒj.

**PULVIS ALOES CUM CANELLA**, *Pulvis aloës et canella, Powder of Aloes with Canella, Species Hieræ picræ, Hiera picra, Pulvis Aloëticus*. (*Aloës ʒij, canella ʒiij*. Rub separately into a powder, and mix. *Ph. U. S.*) A warm cathartic. Dose, gr. x to ʒj.

**PULVIS ALOES CUM GUAIACO**, P. A. compositus—p. Aloeticus, P. aloes cum canellâ—p. Aloeticus, *Hiera picra*—p. Aluminosus, P. sulphatis aluminæ compositus—p. Aluminis compositus, P. sulphatis aluminæ compositus—p. Aluminis kinosatus, see P. sulphatis aluminæ compositus.

**PULVIS DE AMARIS COMPOSITUS**, *Pulvis an-*

*tiarthriticus amarus*, (F.) *Poudre antiarthritique amère*. (*Rad. gentian, aristoloch. rotund., aa p. 3, flor. centaur. min. p. 4, fol. chamaedr., chamæpith. manipul.*—f. *pulvis, Ph. P.*) In gouty affections, dyspepsia, &c. Dose, gr. xx.

**PULVIS ANGELICUS**, *Algaroth*—p. Anodynus, P. ipecacuanhæ comp.—p. Antiacidus, P. cretæ compositus—p. Antiacidus, P. de magnesiâ compos.—p. Antiarthriticus amarus, P. de amaris compositus—p. Antiarthriticus purgans, P. de sennâ, scammonæ et lignis—p. Antiasthmaticus, P. de sulphure et scillâ.

**PULVIS ANTILYSUS**, *Mead's Powder against the bite of a mad dog*. It consisted of ash-coloured liverwort in powder, with an equal quantity of black pepper; a drachm and a half of the two forming a dose for an adult.

**PULVIS ANTIMONIALIS**, *Antimonial powder*.

**PULVIS DE ARO COMPOSITUS**, *Compound Powder of Arum*, (F.) *Poudre of Birkmann*, (*Rad. art. acori vers, pimpinell. saxifrag. aa 40 p. ocul. cancer. ppt. 12 p., cinnam. 7 p., potassæ sulph. 6 p., ammoniæ muriat. 2 p.*—f. *pulv. Ph. P.*) Sternutatory.

**PULVIS AROMATICUS**, P. cinnamomi compositus.

**PULVIS ASARI COMPOSITUS**, P. sternutatorius, P. errhînus, P. capitâlis Sancti Angeli, P. cephalicus, *Cephalic snuff*; *Compound powder of Asarabacca*, (F.) *Poudre d'asarum composée dite sternutatoire, P. de Saint-Ange*. (*Folior. asar. Europ. p. tres., fol. origan. majorana, flor. lavand. spic., sing. p. l.* Rub into powder. *Ph. L.*) Sternutatory.

**PULVIS AURI**, see *Gold*—p. e. *Bolo compositus cum opio*, P. cretæ compositus cum opio—p. e. *Bolo compositus sine opio*, see P. cretæ compositus—p. Cambogiæ compositus, P. e gummi guttâ—p. Capitalis Sancti Angeli, *Pulvis asari compositus*—p. Carbonatis calcis compositus, P. cretæ compositus—p. Cardiacus, P. contrayervæ comp.—p. Carthusianorum, Antimonii sulphuretum rubrum—p. Catharticus, P. scammonæ comp.—p. Cephalicus, P. asari compositus.

**PULVIS CINNAMOMI COMPOSITUS**, *Compound Powder of Cinnamon, Pulvis seu Species Imperato'ris, P. vitæ Imperato'ris, P. Diaro'maton, Species diacinnamo'mi, S. letifican'tes Rhazia, Tra'gea aromati'ca, Species Diam'bræ sine odôratis, Species aromati'cæ, Pulvis aromaticus* (*Ph. U. S.*), (F.) *Poudre de canelle composée ou aromati'que*. (*Cinnam., zingib. aa ʒij, cardam., myrist. aa ʒj*. Rub to a fine powder. *Ph. U. S.*) Stimulant and carminative. Dose, gr. x to ʒj.

**PULVIS COBBI** seu *TUNQUINENSIS*. The famous Tonquin powder, introduced into England by a Mr. Cobb. It was composed of 16 grains of musk, and 48 grains of *cinnabar*; and was mixed in a gill of *arrack*. It was formerly regarded as a specific in hydrophobia.

**PULVIS COMITIS WARWICENSIS**, P. Cornachini—p. Comitissæ, *Cinchona*.

**PULVIS CONTRAYERVÆ COMPOSITUS**, *Lapis contrayervæ, Contrayerva balls, Compound Powder of Contrayerva, Pulvis cardi'acus, P. alexit'rius, P. Mantua'nus*. (*Contrayerv. rad. contrit. ʒv, test. prap. Miss. Mix. Ph. L.*) Stimulant and sudorific. Dose, gr. xv to ʒss.

**PULVIS CORNACHI'NI**, *Diaceltates son Parscelsi, Earl of Warwick's Powder, Pulvis Oz-*

*gdi Stibii compositus, Pulvis Comitis Warwicensis, Pulvis de Tribus, Carbores Triceps, Pulvis Scammonii antimoniales, (F.) Poudre Cornachino. (Scammon. Alep., potass. superpart., antim. diaph. ãa p. æ. f. pulvis. Ph. P.) Cathartic. Used chiefly in cutaneous diseases. Dose, ʒss to ʒj.*

**PULVIS CORNU USTI CUM OPIO, Pulvis opiatius, Powder of Burnt Hartshorn with opium, (F.) Poudre de corne brûlée avec l'opium. (Opii duri cont. ʒj, corn. ust. præp. ʒj, coccor. cont. ʒj. Mix. Ph. L.) Ten grains contain one of opium. Anodyne.**

**PULVIS CRETACEUS, P. cretæ compositus.**

**PULVIS CRETÆ COMPOSITUS, P. Carbonatis Calcis compositus, Compound Powder of chalk, P. cretæcus, Species e Scordio sine opio, Diascordium, Pulvis antac'idus, P. terrestris, Species Diacretæ, (with Bole Armeniac in place of chalk—the Pulvis e Bolo compositus sine opio, (F.) Poudre de craie composée. (Creta ppt. Mas, cinnam. cort. ʒiv, tormentill. rad., acacia gum., sing. ʒijj, ʒp. long. fruct. ʒiv. Reduce separately to a fine powder, and mix. Ph. L.) Antacid, stomachic, absorbent. Dose, gr. xx to ʒij.**

**PULVIS CRETÆ COMPOSITUS CUM OPIO, Compound Powder of Chalk with opium, Pulvis e Cretæ compositus cum opio (with Bole Armeniac instead of chalk—Pulvis e Bolo compositus cum opio,) Species e Scordio cum opio, (F.) Poudre de craie composée avec l'opium. (Pulv. cret. e. ʒvijs, opii duri cont. ʒiv. Mix. Ph. L.) Contains one grain of opium in 40. Anodyne and absorbent. Dose, ʒj to ʒij.**

**PULVIS DIAPHORETICUS, P. ipecacuanhæ comp.—p. Diapnoicus, P. ipecacuanhæ comp.—p. Diaromaton, P. cinnamomi compositus—p. Diarsenæ, P. sennæ compos.—p. Diaturpethi compositus, P. jalapæ compositus.**

**PULVIS DUCIS PORTLANDIÆ, Duke of Portland's Gout Powder. (Rad. aristoloch., gentianæ, summit. chamadr., centaurs. min. ãa p. æ.) Dose, ʒss to ʒj.**

**PULVIS EMMENAGOGUS, P. myrrhæ compositus—p. Epilepticus Marchionum, P. de magnesiâ compositus—p. Errhinus, P. asari compositus—p. Galactopæus, P. de magnesiâ compos.**

**PULVIS E GUMMI GUTTÆ, P. Cambogiæ compositus, P. hydragogus, Camboge Powder, (F.) Poudre hydragogus ou de gomme gutte, P. de Quercetanus. (Rad. jalap. 24 p., rad. mechoacan. 12 p., cinnam. rhei. ãa 8 p., gum. cambog. 3 p., fol. soldanella sic. 6 p., semin. anisi 12 p., fiat pulvis. Ph. P.) A drastic cathartic. In anasarca and in worms. Dose, gr. xv to xxx.**

**PULVIS GUMMO'SUS ALKALINUS, Sapo vegetabilis, (F.) Poudre de savon végétal. (Guaiac. pulv. ʒ2 p., potass. carb. 4 p. Make into a powder. Ph. P.) Antacid.**

**PULVIS EX HELMINTHOCORTO COMPOSITUS, P. vermifuge absque mercurio, (F.) Poudre vermifuge sans mercure. (Fuc. helminthocort., sem. contra., summitat. absinth., tanacetii, fol. scordii, sennæ, rhei. ãa p. æ, fiat pulvis. Ph. P.) Dose, ʒj to ʒj.**

**PULVIS HYDRAGOGUS, P. e gummi guttâ—p. Hydrargyri cinereus, see Hydrargyri oxydum cinereum—p. Hypnoticus, Hydrargyri sulphuretum nigrum—p. Imperatoris, P. cinnamomi compositus—p. Incisivus, P. de sulphure et scillâ—p. Pro infantibus, P. de magnesiâ com-**

**pos.—p. Infantum, P. de magnesiâ compos.—p. Infantum antacidus, P. de magnesiâ compositus.**

**PULVIS IPECACUANHÆ COMPOSITUS, P. alexiterius, P. anodynus, P. diaphoreticus, P. diaphoreticus, P. sudorificus Doveri, Compound powder of Ipecacuanha, P. Ipecacuanhæ et Opii (Ph. U. S.), Dover's Powder, (F.) Poudre de Dover ou d'ipecacuanha et d'opium, P. de Dover. (Ipecacuanh. pulv., opii pulv., sing ʒj, potassæ sulphat. ʒj. Mix.) Diaphoretic. Dose, gr. v to gr. xij.**

**PULVIS IPECACUANHÆ ET OPII, P. ipecacuanhæ compos.**

**PULVIS JALAPÆ COMPOSITUS, P. Diaturpethi compositus, Compound powder of Jalap, Pulvis laxans, P. Purgans, P. laxativus vegetabilis, P. laxans cum sale, P. Jalapæ salinus, P. tartaricus, Species Diyalapæ, (F.) Poudre de jalap composée. (Pulv. jalap. ʒj, potass. bitart. ʒij. Mix.) Cathartic. Dose, ʒj to ʒij.**

**PULVIS JALAPÆ SALINUS, P. jalapæ compositus—p. Jalapæ tartaricus, P. jalapæ compositus—p. de Jalapæ et scammonio compositus, P. scammones compos.—p. Jamesii, Antimonial powder—p. Jesuiticus, Cinchona—p. Joannis de Vigo, Hydrargyri nitrico-oxydum.**

**PULVIS KINO COMPOSITUS, Compound Powder of kino, (F.) Poudre de kino composit. (Kino ʒxv, cort. cinnam. ʒiv, opii duri ʒi. Rub each to powder, and mix. Ph. L.) Astringent. Dose, gr. v to xx.**

**PULVIS LAXANS, P. jalapæ compositus—p. Laxans cum sale, P. jalapæ compositus—p. Laxativus vegetabilis, P. jalapæ compositus.**

**PULVIS DE MAGNESIÂ COMPOSITUS, P. Galactopæus, P. Nutriæcum, P. Infantum, P. Infantum antac'idus, P. pro Infantibus, P. antac'idus, P. absorbens, P. epilepticus Marchionum, Compound powder of Magnesiæ, (F.) Poudre absorbante et anti-acide. (Magnesiæ, sacchar. ãa p. æ. Mix. Ph. P.)**

**PULVIS MANTUANUS, P. contrayervæ comp.—p. Marchionis, M. Pulvis—p. Mercurialis cinereus, Hydrargyri oxydum cinereum—p. ad Mucum pulmonalem liberius cinereum, P. de sulphure et scillâ.**

**PULVIS MYRRHÆ COMPOSITUS, P. e Myrrhæ compositus, Compound Myrrh Powder, Pulvis ad ulcera tendinum, P. Emmenagogus, (F.) Poudre Balsamique. (Myrrhæ, sabina, rosa, castor. Russ. ãa ʒj.) A stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to xl.**

**PULVIS NUTRICUM, P. de magnesiâ compositus—p. Opiatus, P. cornu usti cum opio—p. Oxydi stibii compositus, P. cornachini—p. Parturiens, Ergot—p. de Phosphate calcis et stibii compositus, Antimonial powder—p. Principis, Hydrargyri nitrico-oxydum—p. Purgans, P. jalapæ compositus—p. Quercetanus, Hydrargyri submuriæ.**

**PULVIS QUERCUS MARINÆ, Powder of Yellow Bladder-Wrack. (The wrack in fruit, dried, cleaned, exposed to a red heat in a crucible, with a perforated lid, and then reduced to powder. Ph. D.) Virtues dependent on iodine: used, consequently, in bronchocele, &c. Dose, gr. x to xl.**

**PULVIS QUERCUS MARINÆ, see Fucus vesiculosus.**

**PULVIS SCAMMONIÆ COMPOSITUS, Compound Powder of Scammony, Pulvis e Scammonio compositus, Pulvis Scammonii, Pulvis de Ja-**

*lapé et Scammonio compositus dictus Catharticus*, (F.) *Poudre cathartique* ou *Poudre de Scammonée composée*. (*Scammon.*, *cat. jalap. dur.*, sing., ʒij, *singib.* rad. ʒss. Rub separately to powder and mix. Ph. L.) Cathartic. Dose, gr. viij to gr. xv.

PULVIS SCAMMONII CUM ALOË, P. e *Scammonio cum Aloë*, *Scammony and Aloes Powder*. (*Scammon.* ʒvj, *cat. jalap. dur.*, *aloe Socotr.* aa ʒiss, *sing.* ʒss.) Cathartic. Dose, gr. x to xv.

PULVIS SCAMMONII ANTIMONIALIS, P. cornachini.

PULVIS SENNÆ COMPOSITUS, *Compound powder of Senna*, *Pulvis e Sennâ compositus*, P. e *Sennâ compositus*, *Pulvis Dioscoridæ*, (F.) *Poudre de senné composée*. (*Senna folior.*, *potass. supertart.*, sing. ʒij, *scammon.* ʒss, *rad. singib.* ʒij. Ph. L.) Cathartic, hydragogue. Dose, ʒj to ʒj.

PULVIS DE SENNÂ, SCAMMONIO ET LIGNIS COMPOSITUS dictus ANTIARTHERITICUS PURGANS, (F.) *Poudre de Pêrard*. (*Gum Arab.*, *potass. supertart.*, *fol. senna*, *china*, aa 4 p., *scammon.*, *rad. sarsapar.*, *china*, *guaiac.* lign. aa 2 p., *fiat pulvis*. Ph. P.) Purgative. Used to obviate gout. Dose, ʒj.

PULVIS STANNI, see Tin—p. Sternutatorius, P. asari compositus—p. Stibiatum, Antimonial powder—p. Stypticus, P. Sulphatis aluminæ compositus—p. Sudorificus, P. ipecacuanhæ comp.—p. Sudorificus Doveri, P. ipecacuanhæ compositus.

PULVIS SULPHATIS ALUMINÆ COMPOSITUS, P. *aluminosus*, P. *aluminis kinosatus*, *Pulvis stypticus*, *Pulvis aluminis compositus*, *Alu'men kinosatum*, *Compound Alum Powder*, (F.) *Poudre styptique* ou *d'alun composée*. (*Sulphatis aluminæ*, p. iv. *kino*, p. i. Ph. E.) Astringent. In intestinal hemorrhage and diarrhœa. Dose, gr. x to xv.

PULVIS DE SULPHURË ET SCILLÂ, P. *Antiasthmaticus*, P. *Inci'sivus*, P. *ad mucum pulmonalem liberius eiev'dum*, (F.) *Poudre incisive* ou *anti-asthmaticus*. (*Sacchar. alb.* p. 3, *sulphur. lot.* p. 2, *scilla*, *sicc.* p. j. Ph. P.) Dose, gr. v to ʒss.

PULVIS DE SULPHURË POTASSÆ COMPOSITUS, P. *temperans Stahlîi*, (F.) *Poudre tempérante de Stahl*. (*Potass. sulph.*, P. *nitræ*. aa 9 p., *hydrarg. sulph. rubr.* 2 p. Mix. Ph. P.) As an antiphlogistic, and in acidity of the first passage. Dose, ʒj to ʒij.

PULVIS E SULPHURË TO HYDRARGYRI NIGRO ET SCAMMONIO dictus VERMIFUGUS MERCURIALIS, (F.) *Poudre vermifuge mercurielle*. (*Pulo. cornachin.*, *hydrarg. sulphuret. nigr.* recent. præp., aa p. æ. Mix. Ph. P.) Dose, ʒj to ʒss.

PULVIS SYMPATHETICUS, Sympathetic powder—p. Temperans Stahlîi, P. de sulphate potassæ compositus—p. Terrestris, P. cretæ compositus.

PULVIS TRAGACANTHÆ COMPOSITUS, *Species Diatragacantha frigida*, *Pulvis e Tragacantha compositus*, *Compound Powder of Tragacanth*, (F.) *Poudre de gomme adragant composée*. (*Tragacanth. contus.*, *acaciæ gummi cont.*, *amylî.* sing. ʒiss, *sacch. purif.* ʒijj. Ph. L.) Demulcent. In coughs, &c. Dose, ʒss to ʒijj.

PULVIS DE TRIBUS, P. cornachini—p. Tunquinensis, P. Cobbii—p. ad Ulcera tendinum, P.

*myrrhæ compositus*—p. Vermifugus absque mercurio, *Pulvis ex helminthocorto comp.*—p. Vermifugus mercurialis, P. e sulphureto hydrargyri nigro et scammonio—p. Vitæ Imperatoris, P. cinnamomi compositus.

PUMEX, *Lapis pumicis*, *Pumice*, (F.) *Pierre Ponce*. This was formerly employed as a desiccative and dentifrice.

PUMICE, Pumex.

PUMILIO, Nanus.

PUMILUS, see Nanus.

PUMP, BREAST, *Antlia lactea*—p. Stomach, *Antlia gastrica*.

PUNA, *Veta*, *Sorocco*, *Soroche*, *Mareo*, (S.) A sickness common in the elevated districts of South America, and elsewhere, which attacks those unaccustomed to breathe the rarefied atmosphere. It strongly resembles sea-sickness, with a most acute and depressing throbbing in the head. It does not often affect the respiration considerably.

PUNAISE, Cimex.

PUNASIE, Ozæna.

PUNICH, *Eh's'sagra*, from *pungere*, 'to prick.' *Repulso'rium*, (F.) *Repoussoir*. A surgical instrument used for extracting the stumps of teeth. See Lever. Also, an agreeable alcoholic drink, made of spirit, wine, sugar, lemon juice and water. Milk is sometimes substituted in part for the water: it then forms *Milk Punch*.

PUNCTA OSSIFICATIONIS, Ossification, points of—p. Mucosa, see Acne.

PUNCTICULA, Petechiæ.

PUNCTIO, Paracentesis, Puncture—p. Nervi, Neurolygme.

PUNCTUM AU'REUM, *Punctura aurea*. Formerly, when an intestinal hernia was reduced, by an incision made through the integuments down to the upper part of the spermatic vessels, a golden wire was fixed and twisted, so as to prevent the descent of any thing down the tunica vaginalis. Hence the term.

PUNCTUM SALIENS, P. *sanguinum saliens*, *Globulus sanguineus*, *Punctus ruber saliens*. The first moving point which makes its appearance after the fecundation of the germ. It has been generally, but erroneously, applied to the heart of the embryo.

PUNCTURA, Paracentesis—p. Aurea, Puncture aureum.

PUNCTURE, *Punctura*, *Punctio*, *Centesis*, *Paracentesis*, *Nyctis*, from *pungere*, 'to prick;' *Typhis Punctura*, (F.) *Figure*. A wound made by a pointed instrument, as a sword, bayonet, needle, thorn, &c. A puncture is, generally, of trifling consequence; but, sometimes, it becomes important from the parts implicated, and the after consequences.

PUNCTURING. Same etymon. *Com-punctio*, *Paracentesis*, (F.) *Ponction*. The operation of opening, by means of a trocar, lancet, &c., any natural or accidental cavity; with the view of evacuating any fluid, effused or accumulated therein. *Paracentesis* is a sort of puncturing.

PUNCTUS RUBER SALIENS, Puncture saliens.

PUNGENT, (F.) *Pongitif*. Pain is said to be pungent, when it seems as if a pointed instrument were forced into the suffering part.

PUNICA GRANATUM. The *Pomigra-nate*, *Rhoa*, *çoa*, *Rhaa*, *çia*, *Granatum*, *Malo-*

*grana'tum*, (F.) *Grenadier*: Family, Myrtoideæ. *Sex. Syst.* Icosandria Monogynia. The rind of the fruit, called *Malicho'rium*, *Malaco'rium*, or *Malicorium*; and the flowers—called *Balaustine flowers*—are used in medicine. They have been employed both internally and externally as astringents. The seeds are called *Cocco'nes*, *κοκκους*. The portion, however, of the plant, that has attained most celebrity, is the bark of the root, *Grana'ti Rad'icis Cortex*, which appears to be very efficacious in tænia. It is given in decoction, (*Granat. rad. cort.* ʒij; *Aqua* Oij, boiled to Oiss.) Dose, f. ʒij, every half hour. Three or four doses are usually sufficient to expel the worm.

The bark contains a peculiar matter called *Grenadin*.

PUNK, *Boletus igniarius*.

PUOGENIA, *Pyogenia*.

PUPIL, *Pupilla*, *Pupula*, *Pupillio*, *Vis'io*, *Opsis*, *Corè*, *Corà*, *Rhoz*, *Fene'stra* seu *Nigrum* seu *Fora'men Oculi*, *Frunel'la*, *Lumen*, *Glent*, *Sight of the eye*, (F.) *Pupille*, *Frunelle*. The aperture of the iris, through which the rays of light pass that have to impress the image of an object on the retina. This aperture can be dilated or contracted so as to allow a greater or smaller quantity of luminous rays to penetrate. The pupil, in man, is round, and by it the anterior and posterior chambers of the eye communicate with each other. In the fœtus, during the first six months of gestation, it is closed by the pupillary membrane.

PUPIL, CLOSURE OF THE, *Synezixis*.

PUPILLÆ VELUM, Pupillary membrane.

PUPILLARIS HERBA, *Lapsana*.

PUPILLARY, *Pupilla'ris*. That which belongs to the pupil.

PUPILLARY MEMBRANE, *Membra'na Pupilla'ris*, *Pupilla'la velum*, *Membra'na Wache'dorfa'na*. The central aperture of the iris is closed, in the fœtus, during a certain period of gestation, by a very thin membrane. It disappears in the seventh month.

PUPPET ROOT, *Veratrum viride*.

PUPPIS OS, Frontal bone.

PUPULA, Pupil.

PUPULÆ, *A'pices digito'rum*. The pulp or extremities of the fingers.

PURBLINDNESS, *Myopia*.

PURGAMENTA, Excrement—p. *Alba*, *Leucorrhœa*—p. *Infantis*, *Meconium*—p. *Puerperii*, *Lochia*—p. *Uteri*, *Lochia*.

PURGANS MEDICAMENTUM, Cathartic.

PURGATIO, Catharsis—p. *Alvi*, *Catharsis*—p. *Muliebris alba*, *Leucorrhœa*—p. *Puerperii*, *Lochia*.

PURGATIONES, Menses—p. *Menstruæ*, *Menses*.

PURGATIONS, Menses.

PURGATIVE, *Purgati'vus*, *Purgans*, *Moch'licus*, *Catoret'icus*, *Catoter'icus*, *Cathar'ric*, (F.) *Purgatif*, from *purgare*, 'to cleanse.' A medicine which operates more powerfully on the bowels than a laxative, stimulating the muscular coat, and exciting increased secretion from the mucous coat.

PURGE ROOT, *Euphorbia corollata*.

PURIFICANS, *Purific'us*, from *purificare*, 'to make pure or clean.' Purifying; hence:—

PURIFICANTIA; Medicines that cleanse or purify the blood.

PURIFICUS, Purificans.

PURIFORM, *Puriform'is*; from *pus*, and *forma*. That which has the appearance of pus.

PURO-HEPATITIS, see Hepatitis.

PURO-MUCOUS, *Puro-muco'sus*, from *pus*, *puris*, and *mucosus*. Having the character or appearance of pus and mucus.

PURPLES, *Purpura hæmorrhagica*.

PURPURA, *Por'phyra*, 'a purple colour.' This word has been employed in many senses. It generally means, livid spots on the skin from extravasated blood, with languor and loss of muscular strength, pains in the limbs.—(F.) *Pourpre*.

In *Purpura Simplex*, *Porphyrus simplex*, *Pete'chie sive fibrè*, *Pelio'sis*, *Phanig'mus Pete'chie'lis*; *Profu'sio subcuta'nea*, *Pete'chial Scurey*, the spots are numerous, but small and flea-bite-shaped; chiefly on the breast, arms, and legs; with paleness of countenance.

In *Purpura Hæmorrhag'ica*, *Porphyrus hæmorrhagica*, *Stomac'acel universalis*, *Hæmorrhagica universalis*, *Pete'chiano'sis*, *Morbis maculo'sus hæmorrhag'icus Werthof'it*, *Pelio'sis hæmorrhag'ica*, *Scorbu'tus*, *Scorbu'tus*, *Hæmorrhœ'a pete'chia'lis*, *Hæmatospilia*, *Land Scurey*, *Purples*, (F.) *Scorbut*, *S. de Terre*, *Maladie de Werthof*, *Hémacalinosè*, *Peliose hæmorrhagique*—the spots are circular, and of different sizes; often in stripes or patches, irregularly scattered over the thighs, arms, and trunk; with occasional hæmorrhage from the mouth, nostrils, or viscera, and great debility and depression of spirits.

In *Purpura Nau'tica*, *Porphyrus nau'tica*, *Scorbu'tus*, *Pechtyr'bè*, *Gingibra'chium*, *Gingip'e'dium*, *Sceloty'r'bè*, *Stomac'acel*, *Scorbu'tus nau'ticus* or *Sea scurey*, (F.) *Scorbut*, there are spots, of different hues, intermixed with the livid, principally at the roots of the hair; the teeth are loose; the gums are spongy and bleeding; the breath is fetid, and the debility universal and extreme. This occurs chiefly at sea, after exposure to a moist, cold, foul atmosphere; with long use of one kind of food and of stagnant water.

All these varieties of purpura resemble each other considerably. In the first two, however, there seems, at times, to be some excitement, which has led to the employment of purgatives, and even of bleeding, with advantage. They are dependent upon a peculiar diathesis, which has been termed *Scorbu'tic Cachex'ia*, *Loes Scorbu'tica*, and *Cacoehy'm'ia Scorbu'tica*. Generally speaking, the use of the mineral acids will be indicated; and in sea scurey, vegetable acids must be regarded as the best antiscorbutics. Nitre is, also, a good antiscorbutic, and in cases of great prostration it may be united with Peruvian bark or turpentine. Tamarinds and cream of tartar, made into drink, are also serviceable. But the great remedy is change from low to cheerful spirits; from filth to cleanliness; and from a cold and damp, to a temperate and dry climate, with change of food, and especially the use of green vegetables.

The general principles of management are the same in sea, as in land scurey.

PURPURA, Scarlatina—p. *Alba benigna et maligna*, *Miliary fever*—p. *Maligna*, *Pete'chie*—p. *Miliaris*, *Miliary fever*—p. *Puerperarum*, *Miliary fever*—p. *Urticata*, *Urticaria*.

PURPURISSUM, *Hydrargyri sulphuretum rubrum*.

PURSE, Scrotum.

PURSINESS, *Dyspna'a pinguedino'sa*, (F.)

*Poussa*. Dyspnea accompanied with oppressive fatness.

**PURSLAIN**, Portalaca—p. Milk, Euphorbia corollata—p. Water, Veronica beccabunga.

**PURULENT**, *Purulentus*, *Empyos*, *Pyodes*, *Pyicus*. That which has the character of pus or consists of pus; as *purulent matter*, a *purulent collection*, &c.

**PURULENTIA**, Suppuration.

**PURVAIN**, Verberna officinalis.

**PUS**, *Matter*, *Humor purulen'tus*, *Pyon*, *Pyono'ma*. A secretion from inflamed textures, and especially from the cellular membrane. It is, almost always, of the same nature, whatever may be the part it proceeds from. Pus of a good quality,—*laudable pus*, *Pus bonum* seu *laudabile* seu *nutritivum* seu *verum*, (F.) *Pus louable*, is of a yellowish-white colour, opaque, inodorous, and of a creamy appearance. Heat, acids, and alcohol coagulate it. When analyzed by Schwilgué, it afforded albumen and water, a particular extractive substance, and a small quantity of soda, phosphate of lime, and other salts. Normal pus consists essentially of two distinct parts, *pus corpuscles* or *pus globules*, and a colourless aqueous fluid, *liquor puris*, in which the corpuscles are suspended.

**PUS BONUM**, see Pus—p. Corpuscles, see Pus—p. Corrosivum, Sanies—p. Globules, see Pus—p. Laudabile, see Pus—p. *Louable*, see Pus—p. Malignum, Ichor—p. Malignum, Sanies—p. Nutritivum, see Pus—p. Verum, see Pus.

**PUSILLATUM**, *Pusillatum*, from *pusillus*, 'small.' A coarse powder.

**PUSILLUS**, Nanus.

**PUSTULA**, Pustule—p. Ardens, Eczema—p. Oris, Aphthæ.

**PUSTULÆ SICCÆ**, Lichen.

**PUSTULATIO**, *Pustulatio*; from *pustula*, 'a pustule.' The formation of pustules.

**PUSTULE**, *Pustula*, from *pūs*: *Ecpye'sis*, *Ecthy'ma*, *Beneth*, *Bubē*, *Epanas'tasia*. An elevation of the cuticle, from an inflamed base containing pus. Willan and Bateman reckon four varieties of pustules: *Phlyza'cium*, *Psydra'cium*, *Achor* and *Favus*. The variolous pustule is often called, by the French, *Grain*; by us, *Pock*.

**PUSTULE MALIGNÆ**, see Anthrax.

**PUSULATUM**, Pusillatum.

**PUTIUM**, Prepuce.

**PUTREDO**, Hospital Gangrene, Putrefaction.

**PUTREFACTIO**, *Putrefactio*, *Putrescentia*, *Sepsis*, *Saprotæ*, *Putrid fermentation*, *Putrefactive fermentation*, from *putris*, *putre*, 'rotten,' and *facere*, 'to make.' A decomposition, experienced by animal substances, when deprived of life and placed under particular substances. The presence of water is indispensable. The temperature most favourable to it, is from 60° to 90° of Fahrenheit. The most common products of putrefaction are water, carbonic acid, acetic acid, ammonia, carburetted hydrogen, and a semi-putrid substance, which is volatilized and has an infected odour. It has been supposed that something like putrefaction may occur in the living body, as in case of putrid fever. To this condition, Piorry has given the name *Typhohæ'mia*, conceiving it to be owing to alteration of the blood by putrid animal matters. *Putrefactio* signifies the state of becoming putrid:

whilst putridity, *Putredo*, *Putriditas*, (F.) *Pourriture*, is the state of rottenness.

**PUTRESCENT**, Hyposaprus—p. Poison, see Poison.

**PUTRESCENTIA**, Putrefaction—p. Uteri gravidi, Hystero-malacia.

**PUTRID**, *Putridus*, *Sapros*, (F.) *Putride*, from *putres*, 'to rot.' An epithet for some affections, in which the matters excreted and the transpiration itself exhale a smell of putridity. It is particularly applied to typhus.

**PUTRIDITAS**, see Putrefaction.

**PUTRIDITY**, see Putrefaction.

**PUTRILAGO**, *Putror*, (F.) *Putrilago*. Same etymon. The pultaceous matter or *slough*, which forms in certain gangrenous and other ulcers, and is thrown off.

**PUTROR**, Putrilago.

**PUTZSCHILL**, see Myroxylon Peruiferum.

**PYARTH'RUM**, from *πυρ*, 'pus,' and *αρθρον*, 'joint.' A suppurated joint.

**PYCNICMASTICA**, Incrassantia.

**PYCNOSIS**, Inspissatio.

**PYCNOTICA**, Incrassantia.

**PYEC'CHYSIS**; from *πυρ*, 'pus,' and *εκχυσις*, 'effusion.' An effusion of pus.

**PYELITIS**, from *πυελος*, 'pelvis,' and *itis*, denoting inflammation. Inflammation of the pelvis and calices of the kidney.

**PYELOMETER**, Pelvimeter.

**PYELONEPHRITIS**, from *πυελος*, 'pelvis,' *νεφρος*, 'kidney,' and *itis*, denoting inflammation. Inflammation of the kidney and of the pelvis and calices.

**PYELOS**, Pelvis.

**PYEMESIS**, Pyoemesis.

**PYESIS**, Suppuration.

**PYETIA**, Colostrum.

**PYGE**, Nates.

**PYGME**, Forearm.

**PYGODI'YMUS**, *Didymus symphyoperi-næus*, *Pygopages*; from *πυγη*, 'the nates,' and *διδυμος*, 'a twin.' A monstrosity, in which twins are united by the sacrum and coccyx.

**PYGOPAGES**, Pygodidymus.

**PYICUS**, Purulent.

**PYLE**, Porta.

**PYLEMPHRAXIS**, from *πυλη*, 'porta,' 'a gate,' and *μωραξις*, 'obstruction.' Obstruction of the vena portæ.

**PYLORIC**, *Pyloricus*. Same etymon as pylorus. That which relates to the pylorus. An epithet given to different parts.

**PYLORIC ARTERY**, *Artéria Coronaria dextra*, (F.) *Petite artère gastrique droite*, arises from the hepatic, and is distributed to the pylorus and to the lesser curvature of the stomach, anastomosing, particularly, with the A. coronaria ventriculi and A. gastro-epiploica dextra.

**PYLORIC VEIN** follows the same distribution as the artery.

**PYLORUS**, *Janitor*, *Portonarium*; from *πυλη*, 'a gate,' and *ωραξ*, 'a guardian;' *Ostium ventriculi duodenale* seu *pyloricum* seu *dextrum* seu *inferius*, *Orificium dextrum* seu *inferius* seu *Egræsus* seu *Ostium inferius* seu *Anulus* seu *Sphincter ventriculi*, *Ostia'rius*, *Hos-tia'rius*, (F.) *Pylors*. The lower or right orifice of the stomach—*Orificia intestinal*, (Ch.)—is called *Pylorus*, because it closes the entrance into the intestinal canal, and is furnished with a circular, flattened, fibro-mucous ring, which occasions the total closure of the stomach during

digestion in that organ. This ring has been called the *Valve of the Pylorus*, *Sphincter Pylori*, *Pylorus proprius sic dictus*, (F.) *Valvula du pyloris*. It is a fold of the mucous and muscular membranes of the stomach; and is the *Pyloric muscle* of some authors.

**PYOBLENNICUS**, Mucopurulent.

**PYOBLENNORRHŒA**; from *πυον*, 'pus,' and *ῥοια*, 'mucus,' and *γενω*, 'I flow.' A discharge of puriform mucus.

**PYOCENO'SIS**; from *πυον*, 'pus,' and *αεναωσις*, 'evacuation.' Evacuation of pus.

**PYOCHEZIA**, *Diarrhœa purulenta*; from *πυον*, 'pus,' and *χεω*, 'I go to stool.' Discharge of pus by stool. Purulent diarrhœa.

**PYOCŒLIA**, *Ascites purulenta*, from *πυον*, 'pus,' and *κοιλια*, 'the belly.' Pus in the abdominal cavity.

**PYOCYSTIS**, Vomica.

**PYODES**, Purulent.

**PYODEMA**; from *πυον*, 'pus,' and *οιδημα*, 'swelling.' Tumefaction of the surface owing to effusion of pus.

**PYŒMESIS**, *Pyemesis*, *Vomitus purulentus*; from *πυον*, 'pus,' and *μωσις*, 'the act of vomiting.' Vomiting of pus.

**PYOGENESIS**, Pyogenia.

**PYOGENIA**, *Pyogenia*, *Pyogenesis*, *Pyopoiesis*; from *πυον*, 'pus,' and *γενωσις*, 'generation.' Generation of pus. The theory or mechanism of the formation of pus. Some have believed that pus is formed by the arterial system, and is deposited, by way of excretion, in the inflamed parts; others, that it is formed by the destruction of solid parts. These opinions are, however, inadmissible; and pus is now regarded as mainly the product of a particular secretion in the diseased part.

**PYOGENIA CORROSIVA**, Ulceration—p. Simplex, Suppuration.

**PYOGENIC**, *Pyogenicus*; same etymon. Having relation to the formation of pus.

**PYOHŒMIA**, from *πυον*, 'pus,' and *αιμα*, 'blood.' Alteration of the blood by pus.

**PYOID GLOBULES**, see Pus.

**PYOMETRA**, *P. purulenta*, from *πυον*, 'pus,' and *μητρα*, 'womb.' A collection of pus in the uterus.

**PYOMETRA PURULENTA**, Pyometra.

**PYON**, Pus.

**PYONĒPHRITE**, see Nephritis.

**PYONOMA**, Pus.

**PYOŒTORRHŒA**, Otirrhœa.

**PYOPERICARDIA**, *Pyopericardium*, from *πυον*, 'pus,' *περι*, 'about,' and *καρδια*, 'the heart.' A collection of pus in the pericardium.

**PYOPHTHALMIA**, Hypopyon.

**PYOPLEURITE**, Empyema.

**PYOPŒSIS**, Pyogenia.

**PYOPTYSIS**, from *πυον*, 'pus,' and *πτωω*, 'I spit.' Spitting of pus.

**PYORRHAGIA**, from *πυον*, 'pus,' and *ραγη*, 'violent rupture.' A sudden discharge of a large collection of matter.

**PYORRHŒA**, from *πυον*, 'pus,' and *ρρω*, 'I flow.' A discharge of pus.

**ΠΥΟΡΡΗΓΓΑ ΑΛΒΙΝΑ**, Pyochezia—p. Aurium, Otirrhœa—p. Nasalis, Ozœna—p. Palpebræ, Blepharopyorrhœa—p. Urinalis, Pyuria—p. Viarum lacrymalium, Dacryopyorrhœa.

**PYOSIS**, Hypopyon, Pterygion, Suppuration—p. Pectoris, Empyema.

**PYOTHORAX VERUS**, Empyema.

**PYOTORRHŒE**, Otorrhœa.

**PYOTURIA**, Pyuria.

**PYR**, Fever.

**PYRA**, Anthrax—p. Crustumina, Crustumiatum—p. Crustumerina, Crustumiatum.

**PYRAMID**, *Pyramis*, *Eminentia pyramidalis tympani*, from *πυρ*, 'flame,' which has a conical appearance. (?) A small, bony projection in the cavity of the tympanum, which is excavated, to lodge the muscle of the stapes. Also, the *Centro-pin* of the trephine.

**PYRAMID**, see Calumba, and Vermiform processes—p. of Malacarne, Vermiform process, inferior.

**PYRAMIDAL DE L'ABDOMEN**, *Pyramidalis abdominis*—p. *de la Cuisse*, *Pyramidalis*—p. *du Nez*, *Pyramidalis nasi*—p. *Stapedien*, *Stapedium*.

**PYRAMIDALE**, (OS,) Cuneiform, (bone.)

**PYRAMIDALIS ABDOMINIS**, *Musculus Fallopii vel sucenturiatus vel auxiliarius*, (F.) *Pubio-ombilical*, *Pubio-sous-ombilical*, (Ch.) *Pyramidal de l'abdomen*. A small, fleshy pyramidal fasciculus, whose existence is not constant; and which is inserted, by its base, into the upper part of the pubis, and terminates, by its summit, at the inferior part of the linea alba. When it contracts it stretches the linea alba.

**PYRAMIDALIS**, *P. Femoris*, *Il'acus externus*, *Pyramidis*, *Piriformis*, *Primus et superior quadrigeminus*, (F.) *Sacro-trochanterian*, (Ch.) *Pyramidal de la cuisse*. A flat, triangular muscle, situate at the posterior part of the pelvis. By its base, it is attached to the anterior surface of the sacrum; to the corresponding surface of the great sacro-sciatic ligament and to the posterior part of the ilium. It terminates by a tendon, which is attached to the inner surface of the great trochanter. This muscle is a rotator of the thigh outwards, or of the pelvis in an opposite direction.

**PYRAMIDALIS FEMORIS**, *Pyramidalis*.

**PYRAMIDALIS NASI**, *Procerus nasi*, *Nasum dilatans*, (F.) *Fronto-nasal* (Ch.), *Pyramidal du nez*. A thin, triangular muscle, which has its summit upwards. Above, it is continuous with the occipito-frontalis. It descends vertically before the root of the nose, on which it terminates; becoming confounded with the transversalis. This muscle wrinkles the skin of the root of the nose transversely, and stretches that which covers the tip.

**PYRAMIDES ANTÉRIEURES**, *Corpora pyramidalia*—p. Ferreini, Ferrein, pyramids of—p. Malpighianæ, Papillæ of the kidney—p. *Postérieures du cerebret*, *Corpora restiformia*.

**PYRAMIDS, POSTERIOR**, *Corpora restiformia*—p. of Wistar, Sphenoidal cornua.

**PYRAMIS**, Penis, Pyramid—p. Cochleæ, Modiolus—p. Trigona, see Temporal bone.

**PYRCŒA**, Incendium.

**PYRECTICA**, 'febrile;' from *πυρετος*, 'fever.' Fevers: the first order in the class *Hæmatica* of Good.

**PYRENOIDES**, Odontoid.

**PYRĒTHRE**, *Anthemis pyrethrum*.

**PYRĒTHRUM**, *Anthemis pyrethrum*, *Urtica*—p. Parthenium, *Matricaria parthenium*—p. Sylvestre, *Achillea ptarmica*.

**PYRETICOSIS**; from *πυρ*, 'fire,' and *ωστος*, 'fever;' *Morbus febrilis*. A febrile affection.

PYRETICUS, Febrifuge.

PYRETOGRAPHIA; from πυρετος, 'fever,' and γραφη, 'a description.' A description of fever.

PYRETOL'OGY, *Pyretologia*; from πυρετος, 'fever,' and λογος, 'a discourse.' *Pyretology*. A treatise on fevers. A title sometimes given to a monograph on fever.

PYRETOS, Fever.

PYREX'IA, *Pyrexia*. Same etymon as the next. Fever. The febrile condition. Also, a paroxysm of fever—*Paroxysmus febrilis*.

PYREX'IAE, from πυρ, 'fire.' *Febrile diseases*. The first class of Cullen's Nosology.

PYRI MARTIALES, Ferrum tartarizatum.

PYRIA, Fomentation, Vaporarium.

PYRIATERIUM, Vaporarium.

PYRICAUSTUM, Burn.

PYRIFORMIS, Pyramidalis.

PYRIPH'LEGES, πυριφλεγης, from πυρ, 'fire,' and φλεγω, 'I burn.' One who has a burning fever.

PYRITES, IRON, Ferri sulphuretum.

PYRMONT, MINERAL WATERS OF.

A celebrated mineral spring, on the Weser, in Westphalia, four leagues from Hamelet. The waters are tonic, and contain chlorides of sodium and magnesium, sulphates of soda and magnesia, and carbonates of iron, lime, and magnesia dissolved in carbonic acid, with some resinous principles. It is a highly carbonated chalybeate.

ARTIFIC'IAL PYRMONT WATER may be formed of *Epsom salt*, gr. xv, *Common salt*, gr. v, *Magnesia*, gr. x, *Iron filings*, gr. v, *Water*, Oijj. Impregnated with the gas from *Marble powder* and *Sulphuric acid*, ãã zviij.

PYRCENUS, Spiritus rectificatus.

PYR'OLA, *P. rotundifolia*, *Round-leaved wintergreen*. Order, *Pyrolaceæ*. This plant was once used as a gentle astringent and tonic.

PYR'OLA MACULA'TA, *Spotted Pipsissewa*, *Whitelaf*, *White Pipsissewa*, *King cure*, *Ground holly*, *Rheumatism weed*, &c., has similar properties.

PYR'OLA UMBELLA'TA, *Chimaphila vel Chimaphila umbellata*, *C. Corymbosa*, *Ground-holly*, *Pipsissewa*, *Wintergreen*, *Rheumatism weed*, *Herbe a pisser* (Canada). This common American plant is allied to the *uva ursi*, in botanical as well as medical qualities. It is tonic and diuretic. The bruised leaves irritate the skin. From the decoction or infusion an agreeable beverage may be formed by adding sugar, ginger to flavour it, and yeast to produce fermentation. Under the name *Pipsissewa* Bear it has been used in scrofulous affections.

PYROLEUM OSSIUM RECTIFICATUM, *Oleum animale Dippelii*.

PYROLIG'NEOUS ACID, *Ac'idum Pyroaceticum*, *A. Ligni pyro-oleosum*, *A. Aceticum empyreumaticum*, *A. Lignumum*, *Pyrolignic Acid*, (F.) *Acide Pyroligneuse*, *Vinaigre de bois*. An acid, obtained by distillation, from wood, coal, &c., which was once believed to be of a peculiar character. It is now known to be formed of acetic acid and an empyreumatic oil, from which it may be freed; and, in this state, is sold in commerce for *Acetum destillatum*. It is used for similar purposes as distilled vinegar, and for preserving animal substances. It has also been used as an antiseptic in gangrene and sphacelus, and to foul ulcers; wherever in-

deed creasote is indicated.—The dose of the impure pyroigneous acid internally is from 5 to 30 drops, three or four times a day.

PYROMA'NIA; from πυρ, 'fire,' and mania. Insanity, with an irresistible desire to destroy by fire.

PYROPH'AGUS, *Ignivorus*, from πυρ, 'fire,' and φρω, 'I eat.' One who eats fire. A juggler, who eats bodies in a state of ignition.

PYROS, Triticum.

PYROS'IS, from πυρ, 'fire,' 'the act of burning.' *Ptyalismus pyrosicus*, *Lemo'sis cardialis sputatoria*, *Ardor stomachi*, *A. Ventriculi*, *Cardialis sputatoria*, *Pyrosis Suecica*, *Apoceno'sis vomitus pyrosis*, *Dyspepsia pyrosis*, *Crismoreg'mia*, *Ebullit'io stomachi*, *Oraz'is* (of some), *Waterbrash*, *Waterqualm*, *Blackwater*, (F.) *Ardour de l'Estomac*, *Fer chaud*, *Cremason*, *Soda*, *Gorgoeset*. This affection consists of a hot sensation in the stomach, with eructations of an acrid, burning liquid, that causes a distressing sensation in the parts over which it passes. Attention to diet, and the use of bitter absorbents, will usually relieve, when the disease is functional. Occasionally, it is symptomatic of organic disease of the stomach.

Pyrosis also signified, of old, inflammation, gangrene, and a burn.

PYROSIS SUERICCA, Pyrosis.

PYROSOPHIA, Chymistry.

PYROTECHNIA, Chymistry.

PYROTECH'NY, *Pyrotechnie*, from πυρ, 'fire,' and τεχνη, 'art.' Art of making fireworks, &c. Also, chymistry. M. Percy has used the term *Pyrotechnie Chirurgicale* for the art of applying fire or the actual cautery in surgery.

PYROTHONIDE; from πυρ, 'fire,' and οβον, 'linen.' *Liquor pyro-oleosus e lin'teo para'tus*. A kind of pyrogenous or empyreumatic oil produced by the combustion of textures of hemp, linen, or cotton in a copper vessel. The brown product is acid. Its medical properties probably resemble those of creasote. Diluted with three or four times its weight of water, it has been used as a gargle in cyanache tonsillaris, but it is not now employed.

It is said, also, to be a popular remedy for tooth ache and skin diseases. When prepared from rags, it is called *rag oil*; when from paper, *paper oil*.

PYROTICUS, Caustic.

PYRUS CYDONIA. The *Quince Tree*, (F.) *Coignassier*. Family, *Rosacæ*. *Sez. Syst.* *Icosandria Pentagynia*. The fruit is termed *Cydonium Malum*, *Malum Canum*, *Malum coto'neum*, *Malum cydo'neum*, *Quince*, (F.) *Coign*. Quince seeds are sometimes used in decoction as a demulcent. The fruit makes a pleasant preserve.

PYRUS MALUS, *Malæa*. The *Apple Tree*, (F.) *Pommier*. Apples are an agreeable fruit when ripe. When unripe, they disagree, especially with those of weak digestive powers. The same may be said of the *pear*: the fruit of the *Pyrus commun'is*, *Aples*, *P. Sorbus*, *P. Sax'va*, (F.) *Poirier*.—Apple, (F.) *Pomme*.—Pear, (F.) *Poire*.

*Apple Brandy* is a spirituous liquor obtained from the juice of the apple, and much used in the United States.

PYTIA, Colostrum.

PYTISMA, Sputum, Sperm.

PYUL'CON, from πυρ, 'pus,' and 'κων, 'I

extract' (F.) *Tyre-pus*. A surgical instrument for extracting pus from any cavity. Many pyulca have been employed, all of which act as exhausting syringes.

PYURIA, *Pyuria*, *Pyorrhœa urinæ*, from *πυρ*, 'pus,' and *ουρον*, 'urine.' Discharge of purulent urine: a symptom which occurs in many diseases; particularly in cases of renal calculi, and in organic affections of the bladder.

It receives various epithets, according to the part whence the pus proceeds:—as *Pyuria urethralis*, *P. renal*, and *P. vesicalis*.

PYURIA CHYLOSA, Chyluria.—p. Lactea, Chyluria.—p. Mucosa, Cystirrhœa.—p. Serosa, Cystirrhœa.—p. Viscida, Cystirrhœa.

PYXIS, *πυξίς*. A box; a pill-box. Also an emollient ointment.—*Ætius* and *Paulus*.

PYXIS, *Βοξίς*, see Cotylod.

## Q.

Q. see Abbreviation.

QUABEBE, Piper cubeba.

QUACK, Charlatan.

QUADRANS, *Quarta pars libræ*. A quarter of a pound. Three ounces (Troy.)

QUADRANTAL, Amphora.

QUADRATUS, Depressor labii inferioris—q. Dorsi, Q. lumborum.

QUADRATUS FEMORIS, *Quadratus*, from *quadra*, 'a square;' *Quartus quadrigem'inus quadratus*, (Ch.) *Tuber-Ischio-trochanterien*, *Ischio-sous-trochanterien*, (F.) *Carré de la Cuisse*. A muscle situate at the posterior and upper part of the thigh. It is thin, flat, and quadrilateral, and is attached to the outer part of the tuberosity of the ischium; whence it proceeds transversely to the inferior part of the posterior margin of the great trochanter. It rotates the limb, turning the toe outwards.

QUADRATUS GENÆ, *Platysma myoides*—q. Radium, Pronator radii quadratus.

QUADRATUS LUMBORUM, *Quadratus seu Lumbaris externus; Flactens par lumborum, Quadratus dorsi*, (F.) *Ilio-costal* (Ch.) *Ilio-lumbi-costal*, *Carré des lombes*. A flat, somewhat thick, irregularly quadrilateral muscle, situate in the loins, at the sides of the vertebral column. It is attached, below, to the crista ilii and ilio-lumbar ligament; and above, to the inferior margin of the last rib; and besides, to the base of the transverse processes of the last four lumbar vertebrae. This muscle inclines the loins to its side; depresses the last rib, and is thus a muscle of respiration. It can also raise the hip.

QUADRIGEMINA TUBER'CUA, *Eminentia Quadrigem'ina, Optic Lobes, Optic Ganglia, Pons Sylvii, Corpora quadrigem'ina, Nates et Testes, Corpora bigem'ina*, (F.) *Tubercles quadrjumeaux, Eminences bigem'ines*. Four medullary tubercles, situate at the posterior surface of the tuber annulare. They are white, externally; gray, internally; oblong; rounded; connected by pairs, and separated by two grooves, which divide them crucially. Of these tubercles—the superior, called *nates*, *Tuber'cula anteriora*, *Glu'tia*, are larger and more prominent than the lower, called *testes*, *Tuber'cula posteriora*. The pineal gland corresponds exactly to the point of intersection of the two furrows that separate them.

QUADRIGEMINUS PRIMUS ET SUPERIOR, *Pyramidalis*—q. *Quadratus quartus, Quadratus femoris*—q. *Secundus et tertius, Ischio-trochanterianus*.

QUAHUIL, Cacao.

QUAIL, *Tetrao coturnix*.

QUANDROS. Ancient name for a precious stone, believed to exist in the brain of the vulture; and to which was attributed the property of augmenting the secretion of milk, and preserving from deadly accidents. No such stone exists.

QUARANTINE, from (L.) *Quaranti'na*; itself from *quaranta*, 'forty.' (F.) *Quarantaine*. The time during which travellers, returning from a country where the plague or any other pestilential disease exists, are compelled to remain on board ship or in a lazaretto. They, as well as the ship, are said 'to perform quarantine.' Quarantine is sometimes extended beyond forty days, whilst its duration is frequently much less. It is sometimes enforced by land; for example, when contagious diseases require the establishment of *cordons sanitaires*, and when persons are desirous of leaving infected districts. During quarantine, no communication is allowed between the travellers and the inhabitants of the country. Quarantine is a great impediment to commerce; and is, doubtless, very frequently enforced when there is but little danger of contagion. The evils, however, that might arise from the introduction of a widely-spreading contagious disease, are so disastrous, as to induce legislators to maintain these laws in perhaps an unnecessary degree of rigour.

QUARTAN, 'of or belonging to the fourth.' *Quarta'na Febris, An'tus Quartanus, Tetartæus, Quartan Ague*, (F.) *Quarte*. An intermittent, the paroxysms of which recur every 4th day, leaving between them two days' interval. We speak also of the *Quartan Type*. A *Double Quartan* is one in which one paroxysm occurs on the third and another on the second day, so that there is only one day of apyrexia and two of paroxysms in succession;—the paroxysms of every 4th day resembling each other. A *Triple Quartan* is one in which there is a paroxysm every day; and on every three days the paroxysms correspond. A *redoub'ling or repeat'ing quartan*, (F.) *Fidère quarte doublée*, is one in which there are two paroxysms every 4th day. See Intermittent.

QUARTANUS REMITTENS, *Tetartophia*.

QUARTARIUS. An ancient measure, equal to one-fourth of the sextarius. See Weights and Measures.

QUARTE, Quartan.

QUARTIO, Astragalus.

QUARTI-STERNAL, *Quadrister'nal*, The fourth osseous portion of the sternum, corresponding to the fourth intercostal space.—*Béclard*.

QUASSATIO, Conquassation.

QUASSATURA, Conquassation.

QUASSIA, *Quassia amara*, *Quassy*, *Quassia excol'sa*, *Picra'na excol'sa*, *Febrifugum lignum*, *Lofly Bitterwood Tree*, *Bitter-ash*, (F.) *Quassia*. A West India tree, from which is obtained the *Lignum Quassiae*, *Quassia*, (Ph. U. S.) It is an intensely durable bitter, without astringency, and has been employed as a tonic and stomachic. It is generally given in the form of infusion. The bitter principle is called *Quassin*.

QUASSIA SIMAROU'BA, *Simarouba*, *Simaruba*, *S. officinalis*, *Euonymus*, *Bitter Simaruba*, *Mountain Damson*. The bark of the *Simarouba* is bitter, and not unpleasant. Both water and alcohol extract its virtues. It is not astringent. It is exhibited wherever a simple tonic is required.

QUASSIN, see *Quassia*.

QUATERNIO, *Astragalus*.

QUATRE ÉPICES, see *Myrtus pimenta*.

QUATRIO, *Astragalus*.

QUEEN'S DELIGHT, *Stillingia*—q. of the Meadows, *Spiraea ulmaria*—q. Root, *Stillingia*.

QUERCULA MINOR, *Teucrium chamaedrys*.

QUERCUS ALBA, the *White Oak*; *Quercus Robur*, the *Common Oak*; *Q. Tinctoria*, the *Black Oak*; *Q. rubra Montana*, the *Red Oak* or *Spanish Oak*; *Family*, *Amentaceae*; *Sax. Syst.* *Monœcia Polyandria*; (F.) *Chêne*. The bark of all these varieties is, probably, alike in medicinal properties. It is powerfully astringent and tonic, and has been used internally in intermittents, and externally in decoction, as an astringent wash, where such is indicated.

*Acorns*, *Cecæ*, *Nuces Quercus*, (F.) *Glands*, were at one time much used as food; and a decoction of them was once recommended in dysentery and diarrhœa, in glandular obstructions, &c. A pessary made of them has been advised in immoderate flow of the menses. They are not now used.

QUERCUS INFECTORIA. A tree of Asia Minor, which affords *Turkey Galls*, *Nut Galls*, *Galla Turcica*, *G. Quercina*, *G. Tinctoria*, *Nux Galla*, *Galla maxima orbiculata*, *Cicis*, *Cassenoles*, *Galls*, *Gall-nut*, (F.) *Noix de Galle*. The *nut-gall*—*Galla* (Ph. U. S.) is a morbid protuberance or tubercle, produced by the puncture of the *Diplolepis Galla Tinctoria*, or *Cynips Quercus folii*. It is powerfully astringent and tonic, and has been employed in diarrhœa, intestinal hemorrhage, and intermittents: but is chiefly used, externally, in gargles and injections. The powder, made into an ointment with lard, is used in piles.

QUERCUS COCCIFERA, see *Kermes*—q. *Marina*, *Fucus vesiculosus*—q. *Suber*, see *Suber*.

QUEUE DE CHEVAL, *Cauda equina*, see *Medulla spinalis*—q. *de la Moëlle épinière*, *Cauda equina*—q. *de Pourouan*, *Pucedanum*.

QUICK-IN-THE-HAND, *Impatiens*.

QUICKEN TREE, *Sorbus acuparia*.

QUICKENING, from *Sax. epican*, 'to make alive.' The period of gestation when the motion of the fœtus first becomes perceptible. This usually occurs about the eighteenth week, and was at one time erroneously believed to mark the time at which the fœtus becomes alive—*Animatio fatus*. It need scarcely be said, that it possesses the principle of life from the

moment of the union of the materials furnished by the sexes at a fecundating copulation. When the motion is felt, the female is said to be 'quick with child.'

QUICKENS, *Triticum repens*.

QUICKLIME, *Calx viva*.

QUICKSILVER, *Hydrargyrum*.

QUIES, *Acinesia*.

QUINA, *Quina*—q. *Quina*, *Cinchona*.

QUINÆ ACETAS SULPHAS, &c., see *Quina*.

QUINCE, see *Pyrus cydonia*—q. *Tree*, *Pyrus cydonia*.

QUINIA, *Quina*—q. *Acetate of Quinine*, *acetate of*—q. *Amorphous*, see *Quina*, *extract of*.

QUINIA, EXTRACT OF, *Quinina sulphas impurus*. A preparation which consists in evaporating the liquor poured off the crystals of sulphate of quinia, to the consistency of a pilular mass.

It has the properties of sulphate of quinia, and its active principle appears to be *amorphous quinia*.

QUINIA, IMPURE SULPHATE OF, *Extract of Quinia*—q. *Iodide of*, see *Iodine*—q. and *Mercury*, *Protochloride of*, *Hydrargyri et Quiniae*, *Protochloridum*—q. *Sulphate of*, *Quinine*, *sulphate of*.

For other salts of Quinia, see *Quinine*, *acetate of*.

QUININÆ ACETAS, SULPHAS, &c., see *Quinine*.

QUININE, *Quinia*, *Quina*, *Kininum*, *Chininum*, *Quinina*. An alkaline, uncrystallizable substance; under the form of a porous, whitish mass; almost insoluble in water, soluble in alcohol and ether. It forms, with acids, salts that are in general soluble. It is obtained from different cinchonas, but chiefly from the yellow, and is the active principle of those valuable drugs.

QUININE OF QUINIA, SULPHATE OF, *Quinæ Sulphas*, *Quininæ Sulphas*, *Quina Disulphas*, *Quina Sulphas*, *Chininum seu Chininum Sulphuricum*, (F.) *Sulfate de Quinine*—the salt usually employed in medicine—occurs in needles of a pearly and satiny appearance. It is employed with great success in the treatment of intermittents; and is available in many cases, where the bark in substance could not be retained, or would be injurious. Dose, from 3 to 10 grains in the 24 hours. It is obtained, by treating the yellow bark with sulphuric acid. The following form is adopted in the Pharmacopœia of the United States, (1842)—*Cinchon. Nav.* in pulv. crass. ℥iv; *Acid. muriat.* f. ʒiij; *Calcis*, in pulv. ʒv; *Aqua*, cong. v; *Acid. Sulphur.*, *Alcohol*; *Carbon. animal.* ʒā q. s. Boil the bark in one-third of the water mixed with one-third of the muriatic acid, and strain through linen. Boil the residue twice successively with the same quantity of acid and water as before, and strain. Mix the decoctions, and, while the liquor is hot, gradually add the lime, previously mixed with two pints of water, stirring constantly, until the quinia is completely precipitated. Wash the precipitate with distilled water, and having pressed and dried it, digest it in boiling alcohol. Pour off the liquor and repeat the digestion several times, until the alcohol is no longer rendered bitter. Mix the liquors, and distil off the alcohol, until a brown

**RACHIPHYMA** or *Rhachiphy'ma*, *Rachio-pHYMA*, *Tumor Dorsi*, from  $\rho\alpha\chi\upsilon\varsigma$ , 'the spine,' and  $\phi\upsilon\mu\alpha$ , 'a tumour.' A tumour on the spine or on the back.

**RACHIS**, Vertebral column.

**RACHISAGRA**, *Rhachisagra*, *Rhach'isagra*, *Rhach'isagra*, *Rhach'idagra*, *Rhach'itis spina-lis*, from  $\rho\alpha\chi\upsilon\varsigma$ , 'the spine,' and  $\alpha\gamma\gamma\alpha$ , 'a seizure.' A gouty or rheumatic affection of the spine.

**RACHITÆ**, *Rhachitæ*.

**RACHITIS**, *Rhach'itis*, from  $\rho\alpha\chi\upsilon\varsigma$ , 'the spine,' and *itis*, a suffix denoting inflammation. Inflammation of the spine. Also, *Cyrto'sis Ra'chis*, *Cyrton'orus*, *Morbus Ang'licus*, *Osteomalacia Infantum*, *Tabes pectoris*; *Innutritio ossium*, *Spina nodo'sa*, *Rachitis mus*, the *English disease*, *Rickets*; from  $\rho\alpha\chi\upsilon\varsigma$ , 'the spine.' (F.) *Rachitisme*, *Nouveau*. A disease characterized by crookedness of the long bones; swelling of their extremities; crooked spine; prominent abdomen; large head; and often precocity of intellect. It is accompanied by leanness, general debility, indigestion; and frequently induces atrophy and hectic. Rickets occurs, particularly, during the first years of existence, in weakly children, born of rickety or scrofulous parents; brought up in damp or confined situations; who are badly nourished, and do not take sufficient exercise. The progress and termination of the disease are very variable. Some children gradually recover their health: others become more and more deformed, and ultimately die of consumption, dropsy, or other organic disease. The treatment is almost wholly *hygienic*. Pure air; a healthy situation; nourishing diet; exercise; sea or common cold bathing, and tonics, afford the best prospect of success.

**RACHITIS ADULTORUM**, *Mollities ossium*.

**RACHITISME**, *Rachitis*.

**RACHOSIS**, *Rhachosis*, *Rachosis*, from  $\rho\alpha\chi\upsilon\varsigma$ , or  $\rho\alpha\chi\omega\varsigma$ , 'I wrinkle.' A relaxation of the scrotum. *Propto'ma seu laxitas Scroti*, *Scrotum pendulum*. An excoriation of the relaxed scrotum.—Dictionaries.

**RACINE À BECQUET**, *Geranium moschatum*—*r. de Bengal*, *Cassumuniar*—*r. de Charois*, *Dorstenia contrayerva*—*r. de Dracæ*, *Dorstenia contrayerva*—*r. des Philippines*, *Dorstenia contrayerva*—*r. de Safran*, *Curcuma longa*—*r. de Saint Esprit*, *Angelica*—*r. Salivaire*, *Anthemis pyrethrum*—*r. de Turbeth*, *Convolvulus turpe-thum*.

**RACINES DU CERVELET**, *Corpora testiformia*.

**RACLURES DES BOYAUX**, *Ramenta intestinorum*.

**RACORNISSEMENT** (F.), from *se racornir*, 'to shrivel in the fire as leather does.' *Cor'nification*. A physical property, possessed by animal substances, which consists in a kind of contractility, accompanied with sudden corrugation and curling. It is produced by heat, and by chemical agents, especially by the strong mineral acids.

**RADCLIFFE'S ELIXIR**, see *Tinctura aloes composita*.

**RADESYGE**, *Radzyge*.

**RADEZYGE**, *Radzyge*.

**RA'DIAL**, *Radialis*, from *radius*, a bone of the forearm. That which relates to the radius.

**RADIAL ANTÉRIEUR**, *Palmaris magnus*.

**RADIAL ARTERY**, *A. extern'a Cu'biti*. It arises, from the brachial, at the upper and anterior part of the forearm; descends on the outer side as far as the lower part of the radius, and proceeds downwards and backwards towards the superior extremity of the space which separates the first two metacarpal bones. It then buries itself in the palm of the hand, where it forms the *profound* or *radial* palmar arch. The radial artery gives off the *recurrent radial*, several *radio-muscular* branches, the *transverse palmar radio-carpal artery*, the *external superficial artery of the palm of the hand*, the *external dorsal of the thumb*, the *dorsalis carpi*, *dorsal interosseous artery of the index*, &c.

**RADIAL EXTERNE PREMIER**, see *Radialis*—*r. Externe secunda*, see *Radialis*—*r. Grand*, see *Radialis*.

**RADIAL NERVE**, *Radio-digital* (Ch.), *Spiral Nerve*, *Spiral muscular N.*, *Musculo-spiral nerve*, arises from the four inferior branches of the brachial plexus. It is, at first, situate behind the other nerves of the plexus. It then becomes engaged between the three portions of the triceps brachialis, passes behind the humerus, and descends between the supinator longus and brachialis internus, as far as opposite the upper extremity of the radius. In its course it gives numerous filaments to the triceps, supinator longus, extensor carpi radialis longior, and to the integuments. Opposite the upper extremity of the radius it divides into two branches;—the one *posterior*, which turns backwards into the substance of the supinator brevis, and when it has reached the space between the two layers of muscles on the posterior surface of the forearm, divides into a great number of filaments, which are distributed to those muscles, and to the integuments of the hand. The other branch is *anterior*: it descends before the supinator brevis and the radius; until, near the inferior third of that bone, it engages itself between the tendons of the supinator longus and extensor carpi radialis longior; and, becoming afterwards subcutaneous, divides into two branches, whose filaments are distributed to the integuments of the thumb, index, middle finger, to the outside of the ring finger, and to the first interosseous muscle of the back of the hand.

**RADIAL PETIT**, see *Radialis*.

**RADIAL VEINS**, *DEEP-SEATED*, follow the same course as the radial artery.

**RADIALIS EXTERNUS BREVIOR**, *Extensor Carpi Radialis Bre'vior*, *Radialis secundus*, (F.) *Second radial externe*, *Petit radial*, *Épicondyl'o-sus-métacarpien*, (Ch.) An extensor muscle of the wrist, situate beneath the extensor carpi radialis longior. It is attached, above, to the external tuberosity of the humerus, and terminates below, by a long tendon, inserted into the posterior part of the upper extremity of the third bone of the metacarpus. It has the same uses as the next muscle.

**RADIALIS EXTERNUS LONGIOR**, *Extensor Carpi Radialis Lon'gior*, *Radialis externus primus*, (F.) *Premier radial externe*, *Grand radial*, *Huméro sus-métacarpion*, (Ch.) It is seated at the outer part of the forearm; is thin, but thicker on the outside than on the inside. It is attached, above, to the inferior part of the outer edge, and to the corresponding tuberosity of the humerus; and terminates, below, by a long tendon, which is attached to the superior ex-

trinity of the second bone of the metacarpus. It extends the hand on the forearm.

**RADIALIS EXTERNUS BREVIOR**, see *Radialis*—*r. Externus primus*, see *Radialis*—*r. Extensor longior*, see *Radialis*—*r. Internus*, *Palmaris magnus*—*r. Secundus*, see *Radialis*.

**RADIATED**, *Radia'tus*, from *radius*, 'a ray;' (F.) *Rayonné*. That which is arranged in rays; in lines, diverging from a common centre. An epithet given to several ligaments, &c., as to those which unite the ribs to the sternum; those which unite the tibia and fibula at their inferior extremity, &c.

**RADICAL**, *Radica'lis*, from *radix*, 'a root.' A radical cure, *cura radica'lis*, is one in which the disease is destroyed, as it were, from the root. It is used in opposition to *palliative cure*.

**RADICAL MOISTURE**, *Humidum radicale*.

**RADICAL VESSELS**, *Vas'cular Rad'icles*, (F.) *Radicules vasculaires*, are the small vessels that take their origin in the tissues, and by their union form larger vessels.

**RADICES OSSIS HYOIDEI**, *Cornua ossis hyoidei*.

**RADICES'CA**, from *radix*, *radicis*, 'a root,' and *secare*, 'to cut.' One employed in collecting and preparing plants was formerly so called.

**RADICULA**, *Raphanus hortensis*.

**RADICULES VASCULAIRES**, *Radical vessels*.

**RADII CILIARES**, *Ciliary processes*.

**RADII FRONTIS**. The folds or wrinkles of the forehead.

**RADIO-CARPAL**, *Radio-carpia'nus*. That which relates to the radius and carpus.

**RADIO-CARPAL ARTICULATION** is the *wrist joint*, or articulation of the os scaphoides, os semilunare, and os cuneiforme of the carpus with the inferior surface of the radius, and the fibro-cartilage, situate below the ulna. It is strengthened by lateral, anterior, and posterior ligaments.

**RADIO-CARPAL TRANSVERSE PALMAR ARTERY**, (F.) *Artère Radio-carpienne-transversale-palmaire*. A transverse branch, given off by the radial artery, opposite the lower edge of the pronator quadratus, which sends several branches to the anterior or palmar surface of the carpus.

**RADIO-CUTANÉ (NERF)**, see *Cutaneous*—*r. Phalangettien du pouce*, *Flexor longus pollicis manus*.

**RADIOLUS**, *Sound*.

**RADIO-MUSCULAR**, *Radio-muscula'ris*. A name given to the branches sent off from the radial artery to the muscles of the forearm in the first part of its course; as well as to the nervous filaments which the radial nerve sends to the same muscles.

**RADIS**, *Raphanus hortensis*.

**RADISH**, *Raphanus hortensis*—*r. Water*, *Nasturtium amphibium*.

**RADIUS**, 'a spoke;'—so called from its shape. *Cercis*, *Foe'ilè minus seu superius*, *Canna minor*, *Os ad cubitalè*, *Additamentum ulnae*, *Manu' brium manus*, *Parap'chyon*, *Arun'do bra'chii minor*, (F.) *Os du Rayon*. A long, prismatic bone, the upper and lesser extremity of which is called the *head*. This is supported by a *cervix* or *neck*. At the part where the neck is confounded with the *body* of the bone is the *tubercle* or *bicipital tuberosity* or eminence for the insertion of the biceps. The radius is

articulated, above, with the os humeri and with the lesser sigmoid cavity of the ulna: below, with the scaphoides, semilunare, and the head of the ulna. Its inferior extremity, which is larger than the superior, is flattened before and behind: is irregularly quadrilateral; and has, below, a double facette to be articulated with the first two bones of the carpus. On the outer side is the styloid process; and, on the inner, a concave facette, which joins the ulna. Behind, are grooves for the passage of the extensor tendons. The radius is developed from three points of ossification; one for the body, and one for each extremity.

**RADIUS, COL DU**, *Collum radii*.

**RADIX**, *Rhiza*. A root: also, the male organ.

*Radix*, *Root* or *fang* of a tooth is the part contained in the alveolus. The *radix* or *root* of the nail is the portion hidden under the skin, &c. Surgeons give the name to the prolongations, sent by scirrhus, cancerous, or other tumours into the neighbouring parts.

*Five Aperient Roots*, *Quinque radi'ces aperient'es*, were, of old,—asparagus, butchers' broom, fennel, parsley, and smallage.

*Five Lesser Aperient Roots*, *Quinque Radi'ces aperient'es mino'res*,—were caper, dandelion, eryngo, madder, and rest-harrow.

**RADIX BRAZILIENSIS**, *Ipecacuanha*.

**RADIX CORDIS**, *Basis Cordis*. The base of the heart.

**RADIX INDICA LOPEZIANA**, *Lopez radix*—*r. Linguis*, see *Tongue*—*r. Lopeziana*, *Lopez radix*—*r. Ninsi*, *Sium ninsi*—*r. Rubra*, *Rubia*—*r. Serpantum*, see *Ophiorrhiza mungos*—*r. Unguis*, *Nail*, root of—*r. Ventris*, *Umbilicus*.

**RADULA**, *Raspatorium*.

**RADZYGE**, *Radzygin*, *Radesyge*, *Radzygt*. *Thæ'ria*, properly *Theria*, from *θηρία*, ('*θηρία*'), 'a malignant ulcer.' *Lepra borealis seu Norvegica*, *Norwegian Leprosy*. A name given, in Norway, to a disease, bearing considerable analogy to the yaws. Some have esteemed it a species of lepra or elephantiasis.

Another form—the *Spedalske*, or *Spedalsk-hed*—of Norway, appears to be a variety of elephantiasis Græcorum.

**RAGE**, *Ira*, *Furor brevis*, *Orgè*, *Thymos*, (F.) *Colère*. Violent passion, characterized by contraction of the muscles of the face, violence in every movement, extreme irritation of the nervous system, acceleration of the blood's motion, and redness and swelling of the face.

**RAGE**, *Rhage*.

**RAGE**, *Hydrophobia*.

**RAGWEED**, *Ambrosia elatior*.

**RAGWORT**, *Senecio Jacobæa*.

**RAIDEUR CADAV'RIQUE**, *Rigor mortis*.

**RAIFORT**, *Raphanus hortensis*—*r. Sawage*, *Cochlearia armoracia*.

**RAINBOW-WORM**, *Herpes iris*.

**RAINURE**, *Groove*—*r. Digastrique*, *Mastoid groove*.

**RAISIN**, see *Vitis vinifera*—*r. d'Amérique*, *Phytolacca decandra*—*r. de Bois*, *Vaccinium myrtillus*—*r. d'Ours*, *Arbutus uva ursi*—*r. de Renard*, *Paris*.

**RAISINIERE** (F.) A name given to a small granular, brownish or blackish tumour, which forms occasionally at the surface of the cornea, in consequence of ulcers or accidental wounds of that membrane:—*Nysten*.

**RAISINS**, *Uva passa*, see *Vitis vinifera*—*r. de Corinthe*, see *Vitis Corinthiaca*.

**RAISON**, Reason.

**RAKASIRA**. An American balsam; of a brownish or brownish-red colour; semi-transparent; brittle; softening and becoming tenacious by heat; inodorous when cold, but exhaling a very agreeable smell when heated; and possessing a balsamic and slightly bitter taste. The precise vegetable that furnishes it is not known. It has been used chiefly as a balsam in gonorrhœa and urinary affections.

**RAKIA**, see Spirit.

**RAKOSIS**, Rachosis.

**RALE**, Rattle—*r. Bronchicus sec*, see Rattle—*r. Bronchicus humide*, see Rattle—*r. Caverno-æz*, Gurgling—*r. Crépitant*, see Crepitation, and Rattle—*r. Mugueux*, see Rattle—*r. Ronflant*, see Rattle—*r. Sibilant*, see Rattle—*r. Sonore*, see Rattle—*r. Sous-crépitant*, see Rattle.

**RAMEAU**, Ramus.

**RAMENTA INTESTINORUM**, (F.) *Raclores des Boyaux*. The shreds or scrapings, as it were, of the mucous membrane of the bowels, often discharged in malignant dysentery. The evacuation in which these are contained has been termed *Drachonema xymaloïdes*.

**RAMENTUM**, Fragment, Scob.

**RAMEX**, Hernia—*r. Varicosus*, Varicocele.

**RAMIFICATION**, *Ramificatio*, from *ramus*, 'a branch,' and *fo*, 'to become.' A division of arteries, veins, or nerves into branches. Also, a branch itself.

**RAMILLE**, Ramusculus.

**RAMOLLISSEMENT**, Mollities—*r. du Cerveau*, Mollities cerebri—*r. du Cœur*, Cardiomalacia—*r. de l'Estomac*, Gastromalacia—*r. du Foie*, Hepatomalacia—*r. Gris*, see Hepatization—*r. de la Moëlle épinière*, Mollities medullæ spinalis—*r. Rouge*, see Hepatization—*r. de l'Intestin*, Entero-malacia—*r. des Os*, Mollities ossium.

**RAMPANT**, (F.) *rampier*, 'to climb.' *Ropans*, *Reptans*. That which creeps or drags on the earth. The French *Bandage rampant* has the folds arranged spirally around the part, leaving intervals between them. It is a retentive bandage, but is easily displaced, and, therefore, not employed.

**RAMPES DU LIMAÇON**, *Scala* of the cochlea.

**RAMPHOS**, Rostrum.

**RAMULUS**, Ramusculus.

**RAMUNCULUS**, Ramusculus.

**RAMUS**, *Cladus*, a branch, (F.) *Rameau*. A division of an artery, vein, or nerve. Also, the male organ.

**RAMUS DURNOR SEPTIMÆ CONJUGATIONIS**, Facial nerve.

**RAMUSCULUS**, *Ram'ulus*, *Ramusculus*, *Surculus*, *Cladix'cos*, diminutive of *ramus*. A division of a ramus. (F.) *Ramuscule*, *Ramille*.

**RANA ESCULENTA**, (F.) *Grenouille*. This frog and the bull frog, *Rana Taurina*—are eaten as a delicacy. They are nutritious and easily digested.

**RANA**, Ranula.

**RANCE**, Rancid.

**RANCID**, *Ran'cidus*, *Sapros*, (F.) *Ranco*, from *rancere*, 'to be stale.' An epithet given to fatty bodies, which have become acrid from age or the contact of air. Mild ointments may, thus, become very irritating, and unfit for the

purposes for which they were originally intended.

**RANINE**, *Rani'na*; from *Rana*, 'a frog.' The termination of the lingual artery is so called; that is, the portion of the artery which advances horizontally between the genio-glossus and lingualis muscles as far as the point of the tongue. The ranine vein follows the same course as the artery, and opens into the internal jugular or into the superior thyroid.

**RAN-ULA**, from *Rana*, 'a frog,' so called from its resemblance; *Dysph'gia Ranula*, *Emphrag'ma salivare*, *Frog Tongue*, *Ba'trachos*, *Batr'achium*, *Hydroglos'sa*, *Hypoglossis*, *Hypoglossum*, *Hypoglot'tis*, *Hypoglos'sium*, *Rana*, (F.) *Grenouillette*. A small, soft, fluctuating and semi-transparent tumour, which forms under the tongue, owing to the accumulation of saliva in Wharton's duct. In order to give exit to the accumulated fluid, and to establish a permanent opening for the discharge of the saliva, the cyst may be punctured, and the opening maintained by a minute cylinder, with a button at each extremity, as has been recommended by Dupuytren; or a portion of the cyst may be removed by the scissors, and the mouth be frequently washed by any astringent lotion. Sometimes, the salivary duct is found plugged by a small calculus.

**RANULA LAPIDEA**, see *Calculi*, salivary.

**RANUNCULUS**, (F.) *Renoncule*. *Famili* *Ranunculacæ*. *Sex. Syst.* Polyandria-Polygynia. A genus of plants, most of the species of which, when taken internally, act as acrid poisons. See Poison. They are, also, acrid and vesicant, when applied to the skin, and have, accordingly, been often used as counter-irritants. The following species answer to this description.

**RANUNCULUS ABORTIVUS**.

**RANUNCULUS ACERIS**, *R. pratensis*, *Upright Meadow Crowfoot*, *Butter Cups*, *Yellow-weed*, *Blister-weed*, *Pilewort*, *Burwort*, *Meadow-bloom*, *Yellows*, (F.) *Bouton d'or*.

**RANUNCULUS ALBUS**, *Anemone nemorosa*.

**RANUNCULUS BULBOSUS**, *R. pratensis*, *Ranunculus* (Ph. U. S.), *Bulbous-rooted Crowfoot*, (F.) *Renoncule bulbeuse*, *Basinet*.

**RANUNCULUS FICARIA**, *Chelido'nium minus*, *Scrophula'ria minor*, *Ficaria ranunculoïdes*, *Chelido'nia rotundifolia minor*, *Cur'suma hæmorrhoidalis herba*, *Ranunculus vernus*, *Égole'thron*, *Lessercelandine*, *Pilewort*, (F.) *Petite chéridoïne*, *Petite Éclaire*, *Ficaire*. The leaves and root have been used medicinally:—the leaves as an antiscorbutic; the root as a cathartic in piles.

**RANUNCULUS FLAMMULA**, *Surre'ta alba*, *Smaller Water Crowfoot*, *Lesser Spearwort*, (F.) *Petite Douve*.

**RANUNCULUS ILLYRICUS**.

**RANUNCULUS LINGUA**.

**RANUNCULUS PALUSTRIS**, *R. sceleratus*—*R. pratensis*, *R. bulbosus*.

**RANUNCULUS SCCLERATUS**, *R. Palus'tris*, *Risus A'pium*, *Marsh Crowfoot*.

**RANUNCULUS VERNUS**, *R. ficaria*—*r. Virginianus*, *Lobelia sphyllitica*.

**RAPA NAPUS**, *Brassica rapa*—*r. Rotunda*, *Brassica rapa*.

**RAPE**, *Brassica napus*, *Stuprum*.

**RAPHANEDON**, from *raparic*, 'a radish,' 'like a radish.' *Raphanedom* A transverse

fracture of a long bone, leaving no splinters. What has been called, in France, *Fracture en rose*.

**RAPHANIA**, *Convulsio Raphania*, *Rhaphania*, *Morbus spasmodicus malignus seu popularis*, *M. Silerianus*, *Eclampsia typhoides*, *Synclonus Raphania*. Linnaeus gave this name to a convulsive disease, not uncommon in Germany and Sweden, and which has been attributed to the seeds of the *Raphanus Raphanistrum* being mixed with the corn. The convulsions are seated in the limbs, and are attended with acute pain. See *Convulsio cerealis*.

**RAPHANIA MAÏZTICA**, Pellagra.

**RAPHANIS**, *Raphanus hortensis*.

**RAPHANUS**, *R. hortensis*.

**RAPHANUS HORTENSIS**, *Raphanis*, *Rhaphanus*, *Raphanus*, *R. sativus*, *R. niger*, *Radixula*, *Rhaphys*, *Rhappys*, *Rhapp*. The *Radish*, (F.) *Rasfort*, *Radis*. *Family*, Cruciferae. *Sec. Syst.* Tetradynamia Siliquosa. The root of this plant is a common esculent. It has, also, been given as a diuretic in calculous affections. The juice, made into a syrup, is exhibited to relieve hoarseness. Radishes have long been celebrated as anti-scorbutics.

**RAPHANUS MARINUS**, *Cochlearia armoracia*—*r.* *Raphanistrum*, see *Raphania*—*r.* *Rusticanus*, *Cochlearia armoracia*.

**RAPHÉ**, *Rhaphé*, 'a suture.' A name given to prominent lines resembling a raised stitch. Such is the *raphe* or *tramosis* which divides the scrotum into two parts, and which extends from the anterior part of the anus to the extremity of the penis. The name *Raphé* or *Lænea mediana*, is, also, given to two prominent lines which are longitudinal and parallel, and are seen at the upper surface of the corpus callosum, extending from the anterior to the posterior extremity of that commissure.

**RAPHEX**, *Chenopodium vulvaria*.

**RAPHIANKISTRON**, from *ραφισ*, 'a needle,' and *κιστρον*, 'a hook.' An instrument employed in the formation of artificial pupil.

**RAPHION**, Needle.

**RAPHIS**, Needle.

**RAPHYS**, *Raphanus hortensis*.

**RAPPORT** (F.), *Relatio*, *Renunciatio*. A deposition made by a physician or surgeon to prove the condition of a person, the nature of a disease, the existence or non-existence of pregnancy, sudden or violent death, &c. Formerly, there were the *Rapports dénonciatifs*, made at the desire of the injured or their friends, and intended to point out to the judges the details of the crime or misdemeanor,—the *Rapports provisoires*, the object of which was to obtain provisions for the injured individual, both as regarded food and medicine, and to defray the expenses of prosecution;—and *Rapports mixtes*, or those which were both *dénonciatifs* and *provisoires*. At present, reports or depositions are generally divided into *judiciary*, or those which serve to throw light on the subject matter of any civil or criminal cause; and *administrative*, which afford information on subjects relating to any branch of the public administration, as on the nuisance or otherwise of certain establishments, the character of any epidemic, &c.

**RAPPORT**, Erection.

**RAPTUS POST-TERGANEUS**, Opiathotonos.

**RAPUM MAJUS**, *Brassica rapa*.

**RAPURE**, Rasura.

**RAPYS**, *Raphanus hortensis*.

**RAQUETTE**, *Cactus opuntia*.

**RAREFACIENS**, *Rarifaciens*, *Arcoticus*, (F.) *Rarifant*, from *rarus*, 'rare,' and *facere*, 'to make.' Medicines were so termed, which were supposed to be possessed of the power of giving more bulk or extension to the blood or other humours.

**RAREFIANT**, *Rarefaciens*.

**RARIFACIENS**, *Rarefaciens*.

**RA'RITAS**, (F.) *Rarité*. Rarity; scantiness; fewness.

**RARITAS DENTIUM**. A large space between the teeth, which appear to be, and may be, too few.

**RASCATIO**, Excretion.

**RASCETA**, *Carpus*, *Malleolus*—*r.* *Pedis*, *Tarsus*.

**RASCHA**, *Carpus*, *Malleolus*.

**RASETA**, *Carpus*, *Malleolus*.

**RASETTA**, *Carpus*, *Malleolus*.

**RASH FEVER**, *Scarlatina*—*r.* *Nettle*, *Urticaria*—*r.* *Rose*, *Roseola*—*r.* *Summer*, *Lichen tropicus*—*r.* *Tooth*, *Strophulus*.

**RASOIR**, Razor.

**RASORISM**. The Italian medical doctrine of controstimulus, of which Rasori was the founder.

**RASORIUM**, *Rasatorium*.

**RASPATORIUM**, *Raso'rium*, *Rat'ula*, *Scalprum raso'rium*, *Xyster*, *Xystorium*, *Xystrum*, *Rad'ula*, *Runci'na*, *Runci'ula*, *Scalprum*, (F.) *Rugine*, *Grattoir*. An instrument used for rasping bones, to detach the periosteum,—either in certain surgical operations, or for anatomical purposes.

**RASPBERRY**, *Rubus idæus*—*r.* *Ground*, *Hydrastis Canadensis*.

**RASSETA PEDIS**, *Tarsus*.

**RASTETA**, *Carpus*, *Malleolus*.

**RASURA**, *Xyssa*, *Xysson*, (F.) *Râpure*, from *radere*, *rasum*, 'to scrape.' A rasure, or scratch, or erosion. Also, the rasping or shaving of any substance; as *Rasura Cornu Cervi*, *Hartshorn shavings*.

**RASURA**, Scoba.

**RATAFIA**. A liquor prepared by imparting to ardent spirits the flavour of various kinds of fruits, adding sugar.

**RATANHY**, *Krameria ratanhia*—*r.* of the Antilles, *Krameria ixiina*.

**RATE**, Spleen.

**RATÉLEUX**, *Spleneticus*.

**RATÉLIER**, see *Dentier*.

**RATIO**, *Rationalitas*, from *ratio*, *ratus*, 'to think.' A reason, a cause, an explanation, a mode or manner; as *Ratio symptomatum*, an explanation of the symptoms,—*Ratio medendi*, *Genus curatio'nis*, *Via curandi*; the mode or manner of cure.

**RATIO**, Reason—*r.* *Medendi*, see *Ratio*—*r.* *Symptomatum*, see *Ratio*.

**RAT'IONAL**, *Rationalis*. That which is conformable to reason. This epithet is often opposed to *empirical*; as *rational treatment*. The French also, say *Signes rationales*, in opposition to *Signes sensibles*.

**RATIONALITAS**, *Ratio*.

**RATSBANE**, *Arsenious acid*.

**RATTLE**, *Rhynchus*, *Rhenchus*, *Rhenzis*, from (D.) *Ratel*; *Rhynchus*, *Cerchus*, *Rhogmos*, (F.) *Râle*. Noise produced by the air in passing through mucus, of which the lungs are

unable to free themselves. This condition is chiefly observed at the approach of death; and is commonly called, "the rattles."

The term *Râle* has been given to different sounds during respiration, caused by the air passing through fluid contained in the bronchi, or areolæ of the pulmonary tissue; which are perceived by the stethoscope.

**RÂLE CRÉPITANT**, *Rhönchus crepitans*, see Crepitation.

**RÂLE MUQUEUX**, *Rhönchus mucosus*, *Mucous Rattle*, *Suborepítant rhönchus*, *Râle sous-crepítant*, *R. bronchicus humida*. The sound produced by the passage of air through mucus accumulated in the bronchi or tracheæ, or through softened tubercular matter. This *râle* occurs in catarrh, and in softened tubercle. When carried to a very high degree it constitutes *gurgling*, (F.) *Gargouillement*.

**RÂLE SIBILANT**, *Rhönchus sibilans*, *Sibilant Rattle*. A slight, though prolonged whistling sound, occurring either at the commencement of inspiration, or of expiration, owing to the presence of mucus, thin and viscid, but not abundant, which obstructs, more or less completely, the smaller bronchial ramifications. It is seated in the small tubes, and occurs in the first stage of bronchitis.

**RÂLE SONORE**, *Râle bronchique sec*, *R. constant*, *Rhönchus sonorus*, *Sonorous Rattle*. A sound resembling at times the snoring, (F.) *Ronflement*, of a person asleep, at others the sound of the bass string of an instrument when rubbed with the finger, and not infrequently the cooing (F.) (*Roucoulement*) of a dove. It seems to be caused by a contraction of the bronchial tubes, and is characteristic of chronic catarrh.

**RÂLE VESICULAIRE**, see Crepitation.

**RASH**, Exanthem.—r. Lichenous, Lichen—r. Tooth, Strophulus.

**RATTLEBUSH**, *Sophora tinctoria*.

**RATTLESNAKE**, *Crotalus horridus*—r. Leaf, *Goodyera pubescens*—r. Root, *Polygala senega*, *Trillium latifolium*.

**RATTLESNAKE'S MASTER**, *Liatris scariosa*, &c.

**RATTLEWEED**, *Actæa racemosa*.

**RATULA**, *Raspatorium*.

**RAUCEDO**, *Raucitas*, *Paraphonia rauca*, *Asperitas Artæriæ aspera*, *Vox rauca*, *Bronchus*, *Hoarseness*, (F.) *Enrouement*, *Raucité*. A change in the voice, which loses its smoothness and becomes low and obscure. It is a common symptom in diseases of the larynx and trachea.

**RAUCEDO CATARRHALIS**. Hoarseness from cold.

**RAUCITAS**, *Raucedo*.

**RAUCITÉ**, *Raucedo*.

**RAUCOUS**, *Raucus*. Hoarse; as a raucous voice—*Vox rauca seu raucitosa*.

**RAVE**, *Brassica rapa*.

**RAYONNÉ**, *Radiated*.

**RAYONS SOUS-IRIENS**, *Ciliary processes*.

**RAZOR**, *Culter Tonsorius*, *Machæris*, *Noracula*, *Xyrum*, *Xyrus*, (F.) *Rasoïr*, from *radere*, *rasum*, 'to shave.' An instrument for shaving. Used in surgery to remove hairs, where they would interfere with any operation.

**REACTION**, *Reactio*, from *re*, 'again,' and *agere*, *actum*, 'to act.' An action of resistance to a power applied. A species of vital move-

ment or excitement, tending to prevent or destroy the effects of any noxious power applied to the animal economy, and which, by some, has been attributed to the *vis medicatrix naturæ*. It is certainly dependent on the organic instinctive actions of the frame. It is the state of activity which succeeds the action on the nervous system of certain morbid influences.

**REALGAR**, *Realgal*, *Arlada*, *Arlador*, *Auripigmentum rubrum*, *Arsenicum rubrum factitium*, *Abessi*, *Sandara'cha Græcorum*, *Red Sulphuret of Mercury*. A violent poison. See Poison.

**REASON**, *Ratio*, *Logos*, (F.) *Raison*. Same etymon as *Ratio*. The faculty or property of the mind, by means of which man perceives the distinction between right and wrong, in physics as well as in morals. *Reason* is a just conclusion resulting from the comparison of two ideas, by virtue of which we form a judgment.

**REBOLEA**, *Mummy*.

**REBONA**, *Mummy*.

**REBOUTEUR**, *Renouveau*.

**RECEPTACULA DURÆ MATRIS**, *Sinuses of the dura mater*.

**RECEPTACULUM CHYLI**, 'receptacle of the chyle;' *R. Pecqueti seu Pecquetianum*, *Diversorium Chyli*, *Stagnum chyli*, *Sacculus chyli*, *lifer seu re'riger*, *Sacculus lacteus*, *Al'vus ampull'is seu ampull'is'cens*, *Utriculus lacteus*, *Vesicula chyli*, *Ampull'is chyli*, *liferæ seu chyli*, *Cister'na lumb'aris*, *C. Chyli*, *Chyloog'istis*, *Chyloodehi'um*, *Latices lactis*, *Lumbar cistern*, *Reservoir of Pecquet*, (F.) *Reservoir du chyle*, *R. de Pecquet*, *Cisterna lombars*. A considerable dilatation of the thoracic duct, in front of the lumbar region of the vertebral column. It is the commencement of the duct.

**RECEPTACULUM COTURNI**. A triangular space, formed by a separation of the two laminae of the dura mater of the internal ear, near the middle of the posterior surface of the pars petrosa of the temporal bone, where the aquæductus vestibuli terminates. It is always filled with the *Fluid of Cotugno*.

**RECEPTACULUM PROQUERTI**, *R. Chyli*—r. *Sella equinae lateribus appositum*, *Cavernous sinus*.

**RECEPTIVITY**, *Receptivitas*, (F.) *Receptivité*, from *recipere*, *receptum*, 'to receive.' A word used by Tissot to express the susceptibility of certain organs to receive morbid impressions.

**RECEPTUM**, *Prescription*.

**RECESSIO**, *Paroxysm*.

**RECESSUS**, *Abcess*, *Sinus*—r. *Sulciformis*, see *Fovea vestibuli*.

**RECHAMALCA**, *Rachamelca*.

**RECHUTE**, see *Relapse*.

**RECIDIVA MORBI**, *Relapse*.

**RECIDIVE**, see *Relapse*.

**REC'IPÈ**, (L.) (*re*, and *capere*, 'to take.')

A Latin word which signifies 'take,' (F.) *Prenez*, and with which prescriptions are commenced. It is, often, represented by *R*,  $\rho$ , and was formerly by  $\mathcal{J}$ , the symbol of Jove. See *Abbreviation*.

**RECIROCATION**, *Vibrations of*, see *Sound*.

**RECLINATIO**, *Reclination*—r. *Palpebrarum*, *Ectropion*.

**RECLINATION**, *Reclimatio*, from *reclinare*, (*re* and *clinare*, 'to bend,') 'to bend back.' A mode of operating for the cataract, which con-

sists in applying the needle in a certain manner to the anterior surface of the cataract and depressing it into the vitreous humour, in such a way, that the front surface of the cataract is the upper one and its back surface the lower one.

**RECLUSOR PALPEBRARUM**, Levator palpebræ superioris.

**RECOMPOSITION**, Metasynchronis.

**RECONVALESCENTIA**, Convalescence.

**RECORDATIO**, Memory.

**RECORDATUS**, Memory.

**RECORPORATIVUS**, Metasyncritic.

**RECREATIO**, Restauratio.

**RECREMENT**, *Recrementum*, from *re*, and *cremare*, *cretum*, 'to sift.' A humour, which, after having been separated from the blood, is again returned to it; such as the saliva, the secretion of serous membranes, &c. Such fluid is said to be *crementitial*, (F.) *Récrementeux*, *Récrementiel*.

**CREMENTA VESICÆ**, Urine.

**CREMENTO-EXCREMENTITIAL**. Applied to secreted fluids, as the saliva, bile, &c., which are in part reabsorbed and in part excreted.

**CREMENTUM**, Recrement.

**RECRUDESCENTIA**, *Palincoctosis*, *Recrudescence*, from *re*, 'again,' and *crudus*, 'raw.' An increase of a disease after a temporary remission.

**RECTIFICATIO**, *Rectificatio*, from *rectum facere*, 'to make right.' An operation by which certain liquids are purified by distilling them either singly or after admixture with other substances.

**RECTITIS**. A hybrid word, from *rectum* and *itis*, denoting inflammation; properly *arthritis*, or *proctitis*. Inflammation of the rectum. *Proctitis*, *Proctalis inflammatoria*.

**RECTOSTENOSIS**, Stricture of the rectum.

**RECTO-VAGINAL**, *Recto-vaginalis*. That which relates or belongs to the rectum or vagina.

**RECTO-VAGINAL FISTULA** is owing to a preternatural communication between the rectum and vagina, through the above septum.

**RECTO-VAGINAL SEPTUM**, (F.) *Cloison recto-vaginale*, is formed by the junction—back to back—(or by what the French term *adossement*) of the rectum and vagina. It separates these two canals from each other.

**RECTUM**; so called from a notion that it is straight. It is not so. *Intestinum Rectum*, *Apouthymentos*, *Euthyeteron*, *Longaon*, *Longas*, *Longanon*, *Archos*, *Cys'saros*, *Princeps*, *Monocolon* (?). The third and last portion of the great intestine. It forms the continuation of the sigmoid flexure of the colon, occupies the posterior part of the pelvis, and extends from the left side of the sacro-vertebral articulation to the coccyx, before which it opens outwards by the orifice called the *anus*. It is cylindrical, but *sacculated*, as it were, at its inferior portion, where it is consequently larger, and is attached to the sacrum by the mesorectum. Like the other portions of the canal it is formed of three membranes. Towards the lower extremity, some parallel and longitudinal wrinkles are observable on its inner surface: these are the *Columns*, *Columnæ carnearæ* of the *Rectum* or of *Morgagni*, (F.) *Colonnes du rectum* ou de *Morgagni*. They are merely folds of the mucous membrane, between which is a

number of *Lacunæ*. The arteries of the rectum are numerous. They proceed from the inferior mesenteric, hypogastric, and internal pudic, and are called *hemorrhoidal*. The veins open, partly into the hypogastric vein, partly into the inferior mesenteric. The nerves proceed from the sciatic and hypogastric plexuses. The rectum receives the fecal matters, as they pass from the colon, which serves as a reservoir.

**RECTUS ABDOMINIS**, (F.) *Pubio-sternal*, *Sterna-pubien*, (Ch.) *Droit de l'abdomen*. A long flat muscle, situate at the anterior part of the abdomen, and separated from that of the opposite side by the *linea alba*. It is attached, above, to the cartilages of the last three true ribs; and, below, to the pubis by a very strong tendon, the outer edge of which is continuous with the *fascia transversalis*. This muscle is enclosed in an aponeurotic sheath; and, in its course, has three or four transverse aponeurotic intersections. It bends the chest on the pelvis, and conversely.

**RECTUS ANTERIOR BREVIS**, *Rectus capitis internus minor*—r. *Anterior longus*, R. *capitis internus major*—r. *Capitis anticus longus*, R. c. *internus major*.

**RECTUS CAPITIS INTERNUS MAJOR**, R. *internus major*, R. *anterior longus*, *Rectus capitis anticus longus*, (F.) *Trachélo-basilaire*, *Grand droit antérieur de la tête*. This muscle is long in proportion to its breadth; flat, and broader above than below. It is situate at the anterior and lateral part of the neck, and arises from the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebrae. It is inserted into the basiliary process of the occipital bone.

**RECTUS CAPITIS INTERNUS MINOR**, R. *internus minor*, *Renuens*, *Annuens*, R. *anterior brevis*, (F.) *Petit trachélo-basilaire*, *Petit droit antérieur de la tête*. This is situate deeper than the last. It is thin, flattened, irregularly quadrilateral, and passes from the anterior surface of the body of the first vertebra, near the origin of the transverse process, to be inserted into the basiliary process.

**RECTUS CAPITIS LATERALIS**, R. *lateralis Fallopii*, *Transversalis anticus primus*, *Rectus lateralis*, (F.) *Trachélo-atloïdo-basilaire*, *Atloïdo-sous-occipital* (Ch.), *Droit latéral de la tête*. There is a muscle of this name on each side of the head. It is flat, quadrilateral, and passes from the transverse process of the atlas to the occiput, behind the jugular fossa. It inclines the head to one side.

**RECTUS CAPITIS POSTICUS MAJOR**, R. *Major*, R. *Capitis posticus minor* (Albinus), *Spinaxoïdo-occipitalis*, (F.) *Axoïdo-occipital* (Ch.) *Grand droit postérieur de la tête*. A flat, triangular muscle situate at the posterior and superior part of the neck. It extends from the spinous process of the second cervical vertebra to the external surface of the lower semicircular ridge of the occipital bone. This muscle extends the head; inclines it to one side; and causes it to experience a rotary motion, which directs the face to its side.

**RECTUS CAPITIS POSTICUS MINOR**, R. *Minor*, (F.) *Tuber-atloïdo-occipital*, *Atloïdo-occipital* (Ch.), *Petit droit postérieur de la tête*. A flat, triangular muscle, situate beneath the last, which passes from the posterior arch of the atlas to the occipital bone. It extends the head.

**RECTUS CAPITIS POSTICUS MINOR, R. c. p. major**—r. *Cruris, R. femoris.*

**RECTUS EXTERNUS OCULI, Abductor oculi, Indignabundus, Indignatorius, Iracundus, Oculum movens secundus, Orbito-externo-scleroticiem.** All the recti muscles of the eye, four in number, arise from the bottom of the orbit, and are inserted into the sclerotic coat of the eye. The *Rectus externus, (F.) Droit externe, Irascible ou Abducteur,* is divided, at its posterior extremity, into two portions, one of which is attached to the outer part of the foramen opticum, and the other to the sphenoid bone.

**RECTUS FEMORIS, Rectus sive Grad'is anterior, Rectus cruris, (F.) Ilio-rotulien, Droit antérieur de la cuisse.** A straight muscle seated at the anterior part of the thigh. It extends from the anterior and inferior spine of the ilium and the cotyloid cavity of the patella. This muscle extends the leg upon the thigh, and conversely. It can, also, bend the thigh upon the pelvis or carry the pelvis forward.

**RECTUS INFERIOR OCULI, Depressor oculi, Tim'idus, Dep'rimens, Hum'ilis, Oculum movens quartus, (F.) Sous-optico-spheno-scleroticiem, Droit inférieure ou abaisseur de l'œil, Muscle humble,** arises below the optic foramen, from the sphenoid bone. It depresses the eye.

**RECTUS INTERNUS OCULI, Adducens oculi, Bibit'orius, Oculi adductor, Oculum movens primus, (F.) Orbito-intus-scleroticiem, Droit interne de l'œil ou adducteur ou buveur.** It arises from the sphenoid at the inferior part of the foramen opticum. It turns the eye towards the nose.

**RECTUS SUPERIOR OCULI, Attol'lens oculi, Elevator oculum, Levator oculi, Superbus, Elevator oculi, Oculum movens tertius, (F.) Sus-optico-spheno-scleroticiem, Droit supérieur ou élévateur de l'œil, Dédaigneur,** is attached to the circumference of the foramen opticum.

(All the recti muscles are concerned in the voluntary motions of the eye. The oblique muscles have been supposed by Sir C. Bell to execute the involuntary. [?])

**RECTUS INTERIOR FEMORIS, Gracilis**—r. *Internus major, R. capitis internus major*—r. *Internus minor, R. capitis internus minor*—r. *Lateralis, R. capitis lateralis*—r. *Lateralis Fallopii, R. c. lateralis*—r. *Major, R. capitis posticus major*—r. *Minor, R. capitis posticus minor.*

**RECUBITORIUM, Anaclinterium.**

**RECURRENT, Recur'rens;** from *recurvere, (re, and currere, 'to run back.'* A name given to several arterial and nervous branches, which seem to re-ascend towards the origin of the trunk whence they emanate.

**RECURRENT ARTERIES.** This name has been given to several arteries of the forearm, and to one of the leg. In the *forearm,* there are 1. The *Radial recurrent, Arère recurrente de l'épicondyle, (Ch.)* which arises from the superior part of the radial, and ascends between the supinator longus, s. brevis, and the brachialis internus. 2. The *anterior cubital recurrent, A. recurrente de l'épitrachèle, (Ch.)* which arises from the upper and inner part of the cubital, and ascends between the pronator teres and brachialis internus. 3. The *posterior cubital recurrent,* which arises from the preceding artery, or from the cubital itself, and ascends between the olecranon and internal tuberosity of the humerus. 4. The *posterior radial recurrent,*

*A. recurrente olcranonienne, (Ch.)* It arises from the posterior interosseous, and ascends between the posterior cubital and anconeus muscles. In the *leg,*—the *Arteria recurrens tibialis, A. recurrente du genou (Ch.)* is furnished by the anterior tibial, and ascends to the tibia-nticus muscle.

**RECURRENT BANDAGES** are formed by convolutions of the bandages, which make a kind of cap for the part—as the head—to which they are applied.

**RECURVATIO, see Hump.**

**RECUTITUS, Apella.**

**REDBEAN, Abrus precatorius.**

**REDBERRY, Arbutus uva ursi, Gaultheria, Panax quinquefolium**—r. *Bitter, Cornus Florida*—r. *Swamp, Vaccinium oxycoccos.*

**REDIMICULUM, Diadema.**

**REDINGOTES ANGLAISES, see Condom.**

**REDINTEGRATIO, Regeneration, Restauratio.**

**REDIVIA, Paronychia.**

**RÉDONNANCE, Plethora.**

**RED OUBLEMENT, Exacerbation, Paroxysm.**

**RED ROOT, Celastrus, Sanguinaria Canadensis.**

**REDS, Menses.**

**REDUCTIO, Taxis.**

**REDUCTION, Reduc'tio, Reposit'io, Restitut'io, Diap'lasis, Diaplas'mus, Syntax'is, from re, and ducere, ductum, 'to lead.'** A surgical operation, the object of which is to restore displaced parts to their original situation. Thus, we say the reduction of a luxation, when the displaced parts are again brought to their proper relative situation. The reduction of a hernia is the restoration of the protruded parts to the cavity of the abdomen. This is, also, called *Taxis.*

**REDUNDANTIA, Plethora.**

**REDUVIA, Paronychia.**

**REFECTIO, Restauratio.**

**REFECTIVA, Analeptica.**

**REFECTUS, Restauratio.**

**REFICIENTIA, Analeptica.**

**REFLECTION, Duplicature.**

**REFLEX SYSTEM OF NERVES, see Nerves.**

**REFLEXIO PALPEBRARUM, Ectropion.**

**REFRACTION, Refrac'tio, Photocamp'sis, Dio'clasis, from re, and frango, 'I break.'** The change of direction which rays of light experience when they pass obliquely from one medium into another of different density. If the light passes from a rarer to a denser medium, it approaches the perpendicular raised at the point of immersion. The contrary occurs, when it goes from a denser to a rarer medium. The theory of lenses, telescopes, and of the eye, rests entirely on this property of light.

**RÉFRAICHISSANTS, Refrigerants.**

**REFRIG'ERANTS, Refrigeran'tia, Psych'tica, Antither'ma, Frigefacien'tia, (F.) Réfrachissans, Réfrigeratifs, from re, and friger, 'to cool.'** Medicines which depress the morbid temperature of the body. The chief reputed refrigerants are the Potass' Nitrates, (?) the Sodæ Boras, (?) but chiefly the abstraction of caloric by ice and iced drinks, cold water, cold lemonades, soda water, and effervescing draughts internally; and externally cool air, cold water, evaporating lotions and frigorific mixtures.

**RÉFRIGÉRATIFS**, Refrigerants.

**REGENERATIO**, Reproduction.

**REGENERATION**, *Regeneratio*, *Palingsenesia*, *Redintegratio*, from *re*, and *generare*, 'to beget.' Reproduction of a part of the body, which has been destroyed.

**REG'IMEN**, from *regere*, 'to govern.' The rational and methodical use of food, and of every thing essential to life; both in a state of health and disease. It is often restricted, in its meaning, to *Diet*. It is sometimes used synonymously with hygiene.

**REGINA PRATI**, *Spiræa ulmaria*.

**REGIO**, Region.

**REGIO AURICULARIS**. The region of the ear.

**REGIO BUCCALIS**. The region of the cheeks.

**REGIO CARDIACA**, Epigastric region.

**REGIO CERVICALIS**. The region of the neck. The cervical region.

**REGIO EPIGASTRICA**, Epigastrium.

**REGIO FACIALIS**. The facial region.

**REGIO FRONTALIS**. The frontal region.

**REGIO GASTRICA**, Umbilical region—*r.* Hypogastrica, see Hypogastrium—*r.* Hypochondriaca, Hypochondre—*r.* Iliaca, Iliac region—*r.* Inguinalis, Inguinal region—*r.* Ischiadica, Ischiadic region—*r.* Jugalis, Jugal region—*r.* Lumbalis, Lumbi—*r.* Mentalis, Mental region—*r.* Mesogastrica, Umbilical region—*r.* Nasalis, Nasal region—*r.* Nuchæ, Nuchal region—*r.* Nuchalis, Nuchal region—*r.* Occipitalis, Occiput—*r.* Occipitalis inferior, Nuchal region—*r.* Perinæi, Perinæum—*r.* Præcordiaca, Præcordial region—*r.* Pubis, Pubic region—*r.* Stomachalis, Epigastric region—*r.* Stomachica, Epigastric region—*r.* Temporalis, Temple—*r.* Umbilicalis, Umbilical region.

**REG'ION**, *Regio*. Same etymon. Anatomists have called *regions*, determinate spaces on the surface of the body or of different organs. Thus, the abdomen has been divided into several; to which different names have been given. See Abdomen, Epigastrium, Hypochondrium, Hypogastrium.

**REG'ION OMBILICALE**, Umbilical region.

**REGIONAL ANATOMY**, see Anatomy.

**RÈGLES**, *Menses*—*r.* *Devicæ*, Menstruation, vicarious—*r.* *Difficiles*, Dysmenorrhæa.

**RÈGLISSE**, Glycyrrhiza.

**REGLUTINATIO**, *Decollement*.

**RÈGNE ANIMAL**, see Animal.

**REGULUS ANTIMONII**, Antimonium.

**REGURGITATION**, *Regurgitatio*. The act by which a canal or reservoir frees itself, without effort, from substances accumulated in it. Usually, it is applied to the *puking* or *poasting* of infants; and to the *rising* of solids or fluids into the mouth in the adult,—from *re*, and *gorge*, 'the throat.' What is called "vomiting at pleasure" is regurgitation.

The substances brought into the mouth by regurgitation, the French call *Resvois*.

**REIN**, Kidney.

**REINE DES PRÉS**, *Spiræa ulmaria*.

**REINFORCEMENT**, **FASCICULUS OF**, *F. Cuneatus*. A band of fibres from the *corpus innominatum*, or lateral part of the antero-lateral column of the medulla, which is continued up behind and around the corpus olivare, is lined on its inner or central surface with cinniferous substance, enlarges as it ascends, passes over the upper surface of the pons Varolii, and is expanded into the optic thalamus.

It thus forms, in its course, the anterior paries of the fourth ventricle, and is brought into view by brushing away the *tuberculum cinereum* or gray matter of the ventricle. The band has received these names owing to its constantly increasing as it ascends, and being mixed up with gray matter on its inner face, from which it seems to derive new fibres.

**REJEC'TIO**, *Anagogé*, from *re*, and *jacere*, 'to cast.' Every excretion by the mouth; spitting, expectoration, regurgitation or vomiting.

**REJEC'TIO SANGUINIS E PULMONIBUS**, Hæmoptysis.

**RELÂCHEMENT**, Relaxation.

**RELAPSE**, *Hypotrophé*, *Epistrophé*, *Hypotrophé*, *Morbi recidiva*, *Hypotropiasmos*, from *re*, 'again,' and *labor*, 'I fall down.' The return of a disease, during, or shortly after, convalescence. The French use *Rechute* in this sense; and *Récidive*, (*Morbus recidivus*) for the return of a complaint, at a greater or less period after the complete restoration of health.

**RELATIO**, *Rapport*.

**RELATION, FUNCTIONS OF**, see Function.

**RELAX'ANT**, *Lazans*, *Molacticum*, *Chalasticum*, *Parasticum*, (F.) *Relâchant*; from *re*, and *lazare*, 'to loose.' A medicine which diminishes the tension of organs. Mucilaginous and fatty substances are relaxants.

**RELAXANTIA**, Emollients.

**RELAXATIO CORDIS ET ARTERIARUM**, Diastole.

**RELAXATION**, *Relaxatio*. Same etymon. *Chalasis*, *Chalasmus*, (F.) *Relâchement*. In *Physiology*, relaxation is opposed to contraction. In *Pathology*, it means great looseness of a part.

**RELEVEUR DE L'ANUS**, Levator ani—*r.* *de la Lèvre inférieure*, Levator labii inferioris—*r.* *de Menton*, Levator labii inferioris—*r.* *de l'Omoplate*, Levator scapulæ—*r.* *de la Prostata*, Levator prostatae—*r.* *de l'Utricle*, Levator urethræ.

**RELIQUAT**, (F.) The *remnant* or remains of a disease.

**REMAK FIBRES**, see Fibres, Remak.

**REMANSIO MENSIIUM**, Amenorrhæa.

**REMEDE**, Clyster, Medicament—*r.* *du Capuchin*, Liqueur hydrargyri nitrici—*r.* *du Duc d'Antin*, Liqueur hydrargyri nitrici.

**REMEDIAL**, Medicinal.

**REMEDIATE**, Medicinal.

**REMEDIUM**, Juvens, Medicament—*r.* Dentifricium, Dentifrice.

**REMEDY**, Medicament—*r.* English, Cinchona.

**REMISSIO**, Decline, Remission—*r.* Cordis et Arteriarum, Diastole—*r.* Morbi, Remission—*r.* Virium, Atony.

**REMIS'SION**, *Remis'sio*, *Epan'esia*, *An'esia*, *Submis'sio*, *Aph'esia*, *En'dosis*, *Remis'sio*, *Mais'sio*, from *remittere*, (*re*, and *mittere*, 'to send,') 'to relax.' In a more extensive signification, a temporary diminution of the symptoms of a disease, either acute or chronic, *Remis'sio morbi*. Diminution in the febrile symptoms, such as occurs in a remittent fever, between the exacerbations.

**REMITTENS ICTERODES**, Fever, yellow.

**REMIT'TENT**, *Remis'siens*. Same etymon. Any disease which presents *remissions*.

**REMITTENT OF CHILDREN**, Fever, infantile remittent.

**REMITTENT FEVER**, *Febris remittens*, *Epanctus*, *Emac'orhating*, *paroxysmal*, *sub-continual*, *endemic*, *endemic'al* or *endemic'al fever*, (F.) *Fièvre rémittente*, is one which strikingly exacerbates and remits, but without intermission. The ordinary bilious fever of the United States is a simple remittent—*Epanctus mitis*, (F.) *Fièvre rémittente simple*.

**REMORA**, from *remora'ri*, (*re*, and *mora*, 'delay,') 'to arrest.' The name of two surgical instruments, intended to retain parts *in situ*. The one was used, formerly, in castration, to prevent the intestines from protruding at the inguinal ring; the other, called *Remora Hildani*, (F.) *Arrêt d'Hildan*, *Echene'is*, *xyruis*, was employed to maintain fractures and luxations reduced. It is not now used.

**REMORA ARABEI**, *Ononis spinosa*.

**REN**, Kidney.

**RENAL**, *Renal'is*, from *Ren*, 'the kidney.' That which relates to the kidney.

**RENAL ARTERIES**, *Emulgent Arteries*, are very large and short, and commonly two in number,—one to each kidney. They arise from the sides of the abdominal aorta, forming with it a right angle. The left is commonly a little more anterior and elevated than the right. After a short course, they arrive at the fissure of the kidney, where they divide, before entering it, into three or four very considerable branches.

**RENAL CAPSULE**, Capsule, renal.

**RENAL PLEXUSES**, *Emulgent Plexuses*. These are two:—one on each side. They proceed from fasciculi of the solar and celiac plexuses; from the outer part of the semilunar ganglion and the final expansion of the small splanchnic nerves. These plexuses begin by three or four ganglions, situate at the commencement of the renal artery; and they give off from their circumference many fine, straight filaments, which do not anastomose, and which enter the kidney with the divisions of the renal artery. These divisions they accompany.

**RENAL VEINS**, *Emulgent Veins*. These are very large. Their roots follow the same course as the arteries in the substance of the kidney. In the fissure or pelvic portion of the kidney, they unite into a single trunk, which passes transversely inwards, and opens at the side of the vena cava descendens.

**RENCHUS**, Snoring, Stertor.

**REN'CLUSUS**, *Renic'ulus*, *Ren'ulus*, diminutive of *Ren*, 'a kidney.' A small kidney. A lobe of the kidney.

**RENES SUCCENTURIATI**, Capsules, renal.

**RENICULUS**, *Renculus*.

**RENIFORM**, *Nephroid*.

**RENNES, MINERAL WATERS OF**. Thermal salines in the department of Aube, France, containing carbonic acid and chloride of magnesium. Temperature 103° to 121°, of Fahr.

**RENNET**, *Runnet*, from (G.) *gerinnen*, 'to coagulate.' (?) When the fourth stomach or

*Abomasus*, of the calf is salted and dried, it possesses the property of coagulating milk, when a portion of it is soaked in water, and the infusion is added to milk.

**RENONCULE**, *Ranunculus*—*r. Bulbous*, *Ranunculus bulbosus*.

**RENOUEE**, *Polygonum aviculare*.

**RENOUEUR**, (F.) *Rebouteur*, *Rhabilleur*. A *bone-doctor*:—a *bone-setter*. One who makes a trade of reducing fractures and dislocations.

**RENOVATIO**, *Ananeosis*.

**RENUENS**, *Rectus capitis internus minor*.

**RENULUS**, *Renculus*.

**RENUM ATONIA**, *Nephtronia*—*r. Paralysis*, *Nephtronia*.

**RENUNCIATIO**, *Rapport*.

**RENVERSEMENT DE LA LANGUE**, *Paraglossa*—*r. de la Matrice*, *Uterus*, inversion of the—*r. des Paupières*, *Ectropion*—*r. du Rectum*, *Proctocele*—*r. de la Vessie*, *Exocyste*, *Exstrophia* of the bladder.

**RENVOIS**, see *Regurgitation*.

**REPANDATIO**, *Lordosis*.

**REPELLENTIA**, *Repellents*.

**REPEL'LENTS**, *Repellen'tia*, *Repercution'tia*, *Apocru'stias*, (F.) *Répercussifs*, from *re*, and *pellere*, 'to drive.' Medicines which, when applied to a tumefied part, cause the fluids, that render it tumid, to recede, as it were, from it. Astringents, cold water, ice, &c., are repellents.

**REPERCUSSIFS**, *Repellents*.

**REPERCUSSIO**, *Contra-fissura*, *Repercussion*.

**REPERCUSSION**, *Repercus'sio*, *Anac'lasis*, from *re*, *per*, and *quatero*, 'to shake or batter.' Disappearance of a tumour or cutaneous eruption, in consequence of the application of a repellent. The action of a repellent remedy. The French writers use the term *Delitescence*, *Delitescen'tia*, for the sudden disappearance of a tumour, inflammation, eruptive disease, or purulent collection, without the disease occurring in any other part of the body: in this respect *delitescence* differs from *metastasis*: *Delitescence* of an inflammation or 'sudden disappearance' is distinguished by certain French pathologists from *Resolution*. *Repercussion* also means *Ballotement*.

**REPERCUTIENTIA**, *Repellents*.

**REPLETIO**, *Fulness*, *Plethora*.

**REPLI LONGITUDINAL DE LA MÉNINGE**, *Falx cerebri*.

**REPOSITIO**, *Anaplasia*, *Reduction*, *Taxis*.

**REPOUSSOIR**, *Punch*—*r. d'Arêtes*, *Prong*.

**REPRODUCTION**, *Reproductio*, *Regeneratio*, from *re*, and *producere*, (*pro*, and *ducere*.) The function by which living bodies produce bodies similar to themselves. See *Generation*. As a general remark, it will be found true, that the larger animals are uniparous; and the smaller, which are more exposed to destruction, multiparous. The mammalia being of the same natural class as man, it may be useful to compare them in this respect.

COMPARATIVE TABLE OF REPRODUCTION IN THE CLASS MAMMALIA.

Species.	Age capable of engendering.	Duration of gestation.	Number of young at each birth.	Period of cessation of the function.	
<i>Primates.</i>					
Man.....	14 years	9 months	1 to 3	At a somewhat advanced age.	
Monkeys, (large).....	3 years	7 months	Do.		
Do. (long tailed,).....	2 years	6 months	Do.		
<i>Carnivora.</i>					
Bear.....	2 years	112 days	1 to 4	25 to 30 years.	
Badger.....	.....	.....	3 to 4	30 to 25 years.	
Hedgehog.....	1 year	1 mo. and 10 days	3 to 5	Produces during life.	
Ferret.....	11 months	Do.	5 to 9 twice a year		
Otter.....	.....	3 months	3 to 4	10 years. (?)	
Pole-cat.....	before 1 year	56 days	3 to 6		
Marten.....					
Weasel, and Ermine.....					
Didelphus.....	.....	.....	4 to 6		
Opossum, and Phlander.....					
Lion.....	2 years	3 to 4 months	3 to 4		20 to 25 years.
Tiger.....	Do.	3 months	4 to 5		Do.
Leopard.....	.....	.....	.....		9 years. 15 to 20 years. 15 years. 10 or 12 years.
Lynx.....	before 1 year	9 weeks	3 to 4		
Wild Cat.....		56 days	4 to 6		
Wolf.....	2 years	73 days	5 to 9		
Dog in the most natural state.....	10 months	63 days	3 to 6		
Fox.....	1 year	2 months	Do.		
Jackall.....	.....	Do.	5 to 8		
Iastie.....	.....	63 days	6 to 7		
Phoca.....	.....	3 months(?)	2 to 3		
<i>Rodentia.</i>					
Squirrel.....	1 year.	45 days	3 to 4 twice a year	Produces during life.	
Flying Squirrel.....	.....	.....	3 to 4	Do.	
Ondatra.....	.....	.....	3 to 5	Lives 6 years.	
Beaver.....	.....	4 months	2 to 3	Lives 8 years. Lives 8 or 9 years. Produces during life. Do. Do. Do.	
Hare.....	1 year	30 days	{ 2 to 4 several } { times a year }		
Rabbit.....	6 months	Do.	4 to 8 do.		
Rat.....	Do.	5 or 6 weeks	5 to 6 do.		
Mouse.....	Do.	1 month	Do.		
Marmot.....	.....	6 weeks	2 to 4		
Guinea Pig.....	5 to 6 weeks.	3 weeks	5 to 8 times a year		
Dormouse.....	1 year	.....	3 to 5		
<i>Edentata.</i>					
Armadilla.....	.....	.....	4 times a year		7 to 8 years. (?)
<i>Ruminantia.</i>					
Camel.....	4 years	11 months or 1 yr	1	40 to 50 years.	
Dromedary.....	Do.	.....	1	Do.	
Buffalo.....	3 years	9 months	1	15 to 18 years.	
Beef.....	2 years	Do.	1 to 2	9 years.	
Lama.....	3 years	.....	Do.	12 years.	
Reindeer.....	2 years	8 months	1	Lives 16 years.	
Buck and Doe.....	1½ year	Do.	1 to 2	Lives 25 or 30 years.	
Koebuck.....	Do.	5 months	Do.	Lives 12 or 15 years.	
Saiga (Antelope).....	1 year	Do.	Do.	Lives 15 or 20 years.	
Chamois and Wild Goat.....	Do.	Do.	1, 2, and 3	Lives 18 or 20 years.	
Goat.....	Do.	Do.	Do.	7 years.	
Musimon.....	1½ year	Do.	1 to 2	8 or 10 years.	
Sheep.....	1 year	Do.	Do.	8 years.	
<i>Solipedes.</i>					
Horse.....	2½ years	290 days	1 to 2	25 or 30 years.	
Ass.....	Do.	Do.	Do.	Do.	
Zebra.....	Do.	Do.	Do.	Do.	
<i>Pachydermata.</i>					
Hog.....	9 months or 1 year	4 months	10 to 20	15 years.	
Elephant.....	16 years(?)	9 to 11 months	1 or 2	Lives 70 years. (?)	
Rhinoceros.....	5 years.?)	.....	1 or 2(?)	Lives 60 years. (?)	
Hippopotamus.....	.....	.....	1	Lives 60 years. (?)	
Moose.....	.....	9 months	1		

REPULSORIUM, Punch.

REPURGA'TIO, *Anacathar'sis*, from *re*, and *purgare*, 'to cleanse.' According to Castelli—purgation by transpiration or by expectoration. Medicines producing this effect are called *Repurgantia*.

REQUIES, Acinesia.

REQUIETIO, Acinesia.

RES CONTRA-NATURAM. 'Things against nature,' (F.) *Choses contre-nature*, are

those things which tend to destroy man;—as disease, and every thing connected with it.

RES CULINARIA, Culinary art—*r. Medica*, *Medicina*.

RES NATURALES, (F.) *Choses naturelles*. Those things, which, by their union, were conceived to constitute the nature of man; such as the elements, temperaments, humours, spirits, &c.

RES NON NATURALES, (F.) *Choses non-natu-*

*velles.* Those things which, anciently, formed the matter of hygiene. See Non-naturals.

RES VENEREA, Coition—*r.* Vestiaris, Vestitus.

RÉSEAU, Rete—*r.* Admirable, Rete mirabile—*r.* Merveilleux, Rete mirabile.

RESECTIO, Resection—*r.* Articulorum, see Resection.

RESECTION, *Resectio*, from *resicare*, (*re*, and *scare*), 'to cut off.' A name, given, especially by the French surgeons, to operations in which the carious extremities of long bones, or the unconsolidated extremities of fractured bones forming irregular joints, are removed with the saw—*Resectio articulo-rum*, *Decapitatio articulo-rum*.

RESECTION, see Amputation.

RESEDA LUTEOLA, *Wald*, *Dyer's Weed*. A European plant naturalized in the United States, which was at one time used as a diaphoretic and diuretic.

RESERANS, Aperient.

RESERVOIR DE LA BILE, Gall-bladder—*r.* du Chyle, Receptaculum chyli—*r.* des Larmes, Lachrymal sac—*r.* of Pecquet, Receptaculum chyli—*r.* de Pecquet, Receptaculum chyli.

RESIDENTIA, Sediment.

RESIMUS, Camus.

RESIN, *Resina*, *Rhetinè*. A vegetable product, commonly dry and concrete, more or less brittle, inodorous or slightly odorous, insipid, or of an acrid warm taste; of a smooth, glassy fracture, heavier than water, inflammable, insoluble in water, soluble in alcohol, ether, and yolk of an egg, and negatively electrifiable by friction. Many resins are used in medicine; the greater part are purgative and irritating. Some act like acrid poisons.

RESIN, С А Я Е Н Н Е, Caoutchouc—*r.* of the Spruce fir, see Pinus abies.

RESINA, Resin—*r.* Abietis, Pinus Abies—*r.* Abietis, Pinus picea—*r.* Abietis humida, Pinus abies—*r.* Abietis sicca, see Pinus abies—*r.* Alba, see Pinus sylvestris—*r.* Alba humida, see Pinus Abies—*r.* Copal, Copal—*r.* Elastica, Caoutchouc—*r.* Flava, see Pinus sylvestris—*r.* Fluida, Canadensis, see Pinus balsamea—*r.* Juniperi, Sandarac—*r.* Laricis, see Pinus larix—*r.* Lentiscina, see Pistachia lentiscus—*r.* Liquida pini balsameæ, see Pinus balsamea—*r.* Liquida pini laricis, see Pinus larix—*r.* Nigra, Colophonia—*r.* Pini, see Pinus sylvestris—*r.* Pini empyreumatica liquida, see Pinus sylvestris—*r.* Pini abietis sponte concreta, see Pinus abies—*r.* Strobilina, see Pinus balsamea, and Pinus mughos—*r.* Terebinthi, see Pistachia terebinthus.

RESINATUM, *Rhetinoton*, *επιρσινοτον*. An epithet for wine impregnated with resin, and used by the ancients as a stomachic.

RESINE DE GOMART, see Bursa gum-mifera—*r.* de Lierre, see Hedera helix.

RESINOCE'RUM, *Rhetinoce'ron*, from *εστιν*, 'resin,' and *κνερικ*, 'wax.' A mixture of resin and wax.—Galen.

RESOLUTIO, Resolution—*r.* Membrorum, Paralysis.

RESOLUTIO MORBI. The resolution or disappearance of a disease; especially when without any critical evacuation.

RESOLUTIO NERVORUM, Paralysis—*r.* Ven-

triculi autopeptica, Gastromalacia—*r.* Virium, Dialysis.

RESOLU'TION, *Resolutio*, *Discussio*, from *resolvere*, (*re* and *solvere*, 'to loosen.')

Removal or disappearance, as of a disease. Resolution is one of the terminations of inflammation, in which the inflamed part returns gradually, and without suppuration to the healthy condition.

RESOLUTION DES MEMBRES, Paralysis.

RESOLVENTIA, Discussients.

RESONANCE, (F.) *Résonnement*, from *re*, 'again,' and *sono*, 'I sound.' 'A return of sound.' A thrilling of the voice more loud than natural; or its existence in a part where it is not heard in health; as detected by auscultation. A thickened and hardened state of the lungs, caused either by a mass of crude tubercles, or by inflammation, is generally considered to produce this phenomenon, by rendering the lung a better conductor of the murmur of the voice in the bronchi. Hence the origin of the term *Bronchophony*, from *φωνος*, 'bronchus,' and *φωνη*, 'the voice;' (F.) *Voix bronchique*, *Voix tubaine*, *V. bourdonnante*.

RESONANCE, VIBRATIONS OF, see Sound.

RESONITUS, Contra-fissura.

RESORBENS, Absorbent.

RESORPTIO, Absorption, Resorption—*r.* Cutanea, see Absorption—*r.* Cutis, see Absorption.

RESORPTION, *Resorptio*, from *resorbere*, (*re*, and *sorbere*), 'to absorb again.' Absorption of a fluid which has been previously deposited in a part by the exhalants:—as of pus, blood, serum, &c.

RESPIRABLE, *Respirabilis*. Same etymon as Respiration. Any gas which can be breathed without positive danger is so called.

RESPIRAMEN, Respiration.

RESPIRAMENTUM, Respiration.

RESPIRATIO, Respiration—*r.* Abolita, Apnoea—*r.* Brevis, Dyspnoea—*r.* Difficilis, Dyspnoea—*r.* Stertens, Stertor—*r.* Stertuosa, Stertor.

RESPIRATION, *Respiratio*, *Anapnoè*, from *respiro*, (*re*, and *spiro*), 'I take breath.' *Anapnoèsis*, *Pneùsis spiratio*, *Respiramen*, *Respiramentum*, *Respiratus*, *Respiratus*, *Spiritus*. A function proper to animals, the object of which is, to place the materials of the blood—the mixture of the venous blood with lymph and chyle—in contact with atmospheric air, in order that it may acquire the vivifying qualities that belong to arterial blood. The organs for executing this function are, in the mammalia, birds, and reptiles,—the *lungs*. In man, the respiration consists of mechanical and chymical phenomena. The mechanical are *Inspiration* and *Expiration*. The evident chymical phenomena consist in the formation of a certain quantity of carbonic acid, the absorption of a part of the oxygen of the air, and the disengagement of a quantity of water in the state of vapour. In the healthy condition the respiration is easy, gentle, regular, and without noise. In man, the respirations are generally about 35 per minute in the first year of life; 25 during the second; 20 at puberty; and 18 in the adult age.

RESPIRATION BRONCHIQUE, see Murmur, respiratory—*r.* *Ezagria*, see Puerile—*r.* *Hypotrèculaire*, see Puerile.

**RESPIRATION, JERKING, (F.) R. saccadé.** When the murmur of inspiration, in place of being continuous, is interrupted as by starts, it is called 'jerking.' It is a concomitant of incipient pleurisy, pleurodynia, spasmodic asthma, and tuberculosis of the lung with corresponding pleuritic adhesion.—Walshe.

**RESPIRATION OF THE CELLS, MURMUR, Respiratory**—r. Metallic, *Tintement métallique*—r. *Nulle*, see Murmur, respiratory—r. Proof, *Docimasia pulmonum*—r. *Puérile*, see Puerile—r. *Réponse*, see Murmur, respiratory—r. *Rude*, see Murmur, respiratory—r. *Silencieux*, see Murmur, respiratory—r. *Saccadé*, R. jerking—r. *Soufflante*, Murmur, respiratory—r. *Supplémentaire*, see Puerile—r. Tubal, see Murmur, respiratory.

**RESPIRATOR, same etymon.** Various instruments have been devised for the purpose of tempering the air before it reaches the lungs in winter. One of the best is that of Jeffrey, which is made of several layers of fine wire tissue.

**RESPIRATORIUM VENTRIS, Diaphragm.**

**RESPIRATORIUS, Respiratory.**

**RESPIRATORY, Respiratorius, same etymon.** Appertaining to respiration. An epithet applied to the murmur heard by auscultation in a healthy adult, during inspiration and expiration. It marks the entrance of the air into the cells, and its passage out of them. See Murmur.

**RESPIRATORY TRACT, Tractus respiratorius.** The middle column of the spinal marrow, described by Sir Charles Bell as that whence the respiratory nerves originate. See Nerves.

**RESPIRATUS, Respiration.**

**RESPIRITUS, Respiration.**

**RESSERÉ, (VENTRE,) Constipation.**

**RESTA BOVIS, Ononis spinosa.**

**RESTAGNATIO, Eructation.**

**RESTAURANS, Corroborant.**

**RESTAURATIO, Refectio, Refectus, Analop'sis, Anaresp'sis, Anacom'idé, Anals'is, Anaol'sis, Aposstas'tasis.** Restoration of strength, after disease or great fatigue; *Epanorthis'sis, Reora'tio, Redintegratio, Restauratio virium.* Return of the organs to their normal condition.

**RESTAURATIO VIRIUM, see Restauratio.**

**REST HARROW, Ononis spinosa.**

**RESTIFORMIS PROCESSUS, Coracoid.**

**RESTITUTIO, Reduction**—r. Organica, *Morioplastice*—r. Partium deperditarum, *Morioplastice.*

**RESTLESSNESS, Agitation.**

**RESTORATION, Restauratio.**

**RESTORATIVE, Corroborative.**

**RESTRICIO INTESTINI RECTI vel ANI, Stricture of the rectum.**

**RESUMPTIVUS, Resumptorius; from re, 'again,' and sumere, 'to take.'** Causing to resume. *Resumptivum.* Any agent calculated to restore flesh and strength to one who has been reduced.

**RESUMPTORIUS, Resumptivus.**

**RESURRECTION-MAN, Resurrectionist.**

**RESURRECTIONIST, Resurrection-man, Body snatcher; from re, and surgere, 'to arise.'** An individual who violates the sanctuary of the grave to obtain subjects for dissection.

**RESUSCITATION, Resuscitatio, from resuscitare, (re, and suscitare, sursum citare seu alere,) 'to move up,' 'to stir up anew.'**

**Revivification.** The restoration of persons, apparently dead, to life. See Asphyxia and Suffocation.

**RETCHING, Vomiturition.**

**RETE, Plexus**—r. *Malpighii, Corpus mucosum.*

**RETÉ, Reticulum; 'a net;'** *Dié'gen, (F.) Réseau.* A name given to the interlacing and decussation of blood-vessels, lymphatics, fibres, and nerves when they form a kind of network.

**RETÉ has also been applied to the epiploon**—Castelli.

**RETÉ MAJUS, Epiploon, gastro-colic.**

**RETÉ MIRABILÉ, (F.) Réseau admirable, R. merveilleux.** A name given to the ramifications and anastomoses of the internal carotid and vertebral arteries at the base of the brain.

**RETÉ MIRABILÉ vel RETÉ VASCULOSUM MALPIGHII** is the plexus formed on the cells of the lungs by the minute ramifications of the pulmonary artery.

**RETÉ MUCOSUM, Corpus mucosum.**

**RETÉ VASOULOSUM TESTIS.** An irregular plexus or network, formed by the communication of the *Vasa recta* at the upper and back part of the testicle. These *Vasa recta* are sent out at the back part of the testicle, from the convoluted seminal tubes. The *Rete Vasculosum testis* sends out from twelve to eighteen straight tubes, called *Vasa efferentia*, which convey the semen from the testes to the epididymis.

**RETENTIO, Retention**—r. *Aerea, Dyspnœa*—r. *Alvina, Constipation*—r. *Bilis, Ischocolia.*

**RETENTIO FLUXUS HÆMORRHOÏDALIS.** Suppression of the hemorrhoidal flux.

**RETENTIO FÆCÛS, Dystocia**—r. *Lactis, Ischogalactia* — r. *Lochiorum, Ischilochea* — r. *Mensium, see Amenorrhœa*—r. *Spermatia, Ischospermia*—r. *Sudoris, Hydrochesis.*

**RETENTION, Retentio, Apolop'sis, Apolop'sis, from retinere, (re, and tenere,) 'to hold back.'** Accumulation of a solid or liquid substance, in canals intended for its excretion, or in a reservoir, intended to contain it for a short period.

**RETENTION OF URINE; Paru'ria Retentio'nis vesical'is, Ischuria vesical'is, Retentio Urinæ, (F.) Réntion d'urine.** A disease in which the urine accumulated in the bladder cannot be evacuated; or, at least, cannot be passed without extreme difficulty. In the former case, the retention is said to be *complete*; in the latter, *incomplete*. Many writers have distinguished three degrees of this affection, to which they have given the names *Dysury, Strangury, and Ischury*. Retention of urine may depend upon loss of contractility, paralysis of the bladder, &c., or on some obstacle to the passing of the urine, as in cases of pressure of the womb on the bladder, of tumours in its vicinity, foreign bodies in its cavity, inflammation of the urethra, swelling of the prostate, stricture, &c. The pain is extremely violent, and the bladder may be found distended above the pubis. The treatment consists in introducing the catheter, or puncturing the bladder, and in combating the cause, which has produced the retention, by particular means adapted to each case.

**RETENTISSEMENT, Resonance**—r. *Autophonique, see Autophonia.*

**RETA UTERI, see Uterus.**

**RETICULAR**, *Retiform*, *Reticulāris*, *Retinus*, *Amphiblestroides*, *Dyotoides*, *Retiformis*, from *rete*, 'a net.' That which resembles a net. An epithet applied to many structures in the body.

**RETICULAR SUBSTANCE**, Cellular tissue.

**RETICULUM**: diminutive of *rete*, 'a net.' The *Bonnet* or *Honeycomb bag*—the second stomach of the ruminant animal. See also, *Epiploon*, and *Rete*.

**RETICULUM CUTANEUM**, *Rete mucosum*—*Mucosum*, *Rete mucosum*.

**RETIFORM**, Reticular.

**RETINA**, from *rete*, 'a net.' *Tetnica retina seu reticulāris seu retiformis seu is'tima oculi*, *Involucrum reti comparatum*, *Ventricularis membrana*, *Amphiblestroides membrana*. A soft, pulpy, grayish, semi-transparent, very thin membrane; extending from the optic nerve to the crystalline, embracing the vitreous humour, and lining the choroid; without, however, adhering to either of those parts. It terminates by a defined edge—*margo dentatus*—at the posterior extremities of the ciliary processes. It is constituted, according to most anatomists, by the expansion of the optic nerve. The retina appears formed of two laminae; so joined together, that it is almost impossible to separate them. The one—the innermost—is medullary, and pulpy; the other—the outer—is stronger, and fibro-vascular. The retina is the essential organ of vision; on it the images of objects are impressed. Both it and the optic nerve are devoid of general sensibility. They may be punctured or lacerated without pain being experienced. The nerve of general sensibility distributed to the eye is the fifth pair.

**RETINACULA MORGAGNII**, see *Frenū* of the valve of *Bauhin*.

**RETINACULUM**, from *retinere*, (*re*, and *tenere*), 'to hold back.' A surgical instrument, formerly used in the operation of castration; and in that of hernia, to prevent the intestines from falling into the scrotum.—*Scultet*. *Retinacula* are also band-like extensions of a cellulomembranous structure, which seem to suspend the ovum in its place.

**RETINACULUM**, *Bride*.

**RETINACULUM TENDINUM PERONEORUM**, *Vagina malleolaris externa*. The ligamentous sheaths that retain in situ at the outer ankle the tendons of the peroneal muscles.

**RETINITIS**, *Inflammatiō Retinæ*, *Amphiblestroiditis*, *Dietsitis*, from *retina* and *itis*, a suffix denoting inflammation,—a term of hybrid formation. Inflammation of the retina; an uncommon affection, except as an accompaniment of other forms of ophthalmia.

**RETINUS**, Reticular.

**RETORT**, *Retorta*, *Batia*, *Cornu*, *Cornuta*, *Cornesta*, *Cornumusa*, (F.) *Cornus*, from *retorqueo*, (*re*, and *torqueo*, *tortum*), 'I bend back.' A vessel, commonly of glass or earthenware, employed in distillation. It may be *plain*, or have a *tubulure* for admitting substances whilst the distillation is going on. In the latter case, it is said to be "tubulated."

**RETRACTION**, *Retractio*, from *retrahere*, (*re* and *trahere*), 'to draw back.' State of a part, when drawn towards the centre of the body or backwards;—as retraction of the testicles. Sometimes it is used synonymously

with *shortening* or *drawing up*; as in retraction of the thigh.

**RÉTRACTION DE LA MATRICE**, *Retroversio uteri*.

**RETRACTOR ANGULI ORIS**, *Buccinator*.

**RETRAHENS AURIS**, *Posterior Auris*, *Tricaudalis*, *Triceps Auris*, *Retrahens Auriculam*, *R. Auriculam*, *Secundus proprium Auriculæ*, *Bicaudalis*, *Deprimens Auriculæ*, *Proprius Auris externæ*, (F.) *Mastoido-conchiformis*, *Mastoido-oriculaire* (Ch.), *Auriculaire postérieur*. It consists of one or more small fasciculi or fleshy, thin, somewhat irregular fibres, situated behind the ear. These are attached to the mastoid process, and pass horizontally forwards, to terminate at the convexity formed by the concha of the ear. If this muscle had any use, it would carry the ear backwards.

**RÉTRECISSEMENT**, *Arctatio*, *Stricture*.

**RETRIMENTA VESICÆ**, *Urinae*.

**RETRIMENTUM**, *Excrement*.

**RETROCESSIO**, *Retrocessio*, *Retrocessus*, *Retrogressus*, from *retrocedere*, (*retro*, 'backwards,' and *cedere*, 'to give place.') The act of going back. A disappearance or metastasis of a tumour, eruption, &c., from the outer part of the body to the inner.

**RETROCESSUS**, *Retrocession*.

**RETROFLEXIO UTERI**, *Retroversio uteri*.

**RETROGRESSUS**, *Retrocession*.

**RÉTROPULSION DE LA MATRICE**, *Retroversio uteri*.

**RETROVERSIO UTERI**, *Retroversio of the Uterus*, *Ædoptosis Uteri retroversa*, *Retroflexio Uteri*, *Anapodisis* seu *Anapodismus Uteri*, (F.) *Rétroversion*, *Rétraction*, *Obliquité* ou *Rétropulsion de la Matrice*. A change in the position of the uterus, so that the fundus of the organ is turned towards the concavity of the sacrum, whilst the neck is directed towards the symphysis pubis. This displacement is commonly attended with constipation, tenesmus, and retention of urine. Its usual period of occurrence is between the third and fourth months of pregnancy; before the uterus has escaped above the superior aperture of the pelvis. In the treatment, the catheter must be regularly used twice a day, until the uterus, by its growth, rises above the pelvis. The catheter should be small, flat, and curved considerably more than common, in consequence of the distorted course of the urethra. The bowels must be kept open; and absolute rest, in a recumbent posture, be enjoined. Should it be impracticable to draw off the urine, attempts must be made to replace the uterus. The woman being on her hands and knees, the fore and middle fingers of the accoucheur's left hand are to be passed up the rectum to the fundus uteri; which they must elevate, whilst the cervix uteri is carefully depressed by two fingers of the right hand in the vagina. Should the fingers employed to elevate the fundus not be long enough to effect this object, a piece of whalebone may be substituted, having a small piece of sponge attached to one extremity as a pad.

**RÉTROVERSION DE LA MATRICE**, *Retroversio uteri*.

**REUNIO**, *Synthesis*—*r. Partium separatarum*, see *Synthesis*—*r. per Primam intentionem*, see *Intention*—*r. per Secundam intentionem*, see *Intention*—*r. Vasorum*, *Anastomosis*.

**RÉVASSERIE**, *Incoherence*; see *Somnium*.

RÈVE, Somnium.

REVEIL, see Sleep—*r. en Sursaut*, see Sleep.

REVELLENT, Derivative.

REVERY, Aphelia.

REVIVIFICATION, Resuscitation.

RÉVULSIF, Derivative.

REVULSION, *Revul'sio*, from *re*, and *vellers*, 'to pluck;' *Antis'pasia*. The act of turning the principle of a disease from the organ in which it seems to have taken its seat. Rubefacients, vesicatories, bleeding in the foot, &c., are often used for this purpose. See Derivation.

REVULSIVE, Derivative—*r.* Bleeding, see Bloodletting.

REVULSORIUS, Derivative.

REX METALLORUM, Aurum.

REYNOLDS'S SPECIFIC, see Vinum colchici.

RHA, Rheum.

RHABBARBARUM, Rheum—*r.* Album, Convolvulus mechoacan—*r.* Antiquorum, Rheum Rhabpoticum—*r.* Dioscoridis, Rheum Rhabpoticum—*r.* Monachorum, Rumex patientia—*r.* Nigrum, Convolvulus jalapa—*r.* Pauperum, Thalictron—*r.* Sibericum, Rheum—*r.* Tartaricum, Rheum—*r.* Turcicum, Rheum.

RHABARBE, Rheum—*r.* *Blanche*, Convolvulus mechoacan—*r.* *des Moines*, Rumex Alpinus.

RHABDOIDES (SUTURA), Sagittal suture.

RHABILLEUR, *Renouveau*.

RHACHETÆ, Rhachitæ.

RHACHETRUM, Medulla spinalis.

RHACHIÆI, Rhachitæ.

RHACHIAGRA, Rachisagra.

RHACHIALGIA, Rachialgia, Rhachiodynia, Spinal irritation.

RHACHIALGITIS, Spinal irritation, Myelitis.

RHACHIDAGRA, Rachisagra, Rachialgia, Rhachiodynia.

RHACHIOCYPHOSIS, Gibbositas.

RHACHIODYNIA; from *ραχις*, 'the vertebral column,' and *δύνη*, 'pain;' *Rhachial'gia*. Pain in the vertebral column.

RHACHIOMYELITIS, Myelitis.

RHACHIOPLEGIA, Paraplegia.

RHACHIOSCOLIOMA, Scoliosis.

RHACHIOSCOLIOSIS, Scoliosis.

RHACHIOSTROPHOSIS; from *ραχις*, 'the vertebral column,' and *στροφος*, 'I turn;' *Contortio columnæ vertebralis*. Duration of the vertebral column.

RHACHIOTOMUS, *Rhachiot'omum*; from *ραχις*, 'the vertebral column,' and *τομη*, 'incision.' An instrument for opening the vertebral column.

RHACHIPARALYSIS, Paraplegia.

RHACHIPHYMA, Rachiphyma.

RHACHIRRHEUMA, Lumbago.

RHACHIS, Vertebral column—*r.* Nasi, see Nasus.

RHACHISAGRA, Rachisagra.

RHACHITÆ, from *ραχις*, 'the vertebral column;' *Rhachis'is*, *Rhachit'æ*, *Rhachit'æ*, or *Rhachit'is*. The muscles of the spine.

RHACHITES, Medulla spinalis.

RHACHITIS, Rachitis—*r.* Adultorum, Molities ossium—*r.* Spinalis, Rachisagra.

RHACHITISMUS, Rachitis.

RHACHOSIS, Rachosis.

RHACHUS, *Rhacus*, *Rhagus*; from *ραχις*,

'to tear.' A wrinkle. A laceration of the skin. A lacerated ulcer—*ulcus lac'erum*.

RHACUS, Rhachus.

RHÆBOCRANIA, Torticollis.

RHAGADES, *ραγας*; *Rhaga'dia*; from *ρηγνυμι*, 'to break or rend;' *Seissu'ra*, *Fissu'ra*, *Fima*. Ruptures, chaps, or narrow and long ulcers, which form near the origin of mucous membranes, especially around the anus, and which are generally owing to the syphilitic virus.

RHAGADES, see Fissure.

RHAGÈ, *Ragè*; *rays*. Same etymon. A suffix denoting violent rupture or discharge, as in *Hemorrhago*, *Menorrhagia*, &c.

RHAGÈ, Fissure.

RHAGES, *Uva passæ*.

RHAGODEITIS, Uveitis.

RHAGOÏDES, *Rhago'des*, *Rhago'idus*, *Rhagiosus*, from *ραξ*, 'a grape;' Grape-like; as *TUNICA RHAGOIDES*: the uvea. Also, the choroid coat of the eye.

RHAGUS, Rhachus.

RHAMNUS, *Rhamnus catharticus*, *Spina cervina*, *Rhamnus solutivus*, *Spina infectoria*, *Cervisipina*, *Buckthorn*, *Purging buckthorn*, (*F.*) *Nargrus purgatif*. Family, Rhamnoides. *Sex. Syst.* Pentandria Monogynia. The berries—*Rhamni Bacca*—have a faint and disagreeable odour; and bitterish, nauseous taste. They are cathartic, and are apt to excite griping, which must be obviated by the use of diluents.

RHAMNUS ALATERNUS, *Common alaternus*, (*F.*) *Alaternus*. The leaves have been used as detergents and astringents, in the form of gargle especially.

RHAMNUS FRANGULA. The *Black Alder*, *Frangula Alnus*, *Alnus Nigra*, (*F.*) *Aune noir*, *Bourdane*, *Bourguis*. All the parts of this tree, as well as of the common alder, are astringent and bitter. The bark is most so. The inner, yellow bark of the trunk or root acts as a cathartic. It has also been employed as an anthelmintic.

RHAMNUS ZIZIPHUS, see Jujube.

RHANTER, Canthus, (greater.)

RHAPHANEDON, Raphanedon.

RHAPHANIA, Raphania.

RHAPHANUS, Raphanus hortensis.

RHAPHANUS, Raphanus hortensis.

RHAPHE, Raphe, Suture.

RHAPHOSYMPYSIS; from *ραφωσις*, 'suture,' and *συμφορις*, 'union.' Union by suture,—*as* of the bones of the cranium.

RHAPHYS, Raphanus hortensis.

RHAPONTICUM, Rheum Rhapoticum—*r.* *Vulgare*, *Centaurea centaurium*.

RHAPONTIQUE, Rheum rhapoticum.

RHAPS, Raphanus hortensis.

RHAPYS, Raphanus hortensis.

RHATANIA, *Krameria ratanhia*.

RHAX, see Vitis vinifera.

RHEGÈ, Cramp, Contusion, Laceration.

RHEGMA, Cramp, Contusion, Laceration, Rhexis—*r.* Ligamentare, Apospasma.

RHEGMUS, Cramp, Contusion, Laceration.

RHEMBASMUS, Somnambulism.

RHEMBÈ, *Rhembus*; from *ρημβειν*, 'to wander about.' Irregularity in the return of febrile paroxysms.

RHEMBUS, Rhembe.

RHENCHUS, Rattle, Snoring.

RHENXIS, Rattle, Snoring.

RHEON, Rheum.

RHETINE, Resin.

RHETINOCERON, Resinatum.

RHETINOTON, Resinatum.

RHEUM, (pronounced *room*), *Rheu'ma*, (F.) *Rhuma*; from *ρῆω*, 'to flow.' The discharge from the air passages arising from cold.

RHEUM, SALT. A popular name in the United States, like 'tetter,' for various cutaneous affections of the eczematous and herpetic forms more especially. It is at times applied to a kind of chronic psoriasis; and likewise to cutaneous affections in those who immerse the hands in metallic or acid solutions.

RHEUM, *R. palmatum*, *R. compactum*, *R. undulatum*, *Rhabar'barum*, *Rheon*, *Rha*, *Rhæum*, *Lap'athum orientale*, *L. Chinen'se*, *Rhabar'barum v'erum*, *R. Tartar'icum*, *R. Sibir'icum*, *R. Tur'icum*, *Rhubarb*, (F.) *Rhabarbe*. Family, Polygonæ. *Sex. Syst.* Enneandria Trigynia. The root—*Rheum*—is the part used in medicine. Its odour is aromatic, peculiar, and rather nauseous; taste, somewhat aromatic, sub-acrid, bitterish, and astringent. It colours the saliva and the urine yellow. It is easily pulverized, and forms a powder of a bright buff-yellow colour. Both water and spirit extract its virtues. Rhubarb root is purgative, stomachic and astringent.(?) It is chiefly used for the properties first mentioned: externally, the powder is sometimes sprinkled over ulcers, to assist their granulation. Dose, ℥j to ʒss of the powder. In a smaller dose, it is stomachic.

Numerous species of Rheum, *Rh. palmatum*, *Rh. undulatum*, and *Rh. compactum*, have purgative roots.

The rhubarbs most used in the United States are the *Chinese* or *India Rhubarb*—*Rheum Sinen'se* vel *Ind'icum*;—the *Russian*, *Turkey*, or *Bucharian Rhubarb*—*Rheum Rus'sicum* vel *Tur'icum*;—and *European Rhubarb*.

RHEUM COMPACTUM, Rheum—r. Indicum, see Rheum—r. Palmatum, Rheum—r. Ruscicum, see Rheum—r. Sinense, see Rheum—r. Turcicum, see Rheum—r. Undulatum, Rheum.

RHEUM RHAPON'TICUM, *Rhapon'tic Rhubarb*; *Rhapon'ticum*, *Rhabar'barum Dioscor'idis*, *R. Antiquo'rum*, (F.) *Rhapon'tique*, *Rhapon'tic*. The root of this seems to have been the rhubarb of the ancients. It is more astringent than that of the rheum palmatum, and less purgative; for the latter purpose, two or three drachms being required for a dose.

*French*, *Rhapon'tic* or *Krimæa Rhubarb*, is obtained from this species, as well as from *Rh. undulatum*, and *Rh. compactum*.

RHEUMA, Catarrh, Diarrhœa, Rheum, Rheumatism. Also, inflammation of a fibrous tissue,—as in rheumatism and gout.—Fuchs.

RHEUMA CATARRHALE, Bronchitis, (chronic) —r. Epidemicum, Bronchitis, chronic, Catarrh, epidemic—r. Pectoris, Catarrh—r. Uteri, Leucorrhœa.

RHEUMAPYRA, Rheumatism, acute.

RHEUMARTHRTIS, see Rheumatism, acute.

RHEUMARTHROSIS, see Rheumatism, acute.

RHEUMATALGIA, Rheumatism, chronic —r. Arthritica, see Rheumatism, acute.

RHEUMATIC, *Rheumat'icus*, (F.) *Rheumatismale*, *Rhumatique*. Belonging to rheumatism; as rheumatic fever. Also, applied to one affected with rheumatism; (F.) *Rheumatissant*.

RHEUMATISM, *Catarrhœa*; from *ρῆμα*, 'a defluxion, catarrh.' *Dolor Rheumat'icus et arthrit'icus*, (Hoffman,) *Rheumat'osis*, *Myosotis*, *Rheuma*, *Myodyn'ia*, (F.) *Rheumatismo*. A kind of shifting phlegmasia, sometimes seated in the muscles, sometimes in the parts surrounding the joints; and at others, within them. Hence the names *Muscular*, *Articular*, and *Synovial*, which have been applied to it. The disease may be *acute*, or *chronic*.

RHEUMATISM OF THE ABDOMEN, Cœliorrheuma.

RHEUMATISM, ACUTE, *Rheumat'ismus acutus*, *Rh. universalis febrilis*, *Arthro'sia acuta*, *Rheumatismus*, *Rh. inflammator'ius seu hypersthen'icus*, *Rheumat'ic Fever*, *Rheumatopyra*, *Rheumap'yra*, *Feb'ris rheumat'ica inflammato'ria*, *Syn'ocha rheumat'ica*, *Myosotis*, *Myitis*, *Cauma rheumat'ica*, *Arthrit'is rheumatismus*, *Arthro-rheumatismus*, *Synov'itis rheumatismalis*, *Hæmo-arthrit'is*, (F.) *Rheumatismo acutè*, *Fic'ens rhumatismale*, usually comes on with the ordinary symptoms of fever; soon after which, or simultaneously, or even before the appearance of febrile signs, excruciating pains are felt in different parts of the body, particularly in the larger joints, which are more or less red and swollen; the pain shifting from one to the other, at times with great rapidity. The disease rarely terminates in less than six weeks, during the greater part of which period the febrile symptoms remain severe; and what is peculiar to the disease, the skin may be covered daily with a profuse perspiration, although it feels extremely hot, and the pulse appears in no way modified by it. It is one of the essential symptoms of the affection, and consequently affords no relief. The only danger to be apprehended from acute rheumatism, notwithstanding the apparent severity of the symptoms, is the translation or extension of the disease to some internal part, especially to the heart. This tendency may always be borne in mind. *Acute* rheumatism seldom terminates in *chronic*; they who are liable to the former are rarely so to the latter, and conversely. The disease will generally run its course in spite of treatment. The usual antiphlogistic plan had better be pursued during the first days of the disease. Blood-letting may be employed, if the vigour of the patient and of the disease seem to require it; but, although the blood is generally buffy, bleeding does not usually seem to afford much relief. The bowels must be kept open; effervescent draughts be administered, and opium be given in full doses to allay pain. This is, generally, all that is necessary during the first week; after which, advantage will usually be obtained from the exhibition of the sulphate of quinia with sulphuric acid. It does not augment the excitement; and will be found proper in almost all cases. Rheumatic inflammation is very different from other varieties, and this may account for the anomaly. After a few weeks, the disease usually goes off, but leaves the patient very liable to a recurrence on slight exposures or errors of diet: at times, acute rheumatism of the joints puts on

the appearance of gout, and seems to be a complication of the two affections. It is then called *Gouty* or *Arthritic rheumatism*, or *Rheumatic gout*, *Rheumatoid'gia arthritica*, *Rheumarthrosis*, *Rheumarthritis*, *Arthritis rheumat'ica* seu *juuens'lis*.

**RHEUMATISM OF THE ARM**, *Brachiorrheuma*—*r.* Arthritic, see *Rheumatism*, acute—*r.* of the Bladder, *Cystorrrheuma*—*r.* of the Bowels, *Enterorrrheuma*.

**RHEUMATISM, CAP'SULAR**, *Rheumatis'mus capsula'ris*. Rheumatism seated in the lining membrane of the joints and bursa of the tendons. The parts most liable to its attacks are the feet and hands, where it is generally easily recognised by the enlargement of the joints; but the peculiar characters of the disease are, perhaps, most strikingly seen when it attacks the knee.

**RHEUMATISM OF THE CHEST**, *Pleurodynia*.

**RHEUMATISM, CHRONIC**, *Arthrodyn'ia chron'ica*, *Rheumatismus chronicus* seu *nonfebrilis*, *R. vulgari's* seu *inve'teratus* seu *habitua'lis* seu *frig'idus*, *Rheumatoid'gia*, *Rheumatodynia*, *Arthrodyn'ia*, *Arthritis arthrodynia*, (*F.*) *Rheumatismu's chronicu's*, *Rhumatoid'gia*, is attended with pains in the hips, shoulders, knees, and other large joints. These are, sometimes, confined to one joint; at others, shift from one to another, without occasioning inflammation, or fever. In this manner, the complaint often continues for a great length of time, and then goes off. There is no danger attendant upon it; but the patient may become lame, and is always liable to painful recurrences. Neither variety generally terminates in suppuration; but effusion of coagulable lymph is apt to occur, so as to occasion permanent thickening of the parts. The great preventive of chronic rheumatism, and one of the most valuable curative agents, is flannel, worn next the skin. The whole class of rubefacients may, also, be used with advantage. The warm bath, especially the natural warm bath, the temperature of which does not vary, is perhaps the most successful remedy of all.

**RHEUMATISM OF THE EXTREMITIES**, *Acrorrheuma*—*r.* of the Face, *Prosoporrheuma*—*r.* Gouty, see *Rheumatism*, acute—*r.* of the Heart, *Cardiorrheuma*—*r.* of the Leg, *Scelorrheuma*—*r.* of a Limb, *Merorrrheuma*—*r.* Local, *Merorrrheuma*—*r.* of the Loins, *Lumbago*—*r.* of the Neck, *Torticollis*—*r.* Partial, *Merorrrheuma*—*r.* of the Skin, see *Dermalgia*—*r.* Topical, *Merorrrheuma*.

**RHEUMATISM, PNEUMON'IAL**, (*F.*) *Rheumatismu's pre'abdominal*. Rheumatism of the muscles of the anterior and lateral portions of the abdomen; supposed by MM. Gènest and Requin to be the same as the *nervous affection of the peritonæum* of Gooch.

**RHEUMATISM OF THE UTERUS**, *Metrorrrheuma*—*r.* Weed, *Pyrola maculata*, *P. umbellata*.

**RHEUMATISMUS ABDOMINIS**, *Coeliorrheuma*—*r.* Acutus, *Rheumatismus*, acute—*r.* Brachii, *Brachiorrheuma*—*r.* Cancerosus, *Neuralgia faciei*—*r.* Cervicis, *Torticollis*—*r.* Colli, *Torticollis*—*r.* Cordis, *Cardiorrheuma*—*r.* Cruris, *Scelorrheuma*—*r.* Dorsalis, *Lumbago*—*r.* Extremitatum, *Acrorrrheuma*—*r.* Faciei, *Prosoporrheuma*—*r.* Febrilis, *Dengue*—*r.* Inflammatorius seu hypersthenicus, *Rheumatismus acutus*—*r.* Intestinorum, *Enterorrrheuma*—*r.* Intestinorum cum ulcere, *Dysentery*—*r.* Larvatus, *Neuralgia fa-*

*ciei*—*r.* Localis, *Merorrrheuma*—*r.* Membrorum singulorum, *Merorrrheuma*—*r.* Non febrilis, *Rheumatismus*, acute—*r.* Partialis, *Merorrrheuma*—*r.* Pectoris, *Pleurodynia*—*r.* Phlegmonodes, *Myositis*—*r.* Spurius nervosus, *Neuralgia*—*r.* Universalis febrilis, *Rheumatismus*, acute—*r.* Uteri, *Metrorrrheuma*—*r.* Vesicæ urinariæ, *Cystorrrheuma*—*r.* Vulgaris seu inveteratus seu habitualis seu frigidus, *Rheumatismus*, chronic.

**RHEUMATODYNIA**, *Rheumatismus*, chronic.

**RHEUMATOPHTHAL'MIA**, *Rheumatophthal'mia*; from *ρευμα*, 'rheumatism,' and *οφθαλμια*, 'inflammation of the eyes.' Rheumatic ophthalmia.

**RHEUMATOPYRA**, *Rheumatismus*, acuta.

**RHEUMATOSIS**, *Rheumatismus*.

**RHEUMOPHTHALMIA**, *Rheumatophthalmia*, *Sclerotitis*.

**RHEXIS**, *Rhexis*, *Diruptio*, *Ruptio*, *Ruptura*, *Rupture*. Rupture of a vessel or organ. Spontaneous opening of an abscess.

**RHEXIS OC'ULI**. Bursting of the eye from any cause; spontaneous or excited.

**RHICNOS'IS**, from *ρυτινωμα*, 'to become wrinkled;' *Cutis corrugatio*. Wrinkling of the skin from extenuation of the body; opposed to *επιπλοσις*, or distension from repletion.

**RHIGOS**, Rigor.

**RHIN**, Nasus.

**RHINAL'GIA**, *Rhinodynia*, from *ριν*, 'the nose,' and *αλγος*, 'pain.' Pain in the nose.

**RHINAL'GIA AB INTRU'SIS**. Pain in the nose from foreign bodies.

**RHINALGIA VERMINOSA**. Pain in the nose from worms.

**RHINAN'CHONE**, *Rhinang'ia*, *Rhinostegno'sis*; from *ριν*, 'the nose,' and *αγχονη*, 'narrowness.' Contraction of the nose. Snuffles.

**RHINANGIA**, *Rhinanchone*, Snuffles.

**RHINCHOS**, Rostrum.

**RHINENCEPHALIA**, Cyclopia.

**RHINEN'CHYSIS**, *Rhynenchysis*, from *ριν*, 'the nose,' *εν*, 'in,' and *χυω*, 'I pour.' An infusion or injection, made into the nostrils, with a syringe called *Rhinen'chistes*.

**RHINES**, Nares.

**RHINITIS**, *Nasitis*, from *ριν*, *ρινος*, 'the nose,' and *ιτις*, denoting inflammation. Inflammation of the nose. Coryza.

**RHINITIS ULCEROSA**, *Ozæna*.

**RHINOBLENNORRHOEA**, *Rhinorrhœa*.

**RHINOC'ACE**, *Coryza scarlatino'sa*; from *ριν*, 'the nose,' and *κακος*, 'evil.' The offensive discharge from the nose, and other symptoms indicating a morbid condition of the Schneiderian membrane that accompany the worst forms of scarlatina.

**RHINOCATARRHUS**, Coryza.

**RHINOCNES'MUS**, from *ριν*, 'the nose,' and *ενημερος*, 'itching.' Itching of the nose.

**RHINODYNIA**, *Rhinalgia*.

**RHINOPHONIA**, from *ριν*, 'the nose,' and *φωνη*, 'the voice.' A nasal voice, called, also, *Dysphonia immodulata nasalis*, *Paraphonia nasalis*, *Paraphonia resonans*, *Psallidimus nasalis*, *Myserophon'ia*, *Nasitas*, *Vox nasalis*, *Paralalia nasalis*. Speaking through the nose.

**RHINOPLASTIC**, *Rhinoplastica* (*ars*) from *ριν*, 'the nose,' and *πλαστρον*, 'I form.' An epithet applied to the operation for forming a new nose. The *Talpacotian operation*, so called

because described by Tagliacozzi. It consists in bringing down a portion of flesh from the forehead, and causing it to adhere to the anterior part of the remains of the nose.

**RHINOPTIA**, from  $\rho\iota$ , 'the nose,' and  $\sigma\tau\alpha\mu\alpha$ , 'I see.' The act of seeing over the nose. Squinting over the nose.

**RHINORRHAGIA**, Epistaxis.

**RHINORRHAPHY**, *Rhinorrhaph'ia*, from  $\rho\iota$ , 'nose,' and  $\epsilon\sigma\phi\eta$ , 'a suture.' An operation for the removal of epicanthus, which consists in pinching up a longitudinal fold of the skin, including this fold in two elliptical incisions, removing it, and bringing together the edges of the wound by harelip suture.

**RHINORRHEA**, *Rhinoblenorrhoea*, from  $\rho\iota$ ,  $\epsilon\iota\sigma$ , 'the nose,' and  $\epsilon\iota\omega$ , 'I flow.' A discharge of limpid mucus from the nose without any inflammatory symptom. A gleet from the nose.

**RHINO-SIS**, from  $\epsilon\iota\sigma$ , 'a skin, leather,' or from  $\epsilon\iota\sigma\tau\omicron\varsigma$ , 'rugous.' The state of looseness and excess of skin observed in phthisis.—Vogel.

**RHINOSTEGNOSIS**, Rhinanchone.

**RHIPTASMOS**, Jactation.

**RHIPTOLUSIA**, Affusion.

**RHIS**, Nasus.

**RHIZA**, Radix.

**RHIZAGRA**, Punct.

**RHIZOMA**, *Rhizome*: from  $\epsilon\iota\tau\alpha$ , 'a root.'

The part of the root of a plant, which consists of wood or flesh, as in the carrot.

**RHIZOPHAGUS**, from  $\epsilon\iota\tau\alpha$ , 'a root,' and  $\phi\alpha\gamma\omega$ , 'I eat.' One who lives on roots.

**RHIZOTOMIST**, see Simples.

**RHIZOTOMUS**, Apothecary.

**RHOA**, *Punica granatum*.

**RHODELÆON**, *Oleum rosa'rum*. Oil of roses, or oil impregnated with roses.

**RHODIA**, *Rhodiola rosea*, *Rosa*, *Rosswort*, (F.) *Rhodiole*. *Sez. Syst.* Diœcia Octandria. The root, *Rosswort*, when dry, has a very pleasant smell, and is slightly astringent. It is not used.

**RHO'DINUS**, *Rho'dius*, *Rosa'ceus*, *Ro'seus*, *Rosa'tus*. Rosey. Formed of, or containing, roses.

**RHODIOLA ROSEA**, *Rhodia*.

**RHODIOLE**, *Rhodia*.

**RHODITES VINUM**. Wine in which roses have been macerated.

**RHO'DIUM LIGNUM**, *Rhodium* or *Rosswood*. The wood or root of a tree supposed to be *Genista Canariensis* of Linnæus. (F.) *Bois de rose*, *Bois de Chypre*. *Family*, Leguminosæ. *Sez. Syst.* Diadelphica Decandria.—The essential oil is a perfume, and possesses cordial and tonic virtues. Its smell is attractive to fish, rats, &c.

**RHODIUS**, *Rhodium*.

**RHODODAPHNIS**, *Nerium oleander*.

**RHODODENDRON CHRYSANTHEMUM**, *R. Chrysanthum*; the *Oleander*, *Rose Bay*, *Yellow rhododendron*, *Mountain Laurel*, (F.) *Rosage*, *R. Chrysantha*. *Nat. Ord.* Ericæ. *Sez. Syst.* Decandria Monogynia. This plant has been recommended in rheumatism, gout, and syphilis. In an overdose, it produces acro-narcotic symptoms.

**RHODOMELA PALMATA**, *Dulse*, *Saccharinus Fucus*. One of the Alge eaten in large quantities throughout the maritime countries of

the north of Europe, and in the Grecian Archipelago.

**RHODOMELI**, *Mel rosæ*.

**RHODON**, *Rosa centifolia*.

**RHODOSACCHARUM**, *Confectio rosæ gallicæ*.

**RHODOSTACTON**, *Mel rosæ*.

**RHODOSTAGMA**, *Aqua rosæ*.

**RHŒA**, *Punica granatum*.

**RHŒAS**, *Papaver rhœas*.

**RHOEBDESIS**, Absorption.

**RHŒUM**, *Rheum*.

**RHOGMOS**, *Rattle*.

**RHOI'TES**,  $\rho\omicron\tau\eta\varsigma$ ; a wine impregnated with the pomegranate; from  $\rho\omicron\sigma\varsigma$ , *Pomegranates*.—Dioscorides. A confection, made by boiling the juice of the pomegranate in honey.—Paulus of Ægina.

**RHOMBOÏDEUS**, from  $\rho\omicron\mu\beta\omicron\varsigma$ , 'a rhombus,' whose sides are equal, with two obtuse and two acute angles. *Rhomboides major* and *minor*, *Rhomboides Cervici-dorsæ-scapularis*. A muscle situate at the posterior inferior part of the neck, and at the posterior part of the back. It has a rhomboidal shape, and is attached, by its inner edge, to the posterior cervical ligament, and to the spinous processes of the last cervical vertebra, and of the first four or five dorsal. By its outer edge, it is attached to the spinal or posterior edge of the scapula. It is divided into two fasciæ, constituting the *Rhomboides major* and *minor*, the latter being situate higher than the other. This muscle draws the scapula backwards and upwards, and impresses upon it a rotary motion, which brings its inferior angle nearer to the spine; and, consequently, depresses the anterior angle and the shoulder.

**RHOMBOS**,  $\rho\omicron\mu\beta\omicron\varsigma$ . A bandage mentioned by Galen, so called on account of its rhomboidal shape.

**RHONCHUS**, *Rattle*, *Snoring*, *Stertor*—r. *Crepitans*, *Râle crépissant*—r. *Mucosus*, see *Râle crépissant*—r. *Sibilans*, see *Râle crépissant*—r. *Sonorus*, *Râle sonore*—r. *Subcrepitant*, see *Rattle*.

**RHOPALISMUS**, *Priapismus*.

**RHOPALOSIS**, *Plica*, *Pupil*, *Uvea*.

**RHOPE**, *Congestion*.

**RHOTACISMUS**, *Rotacism*.

**RHUBARB**, *Rheum*—r. *Chinese*, see *Rheum*—r. *French*, *Rheum Rhaponticum*—r. *India*, see *Rheum*—r. *Krimea*, *Rheum Rhaponticum*—r. *Monk's*, *Rumex Alpinus*, *Rumex patientia*—r. *Poor man's*, *Thalictron*—r. *Rhapontic*, *Rheum rhaponticum*—r. *Russia*, see *Rheum*—r. *Turkey*, see *Rheum*—r. *Wild*, *Convolvulus panduratus*.

**RHUBARBE FAUSSE**, *Thalictron*—r. *des Pauvres*, *Thalictron*.

**RHUE**, *Ruta*.

**RHUMATALGIE**, *Rheumatism*, *chronic*.

**RHUMATIQUE**, *Rheumatic*.

**RHUMATISANT**, *Rheumatic*.

**RHUMATISMALE**, *Rheumatic*.

**RHUMATISME**, *Rheumatism*—r. *Aigu*, *Rheumatism acute*—r. *Chronique*, *Rheumatism*, *chronic*—r. *Præabdominale*, *Rheumatism*, *præabdominal*—r. *de l'Utérus*, *Metroorrhœuma*.

**RHUME**, *Rheum*—r. *de Corvean*, *Coryza*—r. *de Poitrine*, *Catarrh*.

**RHUS CORIARIA**, *Sumach*, *Shumack*, *Rhus Glabrum*, *Adu'rion*, *Elm-leaved Sumack*, (F.) *Sumac des Corroyeurs*. *Family*, *Terebintha-*

com. *Sex. Syst.* Pentandria Monogynia. This is the only species of the genus rhus that is innocent. Both the leaves and berries have been used as astringents and tonics.

RHUS GLABRUM, Rh. coriaria.

RHUS RADICANS, *Rhus vernix, Poison vine, (America.)* This plant is poisonous, (see Poisons, Table of,) and is extremely acrid, when applied to the skin, producing erysipelas and vesications, and has been used, like the next variety, in paralysis and other nervous affections.

RHUS SYLVESTRIS, Myrica glae.

RHUS TOXICODENDRON, *Toxicodendron, Poison oak (America), (F.) Sumac venenosa.* This plant has been used in paralytic affections and cutaneous eruptions. It is poisonous, like the last. Dose, gr. ss to gr. iv.

RHUS VERNIX, Rh. radicans.

RHYPARIA, Rupia, Sordes primarium viarum.

RHYPOS, Sordes.

RHYPTICA, Detergents.

RHYPTICUS, Abstergent.

RHYSIS, Flux.

RHYSMUS, Rhythm.

RHYSSEMA, Wrinkle.

RHYTHM, *Rhythmus, Rhysmus*, 'measured movement.' The order, or proportion, which reigns between the different parts of a whole. Applied, in medicine, to the pulsations of the heart—to the pulse—to express the due proportion between one pulsation and those following it.

RHYTHMICAL CONTRACTIONS OF MUSCLES, are those that succeed one another after regular intervals.

RHYTHMUS, Rhythm.

RHYTIDOSIS, Rutidosis.

RIB, Costa—r. False, see Costa—r. Floating, see Costa—r. Sternal, see Costa—r. True, see Costa.

RIBES NIGRUM, *Cassis*. The *Black currant, (F.) Grossillier noir.* *Sex. Syst.* Pentandria Monogynia. The berries have been recommended in sore throat, as diuretics. The leaves have been advised for the same purpose. They are chiefly used as preserves.

RIBES RUBRUM, *Grossularia non spinosa*, the *red currant, (F.) Grossillier rouge*; of which the *white* is only a variety. It is cultivated, and affords an agreeable fruit. It possesses the qualities of the subacid fruits in general, and makes an excellent preserve.

RIBS, NECK OF THE, Collum costarum.

RICE, Oryza—r. Disease, Cholera—r. Wild, Zizania aquatica.

RICHARDSONIA, see Ipecacuanha.

RICHLEAF, Collinsonia Canadensis.

RICHWEED, Actæa racemosa, Ambrosia trifida, Collinsonia Canadensis.

RICIN, Ricinus communis.

RICINOIDES, Jatropha curcas.

RICINUS COMMUNIS. The *Castor oil plant, Cataputia major, Ricinus vulgæris, Palma Christi, Faba purgatrix, Cerua* or *Korus, Cici*, (F.) *Ricin, Fève purgative*. Family, Euphorbiaceæ. *Sex. Syst.* Monœcia Monadelphica. Castor-oil seeds, whence the oil is obtained, are inodorous; taste acrid and slightly sweetish. One or two seeds will act as a cathartic; but the oil, *Oleum ricini, O. infernale*, (F.) *Huile de Ricin*, is alone used. It is obtained by bruising the castor seeds, previously

decorticated, and then expressing the oil without the application of heat. Recently drawn castor oil, *Oleum de kerdâ, O. kerri-num, Akker'va, Oleum Ricini, O. Cid'inum, O. Palma liquidum*, is inodorous and nearly insipid. It is cathartic, operating speedily, and may be used in all cases where powerfully stimulating purgatives would be injurious. Dose, f. ʒj to f. ʒiiss. Hufeland recommends that a drop of the croton oil shall be added to an ounce of the oil of poppy, and that the mixture shall be called *Oleum Ricini Officinale*.

A variety of Ricinus at Cape Verd is employed by the inhabitants to increase the secretion of milk. It is applied in the form of poultice, made with the green leaves, to the mammae, or of a strong decoction, with which the mammae and the external parts of generation are washed.

RICINUS MAJOR, Jatropha curcas—r. Minor, Jatropha manihot.

RICKETS, Rachitis.

RICTUS LUPINUS, see Harelip.

RIDE, Wrinkle.

RIDING, (of Bones.) *Ossium superpositio*, (F.) *Chevauchement*. Displacement of the fragments of a bone, chiefly produced by the contraction of muscles, which occasions shortening of the limb; the fractured extremities riding over each other, instead of being end to end.

RIGIDITAS, Rigidity.

RIGIDITAS ARTICULORUM, *Ancylosis spuria*. Stiffness of the joints. False ancylosis.

RIGIDITY, *Rigiditas*, from *rigere*, 'to stiffen.' Great stiffness of fibre, or want of suppleness. The stiffness of the dead body, (F.) *Roideur cadaverique*, is one of the most certain signs of the cessation of life.

RIGOR, *Rhigos, Algor, Coldness, Chæmia*, (F.) *Frisson*. Same etymon. Sensation of cold, with involuntary shivering of the whole body;—a symptom of fever. A slighter degree, and at times full rigor, is occasionally termed a *chill, frigus tenax, perfrigeratio*.

RIGOR ARTICULI, Contractura—r. Cadaverosus, Rigor mortis—r. Corporis mortui, Rigor mortis—r. Emortualis, Rigor mortis—r. Maxillæ inferioris, Trismus.

RIGOR MORTIS, *R. corporis mortui, R. cadaverosus, R. emortualis, Necronaræ*, (F.) *Roideur* ou *Raideur cadaverique*. 'Stiffness of death.' Death stiffening. The rigidity of limbs that occurs on dissolution.

RIGOR NERVORUM, Tetanus—r. Nervosus, Tetanus.

RIMA, *Schisma, Schiza*. A fissure, a cleft; as *Rima*, or *Rimula Glottidis* seu *Laryngis*, 'the opening of the glottis.' *Rima vulvæ, R. magna, Introitus, Sinus vulvæ, Scaphæ, Scaphus* seu *Fissura magna* seu *Scissura vulvæ, Schiza*, 'the opening of the vulva.' See Vulva.

RIMA CANALIS ORBITARII, Suborbital fissure—r. ad Infundibulum, Vulva cerebri—r. Laryngis, Rima glottidis—r. Magna, Vulva, see Rima.

RIMÆ, Rhagades.

RIMULA GLOTTIDIS, Rima glottidis—r. Laryngis, Rima glottidis.

RINÆUS, Compressor naris.

RINCHOS, Rostrum.

RING, Sax. *hring, ring*, Germ. Ring, *Cricos*, (F.) *Anneau*. A name given to natural,

circular, or roundish apertures, with muscular or sponenrotic parietes, which serve for the passage of some vessel or canal—as the *umbilical ring, inguinal ring, &c.*

**RINGWORM**, *Herpes circinatus*—*r.* of the Scalp, *Porrigo scutulata*—*r.* Ulcerative, *Herpes exedens*—*r.* Vesicular, *Herpes præputii*.

**RIRE** ou **RIS**, *Risus*—*r.* *Canin*, Canine laugh—*r.* *Moqueur*, Canine laugh—*r.* *Sardonien*, *Risus sardonicus*—*r.* *Sardonien*, Canine laugh—*r.* *Sardonique*, Canine laugh.

**RISAGON**, Cassumuniar.

**RISIGALLUM**, Orpiment.

**RISING**, see *Regurgitation*—*r.* of the Lights, *Cynanche trachealis*.

**RISING OF ELEVATION OF THE PULSE**, *Pulsus elevatio*. The pulse is said to rise, when it becomes more full and frequent, as occurs in the exacerbation of acute diseases.

**RISO'RIOUS NOVUS**. Santorini gives this name to a portion of the *platysma myoides*, which passes from the cheek towards the commissure of the lips.

**RISSIGALLUM**, Orpiment.

**RISUS**, from *ridere, risum*, 'to laugh.' *Gelus, Laughing, Laughter, Laugh*, (F.) *Rire ou Ris*. An involuntary movement of the muscles of the face, and of the lips in particular, accompanied with a sonorous and interrupted respiration, commonly indicating mirth and satisfaction.

**RISUS APIUM**, *Ranunculus sceleratus*—*r.* *Caninus*, Canine laugh—*r.* *Involuntarius*, Canine laugh—*r.* *Sardonicus*, Canine laugh—*r.* *Spasticus*, Canine laugh.

**RIVER WEED**, *Conferva rivalis*.

**RIZ**, *Oryza*.

**ROAN TREE**, *Sorbus acuparia*.

**ROB**, *Roob, Robub, Rohob, Rohab*, (F.) *Extrait des fruits*. This word, of Arabic extraction, means the juice of any fruit thickened to the consistence of honey by evaporation, before it has fermented. The juice of the grape, boiled to this consistence, was called *Sapa*, and, when not quite so thick, *Defrutum*.

**ROB CYNOSBATUS**, *Confectio rosæ caninæ*—*r.* *ex Moris*, *Diamorion*—*r.* *Nucum*, *Diacaryon*.

**ROBIN RUN-AWAY**, *Glechoma hederacea*.

**ROBINIA AMA'RA**, *Familly, Leguminosæ. Sax. Syst. Diadelphia Decandria*. The roots of the *Robinia amara* of Cochin China are bitter, and have been recommended, especially in that country, in diarrhœa and dyspepsia.

**ROBINIA PSEUDO-ACA'CTIA**, *Locust tree*; native of America. The flowers are said to possess antispasmodic properties.

**ROBORANS**, *Corroborant*.

**ROBORANTIA**, *Tonica*.

**ROBUB**, *Rob*.

**ROCCELLA**, *Lichen roccella*.

**ROCHE'S EMBROCATION FOR HOOPING-COUGH**. An empirical preparation, composed of *ol. oliv. ꝥxvi, ol. succin. ꝥviii, ol. cardyoph. q. s.* to scent it strongly.

**ROCHER**, see *Temporal bone*.

**ROCHETTA ALEXANDRINA**, *Soda*.

**ROCKET**, *GARDEN*, *Brassica eruca*—*r.* *Roman*, *Brassica eruca*.

**ROCK ROSE**, *Helianthemum Canadense*.

**ROCCOU**, *Terra Orleana*.

**ROGNE**, *Psora*.

**ROHAB**, *Rob*.

**ROHENA BARK**, *Swietenia*.

**ROHOB**, *Rob*.

**ROIDEUR CADAVERIQUE**, *Rigor mortis*.

**ROISDORFF**, *MINERAL WATERS OF*. Alkaline waters in Germany, which contain carbonic acid and carbonate of soda.

**ROLLER**, *Bandage, Fascia*.

**ROMARIN**, *Rosmarinus*—*r.* *Sauvage*, *Ledum sylvestre*.

**ROME**, (*CLIMATE OF*.) The climate of Rome, as regards its physical qualities, is considered to be one of the best in Italy. It is peculiarly still; and, hence, has been esteemed valuable as a winter climate in pulmonary diseases, and for invalids generally, as it admits of their taking exercise in the open air at a lower temperature than they otherwise could do. In the early stages of consumption, Sir James Clark generally found the climate favourable.

**ROMPEURE**, *Hernia*.

**RONCE**, *Rubus idæus*—*r.* *Bleus*, *Rubus cæsius*—*r.* *de Montagne*, *Rubus chamæmorus*—*r.* *Noire*, *Rubus fruticosus*.

**RONCHUS**, *Snoring, Stertor*.

**ROUND**, *Round*—*r.* *Grand*, *Teres major*—*r.* *Petit*, *Teres minor*.

**RONFLEMENT**, *Snoring, Stertor*, see *Rattle*—*r.* *de Diable*, *Bruit de Diable*.

**ROOB**, *Rob*.

**ROOF OF THE MOUTH**, *Palate*.

**ROOT**, *Radix*—*r.* *Ague*, *Aletris farinosa*—*r.* *Bitter*, *Pocynum androsemfolium*—*r.* *Canada*, *Asclepias tuberosa*—*r.* *Red*, *Celastrus*—*r.* *Rough*, *Liatris*—*r.* of *Scarcity*, *Beta hybrida*—*r.* *Squaw*, *Actæa racemosa*—*r.* *Sweet*, *Acorus calamus*—*r.* *Unicorn*, *Aletris farinosa*—*r.* *Yellow*, *Xanthoriza apiifolia*—*r.* *Yellow*, *Jeffersonia Bartoni*.

**ROPE BARK**, *Dircia palustris*.

**ROQUETTE**, *Brassica eruca*, *Soda*.

**RORELLA**, *Drosera rotundifolia*.

**RORIFEROUS**, *Ror'ifer*, (F.) *Rorifère*, from *ros*, 'dew,' and *ferro*, 'to carry.' Epithet given to vessels which pour exhaled fluids on the surface of organs.

**RORIFEROUS DUCT**, *Thoracic duct*.

**ROS**, *Sperm*—*r.* *Calabrinus*, *Fraxinus ornus*—*r.* *Solis*, *Drosera rotundifolia*.

**ROSA**, *R. centifolia*.

**ROSA ALBA**. The *White Rose*, (F.) *Rosier blanc*. *Family, Rosacæ. Sax. Syst. Icosandria Polygynia*. The flowers of this species possess similar but inferior qualities to the damask.

**ROSA CAN'INA**; *R. sylvestris*, *Cynor'rhodon*, *Caninus bus*, *Caninus Sentsis*, *Cynocyt'isus*, *Cynospas'tum*, *Cynos'batus*, *Dog Rose*, *Wild Brier*, *Hip Tree*, (F.) *Rose du chien*, *Eglantier de chien*, *E. sauvages*. The fruit of this variety, called *Heps* or *Hips*, has a sourish taste, and is formed into a conserve. See *Confectio cynosbati*. It is seldom employed, except to give form to more active remedies; as to pills, boluses, linctuses, &c.

**ROSA CENTIFOLIA**; *Hecatomphylla*, *Damask Rose*, *Rosa Damasc'na*, *R. Pal'lida*, (F.) *Rosier à cent feuilles*, *Rhodon*, *Rosa*. The petals of this rose have an extremely fragrant odour, and subacidulous taste. They are laxative; but are scarcely used for any purposes except for the distillation of rose-water, *Oil of Roses*, *Oldum Rosa*, and the formation of a syrup.

ROSA DAMASCENA, R. centifolia.

ROSA GAL'LICA; *Red Rose, Rosa rubra*, (F.) *Rosier de Provins*. The petals of this variety are astringent; and are used in infusion, conserve, &c.

ROSA PALLIDA, R. centifolia—r. Rubra, R. Gallica—r. Saltana, Essera—r. Sylvestris, R. canina.

ROSACE, Roseola.

ROSACEUS, Rhodinus.

ROSAGE, Rhododendron chrysanthemum.

ROSAGO, Nerium oleander.

ROSALIA, Scarlatina.

ROSALIE, Scarlatina.

ROSATUS, Rhodinus.

ROSE, Erysipelas—r. Christmas, Helleborus niger—r. Corn, Papaver rhœas—r. Damask, Rosa centifolia—r. Dog, Rosa canina—r. Dog, conserve or confection of, Confectio rossæ canina—r. *du chien*, Rosa canina—r. Rash, Roseola—r. Red, Rosa Gallica—r. White, Rosa alba.

ROSEA, Rhodia.

ROSEALM SCARLET, Monarda coccinea.

ROSE DROP, Gutta rosea.

ROSELLINA, Roseola.

ROSEMARY, Rosmarinus—r. Marsh, Statice limonium, and S. Caroliniana.

ROSENHEIM, MINERAL WATERS OF. Rosenheim is 34 miles S. E. from Munich in Bavaria. The waters contain sulphuretted hydrogen, carbonic acid, carbonate of lime, chlorides of calcium and magnesium, carbonate of soda, and oxide of iron. They are used as tonics.

ROSEOLA, *Exanth'sis Roseola, Rose Rash*, (F.) *Roséole, Eruption anomale, Rosace, Fièvre rouge, Efflorescences érysipélateuse*. An efflorescence in blushing patches, gradually deepening to a rose-colour, mostly circular or oval; often alternately fading and reviving; sometimes with a colourless nucleus; and chiefly on the cheeks, neck, or arms. It is frequently found, as a symptom, in dentition, dyspepsia, rheumatism, &c., and is of no consequence. See Roseola, Rubeola and Scarlatina.

ROSEOLA ACNOSA, Gutta rosea.

ROSEOLA ÆSTIVA. The affection which prevails in summer. The eruption is a darker colour, and is attended with more itching.

ROSEOLA ANNULATA. Characterized by patches in the form of rose-coloured rays, with central areas of the colour of the skin.

ROSEOLA FICOSA, Sycosis—r. Variolosa, Roseola.

ROSEOLÆ, Roseola, Rosell'na, *Fausse measles, French measles*, (F.) *Roséole, Fausse rougeole*. This name is also given by some to an acute exanthem, mid-way between measles and scarlatina, and which belongs to neither one nor the other, as it affords no protection against either. It is, also, termed *Rubeola* by some. An eruption which often precedes that of small pox is termed *Roseola Variolosa*.

ROSOLE, Roseola, Roseolæ.

ROSE PINK, Chironia angularis.

ROSES, MILK OF. A cosmetic wash, formed, according to one method, of *subcarbonate of potass*, gr. vj; *oil of almonds*, ℥i; *essence of bergamot*, ℥ij; *aquæ rosea*, ℥iij; *orange flower water*, ℥ij. Mix.

ROSEUS, Rhodinus.

ROSEWOOD, Rhodium lignum.

ROSEWORT, Rhodia.

ROSIER BLANC, Rosa alba—r. *à Crut feuilles*, R. centifolia—r. *de Provins*, Rosa Gallica.

ROSIN, BLACK, Colophonia—r. Brown, Colophonia—r. White, see Pinus sylvestris—r. Yellow, see Pinus sylvestris.

ROSIO STOMACHI, Cardialgia—r. Ventriculi, Cardialgia.

ROSMARINUM, Rosmarinus.

ROSMARINUS, R. *officina'lis, Alchaehel, R. hortensis, Libanotis coronaria, Dendrolibanus, Rosemary*, (F.) *Rosarin. Family, Labiata. Sex. Syst. Diandra Monogynia*. The tops of this plant, *Rosmarinus*, (Ph. U. S.) *Herba Anthis*, have a fragrant, grateful smell; and an aromatic, warm, bitterish taste, which is dependent upon an essential oil, combined with camphor. Rosemary has been recommended in nervous headaches, in the form of infusion. It is now rarely used, except for its odour. The flower is called *Anthis, ardec*. Its oil—*Oleum Rosmarini*—is official. From two to six or ten drops are given in nervous complaints rubbed up with sugar.

ROSMARINUS SYLVESTRIS, Ledum sylvestre.

ROSSALIA, Scarlatina—r. Squamosa, Scarlatina.

ROSSOLIO, see Spirit.

ROSTRUM, *Rhinchos, Rinchos, Ramphos*, 'a beak.' (F.) *Bec*. A name given to several old fowls, on account of their resemblance to the beaks of different birds. The principal were the *Rostrum corv'num, anat'num, psittaci'num, vultur'num, cyg'neum* vel *olor'num, grui'num, lacerti'num*, &c.

ROSTRUM EXTERNUM, Olecranon—r. Porcinum, Acromion—r. Posterius, Olecranon—r. Sphenoidale, Azygos processus.

ROSY BUSH, Spiræa tomentosa—r. Drop, Gutta rosea—r. Whelk, Gutta rosea.

ROT, Eructation—r. Grinders', Asthma, grinders'.

ROTACISM, *Rotacism'us, Rhotacism'us, Psellism'us rhotacism'us*, (F.) *Grassyeoment*. A vicious pronunciation of the Greek, *α, Rau*, common in the northern parts of England; especially near Newcastle.

RÔTACISMUS, *Grassyeoment*.

ROTATOR, from *rota*, 'a wheel.' A name given to several muscles that turn the parts to which they are attached upon their axes;—such as, the oblique muscles of the eye, the pronators and supinators, &c.

ΡΟΤΑΤΟΡ, Trochanter.

ROTATOIRES FEMORIS, Obturatores—r. Oculi, Oblique muscles of the eye.

ROTULA, Patella, Trochiscos—r. Genu, Patella.

ROTULE, Patella.

ROTUNDUS, Round.

ROUCOU, Terra Orleansa.

ROUEN, MINERAL WATERS OF. This water, known under the name, *Eau des fontaines de la Marguerite*, is cold, and contains carbonate of iron, carbonic acid, carbonate of lime, chloride of calcium, &c. It is tonic.

ROUGE, Colcothar—r. *D'Angleterre*, Colcothar.

ROUGEOLE, Rubeola—r. *Fausse, Roseolæ*.

ROUGH ROOT, Liatris.

ROUILLE, Rubiginous.

**ROUND, Teres, Rotundus, (F.) Rond.** Anatomists have given this name to many organs whose fibres are collected in round fasciculi. See Teres.

**ROUND FORAMEN, Foramen rotundum.** A foramen of the sphenoid bone, a little behind the *foramen lacrum superius*, which gives passage to the second branch of the 5th pair of nerves, called *superior maxillary*.

**ROUND LIGAMENTS OF THE UTERUS, Ligamenta rotunda Uteri, (F.) Cordons suspensifs, (Ch.), Cordons vasculaires, Ligaments ronds de l'utérus.** Two cords, which arise from the lateral and superior parts of the uterus, whence they proceed towards the abdominal rings, which they pass through, and terminate by vanishing in the cellular tissue of the groins, mons veneris, and labia majora. These cords are whitish, flattened, and narrower in the middle than at the extremities. Their fibres which are longitudinal, are apparently albugineous.

**RUBBER, INDIAN, Caoutchouc.**

**RUBE'DO, Rubor.** Redness; from *rubere*, 'to be red.' A diffused, but not spotted, redness on any part of the skin; like that which arises from blushing. Blushing.

**RUBEFA'CIENT, Erasthis'ma, Erasthis'ticum, Rubefaciens, from rubens, 'red,' and facio, 'I make.' (F.) Rubéfiant.** That which produces redness. A medicine, which causes redness of the skin. The action is called *Rubefaction*.

**RUBÉFIANT, Rubefaciens.**

**RUBE'OLA, Rubcola vulgaria, from rubere, 'to be red.' Rose'olæ, Exanth'esis Rubcola, Vetera'na, Blac'cia, Bovil'la, Morbil'li, Scarlati'na pustulo'sa, S. Milia'ris, Febris morbillo'sa, Typhus morbillosus, Phanicis'mus, Ecphy'mata, Measles; (F.) Kougiolè, Fièvre morbillose.** One of the major exanthemata; generally affecting individuals but once, and produced by specific contagion. The rash usually appears on the 4th, but sometimes on the 3d, 5th, or 6th day of a febrile disorder; and, after a continuance of four days, gradually declines with the fever. The disease generally commences from 10 to 14 days after the contagion has been received. The eruption first shows itself in distinct, red, and nearly circular spots, somewhat less than the ordinary areolæ of flea bites. As these increase in number, they coalesce; forming small patches of an irregular figure, but approaching nearest to that of semicircles or crescents. These patches are intermixed with single, circular dots and with interstices of the natural colour of the skin. On the face they are slightly raised, so as to give the sensation of inequality of surface to the finger passed over the cuticle. The disappearance of the eruption is followed by desquamation of the cuticle. Measles is not dangerous of itself; but it is apt to induce pneumonia in winter, and dysentery in summer, which are, at times, very fatal. These are apt to come on at the time of, or soon after, the disappearance of the eruption. When they supervene, they must be treated as idiopathic affections. It demands a general antiphlogistic treatment. Willan has pointed out a kind of *RUBEOLA SPURIA*, which he calls *RUBEOLA sine CATARRHO*. In this the rash runs its regular course, with little fever or catarrhal affection; affording no certain security against the common or regular disease.

He also gives the name, *RUBEOLA NIGRA* or *BLACK MEASLES*, to an unusual appearance of the measles about the 7th or 8th day, when the rash becomes suddenly livid, with a mixture of yellow. It is devoid of inconvenience or danger; and is removed in a week or ten days by the mineral acids and tonics.

**RUBEOLEÆ, Roseolæ.**

**RU'BIA, R. Tincto'rum, Erythro'danum, Rubia major, Radix rubra, Dyer's Madder, Madder, (F.) Garance. Family, Rubiacæ. Sex. Syst. Tetrandria Monogynia.** The roots of this plant have a bitterish, somewhat austere, taste; and a slight, not agreeable, smell. They were formerly considered deobstruent, detergent, and diuretic.

**RUBIG'INOUS, Rubiginosus, from rubigo, 'rust.' (F.) Rouille.** Rusty. Having the colour of rust. An epithet given to the sputa in certain cases of pneumonia.

**RUBINUS VERUS, Anthrax.**

**RUBOR, Rubedo.**

**RUBRICA FABRI'LIS.** A red, heavy, earthy matter, formerly employed for making drying plasters; *Hard Ruddle, Red Chalk*.

**RUBRICA SINOP'ICA.** A heavy, compact, reddish earth; formerly used in diarrhœa.

**RUBRIN, Hæmatin.**

**RUBUS ARC'TICUS.** The *Shrubby Strawberry, Baccæ Norland'ica. Family, Rosacæ. Sex. Syst. Icosandria Polygynia.* The fruit is recommended by Linnæus as possessing antiseptic, refrigerant, and antiscorbatic qualities.

**RUBUS CÆSIUS; the Dewberry plant, (F.) Ronce bleu.** The fruit resembles the blackberry in appearance and properties. The bark of the root of *R. Trivialis, American Dewberry*, is astringent.

**RUBUS CHAMÆOR'US; the Cloudberry Tree, Chamæor'us, Cloudberries, Knot-berris, (F.) Ronce de Montagne.** The ripe fruit is sometimes prepared like a jam, and used in fevers, &c., to allay thirst. It has been much extolled as an antiscorbatic.

**RUBUS FRUTICOSUS; the Common Bramble, which affords Blackberries, (F.) Ronce noire.** The berries are eaten as a summer fruit, of which they form a poor variety. The bark of the root of the *Rubus villosus, American Blackberry, High or standing blackberry, Hairy American Bramble*, is astringent, and has been used in the last stages of dysentery, and in cholera infantum.

**RUBUS IDEX'US; Batos, Batos; the Raspberry, (F.) Framboise, Ronce.** The fruit of the best varieties is extremely agreeable; and is much used. It was, formerly, called *Batinon moron*.

**RUBUS TRIVIALIS, see Rubus cæsius—r. Villosus, see Rubus fruticosus.**

**RUCTAMEN, Eructation.**

**RUCTATIO, Eructation.**

**RUCTATIO, Eructation.**

**RUCTUOSITAS, see Eructation.**

**RUCTUS, Eructation—r. Acidus, Oxyregmia—r. Nidorosus, Cnissoregmia.**

**RUDDLE, HARD, Rubrica fabrilis.**

**RUE, Ruta—r. Common, Ruta—r. de Chèvre, Galega officinalis—r. Goat's, Galega officinalis—r. Goat's, Virginia, Galega Virginiana—r. Meadow, Thalictron—r. des Murailles, Asplenium ruta muraria—r. des Prés, Thalictron—r. Sauvage, Ruta.**

**RUFF, Eructation.**

RUGA, Wrinkle.

RUGINE, Raspatorium.

RUGISSEMENT, Rugitus.

RUGITUS, *Brycheth'mos*, from *rugire*, *rugitum*, 'to roar.' (F.) *Rugissement*. A Latin word, which ordinarily expresses the roaring of the lion: and which is used, by some medical writers, to designate a particular species of borborygmus compared to it.

RUM, *Tafia*, *Molas'ses Spirit*. A spirit distilled from sugar, or molasses. See Spirit.

RUMA, Mamma.

RUMEN, Hypogastrium.

RUMEX ACETO'SA, *Common Sorrel*, *Oxalis Aceto'sa*, *Acetosa vulgaris*, *A. pratensis*, *Anax'ryris*, *A. arven'sis*, *Sorrel*, *Sour dock*, *Acetosa nostras*, (F.) *Oseille*. Family, Polygonæ. *Sex. Syst.* Hexandria Trigynia. The leaves are sour, and are used in cookery, and also as a refrigerant.

RUMEX ACU'TUS; *Sharp-pointed Wild dock*, *Oxylap'athum*, *Lap'athum*, *Rumex*, *Lap'athos*, (F.) *Patience sauvage*. The decoction of the root has been long used in cutaneous affections. It is, sometimes, employed for the cure of the itch.

RUMEX ALPI'NUS. The systematic name of the plant that affords the *Monk's Rhubarb*, (F.) *Rhabarbe des Moines*. See *Rumex patientia*.

RUMEX AQUATICUS, *Rumex hydrolapathum*—r. *Britannica*, *Rumex hydrolapathum*—r. *Digynus*, *Oxyria reniformis*.

RUMEX HYDROLAP'ATHUM, *Water-Dock*, *Hydrolapathum*, *Rumex aquaticus*, *Herba Britannica*, *Rumex Britannica*, *Lapathum aquaticum*, (F.) *Parella*, *Patience d'eau*. The leaves of this plant are subacid, and said to be laxative. The root has been used as a tonic, astringent, and antiscorbutic. It has also been employed externally in some cutaneous affections.

RUMEX OBTUSIFO'LIUS, *Blunt-leaved Dock*. The root of this as well as of *R. crispus*, has similar virtues to that of the other species.

RUMEX PATIENTIA, *Rhabarbarum monachorum*, *Hippolap'athum*, *Patientia*, *Garden Patience*, *Monk's Rhubarb*, (F.) *Patience*. This root, which is supposed to possess the virtues of rhubarb, but in an inferior degree, according to Linnæus, is obtained from the *Rumex patientia*; according to Murray, from the *Rumex Alpinus*.

RUMEX SANGUIN'EUS. The root of the *bloody dock* has an austere and astringent taste; and has been employed in dysentery. It is called, also, *Lap'athum sanguineum*, (F.) *Oseille* ou *Patience Rouge*, *Sangdragon*.

RUMEX SCUTA'TUS, *French Sorrel*, *Acetosa rotundifolia*, *A. Roma'na*, *A. Rotundifolia hortensis*, *Roman* or *Garden Sorrel*, *Green Sauces*, (F.) *Oseille butcher*, *Oseille ronde*, *Petite O*. Virtues the same as those of the common sorrel.

RUMINATION, *Rumina'tio*, from *ruma* or *rumen*, 'the gullet.' *Merycia'mus*. A function peculiar to ruminating animals, by which they chew a second time the food they have swallowed. An analogous phenomenon is sometimes seen in man.

RUMP, *Croupion*—r. *Bone*, *Coccyx*.

RUNCINA, Raspatorium.

RUNCINULA, Raspatorium.

RUNNET, Rennet.

RUNNING, *Curraus*, (F.) *Courss*. A succession of leaps, executed with rapidity, to

transport the body quickly from one place to another.

RUNUNCULA, Raspatorium.

RUPES, Lips of the Vulva.

RU'PIA, *Ulcus atonicum*, *Ecephy'sis Rhy-pia*, *Rhypp'aria*, from *guroo*, 'filth.' An eruption of large flattish blebs, which contain a fluid—at first serous, afterwards puriform, and often bloody, which rapidly concretes into crusts, at the base of which are ulcers of variable depths.

It requires the use of tonics internally, and of stimulating ointments externally.

RUPTIBILITAS, Fragilitas.

RUPTIO, Rhexis.

RUPTORIUM, *Cauterium*—r. *Commune*. Potassa fusa.

RUPTURA, *Ecrexis*, *Hernia*, *Laceration*. Rhexis—r. *Cornæ*, *Ceratorrhexis*—r. *Herniosa*. Hernia—r. *Ovarii*, *Oariorrhexis*—r. *Uteri*. Uterus, rupture of the—r. *Vaginæ*, *Colporrhexis*.

RUPTURE, *Hernia*, *Rhexis*—r. *du Cœur*, *Cardiorrhexis*—r. of the *Groin*, *Bubonocœle*—r. *de la Matrice*, *Uterus*, rupture of the—r. *Wort*, *Herniaria glabra*.

RUPTURED, see *Hernial*.

RUSCUS, *R. aculeatus*, *Bruscus*, *Ozomyrrhine*, *Ozomyrrine*, *Myrtacantha*, *Catan'gelos*, *Myacan'tha*, *Sco'pia re'gia*, *Wild Myrtle*, *Centromyrrine*, *Butcher's Broom*, (F.) *Petit houx*, *Fragon*. Family, *Smilacæ*. *Sex. Syst.* Dicaica Monadelphia. The root has been recommended as an aperient and diuretic.

RUSCUS ACULEATUS, *Ruscus*.

RUSCUS HYPOGLOS'SUM; *Unula'ria*, *Hypoglossum*, *Bislin'gua*, *Bonifa'cia*, *Laurus Alexandrina angustifolia*, (F.) *Laurier Alexandrin*. Formerly used against relaxed uvula.

RUSH, SWEET, *Acorus calamus*, *Juncus odoratus*.

RUSMA, see *Orriment*.

RUSPI'NI'S TINCTURE FOR THE TEETH. An empirical preparation, composed of *Florentine orris* ℥viij, *cloves* ℥ij, *rectified spirit Oij*, *ambergris* ʒj. It is said to contain gallic acid, and has been given in hæmaturia.

RUT, Heat.

RUTA, *Ruta graveolens*, *R. hortensis*, *Common Rue*, *Peg'anum*, *Beq'sa*, (F.) *Rue*, *Rhan*, *Rue sauvage*. Family, *Rutacæ*. *Sex. Syst.* Decandria Monogynia. The plant has a strong, ungrateful odour, and bitter pungent taste. It is acrid, so as to blister the skin. Its properties are reputed to be tonic, stimulant, antispasmodic, and emmenagogue. Dose, gr. xv. to ʒij.

*Oleum Rutæ*, *distilled Oil of Rue*, is antispasmodic; and, externally, rubefacient. Dose, gr<sup>ss</sup> ij to vj.

RUTA CAPRARIA, *Galega officinalis*—r. *Muraria*. *Asplenium ruta muraria*.

RUTABULUM, *Penis*.

RUTA'CEUM, from *Ruta*, 'rue.' Vinegar of rue.

RUTIDOMA, see *Rutidosis*.

RUTIDO'SIS, *Rytido'sis*, *Rhytido'sis*, from *guroo*, 'I wrinkle.' The act of wrinkling; as *Rutidoma* means a shrivelled or wrinkled body. A destruction or atrophy of the eye. Corrugation and subsidence of the cornea.

RUYSCHIANA TUNICA, (F.) *Lama* ou *Membrane Ruyschienne*. According to Ruysch

and the greater part of his disciples, the choroid coat of the eye is formed of two laminæ. His son gave to the inner the name *Tunica Ruyischiana* or *Membra'na Ruyischiana* seu *Ruyischii*.  
*Tunica Cellulo'sa Ruyischiana* is the cellular substance under the peritoneal covering of the

stomach. It is not numbered among the coats of that organ.

RYE, Secale—r. Horned, Ergot—r. Spurred, Ergot.  
 RYTIDOSIS, Rutidosis.  
 RYTIS, Wrinkle.

S.

S. A. &c., see Abbreviation.  
 SABADILLA, *Veratrum sabadilla*, see Veratrina.  
 SABADILLIN, see Veratrina.  
 SABATILLA, *Veratrum sabadilla*.  
 SABBATIA, *Chironia angularis*—s. Angularis, *Chironia angularis*.  
 SABINA, *Juniperus sabina*.  
 SABINE, *Juniperus sabina*.  
 SABLÉ, *Maculo'sus*, 'sanded.' Having the appearance as if stewed with sand. The terms *sablé* and *piqueté* are sometimes applied to the brain, when a slice of it exhibits red points as if it had been strewn with red sand. Such is the case in cerebral hyperæmia.  
 SABOT DE VÉNUS JAUNE, *Cypripedium luteum*.  
 SABUCUS, *Sambucus*.  
 SABULOUS, *Sabulo'sus*, *Areno'sus*, *Psammod'es*. The sandy deposit often seen in the urine.  
 SABULUM CONARII, see Pineal gland.  
 SABURA, *Saburra*.  
 SABURRA, *Sabu'ra*, *Sordes*. This word signifies by derivation, coarsed sand, or ballast. In its common acceptation, it means *foulness of the stomach*, as it is sometimes called;—vitiated matters supposed to be retained and accumulated in the stomach—the result of imperfect digestion—and which have been sometimes considered as a morbid product of the mucous secretion of that organ, or of the biliary secretion; at others, as a residuum from alimentary substances badly digested. The *Saburral state*, *Collu'vies gastrica*, *Cruditates ventriculi*, *Gastritis'mus*, (F.) *Embarras gastrique*, *État saburral*, is an accumulation of *saburra*, (F.) *Saburres gastriques*, in the stomach, which the Humourists considered to be the cause of a number of diseases.  
 SABURRA VERMINOSA, Helminthiasis.  
 SABURRATIO, Arenatio.  
 SABURRES GASTRIQUES, see Saburra.  
 SAC HERNIAIRE, Hernial sac.  
 SACCATUS, Encysted.  
 SACCHAR, Saccharum.  
 SACCHARINA, *Saccharolis*.  
 SACCHAROLFS (F.), *Sacchari'na*. A name given by MM. Henry and Guibourt to medicines which have sugar or honey for excipient, or for predominant principle.  
 SACCHAROMYCES, *Torula cerevisim*.  
 SACCHARORRHŒA, *Glycyrrhœa*—s. Cutanea, Sudor dulcis.  
 SACCHARORRHŒA LACTEA, *Galactorrhœa saccharata*. A secretion of unusually sweet milk.  
 SACCHARORRHŒA PULMONALIS, *Sputum dulce* seu *saccharatum*. The copious expectoration of unusually sweet matter from the lungs.

SACCHARORRHŒA URINOSA, Diabetes mellitus.  
 SACCHARUM, *Sacchar*. From the Arabic, or rather Sanscrit, *Sa-ka-r*, 'white earth;' *Su-cha-r*, *Succhar*, *Suiter*, *Zu-cha-r*, *Zu'caro*, *As-sakur*, *Tigala*, *Zaccharum*, *Zozar*, *Zu'charum*, *Zu'carum*, *Zuchra*, *Mel arundinaceum*, *Sugar*, (F.) *Sucre*. The produce of the juice of the *Saccharum officinarum* vel *officinale* of Linnæus, (*Cal'amus Indicus*, *Cal'amus Saccharinus*, *Sugar Cane*, (F.) *Canna à Sucre*, *Cannamelle*; the *Arun'do saccharif'era* of Sloane. Family, Gramineæ. *Sex. Syst.* Triandria Digynia) and also of the beet, maple, &c.  
*True Sugars* are those with which alcoholic fermentation may be effected, by the addition of yeast and water. They are:—  
*Species. Varieties.*  
 1. . . . { Hard sugar of the cane, maple, beet, chestnut, &c.  
 2. . . . { Liquid sugar, sugar of malt, of the sweet potato, molasses, honey, &c.  
 3. . . . { Hard sugar of the grape, ripe fruits, starch, diabetes, &c.  
 4. . . . { Hard sugar of the mushroom.  
*Imperfect sugars* are those in which alcoholic fermentation cannot be effected by means of yeast and water.  
*Species. Varieties.*  
 1. . . . Manna.  
 2. . . . Sugar of Milk.  
 3. . . . Sugar of jelly or glue (*gelatin*.)  
 4. . . . Liquorice.  
 5. . . . Picromel.  
 Sugar is prepared from the expressed juice of the sugar cane, boiled with the addition of quicklime or common vegetable alkali. It is used, in pharmacy, for the preparation of syrups, conserves, lozenges, &c. It is very nutritious, and is employed as an aliment, and as a demulcent and antiseptic. Dissolved in small quantities in water, as in tea, it is apt to disagree with dyspeptics; an evil which does not always occur when the same substance is taken more largely.  
 SACCHARUM ACER'NUM, *S. Canadense*, *Maple Sugar*, is often used as a demulcent.  
 SACCHARUM ALBUM, *S. purificatum*, *Saccharum* (Ph. U. S.), *White Sugar*, *Refined Sugar*, *Sal Indus*, is the *Loaf Sugar*. *Double-refined Sugar* has been called *Taharzat*.  
 SACCHARUM CANDIDUM, *S. candidum* seu *cantum* seu *canthum*, *Al'phensie*, *Nabot*, *Sugar candy*, (F.) *Sucre Candi*, is the crystallized juice of the cane.  
 SACCHARUM CANDUM, *S. Candidum*—s. *Cantum*, *S. Candidum*—s. *Canthum*, *S. Candidum*—s. *Commune*, *Saccharum non-purificatum*.  
 SACCHARUM HORDEATUM *Barley Sugar*, *Pe-*

*nides*, *Penid'ium*, *Saccharum penid'ium*, is a variety of sugar candy.

SACCHARUM LACTIS, *Sugar of milk*.

SACCHARUM NON-PURIFICATUM, *Muscovado*, raw or brown or moist sugar, is the *S. communis*, *S. rubrum*, *Mel cannae*, or coarse sugar.

SACCHARUM OFFICINARUM, see Saccharum—s. *Penidium*, *Hordeatum*—s. *Rosaceum*, *Confectio rosae gallicae*—s. *Saturni*, *Plumbi superacetis*.

SACCULI ADIPOSI, Fatty vesicles—s. *Laryngei*, *Ventricles of the larynx*.

SACCULI MEDICINAL'ES. Bags containing medicinal substances.

SACCULI MEDULLARES, see Medullary membranes.

SACCULUS, diminutive of *saccus*, 'a little sac.' This name has been given to two sacs formed by the membranous vestibule, which open into each other, and contain the *otolithes* and *otocoonis*: one of these is termed the *sacculus vestibuli*, the other *sacculus*. See *Semicircular canals*.

SACCULUS, MARSUPIUM—s. *Cephalicus*, *Cucupha*—s. *Chylifer seu rorifer*, *Receptaculum chyli*—s. *Cordis*, *Pericardium*—s. *Ellipticus*, see *Semicircular canals*—s. *Medicinalis*, *Pulvinar medicatum*—s. *Sphericus*, see *Semicircular canals*—s. *Vestibuli*, *Semicircular canals*.

SACCUS, Sac—s. *Coli*, *Cæcum*—s. *Cordis*, *Pericardium*—s. *Herniosus*, *Hernial sac*—s. *Epiploicus*, *Epiploon*—s. *Intestini crassi*, *Cæcum*—s. *Lachrymalis*, *Lachrymal sac*—s. *Lacrumalis*, *Lachrymal sac*—s. *Lacteus*, *Receptaculum chyli*—s. *Mucosus*, see *Bursæ mucosæ*—s. *Pleurae*, *Pleura*—s. *Venarum cavarum*, *Sinus dexter cordis*—s. *Venarum pulmonalium*, *Sinus pulmonalis*.

SACER, Sacral—s. *Ignis*, *Herpes zoster*—s. *Morbus*, *Epilepsy*—s. *Musculus*, *Transversalis dorsi*.

SACERDOS PENIS, *Arum maculatum*.

SACHET (F.), *Sacculus*, 'a bag.' A small bag containing perfumes to be placed among clothes to communicate to them an agreeable odour. The following is a formula for the powder they contain. *Powdered cloves* and *powdered cassia*, each one ounce; *powdered orris root*, an ounce and a half; *powdered yellow sandal wood*, one drachm; *otto of roses*, twenty-four drops; *oil of lavender*, *oil of bergamot*, each one drachm; *musk*, six grains.

SACK. A wine used by our ancestors; *Vin sec*. Probably *Sherry*.

SACK, *Saccus*, *Seclusorium*; *Sax. rac.* A bag or pouch.

SACK, HERNIAL, *Saccus herniosus*, (F.) *Sac herniaire*. An envelope or pouch, formed by the serous membrane of the cavity, whence a viscus has escaped. We distinguish, in a hernial sac, its *orifice* or the opening by which it communicates with the great cavity lined by the serous membrane: its *corvix* or *neck*, (F.) *Collet*, the narrow portion on the outside of the orifice, where strangulation sometimes occurs: the *body*, (F.) *Corps*, which is the round prominent part; and the *fundus* or *bottom*,—the part opposite to the orifice.

SACK, SEXOUS. The shut cavity formed by any serous membrane, as by the pleura or peritoneum.

SACRA FISTULA, Vertebral column.

SACRAL, *Sacer*, (F.) *Sacré*. That which

belongs or relates to the sacrum. A name given to several parts.

SACRAL ARTERIES are distinguished into 1. The anterior or middle sacral, *Median Artery of the Sacrum* of Chaussier, which arises from the posterior part of the abdominal aorta, in front of the 4th lumbar vertebra. It descends, in a serpentine manner, upon the sacro-vertebral articulation, and on the anterior surface of the sacrum. It furnishes many lateral branches, which unite with the lateral sacral arteries, and enter the anterior sacral foramina, to be distributed to the membranes of the marrow, &c. 2. The lateral sacral arteries, which are two in number; one on each side. They arise from the hypogastric, from the ilio-lumbar, or from the gluteal; and descend before the anterior sacral foramina, anastomosing in an arched manner, towards the coccyx, with the middle sacral. They give off external and posterior branches, which enter the sacral foramina; and internal branches, which are distributed to the pyramidalis, sacrum, &c.

SACRAL GROOVES, (F.) *Gouttières sacrées*. Two longitudinal excavations, slightly marked, at the posterior surface of the sacrum; which appear to terminate the vertebral grooves or gutters.

SACRAL NERVES, (F.) *Nerfs sacrés*, are generally six in number. They arise from the termination of the spinal marrow. The first, united with the great cord which descends from the lumbar plexus, concurs with the three others in the formation of the sacral or sciatic plexus. The third and fourth, with branches of the great sympathetic, form the hypogastric plexus. The fifth and sixth are distributed to the ischio-coccygeus muscle, and to the sphincter and levator ani.

SACRAL PLEXUS, *Sciat'ic plexus*,—the sacral portion of the crural plexus of Chaussier, constituted as just mentioned, is situate in front of the pyramidalis. It gives off, backwards, two branches, called the *puñie*, (F.) *honteux*, and the *lower sciatic*. It terminates in the great sciatic nerve.

SACRÉ, Sacral.

SACRÓCOCYGE'AL, *Sacro-coccygeus*. Relating to the sacrum and coccyx.

SACRÓCOCYGE'AL ARTICULA'TION is that of the lower extremity of the sacrum with the superior facets of the coccyx. It is closed by two ligaments;—an anterior and a posterior *sacro-coccygeal*.

SACRÓCOSTALIS, *Sacro-lumbalis*—s. *Fémoral*, *Gluteus major*.

SACRÓCOXAL'GIA; from *sacrum*, 'the os sacrum,' *coxa*, 'the hip,' and *algos*, 'pain;' a hybrid term. Some authors have called this a rheumatic affection of the sacro-iliac symphysis.

SACRÓIL'IAC, *Sacro-ili'acus*. That which relates to the sacrum and ilium.

SACRÓILIAC ARTICULA'TION, SYM'PHYSIS, or SYNCHONDRO'SIS, *Ilio-sacral articulation*, *symphysis* or *synchondrosis*, is the union of two surfaces;—two inclined planes, broader above than below; one formed by the sacrum, the other by the ilium. Both surfaces are incrustated by an articular cartilage. The bands which strengthen them are the two *sacro-sciatic ligaments*, the *sacro-spinal*, a *sacro-iliac* ligament, and some irregular fibres. The *sacro-iliac* li-

gament is a very thick assemblage of short, dense, irregular fibres, occupying the space which the sacrum and ilium leave between them, behind their articular surface. Some authors have termed some irregular fibres, situate in front of the sacro-iliac articulation; *anterior sacro-iliac ligaments*, in opposition to the preceding fasciæ, which they call *posterior sacro-iliac*.

**SACROISCHIATICUS**, Sacro-sciatic.

**SACROLOMBAÏKE**, Sacro-lumbalis.

**SACROLUMBAR**, *Sacro-lumba'lis*, *Sacro-lombaire*. That which belongs to the sacrum and loins.

**SACROLUMBAR**, *Sacro-lumba'lis*, *Sacro-lumba'ris* *Muscle*, *Sacro-costa'lis*, *Dorso-trachelian portion of the Sacro-spinal* of Chaussieur, (F.) *Lombo-costo-trachélien*, *Sacro-lombaire*, is seated at the posterior part of the trunk; is thick and triangular below; flat and thin in the remainder, and terminates in a point at its upper extremity. It is attached to the posterior surface of the sacrum; to the corresponding portion of the crista ili; to the extremities of the transverse processes of the lumbar vertebræ; to the angles of the eleven inferior ribs; to the tuberosity of the first, and the posterior tubercle of the transverse processes of the last five cervical vertebræ. The sacro-lumbalis straightens the vertebral column when bent forwards, and maintains it straight. By means of its insertion into the ribs, it can elevate or depress these bones, according as it contracts from above to below, or from below to above. It acts, consequently, sometimes as an inspiratory, at others as an expiratory muscle.

From six or eight of the lower ribs arises an equal number of fleshy portions, which terminate at the inner side of this muscle, and are called *Musculi Accessorii* vel *Additamentum ad Sacro-lumba'lem*, (F.) *Accessoires du Sacro-lombaire*.

From the upper part of the sacro-lumbalis, a fleshy slip, called *Cervica'lis descendens*, *Cervicalis descendens* *Diemerbroeckii*, *Transversa'lis collatera'lis colli*, *Accessorius ad Sacro-lumba'lem*, (F.) *Transversaire grêle*, runs up, to be fixed to the transverse processes of the 4th, 5th, and 6th cervical vertebræ, by three distinct tendons. These last parts, though separated by some anatomists, belong to the sacro-lumbalis.

**SACROSCIATIC**, *Sacro-ischiaticus*. That which belongs to the sacrum and ischium.

**SACROSCIATIC LIGAMENTS** are two ligaments, which assist in securing the sacro-iliac articulation. The *great* or *posterior sacro-sciatic ligament* extends from the crista ili and the sides of the sacrum and coccyx to the tuberosity of the ischium. The *less* or *anterior sacro-sciatic ligament* arises from the same point, and terminates in the spine of the ischium.

**SACROSPINAL**, *Dorso-trachelian* portion of the sacro-lumbalis.

**SACROSPINALIS**. That which relates to the sacrum and spine. Under this name, Chaussier describes the sacro-lumbalis, longissimus dorsi, transversalis, transverso-spinalis, and intertransversalis. He divides it into three portions.

**SACROTROCHANTÉRIEN**, *Pyramidalis*.

**SACROVERTEBRAL**, *Sacro-vertebra'lis*. That which relates to the sacrum and the vertebræ.

**SACROVERTEBRAL ARTICULATION** is the junction of the last vertebræ of the loins with the sacrum. The angle which these two bones form at the anterior part has been called the *Promontory of the Sacrum*, or the *Sacro-vertebral Angle*.

**SACROVERTEBRAL LIGAMENT** is a strong ligament, which passes from the anterior part of each of the transverse processes of the last lumbar vertebræ to be attached to the base of the sacrum. Its use is to maintain the articulation of those two bones *in situ*.

**SACRUM**, *Os sacrum*, *Os basilare*, *Os Alagas*, *Os latum*, *Os clunium*, *Vertebra magna*, *Albagiazii*, *Hieron ostion*, *Clunius*, *Subvertebra*, *Subvertebrum*, *Vetula*; from *sacr*, 'sacred;' because it contributes to protect the genital organs, which were considered sacred, or because it was offered in sacrifice. The bone, which forms the posterior part of the pelvis, and is a continuation of the vertebral column. The sacrum is symmetrical and triangular, situate at the posterior part of the pelvis, and concave anteriorly. It has,—1. A *pelvic or anterior surface*, which corresponds to the pelvic cavity, and has four transverse furrows, that point out the parts where the primitive portions of the bone were separated from each other. On each side there are four foramina, called *anterior sacral*; these are oblique, and decrease in size, from above downwards. Through these pass the anterior branches of the sacral nerves. 2. A *spinal or posterior surface*, which is convex, rough, and covered by muscles. Upon the median line are four horizontal, tubercular eminences, forming a continuation of the spinous processes of the vertebræ; and below, a triangular notch, where the *sacral canal* terminates. On each side of the surface are four foramina, called *posterior sacral*, which are smaller than the anterior, and give passage to the posterior branches of the sacral nerves. 3. The *vertebral surface or base*. Its greatest extent is transversely. It is articulated with the last lumbar vertebræ. On it we see the orifice of the *sacral canal*, of a triangular shape, which decreases in width from above downward; terminates the vertebral canal; is lined by a prolongation of the cerebral membranes; contains the fasciculi of the sacral nerves; communicates, externally, by the sacral foramina; and terminates at the triangular notch on the posterior surface of the bone. At the sides of the upper orifice of the sacral canal are two articular processes, which receive the articular processes of the last lumbar vertebræ. The projection formed by the union of the base of the sacrum with the last lumbar vertebræ, is called the *Promontory*, *Promontorium Ossis sacri*, *Greater angle of the Sacrum* or *Sacro-vertebral Angle*. 4. A *coccygeal face or apex*, (F.) *Face coccygienna* ou *Sommet*, which is very narrow, and is articulated with the coccyx. 5. *Two lateral margins*, which have, above, a broad oblique surface, articulated with the ilium.

The sacrum is developed by 30 to 36 points of ossification.

**SADDLE**, **TURKISH**, *Sella Turcica*.

**SÆPES**, *Sepe*.

**SAFFLOWER**, *Carthamus tinctorius*.

**SAFFRON**, *Crocus*—s. *Bastard*, *Carthamus tinctorius*—s. *Flower*, *Carthamus tinctorius*—

s. Dyers', *Carthamus tinctorius*—s. Meadow, *Colchicum autumnale*.

**SAFRAN BÂTARD**, *Carthamus tinctorius*, *Colchicum autumnale*—s. *des Indes*, *Curcuma longa*—s. *de Mars apéritif*, Ferri subcarbonas—s. *de Mars astringent*, *Colcothar*—s. *des Près*, *Colchicum autumnale*—s. *Racius de*, *Curcuma longa*.

**SAFRANUM**, *Carthamus tinctorius*.

**SAFRE**, Smalt.

**SAGA**, Sago.

**SAGAPE'NUM**, *Sag'apin*, *Serap'non*, (F.) *Gomme sérapiquique*. A gum-resin, supposed to be obtained from the *Fer'ula Per'sica*. Family, Umbelliferae. See. Syst. Pentandria Digynia. Its odour is fetid and allicaceous; taste pungent, bitterish, nauseous. It is in small, agglutinated masses of a yellow colour; tenacious; breaking with a horny fracture. It is a reputed antispasmodic and emmenagogue. Dose, gr. x to ʒss.

**SAGAPIN**, *Sagapenum*.

**SAGE**, *Salvia*—s. Indian, *Eupatorium perfoliatum*—s. Jerusalem, *Pulmonaria*—s. Tree, *Lantana*.

**SAGE-FEMME**, Midwife.

**SAGENA**, Epiploon.

**SAGESSE DES CHIRURGIENS**, *Sisymbrium Sophia*.

**SAGIMEN VITRI**, Soda, subcarbonate of.

**SAGIT'TAL**, *Sagitta'lis*, *Sagitta'tus*, from *sagitta*, 'an arrow.'

**SAGITTAL FURROW**, *Sagittal Groove*, (F.) *Gouttière sagittale*, is a channel on the median line of the inner surface of the skull-cap. It is excavated in the os frontis, in the two parietal and occipital bones, and extends from the crista galli to the internal occipital protuberance. It lodges the longitudinal sinus, which has been called the *sagittal sinus*.

**SAGITTAL SUTURE**, *Obela'a sutu'ra*, O. *Raphé*, *Sutura Virg'ata*, S. *jugal'is*, S. *Rabdoï'des*, *Rhabdoï'des*, *Rhabdoï'des seu Biparieta'lis*. The suture which unites the two parietal bones, and which extends, from before to behind, on the median line, from the coronal suture to the lambdoidal. It is so called, from *sagitta*, 'an arrow,' because it seems to meet the coronal suture as an arrow meets the string of a bow.

**SAGITTA'RIVM ALEXIPHAR'MACUM**, *Malac'ea Radix*, *Canna In'dica*, *Arun'do Indica*. A root cultivated in the West Indies, and supposed to be a remedy for wounds by poisoned arrows.

**SAGITTATUS**, *Sagittal*.

**SAGO**, *Sagus*, *Saga*, *Sagu*, *Sagu*, (F.) *Sagon*, *Saguo*. A fecula, obtained from the pith of the *Sagus Rumph'ii*, growing in the Moluccas, Philippine isles, &c., and which is brought to us in small grains. The same substance is, also, obtained from the West Indies, but it is inferior to that from the East. By boiling in water or milk, sago becomes soft and transparent, and forms an agreeable and nutritious food in febrile, calculous, and other disorders. It is made palatable by sugar, lemon-juice, or wine, where the last is not contra-indicated.

**SAGO**, FRENCH, see *Solanum tuberosum*, and Arrowroot, common—s. Portland Island, see *Arum maculatum*.

**SAGOU**, Sago.

**SAGU**, Sago.

**SAGUE**, Sago—s. *Petit*, see *Solanum tuberosum*.

**SAGUS**, Sago—s. *Rumphii*, see Sago.

**SAHARA**, Insomnia.

**SAIGNÉE**, Blood-letting—s. *Spoliative*, *Spoliativa phlebotomia*.

**SAIGNEMENT DU NEZ**, Epistaxis.

**SAILORS, DISEASES, &c., OF**. Sailors, by nature of their occupation, are liable to many diseases. Several of these may, however, be warded off by proper attention to cleanliness and ventilation.

**SAIN BOIS**, *Daphne gnidium*—s. *Doux*, *Adeps preparata*.

**SAIN AMAND, MINERAL WATERS OF**. Sulphuretted waters, in the department Du Nord, France. They contain carbonic and sulphohydric acids. The *Boue* or deposit contains sulphohydric acid, and salts of iron and magnesia. Temperature, 64° to 82°, Fahr.

**SAIN AUGUSTINE, CLIMATE OF**. This sea-port of Florida is a frequent retreat during the winter season for the valetudinarian from the more northern parts of the United States. The climate is certainly comparatively mild and equable; but it is liable to frequent north-east storms. There are only a few days, however, in the winter, in which the invalid cannot take exercise in the open air. Tampa Bay, and Pensacola, in Florida; and Mobile, in Alabama, which are sometimes visited by the consumptive, are less liable to the storms in question.

**SAIN CHARLES'S ROOT**, *Carlo sancto* (*Radix*).

**SAIN CROIX**, Santa Cruz.

**SAIN JAMES'S WORT**, *Senecio Jacobaeæ*.

**SAIN JOHN'S DANCE**, see *Mania*, dancing—St. John's Wort, *Hypericum perforatum*.

**SAIN KITTS**, see West Indies.

**SAIN LEONARD'S, CLIMATE OF**. This place, which is situate about a mile to the westward of Hastings, in Sussex, England, is less sheltered than it, and is therefore a less favourable retreat, during the winter months, for the phthisical valetudinarian.

**SAIN MYON, MINERAL WATERS OF**. Some cold, acidulous waters at Saint Myon, near Riom, in the department of Puy-de-Dôme. They contain free carbonic acid, subcarbonate of soda, chloride of sodium, and carbonate and sulphate of lime.

**SAINNECTAIRE, MINERAL WATERS OF**. Springs in the department of Puy-de-Dôme, France. They contain carbonic acid, bicarbonate of soda, and chloride of sodium. Temperature, 75° to 103°, Fahr.

**SAIN PARDAUX, MINERAL WATERS OF**. Chalybeate springs in the department of Allier, France. They contain carbonic acid and iron.

**SAIN SAUVEUR, MINERAL WATERS OF**. Sulphurous waters in the department of Hautes-Pyrénées, France. Temperature, 76° to 93°, Fahr.

**SAIN VINCENT'S**, see West Indies.

**SAIN VITUS'S DANCE**, Chorea, see *Mania*, dancing—s. *Vitus's Dance of the Voice*, *Balbuties*.

**SAIRE**, *Essera*.

**SAL**, Salt—s. *Absinthii*, Potassæ subcarbonas, see Potash—s. *Acetosellæ*, Potassæ oxalate of—s. *Acetosus ammoniacalis*, *Liquor ammoniac*

SALAAM, CONVULSION, see Convulsion, Salaam.

SALAB, Salep.

SALACITAS, Satyriasis—s. Vulvæ, Nymphomania.

SALAD, CORN, Valeriana dentata.

SALAP, Salep.

SALCOMBE, (CLIMATE OF.) A small place—the Montpellier of Huxham—which is one of the warmest spots on the S. W. coast of England, and, therefore, in this respect adapted for the phthisical invalid as a winter retreat.

SALEP, *Saloo'* (so pronounced.) *Salab, Salep.* The prepared bulb of the *Orchis masculcula* and other species of Orchis. The salep of Cachmere is from a species of *Eulophia*. Salep is in small, irregular, hard masses. In its composition in relation to water it is closely analogous to tragacanth. It is possessed of similar virtues with sago, tapioca, &c.

SALERNUM, SCHOOL OF. An ancient school of medicine at Salerno in Italy. It was established by Charlemagne, in 802; and was the first Christian university at which medicine was taught. It was much celebrated, especially in the 12th century. The work on hygiene, "*De Conservandâ Valetudine*," which bears its name, has passed through several editions in various languages. It is supposed to have been written by John of Milan, in 1100, and is in Leonine verse.

SALICARIA, *Lythrum salicaria.*

SALICINE, see Salix.

SALICORNIA ARABICA, &c., see Soda.

SALINE', *Salinus, Salina'cius, Salina'fidus, Sali'tus, Salsus, Hali'nus, Halmy'rus, Halico'des, from sal.* That which contains a salt, or has the properties of a salt.

SALINE DRAUGHT OR MIXTURE. This may be made as follows:—*Potass. carbon.* ℞j, *acid. citric. vel tartar.* gr. xv, *vel succ. limon. recent.* ℥ss, *aq. f. ʒviii, syrup. cujusvis* ʒj. M. Given in divided doses as a febrifuge.

SALINE EFFERVESCING DRAUGHT OR MIXTURE is made by adding a due proportion of either of the acids above mentioned, or of lemon juice, to the proper proportion of the carbonate of soda or potassa; about 25 grains of the acid saturate 30 grains of the carbonate. See Powders, soda.

SALIS AMMONIACI FLORES, Ammoniacæ carbonas.

SALITIO, Leap.

SALITUS, Saline.

SALIUM, Saliva.

SALIUNCA, Valeriana Celtica.

SALIVA, *Si'alon, Si'elon, Sialo'ma, Pty'alon, Pty'elon, Sa'lium, Sputa'men, Sputamen'tum, Sputum, Spittle.* An inodorous, insipid, transparent, slightly viscid fluid; secreted by the parotid, submaxillary and sublingual glands, and poured into the mouth by the ducts of Steno, Wharton and Rivinus; the use of which is to mix with the alimentary bolus, and to serve in the process of digestion. It is composed, according to Berzelius, of 992.2 parts of water, 2.9 of a particular animal matter, soluble in water, and insoluble in alcohol, *pty'aline, principium saliva'le, mats'ria sialina*, of 1.4 of mucus, 1.7 of chlorides of potassium and sodium, 0.9 of lactate of soda and animal matter, and 0.2 of soda.

SALIVÆ FLUXUS CIBO VISO, see Salivation.

SALIVAIRE, Salivary.

SALIVANS, Salivary, Sialogogue.

**SALIVANT**, Sialogogue.

**SALIVARIS**, Salivary—s. *Herba, Anthemis pyrethrum.*

**SALIVARY**, *Saliva'rius, Salivans, Saliva'ris, Salivus'sus*, from *saliva*, (F.) *Salivaire*. That which belongs to the saliva.

**SALIVARY CALCULI**, see *Calculi, salivary.*

**SALIVARY FIS'TULE**, *Sialosyrin'ges*, are such as depend upon an accidental opening into the excretory ducts of the salivary glands. *Fistule* are most commonly met with in the duct of *Steno*.

**SALIVARY GLANDS**, *secreting organs of the saliva, salival glands*, are situate symmetrically, to the number of three, on each side of the face, and behind and under the lower jaw. Their form is very irregular, and their extent varies according to individuals. Their excretory ducts—*Ductus Saliva'rii*, (F.) *Canauz* ou *Conduits salivaires*, carry the saliva directly into the mouth, without pouring it into any intermediate reservoir, as happens in the case of some of the other glands. The salivary glands have been distinguished into,—1. The parotid; 2. The submaxillary; 3. The sublingual.

**SALIVATIO**, Salivation—s. *Mercurialis, Salivation, mercurial.*

**SALIVATION**, *Saliva'tio, Saliva'tio calida, Epiph'ora ptyalis'mus, Sialis'mus, Sputum Oris, Sialis'mus, Sialachus, Sielismos, Sialorrh'ea, Sialoz'emia, Ptyalis'mus, Ptyalism, Fluxus saliv'æ*, (F.) *Flux de Bouche, Flux salivaire*. A superabundant secretion of saliva; occasioned either locally, by the use of irritating masticatories, or under the influence of some cause which acts on the whole economy, and especially of mercurial preparations. In this last case it is accompanied by a coppery taste in the mouth, by swelling of the gums, and sometimes by looseness of the teeth. Salivation may usually be diminished by the use of astringents, laxatives, &c.

*Ptyalismus acutus sympatheticus, Salivæ fluxus cibo viso, Mouth watering*, the increased flow of saliva produced by the sight, smell, or thought of agreeable food, is a species of ptyalism, as well as the *Ptyalismus acutus mellitus, Apoceno'sis ptyalis'mus mellitus*, or *Sweet spittle*. In this the saliva has a sweet or mucilaginous taste.

**SALIVATION, MERCURIAL**, *Saliva'tio mercurialis, Sialoz'emia mercurialis, Ptyalis'mus mercurialis, P. hydrargyratus*, (F.) *Ptyalismus mercuriel, Salivation mercurielle*. Salivation produced by mercury. The stomatitis that accompanies it is termed *mercurial, Hydragyro-stomatitis*, (F.) *Stomatitis mercurielle*.

**SALIVATION MERCURIELLE**, Salivation, mercurial.

**SALIVATUM**, Sialogogue.

**SALIVOSUS**, Salivary.

**SALIX**. The *Willow, Itea*, (F.) *Saule*. A genus of plants from the Linnæan system.

**SALIX FRAG'ILIS**, or Crack willow (Ph. D.) **SALIX ALBA**, or White willow (Ph. D. and Ph. U. S.) **SALIX LATIFOLIA**, or broad-leaved willow. **SALIX CAPREA**, or Great round-leaved willow (Ph. L.) **SALIX PENTAN'DRIA**, **SALIX VITULINA**, **SALIX ERYOXYF'ALA**. The bark of each of these has a slightly aromatic odour, and a bitter astringent taste, which is nearly the same in all the species. It is tonic and astringent, and has been used in intermittents, and

in cases of dyspepsia, worms, &c. The active principle has been separated, and called *Salicine*. It is like the quinia in medicinal efficacy. Dose, ℥j to ʒj of the powder. Dose of *Salicine* from 4 to 6 grains.

**SALIX ÆGYPTIACA**, Calaf.

**SALLOW**, Lurid.

**SALMIAC**, Ammonia murias.

**SALOOP**, Salep.

**SALPETRA**, Soda, nitrate of.

**SALPINGEMPHRAX'IS**, from *σαπιγγίς*, 'the Eustachian tube,' and *μπερρεξίς*, 'obstruction.' Obstruction of the Eustachian tube;—a cause of deafness.

**SALPINGITIS**, from *σαπιγγίς*, 'a tube,' and *itis*, 'denoting inflammation.' Inflammation of the Eustachian tube.

**SALPINGOCY'ESIS**, *Paracy'sis tubaria, Graviditas tubaria*, from *σαπιγγίς*, 'a tube or trumpet,' and *κυρσις*, 'pregnancy.' Tubal pregnancy.—See *Pregnancy*.

**SALPINGOMALLÆEN**, Tensor tympani—s. *Staphylinus internus, Levator palati*.

**SALPINGOPHARYNGÆ'US**, from *σαπιγγίς*, 'a trumpet,' and *φαρυγγίς*, 'the pharynx.' *Val-salva* and *Douglas* have given this name to a bundle of fibres, which passes from the Eustachian tube to the pharynx.

**SALPINGOSTAPHYLINUS**, Circumflex muscle.

**SALPINGOSTENOCHORIA**, from *σαπιγγίς*, 'a tube,' *στενός*, 'narrow,' and *χωρῆς*, 'space.' Narrowness or stricture of the Eustachian tube.

**SALPINX**, Tuba.

**SALSAFI**, Tragopogon.

**SALSAMENTUM CRUDUM**, Omotarichos. **SALSAPARILLA GERMANICA**, Sarsaparilla Germanica.

**SALSEDO MUCRUM**, Potassa nitras.

**SALSEPAREILLE**, *Smilax sarsaparilla—s. d'Allemagne, Sarsaparilla Germanica*.

**SALSILAGO**, Muria.

**SALSOLA KALI**, *Prickly Saltwort, Kali spinosum cochlearatum, Tragus sive Tragus Matthi'oli*. This plant, as well as the *Salsola sativa* and the *Salsola soda*, produces the alkaline salt, commonly called *Barilla, Soda*, or *Kelp*.

**SALSOLA SATIVA**, &c., see *Soda*.

**SALSUGINOSUS**, Halmyrodes.

**SALSUS**, Saline.

**SALT, Sal, Hal, Hals**, *αλς*, (F.) *Sal*. A name formerly given to a considerable number of substances of very different nature. At present, chymists apply the term *Salts* exclusively to the combination of an acid with one or more bases. *Neutral salts* are those in which the acid and base reciprocally saturate each other. *Acid salts* or *supersalts*, (F.) *Sur-sels*, are those in which the acid predominates over the base. *Alkaline salts* or *subsals*, (F.) *Sous-sels*, those in which the base is, on the contrary, predominant. The different denominations of the salts are compounded, 1. Of the name of the acid; the termination of which is changed into *ite*, when the name of the acid is in *ous*;—*ate*, when it is in *ie*. Thus the salts formed by the sulphurous acid are *sulphites*; those by the sulphuric, *sulphates*. 2. This name is followed up by that of the oxyd, that enters into the composition of the salt. Thus, the *sulphate of protoxyd of iron* is a combination of sulphuric acid with the protoxyd of that metal. Frequently,

to shorten the name, the word *oxyd* is suppressed; and *proto, deuto, trito, &c.*, put before the acid:—as *protosulphate of iron*. *Simple salts* are those resulting from the combination of an acid with a single base: *double salts* with two different bases: *triple* with three, &c. A *haloid salt* is one constituted after the type of common salt, or which contains a metal and a *salt-radical*, as chlorine, iodine, &c. An *oxy-salt* is formed from the combination of an acid with an oxide.

When *salt* is used in an abstract sense, it means the chloride of sodium.

SALT APERIENT, of FREDERICK, Soda, sulphate of—s. Baker's, Ammonia carbonas—s. of Barilla, Soda, subcarbonate of—s. Bay, Soda, muriate of—s. Bitter purging, Magnesia sulphas—s. Common, Soda, muriate of—s. Epsom, Magnesia sulphas—s. Glauber's, Soda, sulphate of—s. Glauber's, Lymington, see Soda, sulphate of—s. Rochelle, Soda, tartrate of—s. Rock, Soda, muriate of—s. Sea, Soda, muriate of—s. Secondary, Neutral salt—s. Seignette's, Soda, tartrate of—s. Smelling, Ammonia carbonas—s. of Soda, Soda, subcarbonate of—s. Sore-throat, Potassæ nitras fusus sulphatis paucillo mixtus—s. of Tartar, see Potassæ subcarbonas, and Potash—s. Tasteless purging, Soda, phosphate of—s. of Urine, Ammonia carbonas—s. White, Soda, muriate of—s. of Woodsoot, Ammonia carbonas—s. of Wormwood, see Potash.

SALTANS ROSA, Urticaria.

SALTATIO, Dancing—s. Sancti Viti, Chorea.

SALTERTON. A village about four miles to the eastward of Exmouth, England, frequented as a winter abode by invalids. It is in a small, open valley on the sea-shore, and is well protected from winds, particularly the northerly.

SALTPETRE, Potassæ nitras.

SALTUS, Leap, Vulva—s. Tendinum, Substultus tendinum.

SALTWORT, PRICKLY, Salsola kali.

SALUBRIS, Salutory.

SALUBRITY, *Salubritas*, (F.) *Salubrité*, from *salus*, 'health.' Any thing which contributes to the health of individuals or of communities. Situations differ materially from each other in this respect; and the cause of the difference is often an interesting topic of inquiry.

SALUS, Sanitas.

SALUTARY, *Peries'ticos, Salut'ris, Salu'ter, Salu'bris, Hygie'nus, Hygiasticus, Hygie'rus*. Same etymon. Healthy. That which is favourable to health. Some diseases have been considered salutary; but this is doubtful.

SALVATELLA; Same etymon, (?) *Vena salvatella*, is situate on the back of the hand, near its inner margin. It begins on the posterior surface of the fingers and dorsal surface of the hand, by a plexus, formed of a number of radicles, frequently anastomosing with each other; it then ascends to the inner part of the forearm, where it takes the name—*posterior cubital*. The ancients recommended this vein to be opened in certain diseases, as in melancholic and hypochondriacal affections; and they attributed to such abstraction of blood considerable efficacy in the cure of disease: hence its name.

SALVE, BLISTERING, Unguentum lyttæ—s. Eye, Unguentum oxidii zinci impuri—s. Eye, Singleton's, Unguentum hydrargyri nitrato-oxydi—s. Healing, Cerate of calamine.

SAL'VIA, *S. officinalis, S. hortensis, Ele-lis'phacos*, (F.) *Sauge, Thé de France*. Family, Labiate. *Sex. Syst.* Diandria Monogynia. Sage has a peculiar, aromatic odour, and a warm, aromatic, bitterish taste. Its virtues depend upon an essential oil. It is tonic, stimulant, and carminative. In the form of a weak infusion, it is occasionally used as a diluent, and as a wash for sore mouth. Dose, gr. xv to xxx or more.

SALVIA HORMINUM, *Hormi'nium*, (F.) *Sauge-hormis*, of the Pharmacopœias, is used in similar cases.

SALVIA HORTENSIS, Salvia—s. Officinalis, Salvia.

SALVIA SCLA'REA, *Sclarea, Gallit'richum, Æthiopsis, Biss'mas, Colus Jovis, Common Clary*, (F.) *Orvale ou Toute-bonne*. The leaves have been recommended as corroborants and anti-spasmodics.

SALVIA VITÆ, Asplenium ruta muraria.

SAMBU'CUS, *Sabu'cus, Sambucus nigra, S. vulg'aris, S. Arbo'rea, Acté, Infé'lix lignum; the Elder*, (F.) *Sureau commun*. Family, Caprifoliaceæ. *Sex. Syst.* Pentandria Digynia—(The flower and bark were formerly called *Canop'mum*.) The flowers, berries, and bark of the elder have been used in medicine. The flowers have been reputed diaphoretic and discutient: the berries, aperient and sudorific: the bark, purgative, and, in small doses, deobstruent. The flowers are sometimes used in fomentations, and to form a cooling ointment.

SAMBUCUS ARBORÆA, Sambucus—s. Chamæacte, S. ebulus.

SAMBUCUS EBULUS, *Ebulus, Chamæacté, Od'apos, Sambucus Chamæacté seu Helion, Sambucus hu'milis, S. Herba'cea, Dwarf-elder, Danewort*, (F.) *Hibble*. The root, interior bark, leaves, flowers, berries, (*Bacca seu Grana Actes*), and seeds have all been given in moderate doses as resolvents and deobstruents; and in large doses as hydragogues. The berries of *Sambucus Canadensis*, the *Common Elder of America*, are made officinal in the American Pharmacopœia.

SAMBUCUS HELION, Sambucus ebulus—s. Herbacea, S. ebulus—s. Humilis, S. ebulus—s. Nigra, Sambucus—s. Vulgaris, Sambucus.

SAMI TERRA, *Sa'mian Earth*. An argillaceous earth, found in the island of Samos, to which were ascribed virtues similar to those of the Terra Lemnii.—Galen, Dioscorides.

SAMIUS LAPIS. A stone found in the Isle of Samos, which the ancients believed to be astrigent and refrigerant.

SAMPHIRE, Crithum maritimum.

SAMPSUCHUS, Thymus mastichina.

SAMPSUCUS, Origanum majorana.

SAMPSYCH'INON, *Sampsuchinum*. An ointment composed of *σαμψυχον*; which was perhaps marjoram.—Dioscorides.

SANABILIS, Curable.

SANAMUNDA, Geum urbanum.

SANATIO, Curation, Cure.

SANATIVE, Curative.

SAN GIULIANO, MINERAL WATERS OF. At the foot of the mountain San Giuliano, a league and a half from Pisa, are several mineral springs; temperature from 84° to 107° Fahr.

The spring, *Pozzetto*, contains carbonic acid, sulphates of soda, lime, and magnesia; chlorides

of sodium and magnesium; carbonates of lime and magnesia; argil and silica.—Santi.

SAND, see Gravel.

SANDALUM CÆRULEUM, Guilandina moringa—s. Rubrum, Pterocarpus santalinus.

SANDARAC, *Sandarac'cha*, *Gum Juniper*, *Gum Sandarach*, *Pounce*, *Gummi Juniperi*, *Sandarac'ca*, *Vernix sicca*, *Resi'na Juniperi*. A name given, by the Arabs, to an odorous resin, that flows from the *Thuya aphylla*. Family, Coniferae. *Sex. Syst.* Monœcia Monadelphia. It is stimulant, like all the resins; but is very little used.

SANDARACHA GRÆCORUM, Realgar.

SANDERS, see Saunders.

SANDIVER, see Vitrum.

SANDIX, Plumbi oxydum rubrum.

SANDYX, Plumbi oxydum rubrum.

SANG, Blood—s. Arterial, Arterial blood—s. *Dragon*, *Rumex sanguineus*—s. *Dragon*, see Calamus rotang—s. *Globules du*, Globules of the blood—s. *Perte de*, Hæmorrhagia.

SANGLOT, Sob.

SANGSUE, Hirudo.

SANGUIDUCTUS DURÆ MATRIS, Sinuses of the dura mater.

SANGUIFICATIO, Hæmatisis—s. Debilior, Hyphæmatisis.

SANGUIFLUXUS, Hæmorrhagia—s. Uterinus, Metrorrhagia.

SANGUIMOTION, Circulation.

SANGUIMOTORY, Circulatory.

SANGUIN, (*Vaisseau*) Blood-vessel.

SANGUINALIS CORRIGIOLA, Polygonum aviculare.

SANGUINARIA, *S. Canaden'sis*, Blood-root, Bloodwort, Puccoon, Red Puccoon, Red Root, Indian Paint, Turmeric. *Nat. Ord.* Papaveracem. *Sex. Syst.* Polyandria Monogynia. A North American plant, the rhizoma and seeds of which are used in medicine. They are emetic. Dose of the powder, 8 to 20 grains. They are said to reduce the velocity of the pulse, like digitalis.

SANGUINÆ, *Sanguin'eus*, *Sanguino'sus*, *Hæmaticus*, *Hæmato'des*, *Hæmat'rus*, *Hæmat'ivus*, *Hæmo'des*, *Hæmo'des*; (F.) *Sanguin*. Bloody, blood-like. Relating to, or containing blood,—as 'sanguine temperament.'

SANGUINEA, Potasse nitras.

SANGUINEUS, Sanguine.

SANGUINIS ABSORPTIO, Hæmorrhophesis—s. Congestio, Congestion—s. Dissolutio, Hæmateclisis—s. Fluor, Hæmoptysis—s. Fluor Vesicæ, Cystorrhagia—s. Ictus, Apoplexy—s. Missio, Blood-letting—s. Profluvium copiosum, Hæmorrhagia—s. Profluvium ex Ore, Stomatorrhagia—s. Stagnatio, Hæmostasis.

SANGUIOLENT, *Sanguipolentus*, from *sanguis*, 'blood.' Tinged with blood. An epithet applied, particularly, to the sputa when so tinged.

SANGUINOSUS, Sanguine.

SANGUIPURGIUM, from *sanguis*, 'blood,' and *purgare*, 'to cleanse.' Purgation of the blood. A name given by some authors to mild fevers; from an idea that they purged the blood of noxious matters.

SANGUIS, Blood, Sperm—s. Concretus, Coagulum—s. Draconis, see Calamus rotang—s. Hirci siccatus, see Blood—s. Menstruus, see Menses—s. in Urinâ, Hæmaturia.

SANGUISORBA OFFICINALIS. The Italian *Pimpinel*, *Pimpinel'la Ital'ica*, (F.)

*Pimprenelle noirs*. It was formerly used as an astringent and tonic, in hæmorrhages, dysentery, &c.

SANGUISUGA, Hirudo.

SANGUISUGUM. A barbarous term, to denote too great an accumulation of blood in the heart.—Bonetus.

SANICLE, Sanicula—s. American, *Heuchera cortusa*—s. Yorkshire, *Pinguicula vulgaris*.

SANIC'ULA, *S. Europ'ca*, *Cuculla'ta*, *Dodeca'theon*, *Sym'phytum petræum*, *Sanic'ula mas*, *Diapen'sia cortu'sa*, *San'icle*, (F.) *Tout-sains*. Family, Umbelliferae. *Sex. Syst.* Pentandria Digynia. This herb was formerly used as a mild astringent. It is bitterish, and somewhat austere.

SANICULA, *Saxifraga granula*—s. Eboracensis, *Pinguicula vulgaris*—s. Europæa, *Sanicula*.

SANIC'ULA MABILAN'DICA. This indigenous plant grows in marshes, or low and shaded ground. It is possessed of tonic virtues; and the powdered root is employed in popular practice as a favourite remedy in intermittent fever.

It has been recommended recently in chorea.

SANICULA MONTANA, *Pinguicula vulgaris*.

SANIDO'DES, *Sanio'des*, 'resembling a board,' from *savis*, gen. *savidos*, 'a board,' and *idos*, 'resemblance.' One whose thorax is narrow, and, as it were, contracted.

SANIE, Sanies.

SANIES, *Ichor*, *Tabum*, *Virus*, *Pus malignum*, *P. corrosivum*, (F.) *Sanis*. A thin, serous fluid, presenting some of the qualities of pus and blood, and commonly exhaled at the surface of ulcers.

SANIODES, Sanidodes.

SANIOSUS, Ichorous.

SANIOUS, Ichorous.

SANITAIRE, (F.) That which relates to the health—as *établissement sanitaire*; *police sanitaire*.

SANITARIUM, *Sanato'rium*; from *sanitas*. 'health.' A retreat selected for valetudinarians, in consequence of its salubrity. Also, an establishment for the treatment of the sick.

SANITAS, *Hygie'ca*, *Hyg'ca*, *Hygian'sis*, *Hygi'asis*, *Integ'ritas*, *Prosper'itas*, *Valetu'dinis*, *Salus*, *Hygie'i'a*, *Valetu'do*, *Valitu'do*, *Valetu'dobona seu secun'da seu commoda*, *Hygie'ca*, *Euzoödyna'mia*, *Health*, (F.) *Santé*, from *sanus*, 'sound.' Health has been defined,—a state, in which all the functions are exerted with regularity and harmony. A person may, however, be in health, although certain functions are not performed. A blind man, for example, has health when all his functions, except sight, proceed with regularity.

SANITAS, Cure.

SANKIRA, Smilax China.

SANS PAIRE, (*Veins*), Azygos vein.

SANTA CRUZ, (CLIMATE OF.) This West India Island is frequently selected as a winter retreat for the phthisical valetudinarian from the United States; but it does not seem entitled to any preference, in such cases, over the other islands of the West Indies, whilst its general salubrity is said to be less than that of many.

SANTAL, Santalum album.

SANTALUM ALBUM, *S. citrinum*, *S. pallidum*, *Yellow Saunders*, *Sir'ium myrtifolium*, (F.) *Santal*. *Sex. Syst.* Tetrandria Monogynia. The virtues of the wood of the white

saunders reside in a volatile oil and resinous principle. The odour is fragrant, and resembles a mixture of ambergris and roses. It has been used as a stimulant and sudorific, but it is not now employed. The saunders woods are called, collectively, in French, *Santoux*.

SANTALUM RUBRUM, *Pterocarpus santalinus*.

SANTÉ, Sanitas.

SANTONICUM, *Artemisia santonicum*.

SANTORINI, FISSURES OF, (F.) *Inci-sures ou Scissures de Santorini*. Clefts at the upper and back part of the fibro-cartilaginous portion of the external ear.

SANTORINI, TUBERCLES OF. Small cartilaginous projections at the top of the arytenoid cartilages, which support the ligaments of the glottis. See *Corniculum Laryngis*.

SANVE, Sinapis.

SAPA, see Rob.

SAPHA'DA. Paracelsus has given this name to reddish scales adherent to the hair in some eruptions of the hairy scalp.

SAPHENA, Saphena.

SAPHENA, *Saphæna*, from *σαφης*, 'manifest,' 'evident.' (F.) *Saphèna*. A name given to two subcutaneous veins of the lower limb. These are: 1. The GREAT SAPHENA VEIN, *Saphena interna, Tibio-malleolar*, (Ch.) (F.) *Grandi Veins Saphèna ou Saphèna interna*. Its radicles occupy the inner part of the great toe, and form a transverse arch on the back of the foot, which unites with the saphena externa, and receives at its convex part, which is turned forwards, a number of branches coming from the toes. These radicles, when united, ascend before the inner ankle, and form a trunk, the size of which is farther increased by several branches that proceed from the region of the tarsus, and that of the metatarsus. This trunk ascends vertically at the inner part of the leg; passes behind the inner condyle of the femur; proceeds along the inner part of the thigh; receives other subcutaneous veins, such as the abdominal subcutaneous, the external pudic, &c., and passes through the inferior opening of the crural canal to empty itself into the femoral vein. 2. The LESSER VENA SAPHENA, or *Saphena externa*; the *Peroneo-malleolar Vein* of Chaussier, (F.) *Petite Veins Saphèna ou Saphèna externa*, commences by several roots, which are spread over the dorsum and outer side of the foot, and embrace the outer ankle. Behind this, they unite into a single trunk, which ascends obliquely, approaching the tendo Achillis, and proceeds vertically towards the ham to open into the popliteal vein.

SAPHENE, Saphena.

SAPID, *Sap'idus*, (F.) *Savoureux*. Possessed of sapidity. Having the power of affecting the organs of taste.

SAPID'ITY, *Sapor*, (F.) *Sapidité*, from *sapere*, 'to taste.' The quality of bodies that gives them taste.

SAPIN COMMUN, *Pinus picea*.

SAPINDUS SAPONARIA, *Soap Tree*, (F.) *Savonnier commun*. The name of the plant that affords the *Soap Nuts, Saponaria Nucula, Bacca Bermuden'ses, Soap-berries*. A spherical fruit about the size of a cherry, the cortical part of which is yellow, glossy, and so transparent as to show the spherical black nut that rattles within, and includes a white kernel. The cortical part of this fruit, which has simi-

lar effects with soap in washing, has been recommended in chlorosis, and as a stomachic and deobstruent.

SAPO, *Soap*, Sax. *Tape, Smegma*, (F.) *Savon*. A product obtained by treating fatty bodies with caustic alkalies dissolved in water. In the Pharmacopœia of the United States, it means Soap made with soda and olive oil.

YELLOW SOAP is formed of turpentine, oil, and alkali.

Castile Soap, being made of fine olive oil, is generally used internally. The yellow and soft soaps are the most stimulating; and are, consequently, best adapted for particular cutaneous eruptions.

Internally, soap is purgative and diuretic; externally, it is detergent and stimulant. Soapy water is used with the greatest success, in cases of poisoning by acids. It is mostly applied externally to bruises and sprains. In *Pharmacy*, it is used to favour the solution of resins.

SAPO AC'IDUS, *Acid Soap*, is a combination of a fixed oil with an acid.

SAPO AMMONIACALIS, *Linimentum ammoniæ fortius*—s. *Ammoniæ oleaceus, Linimentum ammoniæ fortius*—s. *Amygdalinus, Sapo medicinalis*—s. *Cacaotinus, Sapo coconeus*—s. *Calcarius, Linimentum aquæ calcis*—s. *Castiliensis*, see *Sapo Medicinalis*.

SAPO COCO'NEUS, *Soap of Cocoa Nut Oil, S. cacao'tinus*, (F.) *Savon de cacao*, has been much used in Germany in herpetic affections.

SAPO DURUS, S. *Hispanicus*—s. *Hispanicus*, see S. *medicinalis*.

SAPO KALIGUS, S. *Mollis*.

SAPO LIQ'UIDUS, *Liquid Soap, Lotio saponacea*, is a cosmetic which is composed of olive oil ℥iv, ol. tartari per deliquum ℥ss. Rub together, and add aqua rosarum ℥xij.

SAPO MEDICINA'LIS, *Medic'inal Soap, Sapo amygdali'nus*, (F.) *Savon medicinal*, is made with oil of sweet almonds and half its weight of caustic alkali or, like the *Sapo Hispanicus seu Castilens'is, Spanish or Castile soap, Sapo durus*, (F.) *Savon dur*, of olive oil and soda.

SAPO MOLLIS, *Common or Soft Soap, S. viridis, S. nig'or, S. kalicus*, (F.) *Savon mou, Savon noir*, is made of potass and oil or tallow. The *Sapo vulgaris*, or 'common soap' of the Pharm. U. S. is made with soda and animal oil.

SAPO NIGER, *Black Soap, Melanosmegma*, is a composition of train oil and an alkali; and GREEN SOAP, *Sapo viridis*, of hempseed, linseed, or rape oil with an alkali. See *Sapo mollis*.

SAPO VEGETABILIS, *Pulvis gummosus alkalinus*—s. *Viridis, Sapo mollis*—s. *Vulgaris*, see *Sapo mollis*.

SAPONA'CEOUS; *Saponaceus*; from *Sapo*, 'soap.' *Sospy*. Containing soap, as *Linimentum saponaceum*, *Soap liniment*.

SAPONAIRE, *Saponaria*.

SAPONARIA, from *Sapo*, 'soap.' *Soapwort, Bruise-wort, Struthium, Lana'ria, Lychnis sylvest'ris, Hiz'uma*, (F.) *Saponaire*. Family, Caryophyllæ. *Sex. Syst.* Decandria Digynia. A decoction of the leaves of this plant has been recommended in scrofula, cancer, old syphilis, cutaneous eruptions, jaundice, visceral obstructions, &c. It is hardly ever used.

SAPONARIÆ NUCULÆ, see *Sapindus saponaria*. SAPON'EA, from *Sapo*, 'soap.' A pectoral medicine, prepared with sweetened syrup of violets, and oil of sweet almonds.

**SAPONULES**, *Sapon'ula*, (F.) *Savonules*. Same etymon. Combinations of volatile or essential oils with different bases.

**ACID SAPONULES**, are combinations of such oils with different acids.

**SAPOR**, Sapidity, Savour.

**SAPOTA**, *Acras Sapota*, *Oval-fruited Sapota*, (F.) *Sapotier*, *Sapotillier*. *See Syst. Hexandria Digynia*. A tree which grows in the Antilles, and particularly at St. Domingo. Its fruit is much esteemed. It resembles the marmalade of quinces; and hence has been called *natural marmalade*. The seeds make an emulsion, which has been given in nephritic affections. The bark has been recommended as a febrifuge.

**SAPOTIER**, Sapota.

**SAPOTILLIER**, Sapota.

**SAPROPYRA**, Typhus gravior.

**SAPROS**, Putrid, Rancid.

**SAPROSTOMUS**, from *σαπρος*, 'foul, of a bad odour,' and *στομα*, 'mouth.' One who has an offensive breath.

**SAPROTES**, Putrefaction.

**SARAPUS**, *Sarapous*. One who has a large foot; whose toes are largely separated, or whose feet are much asunder in walking; from *σαρξ*, 'I grin,' and *πους*, 'the foot.' See *Kyllosis*.

**SARATOGA**, MINERAL WATERS OF.

The Saratoga springs in New York are ten miles north-east from Ballston. They contain the same ingredients as those of the latter place; and are much frequented by visitors from every part of the United States. The following analysis has been given of the *Congress spring*: In a wine gallon—*gaseous contents*: carbonic acid, 311 cubic inches; atmospheric air, 7. *Solid contents*. Chloride of sodium, gr. 385; iodide of sodium, gr. 3.5; bicarbonate of soda, gr. 8.982; bicarbonate of magnesia, 95.788; carbonate of lime, 98.098; carbonate of iron, 5.075; silica, 1.5; bromide of potassium, a trace. Total gr. 597.943.—Steel.

The *Walton* or *Iodine spring* contains chloride of sodium, carbonate of magnesia, and iodide of sodium.

**SARCEPIPOCELE**, Sarcœpiplocele.

**SARCEPILOMPHALOCELE**, Sarcœpiplomphacele.

**SARCEPILOMPHALUS**, Sarcœpiplomphalus.

**SARCIDIUM**, Caruncle.

**SARCINA**, Fœtus.

**SAR'CINA VENTRIC'ULI**, *Sarcina*, 'a pack, a woolpack.' A microscopic cryptogamous plant found in the fluid of waterbrash.

**SARCION**, Caruncle.

**SARCITES**, Anasarca—s. *Flatusus*, *Emphysema*.

**SARCITIS**, Myositis.

**SARCOCE'LE**, *Hernia carno'sa*, *Scirrhus Testis'culi*, from *σαρξ*, 'flesh,' and *αλλη*, 'a tumour;' *Sarco'ma scroti*, (F.) *Hernie charnus*. Scirrhus or cancer of the testicle. This disease affects adults particularly; and appears, most commonly, after an inflammatory swelling of the testicle. Sometimes it is dependent upon a blow; at others, it makes its appearance without any appreciable cause. It is well known by a hard, heavy, ovoid or spherical swelling of the testicle, which is, at first, slightly, or not at all painful, and merely causes an unpleasant traction on the spermatic cord.

There is no heat or change of colour of the skin; the spermatic cord is swollen, and participates in the affection: very painful shootings occur: the lymphatic glands of the abdomen become swollen, and form a tumour, which may, at times, be felt through the abdomen; and the patient, at length, dies with every sign of the cancerous diathesis. The prognosis is very unfavourable. The only means, indeed, that can save life is the extirpation of the testicle.

**SARCOCOL'LA**, (F.) *Colle-chair*, from *σαρξ*, 'flesh,' and *κόλλα*, 'glue.' A resinous matter, obtained from *Penæ's Sarcocol'la*, *P. macro-nata*, and other species of Penææ. An African shrub, which has been so called from a belief that it facilitates the consolidation of flesh. It is in the form of small, oblong, semitransparent globules, of a yellowish or reddish blue, and smells like aniseed. It was once employed as an astringent and detergent.

**SARCODES**, Carneous.

**SARCOEPIPOCE'LE**, *Sarcœpiploce'le*, from *σαρξ*, 'flesh,' and *επιπλοον*, 'the epiploon,' and *κηλη*, 'a tumour.' Epiplocele, complicated with sarcoma or sarcocele.

**SARCOEPILOMPHALUS**, *Sarcœpiplomphalus*, *Sarcœpiplomphalos'le*, from *σαρξ*, 'flesh,' *επιπλοον*, 'the epiploon,' and *ομφαλος*, 'the navel.' Umbilical hernia, formed by scirrhous epiploon or complicated with sarcoma.

**SARCOHYDROCELE**, Hydro-sarcocele.

**SARCOLEM'MA**, *Sarcole'ma*, from *σαρξ*, 'flesh,' and *λεμμα*, 'a coat.' The sheath which surrounds the fibrils of muscle that form a fibre. It is quite distinct from the cellular membrane that binds the fibres into fasciculi.—Bowman. See *Perymysium*.

**SARCOLOGIA**, Myology.

**SARCOLOG'Y**, *Sarcolog'ia*, from *σαρξ*, 'flesh,' and *λογος*, 'a discourse.' The part of anatomy which treats of the soft parts. It comprises myology, angiology, neurology, and splanchnology.

**SARCO'MA**, *Emphy'ma Sarcoma*, *Sarcoma'tous tumour*, *Sarco'sis*, *Porrus*, *Sarcophy'ia*, *Ezsarco'ma*, *Ezsarco'ma*, *Tumor car'neus*, *Excrecent'ia carno'sa*, *Pol'yypus carno'sus*, from *σαρξ*, 'flesh.' Any species of excrecence having a fleshy consistence.

**SARCOMA**, CARCINOMATOUS, Scirrhus—s. *Cercosis*, see *Cercosis*—s. *Epulis*, *Epulis*—s. *Mastoid*, *Mammary sarcoma*—s. *Medullare*, see *Encephaloid*—s. *Medullary*, *Encephaloid*, *Hæmatodes fungus*—s. *Pulpy*, *Hæmatodes fungus*—s. *Scroti*, *Sarcocele*.

**SARCOMA**, COMMON VASCULAR OF ORGANIZED OF *Abernethy*, *Emphy'ma Sarcoma Vasculo'sum*, is vascular throughout: texture simple: when bulky, mapped on the surface with arborescent veins. Found over the body and limbs generally.

**SARCOMATEUX**, Sarcomatous.

**SARCOMATODES**, Sarcomatous.

**SARCOMATOSUS**, Sarcomatous.

**SARCOMATOUS**, *Sarcomato'sus*, *Sarco'mato'des*, (F.) *Sarcomateuz*. Belonging to, or having the characters of sarcoma.

**SARCOMPHALUS**, Sarcomphalus.

**SARCOMPHALUM**, *Sarcom'phalum*, from *σαρξ*, 'flesh,' and *ομφαλος*, 'the navel.' A scirrhous or fleshy tumour, developed at the navel.

**SARCOMYCES**, Sarcopongus.

**SARCOPHAGUS**, Carnivorous, Cathartic.

**SARCOPHYIA**, Excrescence, Sarcoma.

**SARCOPE**, Acarus.

**SARCOPEDES** SCABIEL, see Psora.

**SARCOPO'DES**, from *σαρξ*, 'flesh,' *πυρ*, 'pus,' and *ιδος*, 'resemblance.' Having the appearance of pus mixed with flesh. An epithet given to certain excreted matters, and particularly to the sputa of those labouring under consumption.

**SARCO'SIS**, from *σαρξ*, 'flesh.' The formation of flesh. Also, sarcoma.

**SARCO'SIS BULBI**, *Exophthalmia fungosa* seu *sarcomat'ica*. A fleshy growth from the lobe of the eye.

**SARCOSPONG'US**, *Sarcomyces*; from *σαρξ*, 'flesh,' and *σπογγος*, 'fungus.' A fleshy fungus.

**SARCOTOSIS**, Osteo-sarcoma.

**SARCOTICUS**, Incarnans.

**SARCOUS**, from *σαρξ*, 'flesh.' Of, or belonging to flesh or muscle—as '*sarcous tissue*.'

**SARDIASIS**, Canine laugh, Risus sardonicus.

**SARDONIASIS**, Canine laugh, Risus sardonius.

**SARE**, Essera.

**SARASIN**, Polygonum fagopyrum.

**SARRETE**, Trismus infantum.

**SARRIÈTE**, *Satureia hortensis*—s. de Crète, *Satureia capitata*.

**SARSA**, *Smilax sarsaparilla*.

**SARSAPARILLA**, *Smilax S.*—s. False, *Aralia nudicaulis*.

**SARSAPARILLA GERMAN'ICA**, *Græmen major*, *G. rubrum*, *Salsaparilla Germanica*, *Carex Arenaria*, (F.) *Laiche*, *L. des Sables*, *Salsaparille d'Allemagne*. Family, Cyperoides. *Sex. Syst.* Monœcia Triandria. A plant, which grows plentifully on the sea-coasts of Europe. It has been recommended in some mucous affections of the trachea, in rheumatism, gout, &c.

**SARSAPARILLA**, INDIAN, *Hemidesmus Indicus*.

**SARTAPARILLA**, *Smilax sarsaparilla*.

**SARTORIUS**, from *Sartor*, 'a tailor,' because used in crossing the legs; *Sutorius*, *Longis'simus Femoris*, *Fasciatis*, *F. Longus* seu *sutorius*, (F.) *Il'io-cresti-tibial*, *Il'io-præ-tibial* (Ch.) *Couturier*. A muscle, situate at the anterior part of the thigh. It is long, small, and flattened, and extends, obliquely, from the anterior and superior spine of the ilium to the superior and inner part of the tibia. This muscle can, also, bend the pelvis on the thigh, and conversely.

**SARK**, Flesh, Pulp.

**SARZA**, *Smilax sarsaparilla*.

**SASSAFRAS**, *Laurus sassafras*—s. Medullæ, see *Laurus sassafras*—s. Radicis cortex, see *Laurus sassafras*—s. Swamp, *Magnolia glauca*.

**SAT'ELLITE**, *Satelles*. That which guards;—that which is placed near.

**SATELLITE VEINS** are those that accompany arteries.

**SATHE**, Penis.

**SATIES**, Satiety.

**SATIETAS**, Plemons.

**SATIETY**, *Sati'etas*, *Satur'itas*, *Sat'ies*, *Saturatio*, *Plethos*, *Plesmonè*, from *satiare*, (itself from *satis*, 'enough,') 'to give enough.' Disgust for food; commonly produced by repletion.

**SATIN**, *Lunaria rediviva*.

**SATURANS**, Absorbent (medicine).

**SATURATIO**, Satiety, Saturation.

**SATURATIO**, *Saturatio*, from *satis*,

'enough.' The state of a compound in which its elements are combined in such proportions that a fresh quantity of either cannot be added without producing excess.

**SATUREIA HORTEN'SIS**, *Satureia*, *S. sati'va*, *Cunila sativa* *Plin'ii*, *Thymra*, *Summer Savory*, (F.) *Sarride*. Family, Labiate. *Sex. Syst.* Didynamia Gymnospermia. An aromatic plant, cultivated for culinary purposes. It has been used, as an excitant, in anorexia, anaphrodisia, &c.

**SATUREIA CAPITA'TA**, *Cil'iated Savory*, *Thymus*, *Thymus sylvestris*, *Thymus Cret'icus*, *Cunila*, (F.) *Sarride de Crète*. Possesses similar properties to thyme.

**SATUREIA ORIGANOIDES**, *Cunila mariana*—s. *Sativa*, *S. hortensis*.

**SATURITAS**, Satiety.

**SATURNI DULCEDO**, *Plumbi superacetos*.

**SATURNINUS**, *Sat'urninus*; from *Saturnus*, 'lead.' Medicines containing lead.

**SATURNISM'US**, *Intoxicatio saturni'na*; from *Saturnus*, 'lead.' Poisoning by lead. Lead poisoning.

**SATURNUS**, *Plumbum*.

**SATYRI'ASIS**, from *Σατυρος*, 'a Satyr;' because the Satyrs are said to have been greatly addicted to venery. *Satyriac'us*, *Satyriac'us*, *Præp'is'mus*, *Salac'itas*, *Brach'ina*, *Aracon*, *Satyri'asis furens*, *Lagne'sis Salac'itas*, *Lagnesis furor masculi'nus*, *Lagne'a*, *Lagne'a*, *Lagno'sia*, *Lasciv'ia*, *Lasciv'itas*, *Tenti'go vere'tri*. An irresistible desire, in man, to have frequent connexion with females, accompanied by the power of doing so without exhaustion. The causes are commonly obscure. Sometimes, the abuse of aphrodisiacs has occasioned it. The principal symptoms are:—almost constant erection; irresistible and almost insatiable desire for venery; frequent nocturnal pollutions. Cold lotions; the cold bath; a mild diet; active exercise, &c., are the only means that can be adopted for its removal.

**SATYRIASIS FURENS**, *Satyriasis*.

**SATYRIASMUS**, *Satyriasis*.

**SATYRIUM**, *Orchis mascula*.

**SATYRISMUS**, *Satyriasis*.

**SATYRIUM**, *Goodyera pubescens*.

**SAUCE-ALONE**, *Alliaria*.

**SAUCE**, GREEN, *Rumex scutatus*.

**SAUER KRAUT** (G.), 'Sour Cabbage.'

(F.) *Chou-croûtes*. A culinary preparation, made with chopped cabbage, left to attain an incipient state of acetous fermentation. It is reputed by the Germans to be salubrious, easy of digestion, and eminently antiscorbutic.

**SAUGE**, *Salvia*—s. *des Bois*, *Teucrium scordium*—s. *Hormin*, *Salvia horminum*—s. *de Jérusalem*, *Pulmonaria*.

**SAULE**, *Salix*.

**SAUMURE**, *Muria*.

**SAUNDERS**, RED, *Pterocarpus santalinus*—s. Tree, *Pterocarpus santalinus*—s. Yellow, *Santalum album*.

**SAURA**, Lizard.

**SAUSAGE POISON**, *Allantotoxium*.

**SAUT**, Leap.

**SAUVE-VIE**, *Asplenium ruta muraria*.

**SAVEUR**, Savour.

**SAVINE**, *Juniperus sabina*.

**SAVINIER**, *Juniperus sabina*.

**SAVON**, *Sapo*—s. *Ammoniacal*, *Linimentum ammonie fortius*—s. *Cacao*, *Sapo coconus*

—s. *Calcaire*, Linimentum aque calcis—s. *Dur*, Sapo durus—s. *Médicinal*, Sapo medicinalis—s. *Mou*, Sapo mollis—s. *Noir*, Sapo mollis.

SAVONNIER COMMUN, *Sapindus saponaria*.

SAVONULE, *Saponulus*.

SAVONULUS, *Saponulus*.

SAVORY, CILIATED, *Satureia capitata*—s. Summer, *Satureia hortensis*.

SAVOUR, *Sapor, Taste, (F.) Saveur*. Quality of bodies, by which they act upon the sense of taste. The taste is not the same in all sapid bodies. It may be sweet, bitter, metallic.

Chymists, at times, avail themselves of this quality of bodies to analyze an unknown substance.

SAVOUREUX, Savoury.

SA'VOURY, *Sap'idus, (F.) Savoureux*. An epithet given to bodies that have taste; and particularly to those that excite a very agreeable impression on the organ of taste.

SAVOYAN, *Galium verum*.

SAW, *Prion, Serra, (Dan.) Sa we, (Sax.) Säge, (F.) Scie*. A surgical instrument made like a common saw; and used for sawing the bones in amputations, or for removing exostoses, &c. Saws of different sizes and shapes are used in surgery. The crown of the trepan is nothing more than a species of circular saw.

SAW, AMPUTA'TION, *Serra amputato'ria*. The saw used in amputation.

SAW, HEY'S. An instrument used by Mr. Hey of Leeds in fractures of the cranium. It consists of a long handle, to which a small saw with a convex, or straight edge is attached, and by which a piece of bone of any shape may be removed. With the trephine, the saw must always be circular.

SAW PALMETTO, *Chamærops serrata*—s. Wort, *Liatris*.

SAXIFRAGA, *Pimpinella saxifraga*—s. Angelica, *Peucedanum silaus*.

SAXIFRAGA CRASSIFOLIA. *Family, Saxifrageæ. Sez. Syst. Decandria Digynia*. The root of this species of saxifrage has been extolled by Pallas, as pre-eminently antiseptic.

SAXIFRAGA GRANULATA, *S. alba, Sonie'ula, Sedum, White sax'ifrage, (F.) Saxifrage granuléa*. Recommended as diuretic and lithontriptic; but not used.

SAXIFRAGA RUBRA, *Spiræa filipendula*—s. Vulgaris, *Peucedanum silaus*.

SAXIFRAGE, BURNET, *Pimpinella saxifraga*—s. *Granulée, Saxifraga granulata*—s. Meadow, *Peucedanum silaus*—s. White, *Saxifraga granulata*.

SAXIFRAGUS, Lithontriptic.

SAXONICUS PULVIS. A powder, prepared with the roots of the wild and cultivated angelica; the *asclepias vincetoxicum*, &c. It was considered formerly as an antidote.—*Pharm. Aug.*

SCAB, from *Scab'ies, and scabers, 'to dig.'* An incrustation which forms upon a sore, owing to the concretion of the fluid discharged from it. An eschar.

SCABBY or SCABBED; covered or diseased with scabs.

SCABIES, Psora—s. *Agria, Lichen*—s. *Capitis, Porrigo lupinosa, Porrigo scutulata*—s. *Capitis favosa, Porrigo favosa*—s. *Fera, Ecthy-ma*—s. *Ferina, Psoriasis*—s. *Papuliformis, Pru-*

*ri-go*—s. *Sicca, Lichen*—s. *Sicca, Psoriasis*—s. *Veneræ contagiosa, Scherlievo*.

SCABIEUSE ORDINAIRE, *Scabiosa*. SCABIOLA, *Scabies*.

SCABIO'SA, *S. Arvensis, Field Scab'ious, (F.) Scabieus ordinairis. Family, Dipsacæz. Sez. Syst. Tetrandria Monogynia*. The plant is bitter and subastringent, and was formerly used in the cure of leprous affections and diseased lungs.

SCABIOSA ARVEN'SIS, *Scabiosa*—s. *Carduifolia, Echinops*.

SCABIOSA SUCCI'SA, *Succisa, Morsus Diab'oli, Devil's bit, (F.) Mors du Diable*, has similar properties.

SCABIOUS, *Erigeron Philadelphicum*—s. *Field, Scabiosa*—s. Sweet, *Erigeron heterophyllum*.

SCABISH, *Ceanotha biennis*.

SCABRITIES, *Lichen*.

SCALA, 'a ladder.' A machine formerly used for reducing dislocations of the humerus.

SCALE OF THE COCH'LEA, *Gyri seu Ductus spirales seu Canales cochleæ, (F.) Rampes ou Echelles du Limaçon*—are the cavities in the cochlea, separated from each other by the spiral septum. The one—*Scala interna seu posterior seu inferior coch'leæ, S. Tym'pani*—would communicate with the cavity tympani by the fenestra rotunda, were it not for the membrane that closes it. The other—*Scala externa seu anterior seu superior coch'leæ, S. vestibuli*—opens into the cavity of the vestibule. The scale communicate with each other by an opening at the top of the partition.

SCALE ANTERIOR COCHLEÆ, *See Scala*—s. *Clausa, see Scala*—s. *Externa cochleæ, see Scala*—s. *Inferior cochleæ, see Scala*—s. *Interior cochleæ, see Scala*—s. *Posterior cochleæ, see Scala*—s. *Superior cochleæ, see Scala*—s. *Tympani, see Cochlea and Scala*—s. *Vestibuli, see Cochlea and Scala*.

SCALE, *Squama, Lepis, (F.) Écaille*. An opaque and thickened lamina of cuticle; commonly produced by some degree of inflammation of the true skin, over which it is formed.

SCALE, DRY, *Psoriasis*.

SCALENE ANTERIEUR, *Scalenus anticus*—s. *Posterior, Scalenus posticus*.

SCALE'NUS; 'irregular or unequal.' Geometers employ this word to designate a triangle whose three sides are unequal. Anatomists have given the name to two muscles. 1. SCALENUS ANTI'CUS, *Portion of the Costo-trachelian, (Ch.) (F.) Scalenus antérieur*, is situate at the lateral and inferior parts of the neck. It is long and triangular; and is inserted, below, at the upper surface of the first rib; and, above, at the anterior tubercle of the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebrae. This muscle bends the neck, and draws it to its side. It can also raise the first rib.

2. SCALENUS POSTI'CUS, *(F.) Scalenus postérieur, Portion of the Costo-trachelian, (Ch.)* is situate behind the last. It is also long and triangular; but more bulky than the *S. anticus*. It is attached, below, to the outer surface of the first two ribs; and terminates, above, at the summit of the transverse processes of the last six vertebrae of the neck. This muscle bends the neck laterally, and can elevate the first two ribs. Some anatomists, as Albinus and Sömmerring, have described five scaleni muscles on

each side, and have called them *Scalenus prior*, *S. minimus*, *S. lateralis*, *S. medius*, *S. posterior*. Riolan and Chaussier only describe one scalenus muscle on each side. Cowper and Douglas, and the generality of the English anatomists, admit three, *S. anterior*, *medius*, and *posterior*; or *Primus*, *secundus*, and *tertius*;—Winslow, Boyer and many of the French anatomists,—two, as above described.

SCALL, Impetigo—s. Asbestos, see Eczema of the hairy scalp—s. Dry, Psoriasis—s. Honeycomb. Porrigo favosa—s. Milky, Porrigo larvalis—s. Running, Impetigo—s. Running, Eczema—s. Washerwoman's, Psoriasis diffusa.

SCALLED HEAD, Porrigo scutulata.

SCALP, Teut. Schelpe, 'a shell.' The integuments covering the head. The hairy scalp is called, also, *Capillitium*, *Trichotom*, (F.) *Chevelure*.

SCALPEL, *Scalpellum*, *Scalpellus*, *Culter*, *Incisorium*, *Smileon*; from *scalpo*, 'I rasp, I cut.' A cutting instrument, formed of a blade of well-tempered steel, very sharp, of variable shape and size, and fixed solidly in a handle. Its use is to divide the soft parts in operations, dissection, &c.

SCALPELLUM, Scalpel—s. Lenticulare, Phacopis.

SCALPELLUS, *Bistouri*, Scalpel.

SCALPEUM, *Bistouri*.

SCALPRUM, *Raspatorium*—s. Chirurgicum, Lancet.

SCALPRUM DENTARIUM, *Lima dentaria*. A tooth file. A file used by the dentist.

SCALPRUM RASORIUM, *Raspatorium*.

SCALY, Squamous.

SCALY DISEASES OF SKIN, *Lepidoses*, form the second order in Willan and Bateman's system of cutaneous diseases.

SCAMMA, Fossa.

SCAMMONEE D'ALEP, *Convolvulus scammonia*.

SCAMMONIUM, see *Convolvulus scammonia*—s. Syriacum, *Convolvulus scammonia*.

SCAMMONY, *Convolvulus scammonia*—s. of Montpellier, *Cynanchum Monspeliacum*.

SCAMNON HIPPOCRATIS, *Bathron*.

SCAMNUM HIPPOCRATIS, *Bathron Hippocraticum* of Galen, (F.) *Banc d'Hippocrate*. A machine invented by Hippocrates for reducing fractures. It was a sort of bed, six feet long; on which the patient was fixed. Straps were attached above and below the fracture or luxation, and extension and counter-extension were effected by a winch. It is described in Galen, Orbasius, Scultetus, &c.

SCANDIX, *S. cerefolium*.

SCANDIX CEREFOLIUM, *Scandix*, *Scandyx*, *Pecten Venetis*, *Cerefolium*, *Daucus Sepinius*, *Charophyllum*, *Ch. Sativum*, *Anthriscus cerefolium*, *Cherosefolium*, *Charvil*, (F.) *Cerfeuil*. Family, Umbelliferae. Scz. Syst. Pentandria Digynia. A culinary herb, which is slightly aromatic and grateful. It is said to be gently aperient and diuretic.

SCANDIX ODORATA; *Sweet Cicely*. Properties the same as the other. Also, *Charophyllum odoratum*.

SCANDULARIUS MUSCULUS, *Parthenar*, *Transversus pedis*.

SCANDYX, *Scandix cerefolium*.

SCAPHA, *Scapha*, 'a skiff or cock-boat;' from *σκαπη*, 'I make hollow.' The excavation

or cavity of the external ear, between the helix and anthelix. The meatus auditorius externus. The rima vulvae. Also the name of a bandage for the head, mentioned by Galen, and called likewise, *Tholus Diocletus*.

SCAPHIA, Nates.

SCAPHION, Cranium, Papaver (Capsule.)

SCAPHIUM OCULARRE, *Pelvis Ocularis*, *Eye-glass*, (F.) *Bassin oculaire*, *Gondole oculaire*, *Œillière*. A small porcelain glass or metallic vessel used for applying lotions to the eye.

SCAPHO-CARPO-SUPER-PHALANGIUS POLLICIS, *Abductor pollicis brevis*.

SCAPHOID, *Scaphoides*, from *σκαφη*, 'a skiff,' and *σδος*, 'form.' A name given to several parts.

SCAPHOID FOSSA, *Fossa Scaphoides*, (F.) *Enfoncement Scaphoïde*. A small cavity at the upper part of the internal ala of the pterygoid process, in which the peristaphylinus internus is attached.

SCAPHOID BONE OF THE HAND, *Os Scaphoides Manus*, *Os naviculare*, *Os cymbiforme*, *Boat-like bone*, (F.) *Scaphoïde de la main*. The first bone of the first row of the carpus. The upper surface is convex, and articulated with the radius. The under and outer surfaces are also convex,—to be articulated with the trapezium and trapezoids. Between the upper and under cartilaginous surfaces there is a rough fossa for the insertion of the capular ligament. The anterior and inner surface has an oval cavity, where it is articulated with the os magnum, which gives name to the bone. There is a process on the outer end of the bone, for the attachment of part of the anterior transverse ligament of the wrist.

SCAPHOID BONE OF THE FOOT, *Os Scaphoides Pedis*, *Os naviculare*, *Os cymbiforme*, *Boat-like bone*, (F.) *Scaphoïde du Pied*. This bone is situate at the forepart of the astragalus and inner part of the foot. The posterior surface forms a cavity, somewhat like that of a boat, for receiving the head of the astragalus. There is a prominence at the inner side of the bone, for the insertion of tendons, muscles, and strong ligaments. The forepart of the bone is convex, and divided into three articular surfaces for articulation with the ossa cuneiformia. Between the os naviculare and astragalus, the foot has its principal lateral and rotary motions; although each of the other joints of the tarsus contributes a little. Part of the tibialis posticus is inserted into it.

SCAPHOÏDE DE LA MAIN, *Os scaphoides manus*—s. *du Pied*. *Os scaphoides pedis*.

SCAPHOIDO-ASTRAGALAN, *Scaphoïde astragalanus*. That which relates to the scaphoid bone and astragalus. The articulation of these bones is so called; and the ligament which strengthens it is termed the *Scaphoïdo-astragalan ligament*.

SCAPHOIDO-CUBOID, *Scaphoïdo-cuboides*. That which relates to the scaphoid and cuboid bones. The articulation of those bones is so called.

SCAPHULA, *Navicularis fossa*.

SCAPHUS, Auditory canal, external, Rima vulvae, *Scapha*.

SCAPULA, *Scapulum*, *Plata*, *Omo-plata*, *Homoplate*, *Scapula*, *Epinotion*, *Latitudo h'omeri*, *Omo-platè*, *Os latum h'omeri*, *Scutum thoracis seu cordis*, *Spathula*, *Pterygium*, *Cho-*

*lo'nium, Spat'ula*; the *Blade-bone*, the *Shoulder-blade*, (F.) *Omo'plate*. An irregular, broad, flat bone, of a triangular shape, situate at the posterior part of the shoulder. It has, 1. A *posterior or dorsal surface* or *Dorsum*, *Testu'do scap'ulae*, divided transversely into two parts, by a triangular process, called *Spine of the Scapula*; which terminates by a considerable eminence, called *Acromion*. Above the spine, is the *Fossa supra-spinata*; below it, the *F. infra-spinata*. 2. An *anterior or costal surface*, or *venter*, forming the *Fossa subscapularis*. 3. A *superior or cervical edge*, which is thin, and terminates, anteriorly, by a strong, curved apophysis, called the *coraco'id process*. 4. A *posterior or vertebral edge*, called, also, the *base*. 5. An *outer or axillary or inferior edge*, having a thick, truncated angle, in which is the *glenoid cavity*. With this is articulated the head of the humerus. The glenoid cavity is separated from the body of the bone by a narrower part, called the *corvix* or *neck*. The edges or margins are, also, called *costae*. The scapula has three angles—an *inferior, superior, and anterior*.

SCAPULA, Humerus.

SCAPULÆ NASI, *Partes laterales nasi*. The lateral parts of the nose.

SCAP'ULAR, *Scap'ulary, Scapula'ris*, from *scapula*, 'the shoulder-blade.' That which relates or belongs to the scapula.

SCAPULAR APONEURO'SIS. A broad, thin, aponeurosis, with decussating fibres; which is attached, *above*, to the spine of the scapula; *below*, to a crest between the *teres major* and *infra-spinatus*; *within*, to the spinal edge of the scapula; and which, at its middle, unites with the thin aponeurosis that covers a part of the external surface of the deltoid.

SCAPULAR ARTERIES. These are several. a. The *Superior scapular, Superficial scapular* of Sommering, *Dorsalis scapulae superior, Transversalis scapulae, T. Hu'meri*. This arises from the subclavian; and often from the inferior thyroid, or from a trunk common to it and the *posterior scapular* or *transverse scapular* or *cervical*. It passes behind the clavicle, above the superior edge of the scapula, and buries itself between the dorsal surface of that bone and the muscles inserted into it. b. The *inferior scapular* or *common scapular* or *internal scapular* or *subscapular artery, A. Thorac'ica axilla'ris* vel *ala'ris*, is of considerable size. It arises from the inferior part of the axillary artery, behind the brachial plexus—gives off several branches to the armpit, and divides into two branches—the one, *Scapularis interna*, and the smaller of the two, is distributed, almost entirely, to the serratus major anticus, and latissimus dorsi; the other, the larger of the two, the *Dorsalis Scapulae inferior* vel *Circumflexa Scapula'ris*, which distributes its branches to the subscapular and supra-spinal, and infra-spinal regions.

SCAPULAR NOTCH, see Notch, scapular.

SCAPULAR VEINS follow the same course as the arteries, which they accompany.

SCAPULARE, Scapulary.

SCAP'ULARY, *Scapula're, Fascia Scapula'ris*, from *scapula*. A broad, linen bandage, divided into two tails for three quarters of its length, the undivided extremity of which is attached to the posterior and middle part of a bandage carried round the body; the tails pass-

ing over the shoulders; and being attached to the anterior part of the body bandage, to prevent it from slipping down.

SCAP'ULO-HU'MERAL. An epithet given to the *shoulder-joint*. It is an orbicular articulation, resulting from the reception of the head of the humerus into the glenoid cavity of the scapula. To keep the bones in connexion, there are: 1. A very strong, conoidal capsular ligament; passing from the circumference of the glenoid cavity around the neck of the humerus. 2. A *fibro-cartilaginous ring*, called the glenoid ligament, and a synovial capsule.

SCAPULO-HUMÉRAL, *Teres major—s. Hu'méro-olécranion, Triceps extensor cubiti—s. Hyoidien, Omohyoideus—s. Radial, Biceps flexor cubiti—s. Trochitérien, grand, Infra-apinatus*.

SCAPUS, Penis.

SCARABÆOLUS HEMISPHERICUS, *Coccus cacti*.

SCARBOROUGH, MINERAL WATERS OF. *Scarborough Spa*. A celebrated English chalybeate, at Scarborough, in Yorkshire. One of the springs is a simple, carbonated chalybeate, like that of Tunbridge; the other has an admixture of purging salt. Scarborough, having the additional advantage of sea-bathing, is much frequented by invalids.

SCARDAMYGMUS, *Scardamyx'is*, (F.) *Clignement*, from *εναυαυωσις*, 'to wink.' Winking, nictation.

SCARIFICATION, *Scarificatio*, (Galen.) *Amyx'is, Schasia, Cataca'cus, Catachus mus, Amyg'mus, Schasmus, Encharax'is*, from *επιρραγμα*, 'to make a slight scratch.' The act of scarifying. Also, a small incision, *Amy'cht*, made into the skin with a lancet, bistoury, or scarificator, for different therapeutical purposes,—as to draw blood, or to discharge some effused fluid. When the scarifications are very superficial, and do not go farther than the skin, they are termed by the French, *Mouchetures*.

SCARIFICATOR, *Scarificato'rium, Schar'to'rium*. An instrument for making scarifications. It consists of a small brass box, of a cubical shape, in which 10 or 12 lancet points turn upon a common pivot. By means of a spring, all these blades can be made to issue at once, and make as many scarifications.

SCARIFICATORIUM, Scarificator.

SCARIOLA, *Cichorium endivia, Lactuca scariola*.

SCARIOLE, *Cichorium endivia*.

SCARLATA, *Scarlatina*.

SCARLATINA, from *scarlatto* (I.), 'a deep red.' *Scarlatina, Enanth'is Rosa'lia, Rosa'lia, Rossa'lia, R. squamo'sa, Rosa'lix, Rub'ole*, of some, *Morb'li ign'oi, M. conjunctus, Morbus scarlatinosus, Febris scarlatino'sa, Gut'turis morbus epidem'icus Forest'i, Pur'pura, Typhus scarlatinus, Febris rubra, Scarlet Fever, Rash-fever, Porphyris'mus, Porphyrisma*, (F.) *Fèvre rouge, F. pourprée*. The characteristic symptoms of scarlatina are:—a scarlet flush, appearing about the second day of fever on the face, neck, and fauces; and progressively spreading over the body; terminating about the 7th day. Two great varieties may be reckoned;—the *S. simplex, S. febris, S. benigna, S. sine angina*, in which the fever is moderate and terminates with the efflorescence; prostration of strength being trifling, and the contagious property slight;—

and the *S. Angino'sa*, *S. Paristhmica*, *S. Cynanchica*, *S. mit'ior*, in which the fever is severe; the throat ulcerated; the eruption later in its appearance, and less extensive; often changing to a livid hue; the fever being highly contagious. *Scarlatina maligna*, *S. gravior*, has been reckoned a variety of this, in its worst degree. It agrees with the *Cynanche maligna* of Cullen.

Scarlatina belongs to the *Major exanthemata*, and is a disease, chiefly, of children. The eruption differs from measles, in being an efflorescence not raised above the cuticle. Measles, too, is attended with catarrhal symptoms, whilst the complication, in scarlatina, is cynanche. The treatment of simple scarlatina need not be much. It must be antiphlogistic. If the throat be very much ulcerated, acid gargles and counter-irritants must be employed; and if the affection become manifestly typhoid, and the sore throat of a malignant character, the case must be treated like typhus gravior; along with antiseptic gargles of bark, acid, &c. Anasarca sometimes supervenes on scarlatina, and requires attention. Purgatives are here demanded as well as the use of sorbifacients, such as mercury and squill, &c.

SCARLATINA ANGINOSA, see Scarlatina—s. Benigna, see Scarlatina—s. Cynanchica, see Scarlatina—s. Febris, see Scarlatina—s. Gravior, see Scarlatina—s. Mitior, see Scarlatina—s. Miliaris, Rubecula—s. Paristhmica, see Scarlatina—s. Pustulosa, Rubecula—s. Rheumatica, Dengue—s. sine Anginâ, see Scarlatina—s. Urticata, Urticaria.

SCARLET BERRY, *Solanum dulcamara*.

SCARLET FEVER, Scarlatina.

SCATACRASIA, *Scoracrasia*.

SCATACRATIA, *Scoracrasia*.

SCALAL'GIA, from *σκαλας*, 'the leg,' and *αλγος*, 'pain.' Pain of the leg.

SCALALGIA PNEUMONICUM, *Phlegmatia dolens*.

SCELETEU'SIS. Mummification. Also, the mode of making a skeleton, *Skulotopa'a*, *Syntaxis*.

SCELETOLOGIA, *Skeletology*.

SCELETON, *Skeleton*.

SCELETOPŒA, *Sceleteusis*.

SCELETUM, *Skeleton*—s. *Artificiale*, see *Skeleton*—s. *Naturale*, see *Skeleton*.

SCELONCUS, *Phlegmatia dolens*.

SCELORHEU'MA, *Rheumatis'mus cruris*,

from *σκαλας*, 'the leg,' and *ρευμας*, 'defluxion, rheumatism.' Rheumatism of the leg.

SCELOS, *Leg*.

SCELOTYRBE, *Chorea*, *Porphyra nautica*—s. *Febrilis*, see *Subaltus tendinum*—s. *Festivans*, *Paralysis agitans*—s. *Tarantismus*, *Chorea*.

SCEPARNON, *Amnion*, *Ascia*.

SCEPASTERIUM, *Couvreschaf*.

SCEPASTRUM, *Couvreschaf*.

SCEPTRUM, *Penis*.

SCHASIS, *Scarification*.

SCHASMUS, *Scarification*.

SCHASTERION, *Fleam*, *Lancet*, *Scarificator*.

SCHIBA ARABUM, *Artemisia santonica*.

SCHERBET', *Sherbet*, *Sorbet*, *Tscherbet*, *Sorbethum*, *Sorbetzum*, *Sorbetzum*. A drink prepared by the Turks, Persians, &c., with sugar and the juice of acid fruits.

SCHERLIEVO, *Mal di Scherlievo*, *Mal di Brono*, *Mal di Fiume*, *Margaretizza*, *Morbus Croatus*, *Frambosia Illyrica*, *M. Fuminion'sis*, *Falcadina*, *Mal di Scarlivo*, *Scabies venerea contagiosa*. A name given to a particular form of syphilis, observed in Illyria. It is said to be capable of being communicated without immediate contact; and, that its principal symptoms are;—pains in the bones, ulceration of the fauces, pustules, and fungous growths in different parts of the body.

SCHEROMA. A dryness of the eye from the want of lachrymal secretion.—Dictionaries.

SCHIAS, *Neuralgia femoro-poplitæa*.

SCHIDAKE'DON, *Schidacodum*, *Schidacodum*, *Schindal'amus*, *Schindal'mus*, from *σχιζω*, 'I cleave.' A longitudinal fracture of a bone.—Galen.

SCHINDACEDUM, *Schidakedon*.

SCHINDALAMUS, *Schidakedon*, *Schindylesis*.

SCHINDALESIS, *Schindylesis*.

SCHINDALMUS, *Schidakedon*, *Schindylesis*.

SCHINDYLE'SIS, *Schindalesis*, *Schindal'amus*, *Schindal'mus*. An articulation of bones—by furrowing, as it were; as in that of the vomer, which constitutes, in part, the septum narium. Also, the act of splitting into small pieces; from *σχιζω*, 'I split into small pieces.'—Hippocrates.

SCHINELÆ'ON, from *σχιος*, 'the mastic tree,' and *λαιον*, 'oil'; *Oleum lentiscinum*. Oil of mastic.—Dioscorides.

SCHINOCEPHALUS, *Scillocephalus*.

SCHINOS, *Scilla*.

SCHISMA, *Fissure*, *Rima*.

SCHISTOCEPH'ALUS, from *σχιστος*, 'cleft, separated,' and *κεφαλη*, 'head.' A monster having some part of the head cleft or fissured.—Gurli.

SCHISTOCOR'MUS, from *σχιστος*, 'cleft, separated,' and *κορμος*, 'trunk.' A monster having some part of the trunk cleft or fissured.—Gurli.

SCHISTOM'ELUS, from *σχιστος*, 'cleft, separated,' and *μελος*, 'a limb.' A monster whose limbs are fissured.

SCHIZA, *Rima*, *Rima vulvæ*.

SCHIZATRICH'IA, *Trichos'chisis*, *Schizotrich'ia*, from *σχιζα*, 'a cleft,' 'a split,' and *τριχ'*, 'a hair.' The splitting of the hairs at their extremities.—J. P. Frank.

SCHLANGENBAD, MINERAL WATERS OF. Schlangenbad is a much frequented watering place in Germany. The waters contain a little carbonic acid, and carbonate of soda. Temperature 86° Fahrenheit.

SCHNEIDERIAN MEMBRANE, *Pituitary membrane*.

SCHŒNANTHUS, *Juncus odoratus*.

SCHOLA, *School*.

SCHOOL, *Schola*. A place of education. (F.) *École*. In Europe, the large Medical Schools are usually attached to the universities. In England, however, there has been no medical school of celebrity at either of the universities of Oxford or Cambridge; owing greatly to their provincial situation. Of late, two schools have existed in London, attached to the London university—University college and King's college. Excellent private schools have, however, long existed in that metropolis. The medical schools

of Europe which have been most celebrated are those of Edinburgh, Leyden, Berlin, Halle, Tübingen, Paris, Montpellier, Bologna, Padua, Pavia, and Pisa. In the United States, the medical schools are numerous; at this time not fewer than 30 or 40. Those most numerous attended are the medical department of the University of Pennsylvania, Jefferson Medical College of Philadelphia, the University of the City of New York, and the Lonierville Medical Institute.

**SCHOOLEY'S MOUNTAIN, MINERAL WATERS OF.** The waters of this New Jersey Spring are chalybeate. According to Dr. McNevin, they contain extractive, chloride of sodium, chloride of calcium, chloride of magnesium, carbonate of lime, sulphate of lime, carbonate of magnesia, siliceous, and carbonate, and oxide of iron.

**SCHORBUTUS, Purpura.**

**SCHOUSBÆA COCCINEA, Cacoucia coccinea.**

**SCHWALBACH, MINERAL WATERS OF.** Schwalbach is a town of Germany, seated on the Aa, 32 miles west of Frankfort. The waters contain chloride of sodium, carbonates of lime and magnesia, iron, sulphate of lime, carbonic acid, and oxygen, &c. Employed as a tonic.

**SCHWANN, WHITE SUBSTANCE OF,** see Substance, white, of Schwann.

**SCHWENDECK, MINERAL WATERS OF.** These waters are about 5 leagues from Munich in Bavaria. They contain carbonic acid; carbonate and sulphate of lime, chloride of calcium; chloride of magnesium; carbonate of soda, and oxide of iron, and are much used for cutaneous affections.

**SCIATIC, Ischiat'ic, Ischiat'icus, Sciat'icus,** from *σχιος*, 'the haunch.' A word formed by contraction from *ischiatice*, which latter is still used. See Ischiatic.

**SCIATIC NERVE, GREAT, Nervus ischiad'icus, Great femoro popliteal (Ch.) (F.) Grande nerf sciaticque,** ought to be esteemed a continuation of the sacral plexus. It issues from the pelvis between the pyramidalis and superior gemellus; descends along the posterior part of the thigh; and after having given branches to the gemini, quadratus, obturator externus, glutæus maximus, semi-membranosus, semi-tendinosus, biceps and third adductor muscles, it divides, about the inferior third of the thigh, into two branches; the one, named the *external popliteal*; the other, the *internal*.

**SCIATIC NERVE, LESSER, Inferior glut'al branch of the sacral plexus, lesser femoro-popliteal nerve, (Ch.) (F.) Nerf petit sciaticque,** which seems especially formed by the 2d and 3d sacral, is given off from the lower part of the plexus, and escapes from the pelvis beneath the pyramidalis muscle. It gives branches to the glutæus maximus,—a *sciatic branch* or *infra-pelvic cutaneous*, which passes under the tuberosity of the ischium, and furnishes filaments to the glutæus maximus, and to the muscles of the perinæum, urethra, penis, scrotum, &c.,—and a *posterior femoral cutaneous branch*, the filaments of which traverse the femoral aponeurosis to be distributed on the skin of the posterior part of the thigh. The principal branch of the lesser sciatic nerve divides, near the ham, into two or three filaments, which descend under the integuments almost as far as the inferior part of the leg.

**SCIATIC NOTCH, GREAT, Sciatic Foramen, Incisur'a ischiad'ica major, (F.) Grande échancrure sciaticque** ou *grand trou sciaticque*, is a large notch at the posterior edge of each os innominatum, below the posterior and inferior iliac spine, which is converted into a foramen by the sacrum and sacro-sciatic ligaments. The *lesser sciatic notch, Incisur'a Ischiad'ica minor, Luna Albi'ni, (F.) Petite échancrure ischiaticque*, is much smaller than the last, from which it is separated by the sciatic spine. It gives passage to the tendon of the obturator internus, and to the internal pudic vessels and nerves.

**SCIATIC REGION, Ischiadic region.**

**SCIATIC SPINE, Spine of the Ischium, Spinosa Proc'ess of the Ischium,** is a short, flat, pyramidal eminence on the os innominatum, above the preceding foramen; which gives insertion to the lesser sacro-sciatic ligament.

**SCIATICA, Neuralgia femoro-poplitæa.**

**SCIE, Sav.**

**SCIENTIA HERMETICA, Alchymy—s. Medendi, Medicina—s. Medica, Medicina.**

**SCIEROPIA, from σκιος, 'shady,' and οψ, 'the eye.'** A defect of vision, in which all objects have a darker hue than natural.

**SCILLA, Scilla marit'ima, Scylla, Aschil, Schinos, Oculus Typho'nis, Ornithogalum marit'imum, Squilla, squill or sea onion, Eye of Typhon, (F.) Oignon marin. Family, Liliaceæ. Sez. Syst. Hexandria Monogynia.** Native of Spain, Austria, &c. The bulb or root of the squill has a bitter, nauseous taste, and is extremely acrid; inflaming the skin when rubbed on it. Its acrimony, on which its virtues depend, is destroyed by heat, drying, and keeping. It is extracted by vinegar, spirit, and water. In large doses, squill is emetic and purgative; in small doses, diuretic, and expectorant. Its active principle has been called *scillitins*. Dose, gr. j to v of the dried root, united or not with mercury.

**SCILLOCEPHALUS, Schinoceph'alus,** from *σκυλλα*, 'a bulbous rooted plant, the squill,' and *κεφαλη*, 'head.' One who has a large bulbiform head.

**SCINCUS, σκινκος, or σκινγιος.** A species of *Saurus* or *Lacerta*, common in Egypt, and much extolled by the ancients, as alexipharmic and aphrodisiac.

**SCINTILLA VENERIS, 'a relic of Venus.'** A name given, by Paracelsus, to the impotence and loss of power in the limbs, produced by syphilis.

**SCIOM'ACHY, Skioma'chia, Skimachia;** from *σκια*, 'a shade,' and *μαχη*, 'a fight.' An exercise with the ancients, which consisted in a mock encounter at boxing and jumping with one's own shadow.

**SCIRRHE, Scirrhus.**

**SCIRRHOBLEPHARONCUS, see Scleriosis.**

**SCIRRHOCELE, Orchecele scirrhusa.**

**SCIRRHOGASTRIA, (F.) Squirrogastrie; Scirrhus ventriculi;** from *σκιρος*, 'hard,' and *γαστηρ*, 'stomach.' Scirrhus of the stomach.

**SCIRRHOID, Scirrho'ides, Scirrho'ides,** from *σκιρος*, 'scirrhus,' and *ειδος*, 'resemblance.' Resembling scirrhus.

**SCIRRHOMA, Scirrhus.**

**SCIRRHOPHTHALMIA, Scirrhophthal'mia,** from *σκιρος*, 'scirrhus,' and *οφθαλμος*, 'the eye,' *Cancer oculi.* Cancer of the eye.

SCIRRHOPHTHALMIA PALPEBRARUM, see Scleriosis.

SCIRRHOSARCA NEONATORUM, Induration of the cellular tissue.

SCIRRHOUS, Scirrhus.

SCIRRHOUS, *Scirrhus*; same etymon as scirrhus. Of or belonging to scirrhus.

SCIRRHUS SARCOMA OF ABERNETHY, *Emphyma sarcoma scirrhum*. Hard, rigid, vascular infarction of glandular follicles; indolent, insentient, glabrous; sometimes shrinking and becoming more indurated. Found in glandulous structures.

SCIRRHUS, *Squirrhus*, *Scirrhus*, *Scirrhus*, *Scirrhus*, *Cancer scirrhus*, *Carcinoma simplex*, *C. fibrosum*, *Induratio maligna*, *Schirrus*, *Sclerus*, *Carcinomatous sarcoma*, *Hard cancer*, *Fibrous cancer*; from *σκληρος*, 'hard,' 'indurated;' (F.) *Squirre*, *Schirre*, *Skirre*. A disease, so called from the hardness that characterizes it. It is a state of induration, of a peculiar kind, affecting glandular structures generally, but capable of occurring in other textures. It usually precedes carcinoma, of which it may, indeed, be considered as the first stage. Scirrhus must not be confounded with the induration which succeeds inflammation, although the two states are often complicated, and may stand, occasionally, in the relation of cause and effect to each other. Scirrhus is ordinarily accompanied by violent shooting pains. It is also irregular on its surface; and when cut into has a bluish or grayish white colour. When the surgeon is satisfied of the existence of scirrhus, he had better remove it at once. No other treatment seems to possess much advantage.

Galen uses the term *Scirrhus* for a livid excrescence caused by inflammation.

SCIRRHUS ET CARCINOMA VENTRICULI, see Gastrostenosis cardiaca et pylorica—s. Hepatis, Hepatoscirrhus—s. Intestinorum, Enteropathia cancerosa—s. Palpebrarum, see Scleriosis—s. Testiculi, Sarcocoele—s. Uteri, Metroscirrhus—s. Ventriculi, Gastroscirrhus.

SCISSORS, *Forpex*, *Forpez*, *Psalis*, *Tomis*, (F.) *Ciseaux*. A well known instrument in common use, and often employed in surgery. Scissors are composed of two cutting blades, crossing each other and moving upon an axis. They are *straight* or *curved*. Sometimes the curve is on the flat side when they are called in France *Ciseaux à cuiller*; at others, on their edges. The scissors, bent so that the blades make an obtuse angle with the handles, are also much used. They are called in France *Ciseaux coudés*. Scissors are used for dividing soft, loose, isolated parts, which it would be difficult to reach and to cut with the bistoury. They are employed, likewise, in the operation for harelip, and for removing warts, fungous excrescences, &c.

SCISSURA, Fissure—s. Vulvæ, see Rima.

SCISSURÆ, Rhagades.

SCISSURE DE GLASER, Fissure, glenoid—s. *Grande médiane du Cervelet*, Valley—s. *de Santorini*, Santorini, fissure of.

SCLAREA, Salvia sclarea.

SCLEREMA, Induration of the cellular tissue.

SCLÈREME, Induration of the cellular tissue.

SCLEREMIA, Induration of the cellular tissue.

SCLEREMUS, Induration of the cellular tissue.

SCLERENCEPHALIA, *Induratio cerebri*, from *σκληρος*, 'hard,' and *εγκεφαλος*, 'the brain.' (F.) *Endurcissement du cerveau*. Induration of the brain.

SCLERIA, Scleriosis.

SCLERIASIS, *Sclero*, *ma*, *Sclero*, *sis*, *Scleria*, *Sclerysmus*, *Sephrus*, from *σκληρος*, 'hard.' Any kind of hardness or induration. Sometimes hardness of the eyelids, *Callositas palpebrarum*, *Scirrholepharoncus*, *Scirrhophtalmia palpebrarum*, *Scirrhus palpebrarum*; at others, hardness of the genital organs of the female; probably synonymous with scirrhus.—Galen. Paulus. Hardness of bones, *Fragilitas Ossium*.

SCLERITIS, Sclerottitis.

SCLERODERMA, Induration of the cellular tissue.

SCLERODES, Sclerotic.

SCLEROMA, Induration of the cellular tissue, Scleriosis.

SCLEROMENINX, Dura mater.

SCLERONYXIS, Scleroticonyxis.

SCLEROPHTHALMIA, Hordeolum.

SCLEROS, Hard.

SCLEROSARCOMA, from *σκληρος*, 'hard,' and *σαρκωμα*, 'a fleshy tumour.' A hard, fleshy tumour, seated on the gums, and resembling a cock's comb.

SCLEROSIS, Induration of the cellular tissue, Scleriosis.

SCLEROSTENOSIS CUTANEA, Induration of the cellular tissue.

SCLEROTIC, *Sclerotica*, from *σκληρος*, 'I harden.' *Cornea opa*, *Scleroides*, *Tunica dura* seu *albuginea* seu *durius* et *crassior* seu *extima* seu *alba* seu *candida* seu *innominata oculi*, *Sclerotia*, (F.) *Sclerotique*. A hard, resisting, opaque membrane; of a pearly white colour and fibrous nature, which covers nearly the posterior four-fifths of the globe of the eye, and has the form of a sphere truncated before. It is strengthened by the expansion of the muscles of the eye, to which expansion many anatomists have given the name *Tunica albuginea*. It forms the *white of the eye*, *Albumen*, *Album oculi*, *Lonchades*, *Logades*, *Lochades*, *Lowcades*. The sclerotic is penetrated posteriorly by a round opening, for the passage of the optic nerve; and, anteriorly, it has a much larger opening, into which the transparent cornea is received. There are, besides, many small oblong apertures in it for the passage of nerves and vessels, proceeding to the interior of the eye. In the fetus, the sclerotic may be separated into two very distinct laminae.

SCLEROTICA CERATOIDES, Cornea.

SCLEROTICITIS, Sclerottitis.

SCLEROTICONYXIS, *Scleronyxis*, *Sclerotomyxis*, from *σκληρος*, 'hard,' and *νυξίς*, 'puncturing.' Perforation of the sclerotic in the operation for cataract by depression.

SCLEROTICUS, Indurans.

SCLÉROTIQUE, Sclerotic.

SCLEROTIS, Sclerotic.

SCLEROTITIS, *Inflammatio Scleroticeæ*, *Louctis*, *Lonchaditis*, *Logaditis*, *Scleritis*, *Sclerocititis*, *Rheumat'ic ophthalmia*, *Ophthalmia arthritica*, from *sclerotica*, and *itis*, denoting inflammation. Inflammation of the sclerotic coat of the eye.

**SCLEROTIUM CLAVUS**, see Ergot.  
**SCLERUNTICUS**, Indurans.  
**SCLERUS**, Induration, Scirrhus.  
**SCLERYNTICUS**, Indurans.  
**SCLERYS'MA**, from *σκληρος*, 'hard.' Induration; also, induration of the liver.—Bonet.  
**SCLERYSMUS**, Scleriosis.  
**SCLIRUS**, Scirrhus.  
**SCLOPETA'RIUS**, from *sclopetum*, 'a gun.' Relating to a gun. Hence, *Aqua sclopetaria*, a water for gunshot wounds. *Vul'nora sclopetaria*, gunshot wounds, &c.  
**SCLOPETOPLAGÆ**, Wounds, gunshot.  
**SCOBS**, *Prisma*, *Xyema*, *Ramen'tum*, *Rasura*. A shaving, also, an alkali; and the scoria of any metal.  
**SCENANTHUM**, *Juncus odoratus*.  
**SCOLECESIS**, Helminthiasis.  
**SCOLECIASIS**, Helminthiasis.  
**SCOLEX**, *Ascaris lumbricoides*.  
**SCOLIOMA**, Scoliosis.  
**SCOLIOSIS**, *Scolio'ma*, *Rhachio-scolio'ma*, from *σκολιός*, 'crooked.' A distortion of the spine to one side. See Hump.  
**SCOLOPENDRA**, *Asplenium scolopendrium*.  
**SCOLOPENDRIA**, *Asplenium ceterach*, and *A. scolopendrium*.  
**SCOLOPENDRIUM OFFICINARUM**, *Asplenium scolopendrium*.  
**SCOLOPOMACHERION**, from *σκολοπαξ*, 'the woodcock,' and *μαχαίρα*, 'a knife,' so called because it is bent a little at the extremity like a woodcock's bill. A sort of blunt-pointed bistoury.—Sculetus.  
**SCOLYMUS SATIVUS**, *Cynara scolymus*.  
**SCOOP**, Teut. Schoepe, *Cochlea'rè*, (F.) *Cursette*. A surgical instrument of the shape of a spoon, which is used for the extraction of certain foreign bodies. The scoop is often employed to extract balls, impacted in the soft parts; to remove calculi from the urinary bladder in lithotomy, &c. A small scoop is sometimes used to extract foreign bodies from the *matras auditorius externus*, nasal fossæ, &c.  
**SCOPA REGIA**, *Ruscus*.  
**SCOPARIUS**, see *Spartium scoparium*.  
**SCOPE**, *σκοπή*, *Scopia*, *σκοπία*, *Scopos*, *σκοπεῖν*, from *σκοπέω*, 'I look around.' A common suffix to words meaning 'view, inspection,' as *cranoscopy*, *stethoscopy*, &c.  
**SCOPTULA**, *Scopula*.  
**SCOPULA**, Brush.  
**SCOR**, Excrement.  
**SCORACRATI'A**, *Scoracrati'sia*, *Scatacrati'sia*, *Scatacrati'sia*, *Copracrati'sia*, *Copracrati'sia*, *Incontinentia Alvi*, from *σκός*, 'excrement,' and *κορῆσις*, 'want of control.' Want of power to retain the fæces. Involuntary evacuation of the fæces.  
**SCORBUT**, *Porphyra nautica*, *Purpura hæmorrhagica*—*s. des Alpes*, *Pellagra*—*s. de Torre*, *Purpura hæmorrhagica*.  
**SCORBÛTIC**, *Scorbûticus*. That which belongs to scurvy. One affected with scurvy.  
**SCORBUTUS**, *Purpura*—*s. Alpinus*, *Pellagra*—*s. Nauticus*, *Porphyra nautica*—*s. Oris*, *Cancer aquaticus*.  
**SCORDINEMA**, *Carebara*, *Pandiculation*.  
**SCORDINISMUS**, *Carebaria*, *Pandiculation*.  
**SCORDIUM**, *Teucrium scordium*.  
**SCORDON**, *Allium*.  
**SCORITH**, Sulphur.

**SCORODON**, *Allium*.

**SCORPIODEX'IS**, from *σκορπιων*, 'the scorpion,' and *δηξις*, 'bite:'—more properly, *Scorpiostio'ma*; from *σκορπιων*, and *στιγμα*, 'puncture.' The sting of the scorpion.

**SCORPION**, *Scor'pia*, *Scorpius*, from *σκορπιων*, 'I puncture.' A genus of insects having a sting at the extremity of their tail, with which they make dangerous wounds. An Oil of Scorpion was once made from them, which is not now used.

**SCORPIOSTIGMA**, *Scorpiodexia*.

**SCORPIUS**, Scorpion.

**SCORTUM**, Scrotum.

**SCORZONE'RA**, *S. hu'milis*, *Escorzone'ra*, *Vipera'ria*, *Serpenta'ria Hispanica*, *Officinalis viperæ grass*, *Viperæ grass*, *Goat's grass*. Family, Cichoraceæ. See *Syst. Syngenesia Polygamia*. The roots have been used as alexipharmics, and in hypochondriacal disorders and obstructions of the viscera. The root of the *Scorzomera Hispanica* is esculent, but inefficacious as a drug.

**SCOTAS'MA**, *Scoto'ma*, *Scoto'dia*, *Scoto'sis*, *Scotus*; from *σκotos*, 'darkness.' Obscurity of vision, darkness. *Suffusio radicans*. Also *Scotodinia*.

**SCOTODIA**, *Scotasma*, *Scotodinia*.

**SCOTODIN'IA**, *Scotoma*, *Dinus Scoto'ma*, *Scotod'ine*, *Tenebrico'sa vertigo*, *Scotos*, *Scotas'ma*, *Scoto'sis*, from *σκotos*, 'darkness,' and *δίνω*, 'I turn round.' Giddiness, with impaired sight, often succeeded by headache. See *Vertigo*.

**SCOTOMA**, *Scotasma*, *Scotodinia*.

**SCOTOS**, *Scotasma*, *Scotodinia*.

**SCOTOSIS**, *Scotodinia*.

**SCOTT'S ACID BATH**, *Nitro-muriatic acid bath*. A bath of dilute aqua regia, employed by Dr. Scott, of India, as a remedy in hepatic diseases. Three pints by measure of muriatic acid, and two of nitric acid, are mixed to form the aqua regia. In preparing this for use, a pint of it is mixed with an equal quantity of water. The acid bath consists of three ounces of this dilute acid to every gallon of water.

**SCRATCH**, *Psora*.

**SCREATUS**, Excretion.

**SCRIPTULUM**, Scruple.

**SCRIPTULUM**, Scruple.

**SCRIPULUS**, Scruple.

**SCROBIC'ULUS**, *Scrobic'ulum*, (F.) *Fossette*. A little ditch or furrow; diminutive of *Scrobes*, 'a ditch.'

**SCROBIC'ULUS CORDIS**, *Anticardium*, *Procardium*, (F.) *Fossette du cœur*, *Anticœur*, *Anticœur*. The pit of the stomach. The depression at the anterior part of the abdomen, below the xiphoid cartilage.

**SCROBICULUS VARIOLE**, Pockmark.

**SCROFFÆ**, *Scrofula*.

**SCROFULA**, *Scrophula*, *Scrophula*; from *scrofa*, 'a sow;' because swine were presumed to be subject to a similar complaint. *Scrophulo'sis*, *Morbus scrophulo'sus*, *Vit'ium scrophulo'sum*, *Cacoehym'ia seu Cachex'ia seu Dyscrasi'a scrophulo'sa*, *Pedatroph'ia glandula'sa*, *Struma*, *Charus*, *Coiras*, *Tubæ Glandula'ris*, *Adeno'sis scrophulo'sa*, *Seroffæ*, *Chraas*, *King's evil*, *The Evil*, *Cruds* (*Scottic*), (F.) *Scrophules*, *Scrofulæ*, *Strumas*, *Leuouelles*, *Humours froides*, *Tubercules des glandes lymphatiques*, *Mal du Roi*. A state of the system characterized by indolent, glandular tumours, chiefly in

the neck; suppurating slowly and imperfectly, and healing with difficulty; the disease ordinarily occurring in those of a sanguine temperament, with thick upper lip, &c. The tumours, after suppuration, degenerate into ulcers; which, in process of time, cicatrize, leaving scars. The internal organs are apt to be attacked in those disposed to scrofula; hence they are often the subjects of phthisis and mesenteric affections. Scrofula is hereditary; and is frequently excited by insufficient or improper regimen, and by a close, confined air during the first years of existence. The best treatment is:—to strengthen the system by animal diet; pure air, and exercise, cold bathing, or sea-water bathing, &c.

SCROFULA ABDOMINALIS INTERNA, *Physconia strumosa*.

SCROFULAIRE, *Scrophularia nodosa* — s. *Aquatique*, *Scrophularia aquatica*.

SCROFULEUX, Scrofulous.

SCROFULOUS, *Scrophulo'sus*, *Scrophulari'sis*, *Strumous*, *Strumo'sus*, (F.) *Scrofulous*, *Strumous*. Suffering from, or relating to, scrofula.

SCROPHULA, Scrofula — s. Mesenterica, *Tabes mesenterica* — s. Moluccana, *Framboesia*.

SCROPHULÆ, Scrofula — s. Gonorrhœica, *Gonorrhœa impura*.

SCROPHULARIA AQUATICA, *Beton'ica aquatica*, *Ficaria*, *Ferraria*, *Castran'gula*, *Greater Water Figwort*, *Water Bet'ony*, (F.) *Scrofulaire aquatique*. The leaves are celebrated as correctors of the bad flavour of senna. They were at one time regarded as eminently antiscrofulous, stomachic, and carminative.

SCROPHULARIA FÆTIDA, *Scrophularia nodosa* — s. Minor, *Ranunculus ficaria*.

SCROPHULARIA NODO'SA, *Figwort*, *Kennel-wort*, *Scrophularia fœtida*, *Scrophularia vulgaris*, *Millemor'bia*, *Scrophularia*, (F.) *Scrofulaire*, *Herbe aux scrouelles*. The root and leaves of this plant have been celebrated, both as an internal and external remedy, against inflammations, piles, scrofulous tumours, ulcers, &c.

SCROPHULARIA VULGARIS, *Scrophularia nodosa*.

SCROPHULARIUS, Scrofulous.

SCROPHULES, Scrofula — s. *Mésentériques*, *Tabes mesenterica*.

SCROPHULOSIS, Scrofula.

SCROPHULOSUS, Scrofulous.

SCROTAL, *Scrotalis*; from *scrotum*. Relating to the scrotum; — as *Hernia scrotalis*, scrotal hernia.

SCROTOCELE. A hybrid term; from (L.) *scrotum*, and *κύλη*, 'a tumour.' *Hernia Scrotalis*, *Scrotal hernia*. Inguinal hernia, descending into the scrotum — *Oschecele*.

SCRÔTUM, from *scorteus*, *scortum*, 'made of leather.' (?) *Osché*, *Os'cheus*, *Os'chus*, *Os'cheon*, *Och'eus*, *Perin*, *Scortum*, *Marsupium*, *Bur'sula*, *Bursa testium* seu *virilis*, *Cap'ulus*, (?) *Orchas*, *Os'eus*, *Follic'ulus genitalis*, *the Purse*, *the Cod*, (F.) *Les bourses*. The integuments which cover the testes. These are nothing more than a prolongation of the skin of the inner part of the thighs, perinæum, and penis. The skin is remarkable for its brown colour, for the numerous rugæ, especially when the scrotum is contracted; for the great number of sebaceous follicles it contains;

and for the long and few hairs which issue from it in the adult. The scrotum is divided into two equal parts by a raphe, which extends from the anus to the root of the penis. Its organization is similar to that of the skin of other parts of the body, except that the chorion is thinner.

SCRÔTUM CORDIS, Pericardium — s. *Pendulum*, *Rhachosis*.

SCRUPLE, *Diob'olon*, *Gramma'rium*, *Scrup'ulus*, *Scrupulum*, *Scriptulus*, *Scrip'ulum*, *Scrip'ulus*. A weight of twenty grains, Troy; twenty-four grains, Poids de marc.

SCUDAMORE'S MIXTURE, see Mixture. Scudamore's.

SCULL, Cranium — s. Cap, Calvaria.

SCURF, Sax. *scurf*, Teut. *Schorft*; *Furfura*. Small exfoliations of the cuticle are so called.

SCURFY, Furfuraceous.

SCURVY OF THE ALPS, Pellagra — s. Land, *Purpura hæmorrhagica* — s. Petechial, *Purpura simplex* — s. Sea, *Porphyræ nautica* — s. Grass, common, *Cochlearia officinalis* — s. Grass, lemon, *Cochlearia officinalis* — s. Grass, wild, *Cochlearia coronopus*.

SCUTELLA, Cup.

SCUTELLARIA GALERICULATA, *Tertianaria*, *Skull-cap*, (F.) *Cassidi bleue*. Family, *Personœ*. See *Syst. Didynamia Angiospermia*. This plant has a bitter taste and a garlic smell. It has been esteemed especially serviceable in tertian ague.

SCUTELLARIA LATERIFLORA, *Skull-cap*, *Mad-wood*, *Hoodwort*, *Blus Pimpernel*. An indigenous plant, which grows in all parts of the United States in moist places. It was at one time esteemed a preventive of hydrophobia, but is probably possessed of little virtue of any kind.

SCUTELLARIA INTEGRIFOLIA, — another indigenous variety, — is an intense bitter.

SCUTICULA DIGITORUM MANÛS, Phalanges of the fingers.

SCUTULÆ DIGITORUM MANÛS, Phalanges of the fingers.

SCUTUM, Thyroid cartilage — s. Cordis, *Scapula*, *Sternum* — s. Genu, *Patella* — s. Pectoris, *Thorax*.

SCUTUM STOMACH'ICUM. A large plaster, applied to the breast or stomach.

SCUTUM THORACIS, Scapula.

SCYBALA, plural of *σκυβαλον*, 'dung.' *Enterol'ithus Scyb'ulum*, *Excrementa alvi sicciora*, *Fæces indurata*. Hard fecal matters discharged in round lumps.

SCYLLA, Scilla.

SCYPHOPHORUS PYXIDATUS, Lichen pyxidatus.

SCYPHUS AUDITORIUS, Infundibulum of the cochlea — s. Cerebri, Infundibulum of the brain — s. Vieussenii, Infundibulum of the cochlea.

SCYROS, Callosity.

SCYTALIDES DIGITORUM MANÛS, Phalanges of the fingers.

SCYTHICA, (RADIX,) Glycyrrhiza.

SCYTHROPASMUS, from *σκυθρος*, 'gloomy;' *σκυθροπασμ'ος*, 'to look gloomy;' *Vultus tet'ricus et maustus*. A gloomy, depressed countenance, of bad augury in serious diseases.

SCYTITIS, Cytitis.

SCYTODEPSIUM, Tannin.

SEA-AIR. The air in the neighbourhood of the sea contains saline particles commingled

with it, which render it a valuable change for scrofulous and debilitated individuals. The sea and sea-coast are usually, also, more equable in their temperature than places inland.

SEA SICKNESS, *Nausea marina*—s. Water, see Water, Sea.

SEAL, GOLDEN, *Hydrastis Canadensis*—s. Solomon's, *Convallaria polygonatum*.

SEARCHING, *Sounding*; from (F.) *chercher*, 'to seek.' The operation of ascertaining whether a patient have a stone in the bladder, by the introduction of a metallic instrument.

SEASONING, Acclimation.

SEAT, Anus—s. Bone, Ischion.

SEBACÆ, Sebaceous.

SEBACEOUS, *Sebaceous*, (F.) *Sébaci*; from *sebum*, 'suet.' That which has the nature of suet.

SEBACEOUS FLUX, Stearrhea.

SEBACEOUS OF SEBIPAROUS GLANDS, *Sebaceous Follicles*, *Sebaceous Crypts*, *Folliculi sebacei*, *Cryptæ sebaceæ*, *Oil Glands*, *Miliary glands*, are small hollow organs, of a rounded or pyriform shape, seated in the substance of the skin, and opening on its surface by a small, excretory duct; furnishing a yellow, unctuous humour, *Smagma cutaneum*, *Sebum cutaneum*, having some analogy with suet, which is destined to lubricate the surface of the body. Follicles of a similar nature exist around the corona glandis of the male, and under the skin of the labia majora and nymphæ of females. They secrete a sebaceous matter, which emits a peculiar odour; and, hence after the name of one who described them, have been called *Glandula odorifera Tysoni*, *G. Tysoni*, *Tyson's glands*.

SEBESTER MYXA, *Sebestina*.

SEBESTINA, *Cordia myxa*, *Sebesten*, *Sebesten*, *Myxa*, *Cornus sanguinea*, *Prunus sebestina*, *Smooth-leaved Cordia* or *Assyrian plum*, (F.) *Sebestier myxa*. The dark, black fruit of the *Sebestina* possesses glutinous and aperient qualities, and is exhibited, in decoction, in various diseases of the chest.

SEBIPAROUS, see Sebaceous.

SEBSTEN, *Sebestina*.

SEBUM, Pinguedo, *Sevum*—s. Cutaneum, see Sebaceous glands.

SECALE, *S. cereale*. The *Rye plant*. (F.) *Saigle*. Rye is chiefly used as an article of diet, particularly in the northern parts of Europe, where a spirit is also extracted from it. The grain is disposed to acecency: and hence its internal use at first generally produces a laxative effect.

SECALE CORNUTUM, *Ergot*—s. *Luxurians*, *Ergot*.

SECALIS MATER, *Ergot*.

SECRERNENT, *Secreting*.

SECRERNING, *Secreting*.

SECESSIO FÆCUM, *Defecation*.

SECESSUS NIGER, *Melœna*.

SECHE, *Sepia*.

SECLUSORIUM, *Sac*.

SECONDARY, from *secundus*, 'the second.' Something that acts subordinately to another; as the *secondary symptoms* of a disease; that is, those which supervene on the *primary*.

SECONDIVES, *Secundines*.

SECRET A. Same etymon as *Secretion*. Things or matters secreted or separated from the blood.

SECRETING, *Secretorius*, *Secorning*, *Secernent*. Same etymon as *Secretion*. That which secretes,—as a secreting organ.

SECRETIO, *Secretion*—s. *Lactis*, *Galactosis*—s. *Lotii*, *Uropoësis*—s. *Urinæ*, *Uropoësis*—s. *Victoria*, see *Victoria*.

SECRETION, *Secretio*, *Apocrisis*; from *secernere*, 'to separate.' An organic function, which is chiefly executed in the glands, and consists in an elaboration or separation of the materials of the blood, at the very extremities of the arterial system, or rather of the vascular secretory system; and which differs in each organ according to its particular structure; hence the formation of different fluids;—bile, saliva, urine, milk, &c. The secretions are of three kinds:—*exhalant*, *follicular*, and *glandular*.

SECRETORIUS, *Secreting*.

SECT, *METHODICAL*, *Methodists*.

SECTIO, *Section*. The act of cutting. A division.

SECTIO ALTA, see *Lithotomy*—s. *Anatomica*, *Dissection*—s. *Cadaveris*, *Autopsia cadaverica*—s. *Cadaveris legalis*, *Autopsia cadaverica*—s. *Cæsarea*, *Cæsarean section*—s. *Franconiana*, see *Lithotomy*—s. *Hypogastrica*, see *Lithotomy*—s. *Lateralis*, see *Lithotomy*—s. *Legalis*, *Obductio*—s. *Mariana*, see *Lithotomy*—s. *Nympharum*, *Nymphotomy*—s. *Rectovesicalis*, see *Lithotomy*—s. *Renalis*, *Nephrotomy*—s. *Tendinum*, *Tenotomy*—s. *Vagino-vesicalis*, *Colpocystotomia*—s. *Vesicalis*, *Lithotomy*.

SECTION, *Sectio*—s. *Sigaultian*, *Symphysotomy*.

SECUNDÆ, *Secundines*.

SECUNDINÆ, *Secundines*.

SECUNDINÆ, *Hystera*, *Deutorion*, *Afterbirth*, *Secundæ*, *Secundina*, (F.) *Arrière-faix*, *Secundines*, *Dévore*. All that remains in the uterus after the birth of the child,—viz., the placenta, a portion of the umbilical cord, and the membranes of the ovum. These are commonly not expelled till some time after the birth of the fœtus; hence their name. See *Délivrance*.

SECUNDUS PROPRIORUM AURICULÆ, *Retrahens auris*.

SEDANTIA, *Sedatives*.

SEDATIVES, *Sedativa*, *Pauon'ta*, *Sedan'tia*, *Ado'ta*, *Catastaltica*, *Deprimen'tia*, (F.) *Calmants*, *Tempérants*, from *sedo*, 'I settle or assuage.' Medicines which directly depress the vital forces, and which are consequently employed whenever it is necessary to diminish preternaturally increased action. The chief reputed sedatives are: *Acidum Hydrocyanicum*, *Acidum Hydro-sulphuricum*, *Tabacum*, *Missio Sanguinis*, and certain gases by inhalation, as azote, carbonic acid, (?) carburetted and sulphuretted hydrogen.

SEDEM ATTOLLENS, *Levator ani*.

SEDES, *Anus*, *Excrement*—s. *Cruentæ*, *Dysentery*, *Hæmatochezia*—s. *Lactescentes*, *Cæliac flux*—s. *Procidua*, *Proctocele*.

SEDIMENT, *Sedimentum*, *Lemna*, *Residentia*. Same etymon. (F.) *Dépôt*. A deposit formed by the precipitation of some one or more of the substances held in solution or suspension by a liquid. That which is formed in urine, at the time of cooling, has been called *Hypostasis*, *Hypostéma*, *Residentia*, *Subsidentia*, (F.) *Dépôt de l'urine*. This sediment or deposit varies in different states of the sys-

tem. In calculous affections, it is one of the most important objects of attention.

**SEDIMENTUM**, Sediment.—s. Urinæ lateritium, see Lateritious.—s. Urinæ ptyroides, see Furfuraceous.

**SEDITIA**, Nates.

**SEDLITZ**, MINERAL WATERS OF. *Sedlitz*, *Schidschütz* or *Seydschütz* water. Springs in Bohemia, near Prague, which are simple salines. They contain a large quantity of sulphate of magnesia, a little sulphate of soda and sulphate of lime, carbonic acid, carbonates of lime and magnesia, and a resinous matter.(?) They are employed as purgatives in a multitude of diseases.

**SEDLITZ POWDERS** may be formed of *Soda tartarizata* ℥ij, *Soda carbon.* ℥ij, in one paper; *Acid tartaric.* gr. xxxv, in another. For half a pint of water.

**SEDON BRÛLANT**, Sedum—s. *Reprise*, Sedum telephium.

**SEDUM**, *Sedum acré*, *Illec'obra*, *Hellec'obra*, *Vermicula'ris*, *Piper murale*, *Sedum minus*, *Semperiv'um acré*, *Wall pepper*, *Stone crop*, *Biting Stone crop*, *Small Houseleek*, *Asi'chryson*, *Bo'nion*, (F.) *Joubarbe acre*, *Orpin brûlant*, *Vermiculaire brûlante*, *Sédon brûlant*. Family, Crassulacæ. Sz. Syst. Decandria Pentagynia. In its recent state it is very acrid, and proves both emetic and cathartic. Externally, in the form of cataplasm, it produces vesications and erosions. It has been recommended in cancerous and malignant ulcers.

**SEDUM**, *Saxifraga granulata*—s. *Majus*, *Sempervivum tectorum*—s. *Minus*, *Sedum*.

**SEDUM TELEPHIUM**, *Faba crassa*, *Cras'sula*, *C. Major*, *Illec'obra major*, *Tele'phium*, *Fabaria cras'sula*, *Anacam'pseros*, *Orpine*, (F.) *Sédon reprise*, *Grand orpin*, *Pève épaisse*, *Joubarbe des vignes*, &c. Formerly used as a cataplasm in cuts, hemorrhoids, corns, whitlows, &c.

**SEED**, Sperm.

**SEGMENTA CARTILAGINEA**, see Trachea.

**SEGNIT'IA**, *Segnit'iss*, from *segnis*, 'sluggish.' Sluggishness or torpor in the exercise of a function—as *SEGNITIES ALVI*, Torpor of the bowels: *SEGNITIES VIRIUM*, Languor.

**SEGNITIES**, *Segnitia*.

**SEGRAY**, MINERAL WATERS OF. Near Pithiviers, in Gâtinais, in the French department of Loiret, there is a chalybeate spring, which has some reputation.

**SEGU**, Sego.

**SEIDLITZ**, Sedlitz.

**SEIDSCHUTZ**, Sedlitz.

**SEIGLE**, Secale—s. *Ergotté*, Ergot.

**SEIN**, Uterus, see Mamma.

**SEIRIASIS**, *Coup de Soleil*.

**SEISKAYAVODKA**, see Spirit.

**SEL**, Salt—s. *Admirable de Lemery*, *Magnesiæ sulphas*—s. *Admirable perlé*, *Soda*, phosphate of—s. *de Cuisine*, *Soda*, muriate of—s. *de Déroane*, *Narcotine*—s. *d'Egra*, *Magnesiæ sulphas*—s. *d'Opium*, *Narcotine*—s. *de Saturno*, *Plumbi superacetas*—s. *de Verre*, see Vitrum—s. *Volatil d'Angleterre*, *Ammoniac carbonas*.

**SELAGO**, *Camphorosma Monspeliaca*.

**SELENE**, Moon, see Nail.

**SELENIASIS**, Somnambulism.

**SELENIASMUS**, Somnambulism.

**SELENOBLETUS**, Lunatic.

**SELENOGAMIA**, Somnambulism.

**SELERY**, *Apium graveolens*.

**SELF-HEAL**, *Prunella*.

**SELIBRA**, *Semis'bra*, *Sembella*, half a pound. Six ounces, Troy; eight, Avoirdupois.

**SELINITES**, *σλινιτης*. Wine impregnated with the seeds of the *σλινον* or *smallage*.—*Dioscorides*.

**SELINUM GALBANUM**, *Bubon galbanum*

—s. *Oreoselinum*, *Athamanta aureoselinum*.

**SELLA**, *S. Turcica*—s. *Equina*, *S. Turcica*

—s. *Familiarica*, *Lasanum*—s. *Obstetricia*, *Diphrus*—s. *Sphenoidalis*, *S. Turcica*.

**SELLA TURCICA**, *Ephipp'ium*, *Fossa Pituitaria*, *Sella Turcica*, *Sella*, *S. agui'na* seu *sphenoidalis*, *Turkish Saddle*, (F.) *Sella Turcica* ou *du Turc*. A depression at the upper surface of the sphenoid bone, which is bounded, anteriorly and posteriorly, by the clinoid processes; and lodges the pituitary gland. It is so called from its resemblance to a *Turkish saddle*.

**SELLA TURCICA**, *Pituitaria fossa*.

**SELLE TURCQUE**, *Sella Turcica*—s. *du Turc*, *Sella Turcica*.

**SELS NEUTRES**, Neutral salts.

**SELTZ** or **SELTZER**, MINERAL WATERS OF. Cold, acidulous springs, the source of which is at Seltz, nine leagues from Strasburgh, and in the Department of the Bas-Rhin. They contain carbonates of lime, magnesia, and soda, chloride of sodium, and much carbonic acid. They are refrigerent, tonic, diuretic, and aperient.

**ARTIFICIAL SELTZER WATER** may be made from *muriat. acid.* gr. xxxv. *water Oj*, *white marble* gr. iij. Stop up till dissolved. Add *carbonate of Magnesia*, gr. v, and, after some time, *subcarbonate of soda*, gr. xxxij. Close it till used.

**SEMBELLA**, *Selibra*.

**SEMECARPUS ANACARDIUM**, *Avicennia tomentosa*.

**SEMEIOGRAPHY**, *Semeiograph'ia*, *Semiography*, *Semiogra'phia*, from *σημειον*, 'a symptom,' and *γραφη*, 'a description.' A description of symptoms or signs of disease.

**SEMEIOLOGY**, *Semeiot'icé*, *Semiology*, *Semeioticé*, *Phænomenolog'ia*, from *σημειον*, 'a symptom,' and *λογος*, 'a discourse.' (F.) *Sémeiotique*. The branch of pathology whose object is the doctrine of the symptoms or signs of disease.

**SEMEION BOETHEMATICUM**, *Indication*.

**SEMEIOSIS**, *Semeiology*.

**SEMEIOTIQUE**, *Semeiology*.

**SEMEN**, Sperm—s. *Badian*, *Illicium anisatum*—s. *Cina*, *Artemisia santonica*—s. *Contra*, *Artemisia santonica*—s. *Contra vermes*, *Artemisia santonica*—s. *Masculinum* seu *virile* seu *genitale*, Sperm—s. *Muliebres*, Sperm (of the female)—s. *Sanctum*, *Artemisia santonica*—s. *Zedoaria*, *Artemisia santonica*.

**SEMENTINA**, *Artemisia santonica*.

**SEMI**, from *ἡμισυ*, 'half.' *Semi* or *demi*, in composition, universally signifies 'half;' both in French and English.

**SEMIAN'IMIS**, *Semimor'tuus*, *Sem'inez*, *Semiv'vus*; from *semi*, 'half,' and *animus*, 'soul.' Half-living. Half-dead.

**SEMICANALICULUS**, *Sulcus*.

**SEMICANALIS**, *Sulcus*.

SEMICEPHALUS, *Hemicephalus*.

SEMICIRCULI OSSEI, Semicircular canals.

SEMICIRCULAR, *Semicirculâris*. That which represents the half of a circle.

SEMICIRCULAR CANALS, *Candles* seu *Ductus semicirculares* seu *transformes* seu *circulâres*, *Semicirculi ossei*, *Funes* seu *Canaliculi semicirculares labyrinthi*, (F.) *Canaux demi-circulaires*, are seated in the pars petrosa of the temporal bone, and open into the vestibule, behind which they are situate. They are three in number, of which one is *superior* or *vertical*; another *posterior* or *obliquus*; and the third *anterior* or *horizontal*. Their parietes are formed of a bony, compact, hard plate. Their uses in audition are not known: at their termination they have the elliptical arrangements called *ampullæ*; and by both extremities they open into the vestibule, in the sac at its superior part—the *Sacculus Ellipticus*, *Alveus* seu *Utriculus communis*, *Utriculus Sinus* or *Alveus utriculosus*, *Sacculus vestibuli* or *Median sinus*. In front of the S. ellipticus, nearer the cochlea, and opposite the foramen ovale, is the *Sacculus sphericus* or *sacculus*.

SEMICIRCULUS EXCULPTUS, Hiatus diaphragmatis aorticus.

SEMICONGIUS. Half a gallon, or four pints.

SEMICUBIUM, *Semicupium*, *Inses'io*, *Inses'io*, *Encathis'ma*, *Exacathis'ma*, (F.) *Demi-bain*, from *semi*, 'half,' and *cubare*, 'to lie down.' A half-bath, or such as receives only the hips or extremities.

SEMICUBIUM, Bath, half, Semi-cubium—Semi-fibulus, *Peronæus brevis*—Semi-interosseus indicis, *Abductor indicis*—Semi-interosseus pollicis, *Opponens pollicis*.

SEMILIBRA, *Selibra*.

SEMILLA DEL GUACHARO. Various kinds of hard and dry fruits, found in the stomachs of the young Guacharoes, a sort of nocturnal bird. The fruits are a celebrated South American remedy in ague.

SEMILUNAR, *Semilunaris*, (F.) *Demi-lunaire* or *Semi-lunaire*, from *semi*, 'half,' and *luna*, 'the moon.' Having the shape of a half-moon.

SEMILUNAR CARTILAGES, *Semilunar fibrocartilages*, *Sigmoid cartilages*, *Cartilag'ines sigmoideæ* seu *semilunares*, are two fibrocartilages, which exist between the condyles of the os femoris and the articular surfaces of the tibia. The innermost, which is longer from before to behind than transversely, is nearly semicircular. The outermost forms almost an entire circle; an arrangement, in both cases, corresponding to the different surfaces of the tibia. They are thicker at their outer circumference, which is convex, than at the inner, which is concave and very thin. Both are inserted, before and behind, into the spine of the tibia, by means of fibrous fasciæ.

SEMILUNAR GANGLION, *Ganglion abdominale* seu *splanchnicum* seu *transversum* seu *solaré*, *G. surnéral*, (Ch.), belongs to the great sympathetic. These ganglia present considerable variety, and are deeply situate in the abdomen, above and behind the supra-renal capsules. They correspond, posteriorly, to the pillars of the diaphragm and the aorta. They have the shape of a crescent reversed, often

surrounded by other ganglia of a smaller size. From their periphery the numerous filaments proceed, which go to the formation of the solar plexus.

SEMILUNAR NOTCH OF THE STERNUM, *Fornicetta*—s. Valves, Sigmoid valves—s. *Masculatus*, *Eunuch*.

SEMILUNULA UNGUIUM, see Nail.

SEMIMAS, *Eunuch*.

SEMIMASCULUS, *Eunuch*.

SEMIMEMBRANEUS, *Seminembraneus*.

SEMIMEMBRANOSUS, *Seminembraneus*, (F.) *Ischio-popliti-femoral*, *Ischio-popliti-tibial*, (Ch.) *Demiembraneus*. A muscle situate at the posterior part of the thigh. It is flat, thin, narrow, and aponeurotic in its upper third; broader and fleshy in the middle, and tendinous below. It is attached above to the tuberosity of the ischium; and below—by a tendon, which has three divisions—to the outer condyle of the femur, and to the posterior and inner part of the internal tuberosity of the tibia. This muscle is a rotator inwards, and a flexor of the leg. It can also bend the thigh upon the leg. In standing it maintains the pelvis in position, and can even draw it downwards.

SEMIMORTUUS, *Semianimis*.

SEMINA FRIGIDA MAJORA. The greater cold seeds. The ancients gave this name to the emulsive seeds of the cucumber, melon, gourd, and water-melon.

SEMINA FRIGIDA MINORA. The lesser cold seeds. The ancients gave this name to the seeds of the lettuce, puralane, endive, and chicory.

SEMINAL, Spermatic—s. Fluid, Sperm—s. Granules, see Granule.

SEMINALIS, Spermatic.

SEMINERVOSUS, Semi-tendinosus—Semi-orbicularis, *Orbicularis oris*—Semi-pestis, Typhus.

SEMINEX, *Semianimis*.

SEMINEFEROUS, from *semen*, 'sperm,' and *fero*, 'I carry.' *Spermatophorous*. An epithet given to the vessels which secrete and convey the seminal fluid.

SEMINIUM, Sperm.

SEMIOGRAPHY, Semeiology.

SEMIOLOGY, Semeiology.

SEMIOTICE, Semeiotice—s. *Facies*, Physiognomy.

SEMIPLÉGIA, Hemiplegia.

SEMISEXTUM, Hemiecton.

SEMISICILICUS. A weight of one drachm or three scruples.—*Rhodium*.

SEMISIDERATIO, Hemiplegia.

SEMISIDERATUS, see Hemiplegia.

SEMISOMNIS, *Coma*.

SEMISOPITUS, *Coma*.

SEMISOPORUS, *Coma*.

SEMISPECULUM. An instrument used for dilating the incision made into the neck of the bladder in the operation of lithotomy.—*Fabricius Hildanus*.

SEMISPINALIS COLLI, *Semispinalis colli*, *Articulo-spinalis*, *Transverso-spinalis Colli*, *Spinalis cervicis*, *Spinalis Colli*, *Transversa'lis Colli*, *Transverso-spinal*, (F.) *Demi-épineux* or *transversaire-épineux du cou*. This muscle arises from the transverse processes of the six uppermost dorsal vertebrae, by an equal number of distinct tendons, which run ob-

liquely under the complexus, and is inserted in the spinous processes of all the cervical vertebrae, except the first and last. Its action is, to extend the neck obliquely backwards and to one side.

**SEMISPINALIS DORSI**, *Semi-spinalis externus*, *Transverso-spinalis dorsii*, *Semi-spinatus*, (Riolan), *Transverso-spinal*, (F.) *Demi-épineux du dos*, *Transversaire-épineux du dos*. This muscle arises from the transverse processes of the seventh, eighth, ninth, and tenth dorsal vertebrae, by as many distinct tendons, which soon grow fleshy; and then again become tendinous, and are inserted into the spinous processes of the sixth or seventh uppermost dorsal, and two lowest cervical vertebrae, by as many tendons. Its action is, to extend the spine obliquely backwards.

**SEMISPINALIS EXTERNUS**, *Semi-spinalis dorsii*—*Internus*, *Transversalis dorsii*—*S. Spinatus*, *Longissimus dorsii*, *Semi-spinalis dorsii*.

**SEMISPINATUS COLLI**, *Semispinalis colli*.

**SEMISISSIS**, *Semis*. The half of a pound, ounce, drachm, &c.

**SEMITENDINOSUS**, *Semi-nervosus*, (F.) *Ischio-cræti-tibialis*, *Ischio-prætibialis*, (Ch.) *Demi-tendineux*. This muscle is situate at the posterior part of the thigh. It extends obliquely, downwards and inwards, from the tuberosity of the ischium—to which it is attached by a flat tendon, common to it and the biceps—as far as the posterior and inner part of the tibia, to which it is attached by means of another round tendon. Its fibres are commonly interrupted by an aponeurosis. Its uses are the same as those of the semimembranosus.

**SEMITERTIANA**, *Hemitritæa*—*s. Tercæ*, *Hemitritæa*.

**SEMIUNCIA**, *Hemiuncion*.

**SEMIVIV**, *Ennuh*.

**SEMIVIVUS**, *Semianimis*.

**SEMOLINA**, *Manna croup*. This may be made by grinding wheat in an apparatus, separating the flour from the middlings, dressing the latter four different times in a bolting mill, and sifting through parchment sieves, until the product is perfectly freed from bran. In Poland it is called *Cracow groats*.

Semolina is generally imported into England from the Baltic, and in Russia is said to be manufactured from buckwheat. It has a granular form like some kinds of oatmeal, a dingy white colour, a farinaceous, somewhat insipid, taste, and is well adapted for the diet of children affected with derangement of the bowels.

**SEMPERVIVUM ACRE**, *Sedum*.

**SEMPERVIVUM TECTORUM**, *Houss-Leak*, *Sedum Majus*, *Alsohn*, *Beihalalón*, *Buphtalunus*, *Barba Jovis*, *Sengraen*, *Agriocin'ara*, *Andrachakara*, *Chrysospermum*, (F.) *Joubarbe des toits*. The leaves have a mild, subacid austerly, and are often applied to bruises and old ulcers.

**SEMUNCIA**, *Hemiuncion*.

**SENA**, *Cassia senna*.

**SENÉ**, *Cassia senna*—*s. d'Amérique*, *Cassia Marilandica*—*s. Faux*, *Colutea arborescens*.

**SENECIO**, *S. vulgaris*, *Erig'erum*, *Cortaleon*, *Erigeron*, *Groundsel*, *Fireweed*, (F.) *Senecion commun*. *Family*, *Corymbifera*. *Scz. Syst.* Syngenesia Polygamia Superflua. A common plant in Europe; frequently applied, bruised,

to inflammations and ulcers, as refrigerant and antiscorbatic.

**SENECIO JACOBÆA**, *Jacobæa*, *St. James' Wort*, *Ragwort*, (F.) *Jacobæ*. The leaves have a roughish, bitter, subacid, and extremely nauseous taste. A decoction has been used in dysentery. A poultice of the leaves has been recommended in rheumatic affections; and a decoction of the root has often been employed in cases of wounds and bruises.

**SENECON COMMUN**, *Senecio*.

**SENECTA**, *Senectus*.

**SENECTA AN'GVIVM**. The cast-skin of a serpent. A decoction of it is said to cure deafness!

**SENECTA DECREPITA**, *Decrepitude*—*s. Extrema*, *Decrepitude*—*s. Summa*, *Decrepitude*—*s. Ultima*, *Decrepitude*.

**SENECTUS**, *Senectus*, from *senere*, 'to be old.' *Gerac*, *Senium*, *Ætas senilis* seu *provec'ta* seu *malæ*, *Old age*, *Senility*, (F.) *Vieillesse*. The last period of life, commencing, according to some, at 60 years of age, but varying according to numerous circumstances. It is characterized by progressive diminution of the physical and moral faculties.

**SENECTUS ULTIMA**, *Decrepitude*.

**SENEGAL**, *Polygala senega*.

**SENEGAL, GUM**. The exudation from the *Mimo'sa Senegal*, *Family*, *Leguminosæ*, *Scz. Syst.* *Polygamia Monœcia*, which grows in the country of Africa, through which the river Senegal runs. It is in loose or single drops, much larger than gum Arabic, or the gum which exudes from the cherry tree; and is much more difficult of solution than the former.

**SENEGINE**, see *Polygala senega*.

**SENEKA**, *Polygala senega*.

**SENEVÉ**, *Sinapis*.

**SENGREEN**, *Sempervivum tectorum*.

**SENILE**, *Senilis*, from *senere*, 'to be old.' Relating or belonging to old age—as '*senile delirium*,' dotage.

**SENILITY**, *Senectus*.

**SENNÀ**, *Cassia senna*—*s. Alexandrina*, *Cassia senna*—*s. American*, *Cassia Marilandica*—*s. Bladder*, *Colutea arborescens*—*s. Essence of*, prepared, *Selway's*, see *Infusum sennæ compositum*—*s. Italica*, *Cassia senna*—*s. Wild*, *Cassia Marilandica*.

**SENS**, *Sense*.

**SENSATION**, *Sensatio*, from *sentire*, *sensum*, 'to feel;' *Esthéma*. The consciousness or cognizance by the brain of an impression caused by an external body on the organs of the senses. It is not necessarily, however, confined to bodies external to us; for we can receive an impression by touching any part of our own body. The body which communicates the impressions needs but to be external to the part impressed. Sensations are divided into *external*, *internal* and *morbid*. The *external* are communicated by the five organs of the senses. The *internal* are such as occur within the body, and arise from some alteration in the function of the part, for the time being. Hunger and thirst are internal sensations, as well as all the natural wants. *Morbid* sensations may be either internal or external.

**SENSE**, *Sensus*. *Sen'sio*, *Esthê'sis*, (F.) *Sens*. Same etymon. A faculty, possessed by animals, of appreciating impressions from external objects. (F.) *Sentiment*. The senses are five in number: sight, hearing, smell, taste, and

touch. Of these, the first two and the last administer more to the intellect; and, hence, have been called, by some, the *intellectual senses*: the other two seem more destined for the nutrition of the body; and, hence, have been termed *corporeal* or *nutritive senses*. Other senses have been suggested—as the intense sensation experienced during the venereal act; a sense of heat and cold; a muscular sense, a common sense or *cœnæsthesia*, &c.

SENSUS, NERVOUS SYSTEM OF THE, Medulla oblongata.

SENSIBILITAS, Sensibility—s. Anomala, see Irritable—s. Aucta, see Irritable—s. Morbosa, see Irritable.

SENSIBILITY, *Sensibilitas*. Same etymon as Sensation; *Æsthēma*. The faculty of receiving impressions, and having the consciousness of them. Bichat defines it as the property possessed by living bodies, of receiving impressions, whether the individual be conscious of them or not. In the former case, where conscious, he calls the sensibility, *animal*: in the latter, where not, he terms it *organic*. This last is common to vegetables and animals, and presides over nutrition, absorption, exhalation, secretion, &c. The other does not exist in vegetables: it is the origin of the sensations—olfaction, vision, gustation, audition, thirst, hunger, pain, &c. There are few parts of the animal body, but what are sensible—if not in health—in disease. The free extremities of the hair, and nails, and the epidermis are not so. See Insensibility.

SENSIO, Sense.

SENSORIUM, Sensorium.

SENSORIUM, *Sensorium commune*, *Organon sensorium internum*, *Sensitorium*, *Emporium spirituum*, *Æsthētērion*. The common centre of sensations.

SENSORY, Sentient.

SENSORY GANG'LIA. A name given by Dr. Carpenter to a series of ganglionic masses at the base of the brain, which are in direct communication with the nerves of sensation—as the *olfactory*, *optic*, *auditory* and *gustatory*.

SENSORY NERVES, *Nerves of sensation*, are so called in contradistinction to *Motor nerves*. There are *general sensory nerves*—as those connected with the posterior part of the spinal marrow, and the fifth pair; and *special sensory*, as those of the senses.

SENSUS ÆGRITUDINIS, Indisposition—s. Osmometricus, Olfaction—s. Perversus, Pseudoæsthesia.

SENTIENT, *Sentiens*, *Sensory*. Feeling.

SENTIENT EXTREMITIES OF NERVES are their minute terminations in the organs.

SENTIMENT, see Sense.

SEPARATORIUM, from *separo*, 'I separate.' A surgical instrument, for separating the pericranium from the skull.

A *Separatorium*, *Vitrum Hypoclepticum*, is a pharmaceutical vessel for separating fluids of different densities from each other.

SEPEDOGENESIS, Sepedonogenesis.

SEPEDOGENESIS, *Sepedogenēsis*, from *σηπεδογ*, 'putrescency,' and *γενεσις*, 'generation.' A septic disposition or tendency; such as is met with in typhus gravior.

SEPE, *Sēpes*. 'A hedge,' 'a row;' as *Sepes* seu *Sērias* seu *Pecten dentium*.—a row of teeth.

SEPE, DENTIUM, see *Sepe*.

SEPHIRUS, Scleriasis.

SEPIA, *S. officinalis*, *Sepium*, *Præcipitans magnum*, *Cuttle-Fish*, (F.) *Sèche*. The shell of the cuttle-fish has been used as an absorbent; and is often added to tooth powders.

SEPLASIA'RIOUS. A name formerly given to those who sold perfumes, ointments, &c. It is derived from *Seplasia*, the name of a public place at Capua, where these kinds of preparations were frequently sold. A druggist.

SEPSICHYMIA, Septochymia.

SEPSIS, Putrefaction.

SEPTANA FEBRIS, Fever, septan.

SEPTENARY, from *septem*, 'seven.' 'Consisting of seven.' The septenary years of the old believers in critical periods were times at which, it was supposed, important changes might be expected to take place. The grand climacteric was fixed at 63, and it was considered that if a person passed that age, he had well-founded expectations that his life might be protracted to 90.

SEPTENNIAD, Climacteric, (years.)

SEPTFOIL, UPRIGHT, Tormentilla.

SEPTIC, *Sēpticus*, *Septus*, from *σηπεδογ*, 'to rot.' That which produces putrefaction. A substance which corrodes and disorganizes the soft parts without causing much pain.

SEPTIC POISON, see Poison.

SEPTIMESTRIS FŒTUS, see *Fœtus septimestris*.

SEPTINERVIA, Plantago.

SEPTOCHYMIA, *Sepsichymia*; from *σηπεδογ*, 'putrefaction,' and *χυμος*, 'juice.' Putrefaction or putrescency of the humours.

SEPTOPYRA, Typhus gravior.

SEPTUM, (F.) *Cloison*. A part intended to separate two cavities from each other, or to divide a principal cavity into several secondary cavities.

These septa are numerous in the human body.

The chief are the following:—

SEPTUM CEREBELLI, Falx cerebelli—s. Cerebri, Falx cerebri—s. Cochleæ auditoriæ, Lamina spiralis.

SEPTUM CORDIS, *Septum medium cordis*. The partition which separates the two ventricles of the heart.

SEPTUM ENCEPHALI, Tentorium.

SEPTUM LUCIDUM seu *pellucidum* seu *tenue* et *pellucidum* seu *medium* seu *Speculum lucidum* seu *Lapis specularis* seu *Mediastinum* seu *Diaphragma ventriculo-rum lateraliſſimum cerebri*, *Speculum*, (F.) *Septum medianum*, (Ch.) *Cloison transparente*. The soft portion or medullary substance, which separates the two lateral ventricles of the brain from each other. This septum is composed of two laminae; between which a small cavity exists, filled by a serous fluid, and called the *Fossa of Sylvius*, *5th ventricle of Cuvier*, *Sinus of the median septum*, (Ch.). The brothers Wenzel are of opinion that this cavity is lined by a peculiar membrane.

SEPTUM MĒDIAN, S. lucidum—s. *MĒdian du cercelet*, Falx cerebelli—s. *Medium cerebri*, S. lucidum.

SEPTUM NARIUM, *Interseptum* seu *Diſſepimentum* seu *Interſſinum* seu *Discrimen* seu *Imbræ* seu *Diaphragma narium*, (F.) *Cloison des Fosses nasales*. The partition between the nares. It is formed by the vomer, the perpendicular plate of the ethmoid bone, and a carti-

lage of a triangular shape. These parts are lined by the pituitary membrane, which receives a considerable number of nerves and vessels.

SEPTUM PARVUM OCCIPITALE, Falx cerebelli—s. Pellucidum, S. lucidum—s. Scalam, Lamina spiralis—s. *Staphylin*, Velum pendulum palati—s. Tenue et pellucidum, S. lucidum—s. Thoracis, Mediastinum—s. *Transversa*, Tentorium—s. *Transversum*, Diaphragm—s. Vestibuli nervoso-membranaceum, see Labyrinth.

SEPTUS, Septicus.

SEBUM, Sebum.

SEQUESTRUM, from *sequestro*, 'I separate.' The portion of bone, in necrosis, which is dead, and separated from the living bone; acting, whilst retained, as an extraneous body. When the sequesterium is superficial and small, it is called *Exfoliation*.

SERAPEUM, Syrup.

SERAPINON, Sagapenum.

SERAPIUM, Syrup.

SERBET, Scherbet.

SERICUM, *Silk*; from *Seres*—the Thibetans probably—from whom it was first obtained. (F.) *Soie*. The thread spun by the *Bombyx Mori* or *Silkworm*. Silk ls used by surgeons for ligatures, &c.

SERICUM ANGLICUM, see Sparadrappum ad-hesivum.

SERIES DENTIUM, see Sepes.

SERIEUX, Serious.

SERINGUE, Syringe.

SERIOLA, Cichorium intybus.

SERIOUS, (F.) *Sérieux*, *Grave*. A term applied to a disease, *Dyspathia*, *Morbus gravis*, and to a symptom that is attended with danger.

SERIS, Cichorium intybus.

SERMOUNTAIN, Laserpitium album.

SERO-COLITIS, see Colitis.

SERO-HEPATITIS, see Hepatitis.

SEROLIN, from *serum*, 'whey.' A fatty matter detected in the blood by Boudet, Lecanu, Sanson, and others.

SEROSITÉ, Serum.

SEROSITY, Serum.

SEROUS, *Sero'eus*, (F.) *Sérieux*. Thin; watery; relating to the most watery portion of animal fluids. See Serum.

SEROUS MEMBRANES, Membranes, serous.

SERPEDO, Psoriasis.

SERPENT, *Serpens*, *Anguis*, *Ophis*; from *serpo*, 'I creep.' A snake.

SNAKE BROTH was, at one time, recommended as a restorative.

Many serpents are venomous: and the bites of some fatal. See Poisons, Table of.

SERPENTAIRE NOIRE, *Actæa racemosa*.

SERPENTARIA, *Aristolochia serpentaria*—s. *Gallorum*, *Arum dracunculoides*—s. *Hispanica*, *Scorzonera*—s. *Minor*, *Arum maculatum*—s. *Nigra*, *Actæa racemosa*.

SERPENTARIÆ BRAZILIENSIS RADIX, *Caincæ radix*.

SERPENTINE, Ophites.

SERPENTINUS, Ophites.

SERPIGINOUS, from *serpere*, 'to creep.' An epithet given to certain affections, which creep, as it were, from one part to another,—'*Serpiginous* erysipelas,' (F.) *Erysipèle serpiginæ*.

SERPIGO, *Herpes circinatus*, *Lichen psoriasis*.

SERPILLUM, *Thymus serpyllum*.

SERPOLET, *Thymus serpyllum*.

SERPULLUM, *Thymus serpyllum*.

SERPULLUM, *Thymus serpyllum*—s. *Citratum*, see *Thymus serpyllum*.

SERRA, *Saw*—s. *Amputatoria*, *Saw*, amputation—s. *Versatilis*, *Trepan*.

SERRATULA AMARA, *Family*, *Cynarcephales*. *Sez. Syst.* *Syngenesia Polygamia æqualis*. A species of *Sawwort*, recommended in ague.

SERRATUS ANTICUS MINOR, *Pectoralis minor*—s. *Major*, *Serratus magnus*.

SERRATUS MAGNUS. So called from its serrated appearance; from *serra*, 'a saw.' *Serratus major anticus*, *Serratus major*, (F.) *Costo-basi-scapulaire*, *Costo-scapulaire*, (Ch.) *Grand dentelé*. A very broad (especially anteriorly,) thin, flat, irregularly quadrilateral muscle, situate at the sides of the thorax. It is attached, before, to the external surface of the first 8 or 9 ribs, by as many distinct digitations; and, behind, to the spinal edge of the scapula. The superior fibres are almost horizontal; the lower become gradually more and more oblique upwards and backwards. This muscle carries the scapula forwards, and causes it to execute a movement of rotation, which directs its inferior angle forwards, and the anterior upwards. When the shoulder is fixed, it raises the ribs.

SERRATUS POSTICUS INFERIOR, (F.) *Dorso-lombo-costal*, *Lombo-costal*, (Ch.) *Petit dentelé postérieur et inférieur*. A broader and thinner muscle than the following, but nearly of the same shape. It is situate obliquely at the lower part of the back; and extends from the spinous processes of the last two or three dorsal vertebra, and the first two or three lumbar, to the inferior margin of the last four false ribs. This muscle depresses the ribs, and thus concurs in expiration. It is an antagonist to the next.

SERRATUS POSTICUS SUPERIOR, (F.) *Cervi-ci-dorso-costal*, *Dorso-costal*, (Ch.) *Petit dentelé supérieur*. A flat, thin, quadrilateral muscle; situate obliquely at the posterior inferior part of the neck, and the superior part of the back. It passes from the posterior cervical ligament, the spinous process of the last cervical vertebra; from the spinous processes of the first two or three dorsal, to the second, third, fourth, and fifth ribs; into which it is inserted by as many digitations. It raises the ribs, and is, consequently, an inspiratory muscle.

SERTULA CAMPANA, *Trifolium melilotus*.

SERUM, Sperm.

SERUM, 'whey.' *Orrhos*, *Oros*, *Seros'ity*, (F.) *Sérosité*. The most watery portion of animal fluids, exhaled by serous membranes. It is a constituent part of blood, milk, &c.

SERUM OF THE BLOOD, *Hæmydor*, *Ichor sanguinis*, (F.) *Sérum du Sang*, is the liquid which separates from the blood, when coagulated at rest. It is of a greenish-yellow colour; viscid, slightly coagulable by heat, acids, and alcohol. It is composed of water; chloride of sodium; certain phosphates; and albumen, constantly united to soda, almost in a saponaceous combination.

The fluid which exudes from the albumen of the serum of the blood, when coagulated by heat, is by some called *serosity*.

**SÉRUM DU SANG**, S. of the blood.

**SÉRUM LACTIS**, *Aqua lactis*; the *Serum of Milk, Whey*, (F.) *Sérum du lait, Petit lait*. That part of milk, from which the butter and caseous matter have been separated. It is a transparent, citrine-coloured liquid, containing sugar of milk, mucilage, acetic acid, phosphate of lime, and some other saline substances. It is used as a slightly nutritious diluent and refrigerant.

**SÉRUM LACTIS HOFFMANNI**, (F.) *Petit-lait d'Hoffmann*, is a name given to the liquid, resulting from treating with boiling water milk which has been evaporated to an almost solid consistence. It is not much used.

**RENNET WHY** is made thus: *milk* 2 pints; *rennet* 3ss, infused in a little hot water; mix and keep in a gentle heat for some hours, then strain.—Gray.

**SÉRUM OF SEROUS MEMBRANES**, *Serum membranarum serosarum, Water of Dropsy*, (F.) *Sérum des membranes séreuses, Eau des hydro-piques*. It resembles the serum of the blood, especially in cases of hydrocele. The water of hydrothorax and ascites contains much less albumen:—sometimes enough to coagulate on the application of heat: at others, not.

**SERVICE, MOUNTAIN**, *Sorbus acuparia*—s. Tree, *Sorbus domestica*.

**SERVIETTE EN CARRÉ**, *Couvrechef*.

**SESAMOID**, *Sesamoides, Sesamoïdes, Sesamoides*, from *σπασμν*, 'a grain of sesamum,' and *ιδίος*, 'resemblance.'

**SESAMOID BONES**, *Ossa seu Ossicula sesamoides*, are small bones, situate in the substance of tendons, near certain joints. Their number is various. They are commonly more in the male than female. Two are constantly met with beneath the metatarso-phalangeal articulations of the great toe. Sometimes, the articulations of other bones of the metatarsus with the phalanges of the toes have them likewise. In the hand, there are two before the metacarpo-phalangeal joint of the thumb. At times, they are met with in the other metacarpo-phalangeal articulations. Occasionally, two exist behind the condyles of the femur, in the tendons of the gastrocnemii muscles. A considerable os sesamoidem is also met with in the tendon of the peroneus longus. These bones are commonly round, and flattened only on one surface, which is incrustated with cartilage. Their size is very variable, according to the joints in which they exist. Traces of sesamoid bones are not observed in infants: in them, they are replaced by small, cartilaginous concretions. They are developed by a single point of ossification; and are, like the patella (which is a true sesamoid bone,) composed of much cellular substance, covered by a thin layer of compact tissue. The use of these bones is,—to allow the tendon to be inserted into the lever at a greater angle; and thus enable the power to act more advantageously.

Riolan has given the name *Ossa sesamoides* to two bony points sometimes met with;—the one at the outer side of the carotid canal of the temporal bone; and the other at the edge of the cavernous sinus, at the side of the internal carotid artery.

**SESAMUM**, see *Sesamum orientale*.

**SESAMUM ORIENTALE**, *Benné, Oily Grain*. The seeds of this African plant are cultivated

in Georgia and South Carolina, where the negroes use them with Indian corn as an article of food. They yield a larger proportion of oil than any other vegetable; one hundred weight producing ninety pounds of oil, which is, at least, equal to Florence oil.

The *Benné oil, Oleum Serrami*, is used in the southern States as a laxative. The leaves—*Sesamum* (Ph. U. S.)—afford, by infusion, an excellent mucilage.

**SESCUN'CIA**, *Sesquim'cia, Hemiol'ion*. An ounce and a half. See *Sesqui*.

**SESELI**, *Laserpitium siler*—s. *Ægopodium*. *Ligusticum podagria*—s. *Creticum, Torpidum officinale*—s. *des Prés, Peucedanum silans*.

**SESELI TORTUOSUM**, *Seseli Massilien'st, Hartwort of Marsoilles*. The seeds have a warm taste; and a greater degree of pungency than those of *Laserpitium Siler*, which is the *Seseli* of the Pharmacopœias.

**SESQUI**. This word, joined with any number, weight, measure, &c., signifies one and a half; as *sesquigranum*, 'a grain and half.'

**SESEQUIUNCIA**, *Sescuncia*.

**SETA EQUINA**, 'a horse's hair.' *Hair-worm, Helmin'thus Gordii*. A kind of worm, found in stagnant water, from 4 to 6 inches long, and twisted into various knots and contortions: colour pale brown, with dark extremities. It is common in the intestines of the Laplanders; causing the *Col'ica Lapponica*, in which the gripings are, at times, exceedingly severe.

**SETACEUM**, *Seta, Seton*, from *seta*, 'a bristle.' A long strip of fine linen or cotton twist, passed through the skin and cellular membrane, to keep up an issue; or through suppurating cavities, between the fragments of fractured bones, &c., to fulfil certain indications. The term is also applied to the issue so established. The operation is simple. It consists in laying hold of a fold of skin, and passing a seton needle through it, with the thread attached. Every day a fresh portion of the thread is drawn through the sore. Setons are established in many diseases;—in obstinate ophthalmia, cephalalgia; epilepsy, thoracic and abdominal affections, &c.; but they are not as much used as formerly.

**SETFAST**, see *Furunculus*.

**SETO**, *Setaceum*.

**SETON**, *Setaceum*.

**SETTERWORT**, *Helleborus fetidus*.

**SEVADILLA**, *Veratrum sabadilla*.

**SEVATIO**, *Steatoma*.

**SEVRAGE**, *Weaning*.

**SEVUM**, *Pinguedo*.

**SEVUM**, *Sabum, Sepum, Stear, Adeps ovilli, Sevum vervecinum*. Suet, mutton suet. *Pinguedo*.

**SEVUM PRÆPARATUM**, *Sevum*, (Ph. U. S.)—*Ovilli Sevum Preparatum, prepared Suet*, (F.) *Graisse de Mouton, Suif*, is formed by cutting suet in pieces; melting over a slow fire, and straining through linen. It is emollient, and is sometimes boiled in milk, (℞ij to Oj,) and is used in diarrhœa and dysentery. Its principal employment is in the formation of plasters.

**SEVUM VERVECINUM**, *Sevum*.

**SEX**, *Sexus, Genos, Physis*. The physical difference between male and female in animals and vegetables;—as the *male sex, Sexus potior*

see *fortior* seu *S. virilis*; and the female sex, *Sexus sequior*, *S. muliebris*, *Alter Sexus*, 'The sex.'

**SEXTANS**, *Sexta pars libræ*. The sixth part of a pound.—Galen.

**SEXTARIUS**. An ancient measure for liquid and solid substances. See *Weights and measures*.

**SEXTULA**, *Hæmagium*, 'τῆρας'. The sixth part of an ounce.

**SEXUAL**, *Sexualis*, from *sexus*, 'a sex.' That which relates to the sex; which characterizes the sex.

**SEXUAL DISEASES**, *Morbi sexuales*, are the diseases of the genital organs; as **SEXUAL FUNCTIONS** are the genital functions.

**SEXUAL INTERCOURSE**, Coition—s. *Organs*, *Genital inters.*

**SEXUS**, *Sex*—s. *Alter*, see *Sex*—s. *Fortior*, see *Sex*—s. *Muliebris*, see *Sex*—s. *Potior*, see *Sex*—s. *Sequior*, see *Sex*—s. *Virilis*, see *Sex*.

**SEYDSCHÜTZ WATER**, Sedlitz water.

**SHALLOT**, *Echalotte*.

**SHAMPOOING**, *Massing*, (F.) *Massage*, *Massment*. A Hindoo process, which consists in pressing the body of the bather in a peculiar manner; cracking the various joints, and employing blows and friction.

'Kneading' consists in pressing alternately upon a part of the body to arouse the muscles to more energetic action. It is employed at times in *dyspepsia*.

**SHAMROCK, INDIAN**, *Trillium latifolium*—s. *Water*, *Menyanthes verna*.

**SHARON SPRINGS, NEW YORK**. These springs, which are situate about 10 or 12 miles south of Canajoharie, N. Y., and 45 miles west of Albany, are much frequented. They contain, according to the analysis of Dr. Chilton, sulphate of magnesia, sulphate of lime, chloride of sodium, chloride of magnesium, sulphohydrate of sodium, sulphohydrate of calcium, vegetable extractive matter, and free sulphohydric acid gas. Their temperature is 48° Fahr.

**SHEATH**, *Vagina*.

**SHEEP POISON**, *Kalmia latifolia*.

**SHELL FLOWER**, *Trillium latifolium*—s. *Liquid*, see *Calceis murias*.

**SHERBET**, *Scherbet*—s. *Orange*, see *Syrup aurantii*.

**SHERMAN'S WORM LOZENGES**, see *Worm lozenges*, *Sherman's*.

**SHERRY**, *Sack*, see *Wine*.

**SHIELD, WATER**, *Nelumbium luteum*.

**SHIN**, *O'cræ*, *Crista tibia*. The spine or anterior part of the tibia or leg. It is, also, called *Anticnemion*, and *Crea*.

**SHINGLES**, *Herpes zoster*.

**SHORT**, *Sax.* ρεοντ, from ρεπαν, 'to cut, to shear,' *shored*, *shor'd*, *short*, (F.) *Court*. A word used, by anatomists, in opposition to *long*; and to distinguish parts from each other that have otherwise the same name.

**SHORT BONES**, for example, are those in which the three dimensions—length, breadth, and thickness—are nearly alike; such are the vertebrae, bones of the carpus, tarsus, &c.

**SHOTBUGH**, *Aralia spinosa*.

**SHOULDER-BLADE**, *Scapula*.

**SHOVEL PICKEREL WEED**, *Unisema deltifolia*—s. *Pond*, *Unisema deltifolia*.

**SHOW**, see *Parturition*.

**SHOW-CHOO**, see *Spirit*.

**SHOWER-BATH**, see *Bath*.

**SHRUB**. Perhaps from Arabic, *sharab*, 'syrup.' A compound of spirits, lemon juice, and sugar.

**SHUDDERING**, *Fromitus*, *Phrygæma*, from (G.) *Schäuder*, *Schauer*, (F.) *Fred-missement*, *Tressaillement*. A peculiar sensation, felt either externally or internally; and which seems to be the result of a spasmodic movement of the parts in which it occurs. A slight feeling of cold sometimes accompanies it. It is, at times, the result of a moral cause, and is often the precursor of shivering.

**SHUMAC**, *Rhus coriaria*.

**SIAGANTRITIS**; from *σιαγον*, 'the jaw,' *αρτηρ*, 'a cavity,' and *ιτις*, denoting inflammation. Inflammation of the lining membrane of the antrum of Highmore.

**SIAGON**, Maxillary bone.

**SIAGO'NAGRA**, from *σιαγον*, 'the jaw,' and *αγχα*, 'a seizure,' *Arthritis maxillaris*. A gouty or rheumatic affection of the joint of the lower jaw.

**SIALACHUS**, *Salivation*.

**SIALAGOGUE**, *Sialagogus*, *Sialogogus*, *Ptyalagogus*, *Ptyas'magogus*, *Sali'vans*, *Saliva'tum*, *Sialocinet'icus*, *Aphlegmat'icans per os*, (F.) *Salivant*, from *σιαλον*, 'saliva,' and *αγχα*, 'I expel.' That which provokes the secretion of saliva. Pyrethrum and mercury are sialagogues. Sialagogues may be of two kinds,—those which act through the circulation, and those which act immediately on the salivary organs. Mercury belongs to the former—pyrethrum to the latter class. The chief sialagogues are armoracia, calamus, mezereum, pyrethrum, tabacum and zingiber.

**SIALISMUS**, *Salivation*.

**SIALOCINETICUS**, *Sialagogue*.

**SIALOLITHI**, *Calculi salivary*.

**SIALOLOG'IA**, from *σιαλον*, 'saliva,' and *λογος*, 'a discourse.' A treatise on saliva.

**SIALOMA**, *Saliva*.

**SIALON**, *Saliva*.

**SIALORRHEEA**, *Salivation*.

**SIALOS'CHESIS**, from *σιαλον*, 'saliva,' and *αρχησις*, 'retention.' Retention or suppression of the saliva.

**SIALOSYRINGES**, *Salivary fistulae*.

**SIALOZEMIA**, *Salivation*—s. *Mercurialis*, *Salivation*, *mercurial*.

**SIBARE**, *Phrenitis*.

**SIBBENS**, *Sivvens*, *Frambæ'sia Scotica*. An infectious disease in the mountainous parts of Scotland, viewed to be of the venereal kind. *Siwin*, in the Keltic, means raspberry; and it is said that, in this affection, fungi appear like raspberries. From *siwin*, the inhabitants have made *sivvin*, *sibben*, *sibbens*, and *sivvens*. By some, this affection is regarded as a complication of the venereal and itch. In the Orkneys, *sibbens* means itch.—Jamieson.

**SIBILISMUS AURIUM**, *Tinnitus aurium*.

**SIBILUS AURIUM**, *Tinnitus aurium*.

**SICCANTIA**, from *siccare*, 'to dry,' *Xerant'ica*, (F.) *Siccatis*. Drying medicines.—Galen.

**SICCANTIA**, *Desiccativa*.

**SICCATIFS**, *Siccantia*.

**SICCATIO**, *Drying*.

**SICCHASIA**, *σιχασια*, 'disgust.' A disgusting disgust for food; such as is experienced by women with child.

**SICILICUM.** A Roman weight of about two drachms.

**SICK,** Sax. *reoc, Eger, Egrotus, Nos'erus, Nos'os, Jacens, Laboriosus, Laborans,* (F.) *Malade.* Labouring under disease. Such is its acceptance in old English, and generally in the United States. In England, it most commonly means disorder of the stomach,—nausea.

A sick person, *Eger, Egrotus,* (F.) *Malade,* who is under the charge of a physician is said to be a *patient* or the patient of the physician. At times, but rarely, patient is used for a sick person in the abstract.

**SICK STOMACH,** Milk sickness.

**SICKLY,** *Morbosus, Valitudinariis, Adynatos, Nosacerus, Nos'os,* (F.) *Maladif.* One who is subject to be sick, or is in feeble health.

**SICKNESS,** Disease—s. Falling, Epilepsy—s. River, Milk sickness—s. of the Stomach, Vomiting—s. Swamp, Milk sickness.

**SICLIUM,** Sicilicum.

**SICUA,** Cupping-glass.

**SICULA,** Beta, Penis.

**SICYEDON,** Caledon.

**SIDA ABUTILON,** Abutilon cordatum.

**SIDE, PAIN IN THE,** Pleurodynia.

**SIDERATIO,** *Sydaratio, Sideration,* from *Sidus,* 'a star;' because the condition was thought to be produced by the influence of the stars. The state of one struck suddenly, without apparent cause, and as if by the influence of the stars. The ancients comprised, under this name, different morbid conditions, such as paralysis, apoplexy, and gangrene.

**SIDERATIO,** Apoplexy, Asphyxia, Phrenitis—s. Osis, Spina ventosa.

**SIDERATION,** Astrobolismos, Sideratio.

**SIDERION,** Ferramentum.

**SIDERITES,** Magnet.

**SIDERITIS,** Magnet, Teucrium chamæpitys.

**SIDEROS,** Ferrum.

**SIDEROXYLON,** Chrysophyllum cainito.

**SIDHEE,** see Gunjah.

**SIDMOUTH, (CLIMATE OF.)** Sidmouth is in Devonshire, England, on the sea-beach, at the mouth of the Sid. It is much frequented by invalids, both during the summer and winter. The climate is, however, damp, and subject to sea fogs.

**SIEGE,** Anus.

**SIELISMOS,** Salivation.

**SIELON,** Saliva.

**SIFFLEMENT** (F.), from *siffler,* 'to whistle.' Whistling.

**SIFFLEMENT MODULÉ,** *Chant des artères, Bruit musical,* 'modulated whistling, or music of the arteries.' A kind of sound heard on auscultation, resembling, at times, the humming of certain insects.

The sound is chiefly met with in those labouring under chlorosis.

**SIGAULTIAN SECTION,** Symphyseotomy.

**SIGE,** Taciturnity.

**SIGH,** Suspirium.

**SIGHT, Vision—s.** Askew, Dysopia lateralis—s. False, Metamorphopsia, Pseudoblepsia—s. Feebleness of, Amblyopia.

**SIGILLUM SALAMONIS,** Convallaria polyonatum—s. Virginitatis, Hymen.

**SIGMATOID,** Sigmoid.

**SIGMOID,** *Sigmoïdal, Sigmatoid, Sigmoïdes, Sigmo'des, Sigmoïdeus.* That which

has the form of the Greek S or C; from sigma, and *isos,* 'resemblance.'

**SIGMOID CARTILAGES,** Semilunar cartilages.

**SIGMOID CAVITIES OF FOSSÆ OF THE ULNA,** (F.) *Cavités ou Fosses sigmoïdes,* are two notches at the upper part of that bone,—one for the reception of the humerus; the other for that of the radius.

**SIGMOID FLEXURE OF THE COLON,** *Flexura sigmoïdea,* is a turn the colon takes immediately before its termination in the rectum.

**SIGMOID OF SEMILUNAR VALVES,** *Valvule Sigmoïdes, Processus Sigmoïdes,* (F.) *Valvules sigmoïdes ou semilunaires,* are three valvular folds, at the commencement of the pulmonary artery and aorta. These valves have the form of a crescent, when applied against the parietes of the vessel. When the blood is sent from the ventricles by their contraction, the valves are applied against the sides of the vessel; but, during the diastole of the ventricle, they are depressed, and prevent the blood from returning to the heart. At the middle of the convexity of each valve is a small, hard, triangular granulum, called *Corpusculum seu Globulus Arantii,* which completely closes up the passage. It is, also, called *Corpusculum Morgagnii,* and *C. Sesamoïdeum,* (F.) *Globulus d'Arantius.*

**SIGN, Signum, Som'on,** (F.) *Signe.* Any present or past circumstance, afforded by the examination of a patient, or of matters concerning him, whence a conclusion may be drawn regarding the nature and seat of his disease. The phenomena which precede the disease are called *anamnesitic* or *commemorative signs*;—those which accompany it, are termed *diagnostic,* if they reveal the nature or seat of the disease,—*prognostic,* when they indicate its probable duration and termination.

**SIGNA ASSIDENTIA,** see Assidens.

**SIGNATURE,** *Signatura, Signatio,* from *signum,* 'a sign;' *Epiisphagismos.* This term was applied in the Eastern countries, in the middle ages, to mystic characters of good or bad augury, with which it was pretended that every one was marked by the star under which he was born.

**SIGNATURES OF PLANTS** meant certain peculiarities in their external formation or colour, which indicated that they were proper for particular diseases:—as in the case of the *Lungwort, Liverwort,* &c.

**SIGNES AVANT-COUREURS,** Precursory signs—s. *Præcursors,* Precursory signs.

**SIGNUM,** see Parturition—s. Characteristicum, see Pathognomonic—s. Coniunctum, see Pathognomonic—s. Diacriticum, see Diacritica signa—s. Morbi essentialis, see Pathognomonic.

**SILACH,** *Silac.* An Arabic word, used to designate thickening of the eyelids, *Crassities Palpebrarum;* and, also, *Alopecia.*—Forestus, Stephanus.

**SILENCE,** see Murmur, respiratory.

**SILE'NE VIRGINICA,** *Ground Pink, Wild Pink, Catch Fly.* The root has been employed in decoction, as an efficacious anthelmintic.

**SILER MONTANUM,** Laserpitium siler.

**SIL'QUA,** *Ceratio;* the carat. A weight of about four grains.

**SILQUA ARABICA,** Tamarindus—s. *Dulcis,* Ceratonium siliqua.

**SILYBASTRUM PLINII**, Capsicum annuum.

**SILK**, Sericum.—s. Weed, Asclepias tuberosa.—s. Weed, common, Asclepias Syriaca.—s. Worm, see Sericum.

**SILLON**, Sulcus.—s. *Horizontal de la veine ombilicale*, see Liver.—s. *Transversale*, see Liver.—s. *de la Veine cave inférieure*, see Liver.—s. *de la Veine porte*, see Liver.

**SILV**, Camus.

**SILPHIUM**, Laserpitium.

**SILVUS**, Camus.

**SILVER**, Argentum.—s. Ammonio-chloride of, see Argentum.—s. Chloride of, see Argentum.—s. Chloruret of, see Argentum.—s. Cyanide of, see Argentum.—s. Cyanuret of, see Argentum.—s. Iodide of, see Argentum.—s. Ioduret of, see Argentum.—s. Leaf, Magnolia macrophylla.—s. Muriate of, see Argentum.—s. Nitrate of, Argenti nitras.—s. Oxide of, see Argentum.—s. and Ammonia, Chloride of, see Argentum.—s. and Ammonia, Chloruret of, see Argentum.

**SILYBUM**, Carduus marianus.

**SIMAROUBA**, Quassia simarouba.—s. Bitter, Quassia simarouba.—s. *Faux*, Malpighia mourella.

**SIMARUBA**, Quassia simarouba.—s. Officialis, Quassia simarouba.

**SIMILATIO**, Assimilation.

**SIMITIUM**, Plumbi subcarbonas.

**SIMO**, Camus.

**SIMONEA FOLLICULORUM**, Acarus folliculorum.

**SIMOTRACHELUS**, Bysauchen.

**SIMPLES**. Medicinal herbs. One skilled in simples is called a *Simplist*, a *Rhizotomist*.

**SIMPLIST**, see Simples.

**SIMULATED DISEASES**, Feigned diseases.

**SIMULATI MORBI**, Feigned diseases.

**SIMUS**, Camus.

**SINA LEVANTICA**, Artemisia santonica.

**SINAPÆ'ON**, from σινάπι, 'mustard,' and αἴδιον, 'oil.' Oil impregnated with mustard.

**SINAPI**, Sinapis.

**SINAPIS**, *Sinapis nigra*, *Brassicica nigra*, *Napus*, *Ervæa*, *Sinap'æ*, *Sinapi*, *Na'pium*, *Nappy*, *Common Black Mustard*, (F.) *Mustarde noire*, *Senévi*, *Sanve*. *Family*, Cruciferae. *See. Syst.* Tetradymania Siliquosa. The seeds are inodorous, when entire; but, when bruised, the odour is very pungent; taste bitterish and acrid. They yield their virtues to water, and afford a bland oil by expression. The seeds are stimulant, diuretic, emetic, and rubefacient. They are sometimes recommended to be swallowed whole, in dyspepsia, torpor of the bowels, &c. Externally, they are applied in the form of cataplasm. See Sinapism.

**SINAPIS ALBA**, *White Mustard*, *Napus Lessina'pis*, is also used medicinally. It is somewhat less pungent than the black. The distilled oil—*Oleum Sinapis*—is a powerful stimulant and rubefacient.

*Whitehead's Essence of Mustard* consists of oil of turpentine, camphor, and a portion of spirit of Rosemary: to which is added a small quantity of flour of mustard. It is a celebrated embrocation for rheumatism, &c.

*Whitehead's Essence of Mustard Pills* consist of yellow resin and balsam of tolu, enough to make into pills.

**SINAPIS ARVEN'SIS**, *Charlock*, *Wild Mustard*,

has the seeds sometimes substituted for black mustard.

**SINAPISIM**, Bole Armenian.

**SIN'APISM**, *Sinapis'mus*, from σινάπι, 'mustard.' A cataplasm, of which mustard forms the basis, which is used for exciting redness, and acting as a counter-irritant. It is prepared by mixing flour of mustard and vinegar together to the due consistence. See Cataplasma sinapis.

**SIN'ICIPÛT**, *Sincipital Region*, *Bregma*, *Syn'ciput*, *Mesocranium*, *Mesocranium*, *Hemicephalium*, *Hemicephalium*, *Hemicephalum*; the top of the head. The French use it synonymously with *vertex*. By some it is applied to the frontal region or fore part of the cranium. The parietal bones are being called *sincipital bones*, *Ossa sincipitiis*, (F.) *Ossa sinciput*.

**SINDON**, σινδων, very fine linen. A small piece of rag, or a round pledget, supported by a thread at its middle, and introduced into the opening in the cranium made by the trephine.

**SINEW**, Tendon.

**SINGLETON'S GOLDEN OINTMENT** is formed of sulphuret of arsenic (realgar), and lard, or spermaceti ointment.

**SINGULT'OUS**, *Lygmo'des*, *Lygo'des*, *Lyn-go'des*, *Lynggo'des*; from *Singultus*, 'hiccough.' Relating to or affected with hiccough.

**SINGULT'US**, *Lynz*, *Lygmus*, *Spasmodygmus*, *Clonus Singultus*, *Pneusis singultus*, *Hiccough*, *Hiccup*, (F.) *Hoquet*. A noise made by the sudden and involuntary contraction of the diaphragm, and the simultaneous contraction of the glottis, which arrests the air in the trachea. It is a symptom of many morbid conditions, and especially of gangrene, but occurs, frequently, in persons otherwise in good health.

**SINUEUX**, Sinuosus.

**SINUOSITAS**, Sinus.

**SINUOUS**, *Sinu'osus*, (F.) *Sinuoux*, from *sinus*, 'a bay or curve.' An epithet given to certain ulcers, and especially to certain fistulæ, which are tortuous.

**SINUS**, *Sinu'ositas*, *Colpos*, *Abcon'rio*, *Eurycho'ria*, *Reces'sus*, (F.) *Golfe*. Any cavity, the interior of which is more expanded than the entrance. In this sense, anatomists have applied the term to cavities in certain bones of the head and face. It has been, also, applied to certain venous canals, into which a number of vessels empty themselves; such as the sinuses of the dura mater and of the spine; the sinus of the vena porta; uterine sinuses, &c.

In surgery it means a long, narrow, hollow track, leading from some abscess, diseased bone, &c., (F.) *Clapier*.

Sinuses of bones form part of the nasal cavities. They are the frontal, sphenoidal, maxillary, &c. The name has also been given, occasionally, to the ethmoid and mastoid cells.

**SINUS ACUSTICUS**, Auditory canal, internal.—s. *Arteriosus*, *S. pulmonalis*—s. *Basilar*, *Sinus transversus*—s. *Cavernosus*, *Cavernous sinus*—s. *Cavernosi uteri*, *Sinus uterini*—s. *Cavernosus*, *Cavernous sinus*—s. *Cerebri*, *Ventricles of the brain*—s. *Choroidien*, *S. quartus*—s. *Circular*, of *Ridley*, *Sinus coronarius*—s. *Circularis*, *S. coronarius*—s. *Cordons du cœur*, see *Cardiac veins*.

**SINUS CORONA'RIVS**, *Sinus circularis*, *S. circularis Ridleyi*, *Circular sinus of Ridley*, *Coronary sinus*. A venous canal, which surrounds,

in a more or less regular manner, the pituitary fossa and gland, emptying itself into the corresponding cavernous sinus by each of its extremities.

**SINUS, CORONARY, Sinus coronarius**—s. Coronary of the heart, Sinus coronary, venous.

**SINUS CORONARY, VENOUS, Coronary sinus of the heart.** A name given, on account of its great size, to that portion of the great coronary vein which embraces the left auriculo-ventricular furrow.

**SINUS COXÆ, see Cotyloid**—s. *Droit, S. quartus.*

**SINUS DEXTER CORDIS, Sinus vena'rum cavatum, S. vena'sus, Sacculus vena'rum cavatum.** The right auricle of the heart:—*Atrium cordis dextrum.* See Auricula.

**SINUSES OF THE DURA MATER, Sinus seu Fistula seu Cavitates seu Ventriculi seu Tubuli seu Sanguiductus seu Receptacula Dura matris,** are formed by a separation of the layers of the dura mater, which acts as a substitute for the outer membrane of veins. Bichat admits only four great sinuses, of which all the others seem to be dependencies;—the *two lateral sinuses, the straight sinus, and the longitudinal sinus.* To the lateral sinuses belong, the *petrous sinuses, superior and inferior; the transverse sinus; the cavernous sinuses; the coronary sinus, and the occipital sinuses.* To the straight sinus belongs the *inferior longitudinal.* The longitudinal sinus, properly so called, has no sinus under its dependence.

**SINUS FALCIFORMIS INFERIOR, S. longitudinal, inferior**—s. Falciformis superior, S. longitudinal, superior—s. Fourth, Torcular Herophili—s. Genæ pituitarius, Antrum of Highmore—s. of the Jugular vein, see Jugular veins—s. Lacrymalis, Lacrymal sac.

**SINUSES OF THE LARYNX, Ventricles of the larynx.**

**SINUSES, LAT'ERAL, Sinus transvers'i, S. magni, S. laterales, (F.) Sinus laterales.** Each of these sinuses, distinguished into right and left, begins at the torcular Herophili, or confluent of the sinuses, and terminates at the sinus of the jugular vein.

**SINUS LATÉRAUX, Sinuses, lateral.**

**SINUSES, LONGITUDINAL, S. Longitudinales.** These are two in number. 1. **SUPERIOR LONGITUDINAL SINUS, S. falciformis superior, S. triangula'ris, Sinus median, (Ch.)** A long, triangular canal; convex above, concave below, which occupies the whole of the upper edge of the falx cerebri. It is broad behind, and much narrower before, where it commences by a *cul-de-sac*, at the crista galli of the ethmoid bone. It passes along the frontal or coronal crest, sagittal suture, and the vertical groove of the occipital bone. It receives several veins from the dura mater; and all those that are spread over the convex and plain surfaces of the two hemispheres of the brain. It discharges itself into the upper part of the torcular Herophili. 2. **INFERIOR LONGITUDINAL SINUS, Sinus falciformis inferior, Vena falcis cerebri.** This is much narrower than the last, and occupies the inferior edge of the falx cerebri, from its anterior third to the tentorium cerebelli, where it terminates, commonly by two branches, in the straight sinus.

**SINUS MAGNI, Sinuses, lateral**—s. Maxillary, Antrum of Highmore—s. *Median, Sinus longi-*

*tudinal superior*—s. *Median, see Semicircular canals*—s. *Muliebris, Vagina.*

**SINUS OCCIPITAL, Sinus occipitalis.** These sinuses commence at the sides of the foramen magnum ossis occipitis, and ascend—becoming broader and nearer each other—into the substance of the falx cerebelli, where they frequently unite. Each opens into the inferior part of the torcular Herophili. They receive the veins of the falx cerebelli, of the dura mater which lines the fossæ cerebelli, and of the posterior part of the cerebellum. Haller and Sömmering have given them the name of *posterior occipital sinuses*, to distinguish them from the transverse sinuses, which they have called *anterior occipital sinus.*

**SINUS OCCIPITALIS ANTERIOR, Sinus transversus**—s. Ophthalmic, see Cavernous sinus—s. Perpendicularis, S. quartus—s. Pituitarii frontis, Frontal sinuses—s. Polymorphus, Cavernous sinus—s. Portarum, see Liver—s. Pudenti, Vagina—s. Pudoris, Vagina, Vulva.

**SINUS PULMONA'LI, S. sinist'or cordis, Atrium cordis sinist'rum, S. vena'rum pulmona'lium, S. arterio'sus, Sacculus vena'rum pulmona'lium.** The left auricle of the heart. See Auricula.

**SINUS OF THE PULMONARY VEINS, Auricle, left.**

**SINUS QUARTUS, S. perpendicularis, (F.) Sinus choroidalis (Ch.), Sinus droit, Straight Sinus.** This sinus—triangular throughout; wide posteriorly; narrower anteriorly; slightly oblique downwards and backwards—passes along the base of the falx cerebri, from the termination of the inferior longitudinal sinus to the torcular Herophili. It receives the inferior longitudinal sinus, the veins of the lateral ventricles or *vena Galeni*, the superior cerebellous veins, &c.

**SINUS RENUM, Pelvis of the kidney**—s. Rhomboidal, Calamus scriptorius—s. of the Septum lucidum, Ventricle, fifth—s. Sinister cordis, S. pulmonalis—s. Sphenoidalis, Cavernous sinus—s. Straight, S. quartus—s. Superciliares, Frontal sinuses—s. Transversi, Sinuses, lateral.

**SINUS TRANSVERSUS, S. occipitalis ant'erior, Basilar sinus.** This sinus lies transversely at the anterior part of the basilar process of the occipital bone. It forms a communication between the two petrous sinuses, and the cavernous sinus of one side and those of the other. Its breadth is commonly very great. It is situated between two layers of the dura mater, and presents, internally, a kind of cavernous tissue.

**SINUS TRIANGULARIS, S. longitudinal, superior.**

**SINUS UTERINI, Sinus cavernosi Uteri, Uterine sinuses.** A name given to cavities, formed by the uterine veins in the substance of the uterine parietes. They are very large during pregnancy.

**SINUS UTRICULOSUS, see Semicircular canals**—s. *des Vaisseaux séminifères, Corpus Highmori.*

**SINUSES OF VALSALVA** are three depressions in the aorta and pulmonary artery, immediately opposite the semilunar valves. Their use is to leave the edges of the valves free, so that they can be caught by the reflux blood. Where the aorta is about to send off the first of its large branches, at the top of the thorax, it is of great size, and has been called the *Large sinus of Valsalva.*

**SINUS OF THE VENA CAVA, Auricle, right**—s. *Vena'rum cavernarum, S. dexter cordis*—s. *Vena-*

rum pulmonalium, S. pulmonalis—s. Venosus, S. dexter cordis.

**SINUSUS, VERTEBRAL, (F.) Sinus vertebraux.** Two great venous sinuses, different from those of the dura mater, which extend the whole length of the vertebral canal, from the occipital foramen to the end of the sacrum, behind the bodies of the vertebrae, before the dura mater, and at the sides of the posterior vertebral ligament. At their inner side they communicate with each other by means of branches, which form true *transverse sinuses*. They are situate at the middle of the body of each vertebra, passing under the posterior vertebral ligament. They receive, at their middle part, the veins that arise in the spongy tissue of the vertebrae. By their external side, the vertebral sinuses communicate with the posterior branches of the vertebral, intercostal, and lumbar veins. At their posterior side they receive the veins, which creep on the prolongation of the dura mater that envelops the marrow.

**SINUS VULVAE, Rima vulvæ.**

**SIPEERI, Bebeeru.**

**SIPEERINE, see Bebeeru.**

**SIPHAR, Peritoneum.**

**SIPHILIS, Syphilis.**

**SIPHITA, Somnambulium—s. Parva, Chorea.**

**SIPHO, Syringe—s. Urinæ, Diabetes.**

**SIPHONIA CAHUCHU, see Caoutchouc—**

**s. Elastica, see Caoutchouc.**

**SIPHUNCULUS, Syringe.**

**SIRA, Orpiment.**

**SIRIASIS, Coup de Soleil, Insolation, Phrenitis—s. Egyptiaca, Coup de Soleil.**

**SIRIUM MYRTIFOLIUM, Santalum album.**

**SIRIUS, Canicula.**

**SIROP DE CAPILLAIRE, see Adiantum capillus veneris—s. de Coralline, see Corallina Corsicana.**

**SIRUP, Syrup.**

**SISON AMMI, Family, Umbelliferæ. Sez. Syst. Pentandria Digynia.** The plant that affords the *Ammi verum* of the shops; (F.) *Ammi des Boutiques*. The seeds were once used as a carminative.

**SISON AMOMUM, (F.) Amoms faux,** is considered to be excitant and diuretic. It is the *field honewort*.

**SISYMBRIUM MENTHASTRUM, Mentha aquatica.**

**SISYMBRIUM NASTURTIUM, Nasturtium aquaticum, N. officinale, Laver odoratum, Cratogeomysium, Cressi, Cardamine fontana, Water Cress, (F.) Cresson de fontaine. Family, Cruciferæ. Sez. Syst. Tetradynamia Siliquosa.** Water cresses are commonly used in salad. They have obtained a place in the materia medica for their antiscorbutic qualities.

**SISYMBRIUM OFFICINALE, Erysimum.**

**SISYMBRIUM SOPHIA; the Herb Sophia, Sophia Chirurgo'rum, Flux or Flux weed, (F.) Saizesse des Chirurgiens.** It was once reputed to be anthelmintic, and valuable in hysterical affections. It is not used.

Other species of *Nasturtium*, as *N. PALUSTRE, Marsh water cress*; and *N. amphibium, Water radish*, possess similar virtues with *Nasturtium officinale*.

**SITICULOSUS, Dipsodes; see Alternative.**

**SITIENS, Dipsodes.**

**SITIS, Thirst—s. Intensa, Polydipsia—s. Morbosa, Polydipsia.**

**SITKA, MINERAL WATERS OF. See Archangel, New, mineral waters of.**

**SITOS, Aliment.**

**SITUS ANOMALUS seu PERVERSUS INTESTINORUM, Splanchnectopia.**

**SIUM, Sium nodiflorum, Creeping Water-parsnep, (F.) Berle nodiflora. Family, Umbelliferæ. Sez. Syst. Pentandria Digynia.** It is stimulant, and supposed to be diuretic and lithontriptic. It is, sometimes, employed in cutaneous eruptions.

**SIUM LATIFOLIUM** is the common *Water-parsnep* of the United States. It is said to be poisonous.

**SIUM NINSI.** The plant whose root is called *Radix Ninsii, Ninsin, Nindein*. This root was long supposed to be the same as ginseng, and it possesses similar, though weaker properties.

**SIUM SISARUM, Skirret,** is used as a salad in Europe; and has been supposed a useful diet in chest affections.

**SIVVENS, Sibbens.**

**SKELETIA, Emaciation.**

**SKELETOL'OGY, Sceletolog'ia, (F.) Sceletologie, from σκελετος, 'a skeleton,' and λογος, 'a discourse.'** A treatise on the solid parts of the body. This part of anatomy comprehends *Osteology* and *Syndesmology*.

**SKEL'ETON, Sceletum, from σκελετος, Cadaver exsiccatum, (F.) Squelette, Sceleton, a dried body; from σκελλο, 'I dry.'** The aggregate of the hard parts of the body, or the bones. A skeleton is found in almost all animals, although it may not be always formed in the same manner. In some, as in the crustacea and testacea, it is wholly or partly *external, Exo-skeleton, Dermo-skeleton*. In others, as in birds, the mammalia, &c., it is *internal, Endo-skeleton, Neuro-skeleton*. It serves as a support for other organs. On it the general shape of the body and of its various parts is greatly dependent. When the bones are united by their natural ligaments, the skeleton is said to be *natural, Sceletum naturale*; when articulated by means of wires, *artificial, Sceletum artificiale*.

**SKELETOPE'IA, Sceletopa'a, Sceletu'sis, from σκελετος, 'a skeleton,' and ποισι, 'I make.'** The part of practical anatomy which treats of the preparation of bones, and the construction of skeletons. Bones are prepared to exhibit their conformation, structure, chymical composition, mode of development, and changes; the different cavities formed by the union; and to demonstrate their connexions, relations, modes of union, &c.

**SKEVISH, Erigeron Philadelphicum.**

**SKEVISH, FLEABANE, Erigeron Philadelphicum.**

**SKIN, Cutis.**

**SKIN-BOUND DISEASE, Induration of the cellular tissue.**

**SKIOMACHIA, Sciomachy.**

**SKIRRET, Sium sisarum.**

**SKIRSE, Scirrhus.**

**SKOKE, Phytolacca decandra.**

**SKUE-SIGHT, Dysopia lateralis.**

**SKULL, Cranium.**

**SKULL-CAP, Calvaria, Scutellaria galericulata.**

**SKUNK-CABBAGE, Dracontium fetidum.**

**SLATE, IRISH, Hibernicus lapis.**

**SLATERS, Onisci aselli.**

SLATKAIA TRAVA, see Spirit.

SLAVERING, from *saliva*: *Ptyalis' mus iners*, *Driv'ellings*, (F.) *Bave*. Involuntary flow of saliva, from sluggishness of deglutition, without increased secretion. It is seen in the infant, the aged, and the idiot.

SLEEP, Sax. *ſlep*; *Somnus*, *Sompnus*, *Sopor*, *Dormit'io*, *Hypnos*, (F.) *Sommeil*. Temporary interruption of our relations with external objects. A repose of the organs of sense, intellectual faculties, and voluntary motion.

The act of quitting this condition is called *awaking*, (F.) *Évigation*, *Reveil*. Sometimes this is progressive and natural; at others, sudden and starting; (F.) *Reveil en sursaut*,—as in nightmare, affections of the heart, hypochondriasis, &c.

Magnetic sleep—*Hypno'sis biomagnet'ica*—is the sleep induced by the so called animal magnetism.

SLEEPLESSNESS, Insomnia.

SLEEP-WALKING, Somnambulism.

SLING, (G.) *Schlinge*, *Mistel'la*, *Mit'rium*.

A bandage, employed to keep the forearm bent on the arm, in cases of injury done to those parts, in fracture of the clavicle, injury of the hands, &c. A handkerchief is often sufficient for this purpose. It must be folded diagonally, and be tied, by the extremities, round the neck. The French surgeons have used many varieties of *Écharpes* or *slings*; as the *Grande écharpe*, *Écharpe moyenne*, *Petite écharpe*, *Écharpe de J. L. Petit*, &c.

SLIPPERS, *Impatiens*.

SLIT AND TAIL BANDAGE, Invaginated bandage.

SLOE TREE, *Prunus spinosa*.

SLOUGH, *Eschar*.

SLOWS, Milk sickness.

SLUG, *Limax*—s. *Sea*, *Biche de Mer*.

SLEEPER, *Somnolency*.

SMALLAGE, *Apium graveolens*.

SMALL-POX, *Variola*—s. Modified, *Varioloid*.

SMALT, *Protoz'ide of Cobalt*, *Smaltum*, *Safr*, *Azur*, *Blus Starch*. This oxyd has been given in rheumatism, in the dose of ten to twenty grains. A larger quantity excites vomiting.

SMARAGDUS, (F.) *Émeraude*. The emerald. It was formerly regarded as a tonic.

SMARTWEED, *Polygonum punctatum*.

SMECTICA, Detergents.

SMECTIS, *Cimolia terra*.

SMECTRIS, *Cimolia terra*.

SMEGMA, *σμηγμα*; from *σμηγειν*, 'to wipe, to rub off.' Soap, grease, a salve, a liniment. Also, the secretion from the sebaceous follicles of the skin.

SMEGMA ARTICULARE, *Synovia*—s. Cutaneum, see Sebaceous glands.

SMEGMA PRÆPUTII. The fatty secretion from the sebaceous follicles of the glans penis.

SMEGMATORRHŒA, *Stearrhœa*.

SMEGMORRHŒA, *Stearrhœa*.

SMELL, SENSE OF, *Olfaction*.

SMELLING, *Olfaction*.

SMELLOME'S OINTMENT FOR THE EYES, *Ceratum resine*.

SMILAX, *Taxus baccata*—s. *Aspera* *Chinensis*, *Smilax China*—s. *Aspera* *Peruviana*, *Smilax sarsaparilla*.

SMILAX CHINA, *China*, *China orientalis*, *Sankira*, *Gauqtara*, *Smilax aspera* *Chinen'sis*, *China root*, (F.) *Squine*, *Esquins*. Family, *Smilacæ*. *Sez. Syst.* *Diocia Hexandria*. Formerly much used in cutaneous and venereal affections.

SMILAX INDICA SPINOSA, *Smilax pseudo-China*—s. *Officinalis*, *Smilax sarsaparilla*.

SMILAX PSEUDO-CHINA, *Smilax Indica spinosa*, *China occidentalis*, *China spuria nodosa*; *American* or *West India China*. In scrofulous disorders, the root has been often preferred to the oriental kind. In other cases, it possesses similar virtues.

SMILAX SARSAPARILLA, *S. officinalis*, *Sarsaparilla*, *Sartaparilla*, *Smilax aspera* *Peruviana*, *Sarsa*, *Sarsa*, *Carivillan'di*, *Iva Pecan'ga*, *Macapalis*, *Zarsa*, *Zarsaparilla*, (F.) *Salsaparilla*. The root of the Sarsaparilla is inodorous; taste bitterish, feculaceous, and fibrous: of a dark colour externally; white within. It is possessed of diuretic and demulcent properties, and has been often employed in the sequelæ of syphilis; when, after a mercurial course, nocturnal pains, ulceration, &c., continue. It has also been advised in scrofula, chronic rheumatism, &c.; but its efficacy is, to say the least of it, a matter of doubt. Dose, ℥j to ʒj of the powder.

SMILE, *σμηλη*. A curved, two-edged bistoury. A knife.

SMILEON, Scalpel.

SMYRNA, *Myrrha*.

SMYRNISMOS, *Embalming*.

SMYRNIUM OLUSATRUM, *Hipposeli'num*, *Smyr'nium*, *Macero'na*, *Macedonis'ium*, *Herba Alexandri'na*, *Gri'etum*, *Agrioseli'num*, *Alexan'ders*, *Alexanders*. A plant formerly cultivated for culinary purposes. The seeds are bitter and aromatic, and the roots more powerfully bitter. They have been recommended as resolvents, diuretics, emmenagogues, &c.

SNAGREL, *Aristolochia serpentaria*.

SNAIL, *Limax*—s. *Shell*, *Cochlea*.

SNAKEHEAD, *Chelone glabra*.

SNAKEROOT, BIRTHWORT, *Aristolochia serpentaria*—s. *Black*, *Actæa racemosa*—s. *Button*, *Eryngium aquaticum*, *Liatris spicata*—s. *Canada*, *Asarum Canadense*—s. *Dewitt*, *Prenanthes*—s. *Evergreen*, *Polygala paucifolia*—s. *Heart*, *Asarum Canadense*—s. *Virginiana*, *Aristolochia serpentaria*.

SNAKEWEED, *Aristolochia serpentaria*, *Helenium autumnale*, *Polygonum bistorta*—s. *American*, *Cicutâ maculata*.

SNEEZING, from Sax. *niernan*; (G.) *Niesen*, *Clonus Sternuta'tio*, *Sternuta'tio*, *Sternutamentum*, *Sternumentum*, *Ptarinos*, (F.) *Éternuement*. A convulsive motion of the expiratory muscles, by which the air is driven rapidly, and rushes sonorously, through the nasal fossæ, carrying with it the mucus and foreign bodies, which adhere to the pituitary membrane, and have occasioned the movement.

SNEEZEWORT, *Achillea ptarmica*, *Helenium autumnale*.

SNORING, *Rhonchus*, *Rhonais*, *Ronchus*, *Rhonchus*, *Stortor*, *Ronchus*, (F.) *Ronflement*: from (G.) *scharnen*. Noise made in the posterior part of the mouth and nasal fossæ during the movements of inspiration, particularly in sleep, both when the person is in health, and in disease, as in apoplexy. In certain affec-

tions of the chest—in some cases of pulmonary catarrh—a kind of snoring may be distinctly heard by applying the ear or the stethoscope to the chest.

SNOT, Nasal mucus.

SNOW, Sax. *rnar*, *Nix*, *Chion*, (F.) *Neige*. Water in a solid state, which falls from the atmosphere in white flakes. It is used externally as a tonic and discutient.

SNOWBALL, *Cephalanthus occidentalis*.

SNUFF, CEPHALIC, *Pulvis asari* compound.

SNUFFLES, Teut. *Snuffeln*, *Grave-donenatorum*, *Rhinan'gia*, *Rhinanch'oné*. Breathing hard through the nose, often owing to accumulation of the mucous secretions,—an affection to which infants are liable, and which is relieved by oiling the interior of the nostrils.

SOAP, Sapo—s. Acid, see Sapo—s. Berries, *Sapindus saponaria*—s. Black, see Sapo—s. Castile, *Sapo durus*—s. of the Cocoa-nut oil, see Sapo—s. Common or soft, see Sapo—s. Liquid, see Sapo—s. Medicinal, see Sapo—s. Spanish, *Sapo durus*—s. Yellow, see Sapo.

SOAPWORT, *Saponaria*.

SOB, from Sax. *soþrian*, 'to grieve;' (F.) *Sanglot*. A spasmodic, sudden, and momentary contraction of the diaphragm, immediately followed by relaxation, by which the little air, that the contraction has caused to enter the chest, is driven out with noise. It is an evidence of corporeal or mental suffering.

SOBOLES, Epigone.

SOBRIETAS, Temperance.

SOCIA PAROTIDIS, see Parotid.

SOCIETY; *Societas*, (F.) *Société*, from *sociare*, 'to associate.' An association for the promotion of some common object.

SOCIETIES, MEDICAL. Associations of medical gentlemen for the promotion of science have been numerous, and productive of valuable results. In the United States, societies exist in many of the states, possessing the power of examining into the qualifications of every one who may be desirous of practising within their particular jurisdiction. In some of the states, however, the qualified and unqualified are permitted to exercise their profession with equal privileges and immunities.

Amongst the medical associations that have issued from time to time useful transactions or publications, are the following: IN AMERICA,—The *Massachusetts Medical Society*; the *Physico-medical*, and *Medical Societies of the State of New York*; and the *College of Physicians of Philadelphia*. IN EUROPE,—The *Association of Fellows and Licentiates of the King's and Queen's College of Physicians of Ireland*; the *Medico-Chirurgical and Phrenological Societies of Edinburgh*; the *College of Physicians, the Medico-Chirurgical, the Medical and the Sydenham Societies of London*; the *Associated Apothecaries and Surgeon Apothecaries of England and Wales*, and the *Provincial Medical and Surgical Association*; the *Royal Academy of Surgery*, the *Royal Society of Medicine*, the *Société Médicale d'Emulation*, the *Société de Médecine*, the *Royal Academy of Medicine*, and the *Société Médicale d'Observation, of Paris*; the *Medico-Chirurgical Academy of Vienna*; the *Medical Societies of Berlin and Copenhagen*, &c. &c. IN ASIA,—The *Medical and Physical Society of Calcutta*.

Valuable medical essays are likewise contained in the published *Transactions of the American Philosophical Society*; of the *Royal Societies of London, Edinburgh, Göttingen, &c.*; of the *Royal Academy of Sciences of Paris*; the *Imperial Society of Sciences of St. Petersburg*; the *Royal Academy of Sciences of Turin*; the *Academia Imperialis Leopoldina Naturæ Curiosorum, &c.*

SOCORDIA, Hallucination.

SODA. An Arabic word. *Protoxide of sodium*, (F.) *Soude*, is obtained by adding caustic lime to a solution of carbonate of soda. The soda in solution may be obtained by evaporation as hydrate of soda. Its action is like that of potassa; but it is not official.

*Soda impura, Barilla, Bariglia, Baril'lor, Soda Hispanica, Ana'tron, Natron, Ana'ton, Nitrum Antiquorum, Kelp, Aphronitrum, Sal alkalinus fixus fossilis, Carbonas Soda impurus, Subcarbonas Soda impura, Anachron*, the mineral alkali is obtained from several sources;—naturally, in Egypt: artificially, from the incineration of marine plants; and from the decomposition of sulphate of soda, &c. It is principally, however, derived from plants growing on the sea-coast;—as the *Salsola sativa*, *S. soda*, *S. tragus*, *Salicornia herbacea*, *Salicornia Arabica*, &c. The *Barilla ashes* are from the ashes of the *Salicornia Europæa*—the *Kelp, Soude de Varecq*, from the *Fucus vesiculosus* and other varieties—the *Turkey Barilla, Roguette, Cendro du Levant, Rochet à Alexandrie*, from the *Mesembryanthemum Copticum*;—the *Alicant Barilla, Soda Alicantina, S. Alonon'sis*, from the *Mesembryanthemum nodiflorum*;—and the *Carthage'na Barilla*, from the *Salicornia* and *Salsola*.

Impure subcarbonate of soda, (F.) *Soude de commerce*, consists of subcarbonate of soda, potash, chloride of sodium, clay, and other earthy substances. It is chiefly used for preparing the pure subcarbonate.

SODA, Cardialgia, Cephalalgia, Pyrosis.

SODA ACETATA, *Soda Acetas, Acetate of Soda, Terra foliata mineralis*, (F.) *Acetate de soude*. This salt is used in similar cases with the acetate of potass.

SODA AERATA, *Sodæ carbonas—s. Alonensis, Soda—s. Biborate of, Borax—s. Bicarbonate of, Sodæ carbonas—s. Borate of, Borax—s. Boraxata, Borax*.

SODA, CARBONATE OF, *Sodæ Carbonas, Carbonas Natricum, Soda Aërata, Sodæ Bicarbonas, Bicarbonate of Soda, Carbonate of protoxide of Sodium*, (F.) *Carbonate de Soude, S. effervescente, S. aërée, S. Crayusis*. (*Sodæ subcarb. Bj, aqua destill. Oijj*. Dissolve the subcarbonate of soda, and pass carbonic acid through the solution; set it aside to crystallize.) Its use is the same as the subcarbonate, than which it is less caustic, and is better adapted for effervescing draughts.

SODA CAUSTICA, *Protoxide of Sodium, Caustic Soda*, (F.) *Soude caustique, S. à la Chaux, Soude pure*. The impure subcarbonate, treated by quicklime, and consequently deprived of its carbonic acid. It may be used as a caustic, like the *Potassa fusa*, and is even preferable to it, as it does not deliquesce and run.

SODA, CHLORIDE OF, *S. Chlorinata, Sodæ Chloridum, Chlorinated Soda, Natrum Oxy-muriaticum, Sodæ Chloruretum, Oxy-muriate*

of Soda, (F.) *Chlorure de Soude*, *Chlorure d'oxide de Sodium*. This salt is used as a disinfecting agent; both to remove offensive smells in chambers, and to alter the condition of fetid ulcers. See Liquor Sodæ Chlorinatus.

**SODA, CHLORINATED, Soda**, chloride of—s. Hispanica, Soda—s. Hydrochlorate of, Soda, muriate of.

**SODA, HYPOSULPHITE OF, Sodæ hyposulph'is**, (F.) *Hyposulfite de Soude*. This salt has been lately extolled in chronic cutaneous, and scrofulous affections. It is given in syrup.

**SODA, LITHEATE OF, Urate of soda**—s. Mephitic of, Soda, subcarbonate of.

**SODA, MURIATE OF, Sodæ murias**, *Soda muria'ta*, *S. muriat'ica*, *Alkali minera'le nali'num*, *Sal commu'nis*, *Sal culina'ris*, *Sal fontium*, *Sal gomme*, *Sal mari'nus*, *Natron muria'tum*, *Sal albus*, *Natron muria'ticum*, *Common salt*, *Sea salt*, *Hydrochlorinas Natricus*, *Sal fossilis*, *Sal lu'idum*, *Muria*, *Rock salt*, *Bay salt*, *White salt*, *Quadrichloruret of Sodium*, *Hydrochlorate of protoxide of Sodium*, *Hydrochlorate of Soda*, *Chloruretum Sodii*, *So'dii Chlor'idum*, *Chloride of Sodium*, (F.) *Chlorure de Sodium*, *Sel de Cuisine*. In an impure state, this salt is one of the most abundant of natural productions. It is soluble in 3 parts of water, and is tonic, purgative, and anthelmintic. Externally, stimulant. It is a well known and useful culinary substance.

**SODA, NITRATE OF, Sodæ Nitras**, *Natron nitricum*, *Alkali minera'le nitra'tum*, *Nitrum Cubicum*, *Nitrate of protoxide of Sodium*, *Protom'itrate of Sodium*, *Nitrum Rhomboida'le*, *Nitras Natricum*, *Salp'etra*. Its virtues are similar to those of the nitrate of potass, for which it has been substituted.

**SODA, OXYMURIATE OF, Soda**, chloride of.

**SODA, PHOSPHATE OF, S. Phosphora'ta**, *Sodæ phosphas*, *Subphosphate of protoxide of Sodium*, *Phosphas Natricum*, *Natron Oxyphosphor'ides*, *Subprotophosphate of Sodium*, *Subphosphate of Soda*, *Sal mirab'ile perlatum*, *Tribasic phosphate of Soda*, *Alkali minera'le phosphora'tum*, *Tasteless purging salt*, (F.) *Phosphate de Soude*, *Sel admirable perlé*. (Bone burnt to whiteness and powdered, ℞; Sulphuric acid, ℥vj; Carbonate of soda, q. s. Mix the bone with the acid in a covered vessel, add a gallon of water, and stir. Digest for three days, occasionally adding a little water to that lost by evaporation, and frequently stirring the mixture. Pour in now a gallon of boiling water, and strain through linen, gradually adding more boiling water, until the liquor passes nearly tasteless. Set the strained liquor by, that the dregs may subside; from which pour off the clear solution, and boil down to a gallon. To this solution, poured off from the dregs and heated in an iron vessel, add by degrees the carbonate of soda previously dissolved in hot water, until effervescence ceases, and the phosphoric acid is completely neutralized; then filter the liquor, and set it aside to crystallize. Having removed the crystals, add, if necessary, a small quantity of carbonate of soda to the liquor, so as to render it slightly alkaline; then alternately evaporate and crystallize so long as crystals are produced. Lastly, preserve the crystals in a well stopped bottle,—Ph. U. S.) Cathartic, in the dose of from ℥ss to ʒj.

**SODA, PHOSPHATE OF, TRIBASIC, S. Phosphate of.**

**SODA, SUBCARBONATE OF, Sodæ Subcarbonas**, *Sodæ Carbonas* (Ph. U. S.), *Subcarbonate of protoxide of Sodium*, *Mephite of Soda*, *Natron preparatum*, *Sal Soda*, *Salt of Soda*, *Flos Salis*, *Sag'men Vitri*, *Salt of Barilla*, *Sal alkali*, *Carbonas Sodæ* of some, (F.) *Sous-carbonate de Soude*. The impure subcarbonate, dissolved in water; the solution filtered and crystallized. Soluble in two parts of water at 60°. It is much used as an antacid; and also as a deobstruent in scrofulous and other affections. Dose, gr. x to ʒss.

The dried Subcarbonate of Soda, *Sodæ Subcarbonas exsiccata*, *Sodæ carbonas exsiccatus*, *Carbonas Soda siccatum*, (F.) *Sous-carbonate de Soude desséché*, is employed as an antacid and lithontriptic. Dose, gr. x to xv.

**SODA, SUBPHOSPHATE OF, S. phosphate of.**

**SODA, SULPHATE OF, Sodæ Sulphas**, *Natron vitriola'tum*, *Sal catharticus Glauberi*, *Alkali minera'le sulphuricum*, *Natron sulphuricum*, *Soda vitriola'ta*, *Sulphas natricus*, *Sal mirab'ilis Glauberi*, *Aperient Salt of Frederick*, *Glauber's Salts*, (F.) *Sulfate de Soude*. Obtained from the salt that remains after the distillation of muriatic acid; the superabundant acid being saturated with subcarbonate of soda. It is soluble in three parts of water at 60°; is purgative, and, in small doses, diuretic. Dose, ʒvj to ʒx.

The *Lynington Glauber's Salts* is a Sulphate of Magnesia and Soda, and is obtained from the mother liquor of sea-water, or by dissolving Epsom salt in a solution of Glauber's salt.

**SODA, TARTRATE OF, Tartrate of potass and Soda**, *Soda Tartarisa'ta*, *Tartarized Soda*, *Sal Ruppellen'sis*, *Roche's Salt*, *Sal Polykres'tum Seignett'i*, *S. Seignetti*, *Seignetti's Salt*, *Natron tartarisa'tum*, *Tartris potassæ et Sodæ*, *Sodæ et Potassæ Tartras* (Ph. U. S.), *Sodæ potassio-tartras*, *Tartras Potassæ et Sodæ*, *Tartrate de potasse et de Soude*. (Sodæ subcarb., p. 1; potass. supertart., p. 3; aq. ferri., p. 15. Dissolve the subcarbonate in water; and add, gradually, the supertartrate. Filter the solution and crystallize.) It is a gentle cathartic. Dose, ʒss to ʒj.

**SODA, URATE OF, Urate of Soda**—s. Vitriolata, S. sulphate of—s. Water, Acidulous water, simple.

**SODÆ ACETAS**, Soda, acetate of—s. Biboras, Borax—s. Bicarbonas, Soda, carbonate of—s. Borax, Borax—s. Borax alcalescens, Borax—s. Borax supersaturatus, Borax—s. Carbonas, Soda—s. Carbonas, Soda, Subcarbonate of—s. Carbonas exsiccatus, see Soda, subcarbonate of—s. Carbonas impurus, Soda—s. Chloras, Soda, chloride of—s. Hyposulphis, Hyposulphite of soda—s. Murias, Soda, muriate of—s. Nitras, Soda, nitrate of—s. Phosphas, Soda, phosphate of—s. et Potassæ tartras, Soda, tartrate of—s. Potassio-tartras, Soda, tartrate of—s. Subboras, Borax—s. Subcarbonas impura, Soda.

**SODII AURO-TERCHLORIDUM**, see Gold—s. Chloridum, Soda, muriate of—s. Chloruretum, Soda, muriate of.

**SODIUM, Na'trium, Natro'nium**. The metallic basis of soda.

**SODIUM, CARBONATE OF PROTOXIDE OF, Sodæ carbonas**—s. Chloride of, Soda, muriate of—s. Chlorure de, Sodæ murias—s. Chlorure d'Oxide

*de*, Soda, chloride of—s. Protonitrate of, Soda, nitrate of—s. Protoxide of, hydrochlorate of, Soda, muriate of—s. Protoxide of, Soda—s. Protoxide of, nitrate of, Soda, nitrate of—s. Protoxide of, phosphate of, Soda, phosphate of—s. Protoxide of, subcarbonate of, Soda, subcarbonate of—s. Quadri-chloruret of, Soda, muriate of—s. Subborate of protoxide of, Borax—s. Subprotoborate of, Borax—s. Subprotophosphate of, Soda, phosphate of.

SODOMA GALLORUM, Syphilis.

SODOMIA, Buggery.

SODOMY, Buggery.

SOFTENING, Mollities.

SOI-POUR-SOI, Homœozygy.

SOLE, Sericum.

SOLF, Thirst—s. *Excessivo*, Polydipsia.

SOL, Gold.

SOLAMEN INTESTINORUM, Pimpinella anisum—s. Scabiosorum, Fumaria.

SOL'ANOID, *Solanof des*; from *solanum*, 'the potato,' and *idos*, 'resemblance.' Resembling a potato; potato-like. An epithet applied to a form of cancer, which appears to be intermediate between scirrhous and encephaloid, increasing more rapidly than the former, yet approaching it in firmness.

SOLA'NUM, *S. nigrum*, *S. vulgare*, *Common Nightshade*, *Garden Nightshade*, (F.) *Morelle à fruit noir*. Family, Solanæ. *Sez. Syst.* Pentandria Monogynia. A narcotic poison.—The *Huile de Morelle* is made, by macerating in oil, for several days, the leaves and fruit of this plant. The oil is anodyne and disquietent.

SOLANUM DULCAMA'RA, *Dulcamara*, *Solanum Scandens*, *Glyciphyeros*, *Ama'ra dulcis*, *Solanum lignosum*, Σολυφύρος of Theophrastus, *Bittersweet*, *Woody Nightshade*, *Bittersweet Nightshade*, *Bittersweet Vine*, *Nightshade Vine*, *Violet bloom*, (F.) *Douce-amère*, *Morelle grimpante*. The taste of the stalks is bitter, followed by sweetness; hence its name. It has been used in many diseases, as a diuretic and sudorific, especially in chronic rheumatism, humoral asthma, dropsy, various skin diseases, scrofula, and jaundice. Dose, in powder, ℥j to ʒj.

SOLANUM ESCULENTIUM, *S. tuberosum*—s. *Fœtidum*, *Datura stramonium*—s. *Furiosum*, *Atropa belladonna*—s. *Lethale*, *Atropa belladonna*—s. *Lignosum*, *S. dulcamara*.

SOLANUM LYCOPER'SICUM; the *Love-apple plant*. The fruit of this, called *Tomato* or *Love-apple*, (F.) *Pomme d'Amour*, is much eaten in the United States; and, with the French, Spaniards, Portuguese, &c., forms an esteemed sauce.

SOLANUM MAGNUM VIRGINIANUM RUBRUM, *Phytolacca decandra*—s. *Maniacum*, *Atropa belladonna*—s. *Maniacum*, *Datura stramonium*—s. *Melanocerasus*, *Atropa belladonna*.

SOLANUM MELON'GENA, *Molongena*, *Egg-plant*, *Mud Apple plant*; (F.) *Aubergins*. A native of Asia, Africa, and America. Its oblong, egg-shaped fruit, *Pomum Melon'genæ*, *Malum insa'num*, is prepared in soups and sauces in those countries, like the tomato.

SOLANUM NIGRUM, *Solanum*—s. *Racemosum* Americanum, *Phytolacca decandra*—s. *Scandens*, *S. Dulcamara*.

SOLANUM SANCTUM; the *Palestine Nightshade*. The fruit of this is globular, and is much eaten in the countries where it is a native.

SOLANUM TUBEROS'UM, *Bata'bas*, *Solanum esculentum*, *Papas America'nus*, *Pappus America'nus*, *America'num Tuberos'um*, *Batta'ta Virginia'na*; the *Pota'to*, (F.) *Pomme de Terre*. A native of Peru. A nutritious and wholesome vegetable; one of the most useful, indeed, that exists. One hundred pounds of potatoes afford ten pounds of starch, which is equal to arrow-root, as a nutrient and demulcent. It is called *Potato Flour*, *P. Starch*, *French Sago*, *Petit Sague*, *Common Arrow-root*, &c.

SOLANUM URENS, *Capsicum annuum*—s. *Vesicarium*, *Physalis*—s. *Vulgare*, *Solanum*.

SOLAR, *Solaris*, from *sol*, 'the sun.' Relating to the sun; having rays like the sun.

SOLAR PLEXUS, *Plexus solaris*, *Centrum commune*, *Cerebrum abdominale*. A collection of ganglions and filaments, interweaving and anastomosing with each other repeatedly, and belonging to the system of the great sympathetic. This vast plexus, lying on the vertebral column, the aorta, and the pillars of the diaphragm, has a very irregular shape. The ganglions and filaments composing it are soft, reddish, and almost all issue from the semilunar ganglions. It receives, also, branches from the pneumogastric. It seems to be chiefly intended for the aorta, and accompanies all its branches; furnishing many secondary plexuses, which are called the *infra-diaphragmatic*, *caeliac*, *superior mesenteric*, *inferior mesenteric*, *renal* or *emulgent*, *spomatic*, &c.

SOLDANELLA, *Convolvulus soldanella*.

SOLDIERS' WEED, *Matico*.

SOLE, *Solum*, *Solea*, *Basis cor'poris*, *Ichnus*, *Superficies plantaris pedis*, *Petina*, *Vestigium*, *Pe'dion*, *Pesa*, *Palma*, *Plantaris superficies pedis*, *Pedies conca'va seu inferior* seu *Plantum seu Conca'vum seu Pars inferior* seu *Plantis'ies* seu *Planta* seu *Vola pedis*, (F.) *Plante du Pied*. The sole of the foot; the under surface of the foot.

SOLEA, *Sole*.

SOLEAIRE, *Soleus*.

SOLEN, *Cradle*, see *Vertebral column*.

SOLENA'RIVM, from *σωλην*, 'a canal.' An instrument of surgery, representing a kind of gutter, in the cavity of which the penis was placed, like a limb in a *cradle*.—Galen. The word *Solen* itself—*σωλην*, *Canalis*—was used, in antiquity, for a grooved channel, in which a fractured limb was placed.

SOLE'US, *Gastrocnemius internus*, *Tibio-calcaneus*, (Ch.;) (F.) *Soleaire*, from *solea*, 'a sole of a shoe.' A muscle situate at the posterior part of the leg. It is broad, flat, and almost oval; and is attached, above, to the posterior edge of the fibula, to the oblique line on the posterior surface, and to the inner edge of the tibia. It terminates, below, by a large tendon, which unites to that of the gastrocnemius externus, to form the tendo Achillis. This muscle extends the foot on the leg, and conversely.

SOLID, *Solidus*, *Stereos*. A body whose integrant molecules are so united by the force of cohesion, that they will not separate by their own weight. The solids, in the human body, are the bones, cartilages, tendons, muscles, ligaments, arteries, veins, nerves, membranes, skin, &c. The anatomy, or rather study of the solids, is called *Stereology*, from *στερεος*, 'solid,' and *λογος*, 'a discourse.'

**SOLIDAGO**, see *Solidago virgaurea*—s. *Saracenicæ*, *S. virgaurea*.

**SOLIDA'GO VIRGAURÆA**, *Virga aurea*, *Herba doræa*, *Conyza coma aurea*, *Symphytum Petre'um*, *Elich'rysum*, *Consolida seu Solida'go Saracenicæ*, *Golden rod*. *Nat. Ord.* Compositæ *Corymbifera*. *Sex. Syst.* Syngenesia *superflua*. (F.) *Verge d'or*. The leaves of *Solida'go odo'ra*—*Solida'go* (Ph. U. S.)—and the flowers are recommended as aperients and tonics, in urinary diseases, and in internal hemorrhage.

**SOLIDISM**, *Patholog'ia solida'ris*. The doctrine of those physicians who refer all diseases to alterations of the solid parts of the body. To the believers in this doctrine, the appellation *Solidists* has been given. The solidists think that the solids alone are endowed with vital properties; that they alone can receive the impression of morbiac agents, and be the seat of pathological phenomena. Solidism has been the prevalent doctrine until recently. It is scarcely necessary to say, that in all our investigations, the condition of both solids and fluids must be regarded.

**SOLIUM**, *Baignoire*, *Tœnia solium*—s. *Pedis*, *Metatarsus*.

**SOLUBILITY**, *Solubilitas*, from *solvere*, *solutum*, 'to dissolve.' That property of a body by virtue of which it can be dissolved in a menstruum.

TABLE OF THE SOLUBILITY OF SOME SUBSTANCES IN WATER.

NAMES OF SALTS.	Solubility in 100 parts water.	
	at 60°	at 212°
<i>Acids.</i>		
Benzoic.....	0.208	4.17
Citric.....	133	200
Oxalic.....	50	100
Tartaric.....	very soluble	
<i>Salts.</i>		
Acetate of Potass.....	100	
Soda.....	35	
Carbonate of Ammonia.....	50	
Magnesia.....	2	
Potass.....	25	
Soda.....	50	
Chlorate of Potass.....	6	40
Soda.....	25	35
Muriate of Ammonia.....	33	100
Lime.....	200	
Magnesia.....	100	
Potass.....	33	
Soda.....	35.42	36.16
Nitrate of Potass.....	14.25	100
Soda.....	33	100
Phosphate of Soda.....	25	50
Sulphate of Ammonia.....	50	100
Copper.....	25	50
Iron.....	50	100
Magnesia.....	100	133
Potass.....	6.25	20
Soda.....	37	125
Subborate of Soda.....	8.4	16.8
Supersulphate of Potass.....	5.0	100
Supertartrate of Potass.....	1.5	3.3
Tartrate of Potass.....	25	
Tartrate of Potass and Soda.....	20	
Antimony and Potass.....	6.6	13

**SOLUM**, *Sole*.

**SOLUTIO**, *Solution*—s. *Alexiteria Gaubiana*, see *Disinfection*—s. *Ammonia subcarbonatis*, *Liquor ammoniac subcarbonatis*—s. *Arsenicalis*, *Liquor arsenicalis*—s. *Arsenicata*, *Liquor arsenicalis*—s. *Arsenitis kalicæ*, *Liquor arsenicalis*—s. *Calcis*, *Liquor calcis*—s. *Camphoræ æthereæ*, *Tinctura æthereæ camphorata*—s. *Camphoræ oleosa*, *Linimentum camphoræ*—s. *Con-*

*tinui*, *Solution of continuity*—s. *Ferri nitratis*, see *Tinctura ferri muriatis*—s. *Guaiaei gummosa*, *Mistura guaiaci*—s. *Muriatis barytæ*, *Baryta muriate* of—s. *Muriatis calcis*, see *Calcis murias*—s. *Muriatis ferrici æthereæ*, *Tinctura seu alcohol sulfurico-æthereus ferri*—s. *Muriatis hydrargyri oxygenati*, *Liquor hydrargyri oxymuriatis*—s. *Potassii iodidi iodureta*, *Liquor iodini compositus*—s. *Resinæ guaiaci aquosa*, *Mistura guaiaci*—s. *Subcarbonatis ammoniaci spirituosa*, *Spiritus ammoniac*.

**SOLUTIO SULPHA'US CUPRI COMPOSITA**, *Aqua vitriol'ica caru'lea*, *Sydenham's Styptic Water*. (*Sulph. cupri*, ℥ij, *alum.*, *acid. sulph.*, āā ℥ij, *aqua*, ℥viij: dissolve, and filter.)

**SOLUTION**, *Solutio*, *Lysis*, (F.) *Dissolution*. An operation which consists in dissolving a solid body in a menstruum. Likewise, the product of such operation. It means, also, with many, the termination of a disease:—with others, a termination accompanied by critical signs;—and, with others, again, it is synonymous with crisis.

**SOLUTION OF ACETATE OF AMMONIA**, *Liquor ammoniac acetatis*—s. of *Acetate of morphia*, *Liquor morphia acetatis*—s. *Alkaline*, see *Fulgokali*—s. of *Alkaline iron*, *Liquor ferri alkalini*—s. of *Alum*, compound, *Liquor aluminis compositus*—s. of *Ammoniated copper*, *Liquor cupri ammoniaci*—s. *Arsenical*, *Liquor arsenicalis*—s. of *Charcoal*, concentrated, see *Tinctura catechu*—s. of *Chlorinated soda*, *Liquor sodæ chlorinatæ*—s. of *Citrate of potassæ*, *Liquor potassæ citratis*.

**SOLUTION OF CONTINUITY**, *Solutio contin'ui*. Any division of parts previously continuous;—as a wound, a fracture, &c.

**SOLUTION OF CORROSIVE SUBLIMATE**, *Liquor hydrargyri oxymuriatis*—s. *Donovan's*, see *Arsenic and Mercury*, *Iodide of—s. Fowler's*, *Liquor arsenicalis*—s. of *Hydriodate of potass*, *Liquor potassæ hydriodatis*—s. of *Iodide of iron*, *Liquor ferri iodidi*—s. of *Iodine*, compound, *Liquor iodini compositus*—s. of *Iron*, nitrated, see *Tinctura ferri muriatis*—s. *Labarraque's*, *Eau de Javelle*—s. of *Lime*, *Liquor calcis*—s. *Lugol's*, *Liquor iodini compositus*—s. of *Magnesia*, condensed, *Magnesia fluid*—s. of *Monro*, *Liquor of Monro*—s. of *Oxymuriate of mercury*, *Liquor hydrargyri oxymuriatis*—s. *Plenck's*, see *Hydrargyri oxydum cinereum*—s. *de Potassæ*, *Liquor potassæ*—s. of *Potassæ*, *Liquor potassæ*—s. of *Subacetate of lead*, *Liquor plumbi subacetatis*—s. of *Subacetate of lead*, diluted, *Liquor plumbi subacetatis dilutus*—s. of *Subcarbonate of potassæ*, *Liquor potassæ subcarbonatis*—s. of *Sulphate of morphia*, *Liquor morphia sulphatis*—s. of *Tartarized antimony*, *Vinum antimonii tartarizati*—s. of *Van Swieten*, *Liquor hydrargyri oxymuriatis*.

**SOLUTIVUS**, *Laxative*.

**SOLVENS**, *Solvent*—s. *Minerale*, *Liquor arsenicalis*.

**SOLVENT**, *Solvens*, (F.) *Fondant*, from *solvere*, 'to dissolve.' A medicine supposed to possess the property of dissolving or removing obstructions and extraneous substances. Thus we have *solvents* of the stone in the bladder, &c.

**SOLVENT, MINERAL**, *Liquor arsenicalis*.

**SOLVENTS**, *Dissolventia*.

**SOMA**, *Body*, *Corpus*.

**SOMACETICS**, *Gymnastics*.

**SOMATIC**, *Somatus*; from *σῶμα*, 'the body.' That which concerns the body;—as *somatic* death, or death of the body, in contradistinction to *molecular* death or the death of a part.

**SOMATOL'OGY**, *Somatolog'ia*, from *σῶμα*, 'the body,' and *λόγος*, 'a discourse.' A treatise on the human body. **Anatomy.**

**SOMATOTOMY**, **Anatomy.**

**SOMMEIL**, **Sleep.**

**SOMNAM'BULISM**, *Somnambula'tio*, *Hypnobat'esis*, *Hypnobata'esis*, *Hypnobati'a*, *Rhembas'mus*, *Lunatis'mus*, *Hyppnoner'gia*, *Selenogamia*, *Nyctobate'esis*, *Autonyctobati'a*, *Seleniasis*, *Selenas'mus*, *Somnambulis'mus*, *Nyctobasis*, *Noctambul'io*, *Noctambuli's'mus*, *Nyctobadia*, *Nyctobatia*, *Siphita*, *Syphita*, *Paroniria ambulans*, *Noctivur'gium*, *Onirodyn'ia activa*, *Somno-vigil*, *Sleep-walking*, from *somnus*, 'sleep,' and *ambulare*, 'to walk.' A condition of the brain which occasions the individual to execute, during sleep, some of those actions that commonly take place when awake. It has been imagined that the somnambulist is guided solely by his internal senses; but there are many facts which induce the belief that the external senses are not always entirely suspended. The causes of somnambulism are very obscure; and the principal indication of treatment is,—so to arrange the bed-chamber of the somnambulist, that he cannot get out of it during sleep; and to avoid suppers, as well as all bodily and mental excitement.

**SOMNAMBULISM**, **MAGNET'IC OF ARTIFIC'IAL**, *Somnambulis'mus artificia'lis*, *Cataph'ora magnetica*, is that peculiar nervous condition, into which individuals have been occasionally thrown by the *Animal Magnetiser*. It has occurred only in those of weak nervous temperament; in hysterical females, &c.

**SOMNAMBULISMUS**, *Somnambulism*—s. **Artificialis**, *Somnambulism*, **magnetic.**

**SOMNAM'BULIST**, *Somnam'bulus*, *Hypnobates*, *Noctambulus*, *Lunaticus*, *Noctambulo*, *Somnam'bulo*. A sleep-walker.

**SOMNAMBULO**, *Somnambulist*.

**SOMNIA'TIO**, from *Somnium*, 'a dream.' The act of dreaming.

**SOMNIATIO MORBOSA**, *Oneironosis*—s. in **Statu Vigili**, **Hallucination.**

**SOMNIF'EROUS**, *Somnifer*, *Soporifer*, *Hypnoticus*, *Hypnoparus*, *Soporativus*, *Soporific*, *Soporiferous*. A medicine which causes sleep.

**SOMNILO'QUIUM**, *Somniloquis'mus*, *Somniloquium*, from *somnus*, 'sleep,' and *loquor*, 'I speak.' Talking in the sleep.

**SOM'NIUM**, *Enyppnion*, *Insom'nium*, a *Dream*, (F.) *Rêve*, *Songe*. A confused assemblage, or accidental and involuntary combination of ideas and images, which present themselves to the mind during sleep. Dr. S. Mitchell, of New York, used the word *Somnium* to signify the state between sleeping and waking, in which persons perform acts of which they are unconscious.

For 'waking dreams,' see **Hallucination.**

Those distressing dreams which occur during a state of half sleep, are called, by the French, *Réasseries*.

**SOMNO-VIGIL**, *Somnambulism*.

**SOMNOLENCY**, *Somnolen'tia*, *Hypnasthesis*, *Hypno'dia*, *Dormitatio*, *Heaviness*,

*Carus Lethargus Cataph'ora*, *Cataphora*, *Coma Somnolentum*, *Caro'sis*, *Slumber*, (F.) *Assoupissement*. Sleepiness. Also a state intermediate between sleeping and waking. It is often a symptom of disease.

**SOMNUS**, **Sleep.**

**SOMP'NUS**, **Sleep.**

**SON**, **Furrow**, **Sound.**

**SONCHUS OLERA'CEUS**, *Cicer'bita*, *Sow Thistle*, (F.) *Laiteron doux*. **Family**, *Cichoraceæ*. Most of the species of *Sonchus* abound with a milky juice, which is very bitter, and said to possess diuretic virtues.

**SONDE**, **Sound**, **Specillum**—s. *Cannilée*, **Director.**

**SONDE D'ANEL**. A very fine stylet of silver, awl-shaped at one end. It is used for probing the lachrymal passages through the punctum lachrymale.

**SONDE DE BELLOC**. An instrument invented by Belloc for plugging the nasal fossæ, in cases of hemorrhage. It consists of a curved silver canula, open at both ends, and furnished with a button. The instrument is passed through the nares to the throat; and a plug is attached to the button, so that, when the instrument is drawn forwards through the nose, the posterior nostril is stopped.

**SONDE BRISÉE** (F.), *Eyed probe*. A long, straight stylet, composed of two parts, which may be screwed to each other; blunt at one end, and furnished at the other with an eye, so that it may be used either as a probe for punctured wounds, or for a seton needle.

**SONDE A CONDUCTEUR**, (F.). A modification of the ordinary catheter;—to facilitate the changing of catheters, without the fear of making false passages. It is a common catheter, open at its beak. The *Stylet* or *Maudrin* is one half longer than that of the ordinary catheter. To use the instrument, the stylet is pushed into the cavity of the bladder through the catheter. The latter is then withdrawn by slipping it over the stylet, which is kept in its place, and serves as a guide to a fresh catheter.

**SONDE DE LAFOREST**. A small, crooked canula, used for probing the nasal duct from below upwards, and for throwing injections into it.

**SONDE ou PINCE DE HUNTER**. A cylindrical silver canula; of the size of a common catheter; open at both extremities, and containing a wire of iron, one of the ends of which is split into two parts; each being terminated by a small silver scoop, and separating from each other by virtue of their elasticity, when pushed out of the canula, and again approximating when drawn in. It has been used for laying hold of small calculi in the urethra.

**SONDE DE VARECQ**, *Soda*.

**SONGE**, *Somnium*.

**SONITUS AURIUM**, *Tinnitus aurium*—s. **Fluidi**, **Hyg'rechema**—s. **Hepaticus**, **Hepatechema**—s. **Intestinalis**, **Enterechema**—s. **Stomachicus**, **Gasterechema**.

**SONUS**, **Sound**—s. **Vocis**, **Accent.**

**SOOJA**, see **Dolichos**.

**SOOT**, *Fuligo*—s. **Tea**, see **Fulgokali**—s. **Wart**, **Cancer**, **chimney-sweeper's**.

**SOPHIA**, *Sisymbrium sophia*—s. **Chirurgorum**, **Sisymbrium sophia**.

**SOPHISTICATION**, **Falsification.**

**SOPHORA HEPTAPHYLLA**, *Anticholericia*. Family, Leguminosæ. *Sex. Syst.* *Dendradia Monogynia*. The root and seeds of this shrub are intensely bitter, and are said to have been found useful in cholera, colic dysentery, &c.

**SOPHORA TINCTORIA**, *Baptisia tinctoria*, *Podalyria Tinctoria*, *Indigofera*, *Wild Indigo*, *Indigo Weed*, *Broom*, *Indigo Broom*, *Horsefly Weed*, *Yellow Broom*, *Clover Broom*, *Rattle Bush*, *Yellow Indigo*. An American plant, the taste of whose root is unpleasant, subacid, and nauseous—very similar to ipecacuanha. In a large dose, the bark of the root acts both as an emetic and cathartic. It has been considered antiseptic and febrifuge, and has been used, in the form of fomentation or cataplasm, in phagedenic and gangrenous ulcers. A liniment, prepared by simmering the *cortical part* of the root in cream, has been found an efficacious application to sore nipples and to ulcerated breasts.

**SOPHRONISTÆ DENTES**, see Dentition.

**SOPHRONISTERES DENTES**, see Dentition.

**SOPHROSYNE**, Temperance.

**SOPHENS**, Paregoric.

**SOPHO**, Opium.

**SOPOR**. A profound sleep, from which the person can be roused with difficulty. It is a symptom in many of the neuroses.

**SOPOR CAROTICUS**, Carus.

**SOPORARIÆ ARTERIÆ**, Carotids.

**SOPORATIVUS**, Somniferous.

**SOPORIFER**, Somniferous.

**SOPORIFIC**, Somniferous.

**SORA**, Essera.

**SORB TREE**, *Sorbus domestica*.

**SORBASTRELLA**, *Pimpinella saxifraga*.

**SORBEFA'CIENT**, *Sorbefaciens*, from *sorbere*, 'to suck in,' and *facere*, 'to make.' A remedy that promotes absorption.

The following are the chief sorbefaciens:—Acida Vegetabilia; Alkalia; Ammoniacum; Brominum; Galbanum; Hydrargyri Præparata; Iodinum; Liquor Calcii chloridi; Spongia usta; Compression, (methodical;) Friction; Mental Sorbefaciens, (Imagination, Emotions.)

**SORBETHUM**, Sherbet.

**SORBETTUM**, Sherbet.

**SORBETUM**, Sherbet.

**SORBIER DES OISELEURS**, *Sorbus aucuparia*.

**SORBITIO**, Jus.

**SORBITIO CARNIS seu Ex CARNE**. Broth or soup made of meat.

**SORBITUM**, Jus.

**SORBUM**, see *Sorbus domestica*.

**SORBUS**, *Crataegus aria*, *S. domestica*.

**SORBUS ACUPA'RIA**, *Mespilus*, *Mountain Service*, *Mountain Ash*, *Quicken Tree*, *Roan Tree*, (F.) *Sorbier des Oiseleurs*. The berries of this tree are employed for similar purposes as the last.

**SORBUS DOMESTICA**, *Sorbus*, *Ois*, *Service* or *Sorb Tree*, (F.) *Cormier*. Family, Rosaceæ. *Sex. Syst.* *Icosandria Trigynia*. The fruit of this tree, *Sorbum*, is astringent, and has been recommended in diarrhœa and dysentery. It is given in the form of rob. A kind of cider is made from it, and also brandy.

**SORDES**, *Rhypos*. A dirty-looking sanies, discharged from ulcers. Also, accumulations of the secretions of the mouth, on the teeth in

adynamic fevers more especially, and of foul matters in the stomach—*Sordes primarum viarum*, *Rhypparia*. The French call an ulcer, exhibiting such an appearance, *sordid*. Also dirt of any kind.

**SORDES**, Ichor, Saburra—s. Acidæ, Acidities—s. Aurium, Cerumen—s. Primarum viarum, *Embarras gastrique*, see *Sordes*—s. Ventris, Excrement.

**SORDICULÆ AURIUM**, Cerumen.

**SORE**, Ulcer.

**SORE, BAY**. A disease which Mosely considers to be a true cancer. It is endemic in the Bay of Honduras.

**SORE MOUTH, Stomatitis**—s. Clergyman's, Pharyngitis, follicular—s. Gangrenous, Cancer aquaticus—s. Inflammatory, Cynanche tonsillaris—s. Putrid, Cynanche maligna—s. Throat, Cynanche—s. Throat, ulcerous, Cynanche maligna.

**SORENESS**, from Teut. *seer*, (G.) *Sehr*, 'very,' Sax. *rap*, *Parapsis acris tenerris'de*. Painful uneasiness or tenderness, local or general, on being touched with a pressure that does not usually excite distressing feeling. Often, a febrile symptom. Also, the tenderness of a wound, ulcer, &c.

**SORGHUM**, Panicum Italicum.

**SOROCCO**, Puna.

**SOROCHÉ**, Puna.

**SORORIA'TIO**. The period at which the breasts of the female become developed. The act of becoming thus developed. A young maiden, whose mamma begin to show, was formerly called *sororiana virgo*.—Plautus.

**SORREL, COMMON**, *Rumex acetosa*—s. French, *Rumex scutatus*—s. Garden, *Rumex scutatus*—s. Mountain, *Oxalis acetosella*, *Oxyria reniformis*—s. Salt of, Potass, oxalate of—s. Roman, *Rumex scutatus*—s. Tree, *Andromeda arborea*—s. White, *Oxalis acetosella*—s. Welsh, *Oxyria reniformis*.

**SOSTRUM**, improperly *Sotrum*; from *salvare*, 'to save.' A reward given to one who saves the life of another. A physician's fee or honorarium.

**SOTERIA DOCTRINA**, Medicina.

**SOTERIA AQUÆ**, Waters, mineral.

**SOTIREL'LA**. Ancient name of a medicine composed of opium, several narcotics, nutmeg, saffron, camphor and saot. It was used in certain diseases of the teeth.

**SOTRUM**, Sostrum.

**SOUBRESAUT**, Subsaltus tendinum.

**SOUCHERLOON**, Bit noben.

**SOUCHET DES INDES**, *Curcuma longa*—s. *Odorant*, *Cyperus longus*—s. *Rond*, *Cyperus rotundus*.

**SOUCI**, *Calendula officinalis*, *Panophobia*—s. *des Champs*, *Calendula arvensis*—s. *Ordnnaire*, *Calendula officinalis*.

**SOUDE**, Soda—s. *Acetate de*, Soda, acetate of—s. *Atré*, Soda carbonas—s. *Borate de*, Borax—s. *Borate suraturé de*, Borax—s. *Carbonate de*, Soda carbonas—s. *Caustique*, Soda caustica—s. *à la Chaux*, Soda caustica—s. *Chlorure de*, Soda, chloride of—s. *du Commerce*, Soda—s. *Crayeuse*, Soda carbonas—s. *Effervescente*, Soda carbonas—s. *Hyposulfite de*, Soda, hyposulphite of—s. *Phosphate de*, Soda, phosphate of—s. *et de Potasse*, *Tartrate de*, Soda, tartrate of—s. *Pure*, Soda caustica—s. *Sous-borate de*, Borax—s. *Sous-carbonate de*, Soda,

subcarbonate of—*s. Sulfate de, Soda, sulphate of.*

**SOUFFLE**, see Murmur, respiratory—*s. Amphorique*, see Cavernous respiration—*s. Métallique*, see Cavernous respiration—*s. Placentaire, Bruit placentaire*—*s. Tubaire*, see Murmur, respiratory—*s. Uterin, Bruit placentaire*.

**SOUFRE**, Sulphur—*s. Sublimé*, Sulphur sublimatum.

**SOUND**, *Specillum, Stylus, Exploratorium, Radiolus*, (F.) *Sonde*. An instrument used by surgeons to discover whether there be a stone in the bladder. It is usually made of highly polished steel, and is shaped like the catheter. The operation is termed sounding.

The French *Sonde* has, however, a more extensive signification. It means different instruments introduced into cavities of certain organs, or into wounds, fistulas, &c., to investigate their condition; or to fulfil some therapeutical indication. See *Sonde*.

**SOUND**, *Bruit*—*s. Auricular, Apyromele*—*s. Bellows, friction, rasp, saw, lancet, &c.*, see *Bruit*—*s. Laryngeal, Laryngeche*.

**SOUNDING**, Searching, see Sound.

**SOUPIR**, Sigh.

**SPUR BERRY**, see Oxycantha Galeni, Vaccinium oxycoccus—*s. Dock, boreal, Oxymia reniformis*—*s. Leaf, Andromeda arborea*—*s. Tree, Andromeda arborea*—*s. Wood, Andromeda arborea*.

**SOURCIL**, Supercilium.

**SOURCILIER**, Corrugator supercilii, Superciliary.

**SOURDS MUETS**, see Mutitas surdorum.

**SOURIS**, Nictation.

**SOUS-ACROMIO-CLAVI-HUMÉRAL**, Deltoid—*s. Atloïdien, Subatloïdeus*—*s. Azolïdien, Subaxolïdeus*—*s. Clavier, Subclavien*—*s. Costaux, Intercoastal*—*s. Cutané, Subcutaneous*—*s. Épineux, Infra-spinatus*—*s. Lingual, Sublingual*—*s. Maxillaire, Submaxillaire*—*s. Maxillo-Labial, Depressor anguli oris*—*s. Mental, Submental*—*s. Métacarpo-latéral-phalangien, Prior annularis*—*s. Optico-sphéno-scléroticien, Rectus inferior oculi*—*s. Orbitaire, Suborbital*—*s. Pubio-coccygien, Levator ani*—*s. Pubio-crétal-sibial, Gracilis*—*s. Pubio-prétibial, Gracilis*—*s. Pubio-trochantérien-externe, Obturator externus*—*s. Pubio-trochantérien-interne, Obturator internus*—*s. Scapulaire, Subscapularis*—*s. Scapulo-trochanien, Subscapularis*—*s. Sels, see Salt*.

**SOUTHERNWOOD**, Artemisia abrotanum—*s. Field, Artemisia campestris*—*s. Maritime, Artemisia maritima*—*s. Tartarian, Artemisia santonica*.

**SOWBREAD**, Arthanita, Cyclamen.

**SOY**, see Dolichos soja.

**SPA, MINERAL WATERS OF.** A town seven leagues S. E. of Liège, where there are several springs, possessing a sharp acidulous taste; containing much carbonic acid, carbonates of iron, lime, and magnesia; carbonate of soda, and chloride of sodium. The water is much used as a tonic.

**SPA WATER, ARTIFICIAL.** *Sodæ subcarb.*, gr. viij; *magnesiæ carbon.*, ℥j; *limat. ferri.*, gr. iij; *sodii chlorid.*, gr. j; *aquæ*, Oij. Impregnate with gas from marble powder and sulph. acid., aa ℞x.

**SPACE, INTERPEDUNCULAR, Tarini**

**pons**—*s. Perforated, anterior, Locus perforatus anticus*—*s. Perforated, posterior, Tarini pons*.

**SPADO**, Castratus, Eunuch, Spasm.

**SPAGYRIA**, Chymistry.

**SPAGYRISTS**, from *σπᾶν*, 'I separate,' and *αἰσῶν*, 'I assemble;' because they reduced compounds into elements; and formed the latter into compounds (?). A sect of physicians, who pretended to account for the changes that occur in the human body in health and disease, in the same manner as the chymists of their day explained those of the inorganic kingdom.—*Médecine Paracelsistia seu Spagyrica*, was likewise called *Hermética*, because it was believed that the means of cure adopted in it had been found in the books of Hermes.

**SPANÆMIA**, from *σπᾶν*, 'poor,' and *αἷμα*, 'blood.' Poverty of the blood. Diminution in the quantity of fibrin and red corpuscles of the blood,—as where bleeding has been carried beyond certain limits.—Simon.

**SPANDARAPUM, Sparadrapum.**

**SPANISH FLY, Cantharis.**

**SPANOPOGON**, from *σπανος*, 'rare,' and *πῶγων*, 'beard.' One who has lost his beard, or has a thin beard.

The Greeks called those who had little beard, or who had lost it, *Spanopogones*.

**SPARADRAPA, Sparadrapum.**

**SPARADRAPIER**. The name of a machine for spreading sparadraps. A *Plaster machine*. It consists of a table, with two raised pieces, movable, and furnished with points, by which the cloth can be stretched, and of a lamina or blade of metal to extend the plaster over it.

**SPARADRAPUM, Sparadra'pum, Sparadrapus, Tela emplastrica, Spandara'pum, (F.) Sparadrap.** Any adhesive plaster spread upon linen or paper. The chief sparadraps are the following:—

**SPARADRAPUM ADHESIVUM, Adhesive Plaster.** A spread plaster of the *Emplastrum adhesivum*. It is also called *Strapping*.

*English Court Plaster* is a Sparadrap, (F.) *Taffetas agglutinatif, T. gommé, Taffetas d'Angleterre; Sericum Anglicum, Emplastrum Anglicum, E. Anglicanum, E. Adhæsivum Woodstockii, E. Ichthyocol'la tela induc'tum, E. Glutinatum, Tela Ichthyocol'la glutinans, Isinglass Plaster*. It is made by stretching black silk, and brushing it over with a solution of isinglass ℥j, in proof spirit, ℥xij, to which tinct. benz. ℥ij, are added. When dry, this is repeated five times; after this, two coats are given it of a solution of tereb. Chia ℥iv, in tinct. benz. ℥vj, which renders it less liable to crack.

*Liston's Isinglass Plaster* is made by spreading several coats of strong solution of isinglass in weak spirit over oiled silk, or, still better, over animal membrane previously prepared for the purpose from the peritoneal coat of the cæcum of the ox.

**SPARADRAPUM PRO FONTICULIS, Issus Plaster**, is sometimes made of simple diachylon, ℞ij; Burgundy pitch, and sarcocolla, each ℥iv; common turpentine, ℥j. Spread upon linen and polished with a moistened calendering glass rubber.

**SPARADRAPUM seu TELA GALTERI, Defensio Plaster, (F.) Toile de Gautier.** This is made of olive oil, ℞ss; suet, ℥iv; wax, ℥x; litharge,

common turpentine, thus and mastick, ἄᾱ ζῖj; bole armeniac, flour, ἄᾱ ζῖj. Pour it, while liquid, upon cloth, and spread. Used for issues and to keep on dressings.

SPARADRA'PUM VESICATO'RIUM. Several substances have been introduced as substitutes for blistering plaster, (see Emplastrum Lyttae,) under the names—*Tela vesicato'ria*, *Blistering Tissue*, &c., and other forms of which are the *Taffetas vesicant*, *Papier épispastique*, *Taffetas épispastique*. They are made of an ethereal or alcoholic extract of cantharides, or of cantharidin, mixed with wax and spread, in a very fine layer, on silk or paper previously oiled or waxed. They are efficient agents.

SPARADRAPUM VIR'IDĒ, *Corn Plaster*. This may be made of yellow wax, Bij; Burgundy pitch, ζῖxij; common turpentine, ζῖj; verdigris, ζῖj; spread on cloth and polished.

*Kennedy's Corn Plaster* is made of yellow wax, Bj; Venice Turpentine, ζῖj; verdigris, ζῖj.

SPARADRAPUS, Sparadrapum.

SPARAGMA, Laceration.

SPARAGMOS, Spasm.

SPARAGUS, Asparagus.

SPARAL'LIUM, *Clyster uterini*. An injection into the vagina.—Ruland and Johnson.

SPAREDIA. A ligature covered with the white of egg.—Paracelsus.

SPARGANON, *Spar'ganum*, from *σπαγω*, 'I swathe, I wrap.' 'Swathing clothes;' a kind of bandage, with which children were formerly surrounded.—Foesius. Also, a fascia.

SPARGANOSIS, *Spar'gosis*, *Intumescen'tia lactea mamma'rum*, *Mastodyn'ia polyg'ala*, from *σπαγω*, 'I am ready to burst.' Extreme distention of the breasts by milk. Sparganosis also means the wrapping of a child in swathing clothes.

SPARGANOSIS PURPERARUM, Phlegmatia dolens.

SPARGANUM, Sparganon.

SPAROWGRASS, Asparagus.

SPARSUS, Sporadic.

SPARTIUM JUN'CEUM, *Spanish broom*.

A small European shrub, cultivated in the gardens of the United States, on account of its yellow flowers. The seeds are diuretic and tonic, in small doses; emetic and cathartic in large. They have been used in dropsy—10 or 15 grains three times a day.

SPARTIUM SCOPA'RIUM, *Cyt'isus scoparius*, *Genista*, *Broom*, *Cytisio-genista*, (F.) *Genét à balai*. Family, Leguminosæ. *Sex. Syst.* Didelphia Decandria. *Broom Tops*, *Spartii Cucumina*, *Scopa'rius*, (Ph. U. S.)—have a bitter taste, and are possessed of diuretic properties. They have been used in dropsies. Dose, of the powder, ℥j to ℥j. All the genista have similar virtues. A decoction of the genista, along with the cauterization of the pustules under the tongue, has been recommended in hydrophobia.

SPASM, *Spasmus*, *Sparag'mos*, *Synol'ce*, *Spado*, from *σπασω*, 'I draw.' The Greeks gave this name to all kinds of convulsions. It is now usually applied to involuntary muscular contractions; and these, again, have been divided into *tonic spasm*, *Paraton'ia*, which consists in permanent rigidity and immobility of the muscles that are the seat of it, (see Tetanus); and *clonic spasm*, which consists in alternate contractions and relaxations, (see Convulsion).

Cullen has a class, *Spasmi*—the *neurospasmi* of Fuchs.

SPASM, CLONIC, Convulsion—s. Cynic, see Canine laugh—s. of the Glottis, Asthma thymicum—s. of the Larynx, Asthma thymicum—s. with Rigidity, Tetanus.

SPASMATICUS, Spasmodic.

SPASMATODES, Spasmodic.

SPASME, DE LA GLOTTE ET DU THORAX, Asthma thymicum—s. de la Vessie, Cystospasmus.

SPASMI, see Spasm.

SPASMODES, Convulsive.

SPASMODIC, Spasmodic.

SPASMOL'OGY, *Spasmolog'ia*, from *σπασμος*, 'spasm,' and *λογος*, 'a treatise.' A treatise on spasms.

SPASMOLYGMUS, Singultus.

SPASMOT'ICUS, *Spasmat'icus*, *Spasmato'des*, *Spas'ticus*, *Spasmod'ic*. Any thing relating to spasm. Also, an antispasmodic.

*Morbi constricto'ris*, *M. spasmo'tici*, &c., are diseases accompanied with spasm.

SPASMUS, Convulsion, Spasm—s. Aurium, Otalgia—s. Caninus, see Canine laugh—s. Clo'nicus, Convulsion—s. Cynicus, see Canine laugh—s. Facialis, Tic—s. Glottidis, Asthma thymicum—s. Linguae, Glossospasmus—s. Maxillæ inferioris, Trismus—s. Muscularis, Cramp—s. Musculorum Faciei, Canine laugh—s. Universalis, Synclonus—s. Ventriculi, see Cardialgia—s. Vesicæ, Cystospasmus.

SPASN'IA, same etymon. (?) A term, used by Mercurialis, to designate the lancinating pain, produced, at times, in the chest by violent fits of coughing.

SPASTICUS, Spasmodic, Tonic spasm.

SPATHA, Hypaleiptron.

SPATHES'TER, from *σπασω*, 'I draw.' (?) A surgical instrument, used for drawing the prepuce over the glans, when too short.—P. Amman.

SPATHOMELE, Spatula.

SPATHULA, Scapula, Spatula—s. Fœtida, Iris fetidissima.

SPATHYEMA FÆTIDA, *Dracontium fetidum*.

SPATILE, *σπατλη*, 'human excrement.' A liquid fecal evacuation. Excrement.—Hippocrates.

SPATIUM ORIS, Mouth.

SPAT'ULA, *Spath'ula*, diminutive of *Spatha*, *σπαθη*, 'a broad-sword.' *Spathome'le*, *Spacill'um latum*. An instrument, used for spreading plasters, stirring ointments, holding down the tongue, &c. Also, the scapula.

SPATULA PRO ORIS, Glossospatha.

SPEARWORT, *Ranunculus flammula*.

SPEAUTER, Zinc.

SPECIES, Powders, compound—s. Aromaticæ, Pulvis cinnamomi compositus—s. Diacinnamomi, Pulvis cinnamomi compositus—s. Diacretæ, Pulvis cretæ compos.—s. Dialapæ, Pulvis jalapæ compositus—s. Diambre sine odoratis, Pulvis cinnamomi compositus—s. Diatragacanthæ frigidæ, Pulvis tragacanthæ compositus—s. Hieræ picræ, Pulvis aloes cum canellâ—s. Lætificantes Rhazis, Pulvis cinnamomi compositus—s. e Scordio cum opio, Pulvis cretæ compositus cum opio—s. e Scordio sine opio, Pulvis cretæ compositus.

SPECIFIC, *Specificus*, from *species*, 'a form or fashion,' and *facere*, 'to make.' A substance to which is attributed the property of

removing, directly, one disease rather than any other. Probably no such remedy exists. *Mercury* in syphilis, and *sulphur* in the itch have been regarded as the strongest examples.

**SPECIFICUM HERRENSCHWAND.** A once celebrated German vermifuge. It is said to have consisted of 10 grains of *Gamboge*, with 20 of *Carbonate of Potassa*. It is affirmed, that mercury and arsenic have also been found in it.—Paris.

**SPECIFICUM PARACELSI, Potassæ sulphas.**

**SPECILLUM, Melt, Stylus, Exploratorium,** from *specio*, 'I examine.'—*Spæd'ron*, a probe. (F.) *Stylét, Sondé*. A surgical instrument, employed for examining wounds, fistulas, and for passing setons, &c. It is usually formed of silver; and is terminated, at one end, by an olive-shaped button. The *eyed probe* has an aperture at the other extremity.

**SPECILLUM, Everriculum, Hypaleiptron, Sound**—s. *Auricularium, Apyromele*—s. *Cereum, Bougie*—s. *Excavatum, Stylus excavatus*—s. *Latum, Spatula*—s. *Minus, Melotis*.

**SPECLARION, Specillum.**

**SPECTACLES,** from *spectare*, 'to behold;' *Conspicilla*, (F.) *Besicles, Lunettes ordinaires, Conservees*. Glasses to assist the sight; arranged so as to be adapted to both eyes. These glasses are more or less *concave* or *convex*, according as the sight is more or less short, (*myopic*;) or long (*presbyopic*.) When the glass is adapted to one eye, it is called an *Eyeglass, Conspicillum, Perspicillum, Vitrum oculare*.

**SPECULARIS LAPIS.** A transparent mineral, but of what nature is not clear, which was formerly employed in epilepsy. In old times it was used for glass.—Pliny.

**SPECULUM, Catop'ter, Catop'tron, Diop'tron.** In Latin, 'a mirror;' from *specio*, 'I see.' In *surgery*, it means different instruments for dilating cavities, and facilitating their examination. See *Dilator*. There are various instruments of this kind,—the *S. Ani, S. Vaginae, (Colpurynter, Elytreurynter), S. Matricis, S. Oculi, S. Oris* (F.) *Baillon, S. Gutturis, S. Vesicæ*.

**SPECULUM CITERIUM, Orpiment**—s. *Indicum, Ferri limatura*—s. *Lucidum, Septum lucidum*—s. *Oris, Glossocatochus*—s. *Veneris, Achillea millefolium*.

**SPECUS, Vulva**—s. *Cordis, Ventricle of the Heart*—s. *Pro medullâ spinali, see Vertebral column*—s. *Vertebris, see Vertebral column*.

**SPEDALSKE, see Radzyge.**

**SPEDALSKHED, see Radzyge.**

**SPEECH, Voice, articulated.**

**SPEECHLESSNESS, Mutitas.**

**SPEEDIMAN'S PILLS, see Pilulæ aloes et myrrhæ.**

**SPEEDWELL, BROOKLIME, Veronica beccabunga**—s. *Female, Antirrhinum elatine*—s. *Official, Veronica*—s. *Water, Veronica beccabunga*.

**SPELTRUM, Zincum.**

**SPERAGUS, Asparagus.**

**SERM, from σέρω, 'I sow.'** *Spermat'io fluid* or *liquor, Sem'inal fluid, Seed, Semen, S. viri* seu *masculinum seu genitale, Seminum, Genitale, Medullæ, Rytis'ma, Ros, Sanguis, Serum, Humor genit'alis seu seminalis seu venereus, Uri'na genit'alis, Genitu'ra, Sperma, S. viri'le, Spermium, Tho'rè, Tho'rus, Lac maris, Lagni'a, Lagnu'ma, Gormen,*

*Male's milk, Propagatory or genital liquor, Vitale virus, Vital or quickening venom.* A whitish, viscid fluid, of a peculiar smell, secreted by the testicles, whence it is carried by the vasa deferentia to the vesiculæ seminales, to be thrown into the vagina, during coition, through the ejaculatory ducts and the urethra. It is the fecundating fluid, and must come into actual contact with the germ of the female. The *Aura semi'nis, Gonau'ra* is incapable of effecting fecundation. The semen, at the time of emission, is composed of two different fluids; the one liquid and transparent, which is considered to be the secretion of the prostate,—the other, white, and as thick as mucilage; the product of the testicular secretion. The sperm contains, according to Vauquelin, 900 parts of water, 50 of animal mucilage, 10 of soda, and 30 of calcareous phosphate. The animal matter is peculiar, and by some termed *spermatin*.

Microscopic observations show that it contains *Spermatozoa*, or more properly *spermatozoids*, for their animalcular nature is questionable. By careful examination, other minute, round, granulated bodies may almost always be detected, which are in all cases much less numerous than the spermatozoa. These bodies are the *seminal granules*. Pure sperm, in its most perfect state, consists principally of seminal animalcules and seminal granules; both of which are enveloped in a small quantity of fluid, *liquor sem'inis*.

It has been imagined, but erroneously, that during coition, there is a secretion of female sperm—*Semen mulie'bre, Thelygonum*. The increased secretion that takes place is chiefly from the glands of Duverney.

**SPERMA, Sperm**—s. *Mercurii, Hydrargyri acetatus*.

**SPERMA RANA'RUM, Sperm'ola seu Sperm'olum seu Sperm'iola seu Sperm'olum rana'rum.** Frog's spawn. Once used in medicine.

**SPERMACETI, Cetaceum**—s. *Whale, see Cetaceum*.

**SPERMACRASIA, Spermatorrhœa.**

**SPERMATACRASIA, Spermatorrhœa.**

**SPERMATACRATIA, Spermatorrhœa.**

**SPERMATIC, Spermaticus, Seminalis, Sem'inal.** That which relates to the sperm. A name given to different parts connected with the organs of generation.

**SPERMATIC ARTERIES, A. Spermaticæ, A. præparan'tes,** (F.) *Artères testiculaires, A. de l'ovaire* (Ch.) are two in number;—one on each side,—and arise from the sides of the aorta, sometimes from the renal arteries. They descend, almost vertically, at the sides of the vertebral column, and are distributed differently in the two sexes. In man, the spermatic artery, situate at the side of the vas deferens, issues by the abdominal ring; gives numerous ramifications to the spermatic chord, and divides into two fasciculi of branches, one of which goes to the testicle,—the other to the epididymis. In the female, the spermatic artery, *ovarian artery*, dips into the pelvis, and passes to the ovarium, Fallopian tube, and round ligament.

**SPERMATIC CHORD, Testicular Chord, Funiculus Spermaticus, Corpus varicosum,** (F.) *Cordon spermaticus ou testiculaire*. The vascular and nervous chord, by which the testicle is suspended. It is composed of the spermatic artery and veins; of other small vessels; of

lymphatics; of nervous filaments from the spermatic plexus, and from the genito-crural branch of the lumbo-abdominal plexus; of the vas deferens, and, very often, of a fibro-cellular chord, which unites the peritoneum to the upper part of the tunica vaginalis, and in which encysted hydrocele of the spermatic chord occurs. All these parts are united together by a very lax, cellular tissue, and surrounded by coats, which, reckoning from without, are:—1. The skin and cellular membrane. 2. A fibro-cellular membrane, formed by the fascia superficialis. 3. A very thin layer, formed by fibres of the cremaster muscle, united archwise before, and often also behind, the chord. 4. The proper sheath of the spermatic vessels, or the tubular prolongation furnished by the fascia transversalis to the chord, on a level with the superior orifice of the inguinal canal. The spermatic chord is commonly shorter on the right side than on the left; and of a different size in different individuals. It ascends, almost vertically from the superior margin of the testicle as far as the lower orifice of the inguinal canal; passes through this canal and enters the abdomen, crossing the epigastric artery. Here it forms an evident elbow, directing its course backward. At this part, also, the organs composing it separate from each other:—the vas deferens descending into the pelvis to pass behind the bladder;—the blood-vessels and lymphatics ascending towards the lumbar region, &c.

SPERMATIC FLUID, Sperm—s. Liquor, Sperm.

SPERMATIC PASSAGES or WAYS, *Viz* Spermatica, are the canals concerned in the excretion of semen.

SPERMATIC PLEXUSES of nerves, *Plexus testiculares*, are two in number, and are furnished by the renal plexuses. Their filaments, called *Spermatic nerves*, follow the arteries of the same name to the testicle in man; and to the ovary and Fallopian tube in the female,—*ovarian nerves*. They cannot be traced into the substance of these organs.

SPERMATIC VEINS are two or three in number, on each side. They accompany the spermatic artery, and open:—those of the right, into the vena cava inferior; those of the left, into the corresponding renal vein. These veins form, above the testicle, a kind of venous network, called, by some, the *Spermatic Plexus*; and another plexus before the psoas muscle, called the *Corpus pampiniforme*.

SPERMATIN, see Sperm.

SPERMATIS'MUS, *Emis'sio seminis*, from *σπερμα*, 'sperm,' and *μῆνις*, 'the emission of sperm.'

SPERMATOCELE, *Hernia seminialis scroti*, *Oscocoele seminialis*, *Gonocoele*, from *σπερμα*, 'sperm,' and *κῆλη*, 'a tumour.' The ancients gave this name to certain swellings of the testicle which were regarded as produced by an accumulation of sperm in the organ. Also, varicocele.

SPERMATOCLEMMMA, see Pollution.

SPERMATOCLEPSIS, see Pollution.

SPERMATOCYSTIDORRHAGIA, *Caulorrhagia ejaculatoria*, *Hæmaturia ejaculatoria*, *H. seminialis*, from *σπερμα*, *σπερματος*, 'sperm,' *κυστις*, 'bladder,' and *εγχειν*, 'a breaking forth.' A discharge of blood from the urethra, or the act of ejaculation of sperm.

SPERMATODES, Gonoides.

SPERMATOGONIA, *Spermogonia*, *Sper-*

*matogonia*, *Spermatoopsis*, *Spermium*, from *σπερμα*, 'sperm,' and *γενωω*, 'to beget.' The preparation or secretion of sperm.

SPERMATOID, Gonoides.

SPERMATOLEPSIS, see Pollution.

SPERMATOLIPSIS, see Pollution.

SPERMATOL'OGY, *Spermatalogia*, from *σπερμα*, 'sperm,' and *λογος*, 'a discourse.' A treatise on sperm.

SPERMATOPH'OROUS, *Seminiferous*, from *σπερμα*, 'sperm,' and *φερω*, 'I carry.' Sperm-bearing. The cells or granules in the sperm have been so called.

SPERMATOPEIA, Spermatoгонια.

SPERMATOPOESIS, Spermatoγονια.

SPERMATOPOETIC, Spermatoποιος.

SPERMATOPE'US, *Spermatopeuticus*, *Spermatopeuticus*, *Spermatopeutic*, *Gonopoiticus*, *Gonopoiticus*, from *σπερμα*, 'sperm,' and *ποιειν*, 'to make.' Food, to which has been attributed the property of augmenting the secretion of semen; and, consequently, of exciting the venereal act. Very succulent and very nutritious substances have been so considered.

SPERMATORRHE'A, *Spermorrhœa*, *Spermatorrhœa*, *Spermatorrhœa*, *Spermatorrhœa*, *Gonorrhœa vera*, (F.) *Flux de Spermis*, *Pollutions*, *Partes séminales*; from *σπερμα*, 'sperm,' and *ρῆω*, 'I flow.' An emission of sperm, without copulation. See Gonorrhœa and Pollution.

SPERMATORRHEA ATONICA, Gonorrhœa laxorum.

SPERMATOS'CHESIS, from *σπερμα*, 'sperm,' and *σχεσις*, 'retention.' Retention or suppression of the spermatic secretion.

SPERMATOZEMIA, Spermatorrhœa.

SPERMATOZO'A, *Zoospermata*, from *σπερμα*, 'sperm,' and *ζωον*, 'animal.' *Zoospermis*, *Spermatozoaires*, *Spermatozoids*, *Animalcules seminaria* seu *spermatica*, *Vermiculis spermatici*. Spermatic animalcules(?). Animalcules seen in the sperm, and by some supposed to be the formative agents in generation. See Sperm.

SPERMATOZOAIRES, Spermatozoa.

SPERMATOZOIDS, Spermatozoa.

SPERMIOLOM RANARUM, *Sperma ranarum*.

SPERMIMUM, Sperm, Spermatoγονια.

SPERMOBOLE, see Ejaculation, Spermatismus.

SPERMOEDIA CLAVUS, Ergot.

SPERMOGONIA, Spermatoγονια.

SPERMORRHœA, Spermatorrhœa.

SPERNIOLOM RANARUM, *Sperma ranarum*.

SPHACÈLE, Sphacelus—s. *de la Bouche*, Cancer aquaticus.

SPHACELIA SEGETUM, see Ergot.

SPHACELISMUS, Sphacelus—s. *Cerebri*, Phrenitis.

SPHAC'ELUS, *Gangræna Sphacelus*, *Sphacelis'mus*, *Old mortification*; (F.) *Sphacèle*, *Gangrène froide*, from *σφαλεω*, 'I slay.' This word is used, by some, synonymously with gangrene; by others, with gangrene when it occupies the whole substance of a limb. Commonly, it means the disorganized portion, in cases of mortification, *anthraconecrosis*, which must be thrown off—or is, in other words, totally dead. The foul disorganized portion of an ulcer—called the *slough*—must be considered a kind of sphacelus.

Sphacelus was formerly used for excessive pain; and for agitation from excessive pain, or violent emotion.

SPHACELUS CEREALIS, Ergotism.

SPHÆRA, Pila—s. Marina, Pila marina—s.

Thalassia, Pila marina.

SPHÆRANTHUS INDICUS, Adaca.

SPHÆRIDION, Ptilula.

SPHÆRION, Globule, Ptilula.

SPHÆROCEPHALA ELATIOR, Echinops.

SPHÆROCOCCUS CRISPUS, Fucus crispus.

SPHÆRULÆ SANGUINIS, Globules of the blood.

SPHAGE, Throat.

SPHENDONE, Funda.

SPHENOID, *Sphenoides*, *Sphenoïdes*, *Sphenoïdes*, *Sphenoïda'lis*, from *σφην*, 'a wedge,' and *ειδος*, 'resemblance.' Wedgeshaped. Hence,

SPHENOID BONE, *Sphenoïdes os*, *Os basilare* seu *cuneiforme* seu *cu'neo comparatum* seu *sphenoïda'le* seu *multiforme* seu *az'gyos* seu *papilla'rè* seu *polymor'phon* seu *pazilla'rè* seu *bazilla'rè* seu *ala'formè* seu *sphecoïdes* seu *vespifor'mè* seu *inoconjuga'tum*, *Ptery'gyoid bone*. An zygous bone, situate on the median line, and at the base of the cranium. It articulates with all the other bones of that cavity; supports them, and strengthens their union. Its form is singular, and resembles a bat with its wings extended. It has, 1. An *inferior or guttural surface*, on which is situate the crista, that joins the vomer; a channel, which concurs in forming the pterygo-palatine foramen; the pterygoid process; the pterygoid fossa; the scaphoid depression; the Vidian or pterygoid canal; the foramina—ovale, spinale, &c. 2.

A *superior or cerebral surface*, on which are:—the clinoid processes; the pituitary fossa; the foramina (ovale, rotundum, and spinale;) the *Apophysis of Ingrassias* or lesser wing; the foramen opticum, &c. 3. An *occipital or posterior surface*, which is articulated with the basilar process of the occipital bone. 4. An *anterior or orbital-nasal surface*; having, anteriorly, a crista to unite with the ethmoid bone; and, on each side, a round aperture, which leads into two cavities in the substance of the bone, separated by a middle septum, and called the *sphenoïdal sinuses*. 5. Two *zygomato-temporal or external surfaces*, which correspond to the temporal and zygomatic fossæ.

Some divide the sphenoid into *body* or *middle portion*; and *ala*, which are four in number, and are subdivided into *great (Temporal Plates or Wings)* and *little (Apophyses of Ingrassias.)* The *Sphenoïdal suture* surrounds the bone.

SPHENOID, SPINOUS PROCESS OF THE, Sphenoïdal spine.

SPHENOID'AL, *Sphenoïda'lis*. That which belongs or relates to the sphenoid bone.

SPHENOIDALIA COR'NUA, (F.) *Cornets sphenoïdaux*, *Cornets de Bertin*; *Ossic'ula Berti'ni*, *Ossa triangula'ria*, *Pyramida of Wistar*. Two small, thin, and curved bones, situate between the sphenoid and ethmoid, with which they are confounded in the adult. They have the shape of a hollow pyramid, with the base turned backwards; and are developed by a single point of ossification. They are articulated with the sphenoid, ethmoid, palate bone, and vomer.

SPHENOIDAL OF SUPERIOR ORBITARY FISSURE, *Fora'men lac'rum superius*, (F.) *Fente*

*sphenoïdale*, is a large fissure, situate between the great and little ala of the sphenoid. It is seen at the upper and back part of the orbit, between which and the cranium it is a means of communication.

SPHENOIDAL SPINE, (F.) *Épine sphenoïdale*, *Spinous Process of the Sphenoid*;—1. A projecting crista at the inferior surface of the sphenoid bone, for articulation with the vomer. 2. A triangular process, *Apophysis sous-temporale*, (Ch.) met with near the posterior margin of the same bone, behind the foramen spinale. At the point of the spinous process, a *styloid process* is frequently met with.

SPHENOIDES, Cuneiform, Sphenoid—s. Os, Sphenoid bone.

SPHENOMAXILLARY, *Spheno-maxilla'ris*. That which relates to the sphenoid and maxillary bones.

SPHENOMAXILLARY FISSURE, *Inferior or bitar Fissure*, (F.) *Fente spheno-maxillaire ou orbitaire inférieure*, called, also, *Fora'men lac'rum inferius*, *F. spheno-maxilla'rè*, is situate at the posterior part of the angle formed by the union of the internal and inferior parietes of the orbit. It is constituted, above, by the sphenoid bone; below, by the superior maxillary and palate bones; and, before, by the malar bone. It is narrower at the middle than at the extremities, and forms a communication between the orbital cavity and the zygomatic fossa.

SPHENOMAXILLARY FOSSA is a name given by some anatomists, to a depression at the union of the sphenomaxillary and pterygomaxillary fissures.

SPHENOÖRBITAR. A name given, by Bécлар to the anterior part of the body of the sphenoid bone, which is developed by a variable number of points of ossification.

SPHENOPAL'ATINE, *Spheno'palati'nus*. That which relates to the sphenoid and palate bones.

SPHENOPALATINE ARTERY, *Large lateral nasal A.*, is the termination of the internal maxillary. It enters at the posterior part of the superior meatus of the nose, through the sphenopalatine foramen, and spreads its numerous branches on the pituitary membrane covering the septum, the cornua, and the meatus.

SPHENOPALATINE FORA'MEN is a round aperture, formed by the vertical portion of the os palati and the sphenoid. It establishes a communication between the nasal fossæ and the zygomatic fossa.

SPHENOPALATINE GANGLION, *Ganglion of Meckel*, *Sphenoïdal G.* (Ch.) A small, nervous, cordiform, or triangular ganglion, of variable size, situate without the foramen sphenopalatinum, in the pterygomaxillary fissure. It seems suspended by several nervous filaments to the trunk of the superior maxillary nerve, and gives off *internal or sphenopalatine filaments*, *inferior or palatine filaments*, and a *posterior filament*, which is the *Vidian or pterygoid nerve*.

SPHENOPALATINE NERVES, *Lateral nasal Nerves*, arise from the ganglion—just described—at its inner part, and enter the nasal fossæ by the sphenopalatine foramen. They are 5 or 6 in number, and distribute their filaments to the outer and inner parietes of the nasal fossæ. One of the most remarkable branches is the *Naso-palatine*.

SPHENOPALATINUS, Levator palati.

SPHENOPARIETAL, *Spheno-parietalis*. That which belongs or relates to the sphenoid and parietal bones.

SPHENOPARIETAL SUTURE is formed by the articulation of the extremity of the greater ala of the sphenoid with the anterior and inferior angle of the parietal bone.

SPHENO-PTERYGO-PALATINUS, Circumflexus—s. Salpingostaphylinus, Circumflexus—s. *Salpingo-mallien*, Laxator tympani.

SPHENOSIS, see Wedged.

SPHENOSTAPHYLINUS, Levator palati.

SPHENOTEMPORAL, *Spheno-temporalis*. That which belongs to the sphenoid and temporal bones.

SPHENOTEMPORAL SUTURE is the suture at the articulation of the great ala of the sphenoid bone with the squamous portion of the temporal. Béclard gives the name *sphenotemporal* to the posterior part of the body of the sphenoid, which is developed by distinct points of ossification.

SPHEX, Wasp.

SPHINCTER, *Constrictor, Musculus constrictorius*; from σφινγο, 'I constrict.' A name given to several annular muscles, which constrict or close certain natural openings.

SPHINCTER ANI, *Annularis Ani*. Many anatomists have described two sphincter muscles of the anus:—1. The *S. externus, Aspidis'cos, S. cutaneus, Coccygio-cutaneus-sphincter, Orbicularis Recti, Constrictor Ani, Coccygio-anal*, (Ch.) It is situate around the anus; is elliptical from before to behind; flattened, and pierced at its middle. Its fibres describe concentric arcs, which are attached, behind, to the extremity of the coccyx, by a dense, cellular substance; and are confounded, anteriorly, with the bulbo-cavernosus and transversi perinæi muscles. This muscle contracts and closes the anus. 2. The *inner or internal Sphincter Ani, Sphincter intestinalis* of Winslow, is by many anatomists considered as the termination of the circular fibres of the rectum. It is annular, and situate around the inferior extremity of the rectum, to the extent of about a finger's breadth. It has the same uses as the other.

SPHINCTER GULÆ, *Constrictores pharyngis*—s. Ileii, Bauhin, valve of—s. Intestinalis, Sphincter ani internus—s. Labiorum, Orbicularis oris—s. Oculi, Orbicularis palpebrarum—s. Palpebrarum, Orbicularis palpebrarum—s. Pylori, see Pylorus—s. Vaginæ, Constrictores cunni—s. Ventriculi, Pylorus.

SPHINCTER VESICÆ, *Sphincter of the bladder*. Some anatomists have given this name to whitish, elastic, and circular fibres, which surround the neck of the bladder, but do not constitute a particular muscle. Morgagni has given the name PSEUDO-SPHINCTER to the anterior fibres of the levator ani, which pass beneath the neck of the bladder, and, by their contraction, close that opening.

SPHONGUS, Spongia.

SPHRAGIDONYCHARGOCOME'TA, from σφραγις, 'a seal,' οὐξ, 'the nail,' ἀργός, 'white,' or perhaps ἀργυρός, 'silver,' and κομῶ, 'I adorn.' A charlatan who adorned his fingers to the very nails with rings.—Aristophanes, Hippocrates.

SPHYGMA, Pulse.

SPHYGMICA ARS, *Sphygmia art*, from σφυγμος, 'the pulse.' The art of judging by the pulse, in health or disease.

SPHYGMICA DOCTRINA, Sphygmologia.

SPHYGMICUS, Throbbing.

SPHYGMOCEPHALUS, Crotaphæ.

SPHYGMODES, Throbbing.

SPHYGMOLOG'IA, *Sphygmica Doctrina*, from σφυγμος, 'the pulse,' and λογος, 'a description.' The doctrine of the pulse.

SPHYGMOMETER, Pulsilegium.

SPHYGMOS, Pulsation, Pulse.

SPHYGMOSCOPIUM, Pulsilegium.

SPHYRA, Malleolus.

SPHYXIS, Pulsation.

SPIC, Lavendula.

SPICA, *Fascia repons; the Spica bandage*, (F.) *Épi*. A bandage so called in consequence of its somewhat resembling a *spike* of barley. The turns of the bandage cross like the letter V;—each leaving a third of the roller uncovered. It is distinguished into *ascending* and *descending*. It may be applied over various parts of the body, and in a different manner in each case; thus, there is the *Spica seu Fascia inguinalis*, *Spica inguinalis duplex*, the spica for the shoulder, and another for the thumb.

SPICA ALPINA, Valeriana Celtica—s. Celtica, Valeriana Celtica—s. Indica, Nardus Indica—s. Nardi, Nardus Indica.

SPICEBERRY, Gaultheria, Laurus Benzoin.

SPICEBUSH, Laurus Benzoin.

SPICES, FOUR, see Myrtus pimenta.

SPICEWOOD, Laurus Benzoin.

SPECILLUM, Specillum.

SPIDER, see Araneæ tela.

SPIDERWORT, Liliago.

SPIGELIA, S. Marilandica.

SPIGELIA MARILANDICA, *Anthelmia, Spigelia Lonic'era, Perennial Wormgrass or Indian Pink, Caroli'na Pink, Starbloom, Worm root*. Nat. Order, Gentianæ. Class, Pentandria. Order, Monogynia. Indigenous. The root—*Spigelia*, (Ph. U. S.)—is celebrated as an anthelmintic, particularly in cases of lumbrici.

It is also asserted to have been found serviceable in remittent fever. It is a narcotico-acrid. Dose, gr. x to ʒss.

SPIGNEL, *Æthusa meum*.

SPIKENARD, *Conyza squarrosa*, Nardus Indica—s. American, Aralia racemosa—s. Small, Aralia nudicaulis—s. Tree, Aralia spinosa.

SPILANTHUS ACMEL'LA, *Achmella. Acemella, Balm-leaved Spilanthus*. Family, Corymbifera. Sez. Syst. Syngenesia, Polygama æqualis. This plant possesses a glutinous, bitter taste, and fragrant smell. The herb and seed are said to be diuretic and emmenagogue. They have been used in dropsies, jaundice, fluor albus, and calculous complaints; given in infusion.

SPILANTHUS, BALM-LEAVED, *Spilanthus acmella*.

SPILANTHUS OLERA'CEUS, *Spear-leaved Spilanthus*, (F.) *Cresson de Para*. A tincture of the plant has been recommended in toothache.

SPILI, see Nævus.

SPILOMA, see Nævus.

SPILOSIS, Epichrosis—s. Ephelis, Ephelides—s. Poliosis, Poliosis.

SPILSBURY'S ANTISCORBUTIC DROPS. An empirical preparation, formed of *hydrarg. ozymur., rad. gentian., cort. aurant. sic. ïä*

3ij, *antimon. crud.*, *santal. rubr.* ʒj, *spiritus vini rectific.*, *aque*, ʒʒ viij.

SPINA, 'a thorn' *Spine*, (F.) *Épine*. A process on the surface of a bone, which has been compared to the spines or thorns on certain vegetables. The chief processes of this name, are:—the *nasal spine*, the *spine of the scapula*, the *spine of the ischium*, the *four iliac spines*, the *palatine spine*, the *maxillary*, the *sphenoid*, &c. The *spine of the back* is the collection of vertebra constituting the *vertebral column*.

SPINA, Penis.—*Acida*, *Oxycantha Galeni*—*s. Ægyptiaca*, see *Acaciæ gummi*—*s. Alba*, *Carduus marianus*, *Mespilus oxyacantha*—*s. Bifida*, *Hydrorachis*—*s. Cervina*, *Rhamnus*—*s. Dorsi*, *Vertebral column*, see *Nasus*—*s. Dorsi introrsum Flexa*, *Lordosis*—*s. Ferrea*, *Pin*—*s. Helmontii*, *Aiguillon*—*s. Hirci*, *Astragalus verus*—*s. Infectoria*, *Rhamnus*—*s. Nodosa*, *Rachitis*.

SPINA VENTOSA, *Spina ventositas*, *Toro'do*, *Fungus Articulii*, *Ostiarthrocoel*, *Tumor fungosus articuli*, *Lupia junctura*, *Hyperspongia*, *Flatus spine*, *Arthrocoel*, *Padarthrocoel*, *White Swelling* (of some,) *Sideratio Ossis*, *Cancer Ossis*, *Gangræna Ossis*, *Exostosis*. A term of no definite meaning, as is obvious from these various words having been considered its synonyms. By some, it is defined to be a disease of the osseous system, in which the texture of the bone dilates, seeming to be distended with air, and constituting a variety of osteo-sarcoma. By others, it is considered to be a tumour arising from an internal caries of a bone; occurring most frequently in the carpus or tarsus. The term itself is a translation from the Arabic of *Rhazes*. See, also, *Hydrarthrus* and *Mollities ossium*.

SPINA VERTEBRALIS, *Vertebral column*.

SPINACH, *Spinacia*.

SPINACHIA, *Spinacia*.

SPINACHIA, *Spina'chia*, *Spina'cia olera'cea*, *Spin'age*, *Spinach*, (F.) *Épinard*. *Family*, *Atriplicæ*. *Sec. Syst.* *Diœcia Pentandria*. A plant which resembles the cabbage in its dietetic powers. The leaves boiled, with the addition of oil, form a good emollient cataplasm. It has been used in phthisical complaints; but its medicinal properties, if it have any, are not now regarded.

SPINACIA OLERACEA, *Spinacia*.

SPINE, *Spinous Processes*—*s. Ventositas*, *Spina ventosa*.

SPINAGE, *Spinacia*.

SPINAL, *Spina'lis*, *Spino'sus*, *Spina'tus*, (F.) *Épinière*, from *spina*, 'the spine.' That which relates to the vertebral column.

SPINAL ARTERIES are two in number, viz:

1. The *posterior spinal*, *Artère médiane postérieure du Rachis*, (Ch.) It arises from the vertebral, near the corpora pyramidalia, and descends on the posterior surface of the spinal marrow, distributing its ramifications to it. 2. The *anterior spinal artery*, *A. médiane antérieure*, (Ch.) is larger than the last, and arises, also, from the vertebral. It descends, in a serpentine manner, upon the anterior surface of the marrow; furnishes ramusculi to it, and unites with that of the opposite side, opposite the foramen magnum occipitis. A very tortuous branch arises from this union, which descends as far as the inferior extremity of the marrow, to which it sends numerous divisions.

The term *Spinal Arteries* or *Rachidian Ar-*

*teries* is also given, in the abstract, to all the arteries of the spinal marrow and vertebral canal. The same may be said of the veins and nerves.

SPINAL CORD, *Medulla spinalis*.

SPINAL FORAMINA, (F.) *Trous rachidiens*, in the abstract, are the foramina formed by every two contiguous vertebræ, through which the spinal nerves issue. See *Vertebral*. The term *Foramen Spinalè* is especially applied, however, to a small foramen, in front of the spinous process of the sphenoid bone, through which the middle artery of the dura mater enters the cranium. It is, likewise, called *Foramen sphenospinosum*, (F.) *Trou Sphéno-épineux* ou *petit rond*, *Trou épineux*.

SPINAL IRRITATION, *Rhachialgia*, *Rhachialgia*, *Neuralgia spinalis*, *Notalgia*. A modern pathological view, which refers most nervous diseases to irritation of the spinal cord. This irritation is presumed to be indicated by tenderness on pressure over the spinous process of one or more vertebræ, or over the nerves proceeding from the cord and distributed to the parts at the sides of the spine. Such tenderness, however, by no means indicates the pathological condition in question, as it is often met with in those enjoying perfect health. The treatment advised is cupping and counter-irritation on each side of the spine, which may be beneficial in such diseases, no matter what part of the frame may be in a morbid state, by exciting a new and revellent impression on a very sensible portion of the cutaneous surface.

SPINAL NERVE, *Accessory of the Par vagum* or *6th pair*, *Accessory nerve of Willis*, *Spinal Accessory*, *Spino-cranio-trapésien*, *Superior respiratory N.*, *Eleventh pair of encephalic nerves*, *Trachélo-dorsal*, (Ch.) arises from the medulla spinalis, within the vertebral canal, between the anterior and posterior roots of the cervical nerves at a greater or less distance from the cranium. The roots unite to form the nerve, which ascends into the cranium through the foramen magnum of the occipital bone, and issues by the foramen lacerum posterius, crossing the sterno-cleido-mastoideus, to which it gives filaments, and losing itself entirely on the trapezius muscle.

SPINAL NERVES, *Vertebral nerves*—*s. Prolongation*, *Medulla spinalis*.

SPINALES COLLI MINORES, *Interspinales colli*—*a. et Transversales lumborum*, *Transversalis dorsi*.

SPINALIS CERVICIS, *Semi-spinalis colli*—*a. Colli*, *Semi-spinalis colli*.

SPINALIS DORSI, *Grand épineux du dos*, *Spinalis Dorsi major*. Winslow calls thus some fleshy fasciculi, which are situate on the lateral surfaces of the spinous processes; from the third dorsal vertebra to the first or second lumbar; and which form part of the transverso-spinalis of most authors. The same anatomist calls—*Spinalis Dorsi minor*, *Petit épineux du dos*—some small, fleshy fibres, situate on each side of the interspinal ligament. They are short, flat, and pass from one spinous process to the other. Like the preceding, they form part of the transverso-spinalis. All these fleshy fasciculi strengthen the vertebral column.

SPINATI, *Interspinales colli*.

SPINATUS, *Spinal*.

SPINDLE TREE, *Euonymus Americanus*.

**SPINE**, Vertebral column—s. Curvature of the, Gibbositas.

**SPINO-AXOIDO-OCCIPITALIS**, Rectus capitis posticus major—s. *Axoido-trachelii-astloidien*, Obliquus inferior capitis.

**SPINITIS**, Myelitis.

**SPINO-DORSITIS**, Myelitis.

**SPINOLA**, see Hydrorachis.

**SPINOSUS**, Spinal.

**SPINOUS**, *Spinosus*, (F.) *Épineux*. Having the shape of a spine or thorn.

**SPINOUS PROCESSES** or **APOPHYSES** of the *Vertebrae*, *Acanthae*, *Spinae*, *Cynolophoi*, (F.) *Apophyses épineuses*, are situated at the posterior part of each vertebra, and afford attachment to the muscles, whose office it is to extend the spine. See *Vertebra*.

**SPIRACULA**, (F.) *Spiracules*, from *spiro*, 'I breathe.' Respiratory pores of the skin.

**SPIRÆ CEREBRI**, Convulsions, cerebral.

**SPIRÆA FILIPENDULA**, *Filipendula*, *Saxifraga rubra*, *Dropwort*, (F.) *Filipendula*. Family, Rosaceæ. See *Syst. Icosandria Pentagynia*. The root of this plant is said to possess astringent and lithontriptic virtues.

**SPIRÆA TOMENTO'SA**, *Hardhack*, *Red meadow-sweet*, *Steeple bush*, *Rosy bush*, *White-leaf*. This indigenous species, which is abundant in the northern states of the Union, is tonic and astringent; and is usually administered either in the form of extract or of decoction, (*Spiræa* 3ss; *agua* Oj.)

**SPIRÆA TRIFOLIATA**, *Gillenia trifoliata*.

**SPIRÆA ULMARIA**, *Ulmaria*, *Régi'na Prati*, *Barba capra*, *Meadow Sweet*, *Queen of the Meadows*, *Barbula capri'na*, (F.) *Ulmair*, *Reine des Prés*. The leaves have been recommended as mild astringents—the flowers as antispasmodics and diaphoretics.

**SPIRAMENTA PULMONUM**, see *Pulmo*.

**SPIRAMENTUM ANIMÆ**, *Pulmo*.

**SPIRAMINA PALPEBRARUM**, *Lachrymal puncta*—s. *Pulmonum*, see *Pulmo*.

**SPIRATIO**, *Respiration*.

**SPIRIT**, *Spiritus*; from *spirare*, 'to exhale;' (F.) *Esprit*. A name given to every liquid product of distillation. Spirits were formerly distinguished into—inflammable, acid, and alkaline; and consequently a number of substances were crowded together, which often resembled each other in no other property than in being volatile. The term is now confined to alcoholic liquors, of which the following are the chief.

**Arrack**. Distilled from coarse palm sugar, named jaggery, fermented with the bark of the *Mimosa leucophlea*; also from rice and the fermented juice of the Palm; made in India. Its varieties are:—

1. **Mahwah Arrack**. Made in India from the flowers of the Madhucca tree, *Bassia butyracea*.

2. **Tuba**. Made from palm wine, in the Philippine Islands.

**Araka**. Distilled, by the Tartars, from koumis, fermented mare's milk.

**Araki**. Distilled from dates, by the Egyptians.

**Arika**. A variety of koumis, distilled from fermented mares' milk, in Tartary and Iceland.

**Brandy**. Distilled from wine, figs, peaches, persimmon apple, mulberries, and sometimes

other fruits, in Europe, Asia, North and South America, wherever wine is made. The best brandy is that of Cognac; the next, that of Bordeaux and Rochelle. The varieties are—

1. **Aguardiente**, (S.) In Peru, the common brandy obtained from grapes is the *Aguardiente de Pisco*, so called, because shipped at the port of Pisco. Another kind, much dearer, and of excellent flavour is made from Muscatel grapes, and is called *Aguardiente de Italia*. It is sometimes seen in the United States.

2. **Lou**. Made from rice, in Siam.

3. **Rakia**. Made in Dalmatia from the husks of grapes mixed with aromatics.

4. **Rossolio**. Made at Dantzic, from a compound of brandy, rossolio, and other plants.

5. **Troster**. Made on the Rhine, from the husks of grapes, fermented with barley and rye.

6. **Sekis-kayovodka**. Made from the lees of wine and fruit at Scio.

**Geneva Holland's**, (*genièvre*, French for juniper.) Distilled from malted barley and rye, rectified on juniper berries, in Holland. Its variety is—

**Gen**. Made in England, from malted barley, rye, potatoes; rectified with turpentine.

**Goldwasser**. Distilled at Dantzic, from wheat, barley, and rye, rectified with aniseed, cinnamon, and other spices.

**Kirschwasser**. Distilled from the Malacherry, in Switzerland.

**Maraschino**. Distilled from the Macarask cherry, at Zara, the capital of Dalmatia.

**Rum**, (supposed to be derived from the terminal syllable of the word *saccharum*: but the native Americans called this liquor Rum.) Distilled, in the West Indies and South America, from cane-sugar and molasses, and in North America from maple sugar. Its variety is—

**Slatkasia trava**. Made at Kamtschatka, from a sweet grass.

**Show-choo**. Distilled, in China, from the lees of mandarin, a wine made from boiled rice.

**Whisky**, (supposed to be derived from *uisque*, the first two syllables of *uisquebaugh*, the original name in Ireland.) Distilled, in Scotland and Ireland, from malted and raw barley, rye, oats, and potatoes: and in the south of France, from sloes. In Ireland it was called *buil-ceann*, or madness of the head. The best Scotch whisky is *Glenlivet*, the best Irish, *Enniskowen*.

**Y-woer-a**. Distilled, in the Sandwich Islands from the root of the Tee-root, baked, pounded, and fermented.

To these may be added an intoxicating liquor made by the Afghanists, from ewes' milk; and that made at Kamtschatka, from a species of mushroom, named muchumer.

**SPIRIT OF ANISEED**, *Spiritus anisi*—s. *Bathing*, *Freeman's*, see *Linimentum saponis compos.*—s. *Bathing*, *Jackson's*, see *Linimentum saponis compos.*—s. *Bezoardic* of *Bussius*, see *Bussii spiritus Bezoarticus*—s. *Bone*, *Liquor volatilis cornu cervi*—s. of *Burrhus*, *Burhii spiritus matricalis*—s. of *Carraway*, *Spiritus carui*—s. of *Ether*, *aromatic*, *Spiritus ætheris aromaticus*—s. *Fuming*, of *Beguïn*, *Ammoniac sulphuretum*—s. *Fuming*, of *Boyle*, *Ammoniac sulphuretum*—s. of *Hartshorn*, *Liquor cornu cervi*—s. of *Horseradish*, *compound*, *Spiritus armoracæ compositus*—s. of *Lavender*, *Spiritus lavandulæ*—s. of *Lavender*, *compound*, *Spiritus lavandulæ compositus*—s. of *Mindererus*, *Li-*

quor ammoniæ acetatis—s. of Nitre, sweet, Spiritus ætheris nitrici—s. of Nitric ether, Spiritus ætheris nitrici—s. of Pennyroyal, Spiritus pullegii—s. of Peppermint, Spiritus menthæ pipéritæ—s. Proof, Spiritus tenior—s. of Salt, Muriaticum acidum—s. of Scurvygrass, golden, see Spiritus armoraciæ compositus—s. of Spearmint, Spiritus menthæ viridis—s. of Sulphuric ether, Spiritus ætheris sulphurici—s. of Sulphuric ether, compound, Spiritus ætheris sulphurici compositus—s. of Turpentine, Oleum terebinthinæ rectificatum—s. Verdigris, Aceticum acidum—s. of Vitriol, Sulphuric acid—s. of Wine and camphor, Spiritus camphoræ.

SPIRITS, ANIMAL, Nervous fluid.

SPIRITUS, Breath, Life, Respiration, Spirit—s. Æthereus nitrosus, Spiritus ætheris nitrici—s. Æthereus vitriolicus, Spiritus ætheris sulphurici.

SPIRITUS ÆTHERIS AROMATICUS, *Æther Sulphuricus cum alcohol'e aromaticus, Eliæ'ir vitriol'is dulcè, Sweet Eliæ'ir of Vitriol, Viga'ni's Eliæ'ir of Vitriol, Aromatic Spirit of Ether. (Cinnam. cort. contus. ℥ij. cardam. sem. contus. ℥ss. piperis longi fruct. cont., zingib. rad. concis., sing. ℥j. spiritus ætheris sulphuric. Oj. Macerate, for 14 days, in a stopped glass vessel and strain. Ph. L.)* It is used as a stimulant in nervous affections. Dose, f. ℥ss to f. ℥j.

SPIRITUS ÆTHERIS NITRICI, *Sp. Ætheris nitrosi, Sp. nitri dulcis, Sp. Ætheris nitrosus, Sweet Spirit of Nitre, Nitre drops, Æther nitricus alcoholisatus, Spirit of Nitric Ether. (Nitrate of Potassa, in coarse powder, ℥ij, Sulphuric acid, ℥ss; Alcohol, Ojss; Diluted Alcohol, Oj; Carbonate of Potassa, ℥j. Mix the nitrate of potassa and the alcohol in a large glass retort, and having gradually poured in the acid, digest with a gentle heat for two hours; then raise the heat, and distil a gallon. To the distilled liquor add the diluted alcohol and carbonate of potassa, and again distil a gallon.—Ph. U. S.)* It is refrigerant, diuretic, antispasmodic, and diaphoretic. Dose, gutt. xxv. to f. ℥j.

SPIRITUS ÆTHERIS SULPHURICI, *Æther Sulphuricus cum Alcohol'e, Liquor Ætheris Sulphuricus, Spiritus Vitriol'is dulcis, Spiritus Ætheris vitriol'ici, Liquor Sulphuricus alcoholisatus, Spirit of Sulphuric Ether. (Æther. sulphuric. Oss; sp. res. Oj. Mix. Ph. L.)* Stimulant, diaphoretic, diuretic, and antispasmodic. Dose, f. ℥ss to f. ℥ij.

SPIRITUS ÆTHERIS SULPHURICI COMPOSITUS, *Sp. ætheris vitriol'ici compositus, Liquor anod'ynus Hoffmanni, Compound Spirit of Sulphuric Ether, Hoffmann's Anodyne Liquor. (Æther Sulphuric. Oss; Alcohol. Oj; Ol. Æther. f. ℥ij. Ph. U. S. Ph. L.)* Mix. A stimulant and antispasmodic.

SPIRITUS ÆTHERIS VITRIOLICI COMPOSITUS, Spiritus ætheris sulphuric. comp.

SPIRITUS AMMONIÆ, *Al'kali ammoniacum spirituosum, Al'cohol ammoniacum, Sp. salis ammoniaci, Ammoniacæ alcoholisatus, Liquor ammoniaci vinosus, L. ammoniacæ spirituosus, Læzivium ammoniacalè vino'sum, Spiritus salis ammoniaci vinosus seu dulcis seu dulcificatus, Solutio subcarbonatis ammoniaci spirituosæ, (F.) Esprit d'ammoniaque. (Ammon. muriat. in pulv. subtilissim., calcis, à ℥j; alcohol. f. ℥xx; aquæ, ℥ix. The water is employed to slake the lime; the muriate of am-*

monia is then well mixed with it, and by means of heat, the ammonia is made to pass into the distilled water contained in a quart bottle. Ph. U. S.) Stimulant and antispasmodic. Dose, f. ℥ss to f. ℥j.

SPIRITUS AMMONIÆ AROMATICUS, *Alcohol ammoniacum aromaticum, Aromatic ammoniacal'ed Alcohol, Sal volat'ile Drops, Spiritus salis volat'ilis oleosus, Sp. volatilis aromaticus, Sal volatile oleosum Sylvii, Sp. ammoniacæ compositus, Tinctura aromatica ammoniacæ, Liquor oleosus Sylvii, Læzivium ammoniacalè aromaticum. (Ammon. muriat. ℥v; Potass. carb. ℥viii, cinnam. cont., caryophyll. cont. à ℥ij; Læmon. cort. ℥iv; alcohol. aquæ aë, Ov. M. Distil Ovijs. Stimulant. Dose, f. ℥ss to f. ℥j.* SPIRITUS AMMONIÆ COMPOSITUS, Spiritus aromaticus.

SPIRITUS AMMONIÆ FETIDUS, *Sp. volat'ilis fatidus, Fit Drops, Al'cohol ammoniacum fatidum, Tinctura asafatidæ ammoniacæ, Fetid Spirit of Ammonia. (Sp. ammoniacæ Oij, asafatidæ ℥ij. Macerate for 12 hours, and distil Oiss. Ph. L.)* Stimulant and antispasmodic. Dose, f. ℥ss to f. ℥j.

SPIRITUS AMMONIÆ SUCCINATUS, *Succinac'ed Spirit of Ammonia, Common Eau de Luce, Ammoniacum succinatum, Aqua Lu'ciæ, Liquor ex Ammonia et Oleo Succini, Liquor ex'citans, Spiritus Ammoniacæ cum Succino, Sp. Salis Ammoniaci lactesens seu lacteus. (Mastich. ℥ij, sp. rect. f. ℥ix, ol. lavand. gutt. xiv, succin. ol. gutt. iv, liq. ammon. f. ℥x. Macerate the mastich in the alcohol, and pour off the clear tincture: add the rest and shake. Ph. L.)* Stimulant and antispasmodic. Dose, gutt. x to f. ℥ss, or f. ℥j.

SPIRITUS ANIMALES, see Nervous fluid.

SPIRITUS ANISI, *Spiritus Anisi compositus, Aqua anisi fortis, Aqua Seminum Anisi composita, Spirit of Aniseed, (F.) Esprit d'anis. (Anisi sem. cont. ℥ss, spirit tenior. cong., aquæ quod satis sit ad prohibendum empyreuma. Ph. L.)* Carminative. Dose, f. ℥ss to f. ℥ss. In the compound spirit, angelica is usually an ingredient.

SPIRITUS ANTHOS, Spiritus rosmarini.

SPIRITUS ARMORACIÆ COMPOSITUS, *Sp. Raph'ani compositus, Aqua Raphani composita, Compound Spirit of Horseradish, (F.) Esprit de raifort composé. (Armorac. rad. recent. concis., aurant. cort. exsicc., sing. ℥j, myriat. nuc. contus. ℥ss, spirit. ten. cong. aquæ q. s. ad prohibendum empyreuma. Ph. L.)* Stimulant and antiscorbutic. (?) Dose, f. ℥j, to f. ℥v.

The Golden Spirit of Scurvy grass—an empirical preparation—is formed by adding gamboge ℥viii, to one gallon of the *sp. armoraciæ compositus*.

Greenough's Tincture for the teeth, is formed of amygd. amar. ℥ij, lig. Bresil., cassia bacc., à ℥jv, irid. Florent. ℥ij, coccinell., al. aceto-selle, alum. à ℥j, sp. vin. rect. Oij, sp. armoraciæ comp. f. ℥ss.

SPIRITUS BEQUINIS, Ammoniacæ sulphuretum.

SPIRITUS CAMPHORÆ, *Sp. camphoratus, Sp. vino'sus camphoratus, Tinctura Camphoræ, Spirit of Wine and Camphor, Spirit of Camphor, (F.) Esprit de Camphre, Alcool camphré, Eau de Vie camphré. (Camphor. ℥iv, alcohol. Oij. Dissolve.)* Stimulant, anodyne and discutient. Used only externally.

**SPIRITUS CAR'UI**, *Sp. Cari Carui, Spirit of Caraway, Aqua Seminum Carui fortis, A. Seminum Carui, Strong Carui Waters, (F.) Esprit de Carvi. (Carui sem. cont. Biss, sp. tenuior. cong. j, aquæ q. s. Distil a gallon. Ph. L.)* Carminative. Dose, f. ʒj to f. ʒss.

**SPIRITUS CINNAMOMI**, *Sp. Lauri Cinnamomi, Spirit of Cin'namon, Aqua Cinnamomi fortis, Aqua Cinnam. spirituo'sa, Strong Cinnamon Water, (F.) Esprit de Cannelle. (Cort. cinnam. ʒv, sp. rect. Oivas.)* Stimulant and carminative. Dose, f. ʒj to f. ʒss.

**SPIRITUS COL'CHICI AMMONIAT'US**, *Ammoniated Spirit of Colchicum. (Sem. colchic. cont. ʒij, sp. ammon. aromat. Oj. Ph. L.)* Narcotic, cathartic, and diuretic. Used in gout, rheumatism, and dropsy. Dose, from gr. xxx to f. ʒj.

**SPIRITUS CORNU CERVI**, *Liquor C. C.—s. Fumans Beguini, Ammonie sulphuretum—s. Genitalis, Aura seminis.*

**SPIRITUS JUNIP'ERI COMPOSIT'US**, *Compound Spirit of Juniper, Aqua Juniperi composita, (F.) Esprit de genévère composé. (Bacc. junip. cont. ʒij, sem. carui cont., fanioul. sem. cont., ad ʒiiss, sp. ten. cong. j, ag. Oij. Distil a gallon. Ph. L.)* Stimulant and diuretic. Dose, f. ʒj to f. ʒss.

**SPIRITUS LAURI CINNAMOMI**, *Spiritus cinnamomi.*

**SPIRITUS LAVANDULÆ**, *Sp. Lavandulæ spiræ, Spirit of Lav'ender, Sp. Lavand. simpl., Lavender Water, (F.) Esprit de Lavande. (Lavand. flor. recent. ʒij, sp. rectif. cong., aquæ Oij. Distil a gallon.)* Usually made by adding the oil to rectified spirit. Used as a perfume chiefly.

**SPIRITUS LAVANDULÆ COMPOSIT'US**, *Tinctura Lavandulæ composita, Red Hartshorn, Lavender drops, Compound Spirit of Lavender, (F.) Esprit de Lavande composé. (Sp. Lavand. Oij, sp. rosmarin. Oj, cinnam. cort. contus. ʒij, myrsitic. nucleor. cont. ʒss, caryophyll. cont. ʒij, pterocarpi ligni conc. ʒijj. Macerate for 14 days, and filter through paper. Stimulant. Dose, gr. xl to f. ʒijj.*

**SPIRITUS LETHALIS**, *Carbonic acid—s. Lumbricorum, Liquor volatilis cornu cervi.*

**SPIRITUS MENTHÆ PIPERIT'Æ**, *Spirit of Peppermint, Aqua Mentha piperit'idis spirituo'sa, Sp. Menthae piperit'idis, (F.) Esprit de Menthe poivrée. (Olei menth. pip. ʒvss, sp. rectif. Oivas, aquæ, q. s. distil a gallon. Ph. L.)* Carminative and stimulant. Dose, f. ʒss to f. ʒijj.

**SPIRITUS MENTHÆ SATIVÆ**, *Spiritus menthae viridis.*

**SPIRITUS MENTHÆ VIR'IDIS**, *Spearmint, Spiritus menthae sativæ, Aqua Mentha vulgaris spirituo'sa, (F.) Esprit de Menthe verte. (Olei Menth. virid. ʒvss, sp. rectif. Oivas, ag. q. s. Distil a gallon. Ph. L.)* Like the last in properties and dose.

**SPIRITUS MILLEPEDARUM**, *Liquor cornu cervi.*

**SPIRITUS MYRSITICÆ**, *Spiritus Myrsitica Moschatæ, Sp. Nucis Moschatae, Aqua Nucis Moschatæ, Nutmeg Water, Aqua Nephriticæ, (F.) Esprit de Muscade. (Myrsit. nucl. cont. ʒij, spirit. tenuior. cong. j, aquæ Oj. Distil a gallon. Cordial and carminative. Dose, f. ʒj to f. ʒiv.*

**SPIRITUS MYRTI PIMENTÆ**, *Spiritus pimentæ—s. Nitri acidus, Nitric acid—s. Nitri dulcis,*

*Spiritus ætheris nitrici—s. Nitri duplex, Nitric acid—s. Nitri fumans, Nitric acid—s. Nitri Glauberi, Nitric acid—s. Nitri simplex, see Nitric acid—s. Nitri vulgaris, see Nitric acid—s. Nucis moschatae, Spiritus myrsitica—s. Ophthalmicum Mindereri, Liquor ammoniac acetatis.*

**SPIRITUS PIMENTÆ**, *Sp. Myrti Pimenta, Spiritus Pimento, Spirit of Pimento, Aqua Mirabilis. (Piment. baccar. cont. ʒij, sp. tenuior. cong., aquæ Oj. Distil a gallon. Cordial and carminative. Dose, f. ʒj, to f. ʒiv.)*

**SPIRITUS PULEGII**, *Spirit of Pennyroyal, Aqua Pulegii spirituo'sa, Spirituous Pennyroyal Water, (F.) Esprit de Pouliot. (Olei pulegii ʒvij, sp. rect. Oivas, aquæ, q. s. Distil a gallon. Ph. L.)* Same as spirit of spearmint in properties and dose.

**SPIRITUS RECTIFICAT'US**, *Sp. Vini rectificatus, Enostagma, Enelæum, Pyranus, Sp. Vinous rectificatus, Alcohol, A. Vini, Spirit of Wine, (F.) Esprit de Vin rectifé. Rectified spirit is much used in Pharmacy to dissolve resinous and other substances. It is seldom exhibited internally; although it exists in the diluted state in all vinous and spirituous liquors. Externally, it is employed as a discutient.—S. g., according to the London Pharmacopœia, 0.836; according to that of Dublin, 0.840; of Edinburgh and United States, 0.835, (see Alcohol,) and of Paris, 0.819 to 0.827.*

**SPIRITUS RECTOR**, *Aroma—s. Raphani compositus, Spiritus armoracæ compositus.*

**SPIRITUS ROSMARINI**, *Sp. Rosmarini officinalis, Spirit of Rosemary, Spiritus Anthis, Hungary Water, (F.) Esprit de Romarin. (Oli. rosmarini ʒij, sp. rect. cong. j, aquæ Oj. Distil a gallon.)* Stimulant. Dose, f. ʒj, to f. ʒiv.

**SPIRITUS SALIS ACIDUS** *seu FUMANS*, *Muriaticum acidum—s. Salis ammoniaci, Spiritus ammoniac—s. Salis ammoniaci aquosus, Liquor ammoniac—s. Salis ammoniaci lactescens seu lacteus, Spiritus ammoniac succinatus—s. Salis ammoniaci sulphuratus, Ammoniac sulphuretum—s. Salis Glauberi, Muriaticum acidum—s. Salis marini coagulatus, Potassæ murias—s. Salis marini, Muriaticum acidum—s. Salis volatilis oleosus, Spiritus ammoniac aromaticus—s. Sulphurico-æthereus camphoratus, Tinctura ætherea composita—s. Sulphurico-æthereus martialis, Tinctura seu Alcohol sulphurico-æthereus ferri—s. Sulphuris, Sulphurous acid—s. Sulphuris per campanam, Sulphurous acid—s. Sulphuris volatilis, Ammoniac sulphuretum—s. Sulphurous volatilis, Sulphurous acid.*

**SPIRITUS TENUIOR**, *Alcohol dilu'tum, Spiritus vinous tenuior, Proof Spirit, (F.) Esprit de vin délayé. Generally made for pharmaceutical purposes, by mixing equal parts of rectified spirit and water. S. g. Lond. 0.920; Edinb. and United States, 0.935. It is employed in the same cases as those in which the alcohol is used—chiefly, as a solvent of vegetable matters, in the form of tinctures.*

**SPIRITUS VENERIS**, *Aceticum acidum—s. Vini rectificatus, Spiritus rectificatus—s. Vinous camphoratus, Spiritus camphoræ—s. Vinous tenuior, Spiritus tenuior—s. Vitalis, Nervous fluid—s. Vitrioli, Sulphuric acid—s. Vitrioli acidus Vogleri, Sulphuricum acidum dilu'tum—s. Vitrioli coagulatus Mynsichti, Potassæ sulphas—s. Vitrioli dulcis, Spiritus ætheris sulphurici—s. Vitrioli phlogisticatus, Sulphurous acid—s. Volatilis aromaticus, Spiritus ammoniac*

aromaticus—s. *Volatilis fetidus*, *Spiritus ammoniæ fetidus*.

**SPIROID CANAL**, *Aquæductus Fallopii*.

**SPIROMETER**; badly compounded from *spiro*, 'I breathe,' and *μετρον*, 'a measure:'—properly *Anapnometer*, *Pneusometer*. Any instrument for measuring the quantity of air given out in respiration.

**SPIROPTERA HOMINIS**, see *Worms*.

**SPISSANTIA**, *Incrassantia*.

**SPIT**, *Sputum*.

**SPITAL**, **MINERAL WATERS OF**. The village of Spital is situate on the south side of the Tweed, near Tweedmouth. The springs there contain chloride of calcium, sulphate of soda, sulphate and carbonate of lime. They act as saline cathartics.

**SPITHAMA**, *Dorans*. A measure of twelve fingers' breadth.

**SPITTING**, *Exspuition*.

**SPITTLE**, *Saliva*—s. *Sweet*, see *Salivation*.

**SPLANCHNA**, *Entrails*.

**SPLANCHNECTOPIA**, *Splanchnodias'tasis*, *Situs perversus* seu *anomalus intestino-rum*; from *σπλαγχνον*, 'an intestine,' s2, 'out of,' and *τοπος*, 'place.' Misplacement or ectopia of the intestines.

**SPLANCHNELMINTHA**, *Worms*.

**SPLANCHNEURYSMA**, from *σπλαγγχρον*, 'an intestine,' and *ευρησις*, 'I dilate.' Morbid dilatation of the intestines.

**SPLANCHNIC**, *Splanchnicus*, *Visc' coral*, from *σπλαγγχρον*, 'viscus.' That which relates to the viscera.

**SPLANCHNIC CAVITIES** are the three great cavities of the body;—those of the cranium, chest, and abdomen.

**SPLANCHNIC NERVES** belong to the great sympathetic, and are two in number on each side. They are distinguished into:—1. The *great splanchnic nerve*, (F.) *Grand surrinal*, (Chaus.) Its roots—four or five in number, come from the 6th, 7th, 8th, 9th, and sometimes the 10th thoracic ganglion. They descend inwards, on the sides of the vertebral column, beneath the pleura, and unite into a single trunk, which enters the abdomen through a separation of the fleshy fibres of the pillars of the diaphragm; passes behind the stomach, and divides into several branches, which pass into the semilunar ganglion. 2. The *lesser splanchnic nerve*, (F.) *Splanchnicus accessorius* of Walther, *Petit surrinal*, (Ch.), is composed of two distinct branches, proceeding from the 10th and 11th thoracic ganglion, which unite on the 12th dorsal vertebra into a cord, that pierces the diaphragm singly; enters the abdomen, and divides into two branches, one of which anastomoses with the greater splanchnic nerve, whilst the other sends its filaments to the renal and solar plexuses.

**SPLANCHNICA**. Medicines adapted to diseases of the bowels. Also, the 2d order of the class *Calicæ* of Good; defined,—diseases affecting the collatitious viscera, and characterized by disquiet or diseased action in the organs auxiliary to the digestive process, without primary inflammation.

**SPLANCHNODIASTASIS**, *Splanchnectopia*.

**SPLANCHNODYNE**, from *σπλαγγχρον*, 'a viscus,' and *δύνη*, 'pain.' Pain in the bowels.

**SPLANCHNOGRAPHIA**, *Splanchnography*.

**SPLANCHNOGRAPHY**, *Splanchnographia*, from *σπλαγγχρον*, 'a viscus,' and *γραφος*, 'a description.' The part of anatomy which treats of the viscera.

**SPLANCHNOLITHIASIS**; from *σπλαγγχρον*, 'a viscus,' and *λίθος*, 'a stone.' The formation of a calculous concretion in any viscus.

**SPLANCHNOLOGY**, *Splanchnologia*, from *σπλαγγχρον*, 'a viscus,' and *λογία*, 'a discourse.' A treatise on the viscera:—also, *Splanchnography*.

**SPLANCHNOPATHIA**, from *σπλαγγχρον*, 'a viscus,' and *παθος*, 'suffering.' A disease of the intestines.

**SPLANCHNOSCLEROSIS**, from *σπλαγγχρον*, 'a viscus,' and *σκληρος*, 'hard.' Induration of a viscus.

**SPLANCHNOTOMY**, *Splanchnotomia*, *Splanchnotomie*, from *σπλαγγχρον*, 'a viscus,' and *τομή*, 'I cut.' Dissection or anatomy of the viscera.

**SPLAYFOOT**, see *Kyllosis*.

**SPLEEN**, *Lien*, *Hepar sinistrum* seu *adulteri-num*, (F.) *Rate*. A soft, spongy, parenchymatous organ; of a more or less deep violet red, situate deeply in the left hypochondrium, below the diaphragm, above the colon, between the great tuberosity of the stomach and the cartilages of the false ribs, and above and anterior to the kidney. Its ordinary length is 4½ inches; its thickness, 2½; and its weight 8 ounces. Its parenchyma, which is bathed in blood, contains a multitude of grayish, soft, and semi-transparent granulations—*splenic corpuscles*. It is covered by a serous membrane, furnished by the peritoneum; and by a proper coat, of a fibrous nature, which is intimately united with it, and transmits into its interior delicate, solid, and very elastic prolongations. At its inner edge is a fissure, by which the vessels and nerves enter the organ. The functions of the spleen are unknown. One of the latest opinions is, that it belongs to the lymphatic system.

**SPLEEN**, *Hypochondriasis*—s. *Supernumerary*, *Lienculus*.

**SPLEENWORT**, *Asplenium*, *Asplenium scolopendrium*—s. *Bush*, *Comptonia asplenifolia*.

**SPLENALGIA**, *Neuralgia lienis*, *Splenica*, *Splenodynia*, from *σπλην*, 'the spleen,' and *αλγος*, 'pain.' Pain in the spleen.

**SPLENALGIA PHLEGMONODEA**, *Splenitis*—s. *Subinflammatoria chronica*, *Splenocous*.

**SPLENECTAMA**, *Splenoparectama*.

**SPLENECTASIS**, *Splenoparectama*.

**SPLENECTOMIA**, *Splenectomie*, from *σπλην*, 'the spleen,' *εκ*, 'out of,' and *τομή*, 'I cut.' Extirpation of the spleen.

**SPLENECTOPIA**, *Dislocatio lienis* seu *splenis*; from *σπλην*, 'the spleen,' and *εκτοπος*, 'out of place.' Dislocation of the spleen. Not a common occurrence.

**SPLENEMPHRAXIS**, *Splenophraxia*, from *σπλην*, 'the spleen,' and *μφορσσο*, 'I obstruct.' Obstruction of the spleen.—Vogel.

**SPLENES**, *Hypochondriasis*.

**SPLENETICUS**, *Splenicus*, *Spleneticus*, *Lienosus*, (F.) *Ratitua*. That which relates to the spleen: one labouring under diseased spleen. A medicine adapted for diseases of the spleen.

**SPLENIC**, *Splenicus*, *Spleneticus*, from *σπλην*, 'the spleen.' That which relates to the spleen.

**SPLENIC ARTERY.** It arises from the cœliac; and passes from right to left, forming many windings along the upper edge of the pancreas, which lodges it in a special groove. It reaches the fissure of the spleen, and divides into several branches that enter the organ. In its course it furnishes the pancreatic, left gastro-epiploic, and the *vasa brevia*.

**SPLENIC CACHEXIA,** see Cachexia splenica—s. Corpuscles, see Spleen.

**SPLENIC PLEXUS** is a nervous network, which proceeds from the cœliac plexus, and accompanies the splenic artery, sending secondary plexuses to each division.

**SPLENIC VEIN** arises from the spleen, and accompanies the splenic artery; proceeding from left to right, to unite with the superior mesenteric vein, and to form, with it, the abdominal vena porta. In its course, it receives veins corresponding to the *vasa brevia*, the right and left gastro-epiploic, the duodenal, pancreatic, coronaria ventriculi, and inferior mesenteric veins.

**SPLENICA,** Splenalgia.

**SPLENICUS,** Spleneticus, Splenic.

**SPLENIOLA,** Compress.

**SPLENIS TUMOR,** Ague cake.

**SPLENISATION,** Splenization.

**SPLENISCUS,** Compress.

**SPLENITICUS,** Splenic.

**SPLENITIS,** from σπλην, 'the spleen,' and *itis*, denoting inflammation. Inflammation of the spleen. *Empres'ma splenitis, Inflammatio lienis, I. splenis, Splenal'gia phlegmono'dea,* (F.) *Inflammation de la Rate.* A rare disease, characterized by local pain, swelling, and heat, which sometimes terminates by supuration. It must be treated like other inflammations.

**SPLENIUM,** Compress—s. Cruciatum, *Croix de Malte.*

**SPLENIUS, S. Capitis, S. Colli,** (F.) *Cervico-dorso-mastoidien et dorso-trachélien, Cervico-mastoidien* (Ch.), *Posterior mastoid muscle.* So called from its resemblance to the spleen of certain animals. A muscle situate at the posterior part of the neck, and upper part of the back. It is much broader above than below, where it terminates in a point. It is attached, by its inner edge, to the spinous processes of the first five dorsal vertebræ; to that of the 7th cervical, and to the inferior part of the posterior cervical ligament. By its upper extremity, it is attached to the transverse processes of the first two cervical vertebræ, to the mastoid process, and to the posterior surface of the occipital bone. Some have considered this muscle to be formed of two portions, which they have called *Splenius colli,* and *Splenius capitis.* The splenius extends the head, inclines it, and rotates it. If the splenii of each side act together, they extend the head.

**SPLENIZATION,** *Splenizatio,* (F.) *Splenisation,* from σπλην, 'the spleen.' A term applied to the state of the lung in the first or second stage of pneumonia in which its tissue resembles that of the spleen.

**SPLENOCELE,** *Her'nia lienal'is,* from σπλην, 'the spleen,' and κληη, 'a tumour.' Hernia formed by the spleen.

**SPLENODYNIA,** Splenalgia.

**SPLENOGRAPHY,** *Splenograph'ia,* from σπλην, 'the spleen,' and γραφη, 'a description.' A description of the spleen.

**SPLENOHÆMIA,** (F.) *Splénohémie,* from

σπλην, 'the spleen,' and αἷμα, 'blood.' Congestion or hyperæmia of the spleen, a common phenomenon in many diseases, especially in typhoid and intermittent fevers.

**SPLENOID,** *Spleno'idés, Spleno'des,* from σπλην, 'spleen,' and εἶδος, 'resemblance.' Spleen-like. Having the appearance of the spleen.

**SPLENOL'OGY,** *Splenolog'ia,* from σπλην, 'the spleen,' and λογος, 'a discourse.' A treatise on the spleen.

**SPLENONCIE,** Splenoncus.

**SPLENONC'US,** *Megalosplénia, Hypertroph'ia seu Supernutri'tio splenis seu lienis, Intumescen'tia seu Infarc'tus seu Physco'nia lienis, Splenal'gia subinflammato'ria chron'ica, Splenemphrax'is, Hypersplenotroph'ia,* (F.) *Splénocis, Hypertrophie de la Rate;* from σπλην, 'the spleen,' and ογκος, 'a tumour.' Tumefaction of the spleen. See Ague cake.

**SPLENOPAREC'TAMA,** *Splene'ctama, Splenoparec'tasis, Splene'ctasis,* from σπλην, 'the spleen,' and παρακταμα, 'excessive volume.' Excessive enlargement of the spleen.—Ploquet.

**SPLENOPARECTASIS,** Splenoparectama.

**SPLENOPHARAXIA,** Splenemphraxis.

**SPLENORRHAG'IA,** from σπλην, 'the spleen,' and ραγη, 'rupture.' Hemorrhage from the spleen.

**SPLENOSCIRRHUS,** from σπλην, 'the spleen,' and σκίρρος, 'hardness.' Scirrhus or cancer of the spleen.

**SPLENOT'OMY,** *Splenotom'ia, Splenot'omie,* from σπλην, 'the spleen,' and τεμνω, 'I cut.' Dissection of the spleen.

**SPLINT,** Teut. Splinter, from splijten, 'to split'; *Hastel'ia, Assul'a, Asser'culum, Plag'ula, Narthex, For'ula,* (F.) *Atelle, Ecliss.* A flexible and resisting lamina of wood, used in the treatment of fractures, to keep the fragments in apposition, and prevent their displacement. Splints are made of iron, wood, bark of trees, leather, pasteboard, &c. They are generally padded, and are fixed by a roller or by tapes, according to circumstances.

**SPLINTER,** (F.) *Esquille.* Same etymon. This term is sometimes applied to a small portion of wood, which occasionally enters the skin, and gives occasion to much irritation until it is removed,—*Aculeus ligneus,* (F.) *Echarde.*

It is also applied to fragments that separate from a fractured or diseased bone.

**SPLITROCK,** *Heuchera cortu'a.*

**SPODIUM GRÆCORUM,** Album græcum.

**SPOLIARIUM,** Apodyterium.

**SPOLIATI'VA,** from spolio, 'I take away.' *Phlebotom'ia spoliati'va,* (F.) *Saignée spoliati'ca.* Blood-letting, used for the purpose of diminishing the mass of blood.

**SPOLIATORIUM,** Apodyterium.

**SPONDYLAL'GIA,** *Spondylodyn'ia,* from σπονδυλος, 'a vertebra,' and αλγος, 'pain.' Pain in the vertebræ. *Caorrhachitis.* See Vertebral Disease.

**SPONDYLARTH'RITIS,** from σπονδυλος, 'a vertebra,' αρθρον, 'a joint,' and *itis*, denoting inflammation. Gouty or rheumatic inflammation of the spinal column.

**SPONDYLARTHRO'FACE,** Vertebral disease.

**SPONDYLI,** Vertebræ.

**SPONDYLIS,** Coccyx.

**SPONDYLITIS**, *Inflammatiō vertebrae*, from *σπονδυλος*, and *itis*, denoting inflammation. Inflammation of the vertebrae.

**SPONDYLIUM**, Coccyx, Heracleum spondylium.

**SPONDYLOCACE**, Vertebral disease.

**SPONDYLODYNIA**, Spondylalgia.

**SPONDYLOPATHIA**, from *σπονδυλος*, 'a vertebra,' and *παθος*, 'a disease.' A disease of the vertebral column.

**SPONDYLOPYOSIS**, Vertebral disease.

**SPONDYLUS**, *σπονδυλος*. A vertebra; and, especially, the two large cervical vertebrae. Also, the vertex.

**SPONGE**, **BASTARD**, Alcyonium.

**SPONGI**. The tumefied glands of the neck.

**SPONGIA**, *Spongos*, *Sphongus*, *Spongia officinalis*, *Spongia Marina*, *Sponge*, (F.) *Éponge*. An organized marine substance, of the great class of Zoophytes, met with in many seas, but especially in the Mediterranean and Arabian. It is supple, elastic, porous, and capable of absorbing fluids in which it may be placed, and of thus increasing in size. It is employed in surgery, for cleansing or washing; for absorbing acrid discharges from ulcers; suppressing hemorrhage when the mouth of the vessel can be compressed by it, and for forming tents for dilating wounds; in which case, the sponge is immersed in melting wax, and cooled before being used. It is then called *Prepared Sponge* or *Sponge Tent*.

**SPONGIA ASSA**, S. Usta.—s. Cynosbati, Bedeggar.

**SPONGIA USTA** seu *ASSA*, *Carbo spongiae*, *Burnt Sponge*, contains carbonate and phosphate of lime, carbonate of soda, charcoal, and iodine. It is used in bronchocele, scrofulous affections, and herpetic eruptions; and its good effects seem to be dependent upon iodine. It is made by cutting sponge into pieces, and heating it, that any extraneous matter may be separated; burning it in a close iron vessel until it becomes black and friable, and, lastly, rubbing it into very fine powder.—Ph. U. S.

**SPONGIÆ LAPIS**. A name given to small friable stones found in sponge. They were formerly esteemed lithontriptic.

**SPONGIOIDES**, Spongoid.

**SPONGIOLE**, *Spongiolum*: from *σπογγιον*, 'a sponge.' The soft succulent extremity of the fibrils or true roots of a plant, by which it absorbs or sucks up fluid. Similar spongioles have been supposed to exist at the terminations of the absorbents in animals.

**SPONGION**. Ancient name of an epithem made of goats' dung: and also of a malagma, which was considered capable of absorbing the serum in dropsies, like a sponge.—Paulus, *Gorræus*.

**SPONGIOSUM** (OS), Ethmoid bone.

**SPONGIOSUS**, Spongoid.

**SPONGOID**, *Spongoides*, *Spongioides*, *Spongioides*, from *σπογγια*, 'sponge,' and *ειδος*, 'resemblance.' Resembling sponge. Of the nature of sponge.

**SPONGOID INFLAMMATION**, *Hæmatodes fungus*.

**SPONGOID TISSUE**, (F.) *Tissu spongiode*. An adventitious spongy tissue, found in cases of rickets.—*Guférin*.

**SPONGOS**, Tonsil.

**SPONSA SOLIS**, *Calendula officinalis*.

**SPONTANEOUS**, *Spontaneus*, from *sponte*,

'voluntarily.' That which occurs of itself, or without any manifest external cause. Evacuations are termed *spontaneous*, which are not produced by medicine. *Spontaneous lassitude* is that which is not the result of fatigue. Diseases are also *spontaneous* which supervene without apparent cause.

**SPONWOOD**, *Kalmia latifolia*, *Tilia*.

**SPORADIC**, *Sporades*, *Sporadici*, *Morbi dispersi*, *Morbi sparsi*, from *σπειρειν*, 'to spread.' Diseases are so called which supervene indifferently in every season and situation, from accidental causes, and independently of any epidemic or contagious influence.

**SPORE**, *Sporule*, *Sporum*, *Sporulum*, from *σπειρω*, 'I sow.' The reproductive body in cryptogamous plants, which is analogous to the seed of phanerogamous plants.

**SPORIDIUM**; same etymon. The reproductive body in algaceous plants, which resembles the spore of other plants.

**SPORULE**, Spore.

**SPORUM**, Spore.

**SPOTS**, **GERMINAL**, see *Molecule*.

**SPOTS**, **RED**, (F.) *Taches rouges*, *Rose spots*. Small red spots which appear in typhoid fever, from the 8th to the 15th day of the disease. They are most frequently seen on the lower and middle portions of the chest, and upper part of the abdomen.

**SPOTS**, **ROSE**, see *Spots*, red.

**SPRAIN**, corrupted from *strain*:—*Subluxatio*, *Distor'tio*, *Dias'trophè*, *Diastrem'ma*, *Luxatio imperfecta*, *Ezarthrè'ma*, *Ezarthro'sis*, *Strem'ma*, *Thlasma Strem'ma*; a *wrench*, (F.) *Ditorse*, *Entorse*, *Foulure*. A violent straining or twisting of the soft parts surrounding the joints. According to the degree of the sprain, the fibrous parts of the joint may be simply stretched, or they may be ruptured. This affection, which has been regarded as incomplete luxation, occurs, particularly, in the ginglymoid joints;—as in the foot, wrist, knee, &c. The violence causes an afflux of blood, the serum of the blood is poured out, and often the blood itself, owing to the rupture of vessels; and inflammation arises, which ends in resolution or induration. Local, antiphlogistic applications are required, with perfect rest; a d, when the inflammatory action has subsided, cold pumping and friction, with the application of a plaster and bandage, will afford support till the parts affected recover their due tone.

**SPRAT**, **YELLOW-BILLED**, *Clupea thrassa*.

**SPRUCE BEER**, *White Spruce Beer*. A beer made as follows. To 10 gallons of water, add 6 pounds of sugar, and 4 oz. of essence of spruce. Add yeast, and bottle, when ready. It is grateful and antiscorbatic.

**SPRUCE BEER POWDERS** may be formed of white sugar, ℥j, and ℥ij; soda subcarb., gr. xxvj; essence of spruce, gr. x, in each blue paper; and acid of tartar, ℥ss in each white paper. For half a pint of water.

**SPUITIO**, Exspuition.

**SPUMA ARGENTI**, *Plumbi oxydum semivitreum*—a. *Cerevisie*, *Yeast*—s. *Trium draconum*, *Antimonium muriatum*.

**SPUMEUX**, Frothy.

**SPUMOSUS**, Frothy.

**SPUNK**, *Boletus ignarius*.

**SPUR**, Sax. *ƿpur*, (F.) *Éperon des Artères*.

The angle at which the arteries leave a cavity or trunk.

SPUR, Ergot.

SPURGE, CAPER, *Euphorbia lathyris*—s. Cypress, *Euphorbia Cyperisias*—s. Flax, *Daphne gnidium*—s. Flowering, large, *Euphorbia corollata*—s. Garden, *Euphorbia lathyris*—s. Greater, *Euphorbia palustris*—s. Ipecacuanha, *Euphorbia ipecacuanha*—s. Laurel, *Daphne laureola*—s. Marsh, *Euphorbia palustris*—s. Olive, *Cneorum tricoccum*—s. Olive, *Daphne mezereum*—s. Sea, *Euphorbia paralias*.

SPUTAMEN, Saliva, Sputum.

SPUTAMENTUM, Saliva, Sputum.

SPUTATIO, Exspuition.

SPUTUM, *Apochrem'ma*, *Chrem'ma*, *Emp'tys'ma*, *Sputa'men*, *Pty'olon*, *Py'tis'ma*, *Spit*, from *spiere*, *sputum*, 'to spit.' (F.) *Crachat*. The secretions ejected from the mouth in the act of spitting. It is composed of saliva, and of the mucus secreted by the mucous membrane of the nasal fossæ and fauces, and often by the membrane of the larynx and bronchia. The sputa are, sometimes, called *eruginous*, when of a greenish-yellow colour; *gummy*, when they resemble a thick solution of gum; *frothy*, (F.) *mousseux*, when covered with froth; *rubiginous*, (F.) *rubiginoux* ou *rouillés*, when of a reddish-yellow; and *streaked*, (F.) *striés*, when mixed with lines of blood. Also, saliva.

SPUTUM CRUENTUM, Hæmoptysis—s. Dulce, *Saccharorrhœa pulmonalis*—s. Oris, Salivation—s. Saccharatum, *Saccharorrhœa pulmonalis*—s. Sanguinis, Hæmoptysis.

SQUALLING, Vagitus.

SQUAMA, Scale, Table.

SQUAMÆ, Scaly diseases.

SQUAMARIA, Plumbago Europæa.

SQUAMEUX, Squamous.

SQUAMIFORMIS, Squamous.

SQUAMOUS, *Squamo'sus*, *Lepidoï'des*, *Lepido'des*, *Squami'for'mis*, *Scaly*; from *squama*, 'a scale.' That which relates to or resembles a scale.

SQUAMOUS PORTION of the temporal bone, (F.) *Portion Squameuse* ou *écailleuse du Temporal*, is the upper part of the temporal, so called from a fancied resemblance to a scale.

SQUAMOUS SUTURE, *Sutu'ra squamo'sa*, *S. mendo'sa* seu *lepidoi'des seu lepidoi'des*, *Sutu'ra cra'nii squamo'sa*, (F.) *Suture squameuse* ou *écailleuse*. The suture which unites the squamous portion of the temporal bone to the parietal.

Certain scaly cutaneous affections are also called *squamous*, (F.) *squameux*. See Scale.

SQUARE STALK, *Monarda coccinea*.

SQUAW-MINT, *Hedeoma*.

SQUAW-ROOT, *Actæa racemosa*, Caulophyllum thalictroides.

SQUAW-WEED, *Erigeron Philadelphicum*.

SQUELETTE, Skeleton.

SQUELETTOLOGIE, Skeletology.

SQUILL, *Scilla*—s. Vinegar of, *Acetum scillæ*.

SQUILLA, *Scilla*.

SQUINANÇIE, *Cynanche*, *Cynanche tonsillaris*.

SQUINANCY, COMMON, *Cynanche tonsillaris*.

SQUINANTHIA, *Cynanche*.

SQUINANTHUS, *Juncus odoratus*.

SQUINE, *Smilax China*.

SQUINSY, *Cynanche tonsillaris*.

SQUINTER, see *Strabismus*.

SQUINTING, *Strabismus*.

SQUIRRE, *Scirrhus*.

SQUIRROGASTRIÆ, *Scirrhogastria*.

SQUIRRUS, *Scirrhus*.

STACHELBERG, MINERAL WATERS

OF. Stachelberg Springs are far down in the valley of the Linth, in Switzerland. The waters are sulphureous, and are much visited by gouty and rheumatic invalids.

STACHYS FËTIDA, *Galeopsis*.

STACTE, *Myrrha*.

STADE, Stage.

STADIUM, Period, Stage.

STADIUM ANNIHILATIO'NIS seu CONVALESCEN'TIÆ. The period of recovery from disease.

STADIUM AUGMENTI seu INCREMENTI MORBI. The period or stage of increase of a disease.

STADIUM CALORIS, Stage, (hot)—s. *Convalescentiæ*, S. *annihilationis*.

STADIUM DECREMENTI. The period or stage of decrease of a disease.

STADIUM FRIGORIS, Stage, (cold)—s. *Incrementi Morbi*, S. *Augmenti morbi*.

STAFF, (D.) *Staf*. An instrument of great importance in lithotomy, —being the director for the gorget or knife. It is made of steel; and the handle is flat and rough, in order that it may be more securely held. The groove is on its convex surface.

STAFFA, Stapes.

STAG'S PIZZLE, see *Cervus*.

STAGE, *Stadium*, (F.) *Estage*, *Etage*, *Stade*. The period or degree of a disease; especially the period of an intermittent:—as the *cold stage*,—*stadium frigoris*,—*hot stage*, &c.

STAGGERWEED, *Delphinium*.

STAGIUM. The sixth part of an ounce.

STAGMA, from *σταγειν*, 'I distil;' *Stalagma*. Any distilled liquid or liquor.

STAGMA, Gutta.

STAGNATION, *Stagna'tio*, from *stagnare*, 'to form a pond.' Accumulation and retardation of fluids in any part of the body.

STAGNUM CHYLI, *Receptaculum chyli*.

STAHLIAN. One who follows the doctrine of Stahl.

STAHLIANISM. The doctrine of Stahl, which considered every vital action under the direction and presidency of the soul. See *Animus*.

STALAGMA, *Stagma*.

STALAGMITIS CAMBOGIOIDES, see *Cambogia*.

STALAGMOS, *Distillation*.

STALTIUS, *Incarناس*.

STAMMERING, *Balbuties*—s. of the Fingers, *Cramp*, *writers'*.

STANGOS, *Tin*.

STANNI MURIAS, *Tin*, *muriate of*—s. *Oxyduli murias*, *Tin*, *muriate of*.

STANNIOLUM, *Tinfoil*.

STANNUM, *Tin*—s. *Foliatum*, *Tinfoil*—s. *Indicum*, *Zincum*.

STAPEDIEN, *Stapedius*.

STAPEDIUS, *Stapes*, (F.) *Stapédien*, *Pyramidal-stapédien*. A muscle of the middle ear, which draws the stapes obliquely upwards.

STAPES, *Stapha*, *Staffa*, 'a stirrup.' (F.) *Etrier*. The innermost of the small bones of the ear, so called because it resembles a stirrup. It is situate horizontally in the cavity of the tympanum. Its head, which is directed outwards, is articulated with the os orbiculare.

Its base faces inwards, and is applied to the fenestra ovalis, which it closes imperfectly, and to the membrane of which it is united. Its branches are one anterior, and the other posterior. They are curved; and the space between them is parabolic. Surgeons have given the name *Stapes* to a bandage used in bleeding from the foot; which forms a figure of 8 around the ankles.

STAPHA, *Stapes*.

STAPHIS, Delphinium staphisagria.

STAPHISAGRIA, Delphinium staphisagria.

STAPHISAIGRE, Delphinium staphisagria.

STAPHYLÆMATOMA, from *σταφυλή*, 'the uvula,' and *Hæmatoma*. A tumour formed by effusion of blood beneath the mucous membrane of the uvula.

STAPHYLAGRA, *Staphylepartes*.

STAPHYLE, *Uvula*, see *Vitis vinifera*.

STAPHYLEPARTES, from *σταφυλή*, 'the uvula,' and *πείσις*, 'I lift up; *Staphylagra*. An instrument for laying hold of, and removing the uvula.—Paulus.

STAPHYLINI, see *Azygos muscle*—s. *Medii*, see *Azygos muscle*.

STAPHYLINO-PHARYNGEUS, *Palatopharyngeus*.

STAPHYLINUS EXTERNUS, *Circumflexus*.

STAPHYLIS, *Nipple*.

STAPHYLITIS, *Uvulitis*.

STAPHYLIIUM, *Nipple*.

STAPHYLODIALYSIS, *Cionis*, *Staphylædema*.

STAPHYLÆDEMA, *Angi'na uvularis*, *Dysph'gia uvulo'sa*, *Hypostaph'ylit*, *Hypostaphylit'is*, *Staphylo'dial'ysis*, *Prolapsus seu Prop'tis uvulæ*, *Casus Uvulæ*, *Himas*, *Himantoma*, *Himantosis*, *Staphylo'n'eus*, *Staphylo'n'cia*, *Cedema uvulæ*, *Productio uvulæ à pituitâ*, *Uvula decidua seu relaxata*, *Cras'pedon*. Relaxation and tumefaction of the uvula, which, either from inflammation or infiltration, hangs down so as to occasion difficult deglutition, cough, &c. Scarification, astringent gargles, and, if necessary, excision, constitute the treatment.

STAPHYLOMA, from *σταφυλή*, 'a grape.' *Uva'io*, *Myoceph'alon*, *Myioceph'alum*, *Parop'nis Staphylo'ma*, *Staphylo'sis*, *Polygro'ma*. A name given to different tumours of the anterior surface of the globe of the eye.

STAPHYLOMA CONICUM, *Staphyloma of the cornea*—s. *Pellucidum conicum*, *Staphyloma of the cornea*.

STAPHYLOMA OF THE CORNEA, *Sugar-loaf Cornea*, *Con'ical Cornea*, *Con'ical hydrophthal'mia*, *Staphylo'ma con'icum*, *S. pellu'idum con'icum*, *Conophthal'mia*, *Prolap'sus cor'næ*, *Ceraton'eus*, *Hypercerato'sis*, *Hypercer'asis*, is an unequal, embossed, bluish or whitish, round or conical tumour; of variable size; formed by the projection of the transparent cornea, which is sometimes extenuated and distended, at others thickened.

STAPHYLOMA OF THE IRIS is the disease described by Scarpa under the name *Procidencia Iridis*. It is hernia of the iris, through an accidental opening of the cornea. Also, *iridæuxesis*.

STAPHYLOMA OF THE SCLEROTIC differs from the last, in the prominence existing on a part

of the eye covered by the sclerotic, which is much thinner.

STAPHYLOMA UVEÆ, *Iridæuxesis*.

STAPHYLONCIA, *Staphylædema*.

STAPHYLONCUS, *Staphylædema*.

STAPHYLOPLAS'TIC, *Staphyloplas'tiens*, from *σταφυλή*, 'the uvula,' and *πλασσει*, 'I form.' An epithet applied to the operation for replacing the soft palate, when it has been lost.

STAPHYLOR'RAPHY, *Velosynth'esis*, *Staphylorrrha'phia*, *Kionorrrha'phia*, *Cionorrrhaph'ia*, *Uranor'rhapht*, *Uranorrrha'phia*, *Uramis'corrrhaph'ia*, *Uranis'cor'rhapht*, from *σταφυλή*, 'the uvula,' and *ραφή*, 'a suture.' The operation for uniting a cleft palate. It consists in paring the edges of the cleft; passing ligatures through them, and bringing them together.

STAPHYLOSIS, *Staphyloma*.

STAPHYLOT'OMY, *Staphylo'tomia*, from *σταφυλή*, 'the uvula,' and *τομή*, 'incision.' Amputation of the uvula.

STAR-APPLE, BROAD-LEAVED, *Chrysophyllum cainito*—s. *Blazing*, *Aletris farinosa*—s. *Bloom*, *Spigelia Marilandica*—s. *Grass*, *Aletris farinosa*—s. *Knap-weed*, *Centaurea calcitrappa*—s. *Stroke*, *Coup-de-soleil*—s. *Wort*, *Aletris farinosa*—s. *Wort*, *golden*, *Bubonium*.

STARBECK SPA. A chalybeate spring at Harrowgate.

STARCH, *Amylum*—s. *Blue*, *Smalt*—s. *Iodide of*, see *Iodine*—s. *Potato*, see *Solanum tuberosum*.

STARKEY'S PILLS, see *Pilulæ ex helleboro et myrrhâ*.

STASE, *Stasis*.

STASIS, *στάσις*, from *σταω*, 'I stop.' (F.) *Stasis*. This word has nearly the same signification as *stagnation*. Stagnation, however, sometimes includes a morbid condition of the fluids,—*Stasis never*.

STASIS, *Station*.

STATIC. An epithet applied to the physical phenomenon presented by organized bodies in contradistinction to the organic or vital.

STATICA SEPTINA'RIUM, *Appen'dic'cutanea septina'rium*. The cutaneous appendage to the septum narium.

STATICE CAROLINIANA of the United States, *American Thrift*, *Marsh Rose'mary*, *Marsh Root*, *Seaside thrift*, *Inkroot*, *Sea Lavender*, is considered to be a mere variety of the static limonium.

STATICE LIMO'NIUM, *Behen rubrum*, *Limo'nium*, *L. majus*, *Behen*, *Sea Lav'ender*, *Red Behen*, *Behen'n Ackmar*, *Marsh Rosemary*, *Lavender Thrift*, (F.) *Behen rouge*. Family, *Plumbaginæ*. See *Syst. Pentandria Pentagynia*. The roots have been esteemed astringent, tonic, and eminently antiseptic.

STATION, *Statio*, *Stasis*, *Status*; from *stare*, 'to stand.' The act of standing.

STATIONARY, *Stationarius*, from *stare*, 'to stand.' A name given by Sydenham and Stoll to certain diseases, which depend upon a particular state of the atmosphere; and which prevail in a district for a certain number of years, and then give way to others.

STATISTICS, MEDICAL, *Vital Statistics*, (F.) *Statistique médicale*. That part of medicine which relates to the detail of facts connected with the mortality, salubrity, &c. of different countries and situations.

It has also been used in a wider sense to signify the same as *Numerical method*, (F.) *Méthode numérique*; which is applied to the systemization of medical facts, or to the use of numbers in the investigation of disease.

STATISTICS, VITAL, Statistics, medical.

STATURE, *Staturā, Mēg'athos, Magnitudo corporis*. The height of the human figure. The following table exhibits the results of several admeasurements, with the heights of some of the monkey species, on the authority of Mr. Lawrence.

	Stature.	Feet.	In.
An Englishman, - - - -	}	6	4½
		to	
	}	5	00
An Englishwoman, - - - -		5	4
	}	5	00
European male skeleton, - - - -		5	8

Mr. White's Monkey, - - - -		2	2

STATUS, Acme—s. Cruditatis, Crudity—s. Erethiticus, Nervous diathesis—s. Gastricus, *Embarras gastricus*—s. Nervosus, Nervous diathesis—s. Sthenicus, Sthenia—s. Verminosus, Helminthiasis.

STAVESACRE, Delphinium staphisagria.

STAXIS, *Apostax'is*. A slight epistaxis or nasal hemorrhage.—Hippocrates.

STEAR, Pinguedo, Sebum.

STEARIN, see Pinguedo.

STEARRHE'ŒA, *Statorrhœa'a, Smegmatorrhœa, Smegmorrhœa, Sebœacous Flux*, from *στέαρ*, 'suet,' and *ῥεω*, 'I flow.' Augmentation of secretion from the sebaceous follicles of the skin.

STEATITES, Polysarcia.

STEA TOCE'LE, from *στέαρ*, 'suet,' and *κύμα*, 'a tumour.' A tumour formed by a collection of steatomatous matter in the scrotum.

STEATO'MA, *Tumor lar'deus*, from *στέαρ*, 'suet;' *Seva'tio, Stato'sis, Emphy'ma encystis steatoma*. An encysted tumour, whose contents are similar to fat.

STEATOP'YGA, from *στέαρ*, 'fat,' and *πυγή*, 'buttocks.' Fat buttocks; such as exist in the Hottentot females.

STEATORRHŒA, Stearrhœa.

STEATO'SIS, Steatoma.

STEATO'SIS CORDIS, *Degenera'tio adipo'sa cordis, Cardiethmolipo'sis and Cardiomyolipo'sis*, (Piorry), *Fatty heart*. Unusual deposition of fat on the heart:—by some presumed to be occasionally a true adipous degeneration of the substance of the heart, which is probably incorrect.

STEATOZOON FOLLICULORUM, Aca-rus Folliculorum.

STEEL, Chalybs.

STEEPLE-BUSH, *Spiræa tomentosa*.

STEER'S OPODELDOCH, see Opodeldoch, Steer's.

STEGANOP'ODES, *στυγανόπους, Planig'odes*. They who have flat feet, or are web-footed, from *στυγανός*, 'covered,' and *πούς*, 'foot.'

STEGNO'SIS, *Steno'sis, Constipa'tio, Stipa'tio, Condensa'tio, Obstruc'tio*, from *στεγνός*, 'I constrict.' Constriction or narrowness of the pores and vessels. Stricture. Constipation. Suppression of the evacuations.

STEGNOTICA, Astringents.

STEIROSIS, Sterilitas.

STELENGIS, Stridor dentium.

STELLA, *Fascia stella'ta*, (F.) *Étoile*. A bandage, improperly compared to a star, because it is crossed like the letter X. This bandage is applied upon one or both shoulders. In the first case, it is called *simple*; in the second, *double*. It was employed in cases of fractures of the sternum, clavicle, and scapula; in luxations of the humerus, &c.

STELLA TERREÆ, *Plantago coronopus*.

STELLATA RUPINA, Centaurea calcitrapa.

STELOCHITIS, Osteocolla.

STENAGMUS, Suspirium.

STENAXIS, Suspirium.

STENIA, Sthenia.

STENICUS, Active.

STENOBREGMATE, see Cranium.

STENOCARDIA, Angina pectoris.

STENOCHO'RIA, *Stenochori'asis*. Angustia. Employed by some for contraction of the vagina.

STENOCHORIA INTESTINI RECTI, Stricture of the rectum—s. *Œsophagi, Dysphagia contracta*.

STENOMYCTE'RIA; from *στέαρ*, 'narrow,' and *μυκτηρ*, 'nose.' Contraction of the nasal passages.

STENOSIS, Stegnosis.

STENOSTEGNOSIS, Stenostenosis.

STENOSTENO'SIS, *Stenostegno'sis*; from *Steno*, and *στενωσις*, 'contraction.' *Obstruc'tio ductus Stenoni'ans*; narrowness or contraction of the Duct of Steno.

STENOSTO'MIA; from *στενός*, 'narrow,' and *στόμα*, 'mouth.' Contraction of the mouth.

STENOTHORAC'ES, from *στενός*, 'narrow,' and *θώραξ*, 'the chest.' They who have narrow chests.

STENTOROPHONUS, from *Στεντορ*, *Stentor*, a Greek in the army before Troy; and *φωνή*, 'voice.' One who has a strong voice.

STEPHANE, Crown.

STEPHENS, MRS., REMEDY FOR THE STONE. This consisted of lime, prepared by calcining the shells of eggs and snails, made into pills with soap. A decoction was, also, administered, consisting of chamomile, fennel, parsley, and burdock, with a portion of Alicant soap. Its virtues were dependent upon the lime and the tonic properties of the decoction. Hales, Hartley, Kirkpatrick, Lobb, and others, wrote in favour of this nostrum; and it was ultimately bought by the British parliament for £5000.

STERA, Uterus.

STERCORACEOUS, *Stercora'rius, Diacho-ret'icus, Ster'coral*, from *stercus*, 'dung.' *Fœcal*, (F.) *Stercoraire, Stercoral*.

The French use the term *Fistules stercoraires*

for those which are kept up by the constant passage of fecal or *stercora/cæous matter*. The name *Stercoraires* is sometimes given, in derision, to those physicians, who are fond of purging their patients: à *posteriori* has been similarly used.

**STERCORAIRE**, Stercoraceous.

**STERCUS**, Excrement, *Fimus*—s. *Anseris*, *Fimus anseris*—s. *Caninum album*, *Album Græcum*—s. *Diaboli*, *Asafœtida*—s. *Equi non castrati*, *Fimus*.

**STERCUS HUMA'NUM**, *Homerda*. Human excrement.

**STERCUS LACERTÆ**, *Crocodylia*.

**STEREOCYST'IS**, from *στερεος*, 'hard,' and *κυστις*, 'cyst.' A hard steatoma.

**STEREOS**, Solid.

**STEREOT'ICA**, from *στερεος*, 'hard.' Fortuitous lesions or deformities affecting the hard parts. The 2d order, class *Tychica* of Good.

**STERILE**, *Ster'ilis*, *Agonos*, *Aph'orus*, *Aphor'icus*, *Abla'stes*, *Infecun'dus*, (F.) *Ster'ile*. Same etymons *Sterilitas*. Not producing fruit: infecund.

**STERILIS**, *Ster'ile*.

**STERILITAS**, *Agon'ia*, *Steiro'sis*, *Stiro'sis*, *Agenna'sia*, *Agenna'sia*, *Infecun'ditas*, *Steril'ity*, *Acys'sis*, *Bar'renness*, *Infecun'dity*, *Aph'oria*, *Atoc'nia*, *Atoc'ia*, from *στερος*, or *στερεος*, 'hard, barren.' Quality of that which is barren. Sterility may be *absolute* or *relative*. The former depends upon some vitious conformation of the genital organs, apparent or concealed, and occasionally admits of cure. Sterility is *relative* when a female does not conceive with one individual, but does with another. Sterility in females is often dependent upon a condition of the uterus characterized by membranous menstruation.

**STERNALGIA**, *Angina pectoris*.

**STERNO-CLAVIC'ULAR**, *Sterno-clavicular'is*. That which relates to the sternum and clavicle.

**STERNO-CLAVIC'ULAR ARTICULATION** is the union of the inner extremity of the clavicle with a round facette at each side of the superior extremity of the sternum. In this articulation there are, besides the incrusting cartilages, two radiated *sterno-clavicular*, (F.) *Sterno-clavicular'es rayonnées*; one anterior, and one posterior—an *inter-clavicular ligament*, extending between the two clavicles, and two synovial capsules, separated by an *inter-articular fibro-cartilage*. The *costo-clavicular ligament* may also be considered to belong to this articulation.

**STERNO-CLAVIO-MASTOÏDIEN**, *Sterno-cleido-mastoideus*—s. *Cleido-hyoideus*, *Sterno-hyoideus*.

**STERNO-CLEIDO-BRACHIALIS**, *Pectoralis major*.

**STERNO-CLEIDO-MASTOÏDEUS**, *Sterno-mastoideus*, *Cleido-mastoideus*, *Mastoideus*, *Mastoideus anterior*, *Nuta'or cap'itis*; (F.) *Sterno-clavio-mastoïdien*, *Sterno-mastoidien*; from *στερον*, 'the sternum,' *κλις*, 'the clavicle,' and *μαστοεις*, 'the mastoid process.' A muscle situate at the anterior and lateral part of the neck. It is long and flattened: simple, above; and divided into two portions below; where it is inserted into the anterior and superior part of the sternum, and the inner quarter of the clavicle. Above, it terminates at the mastoid process, which it embraces, at the neigh-

bouring part of the temporal bone, and at the outer third of the upper curved line of the occipital bone. It carries the head forward; inclines, and rotates it to one side. When both contract, they bend the head directly forwards.

**STERNO-COSTAL**, *Triangularis sterni*—s. *Costo-clavio-humeral*, *Pectoralis major*—s. *Humeral*, *Pectoralis major*.

**STERNO-HYOÏDEUS**, *Sterno-cleido-hyoïdeus*, *Sterno-hyoïdes*, *Hyoïdes primus*: from *στερον*, 'the sternum,' and *υοιδης*, 'the os hyoides.' A muscle situate at the anterior part of the neck; inserted, above, at the inferior edge of the body of the hyoid bone; below, into the upper part of the posterior surface of the sternum;—at the posterior part of the sterno-clavicular articulation, and sometimes into the cartilage of the first rib. It depresses the os hyoides.

**STERNO-MASTOÏDIEN**, *Sterno-cleido-mastoideus*—s. *Pubien*, *Rectus abdominis*.

**STERNO-THYROÏDEUS**, *Sterno thyroïdes*, *Bron'chus*. A muscle, situate at the anterior part of the neck. It is attached, above, to the oblique line seen on the outer surface of the thyroid cartilage; and terminates, below, at the upper part of the posterior surface of the sternum, and the cartilage of the second rib. When it contracts, it depresses the thyroid cartilage and os hyoides, by the medium of the thyroid membrane.

**STERNODYNIA SYNCOPALIS**, *Angina pectoris*—s. *Synoptica* et *Palpitans*, *Angina pectoris*.

**STERNUM**, *Sternon*, from *στερεος*, 'solid,' *Pectus*, *Os asser* seu *pectoris* seu *xiphoides* seu *gladi'oli* seu *ensiforme*, *Scutum cordis*, *Breast Bone*. An azygous symmetrical bone, situate at the forepart of the chest. It is flat; broad above; narrower in the middle; and terminates, below, by a pointed cartilage—the xiphoid. It has an *anterior* or *cutaneous surface*, a *posterior* or *mediastinal*—a *superior* or *clavicular extremity*, and an *inferior* or *abdominal*. It is articulated with the clavicles and the seven upper ribs on each side, by means of their cartilages. According to Béclard, it is formed of six principal bones, which he names, from their position, 1. *Primi-sternal* or *clavi-sternal*: 2. *Duo-sternal*: 3. *Tri-sternal*: 4. *Quarti-sternal*: 5. *Quinti-sternal*: 6. *Ultimi-sternal* or *ensi-sternal*.

**STERNUMENTUM**, Sneezing.

**STERNUTAMENTORIA**, *Achillea ptarmica*.

**STERNUTAMENTUM**, Sneezing.

**STERNUTATIO**, Sneezing.

**STERNUTATOIRE**, *Sternutatory*.

**STERNUTATORY**, *Sternutato'rius*, from *sternutare*, 'to sneeze.' *Sternutamens'ium*, *Erri'num*, *Ptar'micum*, *Anarri'num*, (F.) *Sternutatoire*. A substance which provokes sneezing;—as tobacco, &c.—See *Errhine*.

**STERTEUR**, *Stertor*.

**STERTOR**, *Ronchus* or *Rhonchus*, *Renchus*, *Rhencus*, (F.) *Stertor*, *Ronflement*, from *stertere*, 'to snore.' The deep snoring which accompanies inspiration in some diseases, particularly in apoplexy. Such respiration is said to be *stertorous*; *Respiratio stertuo'sa* seu *stertens seu stertoro'sa*.

**STETHÆMIA**, *Hyperæmia Pulmo'num* seu *Pedtoris*, *Congestio Pulmonum* seu *Pectoris*,

(F.) *Hyperæmia des Poumons, Congestion des Poumons.* Hyperæmia of the lungs. Congestion or accumulation of blood in the pulmonary vessels.

STETHOCATHARSIS, Expectoration.

STETHOCHYSIS, Hydrothorax.

STETHODESMIS, Corset.

STETHODESMIUM, Corset.

STETHODESMUS, Corset.

STETHORRHEUMA, Pleurodynia.

STETHOSCOPE, *Stethoscopium, Stethoscopum, Echoscopium, Psophometer, Thoracoscopium*, from *σθῆστις*, 'the chest,' and *σκοπεῖν*, 'I examine.' An instrument invented by Laënnec, of Paris, for exploring the chest. The stethoscope, sometimes called *Pectoriloquo*, is a cylinder of wood, from four inches to a foot long; pierced through and through by a longitudinal canal about a quarter of an inch in diameter. The longer are generally composed of two portions, that fit together by means of a screw, one of which is hollowed at the extremity, in the shape of a funnel. These two portions being screwed to each other, the physician lays hold of the instrument, as he would of a pen, puts the funnel-shaped extremity on the chest of the patient, and applies his ear to the other. To explore the pulsations of the heart, the funnel is plugged up by a piece of the same kind of wood accurately adapted to it, and pierced by a canal of the same width as that in the body of the instrument. Stethoscopes are sometimes flexible, like the flexible ear-trumpet.

This mode of examining affections of the chest, *Stethoscopy, Stethoscopia*, &c., is what Laënnec terms *Auscultation médiate, Médiate Auscultation*.

STETHOSCOPIA, see Auscultation, and Stethoscope.

STETHUS, Thorax.

STEW, Stove.

STHENIA, *Steni'a, Diath'esis sthen'ica, Status sthen'icus, Vis aucta*, from *σθενειν*, 'strength,' 'power.' Excess of strength; excitement of the organic actions. A word used, especially by the Brunonians, as well as *Asthénia*,—its antitheton. *Sthenic or dynamic diseases* are such as depend upon excessive excitement.

STHENICUS, Aetive.

STHENOPYRA, Synocha.

STIBI, Antimonium.

STIBIALIS, Antimonial.

STIBIATUS TARTRIS LIXIVIÆ, Antimonium tartarizatum.

STIBII BUTYRUM, Antimonium muriatum—s. Deuto-murias sublimatum, Antimonium muriatum—s. et Potassæ deuto-tartras, Antimonium tartarizatum—s. Hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Oxidum acido muriatico oxygenato paratum, Algaroth—s. Oxidum album mediante nitro confectum, Antimonium diaphoreticum—s. Oxidum præcipitando paratum, Algaroth—s. Oxodes album, Antimonium diaphoreticum—s. Oxodes sulphuretum, Antimonii sulphuretum præcipitatum—s. Oxydi sulphurati hydro-sulphuretum luteum, Antimonii sulphuretum præcipitatum—s. Oxydulati sulphuretum, Antimonii sulphuretum præcipitatum—s. Oxydulum vitreatum, Antimonii vitrum—s. Oxydum semivitreatum, Antimonii vitrum—s. Oxydum sulphuratum, Oxydum stibii sulphuratum—s. Subhydrosulphæ, Antimonii sulphuretum rubrum—s. Sub-

murias præcipitando paratum, Algaroth—s. Sulphurati hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Sulphuretum nigrum, Antimonium—s. Vitrum, Antimonii vitrum.

STIBIOSUM HYDROSULPHURETUM CUM SULPHURE, Antimonii sulphuretum præcipitatum—s. Oxidum, Antimonium diaphoreticum.

STIBIUM, Antimonium.

STICHAS ARABICA, Lavendula stæchas.

STICKWORT, Agrimony.

STICTA PULMONACEA, Lichen pulmonarius.

STIFF JOINT, MUSCULAR, Contractura.

STIFF JOINTS, Milk sickness.

STIFFNECK, Torticollis.

STIGMA, Cicatricula.

STIGMATA, see Nævus.

STIGMATA OVARIO'RUM, *Cicatrices Ovariorum*. The cicatrices left in the ovary after the escape of ova.

STILBOMA, Cosmetic.

STILLA, Gutta.

STILLATIO SANGUINIS E NARIBUS, Epistaxis.

STILLICIDIUM, *Substil'ium*, from *stillare*, 'to drop.' This term is often used synonymously with *Strangury*. It means the flow of any fluid—particularly the urine—drop by drop. Also a kind of embrocation, *Stillicidium supra partem*, effected by dropping a liquid upon a part.

STILLICIDIUM LACHRYMARUM, Epiphora—s. Narium, Coryza—s. Sanguinis e naribus, Epistaxis—s. Supra partem, see Stillicidium.

STILLIN'GIA, *S. sylvat'iana, Queen's Root, Queen's delight, Yaw root, Mar'cory, Cockey hat*. An indigenous plant, which grows in pine barrens, from Virginia to Florida. *See Syst. Monœcia Monadelphica. Nat. Ord. Euphorbiacæ*. The root is said to be used in syphilis, obstinate cutaneous affections, &c., like sarsaparilla.

STIMATOSIS, *Stymatoris, Hamorrhægia Penis, Stymatorrhæ'gia, Phallorrhæ'gia, Conlorrhæ'gia*, from *στυμα*, 'priapism,' itself from *στυειν*, 'to erect.' Hemorrhage from the male organ, accompanied or not with priapism.

STIMMI, Antimonium.

STIMULANT, *Stim'ulans, Excitans, Excitant, In'citant, Incentivum, Irritant, Incitant*, from *stimulare*, 'to goad.' A medicine which has the power of exciting the organic action of the different systems of the economy. Some stimulants are *diffusible*,—that is, have a prompt but temporary action; others are *permanent or persistent*. The action of stimulants is called *Stimulation, Stimula'tio, Incita'tio*.

The chief stimulants are the following:—Æther Sulphuricus, Ammonia, Aasafetida, Brucia, Camphora, Capaicum, Castoreum, Cinnamonum, Copaiba, Cubeba, Guaiacum, Hydragryi Præparata, Iodinum, Nux Vomica, Olea Essentialia, Opium (in small dose), Piper, Sinapis, Strychnia, Zingiber,—Alcohol, Caloric, Electricity, Mental Emotions, (the Impetuous.)

STIMULUS, 'a goad.' *Incitamentum, Irricamentum, Irritantum, Potentia Irritantum*. Any thing which excites the animal economy.

STINK POKE, *Dracontium setidum*—s. Weed, Chenopodium anthelminticum, Datura stramonium, Polanisia graveolens.

STIPATIO, Stegnoxis.

STIPATIO TELÆ CELLULOSÆ INFANTUM. In-  
duration of the cellular tissue of children.

STIROSI8, Sterilitas.

STITCH, Pleurodynia—s. Common, Suture,  
common—s. Royal, Suture, common—s. in the  
Side, Pleurodynia.

STIZOLOBIUM, Dolichos pruriens.

STLENGIS, Stridor dentium.

STOCHEION, Element.

STOCKING, LACED, (F.) *Bas lassé*. A  
bandage used by surgeons, which consists of a  
stocking made of firm cloth or dog-skin, admit-  
ting of being tightly laced anteriorly. It is  
employed in varices and ulcers of the legs.

STOCHAS ARABICA, *Lavendula stœchas*.

STOMA, Mouth.

STOMAC'ACÆ, *Stomatoc'acæ, Stomal'gia,*  
*Labriul'cium, Cheiloc'acæ, Uloc'acæ, Cheiloma-*  
*la'cia, Stomatono'ma, Stomatoneuro'sis,* from  
*στομα,* 'the mouth,' and *αχος,* 'evil.' *Cancer*  
*Oris, Cancer.* Factor of the mouth with a  
bloody discharge from the gums. (F.) *Cancer*  
*aquatiquus;* see *Cancer Aquaticus*. Also,  
*Scurvy*.

STOMACACÆ, *Porphyra nautica*—s. Gangræ-  
nosum, *Cancer aquaticus*—s. *Universale, Pur-*  
*pura hæmorrhagica.*

STOMACAL, Stomachal.

STOMACALGIA, Cardialgia.

STOMACH, *Stom'achus, Ventric'ulus, Ne-*  
*dys, Anaca'lia, Gaster,* (F.) *Eestomac,* from  
*στομα,* 'a mouth.' One of the principal organs  
of digestion. It is a musculo-membranous re-  
servoir; continuous, on the one side, with the  
œsophagus; on the other, with the duodenum.  
It is situate beneath the diaphragm, between the  
liver and the spleen; and occupies the epigas-  
trium and a part of the left hypochondrium.  
In it the food is converted into chyme. When  
viewed externally, the stomach has, 1. An an-  
terior face, which looks a little upwards. 2.  
An inferior face, directed downwards. 3. An  
inferior or colic margin, which is convex and  
extensive, and is called the *greater curvature,*  
(F.) *Grand courbure.* It gives origin to the  
omentum majus. 4. A superior or diaphrag-  
matic margin, which is shorter, concave, and is  
called the *lesser curvature,* (F.) *Petit courbure.*  
The lesser omentum is attached to this. 5. A  
left or œsophageal orifice, called, also, the car-  
dia, *Os ventric'uli* or *upper orifice.* 6. A right  
or intestinal, or inferior orifice, called the *py-*  
*lorus.* 7. A considerable dilatation, situate to  
the left of the cardia and greater curvature—  
the *great tuberosity of the stomach;* and, 8. A  
less extensive dilatation, situate to the right of  
the greater curvature,—the *lesser tuberosity* or  
*lesser cul-de-sac, Antrum Pylori.* The inner  
surface of the stomach is of a reddish-white  
colour, and has a marbled appearance. It is  
constantly covered by thick mucus, and is  
lined by a mucous membrane, which presents  
numerous wrinkles. The parietes of the stom-  
ach consist of three membranes in superpo-  
sition. The outermost is serous: and is an ex-  
tension of the peritoneum; the middle coat is  
*muscular,*—some of its fibres running longi-  
tudinally; others, transversely: the innermost  
membrane is of a mucous nature, *Crusta villosa*  
*ventric'uli, Gastro-mycod'eri8,* but not exactly  
a continuation of the membrane that lines the  
œsophagus. The mucous and muscular mem-  
branes form, at the pylorus, a valve, called

the *Pyloric valve.* These three coats are united  
by a dense, close, cellular membrane; and, be-  
tween the mucous and muscular coats, along  
the two curvatures especially, is a quantity of  
muciparous glands, called *Glands of Brunner.*  
The arteries of the stomach are very numerous,  
and proceed from the coronaria ventriculi, the  
pyloric, splenic, and right and left gastro-epi-  
piloic. The veins have the same name, and pur-  
sue the same course as the arteries. They pour  
their blood into the trunk of the vena porta.  
Its lymphatic vessels are very numerous, and  
pass into ganglia, situate along the two curva-  
tures. The nerves of the stomach proceed from  
the pneumogastric, and three divisions of the  
œliac plexus.

STOMACH DISEASE, Limosis.

STOMACH PUMP, *Gastron'chyma, Antli'a gas-*  
*trica.* A useful instrument for conveying fluids  
to the stomach, when deglutition is imprac-  
ticable, and for pumping up the contents of the  
stomach. It consists of a forcing syringe, to  
the bottom and nozzle of which flexible tubes  
can be attached. When the object is to force  
fluids into the stomach, the stomach-tube must  
be attached to the nozzle, and passed down the  
throat,—the tube connected with the bottom  
of the syringe being placed in the fluid to be in-  
jected. To empty the stomach, the stomach-  
tube must be attached to the bottom of the in-  
strument. This instrument has been of great  
service where poisons have been taken. The  
antidote, when any exists, and is at hand should  
be administered immediately prior to its use.

The stomach pump was first employed in  
America by Dr. Physick, in the year 1812.

STOMACH, SICK, Milk sickness—s. Tube, see  
Tube, œsophageal.

STOM'ACHAL, *Stomach'ic, Cardi'acus, Sto-*  
*mach'icus, Stomacha'lis, Visceratis,* (F.) *Sto-*  
*macal, Stomachic.* That which belongs to  
the stomach; that which is good for the stom-  
ach; which strengthens the stomach. A me-  
dicine that gives tone to the stomach.

STOMACHALGIA, Cardialgia.

STOMACHI RESOLUTIO, Dyspepsia.

STOMACHIC, Stomachal.

STOMACHIQUE, Stomachal.

STOM'ACHUS, from *στομα,* 'mouth.' This  
word has been used in several different accepta-  
tions; for example, for the œsophagus, for the car-  
diac orifice of the stomach, (see *Cardia,*) and for  
the stomach itself. Hippocrates calls the neck of  
the bladder *στομαχος υστερας;* and the neck of  
the uterus *τὸ στήθος στομαχος.*

STOMAL'GIA, *Stomatal'gia, Stomatodyn'ia,*  
from *στομα,* 'mouth,' and *αχος,* 'pain.' Pain  
in the mouth; *Stomal'acæ.*

STOMAPYRA, Aphthæ—s. Aphtha, Aphthæ.

STOMATALGIA, Stomachgia.

STOMAT'IC, *Stomat'icus,* from *στομα,*  
'mouth.' A medicine used in diseases, &c., of  
the mouth. Dentifrices, masticatories, &c., are  
stomatics.

STOMATITE APHTHEUSE, Stomatitis,  
aphthous—s. *Charbonneuse, Cancer aquaticus*  
—s. *Couenneuse, Stomatitis, pseudo-membra-*  
*nous—s. Crèmeuse pullacé, Aphthæ—s. Folli-*  
*culéuse, Stomatitis, aphthous—s. Gangréneuse,*  
*Cancer aquaticus—s. Mercurielle, see Salivation,*  
*mercurial—s. Ulcéreuse, Stomatitis, aphthous.*

STOMATITIS, from *στομα,* 'the mouth,'  
and *itis,* denoting inflammation. (F.) *Inflam-*

*mation de la Bouche*; Inflammation of the mouth.

**STOMATITIS, APHTHOUS**, *S. follicular*, *S. ulcerozus*, *Emphy'sis Aphthæ*, *A. Adultorum*, (F.) *Stomatitis*, *S. aphthæus*, *S. folliculeus*, *S. ulcerozus*. An inflammation of the follicles of the mouth, constituting the aphthæ of the adult, which is generally accompanied by cephalic, gastric, and general disturbance. It may be either discrete or confluent, and requires general and local treatment, adapted to the case.

**STOMATITIS, ERYTHEMATOUS**. Simple inflammation of the mouth.

**STOMATITIS, EXSUDATIVA**, *Aphthæ*—s. *Follicular*, *S. aphthous*—s. *Gangrenous*, *Cancer aquaticus*.

**STOMATITIS, MERCURIAL**, *Hydrargyrostomatitis*, *Hydrargyrostomatitis*, *Stomatitis mercurialis*. Inflammation of the mouth induced by mercury.

**STOMATITIS OF NURSING-WOMEN** appears to be a variety of *S. aphthous*.

**STOMATITIS, PSEUDOMEMBRANOUS**, (F.) *Stomatite couenneuse*, *Diphthérite buccale*; *Pseudomembranous inflammation of the mouth*;—in its worst form, *Stomatyphus*, (F.) *Fégarite*. Inflammation of the mouth accompanied by the exudation of a false membrane,—a disease which is rarely seen except in large foundling establishments.

**STOMATITIS, ULCEROUS**, *S. aphthous*—s. *Vesiculosus infantum*, *Aphthæ*.

**STOMATOCACE**, *Stomacace*.

**STOMATODYNIA**, *Stomalgia*.

**STOMATOGASTRIC**, *Stomato-gastricus*, from *στομα*, 'the mouth,' and *γαστήρ*, 'the stomach.' Appertaining to the mouth and stomach,—as the *stomato-gastric ganglia* of the lower animals.

**STOMATOMALACIA PUTRIDA**, *Cancer aquaticus*.

**STOMATONECROSIS**, *Cancer aquaticus*, *Stomacace*.

**STOMATONOMA**, *Stomacace*.

**STOMATOPA'NUS**, from *στομα*, 'the mouth,' and *παιος*, 'a glandular tumour.' *Stomatophyma glandulosum*, *Panus Fauvium*. Tumefaction of the glands of the mouth.

**STOMATOPHY'MA**, from *στομα*, 'the mouth,' and *φυμα*, 'a swelling.' A swelling in the mouth.

**STOMATOPHYMA GLANDULOSUM**, *Stomatopanus*.

**STOMATOPLASTIC**, *Stomatoplasticus*; from *στομα*, 'the mouth,' and *πλασσω*, 'I form.' The operation of forming a mouth, where the aperture has been contracted from any cause.

**STOMATORRHAG'IA**, *Stomatorrha'a*, *Hæmorrhag'ia oris*, *H. fau'cium*, *Sanguinis profusivum ex Orè*, *Hæmorrhoides Oris*, *Stomatosis*, *Stomorrhag'ia*, (F.) *Hæmorrhagis buccale*, from *στομα*, 'the mouth,' and *εργυμι*, 'I break out.' Hemorrhage from the mouth.

**STOMATORRHAGIA ALVEOLORUM**, *Phatnorrhagia*—s. *Gingivatum*, *Ulorrhagia*.

**STOMATORRHŒA**, *Stomatorrhagia*.

**STOMATOSCOPE**, from *στομα*, 'mouth,' and *σκοπεω*, 'I view.' Any instrument for keeping the mouth open, so as to permit the parts within to be inspected; *Speculum oris*.

**STOMATOSEPSIS**, *Cancer aquaticus*.

**STOMATOSIS**, *Stomatorrhagia*.

**STOMATOSPASMUS**, *Trismus*.

**STOMATYPHUS**, *Stomatitis*, *pseudomembranous*.

**STOMOMORRHAGIA**, *Platysma myoides*.

**STOMORRHAGIA**, *Stomatorrhagia*.

**STONE IN THE BLADDER**, *Calculi vesical*—s. *Binder*, *Osteocolla*—s. *Crop*, *Sedum*—s. *Crop*, *biting*, *Sedum*—s. *Mint*, *Cunila mariana*—s. *Pock*, *Acne*—s. *Root*, *Collinsonia Canadensis*.

**STONES, THE**, *Testes*.

**STOOL**, *Dejectio*.

**STORAX**, *Styrax*—s. *Liquida*, *Liquidambar styraciflua*.

**STOREY'S WORM CAKES**. An empirical preparation, formed of *calomel* ℥j, *jalap* ℥j, *singib.* ℥ij, *sacch.* ℥j, *cinnab. antim.* q. s. to colour them; *syrup. simpl.* q. s. to make into cakes.

**STORKBILL**, *Geranium maculatum*.

**STOVE**. Old French *Estuve*, *Stupa*; a *Stew*, *Æstuarium*, (F.) *Etuve*. A limited space, warmed artificially, and in which the air is slowly renewed. It is used for drying various substances, as plants, extracts, conserves, &c., or for taking vapour baths. In this case, the *stew* or *stove* is said to be *wet* or *humid*; in the opposite case, it is said to be *dry*, (F.) *èche*. The latter, which is used by the Turks, is the *Laonicum* or *Calidarium* of the Romans. The former is their *Tepidarium*, or *Vaporarium*. These kinds of baths greatly excite the cutaneous transpiration; and are valuable agents in rheumatic and other affections.

**STRABI**, see *Strabismus*.

**STRABILISMOS**, *Strabismus*.

**STRABISMUS**, *Strabismus*, *Paropsis Strabismus*, from *στραβος*, 'twisted,' 'one who squints;' *Strabositas*, *Læzophthalmus*, *Distorsio*, *Lus'citas*, *Illo'sis*, *Ilo'sis*, *Helo'sis*, *Squinting*, *Goggle Eye*, (F.) *Strabisme*, *Vus louche*, *Louchement*. Want of concordance of the optic axes. It may be dependent upon natural or acquired inequality in the action of the motory muscles of the eye; on a convulsive state of one of those muscles; a difference in the sensibility of the two eyes; or a cerebral affection. In the treatment, if the disease seem to depend upon an excess of strength in one of the motory muscles, we must endeavour to give tone to that which is too weak, by placing before the eye a mask having a small aperture on the side to which it is necessary to direct the pupil; or by wearing glasses, provided with a piece of looking-glass, on the side to which the eye is vitiously turned; so that the reflection may be inconvenient, and occasion the organ to be turned in an opposite direction; or by putting a black patch on the angle opposite to that to which the eye is turned. If owing to weakness, the organ must be strengthened by being exerted alone, and by leaving the other at rest. If the disease be symptomatic of cerebral affection, attention must, of course, be directed to the latter.

Those affected with *Strabismus* are called *Strabi*, *Strabones*, *Straboni*, *Strabii*, *Illi*, *Squin'tars*; in French, *Louches*, *Bigles*.

**STRABONES**, see *Strabismus*.

**STRABONI**, see *Strabismus*.

**STRABOSITAS**, *Strabismus*.

**STRABOT'OMY**, *Strabotomy*, from *στραβ*

*for*, 'one who squints,' and *τὸν*, 'incision.' The operation for the removal of squinting by the division of the muscle or muscles that distort the eye-ball.

To STRAIN, *colare*, (F.) *couler*, from *σπράγγω*, *stringere*, (F.) *estreindre*, 'to constrict or squeeze.' To pass decoctions, infusions, &c., forcibly through linen; also, to exert an effort. This is accomplished by fixing firmly the parts where the muscles to be exerted originate, in order that their full power may be developed.

STRAINING, Nisus.

STRAITS OF THE PELVIS, see Pelvis.

STRAMOINE, *Datura stramonium*.

STRAMONIA, *Datura stramonium*.

STRAMONIUM, *Datura stramonium*—s. *Majus album*, *Datura stramonium*—s. *Spinosum*, *Datura stramonium*.

STRANGALIDES, from *σπράγγω*, 'I torment.' Small, hard tumours, which form in the breast, when the milk does not find issue.

STRANGALION, Tubercle.

STRANGALIS, Tubercle.

STRANGALISMUS, Strangulation.

STRANGERS' FEVER, see Fever, strangers'.

STRANGULATIO, Orthopnoea, Strangulation—s. Uterina, Angone.

STRANGULATION, *Strangulatio*, *Priz*, *Prigmos*, *Strangalis-mus*, (F.) *Étranglement*, *Strangulation*. State of a part too closely constricted. Thus we say that there is *strangulation* of an intestinal hernia, when the opening that gives passage to the portion of protruded intestine contracts, so as to intercept the continuity of the digestive canal. In *Legal Medicine*, it means the forcible obstruction of the air passages, by a ligature or by the hand for criminal purposes. See Suffocation.

STRANGULATOR, see Lycoides.

STRANGURIA, Enuresis—s. Cruenta, Cystorrhagia.

STRANGURIE, Strangury—s. *Menstruelle*, *Dysmenorrhœa*.

STRANGURY, *Stranguria*, *Paruria stillasitica*, from *σπράγγω*, 'to squeeze,' and *ουρον*, 'urine;' *Dysuria*, *Urina Stitlicidium* vel *Substiltum*, (F.) *Strangurie*. Extreme difficulty in evacuating the urine, which issues only drop by drop, and is accompanied with heat, pain, tenesmus at the neck of the bladder, &c. See Ischuria, and Retention.

STRATHPEFFER, MINERAL WATERS OF. A sulphuretted water, at Strathpeffer, a few miles west from Dingwall in Ross-shire, Scotland. It contains sulphate of soda, sulphate of lime, chloride of sodium, sulphate of magnesia, and sulpho-hydric acid.

STRATIOTES, *Achillea millefolium*.

STRATUM PROLIGERUM, Proliferous diac.

STRAWBERRY, *Fragaria*—s. Bush, *Euonymus Americanus*—s. Shrubby, *Rubus arcticus*—s. Tree, *Euonymus Americanus*.

STREATHAM, MINERAL WATERS OF. Streatham is a village near London. The waters are saline and cathartic.

STREBLI, see Strabismus.

STREBLONIS, Luxation.

STREUMA, Luxation. Sprain.

STREPITUS MORBUS, 'Noisy disease.' A kind of flatulent disease, said by Sorbait to be not uncommon in the Austrian Alps,

in which emphysematous tumours form on different parts of the body,—accompanied by sonorous excretions of gas by the mouth and anus.

STREPITUS AURIUM, Tinnitus aurium.

STRETCHING, Pandiculation.

STRI r, Vibices—s. Ciliares, Ciliary processes—s. Corneæ, Tenia semicircularis—s. Retinæ subjectæ ligamento ciliari, Halo signatus—s. Semilunares, Tænia semicircularis.

STRIATED MUSCULAR FIBRE, see Muscular fibre.

STRIATUS, *Cannelé*, Grooved, see Corpora striata.

STRIBILIGO, Efflorescence.

STRICTURA, Stricture—s. Ani, Stricture of the rectum—s. Intestini recti, Stricture of the rectum—s. Intestini recti spasmodica, Stricture of the rectum, spasmodic—s. Œsophagi callosa, Dysphagia constricta—s. Œsophagi spasmodica, Œsophagismus—s. Pharyngis seu Œsophagi vera, Dysphagia constricta—s. Præputii, Phimosi—s. Urethræ, Urethrostenosis.

STRICTURE, *Strictura*, from *stringere*, *strictum*, 'to tie hard.' *Coarctatio*, *Stegno'sis*, (F.) *Rétrécissement*. A diminution or contracted condition of some tube or duct, as the œsophagus, rectum, urethra, &c. This must be dilated by appropriate bougies. Strictures may, also, occur in the intestines, &c.: they are unmanageable, with the exception of those of the rectum, which admit of topical applications.

STRICTURE OF THE ŒSOPHAGUS, Dysphagia constricta—s. of the Pharynx, Dysphagia constricta.

STRICTURE OF THE RECTUM, SPASMODIC, *Strictura Intestini Recti spasmodica*, *Obstructio Recti spasitica*. An affection occurring in the nervous especially, which subsides spontaneously, after a longer or shorter continuance.

Stricture of the rectum, *Strictura Ani* seu *Intestini Recti*, *Archostegno'ma*, *Rectostenosis*, *Euthyentostenosis*, *Archostegno'sis*, *Archostenosis*, *Proctoœnclisis*, *Angustatio* et *Restrictio intestini recti vel ani*, *Stenochoria intestini recti*, *Proctostenosis organica*, occurs also organically, and is a very serious affection; being generally dependent upon scirrhus.

STRICTURE OF THE STOMACH, *Gastrosteno'sis*, *Coarctatio ventriculi*. See Gastrostenosis cardiaca, &c.

STRICTURE OF THE URETHRA, Urethrostenosis—s. of the Urinary bladder, Cystostenochoria—s. Vesicæ urinariæ, Cystostenochoria.

STRIDOR DENTILUM, Brygmus.

STRIGA CARTILAGINOSA CORDIS, Isthmus of the fossa ovalis.

STRIGIL, *Strigilis*, *Silen'gis*, *Stelen'gis*. A flesh brush. Also, an instrument, anciently used in the baths, for scraping off the sweat.

STROBILITITES, from *στροβίλος*, *stro'bilus*, 'a cone of the pine.' Wine impregnated with the cones of the pine.

STROEMIA, Cadaba.

STROKE, APOPLECTIC. An apoplectic seizure.

STROKE, BACK, OF THE HEART, Impulse, diastolic.

STROKE, PARALYTIC. A sudden attack of encephalo-spinal paralysis.

STROMA, *Stragulum*, *Stramentum*; from *σπράγγω*, *σπρῶνμι*, 'to spread out; to cover.' The bed or foundation texture of an organ,—as the stroma of the ovary. Applied, also,

to the bed or base of any deposit—as the ‘amorphous stroma’ of scrofulous deposits.

**STROMBULCUS**, Forceps (bullet.)

**STRONGLE**, *Strongylus*—s. *Géant*, *Strongylus gigas*.

**STRON'GYLUS**, from *στρογγυλος*, ‘round.’ Hippocrates, Chabert, and others mean the *Ascaris lumbricoides* by this term. The *Strongylus Gigas*, (F.) *Strongle*, *S. géant*, is, however, distinct. It has an obtuse, flat head; mouth, surrounded with six flattish papillæ: the whole bursa of the male truncated: the tail of the female rounded. It is sometimes met with,—five inches, a foot, a foot and a half, and even three feet long,—and from two lines to half an inch in diameter. It is occasionally found in the human kidney; rarely in other viscera, and still more rarely in the intestinal tube.

**STRONGYLUS**, *Teres*.

**STROPHOS**, *Tormina*.

**STROPHULE**, *Strophulus*.

**STROPHULUS**, *Licheni'asis strophulus*, *Ebullit'io*, *Exanthema strophulus*, *Exor'mia strophulus*, *Red Gum*, *Red Gown*, *Tooth Rash*, *White Gum*, *Milk-spots*, (F.) *Strophule*, *Feux de dents*. It consists of an eruption of red, or sometimes whitish pimples; occurring in early infancy, chiefly about the face, neck, and arms, surrounded by a reddish halo; or interrupted by irregular patches of cutaneous blush. All the varieties under this genus arise in consequence of the extreme vascularity and irritability of the skin at this period of life, when the constitution is liable to be disturbed by irritation, either in the alimentary canal, gums or other parts. None of these eruptions are of any importance, and no medical treatment is usually necessary. If the stomach seem at all disordered, a little rhubarb and magnesia may be administered occasionally. Willan and Bateman reckon five species,—*Strophulus intertinctus*, *Red gum or gown*; *S. albidus* or *white gum*; *S. confertus* or *rank red gum*, *Tooth rash*; *S. volaticus* or *Erythema volaticum*, and *S. candidus*.

**STROPHULUS SYLVESTRIS**, *Ignis sylvaticus*—s. *Volaticus*, *Ignis sylvaticus*.

**STROPHUS**, *Tormina*.

**STRUCTIO**, *Structura*.

**STRUCTURE**, *Structura*, *Structio*, *Conformatio*, *Catascue'te*, from *struere*, *structum*, ‘to build.’ The arrangement of the different tissues or organic elements of which animals and vegetables are composed.

**STRUMA**, *Bronchocele*, *Scrofula*.

**STRUMA ADIPO'SA**, *Obesitas colli*. Fatty neck. Prominence of the neck from obesity.

**STRUMES**, *Scrofula*.

**STRUMEUX**, *Scrofulous*.

**STRUMOSIS CEREBRI**, *Encephalophymata*—s. *Pulmonum*, *Tubercles of the lungs*.

**STRUMOSUS**, *Scrofulous*.

**STRUMOUS**, *Scrofulous*.

**STRUTHIOPH'AGUS**, from *στρουθιον*, ‘a young ostrich,’ and *αγω*, ‘I eat.’ *Struthiophagus* tribes still exist in some parts of Africa.

**STRUTHIUM**, *Saponaria*.

**STRUVE'S LOTION FOR HOOPING-COUGH**, see *Lotion*, *Struve's*, for *hooping-cough*.

**STRYCHNIA**, *Strychnina*.

**STRYCHNINE**, *Strychnina*, *Strychnia*, *Strychninum*, *Strychnium*, *Vauquelin*. An

alkaline principle; solid, crystalline, inodorous, bitter, and excessively poisonous, which has been discovered in the *Strychnos nux vomica*. (*Nucis vomica*. rasur. ℥iv; calcis pulv. ℥ij; acid. muriat. f. ℥iij; alcohol., acid. sulphuric. dil., liquor. ammoniac. carbon. animal. purif. aqua, aa q.s. Digest the *nux vomica* in two gallons of water, acidulated with a fluidounce of muriatic acid, for 24 hours: then boil for two hours, and strain with expression through a strong linen bag. Boil the residuum twice successively in the same quantity of acidulated water, each time straining as before. Mix the decoctions, and evaporate to the consistency of thin syrup; then add the lime previously mixed with a pint of water, and boil for ten minutes, frequently stirring. Pour the mixture into a double linen bag, and having washed the precipitate well with water, press, dry, and powder it. Treat the powder repeatedly with boiling alcohol, until deprived of its bitterness; mix the liquors and distil off the alcohol by means of a water bath. Mix the residue with water, and having applied heat, drop in sufficient diluted sulphuric acid to neutralize and dissolve the strychnia; then add purified animal charcoal; boil for a few minutes, filter, evaporate, and crystallize. Dissolve the crystals in water, and add sufficient solution of ammonia to precipitate the strychnia. Lastly, dry the precipitate on bibulous paper. Ph. U. S.) The medical action of strychnia on man and animals is exactly like that of the alcoholic extract of *nux vomica*. It is, however, more active. An eighth of a grain is sufficient to kill a large dog; and a quarter of a grain produces marked effects on the human body, when in health. It has been given in paralysis and other cases like the *nux vomica*. Dose, gr. one-twelfth to one-eighth.

The *Acetate of Strychnia*, the *Iodate* in the dose of one-eighth of a grain; the *Nitrate* and the *Sulphate* have been given in the same cases as pure strychnia.

**STRYCHNOS**, *Solanum dulcamara*—s. *Guaianensis*, see *Curate*.

**STRYCHNOS NUX VOM'ICA**, *Nux Vomica*, *Nux Metal'ia*, *Caniram*, *Koochla Tree*. Family, *Strychnoides*. *Sex. Syst.* *Pentandria Monogynia*. (F.) *Vomiquier*. A tree of the family *Strychnoides* which grows in India, and the seeds of which have been long sold in the shops, under the names, *Nux Vomica*, *Vomic nut*, *Poison nut*, *Bachelers' buttons*, &c., (F.) *Noix vomique*. For a long time, these seeds were used only for poisoning rats; but, of late years, an alcoholic extract has been prepared from them, which has been administered in paralytic affections, in small doses. Dose of the alcoholic extract, *Extractum nucis vomice spiritus rum*, *E. nucis vomica resinorum*, *E. n. o. alcoholicum*, (F.) *Extrait alcoolique de noix vomique*, one or two grains. It produces a kind of tetanic convulsion in the paralyzed parts, when given to the requisite extent. It has, also, been administered in chronic diarrhœa and dysentery. The following is the formula for the preparation of the **EXTRACTUM NUCIS VOMICE** of the Pharm. U. S. (1842.) Take of *Nux vomica*, ℥ij; *Alcohol*, a sufficient quantity. Expose the *Nux Vomica* to steam till it is softened; then, having sliced and dried it, grind it into powder. Introduce it into an apparatus for displacement, and pour alcohol upon it gradually, until the

liquid passes without bitterness. Distill off the greater part of the alcohol from the filtered liquor, and evaporate the residue to the proper consistence.

The wood of *Strychnos Colubrina*, an Indian tree, contains strychnia. It was formerly considered a specific against the bites of venomous animals; and was recommended by Boerhaave, in intermittents. It is the *Lignum Colubrinum*, (F.) *Bois de Couleuvre*.

STRYCHNOS TOXICARIA, see Curare.

STRYPHNA, Astringents.

STRYPHOS, Akerb.

STUDIOSUS MEDICINÆ, Philiatros.

STUDIUM INANE, Aphelxia otiosa.

STUDY, BROWN, Aphelxia otiosa.

STUFFING, Cynanche trachealis.

STULTITIA, Fatuitas.

STUNNED. Old French *Estonné*. (L.) *attonitus*, 'astonished.' (F.) *Étonné*. An epithet, applied to one, who, in consequence of a fall or other accident, has received such a concussion of the brain as to deprive him, for a time, of his mental manifestations.

STUPA, *Stupha*, *Stuppa*, *Stupoi'on*. Tow, used in certain surgical apparatus and dressings. Also, a *Stupe*, that is, cloth or tow used in fomentations. A flannel, wrung out of hot water, and applied to a part, is a *stupe*.

STUPE, Stupa.

STUPEFACIENTIA, Narcotics.

STUPEFACTIFS, Narcotics.

STUPEFACTIO, Narcosis.

STUPEFIANTS, Narcotics.

STUPRION, Stupa.

STUPEUR, Stupor.

STUPHA, Stove, Stupa.

STUPIA, Tin.

STUPIDITAS, Idiotism, Imbecility.

STUPOR, *Eplexia*, *Eplexia*, *Consternatio*, (F.) *Stupor*, from *stupere*, 'to be stupified.' Diminished activity of the intellectual faculties; often amounting to lethargy. It occurs in many affections, especially in the neuroses.

STUPOR, Narcosis—s. Artuum, Obdormitio—s. Dentium, Hæmodia—s. Formicans, Formication—s. Mentis, Fatuitas—s. Vigilans, Catalepsy.

STUPPA, Stupa.

STUPRUM, *Rape*, (F.) *Déforation*, *Viol*. Forcible and illicit enjoyment of a married or unmarried female. When committed upon the latter, which is most commonly the case, it is also called, *Déforation*, *Déforatio*, *Devirginatio*, *Vitiatio*, *Apanthismus*, &c. In judging whether rape has been committed under such circumstances, the state of the genital organs; the age of the individual; and the possibility of accidents and diseases of the parts, will have to be considered. It will be necessary, also, to be acquainted with the evidences of virginity; and to determine,—if signs of virginity no longer exist,—whether its loss be attributable to copulation, or to the introduction, into the vagina, of any other body than the male organ, &c. *Recent deflowering* can, of course, be much more readily distinguished than that which has taken place some time.

STYAN, Hordeolum.

STYE, Hordeolum.

STYGMATES. M. J. Cloquet has proposed this word, or *Stigmatos*, from *στυμα*, 'a mark,' to designate the marks, in form of cicatrices,

which remain on the peritoneum after the obliteration of the neck of the hernial sac. They are, commonly, radiated folds, of a whitish appearance, more or less thick, and of a fibrous or fibro-cartilaginous nature.

STYLET, Specillum.

STYLI, Styloid processes.

STYLIFORM, Styloid.

STYLO-CERATOIDES, Stylo-hyoideus—s. Cerato-hyoideus, Stylo-hyoideus.

STYLO-CHONDRO-HYOÏDEUS. A name given, by Douglas and Albinus, to a fleshy fasciculus, which the stylo-hyoid muscle sometimes presents, and which is attached to the lesser cornu of the os hyoides. It is the same fasciculus which Santorini calls *Stylo-hyoides novus*, *Stylo-hyoideus alter*.

STYLO-GLOSSUS. A muscle situate at the anterior and superior part of the neck. It is narrow behind; much broader before; and is attached to the styloid process of the temporal bone, and to the stylo-maxillary ligament; and is inserted into the side of the tongue. It raises the base of the tongue and carries it backwards.

STYLO-HYOÏDEUS, *Stylo-hyoidian*, *Stylocerato-hyoideus*, *Stylo-ceratoïdes*, *Stylo-hyoides major*. A muscle situate at the superior, anterior, and lateral part of the neck. It is thin and narrow,—especially posteriorly: anteriorly, it opens to give passage to the tendon of the digastricus. It is attached to the styloid process of the temporal bone, and to the body of the os hyoides. It raises the os hyoides, and carries it backwards.

STYLO-HYOID LIGAMENT is a fibrous, flattened cord, which passes from the styloid process to the lesser cornu of the os hyoides.

STYLO-HYOID NERVE is the second branch given off by the facial nerve.

STYLOID, *Styliform*, *Styloïdes*, *Graphioïdes*, *Graphoides*, *Graphioïdes*, *Graphioïdes*, *Graphioïdes*, *Belonoïdes*, from *στυλο*, 'a style,' 'a peg,' 'a pin,' and *ειδος*, 'shape.' Shaped like a peg or pin.

STYLOID CORNUA, see Hyoides os.

STYLOID PROCESSES, *Pencil-like Processes*, *Processus Beloides* seu *Belomnoïdes* seu *Belonoïdes* seu *Graphioïdes* seu *Graphoïdes*, *Stylis*, are, 1. A long and slender process of the temporal bone, to which are attached the stylo-glossus, stylo-pharyngeus, and stylo-hyoideus muscles; and the stylo-hyoid and stylo-maxillary ligaments. 2. Two slender and pyramidal processes at the inferior extremities of the radius and ulna.

STYLO-MASTOID, *Stylo-mastoides*. That which relates to the styloid and mastoid processes.

STYLO-MASTOID ARTERY arises from the posterior auricular, and, in some subjects, from the occipital. It enters the stylo-mastoid foramen; passes along the aqueduct of Fallopius, and spreads its ramifications on the mucous membrane of the tympanum, and in the mastoid cells, and semi-circular canals; and terminates by anastomosing with a branch of the *Arteria meningæ media*, which enters by the *Hiatus Fallopii*. Murray has given the name—*Stylo-mastoid*—to the posterior auricular artery itself.

STYLO-MASTOID FORAMEN, *Foramen Stylo-mastoidum* or *F. Aqueductus Fallopii*, (F.) *Trochæanonyma*, is situate at the inferior surface of the petrous portion of the temporal bone, between the styloid and mastoid processes. It terminates

the aqueduct of Fallopius, and gives passage to the facial nerve.

**STYLO-MAXILLARY, *Stylo-maxilla'ris*.** That which relates to the styloid processes and jaw.

The **STYLO-MAXILLARY LIGAMENT** is a ligamentous, flat cord, extending between the styloid process and the angle of the jaw.

**STYLO-PHARYNGEUS, (F.) *Stylo-pharyngien*.** A muscle, situate at the anterior and lateral part of the neck. It is slender; thin, above; attached to the styloid process of the temporal bone, and terminates in the parietes of the pharynx, as well as at the posterior margin of the thyroid cartilage. It raises the pharynx, and carries it backwards. Professor Chaussier has united, under the name *Stylo-pharyngien*, the three constrictor muscles of the pharynx, the stylo-pharyngeus, and palato-pharyngeus.

**STYLO-THYRO-PHARYNGIEN.** Stylopharyngeus.

**STYLUS, Sound.**

**STYLUS EXCAVATUS, *Specillum excavatum*.** A hollow sound.

**STYMA, Erection, Priapismus.**

**STYMATOSIS, Stimatosis.**

**STYMATATA, from  $\sigma\tau\upsilon\mu\alpha$ ,** 'that which constricts or thickens.' The most solid ointments. Also, the ingredients proper for increasing their consistence.

**STYPSIS, Astriction, Constipation.**

**STYPTERIA, Alumen, Styptics.**

**STYPTIC, EATON'S.** A name first given to *Helvetius's Styptic*, when introduced into Great Britain. It is now usually made of *calcinad green vitriol*, ʒj; *proof spirit*, tinged with a little oak bark, ℞j.

**STYPTIC, HELVETIUS'S, see Ferrum tartarizatum.**

**STYPTIC, RUSPINI'S.** A nostrum said to consist of *gallic acid*, a small quantity of *sulphate of Zinc* and *Opium*, dissolved in a mixture of *alcohol* and *rose water*, which has had much reputation as an internal and external astringent.

**STYPTICS, *Contrahentia, Constrictiva Medicamenta, Constringentia, Anastaltica, Stypteria*, from  $\sigma\tau\upsilon\pi\eta$ ,** 'I constrict.' Sometimes used synonymously with astringent, but generally applied to a substance employed to arrest hemorrhage,—*Enemion*. A *mechanical styptic* is one that arrests the flow of blood, by being applied immediately to the mouth of the bleeding vessel, or by inducing a coagulum, *mechanically*, in the vessel. A *chymical styptic* is one which coagulates, *chymically*, the blood around a bleeding orifice.

**STYRAC-INUM OLEUM.** Oil obtained by boiling storax in good olive oil.

**STYRAX, from  $\sigma\tau\upsilon\rho\alpha\iota$ ,** 'a reed,' in which it was preserved. A resin obtained from the *Styrax officinalis*, and *S. calamita*. It is the *solid storax*;—*officinal storax*. There are two kinds of storax met with: 1. The *Red Storax, Gum Storax. Thus Judæorum, Styrax rubra, Styra'cis balsamum, Balsamum styracis officinalis*, which is obtained by incision from the *Styrax officinalis*, and, perhaps, from the *Liquidambar orientalis*. The purest is in tears; but it has lost some of its smell in drying. 2. *Common storax, Styrax calamita*. That which has been received in reeds or vessels, and has had

saw-dust added immediately to thicken it. The odour of Storax is fragrant: the taste aromatic. It is considered, like the other balsams, to be stimulant and expectorant, but is rarely used long.

**PURIFIED STORAX, *S. cola'ta, S. purifica'ta*,** is prepared by dissolving storax in alcohol; straining the solution; then distilling off the alcohol with a gentle heat, until the storax acquires the proper consistence.—Ph. U. S. Dose, gr. x to xxx.

**STYRAX ALBA, see Myroxylon Peruiferum—s. Benzoin, see Benjamin—s. Liquida, Liquidambar styraciflua.**

**STYSIS, Erection, Priapismus.**

**SUAVEOLENS, Beneolens.**

**SUB.** A common Latin prefix, signifying 'beneath.'

**SUBACTIO, *Chiro'sis, Cheiro'sis*.** The operation of making plasters, extracts, &c., with the hand, or with the pestle and mortar.

**SUBAFFECTIO, Hydropathia.**

**SUBAGGITRIX, Tribada.**

**SUB-ATLOÏDEUS, *Infra-atloïdeus, (F.) Sous-atloïdien*.** That which is situate beneath the atlas or first cervical vertebra. Chaussier has given this name to the second pair of cervical nerves.

**SUB-AZOÏDEUS, *Infra-azoides, (F.) Sous-azoidien*.** That which is below the *axis* or *vertebra dentata*. Chaussier has given this name to the third pair of cervical nerves.

**SUBBORAS NATRICUM, Borax.**

**SUBCARTILAGINEUM, Hypochondre.**

**SUBCLAVIAN, *Subclavius, Subclavieula'ris*, from *sub*, 'under,' and *clavis*, 'the clavicle.'** That which is under the clavicle.

**SUBCLAVIAN ARTERIES, (F.) *Artères sous-clavières*,** are situate at the upper part of the chest, and the lateral and lower parts of the neck. The right arises at the corresponding side of the trachea, and comes off from the arteria innominata or brachio-cephalic trunk. The left leaves the aorta at the end of the arch. Both extend as far as the superior surface of the first rib, in the space between the scaleni muscles, beyond which they take the name *axillary arteries*. The subclavian arteries run, for some distance, without sending off any branch. In the neighbourhood of the first rib, however, they give off, 1. *Upwards, the vertebral and inferior thyroïdeal*. 2. *Downwards, the internal mammary, and superior intercostal*. 3. *Outwards, the transversæ cervical or posterior scapular, the superior scapular, and the posterior cervical or profunda*.

**SUBCLAVIAN OR SUBCLAVIUS MUSCLE, *Subclavi'na, (F.) Costo-claviculaire (Ch.) Sous-clavier*,** is situate at the superior and anterior part of the chest. It is attached, by its inner extremity, to the superior surface of the cartilage of the first rib; and by its superior margin and outer extremity to the inferior surface of the clavicle. This muscle depresses the clavicle, and carries it forward. When the shoulder is fixed, it can raise the first rib.

**SUBCLAVIAN VEINS, (F.) *Veines sous-clavières*,** are continuations of the axillary, and extend from the inferior extremity of the scalenus anticus, in front of which they pass, to the vena cava superior, which they form by their union. The right subclavian vein is very short: the left, longer and broader. These veins receive

the mouths of the internal and external jugulars, vertebral and superior intercostal. The left subclavian receives two veins more than the right,—the left internal mammary and left inferior thyroid. The thoracic duct opens into the left subclavian:—the corresponding great lymphatic vessel into the right.

**SUBCLAVICULA**, from *sub*, 'under,' and *clavicula*, 'the clavicle.' The first rib.

**SUBCLAVICULARIS**, Subclavian.

**SUBCLAVIUS**, Subclavian muscle.

**SUBCRUENTUS**, 'somewhat bloody;' from *sub*, and *cruentus*, 'bloody;' *Hyphæmos*. That which has the colour and nature of blood. An epithet given to certain excreted substances, which are mixed with blood, or have the appearance of blood.

**SUBCRURÆI**, see *Cruræus*.

**SUBCUTANEOUS**, *Subcutaneus*, from *sub*, 'under,' and *cutis*, 'the skin;' *Intercutaneus*, (F.) *Sous-cutané*. That which is placed immediately under the skin.

**SUBDELIRIUM**, Typhomania.

**SUBDITA**, *Subditi'tia*, from *subdere*, 'to put under;' *Prostheta*. Medicines introduced into some one of the natural apertures;—as suppositories, pessaries, &c.

**SUBDITI'TIA**, Subdita.

**SUBDUCTIO**, Dejection.

**SUBER**, *Cork*:—the bark of the *Quercus Suber* or *Cork Tree*. (F.) *Liège*. *Family*, Amentaceæ. *Sex*, Syst. Monœcia Polyandria. Cork, when burnt, is applied as a mechanical styptic to bleeding piles, &c. Surgeons use it for making tents; and it has been recommended to be worn as an amulet to suppress the secretion of milk!

**SUBETH**, *Coma*.

**SUBFRONTALIS SUTURA**. A suture, resulting from the articulation of the os frontis with the nasal process of the superior maxillary bone, and the proper bones of the nose.

**SUBGRONDATION**, Depression.

**SUBHUMERATIO**, Catomismos.

**SUBIGATOR**, *Tribado*.

**SUBINFLAMMATIO**, Subinflammation—a. Hepatis, Hepatitis, chronic.

**SUBINFLAMMATIO**, *Subinflammatio*, from *sub*, 'under,' and *inflammatio*. *Inflammationis cula*, *Hypophlegmasia*. A mild degree of inflammation, so slight as hardly to deserve the name *inflammation*. Broussais understood by the term, an augmentation in the vital phenomena of the vessels that convey white blood. Lymphatic engorgements, scrofula, herpes, and cancer he considered subinflammations.

**SUBINTRANTES FEBRES**, from *sub*, 'under,' and *intrare*, 'to enter.' *Communicantes febres*. Fevers primarily intermittent, whose paroxysms approximate, so that one paroxysm begins before that which preceded it has gone through its stages.—L. Bellini.

**SUBJEE**, see *Gunjah*.

**SUBLIGACULUM**, Truss.

**SUBLIGATURA**, Truss.

**SUBLIMENTUM**, *Enœorema*.

**SUBLIMATE**, CORROSIVE, *Hydrargyri oxyurias*.

**SUBLIMATION**, *Sublimatio*, *Meteorismus*, *Hypo'sis*, from *sublimo*, 'I raise up.' An operation by which dry and solid matters are volatilized and condensed at the upper part of a subliming apparatus. The oxy muriate of

mercury, sal ammoniac, &c. are commonly obtained by sublimation. The product of sublimation is a *Sublimato*, *Sublimatum*, (F.) *Sublimé*.

**SUBLIMATUS CORROSIVUS**, *Hydrargyri oxyurias*.

**SUBLIME**, *Sublimis*.

**SUBLIMÉ**, *Enœorema*, *Sublimato*—s. *Corrosif*, *Hydrargyri oxyurias*.

**SUBLIMIS**, (F.) *Sublime*, 'high, elevated, superficial.' Anatomists have given the name *sublimis* to certain muscles, which are situate more superficially than their kindred muscles. These last they have called *profundi*. Of the former, the *flexor sublimis digitorum* is an example.

The French use the term '*respiration sublime*' for the respiration which is accompanied by considerable elevation of the ribs, and with separation of the *alæ nasi* at the time of inspiration.

**SUBLINGUA**, *Uvula*.

**SUBLINGUAL**, *Sublingualis*, (F.) *Sous-lingual*, from *sub*, 'under,' and *lingua*, 'the tongue.' That which is seated under the tongue.

**SUBLINGUAL ARTERY**, with some is the *Lingual*. With others, it is a branch given off by the lingual opposite the genio-glossus muscle, which is distributed particularly to the sublingual gland, to the mylo-hyoid, and genio-glossus muscles, &c.

**SUBLINGUAL GLAND**, *Glandula sublingualis*, *G. Bartholiniana*, *G. Riviniana*, is seated in the substance of the inferior paries of the mouth, beneath the anterior part of the tongue. It is smaller than the submaxillary, of which it frequently seems to be only a prolongation. It is oblong, flattened, amygdaloid, and is covered by the mucous membrane of the mouth, beneath which it projects. This gland has 10 or 12 excretory ducts—*Ductus Riviniani* seu *Waltheriani*—some of which open beneath the frænum lingue, joining Wharton's duct, whilst others pierce the mucous membrane of the mouth separately. It has the same structure as the parotid.

**SUBLINGUIUM**, *Uvula*.

**SUBLINGUUM**, *Epiglottis*.

**SUBLUXATIO**, *Sprain*.

**SUBMAXILLARY**, *Submaxilla'ris*, *Infra-maxilla'ris*, (F.) *Sous-maxillaire*, from *sub*, 'under,' and *maxilla*, 'the jaw.' That which is seated beneath the jaw.

**SUBMAXILLARY GANGLION** is a small nervous ganglion, situate opposite the gland. It seems to be formed by the superior branch of the Vidian nerve, and communicates with the lingual nerve of the inferior maxillary. Its filaments form a plexus which penetrates the submaxillary gland.

**SUBMAXILLARY GLAND**, *Maxillary Gland*, *Hypognath'aden*, is a salivary gland, less than the parotid, seated at the inner side of the ramus and body of the inferior maxillary bone, in the triangular space between the two bellies of the digastricæ. Irregularly ovoid, and flattened on three surfaces, it has the same aspect and organization as the other salivary glands. Its excretory duct is called *Wharton's Duct*, and terminates at the side of the frænum lingue, by a very small orifice. It is also called *Ductus inferior*.

**SUBMENTAL**, *Submentalis*, (F.) *Sous-mental*, from *sub*, 'under,' and *mentum*, 'the chin.' Situate under the chin.

**SUBMENTAL ARTERY** is furnished by the facial, near the base of the jaw. It passes forwards along the attachment of the mylo-hyoideus, to which it furnishes branches that cross it to anastomose with those of the sublingual. Near the median line it bifurcates, to be distributed to the chin and muscles of the infra-hyoid region.

**SUBMENTAL VEIN**, which accompanies the artery, opens into the labial.

**SUBMER'SION**, *Submersio*, from *sub*, 'under,' and *mergere*, *mergum*, 'to plunge.' The act of plunging, or being entirely plunged, in a liquid.

*Asphyxia* by *submersion*, *drowning*, *Asphyxia Immer'sorum*, is not owing to a certain quantity of liquid being introduced into the alimentary or air-passages: but simply to the interception of air, and of the respiratory phenomena. It is a case of suffocation, the signs of which, on dissection, are equivocal, without circumstantial evidence.

**SUBMISSIO**, Remission—s. *Cordia*, *Systole*.  
**SUBMURIAS AMMONIACO-HYDRARGYRICUS**, *Hydrargyrum præcipitatum*.

**SUBORBITAR**, *Suborbitarius*, *Infra-orbitar*, *Infra-orbitalis*, *Infra-orbitarius*, (F.) *Sous-orbitaire*, from *sub*, 'under,' and *orbita*, 'the orbit.' That which is seated beneath the orbital cavity.

**SUBORBITAR ARTERY**, *Infra-orbitar A.*, proceeds from the internal maxillary, from which it separates near the anterior and superior part of the zygomatic fossa. It enters the infra-orbitar canal, and passes through it, giving branches to the anterior and superior dental canal; issues by the foramen infra-orbitarium; and divides, in the fossa canina, into a number of branches, which lose themselves in the neighbouring parts. The infra-orbitar vein follows the same course.

**SUBORBITAR CANAL**, *Infra-orbitar Canal*, (F.) *Canal ou Conduit sous-orbitaire*, is a small canal, which runs obliquely through the substance of the inferior paries of the orbit. It begins, behind, by a simple gutter, and divides, anteriorly, into two branches, one of which descends into the anterior paries of the maxillary sinus, whilst the other passes out, in the canine fossa, by an orifice, called *Foramen-infra-orbitarium*, (F.) *Trou sous-orbitaire*. The infra-orbitar artery and nerve pass along it.

**SUBORBITAR FISSURE**, *Infraorbitar Fissure*, *Rima canalis orbitarii*, *Fissura infraorbitalis*. A fissure in the superior maxillary bone; the superior commencement of the suborbitar canal.

**SUBORBITAR FOSSA**, Canine fossa.

**SUBORBITAR NERVES**, *Infra-orbitar Nerves*, seem to terminate the superior maxillary. They issue from the infra-orbitar canal by the foramen of the same name, and spread out in a radiated manner in the fossa canina, to divide into *superior or palpebral filaments*, *inferior or labial*, *internal or nasal*, and *external or buccal*.

**SUBPERTONEAL APONEUROSIS**, Fascia, subperitoneal.

**SUBPLACENTA**, *Decidua membrana*.

**SUBPOPLITÆUS**, *Popliteus muscle*.

**SUBPUBIC ARCH**, *Arcus subpubicus*. A strong arch of the superior pelvic aponeurosis,

which completes the posterior orifice of the obturator or subpubic canal.

**SUBPUBIC MEMBRANE**, *Obturator membrana*.  
**SUBPUBIO-FEMORALIS**, *Abductor brevis*—s. *Prostaticus*, *Compressor prostatae*.

**SUBPUTRIS**, *Hypospasmus*.

**SUBSCAPULAR**, *Subscapularis*, (F.) *Sous-scapulaire*, *Sous-scapulo-trochianum*, from *sub*, 'under,' and *scapula*, 'the shoulder-blade.' That which is beneath the scapula.

**SUBSCAPULAR FOSSA**, *Fossa Subscapularis*. A considerable excavation at the anterior surface or venter of the scapula, in which the subscapularis is seated.

**SUBSCAPULAR MUSCLE**, *Subscapularis Muscle*, *Immersus*, *Infra-scapularis*, (F.) *Sous-scapulo-trochianum*, (Ch.) *Porte-feuille*, *Muscle sous-scapulaire*. A muscle situate in the above mentioned fossa. It is flat, broad, and triangular; is attached, by its base, to the subscapular fossa and to the anterior lip of the edge of the spine of the scapula, and is inserted into the lesser tuberosity of the humerus. It carries the arm in rotation inwards. It can also depress it, and bring it towards the body.

**SUBSIDENTIA**, *Sediment*.

**SUBSTANCE ÉMAILLÉE DES DENTS**, *Enamel of the teeth*.

**SUBSTANCE, HYALINE**, *Cytoplastema*—s. *Intercellular*, *Cytoplastema*—s. *Vitrée des Dents*, *Enamel of the teeth*.

**SUBSTANCE, WHITE, OF SCHWANN**. A hollow cylinder within the tubular nervous fibre, which differs in composition and refracting power from the matter that occupies the centre of the tube.

**SUBSTANTIA ADAMANTINA DENTIIUM**, *Enamel*—s. *Filamentosa dentium*, *Enamel*—s. *Hyalina*, *Cytoplastema*—s. *Ossa dentium*, see *Tooth*—s. *Ostioidea*, see *Tooth*.

**SUBSTANTIA PERFORATA MÆDIA**. When the pia mater has been removed from the space between the crura cerebri termed the *inter-cru'al* or *interpeduncular*, the surface appears cribriform from the perforations of the numerous minute vessels which penetrate it. This is the *substantia perforata media* of Vicq d'Azyr.

**SUBSTANTIA PULPOSA DENTIS**, *Dental pulp*—s. *Rhomboides*, *Corpus dentatum*—s. *Spongiosa Urethræ*, *Corpus spongiosum urethræ*—s. *Vitrea dentium*, *Enamel of the teeth*—s. *Vitrea*, *Cytoplastema*.

**SUBSTANTIVE**, *Substantivus*: from *substars*, (*sub* and *stars*), 'to stand under or subsist.' An epithet applied by Dr. Paris to aliments which are nutritious, in contradistinction to *adjective* aliments, which are themselves not possessed of nutritive virtues, but impart to the digestive organs greater energy, so as to enable them to extract more nutriment from the substantive aliments. Meat, for example, is a *substantive* aliment: the condiment, as mustard, eaten with it, an *adjective* aliment.

**SUBSTILLUM**, *Stillicidium*.

**SUBSULTIO**, *Palpitation*.

**SUBSULTUS TENDINUM**, *Saltus tendinum*, *Clonus subsultus*, *Subsultus*, *Carphologia spasmodica*, *Myogalpmus*, *Twitching of the Tendons*, (F.) *Soubresaut*, from *subsilire*, *subsultum*, (*sub* and *salire*), 'to make short leaps.' Twitching, communicated to the tendons by the involuntary and instantaneous contraction of the muscular fibres. It is more observable at

the wrist than elsewhere; and is an evidence of great cerebral irritability, and debility, when it occurs at an advanced period of fever.

The muscular agitations or twitchings observed in febrile diseases, especially of children, have been termed *Convulsibil'itas*, *Sceloty'be febr'lis*, and *Irritabil'itas morbo'sa*.

**SUBSURTITAS**, Deafness.

**SUB'UBERES**, from *sub*, 'under,' and *ubera*, 'the breasts.' *Infantes sugen'tes*, *Sucking children*. Infants at the breast, in contradistinction to the *Exu'beres*, ἀγαλακτι, or those which have been weaned.

**SUBVERSIO STOMACHI**, Vomiturition.

**SUBVERTEBRA**, Sacrum.

**SUBVERTEBRUM**, Sacrum.

**SUBVOLA**, Hypothenar.

**SUC**, Succus—*s. Gastrigue*, Gastric juice—*s. Médullaire*, Marrow.

**SUCCA'GO**, from *succus*, 'juice.' The inspissated juice of plants; robs, jellies, &c.

**SUCCEDA'NEUM**, *Succida'neum*, *Substitutum*, *Antiballom'enum*, *Surroga'tum*, *Antembal-lom'enum*, *Quid pro quo*, from *succedere*, (*sub* and *cedere*), 'to go under, to come in place of another.' An epithet for medicines that may be substituted for others possessing similar properties.

**SUCCENTURIA'TUS**, from *succenturiare*, (from *sub* and *centuria*), 'to supply a soldier to fill a vacancy;' and hence 'to substitute or put in the room of.' That which is a substitute for another; as *Renes succenturiati*, *ventriculus succenturiatus*, &c.

**SUCCHAR**, Saccharum.

**SUCCIDANEUM**, Succedaneum.

**SUCCIN**, Succinum.

**SUCCINCTURA**, Diaphragm.

**SUCCINCTUS**, Diaphragm.

**SUCCINI RESINA**, Musk, artificial.

**SUCCINIC ACID**, *Ac'idium Suc'cini*, *A.*

*Succin'ieum*, *Acor succineus*, *Sal Succini*, *Sal volat'ilè Succini*, has been considered antispasmodic and diaphoretic, in the dose of from five to twenty grains.

**SUC'CINUM**, *Electrum*, *Ambra*, *Ambraam*, *Ampar*, *Bereni'cè*, *Amber*, *Yellow Amber*, (F.) *Succin*, *Ambre jaune*. This substance, which is found on the shores of the Baltic, is composed of a resinous matter, of essential oil, and an acid *sui generis*. It is inodorous, except when heated or rubbed; insipid; in fragments of a pale golden yellow colour; transparent, and has a shining lustre. S. g. 1.08: insoluble in water, and slightly acted on by alcohol. It is used for affording its essential oil—the *O'leum* or *Bal'samum Suc'cini*; (F.) *Huile de Succin*. This oil possesses stimulant, antispasmodic, diuretic, and rubefticent properties.

The *O'leum Suc'cini rectificat'um*, *Rectified Oil of Amber*, is made as follows:—*Oil of Amber*, Oj, *water*, Ovj. Mix in a glass retort, and distil until Oiv of the water have passed with the oil into the receiver; separate the oil from the water, and keep it in well stopped bottles. (Ph. U. S.)

The *white amber*, *Leucelectrum*, (F.) *Ambre blanc*, is a variety.

**SUCCINUM CINEREUM**, *Ambergris*—*s. Gri-seum*, *Ambergris*.

**SUCCION**, Sucking.

**SUCCISA**, *Scabiosa succisa*.

**SUCCOLATA**, *Chocolate*.

**SUCCORY**, *WILD*, *Cichorium intybus*, *Chironia angularis*.

**SUC'CUBUS**, from *sub*, and *cubare*, 'to lie.' Some authors have used this word synonymously with nightmare. Others mean by it a female phantom, with which a man in his sleep may believe he has intercourse;—as *Incubus*, has been applied to the male phantom, with which a female may dream she is similarly situate.

**SUCCUS**, *Chylus*, *Opos*, *Opis'ma*, *Chylis'ma*, *Ecchylo'ma*, *Apothlim'ma*, *Juice*, (F.) *Suc*. The fluid obtained by pressing plants, flesh, &c.; *succus expres'sus*. It is also applied to certain animal fluids, as *S. Gastricus*, &c.

**SUCCUS ACACIÆ GERMANICÆ INSPISSATUS**, see *Prunus spinosa*—*s. Acaciæ nostratis*, see *Prunus spinosa*—*s. Cicutæ spissatus*, *Extractum conii*—*s. Cyrenaicus*, *Laserpitium*.

**SUCCUS ENTERICUS**, *S. intestinal'is*, *Intestinal Juice*. The fluid secreted from the lining membrane of the small intestines.

**SUCCUS EXPRESSUS**, *Apothlimma*—*s. Gastricus*, *Gastric juice*—*s. Intestinalis*, *Succus entericus*—*s. Japonicus*, *Catechu*—*s. Nervus*, *Nervous fluid*—*s. Nutritivus*, *Chyle*—*s. Pancreaticus*, see *Pancreas*—*s. Spissatus Aconiti Napelli*, *Extractum aconiti*—*s. Spissatus atropæbelladonnæ*, *Ext'actum belladonnæ*—*s. Spissatus conii maculati*, *Extractum cicutæ*—*s. Spissatus hyoscyami nigri*, *Extractum hyoscyami*—*s. Spissatus lactucæ sativæ*, *Extractum lactucæ*.

**SUCCUSSION**, *Hippocrat'ic Succus'sion*, *Succus'sio*, from *succutio*, (*sub* and *quatio*), 'I shake from beneath.' A mode of ascertaining the existence of a fluid in the thorax, by giving the body one or more slight shakes.

**SUCCUSSION**, *Ballottement*.

**SUCHOR**, *Saccharum*.

**SUCKING**, *Suctio*, *Suctus*, *Athelz'is*, *Bdalis*, *Myz'ois*, (F.) *Succion*; from *sugro*, *suctum*, 'to suck.' The act of drawing liquid into the mouth, by forming a vacuum with the tongue acting as a piston, during inspiration.

**SUCKING CHILD**, *Lactens*. A suckling.

**TO SUCKLE**, *Lactare*, γαλακτοποιεῖν, τινθρῆσαι. (F.) *Allaiter* or *Alaiter*. To give suck. To nurse.

**SUCKLING**, *Lactation*, *Sucking child*.

**SUCRE**, *Saccharum*—*s. Candy*, *Saccharum candidum*—*s. de Lait*, *Sugar of milk*—*s. de Saturnis*, *Plumbi superacetatæ*.

**SUCTIO**, *Exsuctio*, *Sucking*.

**SUCTION POWER**. The force exerted on the blood in the veins, by the active dilatation of the heart. See *Derivation*.

**SUCTUS**, *Sucking*.

**SUDAMINA**, *Hydro'ata*, *Hidro'ata*, *Hidro'ta*, *Papulæ sudorales*, *Suffersu'ra*, *Alha'sef*, *Planta noctis*, *Boa*; from *sudor*, 'sweat.' Small vesicles, which appear upon the skin, especially in the summer time, in hot countries, and in diseases attended with much sweating. It is a miliary eruption. See *Miliary fever*.

**SUDAMINA**, *Desudatio*, *Echaubouloures*, *Lichen tropicus*.

**SUDARIUM**, *Achicolum*, *Vaporarium*.

**SUDATIO**, *Hidrosis*.

**SUDATORIA**, *Hidrosis*—*s. Maligna*, see *Sudor Anglicus*.

**SUDATORIUM**, *Achicolum*, *Vaporarium*.

**SUDOR**, *Hidros*, (F.) *Sueur*, 'sweat.' The

product of cutaneous transpiration, when visible on the surface of the body. It is colourless; of an odour more or less strong and variable; and of a saline taste. It is composed, according to Berzelius, of water, lactic acid, lactate of soda united with a little animal matter, chloride of sodium, and a little chloride of potassium, an atom of earthy phosphate, and some oxyd of iron.

**SUDOR**, Miliary fever.

**SUDOR ANGLICUS**, *Hidron'osus*, *Hidrop'gra*, *Hidropyr'etos*, *Febris sudato'ria*, *Milia'ris sudato'ria*, *Sudor milia'ris*, *Morbis sudatorius*, *Ephem'era maligna*, *E. sudatoria*, *E. Britannica*, *Pestis Britannica*, *Sudato'ria maligna*, *E. Anglica pestilens*, *Sweating Sickness*, *Sweating fever*, (F.) *Suette*, *S. Miliare*, *S. Epidémique*, *Sueur Anglaise*. A very severe epidemic disease, characterized by profuse sweating, which appeared in England in 1486; and recurred, at different times, until about the middle of the 16th century. It was accompanied with coldness, excessive prostration of strength, palpitation, frequency and inequality of the pulse, &c., and terminated favourably or unfavourably in the course of 24 hours. The French have given the name *SUETTE DE PICARDIE*, *Suette des Picards*, *Fievre suante*, *Miliaris sudatoria*, *Sudor Picard'icus*, to an epidemic disease, which has appeared several times in that province; the principal symptoms of which were, profuse sweats, and a miliary eruption. The disease recurred in 1821, and has been described, at length, by M. Rayer, who considers it to consist of a simultaneous state of inflammation of various tissues; and proposes to class it with variola, scarlatina, and measles.

**SUDOR COLLIQUATIVUS**, *S. Profusus*.

**SUDOR CRUENTUS**, *S. sanguineus*, *Hæmatidros'is*, *Hæmatidros'is*, *Ephidros'is cruenta*, *Hæmorrhag'ia per Cutem*, (F.) *Hæmatidrose*, *Sueur de Sang*; *Sweating of blood*, *Bloody sweat*, *Hæmorrhage from the skin*. Cutaneous perspiration intermixed with blood:—a very uncommon affection.

**SUDOR DULCIS**, *Saccharorrho'a cutanea*, *Ephidros'is saccharata*. A discharge of saccharine matter by perspiration.

**SUDOR LOCALIS**, *Meridros'is*—*S. Miliaris*, Miliary fever, *Sudor Anglicus*—*S. Partialis*, Meridros'is.

**SUDOR PERFUSUS**, *S. Colliquativus*. A profuse or immoderate sweat.

**SUDOR SANGUINEUS**, *Sudor cruentus*—*S. Universalis*, Panhidros'is.

**SUDORIFER**, *Sudoriferous*, *Sudorific*.

**SUDORIFEROUS**, *Sudorifer*, *Hydroph'orus*, from *sudor*, 'sweat,' and *fero*, 'I carry.' That which carries sweat, as the *sudoriferous* ducts or glands.

**SUDORIFIC**, *Sudorif'icum*, *Sudorifer*, *Hidrot'icum*, *Hydrot'erium*, *Hydrotop'um*, *Hidropot'icum*, from *sudor*, 'sweat,' and *facio*, 'I make.' A medicine which provokes sweating. See Diaphoretic.

**FOUR SUDORIFIC WOODS**, *Quatuor ligna sudorifica*, were, formerly, *guaiacum*, *perfumed cherry*, *sarsaparilla*, and *sassafras*.

**SUDORIPAROUS**, see Perspiration.

**SUDORIS NULLITAS**, *Anidros'is*—*S. Privatio*, *Anidros'is*—*p. Suppressio*, *Iachidros'is*.

**SUET**, *Sevum*.

**SUETTE**, *Sudor Anglicus*—*S. Epidémique*,

*Sudor Anglicus*—*S. Miliare*, *Sudor Anglicus*—*S. de Picardie*, *Sudor picardicus*—*S. des Picards*, *Sudor picardicus*.

**SUEUR**, *Sudor*—*S. Anglaise*, *Sudor Anglicus*—*S. d'Expression*, *Expression*, *sweat of S. de Sang*, *Diapedesis*, *Sudor cruentus*.

**SUFFERSURÆ**, *Sudamina*.

**SUFFIMEN**, *Suffimentum*.

**SUFFIMENTUM**, *Hypocapsis'ma*, *Suffimen*, *Thymis'ma*, *Suffitus*, *Suffumigatio*, (F.) *Parfum*. A perfume. A fumigation.

**SUFFITIO**, *Fumigation*.

**SUFFITUS**, *Fumigation*, *Suffimentum*.

**SUFFLATIO**, *Puffiness*.

**SUFFOCATIO**, *Suffocation*, *Orthopnoea*—*S. Hypochondriaca*, *Hypochondriasis*—*S. Hysterica*, *Angone*—*S. Stridula*, *Cynanche trachealis*—*S. Uterina*, *Angone*.

**SUFFOCATION**, *Suffocatio*, *Præfocatio*, *Apopn'xis*, *Asphyxia*, *Melane'ma*, from *sub*, 'under,' and *focus*, 'a fire-place.' Death, or suspended animation from impeded respiration, whether caused by the *inhalation of noxious gases*, *drowning*, *hanging*, *strangling*, or *smothering*. The principal morbid appearances in such cases are:—the lungs of a deep blue colour, with the blood extravasated in the air-cells; right auricle and ventricle filled with dark blood, as well as the neighbouring veins; lividity of the countenance, turgescence, and, perhaps, rupture of the vessels of the brain.

*Treatment of suspended animation by suffocation in general.* The patient must be conveyed into a room not too warm. Blood-letting must be used, if at all, with caution:—friction must be employed with salt or warm flannels: stimulating fluids, in a dilute state, be poured into the stomach by means of a tube, and attempts be made to inflate the lungs. Laryngotomy, if necessary.

**SUFFOCATION**, *Præfocatio*, (F.) *Étouffement*. is used for threatened suffocation, as *strangling* is. It means the state of dyspnoea and oppression experienced when a sufficient quantity of air does not enter the lungs, or when the chemical phenomena of respiration are imperfectly executed; as in cases of asthma.

**SUFFOCATION UTERINE**, *Hysteria*.

**SUFFRAGO**, *Poples*.

**SUFFUMIGATION**, *Suffimentum*.

**SUFFUMIGIUM**, *Fumigation*.

**SUFFUMINATIO**, *Fumigation*.

**SUFFUSIO**, *Pseudoblepsia*—*S. Auriginosa*.

**Icterus**—*S. Bilis*, *Icterus*—*S. Colorans*, *Chromopsia*—*S. Dimidians*, *Hemioptia*—*S. Exclarans*, *Oxyopia*—*S. Fellis*, *Icterus*—*S. Lentis* crystalline, *Cataract*—*S. Metamorphosis*, *Metamorphopsia*—*S. Multiplicans*, see *Diplopia*—*S. Myodes*, *Metamorphopsia*—*S. Nigra*, *Amaurosis*—*S. Oculi*, *Cataract*, *Pseudoblepsia*—*S. Oculorum*, *Metamorphopsia*—*S. Radians*, *Scotasma*—*S. Sanguinis*, *Ecchymoma*.

**SUGAR**, *Saccharum*—*S. Barley*, *Penidium*—*S. Candy*, *Saccharum candidum*—*S. Cane*, see *Saccharum*—*S. of Lead*, *Plumbi superacetat*—*S. Pine*, see *Arrowroot*.

**SUGAR OF MILK**, *Saccharum lactis*, *Galactosaccharum*, (F.) *Sucre de Lait*, is obtained from whey by evaporation and crystallization. It possesses the demulcent properties of the sugars.

**SUGARS**, *VARIOUS*, see *Saccharum*.

**SUGGILLATION**, *Sugillatio*, *Lévor*, *Se-*

*gillation*, *Œdema cruentum*; a *bruise*; from *sugillare*, 'to give a black eye.' By most authors used synonymously with *ecchymosis* and *ecchymoma*. It is, also, applied to the spots, or *ecchymoses* which occur in consequence of intrinsic causes,—in disease and in incipient putrefaction. It is common in dead bodies. To this last case it is, indeed, restricted by some medico-legal writers; and an interesting question sometimes arises—Whether the appearance have been induced before death or afterwards? Whether it be a case of *ecchymosis* or of *sugillation*? In the former, the extravasated blood will usually be coagulated; not so in the latter. It is often, however, difficult to form a correct judgment without reference to the history of the case.

**SUGGRUNDIUM**, perhaps from *suggeredi*, 'to go under.' The eave of a house.

**SUGGRUNDIUM OCULI**, Superciliary arch.—*Superciliorum*, Frontal protuberance.

**SUICIDA**, Autochir.

**SUICIDAL INSANIUM**, Suicide.

**SU'ICIDE**, *Suici'dium*: from *suus cædes*, 'murder of one's self.' The act of killing one's self. *Autoch'ria*, *Autoctonia*, *Idioctonia*, *Autophon'ia*. Suicide is very frequently the result of disease of the mind; the individual seeming, at times, to be irresistibly impelled to self-destruction.—*Melancho'lia Suicid'ium*, *M. autoch'ria*, *Suicidal Insaniy*. Also, one who commits self-murder.

**SUIE**, Fuligo.

**SUIF**, Sevum.

**SUITES DE COUCHES**, Lochia.

**SULCATUS**, *Cannelé*, Grooved.

**SULCULUS LABII SUPERIORIS**, *Lacuna Labii superioris*.

**SULCUS**, *Semicana'tis*, *Semicanalic'ulus*. A furrow. A groove. (F.) *Sillon*. Anatomists have given this name to grooves on the surface of bones and other organs.

French writers on anatomy often use the term *Sillons* for the grooves which lodge the arteries and creep on the surface of bones; whilst those that receive veins are called *gouttières*, 'gutters.' Also, the *Vulva*.

**SULCUS ANTERO-POSTERIOR JECORIS**, see *Liver*—*s. Labii superioris*, *Lacuna Labii superioris*—*s. Transversalis*, see *Liver*—*s. Umbilicalis*, see *Liver*.

**SULFATE D'AMMONIAQUE**, Ammoniac sulphas.

**SULFIDUM CARBONII**, Carbonis sulphuretum.

**SULFUR**, Sulphur.

**SULFURE DE CARBON**, Carbonis sulphuretum.

**SULPHAS ALUMINARIS**, *Alumen*—*s. Ammoniacæ Cupratum*, *Cuprum ammoniatum*—*s. Cadmicus*, *Cadmii Sulphas*—*s. Kalico-aluminicum*, *Alumen*—*s. Natricus*, *Soda*, sulphate of—*s. Zincicus*, *Zinci sulphas*.

**SULPHUR**, *Sulfur*, *Scorith*, *Thei'on*, *Thion*, *Averich*, *Terra folia'ta*, *Fumus ci'rinus*, *Ag'nilla*, *Brimstone*, (F.) *Soufre*. The *Native Sulphur* is called *Rock Sulphur*, *Sulphur vivum*, &c. Sulphur, as we meet with it, is in *rolls*, *Sulphur in rot'ulis*, *S. rotun'dum*, *Roll Brimstone*. It is a volcanic production, and is obtained, in large quantities, from *Solfatara*, in Italy. *Roll Sulphur* is impure sulphur, melted, and run into moulds. It is unpleasantly

odorous, when heated or rubbed; insipid; solid, and brittle. *S. g.* 1.99. Fusible at 226°; volatilizable by heat, and condensing unchanged.

**SULPHUR ANTIMONIATUM**, *Antimonii sulphuretum præcipitatum*—*s. Carburet of Carbonis sulphuretum*—*s. Iodatium*, see *Iodine*—*s. Iodide of*, see *Iodine*—*s. Liver of Potassæ sulphuretum*, **SULPHUR LOTUM**, *Sulphur sublimatum lotum*. *Washed Sulphur*, *Magisterium Sulphuris*, *Sulphuris Flores loti*, is prepared by pouring boiling water on sublimed sulphur, so as to wash away any acid it may contain, and then drying it.

**SULPHUR PRÆCIPITATUM**, *Lac Sulphuris*, *Milk of Sulphur*, *Præcipitated Sulphur*, (F.) *Crème de Soufre*, is prepared by boiling sublimed sulphur and lime together, and adding muriatic acid to precipitate the sulphur.

**SULPHUR SUBLIMATUM**, *Sulphur*, (Ph. U. S.) *Sublimed Sulphur or Flowers of Sulphur*, (F.) *Soufre sublimé*, *Fleurs de Soufre*, is the sulphur of commerce, sublimed in close vessels.

Sulphur is possessed of stimulant, laxative, and diaphoretic properties. As a laxative, it is used in hemorrhoidal and other affections. In the itch, applied externally and taken internally, it has been considered as a specific (?), and it is a valuable remedy in most cutaneous affections that are local. Dose, ʒss to ʒij.

The fæces or dregs, left in the purification or sublimation of sulphur, are called *Horse Brimstone*, *Dregs of Sulphur vivum*, *Sulphur caballinum*, *S. vivum*, *Sulphuris vivi recrementa*. They are very impure, and are only used externally.

**SULPHUR VEGETABLE**, *Lycopodium*—*s. Wort*, *Peucedanum*.

**SULPHURATUS**, *Sulphureous*, *Sulphurated*. **SULPHUREOUS**, *Sulphureous*, *Sulphuratus*, *Sulphuretted*. Possessing the properties of, or relating to sulphur.

**SULPHURETTED**, *Sulphureous*—*s. Hydrogen*, see *Hydrogen*, sulphuretted.

**SULPHURETUM AMMONIACÆ**, *Ammoniac sulphuretum*—*s. Ammoniac hydrogenatum*, *Liquor fumans Boylii*—*s. Kalicum*, *Potassæ sulphuretum*—*s. Lixiviæ*, *Potassæ sulphuretum*.

**SULPHURIC ACID**, *Ac'idum Sulphuricum* vel *Sulfuricum*, *Oleum Vitrioli*, *Spiritus Vitrioli*, *S. v. fortis*, *Acidum vitriolicum*, *Oil of Vitriol*, *Spirit of Vitriol*, *Vitriolic Acid*, *Acidum Vitrioli dephlogistica'tum*, *Acor Sulphuris*, (F.) *Acide Sulphurique* ou *Sulfurique*. Sulphuric acid is inodorous; has a strong acid taste, and is corrosive. *S. g.* 1.845 (Ph. U. S.) It is escharotic, stimulant, rubefacient. Mixed with lard, it is sometimes used in local pains, and certain cutaneous affections.

**SULPHURIC ACID, AROMATIC**, *Ac'idum Sulphuricum Aromaticum*, *A. vitriolicum aromaticum*, *A. vitriolicum alcohol'le aromaticum*, *Elizir vitrioli*, *E. v. aromaticum*, *E. vitrioli Myrsinick'ti*, *E. vitrioli Edinburgen'sium*, *E. vitrioli cum tinctura aromati'ca*, *E. vitrioli dulc' seu acido-aromaticum*, *Alcohol cum aromatibus sulphuricatus*, *Tinctura acidi sulphurici*, is formed of sulphuric acid, f. ʒijss; ginger, bruised, ʒj; cinnamon, bruised, ʒiiss; Alcohol, Oij.—Ph. U. S. Dose, gr. x to xxx. Ph. L.

**SULPHURIC ACID, DILUTED**, *Ac'idum Sulphuricum Dilutum*, *Acidum vitriolicum dilutum*, *Elizir of Vitriol*, *Elizir vitrioli*, *Spiritus vitrioli ad'idus Vogleri*, (F.) *Acide sulfu-*

*riqus délayé*, is formed, according to the Pharmacopœia of the United States, by adding *aq. destillat.* f. ℥xij, to *acid. sulph.* f. ℥j. It is tonic, astringent, and refrigerant. Dose, gr. x to xx, largely diluted. When used as a gargle, half a drachm may be added to ℥vj of water.

Very dilute sulphuric acid was formerly termed *Phlegma vitrioli*.

**SULPHURIS IODIDUM**, *Podide of Sulphur*, see Iodine. It is thus directed to be prepared in the Pharmacopœia of the U. S. (1842). (*Iodin.* ℥iv; *sulphur.* ℥j.) Rub the iodine and sulphur together in a glass, porcelain, or marble mortar, until they are thoroughly mixed. Put the mixture into a matrass, close the orifice loosely, and apply a gentle heat, so as to darken the mass without melting it. When the colour has become uniformly dark throughout, increase the heat so as to melt the iodide; then incline the matrass in different directions, in order to return into the mass any portions of iodine which may have condensed on the inner surface of the vessel: lastly, allow the matrass to cool, break it, and put the iodide into bottles, which are to be well stopped.

**SULPHURIUS**, Sulphureous.

**SULPHUROSUS**, Sulphureous.

**SULPHUROUS ACID**, *Ac'idum sulphuro'sicum*, *A. sulph'uris volat'ile*, *A. Sulphuro'sum* vel *Sulfurosum*, *Spir'itus sulphuris*, *Spiritus sulphuro'sus volat'ilis*, *Sp. sulphuris per campanam*, *Sp. vitrioli phlogistica'tus*, *Gas sulphuris*, (F.) *Acide Sulfureux*, *Air Acide Vitriolique*. Obtained by treating mercury with concentrated sulphuric acid, or by burning sulphur. It is sometimes used in the gaseous,—at others, in the liquid state. Sulphurous acid gas is used to disinfect cloths, confined air, letters coming from infected places, &c. It is also exhibited, with great success, in the form of fumigation, in the treatment of certain chronic cutaneous affections, and of sciatic and rheumatic pains in general. If respired pure, it acts in the manner of violent irritants; and is not long in producing death.

**SULTZMALT**, **MINERAL WATERS OF Sultzmalt** is a village in the department of the Upper Rhine; where are several sources of cold, acidulous waters, which seem to contain carbonic acid, subcarbonate of soda, subcarbonate of lime, sulphate of lime, and a little bitumen. They are refrigerant, aperient, and alterative.

**SUMAC DES CORROYEURS**, *Rhus coriaria*—s. *Vénéneux*, *Rhus toxicodendron*.

**SUMACH**, *Rhus coriaria*.

**SUMEN**, Hypogastrium.

**SUMMER COMPLAINT**. A popular name in the United States, for diarrhœa occurring in summer. It is often, also, made to include dysentery and cholera infantum: with some it means cholera infantum only.

**SUMMER DISEASES**, see Estival—s. Rash, Lichen tropicus.

**SUMMITAS CUTIS**, Epidermis.

**SUMMUS HUMERUS**, Acromion.

**SUNBURN**, *Ephelides*—s. Dew, *Drosera rotundifolia*—s. Flower, false, *Helenium autumnale*—s. Flower, swamp, *Helenium autumnale*—s. Pain, see *Hemicrania*—s. Rash, Lichen—s. Stroke, *Coup de Soleil*.

**SUNSTROKE**, *ÉgYPTIAN*, *Coup de Soleil*.

**SUPELLECTILE** **DIAGENIS**, Palm.

**SUPELLEX ANATOMICA**, Museum anatomicum—s. *Diogenis*, Palm.

**SUPER**. A common Latin prefix; in composition, signifying 'above.'

**SUPERBUS**, Rectus superior oculi.

**SUPERCILIARIS**, Corrugator supercilii.

**SUPERCILIARY**, *Superciliaris*, from *super*, 'above,' and *cilium*, 'the edge of the eyelid.' That which relates to the supercilia or eyebrows. (F.) *Sourcilier* ou *Surcilier*.

**SUPERCILIARY ARCHES**, *Superciliary Ridge*, *Arcus superciliar'es*, *Suggrun'dia oculor'um*, (F.) *Arcades sourcil'ères*, are two slightly projecting apophyses, situate at the anterior surface of the os frontis, above the superior margin of the orbits. They are separated by the nasal *bosses*, and covered by the superciliaris muscle, to which they give attachment.

**SUPERCILIARY RIDGES**, *Superciliary arches*.

**SUPERCILIUM**, *Ophrys*, *Oph'rya*, *Vallum*, (F.) *Sourcil*. Same etymon. The eyebrows are two arched eminences,—convex above, and more or less prominent, according to the individual,—which lie on the superciliary arch of the os frontis, above the eyelids, and extend from the sides of the root of the nose to the temple. Their inner extremity or *head* is more prominent than the outer or *tail*. The eyebrows are covered with short and stiff hairs, which are directed, obliquely, from within outwards, and are, commonly, of the colour of the hair. The skin in which these hairs are implanted, rests on the *orbicularis palpebrarum*, *frontalis*, and *superciliaris* muscles, which move the eyebrows in different directions. The eyebrows serve as an ornament to the countenance; and by covering the eye defend it from the impression of too strong a light. They direct the perspiration also from the eye.

**SUPERCILIUM ACETAB'ULL**. The edge of the cotyloid cavity of the os innominatum.

**SUPEREVACUATIO**, Hypercrisis.

**SUPERFECUNDATIO**, Superfœtation.

**SUPERFICIES PLANTARIS PEDIS**, Sole.

**SUPERFECUNDATIO**, Superfœtation.

**SUPERFETATIO**, Superfœtation.

**SUPERFETATIO**, *Superfœtatio*, *Superfœtatio*, *Epicyo'sia*, *Hypercyo'sis*, *Superimpregnatio*, *Epig'onè*, *Superfœcundatio*, *Epicyo'ma*, *Superfœcundatio*, from *super*, 'upon,' and *fœtare*, 'to bring forth young.' Conception of a fœtus—*epicyo'ma*—in a uterus which already contains one. The impregnation of a female already pregnant. The possibility of this has been denied; but there is abundant evidence to show, that it is possible at a very early period of pregnancy.

**SUPERGEMINALIS**, Epididymis.

**SUPERGENUALIS**, Patella.

**SUPERHUMERALE**, Epomis.

**SUPERIMPRÆGNATIO**, Superfœtation.

**SUPERIOR AURIS**, Attollens aurem—s. Rotundus clitoridis, Ischio-cavernosus.

**SUPERLABIA**, Clitoris.

**SUPERLIGAMEN**, Epidesmus.

**SUPERLIGULA**, Epiglottis.

**SUPERNUTRITIO LIENIS**, Splenocœcus—s. Splenis, Splenocœcus.

**SUPEROXALAS KALICUM**, Potass, oxalate of.

**SUPERPURGATIO**, Hypercatharsis.

**SUPERSCAPULARIS**, *Supraspinatus*—s. Inferior, *Infra-spinatus*.

**SUPINATEUR COURT ou PETIT**, Supinator radii brevis—s. *Grand ou long*, Supinator radii longus.

**SUPINATION**, *Supinatio*, from *supinus*, 'lying on the back.' The movement in which the forearm and hand are carried outwards, so that the anterior surface of the latter becomes superior.

In Pathology, *Supination*, *Supinatio*, *Hyp-tias'ma*, *Hyp-tias'mus*, means the horizontal position on the back, with the head thrown back, and the legs and arms extended. It is often a sign of great weakness in disease.

**SUPINATOR**. Same etymon. That which produces supination. A name given to two muscles of the forearm.

**SUPINATOR BREVIS** seu **MINOR**, Supinator radii brevis—s. Longus seu major, Supinator radii longus.

**SUPINATOR RADII BREVIS**, S. *brevis* seu *minor*, (F.) *Epicondylo-radial* (Ch.), *Supinateur court ou petit supinateur*. A muscle, seated at the outer and back part of the forearm. It is flattened, triangular, and curved upon itself, in such a manner that it embraces the superior extremity of the radius. It is attached, on the one hand, to the external tuberosity of the humerus, and to a small portion of the posterior surface of the ulna, and is inserted into the upper third of the outer and upper surfaces of the radius. It produces, by contracting, the motion of supination.

**SUPINATOR RADII LONGUS**, S. *longus* sive *major*, *Brachio-radialis*, (F.) *Huméro-sus-radial* (Ch.), *Long ou grand supinateur*, is seated at the anterior and outer part of the forearm. It arises from the inferior part of the outer edge of the os humeri, and from the external intermuscular aponeurosis; and is inserted, by a long tendon, into the outer edge of the radius, near the base of the styloid process. It causes the supination of the forearm, which it can likewise bend on the arm.

**SUPPEDANEA**, Hypopodia.

**SUPLANTALIA**, Hypopodia.

**SUPPLEMENTA EPIPLOICA**, Epiploic appendages.

**SUPPORTER, ABDOMINAL**, Belt, Russian. **SUPPOSITION DE PART**, Pregnancy, pretended.

**SUPPOSITORIUM**, Suppository—s. Uterinum, Pessary.

**SUPPOSITORY**, *Suppositorium*, *Hypotheton*, *Bacillus*, *Balanismus*, *Balanus*, *Glans*, from *supponere*, (*sub*, and *ponere*, 'to put,') 'to put under.' Any solid medicine, in the form of a cone or cylinder, intended to be introduced into the rectum;—either for the purpose of favouring intestinal evacuations, or to act as an anodyne. Purgative suppositories are made of soap, aloes, or any other irritating substance.

**SUPPRESSIO ALVI**, Constipation—s. *Lo-chiorum*, *Ischolochia*—s. *Lotii*, *Ischuria*—s. *Mensium*, *Amenorrhœa*—s. *Menstruationis*, *Amenorrhœa*—s. *Sudoris*, *Ischidrosis*.

**SUPPRESSION DU FLUX MENSTRU-EL**, *Amenorrhœa*—s. *de Part*, see Parturition—s. *d'Urine*, *Ischuria*.

**SUPPURANS**, Suppurative.

**SUPPURATION**, *Suppuratio*, *Ecpyema*, *Purulentia*, *Pyosis*, *Pyosis*, *Diapysma*, *Diapysis*, *Pyogenia simplex*, (F.) *Aboutissement*.

Formation or secretion of pus, (see, also *Pyogenia*), from *sub*, 'under,' and *pus*. It is a frequent termination of inflammation, and may occur in almost all the tissues. This termination is announced by slight chills; by remission of the pain, which, from being lancinating, becomes heavy; by a sense of weight in the part, and, when the collection of pus can be easily felt, by fluctuation. When pus is thus formed in the cellular membrane, and is collected in one or more cavities, it constitutes an *abscess*. If it be formed from a surface exposed to the air, it is an *ulcer*: and such ulcers we are in the habit of establishing artificially in certain cases of disease.

**SUPPURATIVE**, *Suppurans*, *Suppurativus*, *Diapysiticus*, *Ecpyoticus*, *Ecpyiscontus*. That which facilitates suppuration. Suppuratives are, generally, vesicants mixed with lard.

**SUPRA**. A common Latin prefix: in composition, signifying 'above.'

**SUPRA-COSTALES**, *Levatores Costarum*, (F.) *Sur-costaux*, from *supra*, 'above,' and *costa*, 'a rib.' A name given to twelve small, fleshy fasciculi, which are flattened, triangular, and with radiating fibres. They pass from the transverse processes of the dorsal vertebrae to the superior margin of the rib beneath. Spigelius, Cowper, Boyer, Chaussier, and others consider them to form part of the intercostales externi.

**SUPRA-ORBITAR**, *Supra-orbitalis*, *Supra-orbitarius*, (F.) *Sus-orbitaire*, from *supra*, 'above,' and *orbita*, 'the orbit.' That which is situate above the orbit.

**SUPRA-ORBITAR FORAMEN**, *Foramen Supra-orbitarium*, *F. orbitarium superius*, (F.) *Trou sus-orbitaire ou orbitaire superieur*, is a foramen or notch completed by a ligament at the inner third of the orbital arch. It gives passage to the *supra-orbital* or *superciliary artery*, a branch of the ophthalmic, which ascends the forehead, and is distributed thereto.

**SUPRA-PUBIAN**, *Supra-pubic*, *Supra-pubiana*, from *supra*, and *pubes*. That which is seated above the pubis.

**SUPRA-PUBIAN NERVE**, (F.) *Nerv sus-pubien*, is the internal ramus of the inguino-cutaneous branch of the first lumbar nerve. It is the *genito-crural* branch of Bichat. It descends almost vertically before the psoas muscle; and, near the crural arch, divides into two branches. One of these accompanies the spermatic cord, and is distributed to the cremaster, scrotum, and integuments on the inner part of the thigh. The other issues from the pelvis with the femoral filaments; traverses the aponeurosis of the thigh, and is distributed to the integuments of the upper and anterior part of the limb.

**SUPRA-RENAL**, *Supra-renal*, (F.) *Sur-rénal*, from *supra*, 'above,' and *ren*, 'the kidney.' Seated above the kidney—as the *supra-renal* capsule.

**SUPRA-SCAPULARIS**, *Supra-spinatus*.

**SUPRA-SEMIORBICULARIS**, *Orbicularis oris*.

**SUPRA-SPINATUS**, *Supra-spino'sus*, (F.) *Sur-épineux*, *Sus-épineux*, from *supra*, and *spina*. That which is seated above the spine.

**SUPRA-SPINATA FOSSA**, (F.) *Fosse sus-épineuse*, is a triangular depression above the spine of the scapula.

**SUPRA-SPINATUS MUSCLE**, *Super-scapularis*,

(F.) *Sus-spino-scapulo-trochitèrien*, *Petit scapulo-trochitèrien*, (Ch.) *Supra-scapularis*, is situate in the fossa supra-spinata. It is elongated, thick, and triangular, and is attached, on the one hand, to the two inner thirds of the fossa supra-spinata; and terminates, on the other, at the anterior part of the great tuberosity of the humerus. This muscle raises the arm.

SUPRA-SPINO'SA LIGAMENTA, *Supra-spinal ligaments*, are two in number. 1. The *Dorso-lumbo-supra-spinal ligament*, (F.) *Ligament sur-épineux dorso-lombaire*, extending above the spinous processes of the dorsal and lumbar vertebrae from the 7th cervical as far as the median crista of the sacrum. 2. *Cervical-supra-spinal ligament*, (F.) *Ligament-sur-épineux cervical*, which extends above all the cervical spinous processes, and is attached, above, to the outer occipital protuberance.

SUR, *Supra*. A French prefix, signifying 'above.'

SURA, *Gastrocnemè*, *Gastrocnèmia*, *Gastrocnemium*; calf of the leg, (F.) *Mollet*, *Gras de Jambè*. The projection, formed at the posterior part of the leg by the gastrocnemii muscles. Also, the fibula.

SURCILIER, *Corrugator supercilii*, *Superciliary*.

SURCOSTAUX, *Supracostales*.

SURCULI FELLEI, *Pori biliarii*.

SURCULUS, *Ramusculus*.

SURDENT (F.), *supra*, 'above,' and *dens*, 'a tooth.' When a milk tooth does not fall out at the period of the second dentition, but is merely forced to one side by the new tooth, it is called a *surdent*.

SURDITAS, *Cophosis*, *Deafness*.

SURDITÉ, *Cophosis*, *Deafness*.

SURDOMITTAS, *Deaf-dumbness*.

SUREAU COMMUN, *Sambucus*.

SURELLE, *Oxalis acetosella*.

SURÉPINEUX, *Supraspinatus*.

SUR-EXCITATION, see *Excitement*, and *Super-excitation*.

SURFEIT, *Colica crapulosa*.

SURGEON, *Chirurgèon*; old French, *Surgien*, *Chiro'nax*, *Chirurgus*, *Vulnerum medicus*, *Chiriat'er*, *Chiriat'rus*, *Tàrus*, (F.) *Chirurgien*, from *χειρ*, 'the hand,' and *εργον*, 'work.' One who practises surgery. The surgeon, says Celsus, ought to be young, or, at all events, not advanced in life. His hand must be steady, expert, and never tremulous: he must use the right or left with equal facility: his sight must be clear and penetrating: his mind intrepid; and although unmoved when he proceeds to operate, he must not be in haste, nor cut less than is necessary, but finish his operation, as if the cries of the patient made no impression upon him.

SURGEON-APOTHECARY. One who unites the practice of surgery with that of the apothecary. A general practitioner.

SURGEON-DENTIST, *Dentist*.

SURGERY, *Chirurg'gia*, *Chiriat'ria*, *Chiriz'is*, *Ch'i'risis*, *Chiriz'is*, *Chiriz'mus*, *Metachiriz'is*, *Metachir'isis*, *Metachiriz'mus*, *Tractatio manuum r'ia*, *Medicina operati'va*, *Medicina eff'icax*, (F.) *Chirurgie*. The part of the healing art which relates to external diseases; their treatment; and, especially, to the manual operations adapted for their cure. Also, the office of a surgeon.

SURGERY, ANAPLASTIC, *Morioplastice*—s. *Antoplastic*, *Morioplastice*—s. *Dental*, *Dentistry*.

SURGERY, MILITARY, (F.) *Chirurgie militaire*, is that which relates to the operations to be performed on the field of battle, or subsequently;—with the attention to be paid to the wounded, &c.

SURGERY, OPERATIVE, is termed *Acur'gia*, *Acur'gia*, and *Aoidur'gia*.

SURGERY, PLASTIC, *Morioplastice*.

SURGICAL, *Chirurg'icus*, (F.) *Chirurgical*, *Chirurgique*. That which relates to surgery; as surgical anatomy, surgical operations, surgical instruments, &c.

SURGIEN, *Surgeon*.

SURINAMINE, see *Geoffræa Surinamensis*.

SUR-IRRITATION, see *Irritation*.

SUROXYGÉNÈSES. A name given by Baumes to diseases attributed by him to superabundance of oxygen.

SURPEAU, *Epidermis*.

SURRECTA ALBA, *Ranunculus flammula*.

SUR-RÉNAL, *Supra-renal*.

SURROGATUM, *Succedaneum*.

SURSELS, see *Salt*.

SURTOUTS LIGAMENTEUX DE LA COLONNE VERTÉBRALE, *Vertebral ligaments*.

SURUMPE (S.) A disease to which the traveller in the Cordilleras is liable. It consists of a violent inflammation of the eyes, caused by the reflection of the bright rays of the sun. The eyes become violently inflamed, and the lids swell and bleed. The pain is intense, and frequently induces delirium.—Tschudi.

SURVIE, *Survivorship*.

SURVIVORSHIP, (F.) *Survie*, from *super-vivere*, (*super*, and *vivere*), (F.) *survivre*, 'to live longer.' In legal medicine, this word means the probability that any individual has survived others in an accident, which has been fatal to all. This is often an important question, connected with the inheritance of property, and on which physiology can rarely afford more than presumptive grounds for conclusion.

SUS, *Supra*. A French prefix, signifying 'above.'

SUS-ACROMIO-HUMÉRAL, *Deltoid*.  
SUS-CARPIEN; from *sus*, (F.) 'above,' and *carpe*, 'the wrist.' Above the wrist. An epithet given by Chaussier to the dorsal artery of the wrist—*Artère sus-carpienne*—a branch of the radial.

SUS-ÉPINEUX, *Supraspinatus*—s. *Maxillo-labial*, *Levator anguli oris*—s. *Maxillo-labial*, *grand*, *Levator labii superioris alaque nasi*—s. *Maxillo-labial moyen*, *Levator labii superioris proprius*—s. *Maxillo-nasal*, *Compressor naris*—s. *Optico-sphéno-sclérotion*, *Rectus superior oculi*—s. *Orbitaire*, *Supra-orbital*—s. *Phalangien du pouce*, *Abductor pollicis brevis*—s. *Pubio-fémoral*, *Pectinalis*—s. *Scapulo-trochitèrien*, *le plus petit*, *Teres minor*—s. *Scapulo-trochitèrien*, *petit*, *Supraspinatus*—s. *Spino-scapulo-trochitèrien*, *Supraspinatus*.

SUSCEPTIBILITY, from *facilè suscipiens*, (*sus* or *sus*, and *capio*, 'I take,') 'easily taking, or undertaking.' Sensibility, in its most enlarged acceptation. Impressibility. This term, with the epithet *nervous*, is sometimes used for that increase in the moral sensibility which is particularly observed in nervous affections.

**SUSCEPTIO INTESTINORUM**, Intussusception.

**SUSPENDICULUM**, Cremaster.

**SUSPENSĀ**, Enæorema.

**SUSPENSOIRE**, Suspensory.

**SUSPENSORIUM**, Suspensory—s. Testis, Cremaster.

**SUSPENSORY**, *Suspensoryrius*, from *suspendere*, (sub or sus, 'under,' and *pendere*, 'to hang,') 'to hang under.' (F.) *Suspensoire*. That which sustains or suspends.

**SUSPENSORY BANDAGE**, *Suspensoryrius*, is a bandage intended to support the scrotum, in cases of disease of the testicle or of scrotal hernia. It consists of a kind of bag, fixed above to a cincture, and retained below by strings passing between the thighs, and fixed to the cincture behind.

**SUSPENSORY LIGAMENT OF THE LIVER**, *Ligamentum suspensorium hepatis*, *Perpendiculum hepatis*, is a triangular duplicature of the peritoneum, between the inferior surface of the diaphragm and the upper surface of the liver, which is continuous with the great falk of the umbilical vein.

**SUSPENSORY LIGAMENT OF THE PENIS** is a fibro-cellular fascia, of a triangular shape, which extends from the anterior part of the symphysis pubis to the corpus cavernosum, which it sustains. A similar ligament belongs to the clitoris.

**SUSPENSUM**, Enæorema—s. Urine, Enæorema.

**SUSPIRATIO**, Suspirium.

**SUSPIRATUS**, Suspirium.

**SUSPIRITUS**, Suspirium.

**SUSPIRIUM**, *Suspiratio*, *Suspiratus*, *Suspiritus*, from *sub* or *sus*, 'under,' and *spiro*, 'I breathe;' *Mygmus*, *Mychmus*, *Mychthismus*, *Stenagmus*, *Stenaxis*; a sigh, (F.) *Soupir*. A short breathing. A slow, voluntary contraction of the diaphragm and intercostal muscles, the effect of which is to restore the due relation between the circulation and respiration, or to free ourselves from an inconvenient sense of weight felt in the chest, when we are much depressed,—a weight, which appears to be chiefly dependent on the functions of the heart being disturbed through the moral influence. The sigh differs from the sob:—the latter being involuntary and spasmodic. Sighing, occurring in fevers to a great extent, indicates considerable depression. When accompanied with a vocal sound, it constitutes a *groan*.

**SUSPIRIUM CARDIACUM**, Angina pectoris.

**SUSTENTACULUM**, Aliment.

**SUSTENTATOR CLITORIDIS**, Erector clitoridis—s. Penis, Erector penis.

**SUSURRUS**, *Bourdonnement*—s. Aurium, Tinnitus aurium.

**SUTELA**, Suture.

**SUTERBERRY**, *Xanthoxylum fraxineum*.

**SUTORIUS**, Sartorius.

**SUTTER**, Saccharum.

**SUTURA ABDOMINALIS**, Gastroraphy—s. Arcualis, Coronal suture—s. Biparietalis, Sagittal suture—s. Clavata, Suture, quilled—s. Cranii squamosa, Squamous suture—s. Dentata, see Suture—s. Frontoparietalis, Coronal suture—s. Jugalis, Sagittal suture—s. Lambdoidalis, Lambdoid suture—s. Limbosa, see Suture—s. Lepidoidea, Squamous suture—s. Mendosa, Squamous suture—s. Notha, see Suture—s. Obe-

læa, Sagittal suture—s. Ossium Spuria, Harmony—s. Protra, Lambdoid suture—s. Punctata, Suture, common—s. Puppis, Coronal suture—s. Rhabdoidea, Sagittal suture—s. Serrata, see Suture—s. Serrata, Sagittal suture—s. Vera, see Suture.

**SUTURE**, *Sutura*, *Sute'la*, *Arme*, *Rhaphé*, from *suere*, *sutum*, 'to stitch;' *Dove-tail joint*, (F.) *Engrenure*. A kind of immovable articulation, in which the bones unite by means of serrated edges, which are, as it were, *dove-tailed* into each other. The articulations of the greater part of the bones of the skull are of this kind. The coronal, lambdoidal, and sagittal sutures are called *true sutures*, the two temporal are called *false sutures*, *suture nothæ*.

A *dentated suture*—*Sutura dentata*—is one in which the processes are long and dentiform, as in the interparietal suture. In a *serrated suture*—*sutura seu syntaxis serrata*—the indentations and processes are small and fine, like the teeth of a saw, as in the suture between the two portions of the frontal bone. In the *sutura limbo'sa* there is along with the dentated margins a degree of bevelling of one, so that one bone rests on the other, as in the occipito-parietal suture.

**SUTURE**, in *Surgery*, *Rhaphé*, means an operation which consists in stitching the lips of a wound to procure their union. The suture was, at one time, largely employed; but, in modern times, its use has been wisely restricted. There are few wounds in which the edges may not be brought together by adhesive plaster appropriately applied. This kind of union, by adhesive plaster simply, has been absurdly termed *Sutura sicca* or *dry suture*, in opposition to the *Sutura cruenta* or suture properly so called. The suture is generally performed with waxed thread and straight or curved needles, according to the arrangement of parts.

The chief sutures are the *interrupted suture*, the *quilled suture*, the *glover's suture*, and the *twisted suture*. 1. The **INTERRUPTED SUTURE**, (F.) *Suture à points séparés*, *Suture entrecoupée*, is performed by passing a needle, armed with a ligature, through the lips of the wound previously brought into contact; and then tying the extremities of the thread. The other stitches are made in the same manner. They are separate or interrupted. It is the suture most commonly used. 2. The **QUILLED SUTURE**, *Sutura clavata*, (F.) *Sutura enchevillée* ou *emplumée* ou *empennée*, *Compound Suture*, is merely the interrupted suture, with this difference, that the ligatures are not tied over the face of the wound, but over two quills or rolls of plaster, or bougies, which are laid along the sides of the wound. It is used by some surgeons, on account of there being less danger of the stitches tearing out. It is not much employed. 3. The **GLOVER'S SUTURE**, *Continuée Suture*, *Uninterrupted Suture*, (F.) *Suture de Pelletier*, *Suture en surget*, is executed by introducing the needle first into one lip of the wound from within outwards, then into the other in the same way; and, in this manner, sowing up the whole extent of the wound. It has been chiefly used in wounds of the intestinal canal. It is now rarely employed except for stitching up dead bodies. The common stitch or suture, *Sutura punctata*, (F.) *Suture à points passés*, has been used in similar cases. 4. The **ROYAL**

**STITCH or SUTURE** is the name of an old operation for the cure of bubonocoele. It consisted in putting a ligature under the hernial sac, close to the abdominal ring, and then tying that part of the sac, so as to render it impervious by the adhesive inflammation thus excited. 5. The **TWISTED SUTURE**, (F.) *Suture entortillée*, is employed, chiefly, to unite wounds of the cheeks and of the free edges of the lips. To perform it, a pin or needle is passed through the edges of the wound, so as to keep them accurately in contact. A piece of thread is then wound accurately round the pin, from one side of the division to the other, in the form of the figure  $\infty$ . The number of pins and sutures must, of course, correspond with the extent of the wound. This is the suture used in cases of harelip. 6. The **SUTURE À ANSE**, of Le Dran, has only been employed in cases of wounds of the intestines. For this purpose, the edges of the wound are brought together, and as many needles, with unwaxed threads, used as there are to be stitches. Each stitch is then made by passing a needle through the edges; and all the ligatures which belong to one side of the wound are tied together, and twisted so as to form a thread, which is fixed externally.

**SUTURE, COMPOUND**, Suture, quilled—s. Continued, Suture, glover's—s. *Écaillouse*, Squamous suture—s. *Empennée*, Suture, quilled—s. *Emplumée*, Suture, quilled—s. *Enchevillée*, Suture, quilled—s. *Entortillée*, Suture, twisted—s. *Entrecoupée*, Suture, interrupted—s. False, Harmony—s. *Occipitale*, Lambdoid suture—s. Occipito-parietal, Lambdoid suture—s. *de Pelletier*, Suture, glover's—s. *à Points passés*, Suture, common—s. *à Points séparés*, Suture, interrupted—s. Sagittal, see Sagittal suture—s. *Squameuse*, Squamous suture—s. *en Surgot*, Suture, glover's—s. Superficial, Harmony—s. Uninterrupted, see Suture, glover's.

**SWADDLING CLOTHES**, Swathing clothes.

**SWALLOW**, *Hirundo*—s. Wort, *Asclepias vincetoxicum*—s. Wort, orange, *Asclepias tuberosa*—s. Wort, tuberous-rooted, *Asclepias tuberosa*—s. Wort, white, *Asclepias vincetoxicum*.

**SWAMP CABBAGE**, *Dracontium fetidum*—s. Sickness, Milk sickness—s. Wood, *Cephalanthus occidentalis*, *Dirca palustris*.

**SWATHING CLOTHES**, *Swaddling Clothes*, *Incunabula*, *Fasciæ*, *Panni*, from Sax. *ƿeaban*, 'to bind.' (F.) *Maillet*. The kind of clothing or bandaging formerly applied to children during the first year of life. It is now, properly, laid aside, and every freedom allowed to muscular exertion.

**SWEAT**, *Sudor*—s. Bloody, *Sudor cruentus*—s. Scab, *Crusta genu equine*.

**SWEATING OF BLOOD**, see *Diapedesis*, and *Sudor cruentus*—s. Plant, *Eupatorium perfoliatum*—s. Sickness, *Sudor Anglicus*.

**SWEATING SICKNESS**, **MALWAH**. A disease which appears to be allied to the worst form of cholera, and to bear a close relation to malignant congestive fever. As its name imports, it occurs in Malwah in India.

**SWEET BITTER**, *Triosteum*—s. Bush, *Comptonia asplenifolia*—s. Fern, *Comptonia asplenifolia*—s. Flag, *Acorus calamus*—s. Pod, *Ceratonium siliqua*—s. Root, *Aralia nudicaulis*.

**SWELLING**, *Epanastema*, *Exar'tema*, *Exo'des'is*, *Presis*, *Preema*, *Oncus*, *Eatumefactio*,

*Tumor*, *Tumefactio*, (F.) *Enflure*, *Gonflement*, from Sax. *ƿeellan*, (D.) *swellen* (G.) *schwellen*, 'to swell.' Morbid increase of bulk in the whole, or a part, of the body. See *Tumour*.

**SWELLING**, **WHITE**, *Hydrarthrus*.

**SWERTIA CHIRAYITA**, *Gentiana chirayita*—s. *Difformis*, see *Calumba*—s. *Fraseræ*, see *Calumba*.

**SWIETE'NIA FEBRIFUGA**, *Feb'rifuge Swiete'nia*, (F.) *Mahogan fibrifuge*. *Family*, *Meliaceæ*. *Sax. Syst.* *Decandria Monogymia*. The bark of this tree, which is a native of the East Indies, and called there *Bokena Bark*, has an aromatic odour and bitter taste. It is tonic and stonachic, and has been used in intermittents, and in diseases where bitter tonics are indicated. Dose,  $\mathfrak{ʒ}$  to  $\mathfrak{ʒ}$ ij of the powder.

**SWIETE'NIA MAHOGANI**, *Mahogany Tree*, grows in the West Indies and tropical America, and is possessed of similar properties.

**SWIMMING**, *Natation*—s. of the *Head*, *Vertigo*.

**SWOON**, *Syncope*.

**SYALADENITIS**, *Inflammat'io glandularum salivalium*, from *saliva*, 'saliva,' *aden*, 'a gland,' and *itis*, denoting inflammation. Inflammation of the salivary glands.

**SYCAMINOS**, *Morus nigra*.

**SYCAMINUM**, see *Morus nigra*.

**SYCE**, *Ficus*, *Ficus carica*.

**SYCEA**, *Ficus*.

**SYCEPH'ALUS**, from *σϑϑ*, 'with,' and *κεφαλα*, 'head.' A monster having two heads united together.

**SYCION**, *σϑϑιον*, from *σϑϑιον*, 'a fig.' A decoction of dried figs.

**SYCITES**, from *σϑϑιον*, 'a fig.' Wine, in which figs have been infused.

**SYCITES**, *Catorchites*.

**SYCOMA**, *Ficus*.

**SYCO'SIS**. Same etymon. A tumour of the shape of a fig. Also, a fungous ulcer. A horny excrescence about the eyelids. Dr. Bateman defines it:—an eruption of inflamed but not very hard tubercles occurring on the bearded portion of the face and on the scalp, in adults; and usually clustering together in irregular patches;—*Phyma Sycosis*, *Ros'cola fico'sa*. Of this he has given two species: 1. *Sycosis Mentis*, *S. barba*, *Ment'agra*, *Ment'igo*, *Varus Ment'agra*, *Chinwelk*, *Barber's Itch*, (F.) *Dartre pustuleuse mentagre*: and, 2. *Sycosis Capilli*, *S. Capilli*'ii. The treatment, in both cases, resembles that for *Porrigio favosa*.

**Sycosis**, *Ficus*.

**SYCUM**, *Ficus*.

**SYDERATIO**, *Sideratio*.

**SYLLEPSIOLOG'IA**, from *σϑλλεψις*, 'conception,' and *λογος*, 'a description.' The doctrine of conception.

**SYM**, **SYN**, *σϑ*, 'with, together,' like the *cum*, *con*, *col*, *cor*, &c., of the Latins. A common prefix. Before *b*, *p*, *ph*, *ps*, and *m*,—*sym*, or *zyn*, is changed into *syn* or *zym*, (*com*); before *c*, *ch*, *g*, *k*, and *x*, into *syn* or *zyn*, *ov*, *ev*, (*con*); before *l* into *syl* or *zyl*, (*col*); before *r* into *syn* or *zyr* (*cor*); and before *s* into *sy* or *zy*, and *sys*, (*co* and *cos*).

**SYMBLEPHARON**, *Ankyloblepharon*.

**SYMBLEPHAROSIS**, *Concretio palpebrarum cum bulbo oculi*, from *σϑ*, 'with,' and *βλεφαρον*, 'an eyelid.' A preternatural adhe-

sion between the eyelids; and especially between the upper eyelid and globe of the eye.

SYMBLEPHAROSIS, Ankyloblepharon.

SYMBOLE, Commissure.

SYMBOLEUSIS, Consultation.

SYMBOLISMUS, Sympathy.

SYMBOLIZATIO, Sympathy.

SYMBOLICA, Symptomatology.

SYMBOLUM, Sympathy.

SYMMELES; from *συν*, 'with,' and *μελος*, 'an extremity.' *Mon'opus*. A genus of monsters whose extremities are joined together.—I. G. St. Hilaire.

SYMMETRIA, Symmetry.

SYMMETRICAL, *Symmet'ricus*, *συμμετρος*, from *συν*, 'with,' and *μετρον*, 'to measure.' An epithet given to those parts of the body, which, if seated on the median line, may be divided into two equal, and perfectly like halves; or which—if situate, the one to the right, the other to the left of this line—have a similar conformation, and a perfectly analogous arrangement.

SYMMETRY, *Symmet'ria*, *Commen'sum*, *Membro'rum Om'nium Competen'tia*, *Propor'tio*. The regularity in form, observed in many parts, situate on the median line; and also, the resemblance which exists between many organs that are situate on each side the median line. Bichat first noticed that this symmetry was confined to the organs of animal life; as the head, brain, spine, organs of sense, of locomotion, &c.

SYMPARATERESIS, Observation.

SYMPASMA, Catapasma.

SYMPATHESIS, Sympathy.

SYMPATHETIC, *Sympath'icus*, *Sympatheticus*, (F.) *Sympathique*, from *συν*, 'with,' and *παθος*, 'suffering.' That which depends on sympathy. Sympathetic affections of an organ are those morbid phenomena that supervene without any morbid cause acting directly on it, and by the reaction of another organ primarily affected. Thus, itching of the nose is a *sympathetic affection*, produced by irritation in the intestinal canal.

The epithet *sympathetic* is also given to different nerves. See Trisplanchnic, Pneumogastic, and Facial.

SYMPATHETIC, GREAT, Trisplanchnic nerve —s. Middle, Pneumogastic.

SYMPATHETIC POWDER, *Pulvis sympatheticus* of Sir Kenelm Digby, was composed of calcined sulphate of iron, prepared in a particular manner. It was long supposed to be able to cure a wound, if applied to the weapon that inflicted it; or even to a portion of the bloody clothes. It is proper to remark, however, that the wound itself was carefully excluded from the air, and from all irritation.

SYMPATHETICUS MINOR, Facial nerve.

SYMPATHETISMUS, Sympathy.

SYMPATHIA, Consent of parts.

SYMPATHICUS, Sympathetic.

SYMPATHIQUE, Sympathetic.

SYMPATHY, *Sympathi'a*, *Sympathet'is*, *Compas'sio*, *Consensus*, *Sympathet'ismus*, *Xympathi'a*, *Confluat'io*, *Conspira'tio*, *Commercium*, *Consortium*, *Homoioopathi'a*, *Homoth'ia*, *Adelphiz'is*, *Symbolis'mus*, *Symbolizatio*, *Symbolum*. The connexion that exists between the action of two or more organs, more or less distant from each other; so that the affection of the first is transmitted, secondarily,

to the others, or to one of the others, by means unknown. A knowledge of the particular sympathies between different organs, throws light on the etiology of diseases, their seat, and the particular organ towards which our therapeutical means should be directed. See Irritation.

SYMPEPSIS, Coction.

SYMPEXIS, Concretion.

SYMPHORA, Congestion.

SYMPHOREMA, Congestion.

SYMPHORESIS, Congestion.

SYMPHYIA, Symphysis.

SYMPHYOCEPHALUS, *Metop'ages*, *Cephalop'ages*; from *συμφυης*, 'united together,' and *κεφαλη*, 'head.' A monstrosity in which twins are united by the head.

SYMPHYSEOTOMY, *Symphysot'omy*, *Synchondrot'omy*, *Symphysiotom'ia*, *Symphysiotom'ia*, from *συμφυσις*, and *τομη*, 'I cut.' The operation or section of the Symphysis, *Sigaultian operation*, *Sigaultian section*. This operation is performed with the view of augmenting the diameter of the pelvis, in order to facilitate delivery in certain cases of faulty conformation of that cavity, with wedging of the head of the child therein. To perform the operation, (F.) *désymphyser*, the female is placed on her back; the pubes is shaved; and, with a strong scalpel, the soft parts are divided on the median line. The articulation is then cut. As soon as the fibrous parts, which hold the bones together, are divided, they separate to a certain distance from each other; and the delivery may be accomplished. The knife, with which the operation is performed, is called, by the French, *Couteau symphysien*.

SYMPHYZIA, from *συμφυσις*, 'a growing together.' A malformation consisting in the union of parts that are usually divided.—Breschet.

SYMPHYSIOTOMIA, Symphyseotomy.

SYMPHYSIS, *Symphy'ia*, *Coalescen'tia*, *Coal'itica*, from *συμφυω*, (*συν*, 'with,' and *φυω*, 'I grow,') 'I unite together.' A union of bones. The bond of such union. The aggregate of means used for retaining bones *in situ* in the articulations. The name symphysis has, however, been more particularly appropriated to certain articulations; as to the *sympphysis pubis*, *sacro-iliac symphysis*, &c.

SYMPHYSIS, Coalescence, Commissure, Insertion—s. Cartilaginea, Synchondrosia—s. Ligamentosa, Syndesmosis—s. Ossium muscularis, Syasarcosis—s. Pubis, Pubic articulation.

SYMPHYSOTOMY, Symphyseotomy.

SYMPHYTOS, Hereditary.

SYMPHYTUM. Same etymon. *Symphytum officina'le*, *Consol'ida major*, *Comfrey*, *Alum*, *Alus*, (F.) *Grande Consoude*. Family, Boraginæ. See, *Syst.* Pentandria Monogynia. The roots of this European plant are very mucilaginous, and are employed as emollients. They are used in decoction in hæmoptysis, dysentery, chronic diarrhoea, &c.

SYMPHYTUM, *Solidago virgaurea* —s. Minimum, *Bellis*—s. Minus, *Frunella*.

SYMPHYTUM PETRE'UM, *Coris Montpelien'sis*, *Montpellier Coris*. An intensely bitter and nauseous plant, which is said to have been useful in syphilis. See, also, *Sanicula*.

SYMPLOCARPUS ANGUSTISPATHA,

*Dracontium angustispatha*—s. *Fœtida*, *Dracontium fœtidum*.

**SYMPDIA**, *Monopodia*; from *συν*, 'together,' and *πυδ*, *πυδος*, 'a foot.' A monstrosity in which there is coalescence of the lower extremities.

**SYMPTOM**, *Symptomata*, *Accidens*, *Casus*, from *συν*, 'with,' and *πτωμα*, 'a fall,' from *πτωω*, 'I fall.' Any change, perceptible to the senses in any organ or function, which is connected with morbid influence. It is by the aggregate and succession of symptoms that a disease is detected. The term *symptoms of symptoms* has been used for the effects which result from the symptoms of a disease; but which effects are not essentially connected with the disease itself. Thus the debility arising from the frequency of the evacuations in dysentery is a symptom of symptoms. See *Signa*.

**SYMPTOMA TURPITUDINIS**, *Nymphomania*.

**SYMPTOMATIC**, *Symptomatus*. That which is a symptom of some other affection. Thus we speak of a symptomatic disease, in opposition to one that is idiopathic.

**SYMPTOMATOLOGY**, *Symptomatology*, *Symbolog'ia*, from *συμπτωμα*, 'a symptom,' and *λογία*, 'a treatise.' The branch of pathology, the object of which is the knowledge of symptoms.

**SYMPTOSIS**, from *συν*, 'with,' and *πτωω*, 'I fall.' Depression or collapse, emaciation or atrophy, either of the whole body or of a part.

**SYNEREMA**, *Corrugation*.

**SYNETHION**, *Concausa*.

**SYNANCHE**, *Cynanche*, *Cynanche tonsillaris*.

**SYNANCIE**, *Cynanche*.

**SYNAPHYMENTITIS**, see *Ophthalmia*.

**SYNARTHRODIA**, *Synarthrosis*.

**SYNARTHRODIAL**, *Synarthrodialis*, from *συν*, 'with,' and *αρθρωσις*, 'articulation.' That which belongs to synarthrosis; as *Synarthrodial articulation*.

**SYNARTHROSIS**, *Synarthro'dia*, *Abarticulatio*, *Coarticulatio*. An immovable articulation. Synarthrosis includes three species: *Sutura*, *Harmony*, and *Gomphosis*.

**SYNATHROESIS**, *Congestion*.

**SYNATHROISMUS**, *Congestion*.

**SYNCANTHUS**, from *συν*, 'with,' and *αυθης*, 'the corner of the eye.' A morbid adhesion between the globe of the eye and the orbit.

**SYNCHONDROSIS**, *Symphysis* seu *Copula* seu *Connexio cartilaginosa*, *Chondrosyndesmus*, from *συν*, 'with,' and *χονδρος*, 'a cartilage.' Union or articulation of bones by means of cartilage:—as the articulations of the ribs with the sternum, by means of their cartilages of prolongation.

**SYNCHONDROTOMY**, *Symphyseotomy*.

**SYNCHRONIUS**, *Synchronous*.

**SYNCHRONOUS**, *Syn'chronus*, *Synchron'ius*, *Isoch'ronous*, from *συν*, 'with,' and *χρονος*, 'time.' That which occurs at the same time. Thus the pulsations of an artery may be synchronous with those of the heart.

**SYNCHRONUS**, *Synchronous*.

**SYNCHYSIS**, *Confusion*.

**SYNCIPUT**, *Sinciput*.

**SYNCLONESIS**, *Synclonus*.

**SYNCLONUS**, *Synclonosis*, from *συνκλονω*, (*συν*, 'with,' and *κλονω*, 'I shake.') 'I

shake together.' *Clon'ioi universales*, *Clonus*, (Young.) Tremulous, simultaneous, and chronic agitation of various muscles, especially when excited by the will. Also, general spasm, *spasmus universalis*. See *Tremor*, *Chorea*, &c.

**SYNCLONUS BALLISMUS**, *Paralysis agitans*—s. *Berberia*, *Berberi*—s. *Chorea*, *Chorea*—s. *Raphania*, *Raphania*—s. *Saltans*, *Chorea*—s. *Tremor*, *Tremor*.

**SYNCOMISTUS**, from *συνκομιση*, (*συν* and *κομιση*), 'I bring together;' *Autop'gros*, *Penis domesticus*, *secundarius*, *cibarius*, *confusivus*. Bread of the whole wheat or of the unsifted meal. *Household bread*. Also, a cataplasm made of the same.

**SYNCOPAL**, *Syncope'lis*, *Syncope'ticus*, *Syncope'tus*. Same etymon as *Syncope*; as *Syn'copal Fever*, *Febri's Syncope'alis*. A pernicious intermittent characterized by repeated attacks of syncope.

**SYNCOPE**, from *συνκωπη*, 'I fall down.' *An'imi defectio*, *Animi deliquium*, *Leipopsychia*, *Lipopsych'ia*, *Apsych'ia*, *Apsych'ia*, *Lip'sis An'imi*, *Asphyx'ia*, *Apopsych'ia*, *Lipothym'ia*, *Leipothym'ia*, *Eclips'is*, *Su'bitus animi casus*, *Swoon*, *Fainting fit*, (F.) *Évanouissement*, *Défaillance*, *Pamotion*. Complete and, commonly, sudden loss of sensation and motion, with considerable diminution, or entire suspension of the pulsations of the heart and the respiratory movements. Syncope is, commonly, an affection of no consequence; but, sometimes, it is an index of diseased heart. Placing the patient in the horizontal posture; sprinkling cold water over the face and the application of volatile substances to the nose, are all that will be required during the fit. See *Asphyxia*, and *Suffocation*.

**SYNCOPE ANGINA**, *Angina pectoris*—s. *Anginosa*, *Angina pectoris*.

**SYNOPTICUS**, *Synopcal*.

**SYNCOPTUS**, *Synopcal*.

**SYNCRITICA**, *Astringents*.

**SYNDACTYLUS**, *Achistodactylus*.

**SYNDESMITIS**, see *Ophthalmia*. Also, inflammation of articular ligaments; *Inflammatio ligamentorum*.

**SYNDESMOGRAPHY**, *Syndesmograph'ia*, from *συνδεσμος*, 'a ligament,' and *γραφη*, 'a description.' A description of the ligaments. The part of anatomy which describes the ligaments.

**SYNDESMOLOGY**, *Syndesmolog'ia*, from *συνδεσμος*, 'a ligament,' and *λογος*, 'a treatise, discourse.' A treatise on the ligaments.

**SYNDESMOPHARYNGEUS**. A fasciculus of the constrictor pharyngis superior.

**SYNDESMOS**, *Ligament*.

**SYNDESMOSIS**, *Synneuro'sis*, *Synsymen'sis*, *Connexio* seu *Symphysis ligamentosa*, *Commissura nervosa*, *Connexio'tio*, *Colligatio*, from *συνδεσμος*, 'ligament.' The articulation of two or more bones by means of a ligament;—as of the radius with the ulna.

**SYNDESMOTOMY**, *Syndesmotomia*, from *συνδεσμος*, 'ligament,' and *τομη*, 'I cut or dissect.' Dissection of the ligaments.

**SYNDESMUS**, *Bandage*, *Ligament*.

**SYNDROME**, from *συν*, 'with,' and *δρομη*, 'a course.' *Concur'sus*, *Concourse*. A name given by the empirical sect to the union of symptoms which takes place in diseases. *Syn-*

*dromi plethorica*, for example, meant the union of symptoms produced by plethora.

SYNDYASMUS, Coition.

SYNECHES, see Continued fever.

SYNECHIA, from *συν*, 'with,' and *ἔχω*, 'to have,' or 'to hold.' Adhesion between the iris and transparent cornea, or between the iris and crystalline lens. The former case is called *Synechia anterior*: the latter *S. posterior*.

SYNERGIA, Synergy.

SYNERGIE, Synergy.

SYNERGY, *Synergi'a*, *Synnergia*, (F.) *Synergis*; from *συν*, 'with,' and *εργον*, 'work.' A correlation or concurrence of action between different organs in health; and, according to some, in disease.

SYNESIS, Intellect.

SYNEUROSI, Syndesmosis.

SYNEZIZIS, *Synezi'is*, *Consident'ia*, from *συν*, 'with,' and *ἔνωσις*, 'to join.' *Parop'is Synesisis*, *Caligo à Synesisi*, *Caligo Pupill'is*, *Imperforatio pupill'is*, *Closure or occlusion or obliteration of the Pupil*, *Phthisis Pupill'is*, *Amyo'is*. This disease is sometimes faulty conformation, depending upon the continued existence of the membrana pupillaris, or the absence of the pupil. It is, in other words, *congenital*. At other times, it is owing to accident, and supervenes on violent ophthalmia, or on the operation for cataract. They who are affected with synezisis are completely blind;—the iris having no central aperture. In certain cases, a remedy may be obtained by making an opening in the iris, which may supply the place of the pupil, and through which the rays of light may reach the retina. This operation is called the *operation for artificial pupil*.

SYNGENES, Hereditary.

SYNGENICUS, Congenital.

SYNHYMENESIS, Synymenesis.

SYNIMENESIS, Synymenesis.

SYNIZESIS, Considentia, Synezisis.

SYNNEUROSI, Syndesmosis.

SYNOCHA, from *συνέχω*, (*συν*, and *ἔχω*, 'I have or hold,') 'I continue.' *Inflammatory Fever*, *Dynam'ic Fever*, *Angiop'ya*, *Sthenopy'ra*, *Febris caustodes*, *F. caumatodes*, *Febris dour'ens*, *F. ardens*, *Febris continua sanguinea*, *Febris continua non putrida*, *Syn'ochus* (Vogel,) *Febris acmar'ica*, *Synochus impu'tris* (Galen,) *Febris acuta*, *F. acuta sanguinea*, *F. continens*, *F. continens non putrida*, *F. angioten'ica*, *F. sthenica*, *F. sanguinea*, *Homol'onos*, *F. inflammatoria*, *Enc'cia cauma*, *Enc'cia*, *F. ton'ica*, *Phlogop'yrus*, *Cauma*, *Calentura continua*, (F.) *Fievre ardente*, *F. continens inflammatoire*, *F. sanguine*, *F. irritative*, *F. angioténique*, *F. inflammatoire*, *General inflammation*, *Gastro-enterite intensa*. A species of continued fever, characterized by increased heat; and by quick, strong, and hard pulse; urine high-coloured; disturbance of mind slight. It requires, of course, the most active treatment.

SYNOCHA RHEUMATICA, Rheumatism, acute —a. *Vaccina*, *Vaccina*.

SYNOCHAL, *Synochal'is*; same etymon. Relating to, or having the characters of, synocha.

SYNOCHUS, *Enc'cia syn'ochus*, *Febris lenta*, (Linnaeus,) same etymon. Continued fever, compounded of synocha and typhus:—in its commencement often resembling the former;

in its progress, the latter: *Mixed fever*, *Common continued fever*, *Syn'ochoid fever*. See Continued fever, Fever, and Typhus.

SYNOCHUS, Synocha—s. *Biliosa*, *Fever*, *gastro*, *Fever*, *biliosa*—s. *Catarrhalis*, *Influenza*—s. *Icterodes*, *Fever*, *yellow*—s. *Impu'tris*, *Synocha*—s. *Miliaria*, *Miliary fever*—s. *Varicella*, *Varicella*.

SYNOLCE, Spasm.

SYNONIA, Synovia.

SYNOSTEOGRAPHY, *Synosteo'graphia*, from *συν*, 'with,' *οσσειον*, 'a bone,' and *γραφω*, 'I describe.' The part of anatomy which describes the joints.

SYNOSTEOLOGY, *Synosteolog'ia*, from *συν*, 'with,' *οσσειον*, 'a bone,' and *λογος*, 'a treatise.' A treatise on the joints.

SYNOSTEOSIS, *Synosto'is*, from *συν*, 'with,' and *οσσειον*, 'a bone.' Union by means of bone.

SYNOSTEOTOMY, *Synosteotom'ia*, from *συν*, 'with,' *οσσειον*, 'a bone,' and *τομην*, 'to cut.' Dissection of the joints.

SYNOSTOSIS, Synostosis.

SYNOVIA, from *συν*, 'with,' and *ων*, 'an egg.' *Mucilago*, *Unguen articulare*, *Synovia*, *Azur'gia articul'aris*, *Unguentum seu Smegma articulare*, *Mucilago articulorum seu juncturarum*, *Humor articul'aris*, *Hydrarthrus*, *Humor seu Humidum nativum seu Gluten articulorum*, (F.) *Synovia*. A fluid resembling the white of egg, which is exhaled by the synovial membranes surrounding the moveable articulations. The synovia has been found, on analysis, to consist of water, a little albumen, soda, chloride of sodium, phosphate of lime, and—Fourcroy fancied—uric acid. Its use is to lubricate the joints, and the sheaths in which tendons play.

SYNOVIAL, *Synovial'is*. That which relates to the synovia.

SYNOVIAL GLANDS, *Havers's Glands*, *Gland'ulae articulares*, *G. Synoviales*, *G. Haversianae*, are the synovial fringes, which float in the interior of the synovial capsules (see Capsules.) They do not seem to be glandular. They have been called *Synovial Ambria*, (F.) *Franges synoviales*.

SYNOVITIS; from *Synovia*, and *itis*, a termination denoting inflammation. A term, badly compounded, applied at times to inflammation of the synovial membrane.

SYNOVITIS RHEUMATISMALIS, Rheumatism, (acute.)

SYNTASIS, *συντασις*, from *συντετω*, (*συν*, and *τετω*, 'I stretch,') 'I strain.' Tension of parts: hence *συντασια*, are medicines which render parts tense. *Syntez'is*, on the other hand, means *Colliquatio*, or wasting of the body; from *συντηχω*, 'I melt together.'

SYNTAXIS, Articulation, Reduction, Taxis —s. *Serrata*, see Suture.

SYNTECOPYRA, Hectic fever.

SYNTECTYCOPYRA, Hectic fever.

SYNTENOSIS, from *συν*, 'with,' and *τενον*, 'a tendon.' A species of articulation in which two bones are joined by means of tendon; as the sesamoid bones with the toes, the rotula with the tibia, &c.

SYNTERESIS, Prophylaxis.

SYNTERETICUS, Prophylactic.

SYNTEXIS, Colliquation, Consumption.

**SYNTHENA.** A term employed by Paracelsus to designate a species of epilepsy, accompanied by cardialgia and tormina.

**SYNTHESIS, Reunio,** 'composition or putting together,' from *ευν*, and *τιθημι*, 'I place.' A surgical operation, which consists in uniting parts that are divided; and approximating such as are separated or distant from each other, *Reunio partium separatarum, Synthesis of continuity*, means the union of the edges of a wound, or the approximation of the extremities of a fractured bone. *Synthesis of contiguity* is the reduction of displaced organs; as in cases of hernia and luxations.

**SYNTHESIS, Composition.**

**SYNTHETISMUS,** same etymon. The aggregate of operations and means for reducing a fracture, and maintaining it reduced:—comprising extension, counter-extension, coaptation, and bandaging.

**SYNTRIMMA, Contritio.**

**SYNTRIPSIS, Contritio.**

**SYNTROPHOS, Connutritus.**

**SYNULOSIS, Cicatrization.**

**SYNULOTICA, Cicatrissantia.**

**SYNUSIA, Coition.**

**SYNYMENESIS, Synhymenosis, Synymenosis,** from *ευν*, 'with,' and *μυμη*, 'a membrane.' Union of bones by membrane, as in the case of the bones of the head in the fœtus.

**SYNYMENESIS, Syndesmosis.**

**SYPHAR, Peritoneum.**

**SYPHILIDES, Syphilitida, (F.) Dermo-syphilitides, Dermatosis venereusa.** Same etymon as Syphilis. The cutaneous eruptions that accompany constitutional syphilis are so denominated by the French writers.

**SYPHILIDIATER, Syphilitidiatrus,** from *Syphilis*, and *ιατρος*, 'a physician.' A pox doctor. One who occupies himself in treating syphilis.

**SYPHILIDOMANIA, Syphilomania.**

**SYPHYLIPHO'BIA;** from *Syphilis* and *φοβος*, 'dread.' A morbid dread of syphilis, giving rise to fancied symptoms of the disease: a form of hypochondriasis.

**SYPHILIS, Morbus Gallicus, Siphilis, Syphilis'mus, Cachexia venerea, Cachochymia venerea, Malum venereum, Morbus Italicus, M. Hispanicus, Puden'dogra, Luos, Me'vium, Luos venerea, Luos syphilis. Morbus aphrodisiacus, Syphilis venerea, S. maligna, Morbus Neapolitanus, Morbus Indicus, Patursa, Basiliscus, Boæ, Sod'oma Gallo'rum; Venereal, Venereal Disease, Poz, French Pox; (F.) Vérole, Maladie vénérienne, Mal de Naples, Mal Français, Maladie de Venus.** The etymology of syphilis is unknown. Some consider it to proceed from *ευν*, 'a hog;' and others, from *εισο*,—formed, by contraction, from *ερωαλος*, 'shameful,' 'dirty,' &c. It is an infectious disease, communicable by coition, or by the contact of parts that are only lined with a thin epidermis; as the lips, nipple, &c. It generally makes its first appearance by a chancre, followed sooner or later by a bubo. The chancre is a primary symptom or sore; but there are others which are secondary or constitutional. These are:—ulcers in the throat; copper-coloured blotches on the skin; pains in the bones, nodes, &c.: the last are sometimes termed tertiary phenomena. The origin of syphilis is not known. It is believed to have been introduced

into Europe from America, at the end of the 15th century [?]. Its progress is extremely variable, as well as its duration, which is often unlimited, if left to itself. Mercury may be esteemed the best remedy, but the disease admits of cure without it. Almost every antisyphilitic composition, whose use is attended with success, probably contains mercury united with diaphoretic or other medicines. It is generally sufficient to keep the mouth sore for a fortnight for the cure of chancre: for venereal sore throat, and other recent constitutional symptoms, eight or ten weeks will be required; and, of course, a longer time, if these symptoms have persisted longer. Sometimes, after mercury has been given for a time, the symptoms continue stationary; and do not yield until the mercury has been discontinued, and tonics and eutrophics have been administered. The preparations of iodine have been much used, of late, in the revellent treatment of this disease.

**SYPHILIS INDICA, Frambœsia.**

**SYPHILIS PSEUDO-SYPHILIS, Luos Syphilitides, Pseudo-syphilis.** A term given to ulcers or other affections that resemble syphilis, but are indeterminate in their character,—the symptoms being irregular in their appearance, and usually yielding spontaneously, or under the use of tonics, change of air, &c. The condition has not been at all well defined. The *Sivens, Radesyge*, &c., have been referred to this head.

**SYPHILISMUS, Syphilis.**

**SYPHILOMANIA, Syphilidomania,**—vulgarly, *Nodds Poz.* A mania, with which some persons are affected, so that they subject themselves to antiveneal treatment, under the notion that they are affected with syphilis.

**SYPHITA, Somnambulism.**

**SYPHO-AURICULARIS, Otenchytes.**

**SYRINGOPHONIA,** from *συριγμος*, 'whistling,' and *φωνη*, 'voice.' A piping state of the voice.

**SYRINGMUS, Tinnitus aurium.**

**SYRINGA, Eustachian Tube, Fistula, Syringe, Trachea.**

**SYRINGA CLYSMATICA, Syringe, Clyster.**

**SYRINGA VULGARIS, Common Lilac.** The leaves and fruit are bitter and somewhat acrid, and have been used as a tonic and antiperiodic.

**SYRINGE, Syrin'ga, Syring'a, Siph'o, Siphunculus, (F.) Seringue,** from *συριγξ*, 'a pipe.' A familiar apparatus through which any liquor is squirted.

Various forms of syringe are used in medicine and surgery.

**SYRINGE, CLYSTER, Syrin'ga clysmatica, Clystantium, (F.) Clysopompo.** A syringe for administering clysters.

**SYRINGE, CUPPING, Antlia sanguisuga.**

**SYRINGICUS, Fistulosus.**

**SYRINGITIS EUSTA'CHII, Inflammation of the Eustachian tube.**

**SYRINGMOS, Tinnitus aurium.**

**SYRINGODES, Fistulosus.**

**SYRINGOTOME, Syringotomus, Syringotomus,** from *συριγξ*, 'a pipe,' 'a fistula,' and *τομειν*, 'to cut.' A surgical instrument, formerly used in the operation for *fistula in ano*. It is a bistouri, concave at its edge, and terminated by a long, flexible, probe-pointed stylet. This stylet or probe was first introduced by the external opening of the fistula into the rectum, whence it was drawn externally

through the anus, carrying with it the cutting edge of the instrument, which divided the intermediate parts. The operation for fistula in ano has been called *Syringotomy*.

**SYRINGOTOMIA.** Same etymon as the last. The operation for fistula in ano by incision.

**SYRINX,** Eustachian tube, Fistula, Syringe, Trachea—s. Hiera, Vertebral column.

**SYRMAISMOS,** from *συμαίω*, 'I evacuate.' A gentle evacuation by vomiting or stool.

**SYROP,** Syrup—s. *d'Ail*, Syrupus alii—s. *d'Armoiss composé*, Syrupus aromaticus—s. *de Chicoricé composé*, Syrupus de chicoricé compositus—s. *des Cing racines*, Syrupus e quinque radicibus—s. *de Cuisinier*, Syrupus de sarsaparilla et sennâ compositus—s. *d'Éther*, Syrupus cum æthere sulphurico paratus—s. *de Gingembre*, Syrupus zingiberis—s. *de Guimauve*, Syrupus althææ—s. *de Longue vie*, Mellitum de mercuriali compositum—s. *de Mercure*, Syrupus de mercurio mediante gummi—s. *de Mûres*, Syrupus mori—s. *de Nerprun*, Syrupus rhamni—s. *de Pavots blancs*, Syrupus papaveris—s. *de Pommes composé*, see Syrupus sennæ—s. *de Quinquina avec le Vin*, Syrupus de kinâ kinâ cum vino—s. *de Roses Pâles*, Syrupus rosæ—s. *de Roses rouges*, Syrupus rosæ—s. *de Vinaigre*, S. aceti.

**SYRUP**, *Syrupus*, *Serapim*, *Serapim*, (F.) *syrop*; derived according to some, from *συρω*, 'I draw,' and *σως*, 'juice;' but more probably, from the Arabic *Siruph*, *Sirab*, or *Scharab*, which signifies 'a potion.' A saturated solution of sugar in water, either simply, or united with some vegetable or other principle. Syrups, in general, require two pounds of sugar to the pint, and they are judged to be sufficiently boiled when a portion, taken up in a spoon, flows like oil. In the Pharmacopœia of the United States, (1842,) it is directed, that syrups, whose density is not precisely determined by the process should have the s. g. 1.261, when boiling, and of about 1.319 at ordinary temperatures. Syrups should be kept in small bottles in a cool place. They are chiefly used to render medicines palatable.

**Syrup**, see Syrupus—s. of Almonds, Syrupus amygdalæ—s. Antiscorbatic, Syrupus antiscorbaticus—s. of Buckthorn, Syrupus rhamni—s. of Capillaire, common, Syrupus simplex—s. of Cinchona with wine, Syrupus de kinâ kinâ cum vino—s. of Clove July flower, Syrupus caryophylli rubri—s. of Clove pinks, Syrupus caryophylli rubri—s. of Ether, Syrupus cum æthere sulphurico paratus—s. of Five roots, Syrupus e quinque radicibus—s. of Garlic, Syrupus alii—s. of Ginger, Syrupus zingiberis—s. Hive, Syrupus scillæ compositus—s. of Honey, Mellitum simplex—s. of Iodide of iron, Liquor Ferri iodidi—s. of Ipecacuanha, Syrupus ipecacuanhæ—s. of Lemon, Syrupus limonis—s. of Marshmallows, Syrupus althææ—s. of Meadow saffron, Syrupus colchici autumnalis—s. of Mugwort, compound, Syrupus aromaticus—s. of Mulberries, Syrupus mori—s. of Orange juice, see Syrupus aurantii—s. of Orange peel, Syrupus aromaticus—s. of Orgeat, Syrupus amygdalæ—s. of Poppies, Syrupus papaveris—s. of Poppy, red, Syrupus rhœodæ—s. of Rhatany, Syrupus krameris—s. of Rhubarb, Syrupus rhej—s. of Rhubarb, aromatic, Syrupus rhei aromaticus—s. of Rhubarb, spiced, Syrupus rhej aromaticus—s. of Saffron,

Syrupus croci—s. of Squills, Syrupus scillæ—s. of Squill, compound, Syrupus scillæ compositus—s. of Succory, compound, Syrupus de cichorio compositus—s. of Tolu, Syrupus tolutani—s. of Vinegar, Syrupus aceti—s. of Violets, Syrupus violæ.

**SYRUPUS**, S. simplex—s. Acidi acetosi, S. aceti.

**SYRUPUS ACETI**, S. *Ac'idi Aceto'si*, Syrup of Vinegar, (F.) *Syrop de Vinaigre*. (Aceti Oiiis, sacch. purif. Biiisii. Boil to form a syrup. Ph. E.) It is refrigerant and antiseptic. Dose, f. ʒj to f. ʒij.

**SYRUPUS CUM ÆTHERE SULPHURICO PARATUS**, Syrup of Ether, (F.) *Syrop d'èther*. (Very pure sugar, 1000 p.; distilled water, 500 p.; dissolve in the cold, and strain; add sulphuric ether, 48 p. Shake for five or six days, and draw off the limpid syrup. Ph. L.) Properties like those of ether.

**SYRUPUS ALII**, Syrup of Garlic, (F.) *Syrop d'ail*. (Alii concis. ʒvj, aceti. destillat. Oj, sacchar. Biiij. Macerate the garlic in the vinegar, in a glass vessel for four days; then express the liquor and set it by, that the dregs may subside; lastly, add the sugar to the clear liquor, and proceed in the manner directed for syrup. Ph. U. S.) Use, same as that of garlic. Dose, f. ʒj to f. ʒij.

**SYRUPUS ALTHÆÆ**, Syrup of Marshmallow, Syrupus ex Althæâ, S. de Althæâ, S. Althææ officinalis, (F.) *Syrop de Guimauve*. (Althææ rad. recent. cont. Bss, sacch. pur. Biiij, aqua Oiv. Boil the root in the water to one-half; and press out the liquor; when cold, defecate; add the sugar, and boil. Ph. L.) Emollient and demulcent. Dose, f. ʒj to f. ʒij.

**SYRUPUS ANOMI ZINGIBERIS**, S. zingiberis—s. Anticaustotic, see Anticaustodic.

**SYRUPUS AMYGDALÆ**, Syrup of Almonds, Syrup of Orgeat, Orgeat. (Amygdal. dulc. Bvj, amygdal. amar. ʒiv, aqua, Oij, sacchar. Bvjj. Blanch the almonds, and rub them in a mortar to a very fine paste, adding, during the trituration, three fluidounces of the water, and a pound of the sugar. Mix the paste thoroughly with the remainder of the water; strain with strong expression; add the remainder of the sugar to the strained liquor, and dissolve it with the aid of a gentle heat. Strain the syrup through fine linen, and having allowed it to cool put it into bottles, which must be well stopped, and kept in a cool place. Ph. U. S.)

**SYRUPUS ANTISCORBUTICUS**, S. de Armora'cid compositus, Antiscorbatic Syrup. (Leaves of cochlearia, buckbean, water-cresses, horseradish root and bitter oranges, each Bj, cinnamon, ʒiiss. Cut, and pour on white wine Biv. Macerate for two days; distil over Oj in a sand bath; add to this of sugar, Biiij, and form a syrup. Again, take what remains in the cucurbit; pass it through cloth; let it rest; decant, and add sugar Biiij; make into a syrup, and clarify with white of egg. Mix it with the first while yet warm. Ph. P.) Antiscorbatic, alterative, tonic, stomachic, &c. Dose, f. ʒij to f. ʒij.

**SYRUPUS AROMATICUS**, S. de Artemis'id compositus, Compound Syrup of Mugwort, (F.) *Syrop d'armoise composé*. (Tops of artemisia vulgaris, in flower, ʒvj, snula root, ligusticum levisticum, and fennel, each ʒss, pennyroyal, catmint, savine leaves, each ʒvj, marjoram,

*hyssop, pyrethrum, rue, basil*, each ℥ij, *aniseed* and *cinnamon*, each ℥ix; bruise and macerate in *hydromel* ℞viii; distil over Ose; add to this a pound of *sugar*. Again, take the liquid that remains in the cucurbit, strain it gently; add *sugar* ℞iv. Then mix the two. *Ph. P.*) Tonic, emmenagogue, &c.

SYRUPUS DE ARMORACI COMPOSITUS, S. antiscorbuticus—s. de Artemisia compositus, S. antiscorbuticus—s. Asparagi, see Asparagus.

SYRUPUS AURANTII, S. Aurantiorum, S. Citri Aurantii, S. Corticis Aurantii, S. Aurantii Corticis (Ph. U. S.), S. e Corticibus Aurantiorum, S. de Cortice Aurantiorum, Syrup of Orange peel. (Aurant. cort. cont. ℥ij, aq. ferv. Oj, sacch. pur. ℞ijss. Macerate the peel in the water for twelve hours. Add the sugar. *Ph. U. S.*) Stomachic. Dose, f. ℥j to f. ℥ij.

A Syrup of Orange Juice, Orange Sherbet, Syrupus e succo Aurantiorum, may be made by adding white sugar ℞ij to ℞j of the juice of oranges, strained and clarified.

SYRUPUS BALSAMICUS, S. toltanus.

SYRUPUS CARYOPHYLLI RUBRI, S. Dianthi Caryophylli, Syrup of Clove July flower, Syrup of Clove Pinks, Syrupus infusio nis florum caryophyllo rum. (Petalarum dianth., caryoph. recent. unguibus resectis ℞j, aqua bull. Oij, sacch. purif. ℞vij. *Ph. E.*) Aromatic.

SYRUPUS CASSIE SENNÆ, S. sennæ.

SYRUPUS DE CICHORIO COMPOSITUS, S. de Rhoæ, Compound Syrup of Succory, (F.) Syrup de chicorée composé. (Root of succory, ℥vj, leaves of succory ℥ix, leaves of fumitory and scolopendrium, each ℥ij, Alkekengi berries, ℥ij. Boil in water Oxiv to Oxij: pass through cloth, and dissolve in white sugar ℞v. Boil till it has the consistence of syrup. Again, take water Oviii, rhubarb ℥vj, yellow sanders and cinnamon, each ℥ss. Infuse for twenty-four hours; pass through linen, and add the preceding syrup. *Ph. P.*) It is laxative and stomachic. Dose, f. ℥j to f. ℥ss.

SYRUPUS CINCHONÆ CUM VINO, S. de kinâ kinâ cum vino.

SYRUPUS CINCHONÆ, Syrup of Cinchonina. (Simple syrup one pound; sulphate of cinchonina nine grains. Mix.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS CITRI AURANTII, S. aromaticus.

SYRUPUS COLCHICI AUTUMNALIS, S. Colchici, Syrup of Meadow Saffron. (Rad. colch. autumn. recent. ℥j, acidi acetosi f. ℥xvi, sacch. pur. ℥xxvj. Macerate the root in the vinegar for two days, occasionally shaking the vessel; then strain, with gentle expression. To the strained fluid add the sugar, and boil to a syrup. *Ph. E.*) Diuretic, antiarthritic. Dose, f. ℥j to f. ℥ss, or more.

SYRUPUS CORTICIS AURANTII, S. aromaticus—s. Citri medicæ, S. limonum—s. e Succo citronum, S. limonum.

SYRUPUS CROCI, Syrup of Saffron. (Crocî stigmat. ℥j, aqua fervent. Oj, sacch. purif. ℞iiss. *Ph. L.*) Cardiac. Chiefly used for colouring.

SYRUPUS DIACODION, Diacodion—s. Dianthi Caryophylli, S. caryophylli rubri.

SYRUPUS EMETINE, Syrup of Emetine. (Simple syrup ℞j, emetine 16 gr. M.) In small doses, expectorant; and in large, emetic.

SYRUPUS EMPYREUMATICUS, Melasses—s.

Ferri iodidi, Lignor Ferri iodidi—s. Hydrargyri, Syrupus de mercurio mediante gummi—s. Infusio nis florum caryophyllorum, Syrupus caryophylli rubri.

SYRUPUS IPECACUANHÆ, Syrup of Ipecacuanha. (Ipecac. in pulv. crass. ℥j, alcohol. dilut. Oj, syrup, Oij. Macerate the ipecacuanha in the alcohol for 14 days, and filter. Evaporate the filtered liquor to two fluidounces, and again filter; then mix it with the syrup, and evaporate by a water bath to a proper consistence. *Ph. U. S.*) It may also be prepared by displacement.

SYRUPUS DE JALAP'Æ, Syrup of Jalap. (Puls. Jalapa ℥x. sem. coriandr., fanicul. dulc. ʒā ʒss; aqua f. ℥xijss, sacch. ℥xxv, f. syrups. *Ph. P.*) Cathartic. Dose, f. ℥ij, to f. ℥ss for children.

SYRUPUS DE KINÂ KINÂ CUM VINO, S. Cinchonæ cum vino, Syrup of Cinchonina with wine, (F.) Syrup de quinquina avec le vin. (Cort. cinchonæ officinalis ℥ij, ext. cinchonæ ℥vj, vini albi (Vin. Lancl. vel cujusvis ei similis), Oj, alcohol (s. g. 985, to 915.) f. ℥j, sacchar. alb. ℞iiss. Bruise the cinchonina; gradually add the alcohol, so as to form a soft mass; pour on the wine; macerate for two days, and strain. Dissolve the extract, add the sugar, and make a syrup. *Ph. P.*) Dose, f. ℥ss to f. ℥j.

SYRUPUS KRAME'RIÆ, Syrup of Khat'any. (Ext. Kramer. ℥ij, aqua Oj, sacchar. ℞ijss. Dissolve the extract in the water, and filter; then add the sugar, and form into syrup. *Ph. U. S.*) An adjunct to astringent mixtures; or given in diarrhœa, a tea-spoonful to a child.

SYRUPUS LIMONIS, S. Limonum—s. Succu limonis, S. limonum.

SYRUPUS LIMO'NUM, S. limonis, S. citri medicæ, S. e succo citro'rum, S. e succo limo'num, S. succi limo'nis, Syrup of Lemon, Lemon Syrup. (Limon succ. colat. Oj, sacchar. pur. ℞ij.) Cooling, antiseptic.

SYRUPUS E MECONIO, S. papaveris—s. de Melle, Mellitum simplex—s. e Succo mororum, S. mori.

SYRUPUS DE MERCURIO MEDIANTE GUMMI, Mercurius gummosus Plencî'ii, Syrupus Hydrargyri, (F.) Syrup de mercure ou Mercurie gommeux de Plencî. (Hydrargyri pur. ℥j, p. gummi. acacia, ℥ij, syrup diacod. ℥ss. Rub together till the mercury is extinguished. *Ph. P.*) Possesses the properties of the blue pill. Dose, gr. ij to viij, or more.

SYRUPUS MORI, S. e succo moro'rum, S. succi mori, Syrup of Mul'berries, (F.) Syrup de mûres, (Mori succ. colat. Oj, sacchar. purif. ℞ij. *Ph. L.*) Gratefully refrigerant.

SYRUPUS MORPH'Æ ACETATIS, Syrup of acetate of morphia. (Syrup, one pint, acetate of morphia, gr. iv.) Dose, two tea-spoonfuls, as an opiate. It is about the strength of the same quantity of syrup of poppies.

SYRUPUS MORPH'Æ SULPHATIS is made in the same way.

SYRUPUS NIGER, Melasses.

SYRUPUS PAPAVERIS, S. papaveris somniferi, S. papaveris albi, S. e meco'nis, S. de meconio, Diaco'dion, Syrup of poppies, (F.) Syrup de pavots blancs ou diacode. (Papav. capsul. exsiccât. et contus. exemptis seminibus, ℥xiv, sacch. pur. ℞ij, aq. fervent. cong. ijss. Macerate the capsules in water, for 12 hours; boil to a gallon, and express strongly. Boil the li-

quor to Oij; and strain while hot. Defecate by rest, and boil to Oj, adding the sugar so as to form a syrup. *Ph. L.*) One ounce contains about one grain of opium. Anodyne and demulcent.

The Dublin college has a SYRUPUS OPII, called *Common Syrup of Poppies*, which is made by dissolving 18 grains of the *Watery Extract of Opium* in 18 ounces of boiling water. Properties, those of opium and syrup.

SYRUPUS DE PAPAVERE ERRATICO, *S. rhæadocæ—s. de Pomis compositus*, see *S. seanzæ*.

SYRUPUS QUININÆ, *Syrup of Quinia*. (*Simple syrup*, 2 pints, *sulphate of quinia*, 64 grains.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS R QUINQUE RADICISUS, *Syrup of five roots*, (*F.*) *Syrop des cinq racines*. (*Rad. apii, fœniculi, apii petroselinii*,  $\text{ââ}$   $\text{ʒv}$ . Infuse for 24 hours in boiling water Oiss, and strain. *Rad. asparag., rusci aculeati*,  $\text{ââ}$   $\text{ʒv}$ , *aqua*, Oviij. Boil and reduce to half; adding, towards the end, the residue of the preceding infusion. Boil again for some minutes; strain, and add white sugar,  $\text{ʒviij}$ . *Ph. P.*) Aperient and diuretic. Used in obstructions of the liver, spleen, and mesentery; and in dropsy, &c. Dose,  $\text{f. ʒss}$  to  $\text{f. ʒj}$ , or more.

SYRUPUS RHAMNI, *S. Rhamni cathartici*, *S. de Spina cervinâ*, *S. spina cervinæ*, *Syrup of Buckthorn*, (*F.*) *Syrop de nerprun*. (*Rhamn. baccar.* succ. recent. Oiv, *xingib. rad. concis.*, *pimenta bacc. contrit.*,  $\text{ââ}$   $\text{ʒss}$ , *sacch. purif.*  $\text{ʒiijss}$ . Defecate the juice for 3 days, and strain. To a pint of this, add the ginger and pimento; macerate for 4 hours and strain; boil what remains to Oiss. Mix the liquors and add sugar, so as to form a syrup. *Ph. L.*) Cathartic, but apt to gripe. Dose,  $\text{f. ʒiv}$  to  $\text{f. ʒij}$ .

SYRUPUS RHEI, *Syrup of Rhubarb*. (*Rhej*, cont.  $\text{ʒij}$ ; *Aquæ bullientis*, Oj; *Sacchar.*  $\text{ʒiij}$ . Macerate the rhubarb in the water for 24 hours, and strain: add the sugar, and form into syrup. *Ph. U. S.*) Dose to a child, as a laxative, one or two teaspoonfuls.

SYRUPUS RHEI AROMATICUS, *Aromatic Syrup of Rhubarb*, *Spiced Syrup of Rhubarb*. (*Rhej*, cont.  $\text{ʒiiss}$ ; *Caryophyll.* cont., *Cinnam.* cont.  $\text{ââ}$   $\text{ʒss}$ ; *Myrist.* cont.  $\text{ʒij}$ ; *Alcohol. dilut.* Oij; *Syrup Ovj*. Macerate the rhubarb and aromatics in the diluted alcohol for 14 days, and strain; then, by means of a water bath, evaporate the liquor to a pint, and while still hot, mix with the syrup previously heated.—*Ph. U. S.*) It may also be made by the process of displacement.

The aromatic syrup of rhubarb is a gentle carminative cathartic. Dose to a child,  $\text{f. ʒj}$ ; to an adult,  $\text{f. ʒj}$ .

SYRUPUS DE RHEO, *Syrupus de Cichorio composito*.

SYRUPUS RHECADOS, *S. de papaveri erratico*, *S. papaveris erratici*, *Syrup of Red Poppy*, (*F.*) *Syrop de coquelicot*. (*Rhaad. petal.* recent.  $\text{ʒij}$ , *aq. fervent.*  $\text{f. ʒviiij}$ , *sacch. purif.*  $\text{ʒiijss}$ . To the water, heated in a water bath, add the petals. Remove the vessel; macerate for 12 hours; express; defecate and add sugar to form a syrup. *Ph. L.*) Chiefly used to give colour.

A factitious syrup is often made of aloes dissolved in simple syrup.

SYRUPUS ROSÆ, *Syrupus rosarum soluti-vus*, *S. e rosis siccis*, *S. rosæ centifoliæ*, *S. rosaceus soluti-vus*, *Syrup of Roses*, (*F.*) *Syrop de roses pâles*. (*Rosæ centif. petal. exsicc.*  $\text{ʒviij}$ , *sacch. purif.*  $\text{ʒviij}$ , *aq. fervent.* Oiv. Macerate the petals for 12 hours. Evaporate the strained liquor to  $\text{ʒiijss}$ . Add the sugar. *Ph. L.*) Gently laxative. Dose,  $\text{f. ʒij}$  to  $\text{f. ʒiiss}$  or more.

SYRUPUS ROSÆ GALICÆ, *Syrup of Red Roses*, (*F.*) *Syrop de roses rouges*. (*Rosæ Gallic. petal. exsicc.*  $\text{ʒviij}$ , *aquæ bull.* Oiv, *sacch. purif.*  $\text{ʒviij}$ ; prepared like the last. *Ph. E.*) Mildly astringent. Added to stomachic infusions.

SYRUPUS SACCHARI, *S. Simplex*.

SYRUPUS SARSAPARILLÆ, *Syrup of Sarsaparilla*. (*Rad. Sarsap.* cont.  $\text{ʒij}$ , *aquæ bullient.* cong., *sacch. purif.*  $\text{ʒij}$ . Macerate the root for 24 hours; boil to Oiv. Strain while hot; add the sugar, and boil. *Ph. L.*) Used in the same cases as the root. Dose,  $\text{f. ʒj}$  to  $\text{f. ʒiv}$ , and more.

SYRUPUS DE SARSAPARILLÆ ET SENNÆ COMPOSITUS, *Compound Syrup of Sarsaparilla and Senna*, (*F.*) *Syrop de Cuisinier*. (*Rad. Sarsap.* concis.  $\text{ʒiij}$ . Infuse for 24 hours in warm water Oxiij; boil for a quarter of an hour; pass with expression, and boil again the residuum in Ox of water. Reduce this to Ovj, and repeat the operation 2 or 3 times. Mix all the liquors and boil them together with flowers of borage, white roses, senna leaves and aniseed, each  $\text{ʒij}$ ; reduce to half, pass, and add honey  $\text{ʒij}$ . Boil to a syrup. *Ph. P.*) It is considered to be alterant, depurative, and sudorific. Dose,  $\text{f. ʒss}$  to  $\text{f. ʒij}$ .

A similar syrup, under the name SYRUPUS SARSAPARILLÆ COMPOSITUS, *Compound Syrup of Sarsaparilla*, is directed in the Pharmacopœia of the United States, (1842.) (*Sarsaparill.* cont.  $\text{ʒiij}$ ; *Lign. guaiac.* rasur.  $\text{ʒiij}$ ; *Rosæ centifol.*, *Senna*, *Rad. Glycyrrhiz.* cont.  $\text{ââ}$   $\text{ʒij}$ ; *Ol. Sassafras*; *Ol. Anisi.*  $\text{ââ}$   $\text{m. v.}$ ; *Ol. Gaultheriæ*  $\text{m. iij}$ ; *Alcohol. dilut.* Ox.; *Sacchar.*  $\text{ʒviij}$ . Macerate the sarsaparilla, guaiacum wood, roses, senna, and liquorice root in the diluted alcohol for 14 days; express and filter. Evaporate the tincture in a warm bath to four pints; filter, add the sugar, and form into syrup. Lastly, having rubbed the oils with a small quantity of the syrup, mix them thoroughly with the remainder. *Ph. U. S.*)

It may also be made by the process of displacement.

SYRUPUS DE SCAMMONIO, *Syrup of Scammony*. (*Pulv. Scammon.*  $\text{ʒss}$ , *sacch. alb.*  $\text{ʒiv}$ , *alcohol.* (*s. g.* .985 to .915)  $\text{f. ʒviij}$ . Heat the mixture moderately; then set fire to the alcohol with a lighted taper; agitate constantly, until the flame is extinguished. Suffer it to cool; pass through cloth, and add *Syrup of Violets*,  $\text{f. ʒiv}$ . *Ph. P.*)  $\text{ʒj}$  contains 18 grains of scammony. Dose,  $\text{f. ʒj}$  to  $\text{f. ʒss}$ .

SYRUPUS SCILLÆ, *S. scilliticus*, *S. scilla maritima*, *Syrup of Squills*. (*Aoet. scillæ* Oj, *sacch. pur.*  $\text{ʒij}$ .) Diuretic, expectorant, and emetic. Used in the same cases as the oxymel.

SYRUPUS SCILLÆ COMPOSITUS, *Mel Scilla Compositum*, *Compound Honey of Squill*, *Compound Syrup of Squill*, *Hive Syrup*. (*Scillæ* cont.; *Senæg.* cont.  $\text{ââ}$   $\text{ʒij}$ ; *Antim.* *et Potassæ Tart.* gr.  $\text{xlviij}$ ; *Aquæ* Oiv; *Sacchar.*  $\text{ʒiijss}$ . Pour the water upon the squill and seneka, and,

having boiled to one half, strain and add the sugar. Then evaporate to three pints, and while the syrup is still hot, dissolve in it the tartrate of antimony and potassa.—*Ph. U. S.*)

It may also be made by the process of displacement.

It is often given as an emetic in cases of croup, and in catarrh, especially in children. Dose, to infants, 10 drops to a drachm, repeated every 15 minutes, if vomiting be desirable.

**STYRUPUS SENÆCÆ**, *Syrup of Seneka.* (*Senega* cont. ℥iv; *Aqua* Oj; *Sacchar.* ℞j. Boil the water with the seneka to one half, and strain: then add the sugar, and form into syrup. *Ph. U. S.*)

It may also be formed by the process of displacement.

This is a favourite stimulant expectorant (?) with many practitioners. Dose, f. ℥j or f. ℥ij.

**STYRUPUS SENNÆ**, *S. cassia senna*, *Syrup of Senna*, (*Sennæ* ℥ij, *sem. fœnicul.* cont. ℥j, *sacch. pur.* ℥xv, *aquæ feræ* Oj. Macerate the senna leaves and fennel seeds with a gentle heat for an hour. Strain; add the sugar, and make into a syrup.—*Ph. U. S.*) Cathartic. Dose, f. ℥j to f. ℥iiss or more.

The Parisian Codex has a *Syrupus de Sennâ* of a compound character, called *Syrupus de pomis compositis*, (*F.*) *Syrop de pommes composés*. It contains, also, borage, bugloss, &c. Dose, f. ℥ss to f. ℥ij.

**STYRUPUS SIMPLEX**, *Syrupus* (*Ph. U. S.*), *S. Sacchari*, *Saccharum clarificatum*, *Liquarum*, *Simple Syrup*, *Common syrup of capillaris*. (*Sacch. purif.* ℞iiss, *aquæ* Oj. Dissolve the sugar; set aside for 24 hours; remove the scum, and pour off the clear liquid.) Used to cover nauseous tastes, &c.

**STYRUPUS DE SPINÂ CERVINÂ**, *Syrupus rhamni* —. *S. de Stœchade communis*, see *Lavendula*.

**STYRUPUS TOLUTANUS**, *S. Tolutanus*, *S. toluiferae balsami*, *S. balsamicus*, *Balsamic syrup*, *Syrup of tolu.* (*Tinct. Tolut.* f. ℥j; *Syrup.* Oiss. Mix the tincture with the syrup, and, by means of a water bath, evaporate to the proper consistence.—*Ph. U. S.*) Use;—To give flavour.

**STYRUPUS VIOLÆ**, *S. viola odorata*, *S. violarum*, *S. e succo violarum*, *Syrup of Violets*. (*Flor. recent. viol. odorat.* ℞ij, *aq. bull.* Oviii, *sacch. pur.* ℞xv. Macerate, in a covered vessel, for 24 hours; pass, without expression, through linen; add the sugar so as to form a syrup. *Ph. E.*) Very gently laxative. Dose, f. ℥j, to f. ℥ij.

**STYRUPUS E SUCCO VIOLARUM**, *S. violæ*.

**STYRUPUS ZINGIBERIS**, *S. amomi zingiberis*, *Syrup of Ginger*, (*F.*) *Syrop de gingembre*. *Tinct. Zingib.* f. ℥iv; *Syrup.* cong. Mix the tincture with the syrup, and, by means of a water-bath, evaporate to the proper consistence.—*Ph. U. S.*) To the strained liquor add the sugar, and form a syrup.

N. B. The Parisian Codex contained a few other compound syrups besides those enumerated; amongst these is a *Syrup of calf's lungs*, *Syrupus e pulmonibus vitulini*, (*F.*) *Syrop de mou de veau*, as an expectorant!

These syrups are made according to the usual rule, and possess the virtues of the substances after which they are named.

**SYSPA'SIA**, from *συσπασ*, (*συσ*, and *σπασ*, 'I draw,') 'I contract.' Clonic spasm, with diminished sensibility and inability of utterance. A genus in Good's Nosology, which includes convulsion, epilepsy, and hysteria.

**SYSPASTIA CONVULSIO**, Convulsion—*s. Epilepsia*, Epilepsy—*s. Hysteria*, Hysteria.

**SYSSARCO'SIS**, from *συσ*, 'with,' and *σάρξ*, 'flesh.' *Commisura ossium carnea*, *Symphysis ossium muscularis*, *Connexio ossium cornosa*, *Carnatio*, *Concarnatio*. Union of bones by means of muscles; such as the union of the os hyoidea with the lower jaw, of the scapula with the ribs, &c.

**SYSTALSIS**, Systole.

**SYSTAL'TIC**, *Systal'ticus*, *Peristal'tic*; from *συστάλλω*, (*συσ*, and *τάλλω*), 'I contract.' A systaltic motion in a part is one in which there is alternate contraction and dilatation. See Systole.

**SYSTATICA**, from *συστάτημι*, (*συσ*, and *τάτημι*, 'I place,') 'I associate.' Diseases affecting several or all of the sensorial powers simultaneously; irritation or inertness of mind, extending to the muscles, or external senses: or of the muscles, or external senses, extending to the mind;—the 4th order, class *Neurotica*, of Good.

**SYSTEM**, *Syste'ma*, from *συσ*, 'together,' and *τάτημι*, 'I place.' This word, taken in a good sense, means the collection and arrangement of different matters having an analogy to each other, or working towards the same end. In natural history, it means a methodical arrangement of beings for the purpose of facilitating their study. System is, however, sometimes used in an unfavourable sense in physical science, and often means,—a purely gratuitous supposition, by which the march of nature is attempted to be universally explained, and to which every thing is made to bend. In anatomy, system is an assemblage of organs, composed of the same tissues, and intended for similar functions; for instance, the *nervous system*, *muscular system*, &c.

**SYSTEMATISM**. A method, according to which every fact of a science is collected around an opinion, true or false. One who reduces things to such a method is called a *Sys'tematist*.

**SYSTEMATOLOGY**, *Sys'tematolog'ia*, from *συστήμα*, 'system,' and *λογος*, 'a discourse.' The doctrine or a treatise of systems.

**SYSTÈME VASCULAIRE À SANG NOIR**, see *Vascular*—*s. Vasculaire à sang rouge*, see *Vascular*.

**SYSTEMIC**. Belonging to the general system—as 'systemic circulation' in contradistinction to the 'pulmonic.'

**SYSTOLÈ**. Same etymon as SYSTALTIC; *Systal'is*, *Constrictio*, *Contractio* seu *Angustatio* seu *Submissio* seu *Mica'tio cordis*. The movement of constriction or contraction of the heart, to give impulse to the blood, or to cause its progression. It is opposed to the *Diastole* of the organ.

**SYSTOLIC**, *Systal'icus*; same etymon. Relating to the systole of the heart, as 'systolic murmur.'

**SYZYGIIUM NERVORUM**, *Par nervorum*.

## T.

**T. BANDAGE, T. fascia, Fascia T. formis** *sen Haliodori, Cruvial Bandage.* A bandage shaped like the letter T. It consists of a strip of linen, of variable length and breadth, the middle of which is attached, at right angles, to the extremity of another strip, also of variable length and breadth. When two such strips are attached, at a distance from each other, the bandage is called a *double T.* This bandage is used, principally, for supporting the dressings after the operation for fistula in ano, in diseases of the perineum, groin, anus, &c.

**T. FASCIA, T. Bandage.**

**TABAC, Nicotiana tabacum**—*t. des Savoyards, Arnica montana*—*t. des Vosges, Arnica montana.*

**TABACUM, Nicotiana tabacum.**

**TABARZET, Saccharum album.**

**TABELLA, Tab'ula, Tabula'tum, Lozan'ga, Lozan'gia, Mor'sulus, Morsel'us, a lozenges: Tassel'ia, (F.) Tablettes, 'a small table.'** A solid medicine, composed of a powder, sugar, and mucilage; and generally shaped like a disk. See Pastil and Troch.

**TABELLA, Table.**

**TABELLÆ ABSORBENTES, T. de Magnesiâ.**

**TABELLÆ AC'IDI OXALICI, T. ad sitem, Lozenges of Oxalic Acid. (Acid. oxalic. ʒj, sacch. alb. ʒss, ol. limonis, et. xvij vel gtt. xij. Make into lozenges with mucilage of gum tragacanth. Ph. P.)** Lozenges are made in the same way with the citric and tartaric acids. They are refrigerant.

**TABELLÆ DE ALTHÆA, Lozenges of Marsh-mallows. (Rad. Althææ pulv. ʒiss, sacchar. alb. pulv. ʒivss, f. massa. Ph. P.)** Demulcent, expectorant.

**TABELLÆ ANTIMONIA'LES KUNCKELII, Tabellæ de stibii sulphure'to, Lozenges of Sulphuret of Antimony, Mor'suli antimoniæ'les, M. stibii, M. stibia'ti, Trochisci stibiati. (Amygdal. dulc. ʒj, sacch. lss, sem. cardam. cinnam. pulv., sulph. antim. prapar. aa ʒj, fiant tabellæ. Ph. P. Each to weigh 10 grains.)** Recommended in cutaneous diseases, blennorrhægia, arthritic pains, &c. Dose, 4 or more.

**TABELLÆ AD ARDOREM VENTRICULI, Trochisci carbonatis calcis**—*t. Cardialgicæ, Trochisci carbonatis calcis.*

**TABELLÆ DE CATECHU ET MAGNESIÂ, Lozenges of Catechu and Magnesia, (F.) Tablettes de catechu et de magnésiæ. (P. catech. ʒvj, p. magnes. ʒiv, p. cinnam. ʒiiij, sacch. alb. lss, g. tragac. gr. xij, aq. cinnam. q. s. ut f. massa. Ph. P. Each to weigh 12 gr.)** Antacid, absorbent, and stomachic. Dose, 5 to 10 lozenges.

**TABELLÆ CINCHONÆ, T. de kind kind, Bark lozenges. (Ext. cinchon. sicc. ʒss, sacch. ʒiv, cinnam. ʒss, mucilag. g. trag. q. s. ut f. massa. Ph. P.)** Tonic.

**TABELLÆ DE CITRO ET DIACARTHAMO, T. de Scammonio et Sennâ.**

**TABELLÆ DE FERRO, Steel lozenges, Tab'ule martia'les, T. instauran'tes, T. antichlorot'ica. (Ferri limat. porphyris. ʒss, p. cinnam. ʒj, p. sacch. ʒvj, g. trag. et aq. cinnam. q. s., ut fiat**

**massa. Each lozenge to weigh 12 gr. Ph. P.)** Tonic, stomachic. Dose, v to x.

**Aromatic lozenges of steel.** These consist of sulphate of iron, with a small proportion of the Tincture of *Cantharides.*

**TABELLÆ DE KINÂ KINÂ, T. cinchonæ.**

**TABELLÆ DE MAGNESIÂ, T. absorbent'es, Magnesiæ lozenges. (Magnes. ʒj, sacchar. alb. ʒiv, mucil. g. tragac. q. s. Ph. P.)** Absorbent and antacid.

**TABELLÆ DE RHEO, Rhubarb lozenges. (P. rhej. ʒss, sacch. ʒv, mucilag. gum tragac. q. s.; f. massa. Each to contain 12 grains. Ph. P.)** Stomachic and laxative.

**TABELLÆ DE SCAMMONIO ET SENNÂ COMPOSITE, Compound lozenges of scammony and senna, T. de citro et diacarthamo. (Scammon. ʒiiij, Sennæ ʒivss, rhej. ʒiss, caryoph. ʒj, corticis limon. confect. ʒj, sacch. ʒvj, f. massa. Ph. P.)** Purgative. Dose, ʒij to ʒvj, or more.

**TABELLÆ AD SITEM, T. acidi oxalici**—*t. ad Sodam, Trochisci carbonatis calcis*—*t. de Stibii sulphureto, T. antimoniales Kunckelii.*

**TABELLÆ DE SULPHURE SIMPLICIS, Simple sulphur lozenges. (Sulphur lot. ʒss, sacch. ʒiv, muc. g. tragac. cum aquâ rosâ prapar. q. s. Ph. P.)** Expectorant, demulcent, &c. Used in diseases of the chest, and in cutaneous affections. Dose, 1 lozenge.

**TABELLÆ DE SULPHURE COMPOSITE, Compound sulphur lozenges. (Sulph. lot. ʒj, acid. benzoic. gr. xij, rad. irid. p. ʒss, ol. anisi. gtt. viij, sacch. ʒvss, g. trag. q. s. Ph. P.)** Aperient, expectorant and stimulant (ʒi). Dose, 4 a day.

**TABERNA MEDICA, Pharmacopolium.**

**TABES, Marasmus Tabes, Tabum, from tabers, 'to consume; T'ekedon, Atroph'ia, Decline.** Emaciation of the whole body, with general languor, hectic fever, and, for the most part, depressed spirits.

**TABES, Atrophy, Phthisis**—*t. Coxaria, Ischiophthisis*—*t. Diabetica, Diabetes mellitus*—*t. Diuretica, Diabetes mellitus.*

**TABES DORSALIS, T. Dorsu'alis, Marasmus tabes dorsalis, Phthisis no'tias, Phthisis dorsalis, Myelophthis'is, Myelatrophi'ia, Tabes ossis sacri.** By this term is meant a wasting of the body, attended at first with a pain in the back or loins, and afterwards in the neck or head,—caused, it has been conceived, by too early or too frequent addiction to venery.

**TABES GLANDULARIS, T. mesenterica, Scrofula**—*t. Lactæ, Atrophia lactantium, see Galactia.*

**TABES MESENTERICA, Atroph'ia mesenterica, Atroph'ia Infant'um, A. glandularis, A. infantilis, A. dorsi, Paraly'sma mesentericum, M'alcies Infant'um, P'eatrophi'ia, Tabes glandularis, T. Scrofulosa, Soro'ph'ia mesenterica, Rachial'gia mesenterica, Myelophthis'is sicca, Febris hec'tica infant'um, Phthisis mesar'ica, Physco'nia mesenterica, Mesenteri'tis, Mesenteric Disease, (F.) Carreau, Char'tre, Scrofules ou Escrouelles mésentériques, Étiisie mésentérique, Rachialgie mésentérique, Atrophie mésentérique, Physco'nie mésentérique, Entéromésentérite, Tubercles des ganglions mésentériques, Phthisis mésentérique.** An engorge-

ment and tubercular degeneration of the mesenteric glands, followed by emaciation and general disorder of the nutritive functions. The disease is often owing to inflammation or irritation of the lining membrane of the intestines, giving occasion to enlargement of the glands of the mesentery,—as injury to the upper or lower extremities causes inflammation, and enlargement of the lymphatic glands of the axilla and groin. It occurs, particularly, in children of a scrofulous diathesis; and in those who are weaned too early, or fed on indigestible substances. Diarrhœa, emaciation, anorexia, or immoderate appetite; hardness and swelling of the abdomen; and, towards the end, hectic fever, are the chief symptoms of this affection; the prognosis of which is usually unfavourable. On opening the bodies of those who die of the disease, the mesenteric glands are found disorganized, tubercular, or in a more or less advanced state of suppuration. The treatment is the same as in scrofulosis. Frictions may be added over the abdomen and spine; and mercury, in small doses, so as to excite a new action in the system. The food must be easy of digestion, and the bowels be kept soluble.

**TABES NUTRICUM, Atrophia lactantium, see Galactia**—t. Pectoris, Rachitis—t. Pulmonalis, Phthisis pulmonalis—t. Ossis sacri, Tabes dorsalis—t. Scrofulosa, T. mesenterica—t. Senum, Marasmus senilis.

**TABIDUS, Phthisicus.**

**TABLE, Tab'ula, Tabell'a, Tabulat'um, Lam'ina, Pa'ries, Squama.** A name given to the plates of compact tissue, which form the bones of the cranium. Of these, one is external; the other internal and called *Tab'ula vitrea* on account of its brittleness.

**TABLES DE MORTALITÉ, Mortality, bills of.**

**TABLET, Trochiscus.**

**TABLETTE, Tabella.**

**TABLETTES DE CACHOU ET DE MAGNÉSIE, Tabellæ de catechu et magnesiâ.**

**TABLIER, Ventrale cutaneum.**

**TABULA, Tabella, Table.**

**TABULÆ ANTICHLOROTICÆ, Tabellæ de ferro**—t. Instaurantes, Tabellæ de ferro—t. Martiales, Tabellæ de ferro.

**TABULATUM, Tabella, Table.**

**TABUM, Ichor, Sanies, Tabes.**

**TAC, Influenza.**

**TACAMAHACA, Fagara octandra**—t. Caragna, Caranna.

**TACHE, Macula**—t. de Neissance, Nævus.

**TACHENCAUSIS, Combustion, human.**

**TACHES HËPATIQUES, Chloasma.**

**TACHES LAITEUSES, Plaques lactieuses, 'milky spots or patches.'** White spots occasionally seen on the heart, and regarded by many pathologists as the results of previous pericarditis.

**TACHES DE ROUSSURE, Ephelides**—t. Rouges, Spots, Red.

**TACHYIATER, Tachyiatrus.** Same etymon as the next. One who cures speedily.

**TACHYIATRIA, from ταχυ, 'quick,' and ἰατρία, 'healing.'** The art of curing quickly.

**TACHYOTOMY, Tachyotomia, from ταχυ, 'quick,' and τομή, 'incision.'** The art of cutting or operating rapidly.

**TACITURNITY, Taciturnitas, Sigè, 'silence,' from tacere, 'to be silent.'** 'State of a

person who does not speak.' Morbid taciturnity sometimes exists as a symptom of the neuroses, especially of melancholy.

**TACT, Tactus.** A modification of the sense of touch. Passive judgment by the cutaneous nerves regarding bodies exterior to the skin. Tact is passive: Touch, active.

**TACTIO, Touch.**

**TACTUS, Tact, Touch**—t. Dolorificus, Haptodysporia.

**TÆDË, Dœs, dœs.** A term used for a medicine employed under the form of fumigation, pessary, or troch.

**TÆNIA, Tœnia, Fas'cia, from ταινία, 'a fillet, a riband.'** See Bandage. Also a genus of intestinal worms, characterized by an elongated, flattened, and articulated body, with four suckorial oscula on the head. Of this genus, two only inhabit the human body—the *Tœnia lata*, (see Bothriocephalus latus,) and *Tœnia solium*.

**TÆNIA ACEPHALA, Bothriocephalus latus**—t. à Anneaux courts, Bothriocephalus latus—t. à Anneaux longs, Tœnia solium—t. Articulus demittens, Tœnia solium—t. Cucurbitina, Tœnia solium—t. Dentata, Bothriocephalus latus—t. Grisea, Bothriocephalus latus—t. Hippocampi, Corpora fimbriata—t. Humana armata, Tœnia solium—t. Humana inermis, Bothriocephalus latus—t. Hydatigena, Hydatid—t. Lata, Bothriocephalus latus—t. à longus articulationis, Tœnia solium—t. Membranacea, Bothriocephalus latus—t. non armé, Bothriocephalus latus—t. Oculis lateralibus geminis, Bothriocephalus latus—t. Oculis lateralibus solitariis, Bothriocephalus latus—t. Oculis marginalibus solitariis, Tœnia solium—t. Oculis superficialibus, Bothriocephalus latus—t. Prima, Bothriocephalus latus—t. Sans épine, Tœnia solium—t. Secunda, Tœnia solium.

**TÆNIA SEMICIRCULARIS, Gem'inum contrarium semicircula're, Lambus posterior cor'poris striati, Stria cor'nea, Stria semilunaris, Frœnulum novum, Fascia semicircularis, Bandolette des éminences pyriformes, (Ch.) (F.) Bandolette, B. demicircularaire, Lame cornée.** A medullary, grayish, semitransparent layer, situate in the groove that separates the thalamus opticus from the corpus striatum in the lateral ventricle.

**TÆNIA SOLIUM, T. oculis marginalibus solitariis, Tœnia cucurbitina, Tœnia humana armata, Hal'ysis solium, Vermis cucurbitinaus, Lumbricus latus, Tœnia sans épine, Tœnia articulus demittens, Solium, T. secunda, Tœnia à longus articulationis, Tœnia à anneaux longs. Var solitaire, V. cucurbitain, Long Tape Worm,** has an almost hemispherical, discrete head; an obtuse beak; the neck full anteriorly; all the joints slightly obtuse, the anterior very short; the next almost square, and the rest oblong; the marginal foramina vaguely alternated. The tœnia solium is commonly a few feet long; sometimes its length is enormous. It is said to have been met with 600 feet long. It principally inhabits the small intestines, and is not common. The oil of turpentine, in some form, largely exhibited, is perhaps the best remedy.

**TÆNIA TENELLA, Bothriocephalus latus**—t. Vulgaris, Bothriocephalus latus.

**TÆNIÆ COLI, see Colon.**

**TÆNIÆFUGE, Tœniæfugeum, from tœnia, and fugo, 'I drive off.'** A remedy calculated to expel tœnia.

**TÆNIOLA**, *Bandelette*. Used by Gerber for a simple, band-like, or flat fibre, *Filum tæniaformè*, seen under the microscope.

**TAFFETAS AGGLUTINATIF**, Sparadrapum adhaesivum—*t. d'Angleterre*, see Sparadrapum adhaesivum—*t. Epispastique*, Sparadrapum vesicatorium—*t. Gommé*, see Sparadrapum adhaesivum—*t. Vésicant*, Sparadrapum vesicatorium.

**TAFIA**, Rum.

**TAILLADE**, Incision, see *Entaille*.

**TAILLE**, Lithotomy—*t. Hypogastrique*, Hypogastric operation of lithotomy, see Lithotomy—*t. Par le rectum*, see Lithotomy—*t. Post-érieure*, see Lithotomy—*t. Recto-vésicale*, see Lithotomy—*t. Sus-pubiéne*, see Lithotomy.

**TAKAMAHAKA**, *Fagara octandra*.

**TAL**. A word formerly employed for alkali. It also meant the dung of the peacock.

**TALC EARTH**, Magnesia.

**TALCUM NEPHRITICUM**, Nephreticus lapis.

**TALENTUM**, *ταλαντον*. An ancient weight equal to 64 pounds, 2 oz., 5 dr., and 24 grains *Poids de Marc*. See Weights and Measures.

**TALIEOLUS**, Malleolus.

**TALIACOTIAN OPERATION**, Rhinoplastic.

**TALINUM UMBELLATUM**, see *Mistura*.

**TALIPES**, *Kyllosis* (Clubfoot.)

**TALON**, see *Calcaneum*.

**TALPA**, 'a mole.' *Topina'ria*, *Tupina'ria*, *Talpa'ria*, *Testu'do*, (F.) *Taupa*. A tumour situate on the head, which has been supposed to burrow like a mole.

**TALPARIA**, *Talpa*.

**TALUS**, *Astragalus*, *Malleolus*, see *Calcaneum*.

**TAMARA CONGA**, *Averrhoa carambola*.

**TAMARÆA ZECLA**, *Tamarindus*.

**TAMARIN**, *Tamarindus*.

**TAMARINDI PULPA**, *Pulp of tamarinds*, (*Tamarinds*, q. s. Digest them with a small quantity of water, until they become of a uniform consistence; then separate the seeds and filaments, by pressing through a hair-sieve. Ph. U. S.)

**TAMARINDS**, PULP OF, *Tamarindi pulpa*.

**TAMARINDUS**, *T. Indica*, *Thamarindus*, *Oziphanicon*, *Sil'iqua Arab'ica*, *Balampul'li*, *Tamara's zecla*, *Oxyphani'cia*, *Acacia Indica*, *Tamarind tree*, (F.) *Tamarin*. *Family*, Leguminosæ. *Sex. Syst.* Triandria Digynia. The pulp of the tamarind with the seeds connected by numerous tough strings, is exported from the West Indies, preserved in syrup,—*Tamarindus*, (Ph. U. S.) It is refrigerant and laxative. *Tamarind whey* is made by boiling  $\frac{3}{4}$  of the pulp with  $\frac{1}{2}$  of milk. When strained, it is used as a diluent in fever.

**TAMARISCUS**, *Tamarix Gallica*.

**TAMARIX GALICA**, *Tamariscus*. The *Tamarisk tree*. *Family*, Portulacæ. *Sex. Syst.* Pentandria Pentagynia. The bark, wood, and leaves were formerly employed medicinally;—the former for its aperient and corroborant virtues, in obstructions of the liver; the latter in icterus, hæmoptysis, and some cutaneous affections.

**TAMBOUR CAVITÉ DU**, *Tympanum*.

**TAMPA BAY**, see *Saint Augustine*.

**TAMPON**, see *Plugging*.

**TAMPONNEMENT**, *Plugging*.

**TANACE'TUM**, *T. vulgare*, *Tana'sia*, *Athana'sia*, *Parthénium mas*, *Tansy*, (F.) *Tanaisie vulgaire*. *Family*, *Corymbifera*. *Sex. Syst.* Syngenesia Polygamia. The leaves and flowers of tansy have a peculiar, strong odour, and warm, bitter taste. They are tonic, deobstruent(?), and anthelmintic. Dose,  $\frac{3}{ss}$  to  $\frac{3j$ . The infusion is usually drunk as tea.

**TANACE'TUM BALSAM'ITA**, *Balsamita mas*, *B. suaveolens*, *B. major*, *Tanacetum hortens't*, *Costus horto'rum*, *Mentha Roma'na* seu *Saracen'ica*, *Costmary*, *Alcoast*, *Cock-mint*, (F.) *Menthe cog*, *Herbe au cog*, *Grand Baume*. A fragrant-smelling herb, somewhat resembling mint, and formerly much esteemed as a corroborant, carminative, and emmenagogue.

**TANACE'TUM HORTENSE**, *T. balsamita*.

**TANAISIE VULGAIRE**, *Tanacetum*.

**TANASIA**, *Tanacetum*.

**TANGÉ**, *ταγγη*, 'rancidity.' A putrescent tumour.

**TANINUM**, *Tanninum*.

**TANNIC ACID**, *Tannin*.

**TANNICUM PURUM**, *Tannin*.

**TANNIN**, from (F.) *tanner*, 'to tan.' *Tannicum purum*, *Tanninum*, *Tanninum*, *Principium adstringens* seu *Scytodespicum* seu *Byrsodespicum* seu *Corid'cerum*, *Scytodespicum*, *Acidum Tannicum*, *A. Quercitan'nicum*, *Tannic acid*, (F.) *Acide tannique*. A principle obtained from oak bark and other astringent vegetables, so called from its forming the principal agent in the process of tanning. Pure Tannin, obtained from galls, (see Ph. U. S.) has been lately introduced into medicine as an excellent and powerful astringent. Dose, two grains repeated several times a day. The *Tannate of Lead*, *Plumbi Tannas*, has been applied, in the form of ointment, to excoriations, and sloughing sores from pressure, ( $\frac{3ij}$  of the tannate to  $\frac{3j$  of cerate.)

**TANSY**, *Tanacetum*—*t. Wild*, *Potentilla anserina*.

**TAPER**, *HIGH*, *Verbascum nigrum*.

**TAPE'TUM**, *Ta'pestry*. A shining spot, on the outside of the optic nerve, in the eyes of certain animals, which is owing to the absence of the pigmentum nigrum occasioning the reflection of a portion of the rays from the membrana Ruychiana. Its use appears to be, by reflecting the rays, to cause a double impression on the retina, and thus add to the intensity of vision.

**TAPE'TUM ALVE'OLI**, *Membra'na sctor'na dentitium*. The outer membrane of the teeth. The lining membrane or periosteum of the alveoli.

**TAPEWORM**, *BROAD*, *Bothriocephalus latius*—*t. Long*, *Tænia solium*.

**TAPIOCA**, see *Jatropha manihot*—*t. Pearl*, see *Jatropha manihot*.

**TAPSUS BARBATUS**, *Verbascum nigrum*.

**TAPSARIA**, *Decoctum herdei*.

**TAR**, see *Pinus sylvestris*—*t. Barbadoes*, *Petroleum*—*t. Mineral*, *Pissaspphaltum*.

**TAR'ACHE**, *Tarax'is*, *Tarag'ma*, *Tarag'mus*, 'disorder.' A disorder of sight, which arises from a blow, compression of the eye, or the action of dust, smoke or other external cause. By some, it is understood to signify mild or incipient ophthalmia.

*Ταραχη της κοιλίας*, 'disturbance of the belly.' *Diarrhoea*.

TARAGMA, Tarache.

TARAGMUS, Tarache.

TARAGON, Artemisia dracunculus.

TARANTALISMUS, Tarantismus.

TARANTISMUS, *Tarentis'mus*, *Tarantalismus*, *Dinomonia*, *Chorea Sancti Valentini*, *Tarentulism*, *Tarantism*. A feigned or imaginary disease in Apulia, characterized by excessive avidity for dancing at the sound of instruments, and which was ascribed, by the vulgar, to the bite of the tarantula. A sort of tarantismus, considered peculiar to Africa, and believed to be spontaneous, has been called *Tarentismus Tangit'anus*, *Janon-tarentismus*.

TARAN'TULA, from Tarentum or Tarento, a town of Italy where it abounds; *Tarentula*, (F.) *Tarentulo*. A species of spider—the *Ara'nea Tarentula* of Linnaeus, *Lyco'sa Tarentula* of Latreille, whose bite has been looked upon as dangerous. Music has been thought to cure it.

TARASCON, MINERAL WATERS OF. Chalybeate springs in the department of Arriège, France. They contain iron and carbonic acid.

TARAXACUM, *Leontodon taraxacum*.

TARAXIS, Tarache, see Ophthalmia.

TARCHON SYLVESTRIS, *Achillea ptarmica*.

TARENTISMUS, *Tarantismus*—t. *Tangit'anus*, *Tarantismus*.

TARENTULA, *Tarantula*.

TARENTULISM, *Tarantismus*.

TARGAR, *Juniperus communis*.

TARI. Palm or cocoa wine, from which sugar was obtained, called *Jagre*. It was once used as a tonic.

TAR'NI PONS, *Interpeduncular space*, *Posterior perforated space*, *Locus perforatus posticus*. A cineritious substance, between the corpora albicantia, which assists in forming the bottom of the third ventricle.

TARO, *Arum esculentum*.

TARQUETTE, *Herniaria glabra*.

TARSAL, *Tarsus*. That which relates to the tarsus.

TARSAL ARTICULATIONS result from the union of the bones of the tarsus with each other.

TARSEUS, *Tarsal*.

TARSO-METATARSAL, *Tarso-metatarsus*. That which relates to tarsus and metatarsus.

TARSO-METATARSAL ARTICULATIONS are those between the bones of the second row of the tarsus and the metatarsal bones. The term *Tarso-metatarsal* is likewise applied to ligaments connected with these joints, some of which are *dorsal*, and others *plantar*.

TARSO-METATARSAL-PHALANGIEN DU POUCE, *Adductor pollicis pedis*—t. *Phalangi'um du pouce*, *Flexor brevis pollicis pedis*—t. *Sous-phalangi'um du petit orteil*, *Flexor brevis minimi digiti pedis*—t. *Sous-phalangi'um du premier orteil*, *Flexor brevis pollicis pedis*.

TARSOPHY'MA, from *Tarsus*, and *φύμα*, 'a tumour.' A swelling of the tarsus.

TARSOT'OMY, *Tarsotomia*, from *Tarsus*, and *τομή*, 'incision.' The section or removal of the tarsal cartilages.

TARSUS, *Planta prima pedis*, *Rasso'ta seu Rasce'ta pedis*, *Pe'dium*, *Cavie'ulum pedis nudus*. 1. The posterior part of the foot. The

tarsus consists of 7 bones, arranged transversely in two rows, between which amputation is sometimes performed. The *first or Tibial row*, (F.) *Première rangée*, *R. jambière*, consists of the astragalus and os calcis; the *second or metatarsal*, (F.) *seconde rangée*, *R. métatarsienne*, of the scaphoides, cuboides, and three ossa cuneiformia. 2. The *Tarsi*, *Tarsal cartilages*, *Tarsal fibro-cartilages*, *Orchoi*, *Crepidines seu Coro'nae seu Chela seu Ungula Palpebrarum*, *Tharsi*, are two small cartilaginous layers, seated in the substance of the free edge of each eyelid. The upper is larger and broader than the lower. Both commence at the bifurcated extremity of the tendon of the orbicularis palpebrarum, and pass to the opposite commissure of the eyelids. They are broader in the middle than at their extremities.

TARTAR, Antimonium tartarizatum (improperly), Potassæ supertartas impurus—t. Calcareus, Potassæ subcarbonas—t. Crystals of, Potassæ supertartas—t. Emetic, Antimonium tartarizatum—t. Soluble, Potassæ tartas, see Potash.

TARTA'REI MORBI. A term employed by Paracelsus to designate certain diseases which he attributed to tartar.

TARTARI CRYSTALLI, Potassæ supertartas.

TARTARIC ACID, *Ac'idum tartar'icum*, *A. tartar'um*, *Acor tartar'icus*, *Acidum tartari essential'e*, *Tartar'ous acid*, *Sal tartari essential'e*. (Potassæ bicart. Biiss, aq. destillat. fere., cong. iij, creta ppt' Bj, acidi sulph. Bj. Boil the bitartrate with two gallons of the water, and gradually add the prepared chalk, until no more bubbles appear; let the tartrate of lime subside; then pour off the fluid and wash the tartrate of lime with distilled water, until it is tasteless. Pour upon it the sulphuric acid, diluted with a gallon of boiling distilled water; and set the mixture aside for 24 hours, occasionally stirring it. Filter and evaporate to crystallize. Ph. L.) It is refrigerant and antiseptic, but is chiefly used for making effervescent draughts with soda.

TARTARUM, Potassæ supertartas impurus—t. Vitriolatum, Potassæ sulphas.

TARTARUS AMMONIÆ, Ammonie tartas—t. Chalybeatus, Ferrum tartarizatum—t. Crudus, Potassæ supertartas impurus—t. Dentium, Odontolithos—t. Emeticus, Antimonium tartarizatum—t. Kalicoferricus, Ferrum tartarizatum—t. Kalinum, Potassæ tartas—t. Lixiviz, Potassæ tartas—t. Martialis, Ferrum tartarizatum—t. Potassæ ferruginosus, Ferrum tartarizatum—t. Subpotassicus, Potassæ supertartas—t. Superpotassicus, Potassæ supertartas, —t. Tartarizatus, Potassæ tartas.

TARTRATE D'AMMONIAQUE, Ammonie tartas.

TARTRE BRUT, Potassæ supertartas impurus—t. Cru, Potassæ supertartas impurus—t. des Dents, Odontolithos—t. Emetique, Antimonium tartarizatum—t. Stibié, Antimonium tartarizatum.

TARTRUM SOLUBILE, Potassæ tartas.

TASIS, Extension, Tension.

TASTE, *Gustus*, *Gousis*, *Gouma*, *Gouthmos*, (F.) *Gout*. One of the five external senses, which instructs us of the savours of bodies, and of which the tongue is the principal organ.

*Gustation*, *Gustatio*, is the exercise of this

faculty. In disease, the taste frequently becomes variously vitiated. The nerves of taste are probably the lingual branch of the fifth pair and the glosso-pharyngeal.

TASTE, Savour.

TAUPE, Talpa.

TAUROCOLLA, ταυροκόλλα. Glue made of the ears and genitals of the bull. It was formerly much esteemed.

TAURUS, Penis, Perinæum.

TAXIS, 'arrangement;' from τάσσω, 'I order,' 'I arrange;' *Repositio, Reductio, Synsax'is*. A methodical pressure exerted by the hand on a hernial tumour, for the purpose of reducing it. This operation is generally easy in herniæ that are free from adhesions, of small size, and with a large opening into the sac; but it is very difficult and frequently impracticable in those that are adherent or strangulated. To perform the taxis, the patient should be put in the horizontal posture, and in one in which the parietes of the abdomen are relaxed. The manual procedure varies in each species of hernia. In all cases, too strong pressure of the parts must be avoided; as inflammation and gangrene might be induced. The displaced organs must be pushed into the abdomen, according to the direction of the axis of the hernial sac. The reduction is sometimes favoured by blood-letting *ad deliquium*; the warm bath; warm fomentations; tobacco, emollient glysters; and, at times, by cold applications, as ice, &c. In a case of strangulated hernia, should the taxis fail, an operation becomes necessary.

TAXUS BACCA'TA. The *Yew tree, Smilax, Smilas, Thym'alos*, (F.) *If. Family, Coniferae. Sex. Syst. Diœcia Monadelphia*. The ancients believed the yew to be poisonous; but the fruit may be eaten without inconvenience. The leaves have been often recommended in epilepsy. The resin, obtained from the bark, has been called *albir*.

TAYE, Caligo.

TAYLOR'S REMEDY FOR DEAFNESS, see Allium.

TEA, Thea—t. Babama, Lantana camara—t. Berried, Gaultheria—t. Berry, Gaultheria—t. Blankenheim, see Galeopsis grandiflora—t. Brazil, Lantana pseudothea—t. Labrador, Ledum latifolium—t. South sea, Ilex vomitoria—t. Spanish, Chenopodium ambrosioides.

TEAR, Sax. *tear, Lacryma, Lach'ryma, Lacruma, Dacry, Dac'ryma, Dac'ryon, Humor lachrymal'is*, (F.) *Larme*. An excrementitious humour, secreted by the lachrymal gland, and poured between the globe of the eye, and the eyelids, to facilitate the motions of those parts. The tears are saline, inodorous, and colourless. They turn the syrup of violets green; and contain chloride of sodium, with excess of base, phosphates of lime and soda, and albumen.

TEASEL, CULTIVATED, Dipsacus sylvestris.

TEAT, Nipple.

TEAZEL, Eupatorium perfoliatum.

TECEDON, Phthisis.

TECNOCTONIA, Infanticide.

TECOLITHOS, Judæus (lapis.)

TEINESMOS, Tenesmus.

TEINODYN'IA; from τείνω, 'to extend,' and πόνη, 'pain.' Pain of the sinews or tendons.

TEINOPHLOGO'SIS; from τείνω, 'to extend,' and φλογωσις, 'inflammation.' Inflammation of the sinews or tendons.

TEINTURE, Tincture—t. *Ethérée*, *Æthereal*—t. *Rubéfiant*, Tinctura cantharidis.

TEKEDON, Tabes.

TELA, Texture, Tissue—t. Accidental Medullaris, Encephaloid—t. Cellulosa, Cellular tissue—t. Erectilis, Erectile tissue—t. Galteri, Sparadrapum Galteri—t. Hippocraticis cribrosa, Cellular tissue—t. Hymenochondroides, Tissue, cartilaginous—t. Hymenochondrodes, Tissue, cartilaginous—t. Ichthyocollæ glutinans, see Sparadrapum adhaesivum—t. Inodularis, Tissue, inodular—t. Organica, Histos—t. Vesicatoria, Sparadrapum vesicatorium.

TELAMON, Habena.

TELAMONES, τελαμωνίς, 'bandages.' Charpie, used for wounds; or linen, employed for bandages.

TELANGIECTASIA, Telangiectasia.

TELANGIECTA'SIA, Telangiect'asia, *Telangect'asia, Angiectolecta'sia, Hematotelan'giosis, Hamotelangi'osis Angiect'asia, Anastomosis aneurysmat'ica*; from τείλω, 'far,' αγγιον, 'vessel,' and εκτασις, 'dilatation.' Dilatation of vessels. Nævus maternus. Aneurism by anastomosis. According to some, fungus hæmatodes. See Hematodes fungus.

TELEPHIUM, *Ulcus telephium*. The ancients gave this name to any ulcer of a very bad kind, and difficult to cure, because the wound, which Achilles inflicted on Telephus, degenerated into a similar ulcer.

TELEPHIUM, Sedum telephium.

TELLURISMUS, Magnetism, animal.

TELUM, Penis—t. Emplasticum, Sparadrapum.

TEMPE, Temple.

TEMPERAMENT, *Temperamentum, Temperat'ura, Tempera'tio, Tempes'ries*; originally from *tempus*, 'time,' the great *temperer*; *Complex'io, Crasis, Eucra'sia*. A name given to the remarkable differences that exist between individuals, in consequence of the variety of relations and proportions between the constituent parts of the body. Thus, of old, it was supposed, that, according to the predominance of any one of the four humours then generally admitted,—blood, lymph, bile, and atrabiles or black bile,—the manifestations of the functions were *tempered* or modified so as to give rise to

a sanguine, lymphatic, choleric, or atrabillious or melancholic predominance or temperament. The idea of the existence of certain of these humours has been banished, yet the influence of some, as of the blood, lymph, and bile, is still admitted by many. Too much influence has, doubtless, been assigned to temperament in the sense in which it was formerly and still is generally understood, although there can be no question that difference of organization occasions a difference in the activity of organs.

TEMPERAMENT, BILIOUS, Choleric temperament.

TEMPERANCE, *Sôphrosynê*, *Nephalotês*, *Sobrietas*, *Sobriety*. Moderation, opposed to gluttony and drunkenness. The advantage of temperance, in a hygienic point of view, requires no comment.

TEMPERANTS, Sedatives.

TEMPERATIO, Temperament.

TEMPERATURA, Temperament.

TEMPERIES, Temperament.

TEMPLE, *Tempus*, *Région Temporalis*, *Crotaphus*, (F.) *Tempo*. A depression, on each side of the head, between the forehead and eye anteriorly, and the ear posteriorly. The temples, distinguished into *right* and *left*, correspond to the temporal fossa on each side. The word is said to be from the Latin *tempus*, 'time,' because in this part the hair first begins to turn white, and to indicate age.

TEMPORAL, *Temporalis*. That which relates to the temples.

TEMPORAL APONEUROSIS is a very strong aponeurosis, of a bluish, shining colour, which is attached to the whole of the curved line of the temporal bone; to the posterior edge of the malar bone; to the superior margin of the zygomatic arch; and forms an envelope for the temporal artery.

TEMPORAL ARTERIES, *Crotaphitis Arteries*, are several. 1. The *Temporal Artery*, properly so called, arises from the outer side of the superior part of the external carotid. It ascends between the ramus of the jaw, the meatus auditorius externus, and the parotid gland, which covers it as far as the zygomatic arch. Above this it becomes subcutaneous; and, when it has attained the middle of the temporal region, it divides into two branches; the one anterior—*A. temporalis frontalis seu interna seu anterior*; the other posterior—the *A. temporalis occipitalis seu externa seu superior*. The temporal artery, before its division, gives off, 1. Branches to the parotid; to the joint of the lower jaw; to the meatus auditorius, and to the masseter. 2. The *transverse artery of the face*. 3. The *middle temporal*, which arises beneath the cheek-bone, and traverses the temporal aponeurosis, immediately beneath that bone. II. The *Deep-seated Temporals*, *A. temporalis profunda*. These are two in number. They arise from the internal maxillary, and have been distinguished, from their position, into *anterior* and *posterior*. They send their principal divisions to the temporal muscle.

TEMPORAL BONE, *Os temporis seu temporalis seu arcuall seu armall seu parietall inferius seu crotaphiticum seu memento mori seu mendoosum seu crotaphus*, is seated at the lateral and inferior part of the cranium, of which it forms part; and contains, within it, the special organs of audition. It is usually divided into three portions—1. The *squamous*, *Pars squamosa*,

*Os lepidoides seu squamosum seu squamiforme*, (F.) *Portion écailleuse ou squameuse*. 2. The *mastoid portion*, and 3. The *Petrous portion*, *Petrous Process*, *Pars petrosa*, *Pyramis trigonae*, *Os lapideum seu lapideum seu osseum seu petrosum seu lithoïdes seu durum seu prœruptum rupi assimilatum seu norvall*, *Pars pyramidalis ossis temporis*, (F.) *Portion pierreuse*, *Rocher*, *Os pétreux*, *Apophyses pyramidale*, *A. pétrée*.

It has, first, an *auricular or external face*, on which is a surface that makes part of the temporal fossa; the *zygomatic process*; the *glenoid cavity*; the  *fissure of Glaserius*; the *meatus auditorius externus*; the *mastoid process*; the *digastric groove*; the *canalis caroticus*; the *jugular fossa*; the *styloid process*; the *stylemastoid foramen*, &c. 2. A *cerebral or internal surface*, which corresponds to the cavity of the cranium, and on which is the *Pars petrosa*, the *hiatus Fallopi*, the *meatus auditorius internus*, the *fissure of the aqueductus vestibuli*, a *portion of the gutter for the lateral sinus*, &c. 3. A circumference, on which is observed the orifice of the *bony portion of the Eustachian tube* and the *aqueductus cochleæ*, &c. The temporal bone is articulated with the sphenoid, occipital, parietal, malar, and inferior maxillary bones. It is developed from five points of ossification.

TEMPORAL FOSSA is an excavation, observed at each side of the head. It is filled by the muscle whose name it bears, and is formed by the temporal and sphenoid, below; by the parietal and frontal bones, above; is separated, by a transverse crista, from the zygomatic fossa; and completed, before, by the cheek bone.

TEMPORAL MUSCLE, *Temporalis*, *Crotaphites*, (F.) *Arca-di-temporo maxillaris*, *Temporo-maxillaris* (Ch.) is a broad, flattened, triangular muscle which fills the temporal fossa. Its fibres are attached to the temporal aponeurosis and fossa; and all converge into a strong tendon, which passes under the zygomatic arch, and is inserted into the coronoid process of the lower jaw. This muscle raises the lower jaw, and applies the teeth against each other.

TEMPORAL NERVES. These are distinguished into the *superficial temporal*, furnished by the inferior maxillary branch of the 5th pair, behind the condyle of the jaw; and the *temporales profundi*,—*anterior* and *posterior*, furnished by the same nerve, at its exit from the cranium. Sömmering has given the name *temporal* to the divisions sent by the facial nerve to the temporal regions.

TEMPORAL VEINS were formerly called *Ætoi* or *Ætoi Phlebes*, *Aquila Vena*.

TEMPORO-AURICULAIRE, Attollens aurem—*s. Maxillaris*, Temporal muscle.

TEMPORO-MAXILLARY, *Temporo-maxillaris*. That which belongs to the temporal bone and lower jaw.

TEMPORO-MAXILLARY ARTICULATION or joint of the lower jaw, is seated between the glenoid cavity and transverse process of the temporal bone on the one hand, and the condyle of the lower jaw on the other. Two thin cartilages cover the surfaces of these bones. The one is common to the transverse process and the portion of the glenoid cavity, anterior to the fissure of Glaserius; the other belongs to the condyle. This articulation is furnished with an inter-articular fibro-cartilage, two synovial cap-

sules, and two lateral ligaments:—the one internal, and the other external.

**TEMPORO-MAXILLARY NERVES** of Bichat are the divisions of the facial nerve, distributed to the temporal and maxillary regions.

**TEMPUS**, Temple—t. Intercalare, Apyrexia, Intermision.

**TEMULEN'TIA**, *Ebr'etas, Ebrios'itas, Mithys'mus, Drunk'ennes*:—from wine, *Enophlyg'ia, Onophlyz'is, Vinolen'tia*, (F.) *Ivresso*. Plater gave this name to delirium; Ettmuller, to an apoplectic condition, depending upon drunkenness; the *Apoplez'ia Temulen'tia* or dead drunkenness. Commonly, *Temulentia* is used synonymously with drunkenness, *Methé*; and is often employed in the description of diseases to indicate a state resembling drunkenness. *Mania e Temulentia* is the same as *Delirium tremens*.

**TENACULA**, Bone-nippers—t. Volsella, Forceps (lithotomy.)

**TENACULUM**, from *teneo*, 'I hold.' A kind of fine hook attached to a handle which is thrust through the parietes of a blood vessel to draw it out and enable it to be tied.

**TENACULUM, ASSALINI'S**. An ingenious instrument, invented by Assalini. It consists of a forceps, or double tenaculum, the points of which are fine, sharp, and bifurcated, so as to be readily received into each other when the instrument is closed on the artery, which it is by a spring. It is of great use when the surgeon has no assistant at hand. The instrument is figured in S. Cooper's "First Lines."

**TENAÏLLE INCISIVE**, Bone-nippers.

**TENASMUS**, Tenesmus.

**TENDON**, *Tendo, Pronod'atio*, from *teno*, 'I stretch.' *Tenos, a Sinew*. A fibrous cord, more or less round, long, or flattened; of a white, pearl colour, and composed of very close parallel fibres. The tendons are attached to the bones, by one extremity; by the other, they receive the insertions of the fleshy fibres: sometimes they afford attachment to fleshy fibres at both ends;—as in the digastric muscle. The tendons must be considered as so many cords, for transmitting the motion of muscles to the bones or levers.

**TENDON D'ACHILLE**, Achillis tendo.

**TENDON, CORDIFORM, OF THE DIAPHRAGM**, Centre, phrenic.

**TENDONS, TWITCHING OF THE**, *Subsultus tendinum*.

**TENEOTOMIA**, Tenotomy.

**TÉNESME**, Tenesmus—t. *de l'Œsophage, Œsophagismus*—t. *Vésical, Bradysuria*.

**TENESMUS**, *Tenes'mos, Tenas'mus*, from *teno*, 'I stretch.' *Proctica Tenesmus, Proctospas'mus, Obstipa'tio Tenesmus, Tymag'mus*, (F.) *Ténesme, Épreintes*. Frequent, vain, and painful desires to go to stool;—one of the chief symptoms of inflammation of the lining membrane of the digestive tube, as of dysentery.

**TENESMUS VÉSICÆ**, Bradysuria—t. *Vesicæ mucosæ, Cystirrhæa*.

**TENETTES**, Forceps (craniotomy.)

**TÉNIA**, Tenia.

**TENNESSEE'**, MINERAL WATERS OF.

On the waters of French Broad River, in this state, is a large, clear, thermal spring. The heat is so great that, on first going into the water, it is almost insupportable.

**TENON**, Tendon.

**TENONT'AGRA**, from *tenon*, 'tendon,' and *agra*, 'seizure.' A variety of gout; which affects the tendinous parts of muscles, or the tendinous ligaments, which strengthen certain articulations.

**TENONTOTOMIA**, Tenotomy.

**TENONTOTRO'TI**, from *tenon*, 'tendon,' and *τροχονω*, 'I wound.' They who are wounded in the tendons.—Galen.

**TENOT'OMY**, *Tenotom'ia, Teneotom'ia, Tenontom'ia, Sectio seu Dissectio tendinum*, from *tenon*, 'a tendon,' and *τομή*, 'incision.' The operation of dividing a tendon, often practised for the removal of loxarthrus or deviation of the joints—as in club foot.

**TENSEUR DE L'APONÉVROSE FÉMORALE**, Fascia lata muscle.

**TEN'SION**, *Ten'sio, Tenu'ra, Tasis, Dist'asis, Entonsia*, (*Enton'ia* is also used for over-tension), *Conten'sio, Disten'sio*, from *tendo*, 'to stretch.' State of a part, which is stretched, when its textures are distended by the afflux of fluids, or the accumulation of gas; or when its fibres are drawn, as it were, in an opposite direction, and are, consequently, more resisting than usual.

**TENSOR TARSII**. A small muscle, belonging to the inner commissure of the eyelids, well described by Professor Horner, of Philadelphia, and hence termed *Muscle of Horner*. It is about three lines broad and six long; arises from the posterior flat surface of the os unguis, near its junction with the ethmoid bone, and passes forwards and outwards, lying on the posterior face of the lachrymal ducts. As it approaches the commissure of the lids, it splits into two nearly equal parts, each of which is appropriated to a duct, and inserted along its course, almost to the punctum lachrymale. Its chief office seems to be, to influence the position of the puncta lachrymalia, and to regulate the course of the tears through the lachrymal ducts.

**TENSOR PALATI**, Circumflexus musculus.

**TENSOR TYM'PANI**, *Inter'nus Auris, Internus Mal'lei*, (F.) *Salpingo-malléus*. A small muscle which arises from the petrous portion of the temporal bone, and the cartilage of the Eustachian tube, and terminates by a tendon, which is reflected over the processus cochleaformis, and is inserted into the apophysis of the handle of the malleus.

**TENSOR VAGINÆ FEMORIS**, Fascia lata muscle.

**TENSURA**, Tension.

**TENSUS**, Penis.

**TENT**, *Tenta, Turun'da*, and its diminutive *Turun'dula, Penic'ulus, Penicillus, Penicillum, Motos, Lemnis'cus*: (F.) *Tents, Mèche*, from *tentare*, 'to try or explore.' In surgery, tents are small rolls of lint, of a cylindrical or pyramidal shape, which are introduced into wounds and deep ulcers, to prevent them from closing before they are filled up from the bottom. Tents are sometimes also made of prepared sponge, gentian root, &c. They are not so much used as they formerly were.

**TENTACULARIA**, *Filaria hominis bronchialis*.

**TENTACULUM CEREBELLI**, Tentorium.

**TENTE**, Tent—t. *du Cervelat*, Tentorium.

**TENTIGO VENEREA**, Nymphomania—t. Verettr, Satyriasis.

**TENTIPELLUM**, from *tendo*, 'I stretch,'

and *pellis*, 'the skin.' Ancient name of a cosmetic, with which, it was pretended, wrinkles could be effaced.

**TENTORIUM**, *T. cerebello super-axton'sum*, *T. cerebelli*, *Tentaculum cerebelli*, *Septum transversae*, (Ch.) *Transversa Septum*, *Septum encephali*, *Intersep'ta horizontalia Pacchioni*, *Processus transversus dura matris*, *Lateral Processes of the Dura Mater*, *Diaphragma cerebri*, (F.) *Tento du cervelet*, *Plancher du Cerecum*, from *tendere*, *tentum*, 'to stretch.' A process of the dura mater, which separates the cerebrum from the cerebellum. It extends from the internal horizontal spine of the occipital bone, directly forwards to the sella Turcica of the sphenoid.

**TENTORIUM CEREBELLO**, Tentorium.

**TENTUM**, Penis.

**TENTWORT**, *Asplenium ruta muraria*.

**TENUIS MATER**, Pia mater.

**TENUITAS AQUOSA**, Predominium aquae.

**TEPHROSIA VIRGINIANA**, *Galega Virginiana*.

**TEPIDARIUM**, see *Stove*.

**TEPLITZ**, Töplitz.

**TERAS**, *Monster*.

**TERATOLOGY**, *Teratologia*, from *τερας*, 'genitive,' *τεραςος*, 'a monster,' and *λογος*, 'a discourse.' A description, or the doctrine, of monsters.

**TERATOSIS**, see *Monster*.

**TEREBELLA**, Trepan.

**TEREBENTHINE**, *Terebinthina*—*t. de Bordsauc*, see *Pinus sylvestris*—*t. de Chio*, see *Pistacia terebinthus*—*t. de Copahu*, *Copaiba*—*t. Commune*, see *Pinus sylvestris*—*t. d'Égypte*, see *Amyris opobalsamum*—*t. de Gilead*, see *Amyris opobalsamum*—*t. du Grand Caire*, see *Amyris opobalsamum*—*t. de Judée*, see *Amyris opobalsamum*—*t. de Melisso*, see *Pinus larix*—

**TEREBINTHINA**, from *τερεβινθος*, or *τερεβινθος*, 'the turpentine tree.' *Turpentina*, *Botin*, *Albotim*, *Altiibat*, *Brutino*, (F.) *Térébenthine*. A substance, of the consistence of honey, which flows from many trees of the terebinthaceae, and coniferae families. It is viscid; shining; more or less transparent; inflammable; of a warm, pungent taste; strong smell, and is entirely composed of resin and essential oil, without benzoic acid. It is soluble in alcohol. See *Turpentine*, *Pinus palustris* and *Pinus sylvestris*. All the turpentine are stimulant, diuretic, and cathartic.

**TEREBINTHINA ARGENTORATENSIS**, see *Pinus picea*—*t. Balsamea*, see *Pinus balsamea*—*t. Canadensis*, see *Pinus balsamea*—*t. Chia*, see *Pistacia terebinthus*—*t. Communis*, see *Pinus sylvestris*—*t. Cypria*, see *Pistacia terebinthus*—*t. Empyreumatica*, see *Pinus sylvestris*—*t. Veneta*, see *Pinus larix*—*t. Vera*, see *Pistacia terebinthus*—*t. Vulgaris*, see *Pinus sylvestris*. *t. de Vénise*, see *Pinus larix*.

**TEREBINTHUS**, *Terminthus*—*t. Gummi-fera*, *Bursera gummi-fera*—*t. Lentiscus*, *Pistacia lentiscus*—*t. Vulgaris*, *Pistacia terebinthus*.

**TEREBRA**, Trepan.

**TEREBRATIO**, Trepanning.

**TEREDO OSSIIUM**, *Caries*, *Spina ventosa*.

**TERES**, *Strangylus*, *Cylindroides*, 'long and round.' An epithet given to many organs, the fibres of which are collected into round fasciculi.

**TERES LIGAMENTUM**, (F.) *Ligament rond*. This name is given to the round ligament in

the cotyloid cavity of the os innominatum, which is attached to the head of the bone, and to the bottom of the cavity. It is also given to a small fibrous fascia, which extends from the coronoid process of the ulna to below the bicipital tubercle of the radius.

**TERES MAJOR**, (F.) *Angulus scapulo-humeral*, *Scapulo-humeral*, (Ch.) *Grand rond*, is situated at the inferior and posterior part of the shoulder. It is attached, on the one hand, to the outer surface of the scapula; to the corresponding part of its axillary margin; and, on the other, to the posterior margin of the bicipital groove of the humerus. It carries the arm backwards and inwards, and carries it also inwards in rotation. When it acts with the longissimus dorsi and pectoralis major, it applies the arm against the lateral part of the chest, and keeps it forcibly there.

**TERES MINOR**, (F.) *Le plus petit sus-scapulo-trochitérien*, (Ch.) *Petit rond*, *Margine-sus-scapulo-trochitérien*; *Nonus humeri Placentini*, is situated at the posterior and inferior part of the shoulder: it is narrow and flattened, from above to below, in its inner half; and, from before to behind, in the outer. It is attached, on the one part, to the outer surface of the scapula, near its inferior angle; and, on the other, to the inferior part of the great tuberosity of the humerus. It depresses the arm, and causes it to turn on its axis from within outwards. It also carries it backwards.

**TERESIS**, Observation.

**TERETRIUM**, Trepan.

**TERETRON**, Trepan.

**TERGEMINI**, Trigemini.

**TERGUM**, Dorsum, Vertebral column.

**TERMINALIA**, see *Myrobalanus*.

**TERMINOLOGY**, Nomenclature.

**TERMINTHUS**, *Terebinthus*, from *τερεβινθος*, 'the turpentine tree.' *Phyma Anthrax Terminusus*, *Berry* or *Fungous carbuncle*. The ancients gave this name to a tumour, surmounted by a black pustule, and resembling the fruit of the turpentine tree.

**TERMINTHUS**, *Pistacia terebinthus*.

**TERMINUS SUPERIOR ASPERE ARTERIÆ**, Larynx.

**TERMS**, Menses.

**TERRA ABSORBENS MINERALIS**, *Magnesia carbonas*—*t. Aluminis*, *Argilla pura*—*t. Amara acrata*, *Magnesia carbonas*—*t. Amara sulphurica*, *Magnesia sulphas*—*t. Bolaria*, *Argilla pura*—*t. Foliata*, *Sulphur*—*t. Foliata mineralis*, *Soda acetata*—*t. Foliata tartari*, *Potassa acetata*—*t. Fornacum*, see *Bricks*—*t. Falonica*, *Cimolia purpureacens*—*t. Japonica*, *Catechu*, *Naucllea gambir*.

**TERRA LEM'NIA**, *Argilla bolus Asua*, *Lemnian Earth*, *Lempnia*. A name given by the ancients to a solid, reddish, astringent substance, prepared with the pulp of the fruit of the Baobab, an African tree, according to Prosper Alpinus. It seems, however, to be an argillaceous earth. It has been employed as an astringent.

**TERRA LIVON'ICA**. A *Terra sigillata* or sealed earth from Livonia, redder than that from Silesia, and very astringent.

**TERRA MERITA**, *Cuscuma longa*.

**TERRA NOCERIA'NA**. A whitish, soft, and astringent earth, found in the environs of Nocera, in Italy.

**TERRA ORLEANA**, *Pigmentum urucis, Ursou*, (F.) *Rocou, Roucou, Bichet*. A pigmental matter obtained from the seeds of the *Bixa Orleana*. In Jamaica, it is recommended in dysentery, and is considered to possess astringent and stomachic qualities. It is called, according to its shape, *Flag Annotto, Roll or Egg Annotto*.

*Spanish Annotto, Bixa*, is in small, oblong cakes. It is chiefly employed as a colouring matter.

**TERRA OSSEA**, *Materia ossea*. Bony matter. The earthy portion of bones.

**TERRA PONDEROSA**, *Baryta*—t. *Ponderosa muriata, Baryta, muriate of*—t. *Ponderosa salita, Baryta, muriate of*—t. *Saponaria, Cimolia purpurescens*.

**TERRA PORTUGALICA**, *Barros, Bucaros*. A reddish, astringent, styptic earth, obtained from Portugal.

**TERRA SIGILLATA**, *Sealed Earth*. A bole or earthy matter, made into little cakes or flat masses, and stamped with certain impressions, as with the head of the Grand Seigneur. To these belong the *Terra Silesiaca, Terra Lemnia, T. Turcica*. See *Bolus alba*.

**TERRA SILESIACA**, see *Terra sigillata*—t. *Talcosa oxyanthracodes, Magnesiz carbonas*—t. *Turcica*, see *Terra sigillata*.

**TERRA URINE**. The earthy deposit in the urine.

**TERRA VITRIOLI DULCIS**, *Colcothar*.

**TERRAPIN**, *Emys palustris*.

**TERRE BOLAIRE**, *Bolus*—t. *Noia, Bunium bulbocastanum*—t. *Pesants, Baryta*—t. *Sigillis, Bolus alba*.

**TERRETTE**, *Glecoma hederacea*.

**TERTIAN FEVER**, *Febris tertiana, Anctus tertianus, Tritæus, Tertian Agus*, (F.) *Fèvre tierce*. An intermittent, whose paroxysms recur every third day, or every 48 hours. The mildest, and the most pernicious, intermittents belong to this head. As a general rule, it is the most manageable form of ague.

**TERTIANARIA**, *Scutellaria galericulata*.

**TESSARA**, *Cuboid*.

**TESSELLA**, *Tabella*.

**TEST, DANIEL'S**, see *Docimasia pulmonum*—t. *Hydrostatic*, see *Docimasia pulmonum*—t. *Ploucquet's*, see *Docimasia pulmonum*—t. *Static*, see *Docimasia pulmonum*.

**TESTA PRÆPARATA**, *Prepared Oyster-shell*. Oyster-shell, freed from extraneous matter, washed with boiling water, reduced to powder, and prepared in the same manner as *Creta præparata*.

**TESTA**, see *Ostrea*.

**TESTACEOUS**, from *testa*, 'a shell.' A powder, consisting of burnt shells. These contain carbonate of lime chiefly, and hence the term has been applied to cretaceous substances. See *Creta*.

**TESTÆ FORNACEÆ**, *Bricks*—t. *Ostrææ*, see *Ostrea*.

**TESTES**. The *Testicles*. Vulgarly, *the Stones*. A name, also, given to the inferior tubercles of the corpora quadrigemina, to distinguish them from the superior, called *Nates*.

**TESTES CEREERI**, see *Quadrigenina corpora*.

**TESTICLE**, *Testis, T. virilis, Testiculus, Orchis, Pomum amoris, Didymus, Gemini (pl.); Gemelli (pl.); Ovum, (F.) Testiculis*, from *testis*, 'a witness,' because the testicles

are evidences of virility. The name of two glandular organs, contained in the scrotum, whose office is to secrete sperm. They are formed of a gray and softish substance, composed of tortuous canals, called *Tubuli seminiferi* vel *Vasa seminaria*, folded on each other, and of extreme fineness; the number of which, according to the estimate of Monro, is 62,500, and the total length 5,208 feet. All these canals, uniting in their course, pass through the corpus Highmorianum, concur in forming the epididymis, and give origin to the vas deferens. The testicles are covered, immediately, by a fibrous membrane, of an opaque white colour, and very tough, called *Tunica Albuginea*, or, simply, *Albuginea, Peritæstis*, of which the corpus Highmorianum is only an enlargement. Over this, again, is the tunica vaginalis, the second envelope of the testis.

**TESTICLE**, SWELLED, *Hernia humoralis*.

**TESTICONDUS**, *Crypsorchis*.

**TESTICULE**, *Testicle*.

**TESTICULUS**, *Testicle*—t. *Accessorius, Epididymis*—t. *Caninus, Orchis mascula*.

**TESTIS FEMINEUS**, *Ovary*—t. *Minor, Prostate*—t. *Muliebris, Ovary*—t. *Virilis, Testicle*.

**TESTUDINATIO CRANII**, *Camarosis*.

**TESTUDO**, *Chelonæ, (F.) Tortus*. A genus of reptiles, including the turtle, the flesh of which is much esteemed as an article of diet.

Also, an encysted tumour, which has been supposed to resemble the shell of a turtle; *Emphyæma encystis ganglion*. See *Talpa*.

**TESTUDO CEREBRI**, *Fornix*—t. *Scapula*, see *Scapula*.

**TETANIC**, *Tetanicum, Convulsivum, Convulsivus*, from *τεταω*, 'I stretch.' A remedy which acts on the nerves, and, through them, on the muscles, occasioning, in large doses, convulsions. The chief agents of this class are *Nux Vomica, Strychnia, Brucia, Arnica* and *Toxicodendron*.

Also, an epithet for a tonic convulsion.

**TETANOMATA**, *Tetanothra*.

**TETANO-THRA**, *Tetanomata, Erugatoria*, from *τεταω*, 'free from wrinkles.' Medicines which remove wrinkles.—*Goræus*.

**TETANUS**, from *τεταω*, 'I stretch;' *Spasm with rigidity, Convulsio Indica, Holotonia, Holotonicus, Holotetanus, Tetanus univertialis, Rigor nervosus seu nervorum, Eatonisio seu Distanisio, Entasis Tetanus, Catochus cervinus, Catochus holotonicus*. A disease which consists in a permanent contraction of all the muscles or merely of some, without alternations of relaxation. It is characterized by closure of the jaws; difficulty or impracticability of deglutition; rigidity and immobility of the limbs and trunk, which is sometimes curved forwards (*Emprosthotonos*), sometimes backwards (*Opisthotonos*), and sometimes to one side, (*Pleurasthotonos*.) When tetanus is confined to the muscles of the jaws, it is called *Trismus*. It is a most formidable affection. The means of treatment are:—copious and repeated blood-letting; bathing, cold and warm; powerful doses of opium, and other narcotics. In *Traumatic Tetanus*, or that which supervenes on a wound, every extraneous matter must, of course, be removed from the wound, and soothing applications be made to it.

**TETANUS ANTIQUS**, *Emprosthotonos*—t. *Dolorificus, Cramp*—t. *Dorsalis, Opisthotonos*—t.

Lateralis, Pleurothotonos—t. Maxillæ inferioris, Trismus—t. Posterganeus, Opisthotonos—t. Posticus, Opisthotonos—t. Universalis, see Tetanus.

TETARTÆUS, Quartan.

TETARTOPHIA, from τεταρτε, 'the fourth,' and φησ, 'I arise.' *Quartanus remittens*. A quartan, in which the intermission is inordinately short or imperfect.

TETE, Caput, Head—t. *de Vesou*, Elephantiasis of the Greeks.

TETRADRACHMON, from τετρας, 'four,' and δραχμη, 'a drachm.' A weight of four drachms or half an ounce.

TETRAGONUS, Platysma myoides.

TETRAMYRON, from τετρας, 'four,' and μυρον, 'an ointment.' An ointment of four ingredients. Galen.

TETRANGURIA, Cucurbita citrullus.

TETRANTHERA PICHURIM, *Faba Pichurim*, *F. Pechuræ*. The seeds of this Brazilian plant have been used in diarrhoea, dysentery, flatulent colic, &c. Dose, ℞ij.

TETRAO COTURNIX, *Coturnix*; the Quail, (F.) *Caille*. The quail is an esteemed article of diet. The Greek name is ορνις; and the places, called *Ortygia*, are named after it. The excrements of the quail were formerly extolled in epilepsy, and the fat in specks of the eye.

TETRAPHARMACUM, from τετρας, 'four,' and φαρμακον, 'a medicine.' A medicine consisting of four ingredients.

TETRASCÆLUS, from τετρας, 'four,' and σκαλος, 'leg.' A monster having four legs.—Gurit.

TETROBOLON. The weight of four oboli, or two scruples.—Gorræus.

TETROROS, Astragalus.

TETTER, Herpes—t. Crusted, Impetigo—t. Honeycomb, Porrigo favosa—t. Humid, Eczema impetigo—t. Milky, Porrigo larvalis—t. Pustular, Impetigo—t. Running, Impetigo—t. Scaly, Psoriasis.

TETTERWORT, Chelidonium majus.

TEUCRIUM CAPITATUM, *Poley-Mountain of Montpellier*, *Polium montanum*, is generally substituted for the last. The common *Poley mountain* is the *Teucrium montanum*; and the *Golden Poley-mountain*, the *Teucrium Polium*, *Polion*.

TEUCRIUM CHAMÆDRYS, *Chamædrys*, *C. minor repens*, *C. vulgaria*, *Quercula minor* seu *Calamandriana*, *Trisago*, *Chamaedrops*, *Trisago*, *Common Germanander*, *Creeping Germanander*, *Small Germanander*, *English Treantle*, (F.) *Petit chène*, *Germanandré officinale*. Family, Labiate. *Sec. Syst.* Didynamia Gymnospermia. This is possessed of aromatic and bitter properties. The dose of the dried powder is from ℞ss to ℞j.

TEUCRIUM CHAMÆPYTIS, *Chamæpytis*, *Arthritica*, *Arthritica*, *Aju'ga*, *A. Chamæpytis*, *Abiga*, *Chamamorum*, *Iva arthritica*, *Holocron*, *Io'nia*, *Sideritis*, *Common Groundpine*, (F.) *Petit Ivette*. Properties like the last. The tops or leaves have been recommended as aperients and tonics; especially in female obstructions, and in paralytic disorders.

TEUCRIUM CRETICUM, *Poley-mountain of Candy*, *Polium Creticum*. The tops and whole herb enter into the old compounds, *Mithridates* and *Theriaca*. It has a moderately aromatic

smell; and a nauseous, bitter taste, and is placed among the aperients and corroborants.

TEUCRIUM FLAVUM has similar properties to *T. chamædrys*.

TEUCRIUM IVA, *Chamæpytis moschata*, *Iva moschata* *Monapeliensis*, *Iva*, *Chamæpytis anthyllus*, *French Groundpine*, (F.) *Ivette musquée*. It has similar virtues to *T. Chamæpytis*, but is weaker.

TEUCRIUM MARUM, *Marum Syriacum*, *Marum Creticum*, *Majorena Syriaca*, *Marum verum*, *M. Cortusi*, *Chamaedrys inca'na maritima*, *Marum germander*, *Syrian herb maritica*, *Cat thyme*, *Origanum Syriacum*, (F.) *Marum ou Germandis Maritimo*, *Herbe aux chats*. A very aromatic plant, of a camphorated smell; formerly much used in medicine as a tonic, antispasmodic, emmenagogue, &c.

TEUCRIUM SCORDIUM, *Water Germanander*, *Scordium*, *Trisago palustris*, *Chamaedrys palustris*, *Allium rad'olens*, (F.) *Germandis Scordone*, *Sauge des bois*, *Germandis aquatique*. The leaves have a garlicky smell, and bitterish, slightly pungent taste. It has the tonic properties of the other *Teucria*.

TEXTUM INTERLOBULARE, Interlobular tissue.

TEXTURA, Texture—t. Organica, *Histos*. TEXTURE, *Textura*, *Textus*, from *texere*, *tactum*, 'to weave.' *Tula*, *Hypa*, *Hypsi*. The particular arrangement of the tissues that constitute an organ.

TEXTUS, Texture, Tissue—t. Cellulosus, Cellular tissue—t. Desmosus, *Desmoid tissue*—t. Nervorum, *Plexus nervorum*—t. Organicus, Cellular tissue—t. Papillaris, *Corpus papillare*—t. Parenchymalis, Cellular tissue.

THÆRIA, Raddyge.

THALAMUS, *Salaque*, (F.) *Couche*; 'a room or chamber; a bed.' The place at which a nerve originates, or has been considered to originate.

THALAMI NERVORUM OPTICORUM seu OPTICI, *Eminentia magna cerebri*, *Ganglia cerebri postica*, *Crura medullæ oblongatæ*, (of some), *Stria'ca corpora superiora posteriora*, *Colliculi nervorum optico'rum*, *Optic Thalami*, (F.) *Couches des nerfs oculaires*, (Ch.) *Couches des nerfs optiques*, *Couches optiques*. Two rounded and irregular surfaces, which are seen exposed in the lateral ventricles of the brain, and in the third ventricle, the inferior surface of which presents two projections, called *Corpora geniculata*, that furnish several filaments to the optic nerves. The name was given from a belief that the optic nerves originate from them. They, however, arise more posteriorly, and adhere merely to the inner margin of those bodies. Gall considers, that the thalami act as ganglions to the nerves; and hence, he calls them *Grand ganglion cérébral inférieur*. They are also called *Posterior ganglion of the cerebrum*. From the thalami and corpora striata fibres proceed upwards to constitute the convolutions of the brain, and the various bands that connect the different parts of the brain together. The upper and inner parts of the thalami are so closely connected as to form one continued surface, called *Commissura mollis*. The posterior parts turn downwards and outwards; after which they are elongated to form the two white cords, termed *Tractus optici*.

THALAMUS REGALIS, Pericardium.

**THALICTRON**, *Thalictrum*, *T. magnum*, *T. flavum*, *T. flavescens*, *Meadow-rue*, *Poor Man's Rhubarb*, *Rhabarbarum pauperum*, (F.) *Pigamon jaundice*, *Rue des prés*, *Fausse-Rhubarbe*, *Rhubarbe des pauvres*. *Family*, Ranunculaceæ. *Sex. Syst.* Polyandria Polygynia. The root resembles rhubarb in its properties.

**THALICTRUM**, *Thalictron*.

**THAMARINDUS**, *Tamarindus*.

**THANASIMUS**, *Mortal*.

**THANATODES**, *Mortal*.

**THANATOL'OGY**, *Thanatolog'ia*, *Thanatolog'ia*, from *θάνατος*, 'death,' and *λογος*, 'a discourse.' A description, or the doctrine, of death.

**THANATOS**, *Death*.

**THAPSIA**, from the island *Thapsus*. The *deadly carrot*, *Thapsia aced'ipias*. *Family*, Umbelliferae. *Sex. Syst.* Pentandria Digynia. The root operates violently, both upwards and downwards. It is not used.

**THAPUS BARBATUS**, *Verbascum nigrum*.

**THARSI**, see *Tarsus*.

**THÉ**, *Tea*—*t. des Apalaches*, *Ilex vomitoria*—*t. de Franco*, *Salvia*—*t. d'Europe*, *Veronica*—*t. de la Mer du sud*, *Ilex vomitoria*—*t. du Maroc*, *Chenopodium ambrosioides*—*t. de Simon Pauli*, *Myrica gale*—*t. Suisse*, *Falltrauck*.

**THEA**, *Chaa*, *Tea*, (F.) *Thé*. There are two principal species of tea-plant; the *Thea Bohe'a*, and *Thea viridis*; the *black tea*, and the *green*. *Family*, *Hesperideæ*. *Sex. Syst.* Polyandria Monogynia. In commerce, many kinds of tea are met with. Several of the differences between these appear to result from the age at which the leaves have been collected, and the mode of their desiccation.

Tea-drinking was introduced into Europe about the year 1666; since which time its use has become universal; and, in spite of the assertions of medical terrorists, it is, except in particular idiosyncrasies, entirely harmless.

By an analogical transference, very common in language, the word *Tea* has been used almost synonymously with infusion, as *Boef tea*, *Mint tea*, &c.

**THEA GERMANICA**, *Veronica*.

**THEBÆSIUS**, *VEINS OF*. A name given to supposititious branches of the coronary veins, which Christopher Adam Thebesius, a German anatomist, described as opening into the heart by small depressions observable in the right auricle; and which have been called *Foram'ina Thebesii*. No such veins can be demonstrated. The valve, at the orifice of the coronary vein, in the right ventricle, is called *Valvula Thebesii*, *V. Guisfartia'na*, *V. vena magna*.

**THECA**, *Case*, *Vagina*, *Sheath*—*t. Cerebri*, *Cranium*—*t. Cordis*, *Pericardium*—*t. Vertebralis*, see *Vertebral canal*.

**THEION**, *Sulphur*.

**THEIOTHERMÆ**, *Waters*, mineral sulphureous.

**THELASIS**, *Lactation*.

**THELASMUS**, *Lactation*.

**THELASTRIA**, *Nurse*.

**THELE**, *Nipple*, *Papilla*.

**THELITIS**, from *θηλή*, 'the female nipple,' 'the female breast,' and *itis*, denoting inflammation. Inflammation of the nipple.

**THELON'CUS**, *Mastonecus*.

**THELOS**, *Mamma*.

**THELYGONIA**, from *θηλος*, 'pertaining to the female sex,' and *γονη*, 'generation.' The part taken by the female in the act of generation. Also, nymphomania.

**THELYGONUM**, *Sperm* (of the female.)

**THELYPTERIS**, *Pteris aquilina*.

**THENAR**, *ἄνωγ*, from *θῆνω*, 'I strike.' The palm of the hand, or sole of the foot.

**THENAR EM'INENCE** is the projection at the anterior and outer part of the hand, formed by the abductor brevis, opponens, and flexor brevis pollicis.

**THENAR MUSCLE**. Riolan and Winslow give this name to the fleshy mass, formed of the abductor brevis, opponens pollicis, and the anterior part of the flexor brevis pollicis. In the foot, Winslow gives the name *Thenar muscle* to the abductor and flexor brevis pollicis pedis.

**THENAR**, *Flexor brevis pollicis manus*, *Palm*.

**THEOMANIA**, *Demonomania*.

**THEOPLEGIA**, *Apoplexy*.

**THEOPLEXIA**, *Apoplexy*.

**THEORETICAL**, *Theoreticus*, *Theoricus*, from *θεωω*, 'I contemplate.' (F.) *Theoriticus*, *Theorignus*. That which is confined to theory, or is connected with it. An epithet also applied to a sect of physicians, who founded their doctrine chiefly on reasoning.

**THEORIA**, *Theory*.

**THEORIQUE**, *Theoretical*.

**THEORY**, *Theoria*, from *θεωω*, 'I contemplate.' The speculative part of a science. The connexion established in the mind between a general fact, or the least possible number of general facts, and all the particular facts dependent thereon: for example,—the motions of the heavenly bodies, and the most important natural phenomena are connected with a single fact, previously known by observation; viz. that the force of gravity acts inversely according to the square of the distance. This constitutes the theory of universal gravitation. *Theory* must not be confounded with *system*. *Theory* regards nature as it is, and is a rigid deduction from facts. *System* is too often the creature of the imagination, to which nature is made to bend.

**THEORY OF MEDICINE**, *Institutes of Medicine*, *Theoretical Medicine*, is that part of the science which attempts philosophically to account for the various phenomena that present themselves during health as well as in disease. It is the philosophy of Medicine. The *Institutes of Medicine* are generally considered to comprise Physiology and its applications to Pathology, Hygiene, and Therapeutics. By some it is considered to include General Pathology and General Therapeutics.

**THEOTHERMÆ**, *Waters*, mineral sulphureous.

**THERAPEIA**, *Curation*, *Therapeutics*.

**THERAPEUSIS**, *Therapeutics*.

**THERAPEUTA**, *Therapeutist*.

**THERAPEUTICE**, *Therapeutics*.

**THERAPEUTICS**, *Therapeut'icæ*, *Therapeut'ia*, *Therapousis*, *Isrotech'nicæ*, *Practicoe of Physic*, *Therap'ia*, *Therap'ia*, *Curato'ria*, *Med'odus*, *Methodus Meden'di*, from *θεραπεωω*, 'I wait upon, I alleviate, I attend upon the sick.' (F.) *Therapeutignus*. That part of medicine, the object of which is the treatment of disease. With others, the department which

comprises an explanation of the *modus operandi* of medicines.

**THÉRAPEUTIQUE, Therapeutics.**

**THERAPEUTIST, Therapeutā.** Same etymon. One who practises therapeutics. A practitioner of medicine. To be a good therapist, a man must be well versed in every department of medicine, and be capable of observing and reasoning well. He may be a good *observer*, and yet a bad *reasoner*. He cannot practise well unless he is both. Hence, the comparatively small number of good therapeutists.

**THERAPIA, Therapeutics.**

**THERIA, Radzyge.**

**THERIAC OF ANTIPATER, Antipatri theriaca.**

**THERIACA, Θηριακά, from θηρ, 'a ferocious or venomous animal,' and αἰσμάς, 'I cure.' Treacle, (F.) Thériaque.** Also, a medicine, believed to be capable of curing, or preventing the effects of the bite of a venomous animal. In this sense it is chiefly used by writers.

**THERIACA ANDROMACHI, Venice Treacle,** is an ancient *alexipharmic* electuary; consisting of a farrago of 61 different ingredients, which possessed the most opposite properties. It was invented by Andromachus of Crete, and prepared by order of Nero. It has received various modifications; and, to the discredit of the *Faculté de Médecine* of Paris, has held its place in their Codex, with even an additional number of ingredients. The *Electuarium Opiumum polypharmacum* of the Codex has contained *acid ingredients*, 5; *astringent*, 5; *bitter*, 22; *indigenous aromatics*, 10; *umbelliferous aromatics*, 7; *balsams and resinous substances*, 8; *fetid ingredients*, 6; *narcotics*, 1; *earthy substances*, 1; *gummy or amygdaceous*, 4; *saccharine*, 3; total 72! and one of these the *ash of the viper!* A little more than a grain of opium is contained in each drachm of the compound.

**THERIACA CELESUS, Tinctura opii—t. Communis, Melasses—t. Edinensis, Confectio opii.**

**THERIACA GERMANORUM.** An extract or rob, prepared from juniper berries. Used as a stomachic.

**THERIACA LONDINENSIS, Cataplasma Cymini.** A cataplasm of *cumin seed, bay berries, germander, snakeroot, cloves, honey,* and sometimes *opium, or syrup of poppies.*

**THERIACA RUSTICORUM, Allium.**

**THÉRIAQUE, Theriaca.**

**THERIATRICA, Veterinary art.**

**THERIODES, Ferine.**

**THERIOMA, Therion,** from θηρ, 'a venomous animal.' Any extremely malignant ulcer. Sometimes confined to ulcers of the lungs.

**THERION, Therioma.**

**THERIOTOMY, Zootomy.**

**THERMA, Heat—t. Emphytum, Animal heat.**

**THERMÆ, Θέρμαι, Ther'mata.** Warm baths or springs. See *Waters* (mineral.)

**THERMÆ FABARIÆ, Peppers, Mineral Waters of—t. Piperinæ, Peppers, Mineral Waters of—t. Plumbariæ, Plombières, Mineral Waters of.**

**THERMASMA, Fomentation.**

**THERMATA, Thermae.**

**THERMANTICA, Calefacients.**

**THERMUM EMPHYTUM, Animal heat, Biolychnium.**

**THESIS, θεσις, from τίθημι, 'to place.'** 'A position or proposition.' *Disputatio, Inaugural Dissertation.* The name usually given to the essay composed by a candidate for graduation in medicine, which he is at times required to defend publicly. Often, however, it is a mere form giving useless labour and trouble to the student, inasmuch as it is executed as a task, and never afterwards regarded by the preceptor or by others. Sandifort, Haller, Smellie, and Stoll, have published collections of these.

Also, a suffix denoting 'arrangement;' hence *Diatheosis.*

**THEVE'TIA A'HOUAL, Akouai.** The kernels of the nut of this Brazilian tree are said to be a violent poison. At the Antilles, its nuts are called *Noix de Serpent*; and they are used against the bites of serpents.

**THIGH, Sax. ueoh, Femur, Femora, Crus, Merus, M'rium, (F.) Cuisse.** The part of the lower limb which extends from the pelvis to the leg. The thigh is larger at its superior than inferior part, and has the form of an inverted and truncated cone, slightly depressed from within outwards. *Above,* it is bounded *anteriorly,* by the groin; *externally,* by the hip; *behind,* by the fold of the nates; and *within,* by the perineal region. *Below,* it is bounded *anteriorly,* by the prominence of the knee; *posteriorly,* by the ham. It is formed of a considerable number of muscles, blood-vessels, lymphatics, nerves, &c.; and is covered by a strong aponeurosis.

**THIGHBONE, Femur—t. Neck of the, Col-lum femoris.**

**THION, Sulphur.**

**THIRST, Sax. ðyrst, (D.) Dorst, Sitis. Dipsa, Potio'nis desid'rium, (F.) Soif.** A simple desire or an absolute want for liquids. Physiologists are not entirely agreed regarding the seat of thirst; some place it in the fauces; others in the stomach. Its immediate cause is not known. It has been attributed to a dry condition of the nervous papillæ of the pharynx produced by suppression of the salivary and mucous secretions. This is probably true; but again, it is owing to the wants of the system,—a supply of fluid being required to compensate the numerous losses that are constantly taking place. Thirst is an *internal sensation*,—an *instinctive want*,—arising from organization, and inexplicable. It is an urgent symptom in many diseases, particularly in those of vascular excitement.

**THIRST, Excessive, Polydipsia—t. Morbid. Dipsosis.**

**THIRSTY, Dipsodes.**

**THISTLE, BLESSED, Centaurea benedicta—t. Cotton, Onopordium acanthium—t. Globe, Echinops—t. Holy, Centaurea benedicta—t. Ladies', Carduus Marianus—t. Milk, common. Carduus Marianus—t. Pine, Atractylus gummifera—t. Sow, Sonchus oleraceus—t. Star. Centaurea calcitrapa—t. Yellow, Argemone Mexicana.**

**THLADIAS, Eunuch.**

**THLASIAS, Eunuch.**

**THLASIS, Contusion—t. Depressio, Depression.**

**THLASMA, Contusion—t. Concussio, Concussion—t. Stremma, Sprain.**

**THLASPI, Pennycress. Family, Crucifere.**

*Sex. Syst.* Tetrastynamia Siliculosæ. Two species of thiaspi are directed, in some pharmacopœias, for medical use:—the *Thiaspi arvensis* or *Tracle mustard*, and the *Thiaspi campestris* or *Mithridate mustard*. The pharmaceutical properties of both kinds resemble those of common mustard.

**THLIBIAS, Eunuch.**

**THLIPSENCHEPHALUS**, from *θλαπι*, 'compression,' and *εγκεφαλος*, 'the encephalon.' A monster in whom the skull is open, not merely in the frontal and parietal, but also in the occipital regions,—a distinct fontanelle not existing.

**THLIPSIS, θλιψις, Compressio.** Compression, and especially constriction of vessels by an external cause. Oppression.

**THNESCOLOGIA, Thanatology.**

**THOLUS, Achiculum**—t. Diocleus, Scapha.

**THORACENTE'SIS, Paracente'sis Thoracis**, from *θωραξ*, 'the thorax,' and *κρησις*, 'perforation.' Tapping the thorax. Perforation of the thorax.

**THORACHIQUE, Thoracic.**

**THORAC'IC, Thorad'icus**, from *thorax*, 'the chest;' (F.) *Thoracicus* ou *Thorachique*. That which relates or belongs to the chest; as *Thoracic vis'cera*, &c.

**THORACIC INFERIOR ARTERY, Arteria Thorad'ica Exter'na Inferior vel Longa, A. mamma'ria externa, A. thoracica inferior**, (F.) *Deuzième des Thoraciques* (Ch.), arises from the axillary, a little below the preceding, and descends vertically over the lateral part of the thorax, and the serratus major anticus. It afterwards bends inwards; becomes subcutaneous, and divides into several branches, which embrace the breast. It gives numerous ramifications to the pectoralis major, serratus anticus, intercostals, ganglions of the axilla, mamma, &c.

**THORACIC SUPERIOR ARTERY, Arteria Thorad'ica Exter'na Superior**, (F.) *A. thoracique supérieure, Première des Thoraciques* (Ch.) arises from the axillary artery or from the acromial; and descends forwards between the pectoralis major and P. minor, to which it distributes itself by a great number of branches. In some subjects, there are two or three *Arteria thoracice externæ superiores*.

**THORACIC DUCT, Ductus thorac'icus seu chy'lisfer seu chyli seu lacteus seu ro'rifer seu Pecqueti seu Pecquetian'us, Vena alba thoracis, A. vena ampulles'cens, Distribut'ria lactea thoracica, Ductus thoracicus post'erior seu vertebra'lis, Galaz'ia, Duct of Pecquet, Alimenterary Duct**, (F.) *Canal ou Conduit Thoracique*, is the duct in which the lymphatics of the lower limbs, abdomen, left superior extremity, left side of the head, neck, and thorax terminate. It begins at the *receptaculum chyli*, which is formed by the union of five or six large lymphatic trunks,—themselves formed from the union of all the absorbent plexuses of the abdomen. The duct ascends into the chest through the pillars of the diaphragm, and by the side of the aorta and vena azygos. It contracts in dimension, as far as the 6th dorsal vertebra, when it inclines towards the left hand; ascends behind the arch of the aorta; passes behind the left internal jugular vein, and opens at the posterior part of the subclavian vein of the same side. Its embouchure is furnished with two valves, which prevent the blood from passing from the vein into the duct.

**THORACIC LIMBS** are the upper limbs;—so called because they are articulated with the lateral and upper parts of the chest.

**THORACIC, LONG or INFERIOR, Mammary inferior external artery.**

**THORACIC REGIONS** are the different regions of the chest. Thus we say, *anterior, lateral, and superior thoracic*, &c.

**THORACICA, Pectorals.**

**THORACICS, FIRST OF THE, Mammary superior external artery.**

**THORACIQUE, Thoracic.**

**THORACOCENTE'SIS**, from *θωραξ*, 'the chest,' and *κρησις*, 'puncture.' *Paracente'sis thoracis*. Puncture of the chest to evacuate contained fluid—as in empyema.

**THORACOCYSTIS, Thoracystis.**

**THORACO-GASTRODIDY'MUS, Didymus sym'phyo-thoracogastrius, Xyphodid'ymsus**: from *θωραξ*, 'the chest,' *γαστηρ*, 'the belly,' and *διδυμος*, 'a twin.' A monstrosity in which twins are united by the chest and abdomen.—Gurli.

**THORACO-FACIAL, Platysma myoides**—t. *Maxillo-facial, Platysma myoides*.

**THORACODIDY'MUS**, from *θωραξ*, 'the chest,' and *διδυμος*, 'a twin.' A monstrosity in which twins are united by the thorax.—Gurli.

**THORACODYNE, Pleurodynia.**

**THORACOPATH'IA**, from *θωραξ*, 'the chest,' and *παθος*, 'disease.' Disease or suffering in the chest.

**THORACOSCOPIA, see Auscultation.**

**THORACOSCOPIUM, Stethoscope.**

**THORACYST'IS**, from *θωραξ*, 'the chest,' and *κυστις*, 'a bladder.' Encysted dropsy of the chest. Hydatids in the chest.

**THORAX, θωραξ**, 'a cuirass, a coat of mail.' *Cith'arus, Medius venter, Pectus, Sesthus, Scutum pectoris, the Breast, the Chest, Bir, Chelys, Cassa*, (F.) *Poitrins*. One of the splanchnic cavities; bounded, posteriorly, by the vertebræ; laterally, by the ribs and scapula; anteriorly, by the sternum; above, by the clavicle; and below, by the diaphragm. It is destined to lodge and protect the chief organs of respiration and circulation:—the lungs and the heart.

**THORAX, Corset.**

**THORE, Sperm.**

**THORN APPLE, Datura stramonium**—t. Red, Datura Anguinea.

**THOROUGHSTEM, Eupatorium perfoliatum.**

**THOROUGHWAX, Eupatorium perfoliatum.**

**THOROUGHWORT, Eupatorium perfoliatum.**

**THOROW-WAX, Bupleurum rotundifolium.**

**THORULUS STRAMINEUS, Fannon.**

**THREADWORM, LONG, Trichocephalus.**

**THREPSIS, Assimilation, Nutrition.**

**THREPSOLOGY, Threpsolog'ia**, from *θρεψις*, 'nutrition,' and *λογος*, 'a description.' The doctrine of, or a treatise on, the nutrition of organized bodies.

**THREPTICE, Assimilation.**

**THRIDACE, Lactacarium.**

**THRIDAX, Lettuce.**

**THRIFT, LAVENDER, Statice limonium**—t. American, *Statice Caroliniana*—t. Sea-side, *Statice Caroliniana*.

**THRIX, Capillus, Hair.**

THROAT, ἄνοτος, ἄνοτα, *Jugulum, Interstitium Jugularé, Guttur, Sphagē*. The anterior part of the neck. (F.) *Gorge*. Also, the *Fauces*, (F.) *Gorier*.

THROATROUT, *Geum Virgimanum, Liatris*.

THROATWORT, *Campanula trachelium*.

THROBBING, *Pulsativus, Sphygmicus, Sphymo'des, Pul'satory, Athrobbing pain*, (F.) *Douleur pulsative*, is a kind of pain which is, or seems to be, augmented by the pulsation of arteries.

THROMBOCYSTIS, from *θρομβος*, 'a clot,' and *κυστις*, 'a cyst.' The cyst occasionally surrounding a clot of blood—as in encephalic hemorrhage.

THROMBOSIS, Coagulation, Thrombus.

THROMBUS, *θρομβος*, 'a clot,' from *τρομβω*, 'to coagulate,' *Thrombosis, Trumbus, Hæmato'ma*. A small, hard, round, bluish tumour; formed by an effusion of blood in the vicinity of a vein which has been opened in the operation of blood-letting. The thrombus is most commonly owing to the opening in the vein and that of the skin not corresponding; to excessive smallness of the cutaneous orifice; or to small, fatty granules, which prevent the discharge of the blood. Compresses, dipped in salt water; camphorated spirit, and slight compression usually disperse it. See *Blood*.

THROWORT, *Leonurus cardiaca*.

THRUSH, *Aphthæ*—t. White, *Aphthæ*—t. Milk, *Aphthæ*.

THRYPsis, Communion.

THUJA OCCIDENTALIS, *Thuya occidentalis*.

THUREA, *Juniperus lycia*—t. *Virga, Juniperus lycia*.

THUS, see *Pinus abies*—t. *Fœmininum*, see *Pinus abies*—t. *Judæorum, Croton cascarilla*—t. *Judæorum, Styrax*—t. *Judæorum, Thymiana*—t. *Libanotis, Juniperus lycia*—t. *Masculum, Juniperus lycia*—t. *Verum, Juniperus lycia*—t. *Vulgare*, see *Pinus abies*.

THUYA APHYLLA, see *Sandarac*.

THUYA seu THUJA OCCIDENTALIS, *Arbor Vita, Tres of life. Nat. Family, Conifera*. The leaves and wood were formerly in high repute as resolvents, sudorifics, and expectorants, and were given in phthical affections, intermittent fevers, and dropsies. The expressed juice has been applied to condylomata. The arrangement of the medullary matter of the cerebellum, termed *Arbor Vita*, is also called *Thuya*.

THYLACIITIS, *Gutta rosea*.

THYM, *Thymus*.

THYMA, *Thymion*.

THYMALOS, *Taxus baccata*.

THYMASTHMA, *Asthma thymicum*.

THYMBRA, *Satureia hortensis*—t. *Hispanica, Thymus mastichina*.

THYME, CAT, *Teucrium Marum*—t. *Common, Thymus*—t. *Lemon*, see *Thymus serpyllum*—t. *Mother of, Thymus serpyllum*—t. *Wild, Thymus serpyllum*.

THYMELÆA, *Daphne gnidium*.

THYMELCO'SIS, from *θυμος*, 'thymus,' and *ἄλκος*, 'an ulcer.' Ulceration of the thymus gland.

THYMI'AMA, *θυμαμα*, 'a perfume;' *Musk-wood, Thus Judæorum*, (F.) *Narcophis*. A bark from Syria, Cilicia, &c., supposed to be

the product of the liquid storax tree. It has an agreeable, balsamic smell; approaching that of liquid storax.

THYMIAMA, *Fumigation, Saffimentum*.

THYMIASIOTECHNIA, *Thymiatechny*.

THYMIASIS, *Fumigation*.

THYMIATECH'NY, *Thymiatechnia, Thymiasiotek'nia Cura fumigato'ria*, from *θυμιμα*, 'an odour,' and *τεχνη*, 'art.' The art of employing perfumes in medicine.

THYM'ION, *Thyma, Thymus, Porram, Porrus, Verru'ca rhago'idea, Verru'ca minor*, from *θυμος*, 'thyme.' A small wart on the skin, resembling a bud of thyme.

THYMIOSIS, *Frambæsia*—t. *Indica, Frambæsia*.

THYMI'TES. Wine impregnated with thyme.

THYMI'TIS, from *θυμος*, 'thymus,' and *itis*, denoting inflammation. Inflammation of the thymus gland.

THYMO'PATHI'A, *Psychopathi'a*, from *θυμος*, 'the mind,' and *πάθος*, 'affection.' A disease of the mind.

THYMOS, *Rage*.

THYMOXAL'ME, from *θυμος*, 'thyme,' *ἄξος*, 'acid,' and *ἅλας*, 'salt.' A compound of thyme, vinegar, and salt.

THYMUS, *θυμος, Glands'la Thymus, Corpus Thymianum seu Thymicum, Gland'ium, Thymus gland*. An organ, the uses of which are totally unknown, and which is seated in the upper separation of the anterior mediastinum. The thymus has the appearance of a glandular body. It is oblong; bilobate; soft, and very variable in size and colour. In the fœtus, it is very large, and contains a milky fluid; but it gradually disappears, and in old age is scarcely discernible. The *arteriæ*, called *thymicæ*, are from the inferior thyroid, internal mammary, bronchial, and mediastinal. The veins have the same arrangement. It receives some nervous filaments from the pneumogastric nerves, the phrenic, and the inferior cervical ganglia.

THYMUS, *T. vulg'aria, Common Thyme*, (F.) *Thym, T. Ordinaire. Family, Labiatæ. Sex. Syst. Didynamia Gymnospermia*. This herb has an agreeable, aromatic smell; and a warm, pungent taste. It is reputed to be resolvent, emmenagogue, tonic, and stomachic. It is not much used.

THYMUS, *Satureia capitata, Thymion*—t. *Creticus, Satureia capitata*.

THYMUS MASTICH'INA, *Common herb, Mastich, Marum vulg'arè, Semp'suchus, Clinop'odia, Mastich'ina Gallo'rum, Thymra Hispanica, Jaca Indica*. A low, shrubby, Spanish plant, used as an errhine. It has a smell like mastich. Its virtues resemble those of the *Marum Syriacum*; but it is said to be less powerful.

THYMUS SERPYLL'UM, *Mother of Thyme, Wild Thyme, Her'pylos, Herpyl'los, Serpyll'um, Serpul'um, Serpil'um, Gilarum, Serpyll'um vulg'arè minus*, (F.) *Serpolet*. This plant has the same sensible properties as the garden thyme; but has a milder, and rather more grateful flavour. *Lemon Thyme, the Serpyllum citrat'um*, is merely a variety of the *Thymus Serpyllum*. It is very pungent; and has a particularly grateful odour, approaching that of lemons.

THYMUS SYLVESTRIS, *Satureia capitata*.

THYRA, *θυρα*, 'a gate, folding-door.' In composition, *Thyreo* and *Thyro*, *θυρος*, 'a shield resembling a folding-door,' mean the thyroid cartilage.

THYREMPHRAXIS, Bronchocele.

THYREO, *Thyro*, in composition, relate to the thyroid cartilage or gland.

THYREOADENITIS, Thyreoiditis.

THYREO-ARYTENOID, *Thyro-arytenoides*, or *Thyro-arytenoides*. That which relates to the thyroid and arytenoid cartilages.

THYREO-ARYTENOID LIGAMENTS, *Inferior Ligaments of the Larynx*, *Lips of the Glottis*, *Vocal Cords*, are two ligaments about two lines broad, formed of elastic and parallel fibres, which are contained in a duplicature of the mucous membrane of the larynx. They extend horizontally from the anterior projection at the base of each arytenoid cartilage to the middle of the angle of union of the thyroid cartilage. They are the essential organs of voice. See Glottis.

THYREO-ARYTENOID MUSCLES, THYREO-ARYTENOIDI, are thin muscles, which arise from the middle and inferior part of the posterior surface of the thyroid cartilage: whence they proceed backwards and outwards, to be inserted into the outer part of the base of the arytenoid cartilage. They give the necessary tension to the ligaments of the glottis, in the production of the voice. Santorini has given the name *Thyreo-arytenoides obliquus* to a portion of the arytenoides muscle.

THYREO-EPIGLOTTIC, *Thyreo-epiglotticus*, *Thyrepi-glotticus*. Sabatier and Santorini have given this name to the outer portion of the thyro-arytenoid muscle; because it passes from the thyroid cartilage to the anterior part of the epiglottis.

THYREO-HYOID, *Thyro-hyoides*, *Thyro-hyoides*, *Hyodeothyroides*. That which belongs or relates to the thyroid cartilage and os hyoides.

THYREO-HYOID OF HYO-THYROID MEMBRANE is a very broad, yellowish, fibrous membrane, thicker at the middle than at the extremities, which is attached above to the posterior surface of the body and great cornu of the os hyoides; and, below, to the whole superior edge of the thyroid cartilage.

THYREO-HYOÏDEUS or *Hyo-thyroides* Muscle is situate at the anterior and superior part of the neck. It is attached to the oblique line on the anterior surface of the thyroid cartilage; to the inferior edge of the body of the os hyoides, and to the anterior portion of its great cornu. It approximates the thyroid cartilage and os hyoides to each other, by raising the cartilage, and with it the whole larynx: ar, it can depress the os hyoides.

THYREO-PHARYNGEUS, *Thyro-Pharyngeus*.

THYREOID, Thyroid.

THYREOÏDEUS, Thyroideal.

THYREOÏTIS, *Thyreoiditis*, *Angina thyroidea*, from *θυρος*, 'a shield,' and *itis*, denoting inflammation. Inflammation of the thyroid gland.

THYREONCUS, Bronchocele.

THYREOPHRAXIA, Bronchocele.

THYREPIGLOTTICUS, Thyreopiglottic.

THYRO, see Thyreo.

THYRO-ARYTENOID, Thyreo-arytenoid.

THYRO-CRICO-PHARYNGEUS, see Crico-pharyngeal.

THYRO-HYOÏDEUS, Thyreo-hyoid.

THYRO-PHARYNGEUS, *Thyro-pharyngeus*. Valsalva, Morgagni, Santorini, and Winslow have given this name to the portion of the constrictor pharyngis inferior, which is attached to the thyroid cartilage.

THYRO-PHARYNGEUS, Constrictor pharyngis, see Crico-pharyngeal.

THYRO-PHARYNGO-STAPHYLINUS, Palato-pharyngeus.

THYROCELE, Bronchocele.

THYROID, *Thyroid*, *Thyroïdes*, from *θυρα*, 'a gate or folding-door,' or from *θυρος*, 'a shield,' and *ides*, 'form.' That which has the shape of a folding-door.

THYROID CARTILAGE, *Cartilago Scutiformis*, *C. Scutalis*, *C. Clypealis*, *Cœportorium*, *C. Peltalis* seu *peltatus*, *Scutum*, *Adami Morstus Os*, is the largest of the cartilages of the larynx, at the anterior part of which it is situate. It is larger transversely than vertically; broader above than below; and seems formed by the junction of the two quadrilateral plates, which produce, by their union, an angle that projects forwards. Its two posterior margins terminate above, and on each side, by an ensiform prolongation, called the *greater cornu of the thyroid cartilage*; and, below, by a less prominent eminence, the *lesser cornu*, which is articulated with the cricoid.

THYROID GLAND, *Corpus Thyroideum*, *Glandula Thyroidea*, (F.) *Gland* ou *Corps Thyroïde*, is an organ, the uses of which are not known. It covers the anterior and inferior part of the larynx, as well as the first rings of the trachea, and seems to be composed of two lobes, flattened from before to behind, which are united by a transverse prolongation of the same nature as themselves, called the *Isthmus of the Thyroid Gland*. The tissue of the thyroid is soft, spongy, and of a brownish colour; but its intimate structure is unknown. It is formed of several distinct lobules; collected in lobes of greater or less size. These are composed of granulations, some of which contain a yellowish or milky fluid. The thyroid gland receives four large arteries, called *Thyroideal*, as well as corresponding veins. Its nerves proceed from the pneumogastric, and from the cervical ganglia. No excretory duct has ever been found in it. Its uses are not known.

THYROIDEAL, *Thyroïdes*, *Thyroideus*, (F.) *Thyroïdien*. That which concerns the thyroid gland or cartilage.

THYROIDEAL ARTERIES are two on each side. 1. The *superior Thyroideal*, *superior laryngeal*, *superior guttural*, arises from the anterior part of the external carotid, and proceeds to the upper part of the thyroid gland, after having given off a *laryngeal branch* and a *crico-thyroid*. 2. The *inferior Thyroideal*, *inferior guttural*, much larger than the last, arises from the upper part of the subclavian. It passes in a serpentine manner, to the inferior part of the thyroid gland, to which it is distributed, after having given a number of branches to the neighbouring parts, among which is the *cervicalis ascendens*.

THYROIDEAL VEINS are, 1. A *superior thyroideal*, and several *middle thyroideal*, which open into the internal jugular vein. 2. An *in-*

ferior thyroïdeale, much larger than the preceding, whose branches form—by anastomosing with those of the opposite side, in front of the trachea—a very remarkable venous plexus, which J. Cloquet calls the *infra-thyroïdeale plexus*. The inferior thyroïdeale veins open,—the left into the corresponding subclavian;—the right, into the vena cava superior.

THYROIDIEN, Thyroïdeale.

THYROPHRAXIA, Bronchocele.

THYRSUS, Penis.

TIBI-PÉRONÉO-TARSIEN, Peronæus longus.

TIBIA. A Latin word, which signifies a *Auto* or pipe. *Cnemè, Procnè'mè, Procnè'mium, Focilé majus, Arun'do major, Cannà major, Cannà major seu domes'tica cruris*. The largest bone of the leg. A long irregular, and triangular bone, situate on the inner side of the fibula. It has, 1. A *Superior or femoral extremity*, which is very large, rounded, and has two eminences at the sides, called *Tuberosities of the Tibia*, or *Tibial tuberosities*. The outermost is articulated with the fibula. On its head are two articular, oval, concave surfaces, separated by a process, called *Spine of the tibia*, which are articulated with the condyles of the *Os femoris*. 2. An *inferior or tarsal extremity*, having an articular surface beneath, which joins the astragalus; within, a triangular eminence, which forms the malleolus internus; and, on the outside, a triangular surface, which articulates with the fibula. 3. The body or shaft of the tibia has three faces, separated by three angles, the anterior of which is the most prominent, and is called the *spine or crista of the tibia* or *tibial spine*. It is the *shin*. The tibia is articulated with the femur, fibula, and astragalus. It is developed by three points of ossification, one for the body, and one for each extremity.

TIBIA MINIMA, Fibula.

TIBIÆUS, Tibial.

TIBIAL, *Tibialis, Tibiæus*, (F.) *Tibial, Jambier*. That which relates to the tibia or to the leg.

TIBIAL APONEURO'SIS, (F.) *Aponévrose Jambière*, surrounds the muscles of the leg. It is continuous, above, with the femoral aponeurosis, and arises, also, from the head of the fibula, and from several fibrous expansions which detach themselves from the tendons of the triceps, sartorius, gracilis, and semitendinosus. Thence it descends around the leg, attaching itself to the whole extent of the anterior and inner edges of the tibia. It sends, below, an expansion, which passes before the tendo Achillis, and is continuous with the anterior annular ligament of the tarsus. It is attached, also, to the sheath of the peronei muscles.

TIBIAL ARTERIES are two in number. 1. The *Tibialis Antica*, which arises from the popliteal artery, before its bifurcation; passes immediately through the opening in the upper part of the interosseous ligament, and reaches the anterior part of the leg; when it turns downwards, and descends, obliquely, between the extensor communis digitorum pedis and the tibialis anticus, anterior to the interosseous ligament; glides under the anterior annular ligament of the tarsus, and takes the name *Dorsalis tarsi*. Amongst the numerous branches, given off by the tibialis antica, may be distinguished—the *Tibialis recurrens*, *A. malleolaris interna*, and

*A. malleolaris externa*. 2. The *Tibialis postica*, arises from the bifurcation of the popliteal artery; and, slightly tortuous, descends between the two planes of the posterior muscles of the leg; until it arrives under the arch of the calcaneum, where it divides into two branches—the *Plantar arteries*.

TIBIAL NERVES are two in number. 1. The *anterior tibial nerve, Prétibio-susplantaire*, (Ch.) One of the two branches in which the external popliteal terminates. It accompanies the arteria tibialis antica. 2. The *posterior tibial nerve, Branche tibiale du nerf femoro-poplitèe*, (Ch.) is the internal popliteal.

TIBIAL VEINS, ANTERIOR AND POSTERIOR, have the same arrangement as the arteries which they accompany.

TIBIALIS ANTI-CUS, *Catène musculus*, (F.) *Tibio-sus-métatarsien, Tibio-sustarsien*, (Ch.) *Jambier antérieur*. A muscle situate at the anterior part of the leg. Above, it has the shape of a triangular prism; below, it is slender and tendinous. It is attached, above, to the anterior part of the external tuberosity of the tibia; to the superior half of the outer surface of that bone; and to the anterior surface of the interosseous ligament. Below, its tendon terminates at the base of the first cuneiform bone, and at the posterior extremity of the first metatarsal bone. This muscle bends the foot on the leg, and directs its point inwards, at the same time that it raises its inner edge. It can, also, bend the leg on the foot, and prevent it from falling backwards in standing.

TIBIALIS GRACILIS, *Plantar muscle*.

TIBIALIS POSTI-CUS, (F.) *Tibio-tarsien, Tibio-sous-tarsien*, (Ch.) *Jambier postérieur*. This muscle is situate at the posterior and deep part of the leg. It is thicker above than below; and is attached, above, to the posterior surface of the fibula; to the posterior surface of the tibia, and to the interosseous ligament. Its tendon terminates, below, at the tuberosity on the inferior extremity of the os scaphoides. This muscle extends the foot on the leg; at the same time raising its inner edge. It, likewise, extends the leg on the foot.

TIBIO-CALCANIEN, *Soleus*—*t. Phalængettien*, *Flexor longus digitorum pedis profundus perforans*—*t. Sous-tarsien, Tibialis posticus*—*t. Sus-métatarsien, Tibialis anticus*—*t. Sustarsien, Tibialis anticus*.

TIBIO-TARSAL, *Tibio-tarsens*, (F.) *Tibio-tarsienne*. What relates to the tibia and tarsus.

TIBIO-TARSAL ARTICULATION is the articulation of the foot with the leg. It is formed by the tibia and the astragalus; and is strengthened by lateral, and by anterior and posterior ligaments.

TIBIO-TARSIEN, *Tibialis posticus*.

TIC, *Twitching*. A local and habitual convulsive motion of certain muscles; and, especially, of some of those of the face. It is, sometimes, called in France *Tic convulsif* ou *Tic non douloureux*, to distinguish it from *Tic douloureux* or *neuralgia faciei*, and has been termed a *partial chorea* or form of *chronic chorea*, *Spasmus facialis, Chorea faciei*.

TIC DOULEUREUX, *Neuralgia, facial*—*t. non douloureux*, see Tic.

TICKLE WEED, *Veratrum viride*.

TICKLING, (F.) *Chatouillement*. This word, sometimes, means the action of tickling

(*stilla'tio*;) at others, the sensation produced by this action (*pruri'tus*.) A vivid sensation, which commonly causes laughter, and a state of general spasm that may be dangerous if too long protracted. There are some parts of the body, where we are easier tickled than others; for example, the sole of the feet, and the hypochondriac regions.

TICKWEED, Hedeoma.

TIERCE, see Tertian.

TIGE PITUITAIRE, Infundibulum of the brain.—*t. Sus-sphénoïdale*, Infundibulum of the brain.

TIGILLUM, Crucible.

TIGLIA seu TIGLII GRANA, see Croton Tiglium.

TIGRETIER, see Mania, dancing.

TIGULA, Saccharum.

TIKIMMA, Cacoucia coccinea.

TILBURY, MINERAL WATERS OF. A saline chalybeate at West Tilbury, in Essex, England. It is not much frequented.

TILIA, *T. Europa'ea*, *Phil'lyra*. The *Lima trees* or *Linden trees*, *Basswood*, *Whitewood*, *Spoonwood*, (*F.*) *Tilulid.* Family, Tiliaceæ. The flowers have been supposed to possess anodyne and antispasmodic virtues.

TILLEUL, Tilia.

TILLICHERY CORTEX, Nerium anti-dysentericum.

TILMA, Lintum.

TILMOS, Evulsion.

TILMUS, Carphologia.

TIMAC. The name of an East India root, but of what vegetable is not clear. It is said to possess diuretic properties; and hence has been given in dropsies.

TIMIDUS, Rectus inferior oculi.

TIN, (*D.*) Ten. *Stannum*, *Cassii'eros*, *Cattii'eros*, *Stangos*, *Jupiter*, *Stu'pia*, *Laos*, *Plumbum album* seu *caudidum*, *Plumbum candidum*, (*F.*) *Étain*. A solid metal; of a peculiar odour when rubbed; insipid; colour whitish; s. g. 7.291; giving a peculiar tinkling sound when struck. It is used, in medicine, only as a mechanical anthelmintic. Dose, ʒi of the *Pulvis Stanni* or *Granular tin*, in molasses. This is made by melting tin in an iron vessel over the fire, and, while it is cooling, stirring until it is reduced to a powder, which is passed through a sieve.—Ph. U. S.

TIN, BUTTER OF, Tin, muriate of—*t.* Chloruret of Tin, muriate of—*t.* Deutohydrochlorate of Tin, muriate of.

TIN-FOIL, *Stannum foliatum*, *Stanni'olum*, is used for plugging carious teeth, &c.

TIN-GLASS, Bismuth.

TIN, GRANULAR, see Tin—*t.* Muriate of, superoxygenated, *T.* muriate of.

TIN, MURIATE OF, *Butter of Tin*, *Fuming liquor of Libavius*, *Mu'rias Stanni*, *Murias Oxy'duli Stanni*, *Chlor'uret of Tin*, *Deu'to-hydrochlorate of Tin*, *Superoxygenat'ed Muriate of Tin*. This is formed of Tin, one part; concentrated muriatic acid, three parts. To be crystallized by the aid of heat. A violent cathartic. Dose, gr. ij or iij.

TIN, SULPHURET OF, Aurum musivum.

TINASMUS, Tenesmus.

TINCTURA, from *tingere*, *tinctum*, 'to dye.' *Tincture*, *Essen'tia*, (*F.*) *Teinture*, *Alcoolat*, *Alcohol*. The term tincture is generally restricted to spirituous solutions of vegetable, animal, and

some saline substances. It corresponds, therefore, with the word *Quint'esence*, in one of its old significations; and with the *Alcohol'tum* of the *Codez* of Paris. It is not unusual, however, to speak of *aqueous tincture*, *etheral tincture*, &c. Tinctures are made either with pure alcohol or proof spirit. The former are precipitated by water: and, therefore, are seldom used internally; the latter are common additions to infusions, decoctions, &c. They ought not, of course, to be united with any vehicle which can decompose them, or separate any thing from them in a palpable form; unless such decomposition is desired by the prescriber. In making tinctures, the ingredients should be reduced to a coarse powder; and the maceration be made in close vessels, exposed to a heat of about 80°, and frequently shaken. When completed, they must be filtered, and put away for use in close bottles. When the process of displacement is employed, great care must be taken, so that the substances treated may be, as far as possible, exhausted of their soluble principles, and a perfectly clear tincture be obtained. To those who are not familiar with the process, the plan of maceration is preferable.—Ph. U. S.

TINCTURA ABSINTHII COMPOSITA, *Compound Tincture of wormwood*, *Essen'tia absin'thii composita* seu *amara*. (*Absinth.*, *artem. pontic.* *caryoph.* ʒʒ, *sacch.* ʒij, *alcohol.* Oss. Macerate for fifteen days. *Ph. P.*) Tonic, stomachic, vermifuge, and carminative. Dose, f. ʒij to f. ʒss.

TINCTURA ACACIÆ CATECHU, *T. catechu*—*t.* *Acetatis ferri cum alcohol.*, see *T. ferri acetatis*—*t.* *Acidi sulphurici*, *Sulphuricum acidum aromaticum*.

TINCTURA ACONITI, *Tincture of Aconite*, (*Aconit.* ʒiv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter through paper. *Ph. U. S.*) It may also be made by displacement. *Ph. U. S.*

TINCTURA ÆTHÆRÆ CAMPHORATA, *Solutio cam'phoræ æthæ'rae*, *Liquor nervinus Bangii*, *Spiritus sulphurico-ætheris camphoratus*, *Naphtha vitrioli camphorata*. (*Camphor.* p. i. *Æther sulphuric.* p. ii.) Stimulant in atonic diseases, arthritic cardialgia and spasm. Dose, 20 to 30 drops in white wine.

TINCTURA ÆTHÆRÆ FERRI, *Alcohol* (seu *Tinctura*) *sulphurico-æthereus ferri*—*t.* *Alcoholica China composita*, *T. cinchonæ composita*—*t.* *Alcoholica corticum aurantium* *Whyt'tii*, *Tinctura cinchonæ amara*—*t.* *Alexipharmaca Huxhami*, *Tinctura cinchonæ composita*.

TINCTURA ALOES, *T. Aloes Socotori'na*, *Essen'tia Aloes*, *Al'cohol cum Aloë perfoliata*, *Tincture of Aloes*. (*Aloes*, ʒj, *ext. glycyrrh.* ʒij, *aquæ Oiss.* *alcohol.* Oss. Macerate for 14 days, and filter. *Ph. U. S.*) Properties, those of aloes. Dose, f. ʒss to f. ʒiss.

TINCTURA ALOES ÆTHÆRÆ, *Æthæ'ral Tincture of Aloes*, *Tinctura aloes vitriolata*. (*Aloes Socot.*, *Myrrh.* ʒʒ, *croci* ʒj, *sp. atheris sulph.* Oj. Digest the myrrh in the ether for 4 days; then add the aloes and saffron. *Ph. E.*) Stimulant and cathartic. Dose, f. ʒj to f. ʒij.

TINCTURA ALOES COMPOSITA, *Eliz'ir Proprieta'tis*, *E. aperiti'vum*, *E. Aloes*, *Tinctura Aloes cum Myrrhâ*, *T. Aloës et Myrrhæ*, (*Ph. U. S.*) *T. Aloës et Myrrhæ crocata*, *Eliz'ir of long life*, *Compound Tincture of Aloes*, (*F.*) *Eliz'ir de longue vie*, *Baume de vis de Lelivère*,

(*Aloes*, in pulv., ℥ij, *croci*, ℥j, *Tinct. Myrrhae*, Oij.) Macerate for 14 days, and filter. Purgative and stomachic. Dose, f. ℥j to f. ℥ij.

*Radcliffe's Elixir* is formed of *Aloes Socotr.* ℥vj, *cort. cinnam.*, *rad. zedoar.* aa ℥ss, *rad. rhei* ℥ij, *coccinell.* ℥ss, *syrup. rhamni* ℥ij, *sp. tenuior.* Oj, *aqua pura* f. ℥v.

TINCTURA ALOES ET MYRRHÆ, *T. aloës composita*—*t. Aloes et myrrhæ crocata*, *T. A. composita*—*t. Aloes vitriolata*, *T. A. ætherea*—*t. Amara*, *T. gentianæ composita*—*t. Amomi repentis*, *T. cardamomi*—*t. Amomi zingiberis*, *T. zingiberis*.

TINCTURA ANGUSTURÆ, *Tincture of Angustura*. (*Cort. cuspar.* in pulv. crass. redact. ℥ij, *sp. vin. ten.* Oij. Digest. Ph. D.) Dose, f. ℥j to f. ℥ij.

TINCTURA ANTIODONTALGICA, *Toothache Tincture*. (*Tannin.* ℥j, *Mastic*, gr. v, *æther.* ℥ij. M.) To be applied on cotton wool, to the tooth previously dried.

TINCTURA ARISTOLOCHIÆ SERPENTARIÆ, *T. serpentariæ*—*t. Aromatica*, *T. cinnamomi composita*—*t. Aromatica ammoniata*, *Spiritus ammoniæ aromaticus*.

TINCTURA ASAFŒTIDÆ, *T. Fer'ula Asafatidæ*, *Tincture of Asafatida*, *T. fatida*, *T. asafatidæ*, (*Asafatid.* ℥iv, *sp. rect.* Oij. Macerate for fourteen days and filter.) Dose, gr. xv to f. ℥j.

TINCTURA ASAFŒTIDÆ AMMONIATA, *Spiritus Ammoniæ sœtidus*.

TINCTURA AURANTII, *T. Corticis Aurantii*, *Tincture of Orange Peel*. (*Aurant. cort. recent.* ℥ij, *sp. rect.* Oij. Digest for 14 days.) Stomachic. Used as an adjunct to stomachic draughts. Dose, f. ℥ss to ℥ij.

TINCTURA AUREA, *Alcohol seu tinctura sulphurico-æthereus ferri*.

TINCTURA BELLADONNÆ, *Tincture of Belladonna*. (*Belladonnæ*, ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days; express, and filter through paper. Ph. U. S.) It may, also, be prepared by displacement. Ph. U. S.

TINCTURA BENZOÏNI COMPOSITA, *Compound Tincture of Benzoin*, *T. Benzoes composita*, *Balsamum Catholicum*, *B. Par'sticum*, *Balsamum traumaticum*, *Elixir traumaticum*, *Friar's Balsam*, *Vervain's Balsam*, *Wade's Drops*, *Jesuit's drops*, *Commander's Balsam*, *Wound Balsam*; *Balsam for cuts*. (*Benzoin.* ℥ij, *styrac. purif.* ℥ij, *tolut.* ℥j, *aloes*, in pulv. ℥ss, *alcohol.* Oij. Macerate for 14 days and filter.) Stimulant. Used chiefly to wounds and ulcers.

The basis of *Turlington's Balsam of Life* is the Compound Tincture of Benzoin. The following form is recommended by a committee of the Philadelphia College of Pharmacy:—*Alcohol.* Oviii, *Benzoin.* ℥xij, *Styrac. liquid.* ℥iv, *Aloes Socotrin.* ℥j, *Balsam Peruvian.* ℥ij, *Myrrhae*, ℥j, *Rad. Anglic.* ℥ss, *Balsam Tolut.*, *Ext. Glycyrrh.* aa ℥iv. Digest for ten days, and strain.

The *Essence of Coltsfoot* consists of equal parts of the *Compound Tincture of Benzoin* and *Balsam of Tolu*, to which is added double the quantity of *Rectified Spirit of Wine*. It is sold as a pectoral.

TINCTURA CALUMBÆ, *T. Columba*, *T. Colombo*, *Tincture of Columbo*, *Columbo Bitters*. (*Calumb. rad.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days; express, and filter. Ph.

U. S.) Dose, f. ℥ss to ℥iv. It may, also, be made by displacement.

TINCTURA CAMPHORÆ, *Spiritus camphoræ*.

TINCTURA CAMPHORÆ COMPOSITA, *T. Opii Camphorata*, *Compound Tincture of Camphor*, *Camphorated Tincture of Opium*, *Elixir Paregoricum*, *Paregoric Elixir*. (*Opii*, in pulv. *Acid Benzoic.* aa ℥j, *ol. anisi*, f. ℥j, *mellis despumat.* ℥ij, *Camphor.* ℥ij, *alcohol. dilut.* Oij. Macerate for 14 days, and filter through paper. Ph. U. S.) One fluidounce contains nearly gr. ij of opium. Anodyne. Dose, f. ℥j to f. ℥ij. *Squire's Elixir*, an empirical carminative preparation, is thus made, according to one formula. (*Opii* ℥iv, *camphor.* ℥j, *coccinell.* ℥j, *fanioul. dulc.* ℥ij, *tinct. serpent.* Oj, *sp. anis. cong.* ij, *aqua* Oij, *auri musivi*, ℥vj.)

TINCTURA CANTHARIDIS, *T. C. Venicæ*, *T. Lytta*, *T. Meloës vesicato'rii*, *Tincture of Blistering Fly*, *T. of Spanish Fly*, (*F.*) *Tincture rubefaciens*. (*Cantharid.* cont. ℥ij, *alcohol. dilut.* Oij. Macerate for 14 days; express, and filter. It may, also, be prepared by displacement. Ph. U. S.) Stimulant and diuretic, but not often used internally. Externally, stimulant. Dose, gr. x.

*Matthew's Injection*, a once celebrated nostrum for fistula in ano, consisted wholly of a dilute *Tincture of Cantharides*.

TINCTURA CAPSICI, *Tincture of Capsicum*. (*Capsic.* ℥j, *alcohol. dil.* Oij. Macerate for 14 days, and filter. Ph. U. S.) It may, also, be prepared by displacement. Stimulant. Dose, f. ℥ss to ℥j.

TINCTURA CARDAMOMI, *T. amomi repentis*, *Tincture of Cardamoms*. (*Cardam.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, strain, and filter. Ph. U. S.) It may, also, be made by displacement. Use, the same as in the seeds. Dose, f. ℥j to f. ℥iv.

*Solomon's Balm of Gilead*, an empirical preparation, seems to be an aromatic tincture, in which *Cardamoms* form a leading ingredient, made with brandy. Some affirm that it contains *cantharides*.

TINCTURA CARDAMOMI COMPOSITA, *Compound Tincture of Cardamoms*, *Stomach Tincture*, *Tinctura Stomachica*. (*Card. sem.*, *carvi ana. cocci*, aa ℥ij, *cinnamon. cort.* cont. ℥iv, *uv. passar. demptis acinis*, ℥iv, *spirit. ten.* Oj. Ph. L.) Stomachic and carminative. Dose, f. ℥ij to f. ℥iv.

TINCTURA CARMINATIVA SYLVII, *Alcoholatum Carminativum Sylvii*, *Carminative Elixir of Sylvius*. (*Rad. angelic.* 4 p., *rad. imperator.*, *galang.* aa 6 p., *fol. rosamarin.*, *majorana. ruta*, *basilic.* aa 48 p., *baccar. laur. nobil.* 12 p. *sem. angelic.*, *ligust. levist.*, *anis* aa 16 p. *zingib.*, *nuc. moschat.* aa 6 p., *cinna.* 12 p. *caryoph.*, *cort. limon.* aa 4 p. Add *alcohol.* 1500 p. Macerate and distil, 1000 p. Ph. P.) A warm stomachic, carminative, &c. Dose, ℥ss to f. ℥ss.

TINCTURA CASCARILLÆ, *T. Crotonis Elixar'isæ*, *Al'cohol cum Croton'e Cascarilla*, *Tincture of Cascarella*. (*Cascarill. cort.* cont. ℥ij, *sp. ten.* Oij. Ph. L.) Dose, f. ℥j to f. ℥iv.

TINCTURA CASTOREI, *T. Castorei Rosinæ*, *Essentia Castorei*, *Al'cohol castorei*, *T. Castorei Canaden'sis*, *Tincture of Castor*. (*Castor. cont.* ℥ij, *alcohol.* Oij. Macerate for 7 days, express, and filter.) Tonic and antispasmodic. Dose, gr. xx to f. ℥ij, or more.

TINCTURA CASTOREI COMPOSITA, Compound Tincture of Castor. (Cast. ʒij, g. asafatid. ʒss. alcohol. ammoniat. Oj. Ph. E.) Antispasmodic. Dose, f. ʒj to f. ʒiv. Called, also, *Elizir fætidum*, *Tinctura castorei fatida seu fatida ammoniata*.

TINCTURA CAT'ECHU, *Tinctura Japonica*, *T. Mimosa Catechu*, *T. Aca'cia Catechu*, *Tincture of Catechu*. (Catech. ʒijj, cinnam. contus. f. ʒij, alcohol. dilut. Oij. Macerate for 14 days, express and filter. Ph. U. S.) Astringent. Dose, f. ʒj to f. ʒij.

The Concentrated Solution of Charcoal, sold for cleaning the teeth, seems to be little more than the tincture of catechu.

TINCTURA CICUTÆ, *T. conii maculati*.

TINCTURA CINCHO'NÆ, *T. Corticis Peruvia'ni Simplex*, *T. Cort. Peruvia'ni*, *Tincture of Cinchona*, *Tincture of Bark*. (Cinchon. cont. ʒvi, alcohol. dilut. Oij. Macerate for 14 days, express, and filter through paper. Ph. U. S.) It may, also, be made by displacement. Dose, f. ʒj to ʒiv or more.

TINCTURA CINCHO'NÆ AMA'RA, *Elizir antihypochondriacum*, *E. roborans Whyttii*, *E. Whyttii*, *Essentia Corticis Peruvia'ni Composita*, *Tinctura alcoholica corticum aurantiarum Whyttii*, *T. Kinki'na amara*, *Elizir stomachicus spirituosus*. (Cinch. p. viij, Gentian. Rad., Cort. Aurant. p. iij. Alcohol. (900) 96 p. Digest.) Dose, one or two teaspoonfuls.

TINCTURA CINCHO'NÆ AMMONIATA, *T. Corticis Peruvia'ni volatilis*, *Ammoniated Tincture of Bark*, *Volatile Tincture of Bark*. (Cinchon. lancifol. cort. cont. ʒiv. sp. ammon. aromat. Oij. Ph. L.) In dyspepsia, combined with acidity and languor.

TINCTURA CINCHO'NÆ ÆTHE'REA COMPOSITA, *T. Kina Kina aetherea composita*, *Elizirium Antisepticum Doctoris Chaussier*, *Chaussier's Antiseptic Elizir*. (Cinchon. officin. ʒij, cascarill. ʒss, cinnam. ʒijj, croci ʒss, sacch. alb. ʒxxxvij. Put these bruised into a mattress, and add vin. alb. Hispanic. vel vin. muscat., alcohol. aa Oj. Macerate for two days, and add sulphuric ether f. ʒiss. Ph. P.) Tonic, stimulant, and antiseptic. Dose, f. ʒss to f. ʒj.

TINCTURA CINCHO'NÆ COMPOSITA, Compound Tincture of Cinchona or Bark, *Huzham's Tincture of Bark*, *T. Corticis Peruvia'ni Composita*, *T. febrifuga Doctoris Huzhami*, *Essentia Chinae*, *E. Corticis Peruvia'ni Alezipharmaca Huzhami*, *Essentia antiseptica Huzhami*, *Tinctura Alezipharmaca Huzhami*, *Tinctura Alcoholica Chinae Composita*. (Cinchon. cont. ʒij, aurant. cort. cont. ʒiss, serpent. cont. ʒijj, croci, santal. aa ʒj, alcohol. dilut. f. ʒxx. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be made by displacement. More grateful than the simple tincture. Dose, f. ʒj to f. ʒijj.

TINCTURA CINNAMOMI, *Tincture of Cinnamon*, *Essentia Cinnamomi*, *T. Lauri Cinnamomi*. (Cinnam. cont. ʒijj, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Stomachic. Dose, f. ʒj to f. ʒijj.

TINCTURA CINNAMOMI COMPOSITA, Compound Tincture of Cinnamon, *Tinctura Aromatica*, *Essentia Aromatica*, *Alcolû cum Aromatibus Compositus*, *Eau de Bonferme ou d'Armagnac*. (Cinnam. cont. ʒj, cardam. cont. ʒss, singib. cont. ʒijj, alcohol. dilut. Oij. Ma-

cerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Use, same as the last. Dose, f. ʒj to f. ʒijj.

TINCTURA DE COCHLEA'RIBUS, *Alcoolatum de Cochlea'ris*, *A. antiscorbaticum*. (Fol. cochlear. recent. 2500 p., rad. armoraciz, 230 p., alcohol. (22° to 32° Bc.) 3000 p., distil off 2000 p. Ph. P.) Antiscorbatic. Dose, f. ʒij to ʒj.

TINCTURA COL'CHICI, *T. C. Seminis*, (Ph. U. S.), *Tincture of Colchicum Seed*. (Colchic. sem. cont. ʒiv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Dose, ten to sixty drops.

TINCTURA COLCHICI SEMINIS, *T. colchici*—*t. Colombæ*, *T. Calumbæ*.

TINCTURA CONII, *T. C. Maculati*, *T. Cicutæ*, *Tincture of Hemlock*. (Conii fol. ʒiv, alcohol. dil. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be made by displacement. Use;—the same as that of the leaves.

TINCTURA CONII MACULATI, *T. conii*—*t. Convolvuli Jalapæ*, *T. jalapii*—*t. Corticis aurantii*. *T. aurantii*—*t. Corticis Peruviani composita*. *T. cinchonæ comp.*—*t. Corticis Peruviani simplex*, *T. cinchonæ*—*t. Corticis Peruviani volatilis*, *T. cinchonæ ammoniata*.

TINCTURA CROCI SATIVA, *T. Croci*, *Tincture of Saffron*. (Crocii Angl. cont. ʒj, alcohol. dilut. ʒxx. Ph. E.) Slightly stomachic(?). Dose, f. ʒj to f. ʒij.

TINCTURA DE CROCO COMPOSITA, *Elizirium de Garus*, *Alcoolatum de Croco Compositum*, *Compound Tincture of Saffron*, *Elizir of Garus*. (Aloës Socotr. 320 p., myrrh. 64 p., croci. 32 p., cinnam., nuc. moschat., caryoph. aa, 16 p., alcohol. 1000 p. ag. flor. aurant. 5000 p. Digest for two days; distil 4000 p. and add syrup of capillaire, 5000 p. Ph. P.) Aromatic, cordial, stomachic. It is also called *Elizir cordiale et stomachicum*, and *E. anticolicum crocatum*.

TINCTURA CROTONIS ELEUTHERIE, *T. cascariillæ*.

TINCTURA CUBE'Æ, *Tincture of Cubebs*. (Cubeb. cont. ʒiv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Dose, one or two fluidrachms.

TINCTURA DIGITA'LIS, *Tincture of Digitalis*, *T. Digitalis purpuræ*. (Digital. ʒiv, spirit. ten. Oij. Macerate for 14 days, express, and filter.) It may, also, be prepared by displacement. Use, same as that of the leaves. Dose, gr. x.

TINCTURA FEBRIFUGA DOCTORIS HUXHAMI, *T. cinchonæ composita*.

TINCTURA FERRI ACETA'TIS, *Tincture of Acetate of Iron*. (Potass. acetat. ʒij, sulph. ferri ʒj, sp. rectif. Oij. Rub the acetate and sulphate into a soft mass. Dry and rub with the spirit. Digest for 7 days, and pour off. Ph. D.) Tonic and astringent. Dose, gr. xx to f. ʒj. The Dublin college directs a *Tinctura Acetatis Ferri cum Alcohole*, which differs from the other, in having half the quantity, only, of the Acetate of Potass.

TINCTURA FERRI AMMONIATA, *Tincture of Ammoniated Iron*, *T. Ferri Ammoniacalis*, *T. Florum martialium*, *T. Martis Mysiciti*. (Ferri ammon. ʒiv, sp. ten. Oj. Ph. L.) Use—

same as that of the ammoniated iron. Dose, f. ʒss to f. ʒij.

TINCTURA FERRI CHLORIDI, T. ferri muriatis.

TINCTURA FERRI MURIA'TIS, T. Ferri chlo-  
ridi, (Ph. U. S.), T. Ferri sesqui-chloridi, Li-  
quor Ferri muriatis, Tincture of Muriate of  
Iron, T. Martis in Spiritu Salis, T. M. cum Spi-  
ritu Salis, T. Ferri Muria'tis, Tincture of Steel,  
Alcohol ferriatus. (Ferri subcarb. Bss, acid. mu-  
riat. Oj, alcohol. Oij.) Add the acid to the  
subcarbonate in a glass vessel, and shake during  
three days. Pour off and add the spirit. Ph.  
U. S.) Tonic and styptic. Dose, gr. x to  
xx.

A solution of nitrate of iron, Liquor seu So-  
lutio Ferri Nitrat'is, Liquor Ferri Sesquini-  
tratis, Solution of Sesquinitrate of Iron, has  
been recommended in chronic diarrhœa and  
dysentery. Its virtues exactly resemble those  
of the muriate of iron.

The Antivenereal Drops, at one time so ce-  
lebrated at Amsterdam, were examined by  
Scheele, and found to be a tincture of chloride  
of iron and corrosive sublimate.

TINCTURA FERRI SESQUICHLORIDI, T. Ferri  
muriatis—t. Ferulæ Assafetidæ, T. Assafeti-  
dæ—t. Florum martialium, T. ferri ammoniata  
—t. Fœtida, T. assafetidæ—t. Fœtida ammo-  
niata, T. castorei composita—t. Fuliginis, see  
Fuligo.

TINCTURA GAL'BANI, Tincture of Galbanum.  
(Galb. ʒij, sp. tenuior. Oij. Ph. D.) Stimu-  
lant and antispasmodic. Dose f. ʒj to f. ʒijj.

TINCTURA GALLA'RUM, T. Galla, Tincture  
of Galls. (Gall. contus. ʒiv, alcohol. dilut.  
Oij.) Macerate for 14 days, express and filter.  
Ph. U. S.) It may, also, be prepared by dis-  
placement. Astringent. Dose, f. ʒj to ʒijj.

TINCTURA GENTIA'NÆ COMPOSITA, Compound  
Tincture of Gentian, Tinct. Ama'ra, Spirit Bit-  
ters, Eliz'ir Stomachic'um. (Rad. gent. concis.  
ʒij, aurant. cort. exsiccat. ʒj. cardam.  
sem. cont. ʒss, spirit tenuior. Oij.) Macerate  
for 14 days, express, and filter.) It may, like-  
wise, be prepared by displacement. Ph. U.  
S. Tonic and stomachic. Dose, f. ʒj to f.  
ʒijj.

Brodum's Nervous Cordial consists of the  
Tinctures of Gentian, Columba, Cardamom,  
and Bark, with the Compound Spirit of Laven-  
der, and Wine of Iron.

Stoughton's Eliz'ir is a compound tincture  
of gentian. The Eliz'ir'ium Docto'ris Stough-  
ton seu Tinctura Ama'ra of the Parisian Codex  
is prepared as follows:—Absinth. summit. ex-  
siccat., Tauri chamædris., Rad. gentian., cort.  
aurant. ãã ʒvj, cascarilla ʒj, rhei ʒss, aloes  
socotr. ʒj, alcohol. Oij.) Digest.

TINCTURA GUAI'ACI, T. G. Officinalis, Tinc-  
ture of Guai'acum. (Guaiac. Bss, sp. rect. Oij.)  
Macerate for 14 days, and filter.) Stimulant  
and sudorific. Used especially in rheumatic  
and arthritic cases. Nearly the same as Hill's  
Essence of Bardana or Burdock.

TINCTURA GUAI'ACI AMMONIATA, Ammoni-  
ated Tincture of Guai'acum, T. Guaiacina Vo-  
latilis, Eliz'ir Guai'aci Volatilis, Alcohol cum  
Guai'aco officinali ammoniatus, Alcohol am-  
moniatus of Guai'aci, T. Guai'aci, P. L. 1788,  
Volatile Tincture of Guai'acum. (Guaiac.  
cont. ʒiv, sp. ammon. arom. Oiss. Macerate

for 14 days, and filter.) Properties same as  
the last. Dose, f. ʒj to f. ʒij.

Hatfield's Tincture—a nostrum—consists of  
Guaiacum and Soap, ãã ʒij, rectified spirit,  
Oiss.

TINCTURA HELLEBORI, T. H. Nigri, Tinc-  
ture of Black Hellebore, T. Melampodii. (Ead.  
helleb. nigr. cont. ʒiv, sp. tenuior. Oij. Ma-  
cerate for 14 days, express and filter.) It may  
also be prepared by displacement.—Ph. U. S.  
Dose, f. ʒss to f. ʒj.

TINCTURA HIERA, Vinum aloes.

TINCTURA HU'MULI, Tincture of Hops. (Hu-  
muli strobil. ʒv, sp. tenuior. Oij.) Tonic and  
sedative. Dose, f. ʒss to f. ʒijj.

TINCTURA HYOSCY'AMI, T. Hyoscyami nigri,  
Tincture of Henbane. (Hyoscyam. fol. ʒiv,  
sp. ten. Oij.) Macerate for 14 days, express  
and filter.) It may also be prepared by dis-  
placement.—Ph. U. S. Narcotic, anodyne.  
Dose, gr. xx to f. ʒij.

TINCTURA IODINI, Alcohol Iodii, Tincture  
of Iodine. (Iodin. ʒj, alcohol. Oj. Dissolve.  
Ph. U. S.) The tincture spoils by keeping, or  
at least, deposits the iodine. It has been much  
used in goitre, &c. Dose, ten drops three times  
a day.

TINCTURA IODINI COMPOSITA, Compound  
Tincture of Iodine. (Iodin. ʒss, Potassii Iodid.  
ʒj, Alcohol. Oj. Dissolve—Ph. U. S.) Dose  
10 to 30 drops.

TINCTURA JALA'PII, T. Jala'pa, T. Convol-  
vuli Jalapæ, Tincture of Jalap, Vali'ga. (Jal-  
ap. rad. cont. ʒvij, sp. ten. Oij.) Macerate  
for 14 days, express and filter.—Ph. U. S.) It  
may also be made by displacement. Cathartic.  
Dose, f. ʒj to f. ʒiv.

TINCTURA JALA'PII COMPOSITA, Eliz'ir Ja-  
lap'a Compositum, Eliz'ir purgans, Essentia  
catholica purgans Rothii, Eliz'ir antihelminti-  
cum Succorum, Eau de vie Allemande. (Jalap.  
Bss, Scammon. ʒj, Alcohol. (2ʒo.) Ovj.) Ma-  
cerate for eight days. Ph. P.) Dose, 60 to  
100 drops.

TINCTURA JAPONICA, Tinctura catechu—t.  
Kinæ kinæ ætherea composita—t. Cinchonæ  
ætherea composita—t. Kinkinæ amara, Tinc-  
tura cinchonæ amara.

TINCTURA KINO, Tincture of Kino. (Kino  
contrit. ʒijj, sp. ten. Oij. Ph. L. E., & D.)  
Astringent. Dose, f. ʒj to f. ʒij.

TINCTURA KRAME'RIZ, Tincture of Khatang  
(Kramer. in pulv. ʒvj, alcohol. dilut. Oij.) Ma-  
cerate for 14 days, express, and filter. Ph. U.  
S.) It may also be prepared by displacement.  
Dose, f. ʒj to f. ʒij.

TINCTURA LAURI CINNAMOMI, Tinctura cin-  
namomi—t. Lavandulæ composita, Spiritus  
lavand. comp.—t. Lyttæ, Tinctura cantharidis  
—t. Martis Glauberi, see Ferrum tartarizatum  
—t. Martis in spiritu salis, Tinctura ferri mu-  
riatis—t. Martis Mynsichti, Tinctura ferri am-  
moniata—t. Martis vinosa, Vinum ferri—t. Me-  
lampodii, Tinctura hellebori nigri—t. Meles-  
vesicatorii, Tinctura cantharidis—t. Metallo-  
rum, Lillium Paracelsi—t. Mimosa catechu,  
Tinctura catechu.

TINCTURA LOBE'LIZ, Tincture of Lobelia.  
(Lobel. ʒiv; alcohol. dilut. Oij.) Macerate for  
14 days, express, and filter. Ph. U. S.) It  
may also be prepared by displacement. Dose,  
f. ʒj to f. ʒij.

TINCTURA LUPULINÆ, Tincture of Lupulin.

(*Lupulin*. ꝥiv; *alcohol*. Oij. Macerate for 14 days, and filter. *Ph. U. S.*) Dose f. ʒj to f. ʒij.

TINCTURA MELOES VESICATORII, *Tinctura cantharidis*.

TINCTURA MOSCHI, *Tincture of Musk, Essence of Musk*. (*Mosch.* in pulv. redact. ʒij, *sp. vini rect.* Oj.) Dose, f. ʒj to f. ʒiv.

TINCTURA MYRRHÆ, *Tincture of Myrrh, Simple Tincture of Myrrh*. (*Myrrhæ contusæ* ꝥiv, *alcohol* Oijj. Macerate for 14 days, and filter. *Ph. U. S.*) Tonic, deobstruent, antiseptic, and detergent. It is chiefly used in gargles, and applied to foul ulcers, spongy gums, &c.

*Hudson's Preservative for the Teeth and Gums* consists of *Tinct. myrrh.*, *tinct. cinch.*, *aq. cinnam.* aa ʒijj, *eau d'argusbusade*, ʒj, *pulv. gum. Arab.* ʒss. M.

TINCTURA NERVINA BESTUCHEFFII, *Tinctura seu alcohol sulphurico-æthereus ferri*—t. *Nervina Halensis*, *Tinctura seu alcohol sulphurico-æthereus ferri*—t. *Nervino-tonica*, *Lamotte's*, *Alcohol seu tinctura sulphurico-æthereus ferri*.

TINCTURA NUCIS VOMICÆ, *Tincture of Nux Vomica*. (*Alcohol*. s. g. .837, f. ʒj; *Dry Extract of Nux Vomica*, 3 gr.) Dose, gr. v to xxx in cases where the *nux vomica* is indicated.

TINCTURA OLEI MENTHÆ PIPERITÆ, *Tincture of Oil of Peppermint, Essence of Peppermint*. (*Ol. menthæ piperitæ*, f. ʒij, *alcohol*. Oj. Dissolve. *Ph. U. S.*) Dose, 5 drops, as a carminative. The TINCTURA OLEI MENTHÆ VIRIDIS, *Tincture of Spearmint, Essence of Spearmint*, is made in the same manner. *Ph. U. S.*

TINCTURA OPII, *Tincture of Opium, Liquid Laudanum, Theriaca celestis, Alcohol cum Opio, Tinctura Thebaïca, Tinctura Sedati'va*. (*Opii contriti* ʒijss, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) Nineteen minims contain about one grain of opium. Properties, those of opium. Dose, gr. xx to lx and more. By macerating the dregs remaining after making the *Tinctura Opii* in a solution of *Tartaric Acid*, a solution is obtained, which is said to be devoid of the exciting and constipating properties of the tincture of opium. Gray calls it *Haden's Liqueur Opii Sedati'vus*.

TINCTURA OPII ACETATA, *Ac'etated Tincture of Opium*. (*Opii* ʒij; *aceti*, f. ʒij; *alcohol*. Oss. Rub the opium with the vinegar; add the alcohol, and having macerated for 14 days, express and filter. *Ph. U. S.*) Twenty drops are equivalent to a grain of opium.

TINCTURA OPII AMMONIATA, *Ammoni'ated Tincture of Opium, Edinburgh Pægoric Elix'ir*. (*Flor. benz.*, *croci* aa ʒijj, *opii* ʒij, *ol. anisi* ʒss, *alcohol ammoniat.* f. ʒxvj. Digest. *Ph. E.*) f. ʒj contains one grain of opium. Used like the *Tinctura Camphora Composita*.

TINCTURA OPII CAMPHORATA, *Tinctura camphoræ composita*—t. *Plumbosa*, *Liquor plumbi subacetatis dilutus*.

TINCTURA QUASSIÆ, *T. Quassia excel'sæ, Tincture of Quassa*. (*Quassia rasur.* ʒij, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Tonic. Dose, f. ʒj to ʒij.

TINCTURA QUI'NIÆ SULPHATIS, *Tincture of Sulphate of Quinia*. (*Sulphate of Quinia*, gr. vj, *alcohol*, (.847) f. ʒj. M.) Dose f. ʒj to ʒiv, in the day.

A *Tinctura Cincho'niæ Sulphat'is* may be made in a similar manner.

TINCTURA RHABBARII, *Tinctura rhei*—t.

*Rhabbari composita, Tinctura rhei*—t. *Rhabbari vinosa, Vinum rhei palmati*.

TINCTURA RHEI, *T. Rhabarb'ari, T. Rhabbari spirituos'a, T. Rhei, T. Rhei palma'ti, Tincture of Rhubarb*. (*Rhei rad. concis.* ʒijj, *cardam.* cont. ʒss, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Stomachic or purgative, according to the dose employed: f. ʒj to ʒij as a stomachic; f. ʒiv to ʒj as a purgative.

TINCTURA RHEI COMPOSITA, *T. Rhabbari composita, Compound Tincture of Rhubarb*. (*Rhei rad. concis.* ʒij, *glycyrrhiz. rad.* cont. ʒss, *singib. rad. concis.*, *croci stigmat.* aa ʒij, *agua*, f. ʒxij, *sp. ten.* Oj. *Ph. L.*) Properties same as the last.

TINCTURA RHEI ET ALOES, *Tincture of Rhubarb and Aloes, Elix'ir sacrum*. (*Rad. rhei concis.* ʒxi, *aloes* ʒvj, *sem. cardam.* cont. ʒss, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) Properties like the last.

*Rymer's Cardiac Tincture* consists of an infusion of *Capsicum, Camphor, Cardamom seeds, Rhubarb, Aloes, and Castor* in *Proof Spirit*, with a very small quantity of *Sulphuric Acid*.

TINCTURA RHEI ET GENTIANÆ, *Tincture of Rhubarb with Gentian, Tinctura Rhei Amara*. (*Rhei* cont. ʒij, *gentian.* cont. ʒss, *alcoholis diluti* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Properties same as the last.

TINCTURA RHEI ET SENNÆ, *Tincture of Rhubarb and Senna, Warner's Gout Cordial*. (*Rhei* cont. ʒj, *senna* ʒj, *coriandr.* cont., *sanicul.* sem. cont. aa ʒj, *santal.* rasur. ʒij, *croci.*, *glycyrrhiz. rad.* aa ʒss, *ubar. passor.* acinis exemptis, *Mss, alcohol dilut.* Oijj. Macerate for 14 days; express, and filter. *Ph. U. S.*) Dose, f. ʒss to f. ʒij.

TINCTURA RHEI, *Tinctura rhei*—t. *Rhei amara, Tinctura rhei et gentianæ*—t. *Sacra, Vinum aloes*—t. *Saponis camphorata, Linimentum saponis compositum*—t. *Saponis et opii, Linimentum saponis et opii*—t. *Sedativa, Tinctura opii*.

TINCTURA SANGUINARIÆ, *Tincture of Bloodroot*. (*Sanguinar.* cont. ʒiv, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, 30 to 60 drops.

TINCTURA SAPONIS CAMPHORATA, *Linimentum saponis*.

TINCTURA SCILLÆ, *Tincture of Squill*. (*Scillæ exsiccata* ʒiv, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Dose, gr. xv to lx.

TINCTURA SENNÆ, *T. Senna Composita, Elix'ir Salut'is, Daffy's Elix'ir, Tincture of Senna*. (*Senna fol.* ʒijj, *Carui sem.* cont. ʒijj, *cardam. sem.* cont. ʒj, *ubarum passarum demptis acinis* ʒiv, *sp. ten.* Oij. *Ph. L. & D.*) Stomachic, carminative and cathartic. Dose, f. ʒij to f. ʒj.

TINCTURÆ SENNÆ ET JALAPÆ, *Tincture of Senna and Jalap*. (*Senna* ʒijj, *jalap. pulv.* ʒj, *coriandr.* cont., *carui* cont., aa ʒss, *cardam.* cont. ʒij, *sacch.* ʒiv, *alcohol dilut.* Oijj. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, f. ʒij to f. ʒj.

**TINCTURA SERPENTARIE**, *T. S. Virginiae*, *T. Aristolochiae Serpentariae*, *Tinctura of Snake-root*. (*Rad. serpent.* ℥ij, *sp. ten.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Tonic. Dose, f. ʒss to f. ʒij.

**TINCTURA STOMACHICA**, *Tinctura cardamomi composita*.

**TINCTURA STRAMONII**, *Tincture of Stramonium*. (*Stramon. sem.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, ten to twenty minims.

**TINCTURA STRYCHNIAE**, *Tincture of Strychnia*. (*Alcohol. s. g.* ʒ37. Oj, *strychniae gr.* iij.) Dose, 6 drops to ʒ4. Properties, those of strychnia.

**TINCTURA SEU ALCOHOL SULPHURICO-ÆTHEREUS FERRI**, *Gutta nervina*, *Liquor Anodynus Martialis*, *Alcohol æthereus ferratus*, *Naphtha Vitrioli Martialis*, *Solutio Muratis Ferrici aithærea*, *Spiritus sulphurico-æthereus Martialis*, *Tinctura nervina Hulensis*, *T. Tonico-nervi-na Halensis*, *Tinctura auriæra*, *T. nervina Bestucheffii*, *T. nervino-tonica (Lamotte's)*, *T. aethæra ferri*, *Ether Martialis*, *De La Motte's Golden Drops*, *Bestucheff's Nervous Tincture*, *Elixir d'or de M. le Général De La Motte*. An ethereal solution of muriate of iron. It is much used in gout, hypochondriasis, &c.

**TINCTURA SULPHURIS VOLATILIS**, *Liquor fumans Boylii*—t. Thebaica, *Tinctura opii*, *Vinum opii*.

**TINCTURA TOLUIFERÆ BAL'SAMI**, *Tincture of Balsam of Tolu*, *T. Balsami Tolutani*, *T. Tolutani*, (*Ph. U. S.*), (*Tolutan.* ʒjss, *alcohol.* ℞j.) Reputed to be expectorant and corroborant. Dose, f. ʒss to f. ʒj or more.

**TINCTURA TONICA NERVINA HALENSIS**, *Alcohol (seu Tinctura) sulphurico-æthereus ferri*.

**TINCTURA VALERIANÆ**, *Tincture of Valerian*. (*Valerian.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and strain. It may also be prepared by displacement. *Ph. U. S.*) Stimulant and antispasmodic. Dose, f. ʒss to ʒij.

**TINCTURA VALERIANÆ AMMONIATA**, *Ammoniated or Volatile Tincture of Valerian*, *T. Valerianæ Volatilis*. (*Valerianæ* cont. ℥iv, *sp. ammon. arom.* Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Like the former. Dose, f. ʒss to f. ʒij.

**TINCTURA VERATRIS**, *T. Veratri albi*, *Tincture of White Hellebore*. (*Rad. veratri alb.* cont. ʒviij, *alcohol. dilut.* Oijss. *Ph. E.*) Emetic and cathartic: but not very manageable. Dose, gr. v. to x.

**TINCTURA ZINGIBERIS**, *T. Amomi Zingiberis*, *Tincture of Ginger*. (*Zingib.* cont. ʒviij, *alcohol.* Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Stimulant and carminative. Dose, f. ʒss to f. ʒj.

**TINCTURE OF ACETATE OF IRON**, *Tinctura ferri acetatis*—t. of Aconite, *Tinctura aconiti*—t. of Balsam of Tolu, *Tinctura toluifera balsami*—t. of Bark, *Tinctura cinchonæ*—t. of Bark, ammoniated, *Tinctura cinchonæ ammoniata*—t. of Bark, compound, *Tinctura cinchonæ composita*—t. of Bark, Huxham's, *Tinctura cinchonæ composita*—t. of Bark, volatile, *Tinctura cinchonæ ammoniata*—t. of Belladonna, *Tinctura belladonnæ*—t. of Blistering Fly, *Tinctura*

*cantharidis*—t. Cardiac, *Rymer's*, *Tinctura rhei* et aloes—t. of Colchicum seeds, *Tinctura colchici*—t. of Colombo, *Tinctura Calumbæ*—t. of Cubebs, *Tinctura cubebæ*—t. of Galls, *Tinctura gallarum*—t. of Ginger, *Tinctura zingiberis*—t. for the Gout, *Dr. Wilson's*, see *Colchicum autumnale*—t. Hatfield's, see *Tinctura guaiaci ammoniata*—t. of Hellebore, white, *Tinctura veratri*—t. of Hemlock, *Tinctura conii maculati*—t. of Henbane, *Tinctura hyoscyami*—t. of Hops, *Tinctura humuli*—t. of Iodine, compound, *Tinctura iodini composita*—t. of Iron, ammoniated, *Tinctura ferri ammoniata*—t. of Iron, muriated, *Tinctura ferri muriatis*—t. of Lobelia, *Tinctura lobeliæ*—t. of Ludwig, see *Ferrum tartarizatum*—t. of Lupuline, *Tinctura lupulinæ*—t. of Musk, *Tinctura moschi*—t. Nervous, *Bestucheff's*, *Tinctura seu alcohol sulphurico-æthereus ferri*—t. of Oil of Peppermint, *Tinctura Olei menthæ piperitæ*—t. of Oil of Spearmint, *Tinctura olei menthæ viridis*—t. of Opium, acetated, *Tinctura opii acetata*—t. of Orange peel, *Tinctura aurantii*—t. of Rhatany, *Tinctura krameris*—t. of Rhubarb, *Tinctura rhei*—t. of Rhubarb and aloes, *Tinctura rhei et aloes*—t. of Rhubarb and gentian, *Tinctura rhei et gentianæ*—t. of Rhubarb and senna, *Tinctura rhei et sennæ*—t. of Saffron, *Tinctura croci*—t. of Saffron, compound, *Tinctura de croco composita*—t. of Senna and jalap, *Tinctura sennæ et jalapæ*—t. of Snakeroot, *Tinctura serpentariæ*—t. of Soap, camphorated, *Liniementum saponis*—t. of Spanish Fly, *Tinctura cantharidis*—t. of Squill, *Tinctura scillæ*—t. of Steel, *Tinctura ferri chloridi*—t. Stomach, *Tinctura cardamomi composita*—t. of Stramonium, *Tinctura stramonii*—t. for the Teeth, *Greenough's*, see *Spiritus armoracis compositus*—t. Toothache, *Tinctura antidontalgica*—t. of Wormwood, compound, *Tinctura absinthii composita*.

**TINDER**, *Boletus igniarius*.

**TINEA**, *Porrigo*—t. *Faciei*, *Porrigo larvalis*—t. *Favosa*, *Porrigo favosa*—t. *Ficosa*, *Porrigo scutulata*—t. *Furfuracea*, *Porrigo furfuracea*—t. *Granulata*, *Porrigo scutulata*, *Porrigo lupinosa*—t. *Lactea*, *Porrigo larvalis*—t. *Lupina*, *Porrigo lupinosa*—t. *Mucosa*, *Porrigo lupinosa*—t. *Porriginosa*, *Porrigo furfuracea*—t. *Tondens*, *Porrigo decalvans*.

**TINKER'S WEED**, *Triosteum*.

**TINKLING, METALLIC**, *Tintement métallique*.

**TINNITUM METALLICUM**, *Tintement métallique*.

**TINNITUS AURIUM**, *Fluctuatio seu Sonitus aurium*, *Paracusis imaginaria*, *Susurrus aurium*, *Oscillus*, *Syringismus*, *Syringismus*, *Sibilus aurium*, *S. clangorosus*, *Streptismus* seu *Sibilismus aurium*, *Echos*, *Enechæma*, *Bombus*, *Murmur*, 'ringing of the ears,' from *tinnire*, 'to ring' (F.) *Tintement*, *Tintouin*, *Bourdonnement*, *Bruissement*. An imaginary sound, like the ringing of a bell, the noise of wind, the murmur of water, &c., heard in health and in sickness. It is, often, an accompaniment of cerebral disorder.

**TINTEMENT**, *Tinnitus aurium*—t. *Bullaire*, *T. métallique*.

**TINTEMENT MÉTALLIQUE (F.)**, *Tintement bullaire*, *Tinnimentum metallicum*, *Conor stethoscopæus*, *Metallic Respiration*, *Metallic Voice*, *Metallic Tinkling*. A particular noise, heard by the stethoscope when applied to the

chest, and which, according to Laënnec, resembles that caused by striking metal, glass, or porcelain, with a pin; but is, perhaps, more like the sound of the keys of a musical snuff-box. The *tintement métallique* or *metallic tinkling* is heard on causing the patient to speak or breathe; but is more distinct when he coughs. When the phenomenon is not so strongly marked, it produces only the *metallic resonance*. The 'metallic tinkling,' is a pathognomonic symptom of a communication between the bronchia and cavity of the chest; in other words, of *Pneumothorax*.

TINTINNABULUM, Uvula.

TINTOUIN, Tinnitus aurium.

TIPSARIA, Decoctum hordei.

TIRE-BALLE, Forceps (bullet.)

TIRE-FOND, (F.) A surgical instrument, formerly used to elevate the piece of bone sawed off by the trephine.

TIRE-PUS, Pylcon.

TIRE-TÊTE, (F.) A name given to different instruments used for extracting the head of the child when left in the uterus, and in certain cases of difficult labour. The crotchet is one of those, as well as the *Tire-tête à bascule* of Levret, &c.

TIRES, Milk sickness.

TISANE, *Ptisana* or *Ptisana*, *Ptisane*, from *πτισσα*, 'pearl barley,' itself from *πτισσα*, 'I decorticate.' A name given to aqueous medicines, containing but little, if any medicinal agent. The ancients gave the name particularly to the decoction of barley.

TISANE COMMUNE, Decoctum hordei.

TISSU, Tissue—*t.* *Accidental*, see *Accidental*—*t.* *Caverneux*, Cavernous texture—*t.* *Celluleux des os*, Cancelli—*t.* *Inodulaire*, Tissue, inodular—*t.* *Spongioïde*, Spongoid tissue.

TISSUE, *Texsus*, *Tela*, (F.) *Tissu*. By this term, in anatomy, is meant the various parts, which, by their union, form the organs; and are, as it were, their anatomical elements. General anatomy is the anatomy of the tissues, which are the seat of the investigations of the pathological anatomist. The best division, indeed, of diseases would be according to the tissues mainly implicated. For the elementary tissues, see *Fibre*. The compound tissues, which, by associating or combining variously, form every organ of the body, have been variously classed: but every division is imperfect and liable to objections. The following, by Messrs. Todd and Bowman, is one of the most recent.

TABULAR VIEW OF THE TISSUES OF THE HUMAN BODY.

TABULAR VIEW OF THE TISSUES OF THE HUMAN BODY.		<i>Examples.</i>	
1. Simple membrane, homogeneous, or nearly so, employed alone, or in the formation of compound membranes.	} Posterior layer of the cornea.—Capsule of the lens.—Sarcocolema of muscle, &c.		
2. Filamentous Tissues, the elements of which are real or apparent filaments.		} White and yellow fibrous tissues.—Aerolar tissue.	
3. Compound membranes, composed of simple membrane and a layer of cells of various forms, (epithelium or epidermis,) or of areolar tissue and epithelium.	} Mucous membrane.—Skin.—True or secreting glands.—Serous and synovial membranes.		
4. Tissues which retain the primitive cellular structure as their permanent character.		} Adipose tissue.—Cartilage.—Gray nervous matter.	
5. Sclerous or hard tissue.	} Bone.—Teeth.		
6. Compound tissues.			
a. Composed of tubes of homogeneous membrane, containing a peculiar substance.	} Muscle.—Nerve.		
b. Composed of white fibrous tissues and cartilage.		} Fibro-cartilage.	

TISSUE, ACCIDENTAL OR ADVENTITIOUS, consists of every substance—foreign to the primitive organization of the economy, but yet organized and living—which may be developed in the anterior or at the surface of organs. Laënnec divides the accidental tissues into two sections. 1. Those that resemble others in the animal economy, or *analogous accidental tissues*; and, 2. Those that have nothing analogous in the body, and which are always the result of a morbid process—the *heterologous* or *heteroclitæ accidental tissues*. To the first class belong, ossifications; accidental fibrous, fibro-cartilaginous, cartilaginous, cellular, and corneous tissues; hairs; the serous membranes of certain encysted tumours; the mucous membranes of fistulous canals, and accidental synovial membranes. To the second belong tubercles, scirrhi, melanosis, &c.

TISSUE, AREOLAR, Cellular tissue.

TISSUE, CARTILAG'INOUS, *Hymenochondroïdes* seu *Hymenochondroïdes* (*Textura* seu *Tela*.)

TISSUE, CRIBRIFORM, Cellular tissue—*t.* Fibrous, see *Fibrous*—*t.* Filamentous, Cellular tissue.

TISSUE, INOD'ULAR, *Tela inodularis*, (F.) *Inodule*, *Tissu inodulaire*. A name given by Delpech to an accidental fibrous tissue developed in suppurating wounds, which is the principal agent in cicatrization. It has, at first, the appearance of a reddish cellulo-fibrous layer; but soon loses its vascularity; and its fibres, which pass in all directions, become of a dull white colour, and of a consistence and hardness, that may be compared to those of the strongest articular ligaments. It is well seen in the cicatrix left after burns.

TISSUE, LAMINATED, Cellular tissue—*t.* Ligamentous, Desmoid tissue—*t.* Mucous, Cellular tissue—*t.* Porous, Cellular tissue—*t.* Reticulated, Cellular tissue.

TITHENE, Nurse.

TITHYMALUS, Euphorbia palustris—*t.* Cyparissia, Euphorbia cyparissias—*t.* Latifolius, Euphorbia lathyris—*t.* Paralias, Euphorbia paralias.

TITILLAMENTUM, Gargarism.

TITILLATIO, Tickling.

TITHE, Nipple.

TITTHON, Nipple.

TITTHIS, Nipple.

TITTHOS, Mamma, Nipple.

TITUBANTIA, *Bredouillement*.

TITUBATIO, Fidgets, Vacillatio.

TO-AND-FRO-SOUND, *Bruit de frottement*.

TOAD-FLAX, Antirrhinum linaria.

TOBACCO, Nicotiana tabacum—*t.* English, Nicotiana rustica—*t.* Indian, Lobelia inflata—*t.* Poison, Hyoscyamus niger—*t.* Wild, Lobelia inflata.

TOCETOS, Parturition.

TOCODOMYCODORITIS MALIGNA VAGINALIS, Colpocæ puerperarum.

TOCOLOGY, Obstetrics.

TOCOS, Parturition.

TODDY TREE, Mamei.

TOE, Digitus pedis.

TOEPLITZ, see *Toplitz*.

TOFUS, Tophus.

TOILE D'ARAIGNEE, Araneæ tela—*t.* *Choroidienne*, see *Choroid*—*t.* *de Gaultier*, Spadradrupum Galteri.

TOKAS, Puerpera.

TOKOLOGY, Obstetrics.

TOLA, Tonsil.

TOLES, Tonsil.

TOLIUM, Tonsil.

TOLLES, Tonsil.

TOLLUM, Tonsil.

TOLUIFERA BAL'SAMUM, *Myroxylon Toluiferum*. Family, Terebinthaceæ. Sex. Syst. Decandria Monogynia. The name of the tree which affords the *Balsam of Tolu*, *Balsamum Tolut'num*, *Tolut'num*, (Ph. U. S.), *Toluiferæ Balsami Balsamum*, *Goac'onaz*, *Red Balsam of Peru*, (F.) *Baumo de Tolu*, *B. de Carthagæno*. It has a very fragrant odour, and warm, sweetish taste; is thick, and of a reddish-yellow colour. It is stimulant and expectorant, (?) and is used in coughs. It is chiefly, however, employed on account of its flavour.

TOLUTANUM, see *Toluifera balsamum*.

TOMATA, *Solanum lycopersicum*.

TOME, *Tom'us*, *τομή*, *τομός*, 'incision.' A common suffix, as in *Lithotomy*, *Bronchotomy*, &c.

TOME, Cut, Incision.

TOMEION, Knife.

TOMENTUM CEREBRI, from *tomentum*, 'a flock of wool.' The infinite number of small vessels which pass between the pia mater and convolutions of the brain. They enter the substance of the brain at right angles.

TOMEUS, Knife.

TOMIS, Scissors.

TOMOTOCIA, Cesarean section.

TOPE, *Tonus*, from *τείνω*, 'I stretch.' The state of tension or firmness proper to each organic tissue. It is the effect of tonicity.

TONE, Elasticity.

TONGA, see *Datura sanguinea*.

TONGRES, MINERAL WATERS OF.

The town of Tongres is about a league from Maestricht in the Low Countries. The springs, of which there are several, are chalybeate, containing carbonates of iron and magnesia.

TONGUE, Sax. *tunga*, (D.) *Tong*, *Lingua*, *Glossa*, *Glotta*, (F.) *Langue*. The tongue is a muscular, symmetrical, and very mobile organ; situate in the mouth, from the os hyoides and epiglottis to the incisor teeth. Its particular use is, to procure for us the sensation of savours; and it aids in the acts of sucking, mastication, deglutition, pronunciation, and ex-pu-tion. It has the shape of a pyramid, flattened above and below; rounded at its angles, and terminated, anteriorly, by a blunt point. Its upper surface, called the *dorsum*, is free, flat, and divided into two portions by a median furrow, *lin'ea medi'na*; at the posterior extremity of which is the *foramen cæcum* or *Fora-men of Morgagni*. The inferior surface is free, and covered by the mucous membrane on its anterior third and sides: but behind and in the middle it is attached to the lower jaw by means of the genio-glossus; and to the hyoides by the hyoglossus. Its margins are rounded; thick behind, thinner anteriorly. Its tip, or point, or dental extremity is rounded and free:—the root, base, or hyoid extremity, *Radix lin-guæ*, is continuous with the epiglottis and velum palati. It is very thick at the foramen cæcum; but thinner as it approaches the hyoid bone. The tongue is composed of muscles, and covered by a mucous membrane—*Periglottis*, *Involucrum linguæ*, *Membra'na seu Tu'nica*

*vagina'lis seu Cutis seu Epider'mis seu Tunica seu Involucrum mucosum seu Crusta villosa linguæ*—which forms also the frænum beneath the tongue. On this membrane are seen the different papilla. The nerves of this organ proceed from the inferior maxillary, glosso-pharyngeal and hypoglossal. The first and second are connected with taste; the last with the motions of the organ. Some recent observers, however, consider the glosso-pharyngeal to be the special nerve of gustation. The arteries are the lingual, from the external carotid; and the palatine and tonsillar, from the labial. The veins are the *superficialis linguæ*, *ranina*, *lingualis*, and *submental*. They open into those of the pharynx and larynx. Its lymphatic vessels pass into ganglia, situate at the edge of the hyoglossi muscles.

TONGUE, BLACK. A fever which prevailed in the western States in the winter of 1842-3; probably typhoid fever. According to some, an epidemic erysipelas.

TONGUE, HERNIA OF THE, Glossocele—t. inflammation of the, Glosstitis—t. Red, fever, see Typhus—t. Scraper, *Cure-langue*—t. Tie, see Ankyloglossum.

TONIC, *Ton'icus*. Same etymon as *Tone*. Relating to tone.

*Tonic*, *Ton'icus*, *Tono'ticus*, *Antasthen'icus*, (F.) *Tonique*, *Fortifiant*, in Therapeutics, means a medicine, which has the power of exciting slowly, and by insensible degrees, the organic actions of the different systems of the animal economy, and of augmenting their strength in a durable manner. Bitter, vegetable substances which are not associated with an acrid or narcotic principle; preparations of iron; cold water, &c., act as tonics. They are also called *Comfortan'tia*, *Confortati'va*, *Corroboran'tia*, *Con-firman'tia*, *Roboran'tia*, &c.

The following are the chief Tonics:—Acidum Arseniosum, Acidum Nitricum, Acidum Sulphuricum, Argenti Nitras, Bismuthi Subnitras, Carbo Ligni, Cascariilla, Cinchona, Cinchona, Colomba, Cornu Florida, Cupri Acetas, Cupri Sulphas, Cuprum ammoniatum, Cusparia, Eupatorium perfoliatum, Ferri Præparata, Gentiana, Liriodendron, Lupulina, Piperina, Prunus Virginiana, Quassia, Quinia, Salix, Salicina, Serpenteria, Zinci præparata.—Aque minerales acidulæ et ferruginæ, Mental Tonics, (Confidence, Hope, Amusement.)

TONIC POWER, Irritability.  
TONIC SPASM, *Spasmus ton'icus*, *Convul'sio tonica*, *Conductio*, *Spas'ticus*, *Tonos*, *Ento'mia*, *En'tasia*, *Enta'sia*. A rigid contraction of muscles without relaxation, as in trismus, tetanus, &c. See Tetanus and Spasm.

TONICITY, *Tonic'itas*. The faculty that determines the general tone of the solids. Excessive tonicity causes *or'ethism* or *crispness*; deficient tonicity, *atony* or *weakness*. Tonicity has been used in the same sense as irritability.

TONIQUE, Tonic.

TONOS, Tonic spasm—t. Trismus, Trismus.

TONOTICUS, Tonic.

TONSIL, *Tonsil'la*, *Amygdala*, *Parist'h'mia*, *Parist'h'mium*, *Amphibranchium*, *Glandula colli*, *Tola*, *Tolles*, *Toles*, *To'ium*, *Tollum*, *Spongus*, *Ant'ias*, Pl. *Anti'ades*, *Almond of the ear*, *Almond of the throat*, (F.) *Amygdale*, *Tonsille*. An ovoid follicle, about half an inch in length, similar in shape to an almond, and situ-

ate, on each side, between the pillars of the velum palati. The inner surface, projecting into the isthmus of the throat, is covered by the mucosa membrane, in which are the orifices of a dozen cells, whence a transparent, viscid mucus oozes on pressure. This mucus is destined to facilitate deglutition, by lubricating the isthmus faucium; and is forced out during the passage of the alimentary bolus.

TONSILLÆ PESTILENTES, Cynanche maligna.

TONSILLARUM GANGRÆNA, Cynanche maligna.

TONSILLE, Tonsil.

TONSILLITIS, Cynanche tonsillaris.

TONSORIUS CULTER, Razor.

TOOTH, Sax. *toe*, *Dens*, *Odous*, (F.) *Dent*.

The teeth, *Dentes*, *Mord'icas*, are small, hard bones, fixed in the alveoli of each jaw, and serving to lay hold of, and to cut, tear, and triturate alimentary substances. True teeth are found only in man, the mammalia, reptiles, and fish. The teeth have, in general, the shape of an irregular cone, the base of which is towards the interior of the mouth; and the apex, single or divided, towards the bottom of the alveoli. Each tooth has a part situate out of the alveolus, and covered by a vitriform substance. This part is called the *corona* or *corona*. It is bounded by a narrower portion, called the *cervix*, (F.) *collet*, which separates it from the portion in the alveolus—the *fang* or *root*, (F.) *racine*. In the adult, the teeth are 32 in number; 16 to each jaw: these consist of 4 *incisors*, 2 *canino*, 4 *bicuspidati*, and 6 *molars*. (See these various terms.) The teeth enclose a vascular and nervous pulp, in a central cavity, *Cavitas Pulpæ*, *Cavum Dentis*, *Antrum dentale*. They are formed of a very hard, compact tissue; and the corona is covered by a vitreous substance called *Enamel*. The incisor and canine teeth are developed by a single point of ossification, the lesser molares, by two; and the larger by four or five. See Dentition. Researches by Retzius, Müller and others, have shown that the ivory or *Dentine*, *Substantia ossea* of Malpighi, of the tooth consists of tubular fibres, which contain organic deposits of calcareous salts; and of intertubular substance, in which are observed corpuscles or osseous cells of the tooth, called by Professor Owen *calcig'erous cells*, which also contain earthy salts. At the part where the enamel terminates at the cervix of the tooth, the *crusta petrosa*, *comentum*, or cortical substance, commences in an extremely thin stratum, passes down and gradually increases in thickness towards the extremity of the root, where it is generally the thickest. It is said by Nasmyth to have been traced on the enamel, and Purkinje and Fränkel found it lining the cavitas pulpæ. They gave it the name *Substantia ostioides*. It is the *mat'riata'rea* of Malpighi. In the compound teeth of the herbivorous animal, a deposition is found on the surface of the enamel, which has been called *cementum*. Müller, however, regards it to be a deposit from the salts and the saliva, and to be essentially the same as what is called tartar in the human subject.

TOOTHACHE, Odontalgia—t. Bush, *Xanthoxylum fraxineum*—t. Tree, *Aralia spinosa*, *Xanthoxylum clava Herculis*.

TOOTH EDGE, *Agacement des dents*, Hæ-

modia—t. Paste, Dentifricium—t. Rash, Strophulus—t. Shell, dog-like, Dentalium.

TOPHACEOUS CONCRETION, Tophus.

TOPHUS, *Tofus*, *Osteo'ophus*, *Tophæ'ceous Concretion*. A collection of hard, calcareous matter, which forms, particularly, at the surface of joints affected with gout; (see Calculi, arthritic,) and occasionally, in the interior of organs, around the teeth, &c. It likewise meant gravel.

TOP'IC, *Topical*, *Top'icus*. A local application; (F.) *Topicus*. See Local.

TOPICUS, Local.

TOPINARIA, Talpa.

TOPIQUE, Topic.

TÖPLITZ or TEPLITZ, MINERAL WATERS OF. Töplitz is a town of Bohemia, celebrated for its numerous thermal springs. The water contains chloride of sodium, carbonate, and sulphate of soda; and carbonates of lime and iron, &c. Temp. 114° to 122° Fahr.

TÖPLITZ, Töplitz.

TOPOGRAPHICAL ANATOMY, see Anatomy.

TORCULAR, Tourniquet.

TOR'ULAR HEROPH'ILI, The *Press of Heroph'ilus*, *Lechene'on*, *Lenos*, *Lenum*, *Fourth Sinus*, (F.) *Confluent des Sinus*, *Pressoir d'Herophile*. A smooth and polished cavity, of irregular shape, in which several sinuses of the dura mater meet. It is situate before the internal occipital protuberance, at the union of the three great duplicatures of the dura mater. It has six openings into it—one above, that of the superior longitudinal sinus; two below, answering to the occipital sinuses; one anterior, belonging to the straight sinus; and two lateral, and very broad, which lead into the lateral sinuses; and convey from the cavity the blood that has been poured into it by the others.

TORCULUM, Tourniquet.

TORDYLUM OFFICINALE, *Ses'eli Cret'icum*, (F.) *Séseli de Crète*. *Family*, Umbelliferæ. *Ses. Syst.*, Pentandria Digynia. The seeds and roots of this Southern European plant are considered carminative and diuretic. They enter into the theriaca.

TORENIA ASIATICA, *Cala-dolo*. A small Malabar plant, the juice of whose leaves, sweetened with sugar, is said to cure gonorrhœa.

TORMENTIL, *Geranium maculatum*, *Tormentilla*.

TORMENTIL'LA, *T. erecta*, *Potentill'a tormentill'a*, *Common Tormentil*, *Upright Sept-foil*, *Heptaphyllum*, *Consolida rubra*, (F.) *Tormentilla*. *Family*, Rosacæ. *Ses. Syst.* Icosandria Polygynia. The root has a slightly aromatic odour; and austere, styptic taste. It is astringent. Dose, of the powder, gr. x. to ʒj.

TORMENTUM, Ileus, Intussusceptio.

TOR'MINA, *Strophos*, *Colic'al'gia*, *Encal'al'gia*, *Anil'ema*, *Anil'esia*, *Gripes*, *Mulligrubs*, (F.) *Tranchées*. Acute colicky pains. Dysentery.

TORMINA CELSI, Dysentery—t. Parturientium, Pains, labour—t. Post partum, see Pains, labour.

TORNACULUM, Tourniquet.

TOROSITAS, *Corpulent'ia carno'sa*, *Hab'itus athlet'icus*. Muscular strength, from *torosus*, 'brawny,'—*tori*, 'brawn.'

TOROSUS, Muscular.

TORPEDO, Narcosis.

TORPEFACTIO UNIVERSALIS, Holonarcosis.

TORPIDITAS, Torpor.

TORPIDUS, Narcotized.

TORPOR, *Torpiditas*, *Noth'rotas*, *Parap'is capers*, (F.) *Engourdissement*, from *torpere*, 'to be numbed.' State of a part which becomes numb, and almost incapable of motion. It is also applied to a debilitated, sluggish condition of a part or of the whole of the body; *Aër'gia*, (F.) *Accablement*.

TORPOR, Narcosis—t. of the Colon, see Colon, torpor of the—t. Intestinorum, Constipation—t. Soporificus, Nocar.

TORQUAY. A town in Devonshire, England, which, on account of the mildness of its climate, and its sheltered situation from the bleaker winds, is a frequent retreat for the phtisical invalid.

TORSION, *Torsio*. The act of twisting. Torsion of the extremities of bleeding vessels, *Angio'trophé*, until the blood ceases to flow, is sometimes used to arrest hemorrhage from divided vessels.

TORTELLE, Erysimum.

TORTICOLLIS, *Obstip'itas*, *Caput obstipum*, *Obsti'pa cervix*, *Obstip'itas capitis* seu *Collis*, *Collum obstipum*, *Trachel'agra*, *Enta'ria Lozia*, *Loz'ias*, *Cephaloz'ia*, *Ancylod'e'rt*, *Ancylod'ria*, *Rhabocra'nia*, *Auchenorrh'euma*, *Rheumatis'mus colli*, *Rh. Cervic'is*, *Stiffneck*, *Wry-neck*, (from *torquere*, *torturn*, 'to twist,' and *collum*, 'the neck.'). A variety of rheumatism, seated in the muscles of the neck, which prevents the motion of the head, and causes the patient to hold it inclined to the side affected. It is, commonly, of short duration; usually disappearing in a few days. Rubefacients are the best topical applications. The term is also applied to permanent contraction of the muscles of the neck, which causes the head to be held to one side. The remedy is the division of the contracted muscles.

TORTOISE, FRESHWATER, GREAT, *Hydraspis expansa*.

TORTUE, Testudo.

TORTURA ORIS, Canine laugh, Neuralgia faciei—t. Oris paralytica Linnæi, Paralysis, Bell's.

TORULA CEREVISIÆ, *Saccharom'ycetes*, *Mycoder'ma cerevisia*, *Cryptococ'cus ferment'um*, *Yeast plant*. One of the simplest forms of vegetation, capable, under favourable circumstances, of vegetating rapidly, and assisting in producing the fermentation of saccharine substances. The plant has been found in vomited fluids, and in fæces.

TORULUS GLANDIS, Crown of the glans.

TORUS, Muscle—t. Manûs, Metacarpus.

TOTA BONA, *Chenopodium bonus Henricus*.

TOTUM CARNOSUM, Pancreas.

TOUCH, *Tactus*, *Tactio*, *Hap'hé*, *Hapsis*, *Palpation*, (F.) *Toucher*. One of the five senses, and that which makes known to us the palpable qualities of bodies, such as their consistence, quality, &c. It is seated, particularly, in the hands; and differs from tact in being active.

TOUCH-ME-NOT, *Impatiens fulva*.

TOUCH, ROYAL. It was at one time universally believed, in England, that the Royal touch would remove *Scrofula* or *King's Evil*, (as it

was thence called.) This superstition is now entirely exploded. Edward, the Confessor, was the first English king who touched for the Evil.

TOUCHER, *Esaphe*, *Touch*.

TOUCHWOOD, *Boletus igniarius*.

TOUR DE MAÎTRE, *Coup de maître*.

TOURBILLON VASCULAIRE, *Vasa vasorum*.

TOURNESOL, *Heliotropium Europæum*.

TOURNIOLE, *Paronychia*.

TOURNIQUET, *Tor'cular*, *Tor'culum*, *Tornadulum*, *Præ'lium*, *Præ'lum*, *Præ'lum seu Prelum arteria'le*, *Verticil'lum*, *Fas'cia tortilis*, from (F.) *tourner*, 'to turn.' A surgical instrument for stopping the course of blood in the limbs, by exerting a strong compression upon the principal artery. It was invented by a French surgeon, Morel, in the middle of the 17th century; and was modified subsequently, by Nuck, Verduc, Monro, Petit, and Louis. It is used to suspend, for a time, the circulation in a limb, during great operations; to arrest arterial hemorrhage in cases of wounds; to compress certain aneurismal and other tumours, &c.

TOUS-LES-MOIS. A fecula obtained from the root of *Canna coccin'ea*. It resembles potato starch; and may be substituted for arrow root. It is obtained from St. Kitts.

TOUTE BONNE, *Salvia sclarea*.

TOUTE ÉPICE, see *Myrtus pimenta*—*Sains*, *Sanicula*.

TOUX, Tussis—t. *Bleue*, *Pertussis*—t. *Bronchique*, *Bronchial cough*, *Cough*, *tubal*—t. *Caverneuse*, see *Cavernous respiration*—t. *Convulsivo*, *Pertussis*—t. *Quintesse*, *Pertussis*—t. *Tubaire*, *Bronchial cough*, *Cough*, *tubal*.

TOXICAL, *Poisonous*.

TOXICATIO, *Poisoning*.

TOXICODENDRON, *Rhus toxicodendron*.

TOXICOHEMIA, from *τοξικον*, 'a poison,' and *αίμα*, 'blood.' *Poisoning of the blood*—*Piorry*.

TOXICOL'OGY, *Toxicolog'ia*, from *τοξικον*, (itself from *τοξον*, 'a bow,') 'a poison,' and *λογος*, 'a description.' *A treatise on poisons*.

TOXICOSES, (G.) *Toxikosen*, from *τοξικον*, 'a poison.' A family of diseases, according to the classification of Fuchs, caused by the reception of poisons into the system.

TOXICUM, *Poison*, *Venom*.

TRABECULA, *Corpus callosum*—t. *Willisii*, *Chordæ Willisii*.

TRABECULÆ CORDIS, *Columnæ carneæ*.

TRABES CORDIS, *Columnæ carneæ*.

TRABS, *Penis*—t. *Medullaris*, *Corpus callosum*.

TRACHE'A, (generally, however, accented *Trachea*.) *Trache'a arte'ria*, *Bronchus*, *As'pera arteria*, *Fistula spiritua'lis*, *F. pulmonalis*, *Canna*, *Syrin'ga*, *Syrinx*; the *Windpipe*, (F.) *Trachée artère*, from *τρυγος*, 'rough,' and *αερί'α*, 'artery,' composed of *air*, 'air,' and *tré'is*, 'to keep.' The trachea is a cylindrical, fibro-cartilaginous and membranous tube, flattened behind, and situate on the median line, before the vertebral column, from the inferior part of the larynx, as far as the third dorsal vertebra. There it divides into two branches, the *bronchia*, which separate to go to each lung. The trachea, the function of which is to convey air to the lungs during respiration, is composed, 1. Of cartilaginous rings, *An'nuli cartilagin'i*,

*Segmenta cartilaginea, Orbes cartilaginei*, incomplete behind; situate one above the other, and kept *in situ* by a fibrous membrane. 2. Of a mucous membrane, which lines it internally, and contains numerous mucous follicles. 3. Of transverse muscular fibres, not well marked, which occupy its posterior surface. 4. Of vessels, which proceed from the superior and inferior thyroidea; and, 5. Of nerves, that are given off by the pneumogastric and the cervical ganglia.

TRACHEA ARTERIA, Trachea.

TRACHEAL, *Trachealis*. An epithet applied to the respiration as heard through the stethoscope opposite the trachea, larynx, and root of the bronchia: the air appearing as if sucked in from the cylinder during inspiration, and expelled during expiration.

TRACHEÆ ARTÈRE, Trachea.

TRACHEITIS, Cynanche trachealis.

TRACHELAGRA, Torticollis.

TRACHELIAN, Cervical.

TRACHELITIS, Cynanche trachealis.

TRACHELIUM AMERICANUM, *Lobelia cardinalis*.

TRACHELO-AILOIDO-OCCIPITAL, *Obliquus superior capitis*—*t. Ailoido-basilaire*, *Rectus capitis lateralis*—*t. Basilaire*, *Rectus capitis internus major*—*t. Basilaire, petit*, *Rectus capitis internus minor*.

TRACHELO-DIAPHRAGMATIC, *Trachelo-diaphragmaticus*. The 4th pair of cervical nerves, whence the phrenic nerve chiefly arises.—*Chaussier*.

TRACHELO-MASTOÏDIEN, Complexus minor—*t. Occipital*, Complexus—*t. Phyma*, *Bronchocele*—*t. Scapulaire*, *Levator scapulae*.

TRACHELOS, Collum.

TRACHEOCÈLE, Bronchocele.

TRACHEOPHONY, Laryngophony.

TRACHEOPHYSIS, see *Phthisis laryngica*.

TRACHEORRHAGIA, *Hæmoptoë* seu *Hæmoptysis laryngea et trachealis*, from *τράχμα*, 'the trachea,' and *αἵμα*, 'to break forth.' Hemorrhage from the trachea.

TRACHEOTOMY, see *Bronchotomy*.

TRACHITIS, Cynanche trachealis.

TRACHOMA, *Aspre'do*, from *τράχος*, 'rough.' *Granular conjunctiva, granular eyelid*, (F.) *Asperité des Paupières*. A roughness of the inner surface of the eyelids; granular eyelids. A variety of ophthalmia, of which three kinds have been designated:—*T. Sabulo'sum*, from sand, &c., getting between the eyelids; *T. carunculo'sum*, *Phadaro's des*, *Phadaro'sis*, *Morum palpebræ internæ*, from fleshy excrescences; and *T. herpeticum*, from hard pustules on the inner surface of the eyelids. This last is also called *Fieo'sis*, and *Palpebra fœca*.

TRACTATIO MANUARIA, Surgery.

TRACTORATION, Perkinism, see *Tractors*, metallic.

TRACTORS, METALLIC. Metallic agents, introduced by Dr. Elisha Perkins, of Connecticut, about the end of the last century, to cure diseases. The parts were rubbed with these tractors, and hundreds of thousands of cases were reported to have been cured by the *tractoration*. The affections, in which they were chiefly used, were local inflammations, and pains in different parts. The good effects

were, doubtless, owing to the influence exerted by the mind over the body. The bubble did not exist long. See *PERKINISM*.

TRACTUS INTESTINORUM, Intestinal Tube—*t. Respiratorius*, Respiratory tract.

TRAGACANTHA, *Gummi Tragacantha*, *G. Astragal'i Tragacantha*, *Gum Tragacanth*, *Gum Dragon*; the concrete juice of the *Astragalus Tragacantha* or *Astragalus verus*, a native of Persia. *Family*, Leguminosæ. *Sex. Syst.* *Diadelphia Decandria*. (F.) *Gomme Adragant*, *Adragant*. This gum is inodorous; nearly insipid; of a whitish colour; semi-transparent, and striated. It is in thin, vermiform pieces; and does not form a smooth, uniform mucilage with water. It is demulcent, but is rarely used alone.

TRAGEA AROMATICA, Pulvis cinnamomi compositus.

TRAGICUS, *Tragien*, (Ch.), from *Tragus*. A small, flat, triangular muscle, which almost wholly covers the outer surface of the tragus, arising from its base, and terminating at the top of the eminence.

TRAGIEN, *Tragicus*.

TRAGOMASCHALIA, *Tragomas'chall*, from *τράγος*, 'a goat,' and *μασχάλη*, 'axilla.' The strong, unpleasant odour of the armpits.

TRAGOPHONIA, Egophony.

TRAGOPO'GON, from *τράγος*, 'a goat,' and *πυγών*, 'beard.' A genus of plants; *Family*, *Cichoraceæ*. *Sex. Syst.* *Syngenesia Polygamia Æqualis*. (F.) *Barbe de Bouc*; of which the roots of the *Tragopogon porrifolium*, *Salsif*, *Oyster root*, and the young shoots of the *T. pratensis*, *Meadow Salsif*, or *Common Goat's Beard*, (F.) *Salsifs des prés*, are eaten as food. The root of the latter has been used as a diuretic.

TRAGOSELINUM, *Pimpinella saxifraga*—*t. Majus*, *Pimpinella magna*.

TRAGUS, *τράγος*, 'a goat;' from its being furnished, in some persons, with hair, like the beard of a goat; *Hircus*, *Hirquus*. A small, flattened, triangular nipple, situate before the meatus auditorius externus, which it appears to conceal. It is covered with hair in old people, whence its name. Also, the peculiar goat-like smell of the axillæ.

TRAGUS MATTHIOLI, *Salsola kali*.

TRAINASSE, Polygonum aviculare.

TRAMIS, Perinæum.

TRANÇE, Catalepsy, Ecstasis.

TRANCHÉES, *Tormina*—*t. Uterines*, Pains, after.

TRANSFIGURATIO, Transformation.

TRANSFORMATION, *Transforma'tio*, *Transfigura'tio*, *Transmuta'tio*, *Metab'olè*: from *trans*, 'beyond,' and *forma*, 'form.' Change of form.

TRANSFORMATION'S DE TISSU, (F.) The French pathologists designate thus the change that occurs in an organ, the tissue of which becomes similar to that of another organ. The chief transformations are cartilaginous, osseous, and adipous. See *Tissue*.

TRANSFUSION, *Transfusio*, from *transfundere*, (*trans*, and *fundere*, 'to pour,') 'to pour from one vessel into another.' *Transfusio San'guinis*, *Cura Medea'na*, *Methæmachym'ia*, *Hæmatometach'ysis*, *Hæmometach'ysis*, *Diach'ysis*, *Transplanta'tio Med'ica nova*, *Chirurg'ia transfusoria*, *Ezotichæmato'sis*. The act of passing the blood of one animal into the veins

of another; an operation which was formerly used to fulfil various therapeutical intentions. It has been revived in cases of uterine hemorrhage; and, apparently, with some success.

The operation can only be performed safely on animals having like kinds of blood. See Globule.

TRANSLATION, Metastasis.

TRANSMUTATIO, Transformation.

TRANSPIRATIO, Perspiration—t. Unilatera, Hemidiaphoresis.

TRANSPANTATIO, *Metaphysei'a*. A pretended method of curing diseases, devised by Paracelsus—by making them pass from one individual to another, either animal or vegetable.

TRANSPLANTATIO, Morioplastice—t. Medica nova, Transfusion.

TRANSPLANTATIO DENTIS, *Insit'io dentis*. The act of transplanting a tooth from one person to another.

TRANSPORT, Delirium.

TRANSPPOSITIO, Metathesis.

TRANSPPOSIT'ION, *Transpositio*, from *trans*, 'over,' and *ponere*, 'to put; *Metath'esis*. Change of situation.

TRANSPOSITION OF THE VISCERA, *Polype'ria promiscua translati'va*, is a congenital vice of conformation, which consists in the viscera being found out of the situations they ordinarily occupy: the heart, for example, being on the right side; the liver on the left, &c.

TRANSUDATIO, Diapedesis.

TRANSUDATIO'N, *Transudatio*, from *trans*, 'through,' and *sudare*, *sudatum*, 'to sweat.' The passage of a fluid through the tissue of any organ, which may collect in small drops on the opposite surface, or evaporate from it.

TRANSUDATION, Exomose.

TRANSVERSAIRE EPINEUX, *Transversalis dorsi*—t. *Epineux du cou*, *Semispinalis colli*—t. *Grêle*, see *Sacro-lumbalis*—t. *Epineux du dos*, *Semispinatus dorsi*.

TRANSVERSAL DE LA CONQUE, *Transversalis auris*—t. *du Nez*, *Compressor nasi*—t. *des Orteils*, *Transversus pedis*.

TRANSVERSALIS, *Transverse*.

TRANSVERSALIS ABDOM'INIS, (F.) *Lombo-abdominal*, (Ch.), *Transverse de l'Abdomen*. This muscle is seated, deeply, on the lateral parts of the abdomen. It is flat, thin, and broader before than behind. It is attached, above, to the cartilage of the last true rib, and to those of every false rib; and, below, to the inner lip of the crista of the ilium; to the two outer thirds of the crural arch, and to the upper part of the pubis. Its fibres, moreover, are inserted, behind, by means of broad aponeuroses, into the top of the transverse and spinous processes of the first four lumbar vertebræ; and, before, into the linea alba, and the ensiform cartilage. This muscle, all of whose fibres have a transverse direction, constricts the belly, and diminishes the base of the chest, by drawing inwards the ribs to which it is attached.

TRANSVERSALIS ANTIQUS PRIMUS, *Rectus capitis lateralis*—t. *Collateralis colli*, see *Sacro-lumbalis*.

TRANSVERSALIS COLLI, *Transversalis Major colli*, *Portion of the Sacro-spinal* (Ch.), (F.) *Transversaire*. A muscle, seated at the posterior and lateral part of the neck and upper

part of the back. It is attached to the transverse processes of the 5 or 6 lowest vertebræ of the neck; and to those of the 4 or 5 first dorsal. It extends the vertebræ of the neck, and inclines them to its side.

TRANSVERSALIS COLLI, *Semi-spinalis colli*.

TRANSVERSALIS DORSI, *Transverso-spinalis*, *Multifidus Spinae*, *Lumbo cervical portion of the Spinal*, (Ch.) (*Transverso-spinalis Lumbo'rurum*, *Transverso-spinalis Dorsi*, *Transverso-spinalis Colli*.) *Musculus sacer*, *Spinalis u transversales lumborum*, *Semi-spinalis internus*, sive *Transverso-spinalis colli pars interna*, (Winslow), *Lombo-dorsi-spinal*, &c., (F.) *Transversaire epineux*. This muscle, usually called by English anatomists, *Multifidus spinae*, and including all the *transverso-spinalis*, is situate in the vertebral gutters, extending from the posterior part of the sacrum to the second cervical vertebræ. It is thicker in the neck and loins than in the back and behind the sacrum. Its use is—to straighten the vertebral column, and to impress upon it a slight rotary motion.

TRANSVERSALIS NASI, *Compressor nasii*.

TRANSVERSARIUS, *Transverse*.

TRANSVERSE, *Transversus*, *Transversalis*, *Transversarius*, from *trans*, 'over,' and *vertere*, 'to turn.' That which runs across: also, that which relates to the transverse processes of the vertebræ.

TRANSVERSE ARTERY OF THE FACE, arises from the temporal; passes transversely across the face, in front of the condyle of the lower jaw, and gives its branches to the different muscles of the cheek.

TRANSVERSE FISSURE, see *Liver*—t. *Ligament of the Atlas*, *Annular ligament*.

TRANSVERSE PERINEAL ARTERY, *Urethro-balbar* (Ch.), is given off from the upper branch of the internal pudic; and passes inwards and forwards above the transversus perineæ muscle as far as the bulb of the urethra, into which it dips;—subdividing into numerous branches.

TRANSVERSE PROC'ESSES OF THE VER'TEBLE, (F.) *Apophyses transverses des vertèbres*, are the bony eminences that jut out transversely and posteriorly from the sides of the vertebræ.

TRANSVERSE SUTURE, *Sutura transversalis*, runs across the face, and sinks into the orbit: joining the bones of the skull to those of the face, but with so many irregularities and interruptions, that it can scarcely be recognised as a suture.

TRANSVERSE DE L'ABDOMEN, *Transversalis abdominis*—t. *de l'Oricule*, *Transversus auris*—t. *du Périnée*, *Transversus perineæ*.

TRANSVERSO-SPINAL, *Semi-spinalis colli*, *Semi-spinalis dorsi*—t. *Spinalis*, *Transversalis dorsi*—t. *Spinalis colli*, *Semi-spinalis colli*—t. *Spinalis dorsi*, *Semi-spinalis dorsi*.

TRANSVERSUS AURIS MUSCLE, (F.) *Transverso de l'Oricule*, (Ch.) *Transversal de la Conque*, is often wanting. It is formed of some transverse fibres, situate transversely, behind the projection of the helix which divides the concha into two portions.

TRANSVERSUS PEDIS, *Scandalaris*, (F.) *Transversal des Orteils*, *Mittatars-sous-phalangien transversal du premier orteil*, (Chaus-sier.) A muscle, which arises by fleshy slips from the heads of the metatarsal bones of the three outer toes. Its tendon is inserted into the

base of the first phalanx of the great toe, being blended with that of the adductor pollicis.

**TRANSVERSUS PERINEI**, *Levator Ani parvus*, *Ischio-perineal*, (Ch.), (F.) *Transverse du Périnée*, is placed at the posterior part of the perineum. It is thin, triangular, and situate transversely. Its external extremity is attached to the ramus and tuberosity of the ischium: its inner extremity is confounded with its fellow of the opposite side, and with the anterior part of the sphincter ani and posterior part of the bulbo-cavernosus. The use of this muscle is,—to compress the urethra, and to support the rectum and bladder. To a fasciculus of this muscle, Santorini has given the name *Urethra Elevator* seu *Ejaculator*.

**TRANSVERSUS PERINEI ALTER**, *Prostaticus inferior*. A small muscle which occasionally accompanies the last.

**TRAPA NATANS**, (F.) *Macre flottante*, *Noix d'Eau*, *Chataigne d'Eau*. *Sex. Syst.* Tetrandria Monogynia. The plant which affords the *Nucis Aquaticæ*, *Tribuli aquatici*, *Cal-trops*. The nut is considered nutrient and demulcent, and is said to be useful in diarrhœa from abrasion of the bowels, and in calculus. A poultice is sometimes made of it to discuss hard and indolent tumours.

**TRAPEZE**, Trapezium, Trapezium.

**TRAPEZIUM**, OS, *ῥαπεζιον*. So called from its shape. *Os multangulum majus*, (F.) *Os trapèze*. The first bone of the second row of the carpus. It is articulated, above, with the scaphoides; below, with the first bone of the metacarpus; within, with the trapezoides, and second metacarpal bone. Anteriorly, posteriorly, and externally, it gives attachment to ligaments.

**TRAPEZIUS**, *Cucullaris*, (F.) *Dorso-sus-acromien*, (Ch.), *Trapèze*, *Capuchon*. A muscle, seated at the posterior part of the neck and shoulder, and at the upper part of the back. It has the shape of a trapezium; is attached, on the one hand, to the inner third of the upper curved line of the occipital bone; to the posterior cervical ligament; to the spinous process of the 7th cervical vertebra; and to those of all the dorsal vertebra; and, on the other hand, to the spine of the scapula; the acromion and the outer third of the posterior margin of the clavicle. Its upper fibres are situate obliquely downwards and outwards; the transverse and inferior, obliquely outwards and inwards. This muscle elevates the shoulder; carries it backwards, or depresses it, according as its upper, middle, or lower fibres contract separately. It straightens the head, also, and inclines it to one side.

**TRAPEZOID LIGAMENT**. The anterior part of the coraco-clavicular ligament. It is a very strong, fibrous fasciculus, which has the shape of a trapezium, and is situate obliquely, between the acromion process and clavicle.

**TRAPEZOIDES**, OS, *Os multangulum minus*, *Os pyramidale carpi*, from *ῥαπεζιον*, 'a trapezium,' and *ειδος*, 'shape or resemblance.' The second bone of the second row of the carpus,—so called from its shape. It is smaller than the trapezium, on the inside of which it is situate. It is articulated, above, with the os naviculare; below, with the second metacarpal bone; on the outside, with the trapezium; and internally with the magnum. An-

teriorly and posteriorly, it affords attachment to ligaments.

**TRAUBENCUR**, Grape cure.

**TRAULISMUS**, see Balbuties and Blassitas.

**TRAULOTES**, see Blassitas.

**TRAUMA**, Wound.

**TRAUMATIC**, *Traumaticus*, *Vulnerarius*; from *τραυμα*, 'a wound.' Any thing relating to a wound.

**TRAUMATICA**, Detergents.

**TRAUMATICUS**, Traumatic, Vulnerary.

**TRAUMATOPYRA**, *Fobris traumatica*; from *τραυμα*, 'a wound,' and *πυρ*, 'fire.' A wound fever, or fever consecutive to a wound.

**TRAVAIL D'ENFANT**, Parturition.

**TRAVELLER'S JOY**, Clematis vitalba.

**TREACLE**, Melasses, Theriaca—t. English, Teucricum chamædrys—t. Venice, Theriaca.

**TREAD**, Cicatricula—t. of the Cock, Mole-cule.

**TREE**, ELK, *Andromeda arborea*—t. of Life, *Thuya occidentalis*—t. Sour, *Andromeda arborea*.

**TREFLE D'EAU**, *Menyanthes trifoliata*.

**TREFOIL**, *Hepatica triloba*—t. Bean, stinking, *Anagyris*—t. Marsh, *Menyanthes verna*—t. Sour, *Oxalis acetosella*—t. Water, *Menyanthes trifoliata*.

**TREMA**, Foramen.

**TREMBLEMENT**, Tremor—t. *Métallique*, see Tremor.

**TREMBSLES**, Milk-sickness.

**TREMBLING**, Tremor.

**TREMOR**, *Trepidatio*, *Synclonus Tremor*, *Tromus*, *Trembling*, (F.) *Tremblement*, from *tremere*, 'to tremble.' Involuntary agitation of the body, or of some part of it, without any obstacle to voluntary motion. It depends, generally, upon debility of the muscular, or of the nervous system; and, hence, is observed in convalescence, and in typhoid affections. It occurs, also, in old people; in hard drinkers; workers in mercury, lead, &c.: in the last case, it is called by the French, *Tremblement métallique*, *Tremor metallicus*. Tremor seems to resemble paralysis more than convulsion. See Paralysis agitans and Pavitatio.

**TREMOR CORDIS**, Hippus, Palpitation—t. Metallicus, see Tremor.

**TREPAN**, *Trep'anum*, *Terebel'la*, *Trip'anon*, *Peroter'ium*, *Peroter'ium*, *Serraversat'ilia*, *Chan'icis*, *Chaniscion*, *Ter'ebra*, *Ter'etron*, *Teretrium*, *Vertib'ulum*, *Trypanon*, (F.) *Trep'an*, from *ῥηπεω*, 'I perforate.' A surgical instrument resembling a wimble, and worked in the same manner. It is used for removing portions of bone, and particularly of the bones of the skull. The term *trep'an* is given more particularly to the part of the instrument that makes the perforation. The handle is so constructed as to receive different bits, as the Crown, the *Trep'an perforatif* or *Perite'riion*, the *T. exfoliatif* or *Desquamato'rium trep'anum*, and the *T. abaptis'ta*.

In Great Britain and the United States, this instrument has been superseded by the trephine, which is more manageable.

**TREPANATIO**, Trepanning.

**TREPANATION**, Trepanning.

**TREPANNING**, *Terebra'tio*, *Anatr'esis*, *Cephalotripe'sis*, *Trep'ana'tio*, *Trype'sis*, *Tresis*, *Pri'sis*, *Prismus*, *Fora'tio*, (F.) *Trep'anation*. Same etymon. The methodical application of the trepan.

TREPANON, Trepan.  
TREPANUM, Trepan.

TREPHINE. The instrument which has replaced the trepan in some countries. It consists of a simple, cylindrical saw; with a handle placed transversely like that of a gimlet, and from the centre of the circle, described by the teeth of the saw, a sharp little perforator projects, called the *Centrepin*. The centrepin is capable of being removed, at the surgeon's option, by means of a key for the purpose. It is used to fix the instrument until the teeth of the saw have made a circular groove, sufficiently deep for it to work steadily. The pin must then be removed. Sometimes the pin is made to slide up and down, and to be fixed in any position, by means of a screw.

TREPHOSA, Nurse.

TREPIDATIO, Tremor—t. Cordis, Cardiotromus.

TREPONDO. A weight of three pounds.—Scribonius.

TRE'SIS, *τρησις*, from *τρησις*, 'I bore.' Properly, a perforation. A wound. A forcible solution of continuity in a soft part, commencing externally. A genus in the nosology of Godd.

TRESIS, Trepanning, Wound—t. Causis, Burn—t. Punctura, Puncture—t. Vulnus, Wound—t. Vulnus laceratum, see Laceration—t. Vulnus simplex, Cut.

TRESSALLEMENT, Shuddering.

TRESSORIA, *Επιστόμιον, επιστομιον*. A term formerly applied to the hair covering the mons veneris, the absence of which has, by the vulgar, been esteemed a matter of reproach.

TRI, *τρι*, in composition, 'three.' Hence:

TRIANGLE MÉDULLAIRE, Fornix.

TRIANGULAR, *Trigonos, Triangularis*, from *tris*, for *tres*, 'three,' and *angulus*, 'an angle.' That which has three angles.

TRIANGULAR LIGAMENT OF INFRA-PUBIAN is a ligamentous fascia with short fibres, situate transversely beneath the symphysis pubis, which it strengthens.

TRIANGULARIS, Depressor anguli oris—t. Coccygis, Coccygeus—t. Nasi, Compressor naris.

TRIANGULARIS STERNI, *Sterno-costalis* (Ch.) *Pectoralis internus*. A muscle situate at the anterior and inner part of the chest, behind the cartilages of the 3d, 4th, 5th, and 6th true ribs. This muscle depresses the ribs and contributes to expiration.

TRIBAS, (F.) *Tribade*, from *τριβω*, 'I rub.' *Fricatrix, Fricatrix, Futu'tor, Mas'cula, Subagita'trix, Subig'ator*. A female whose clitoris is so large as to cause her to be regarded as a hermaphrodite.

TRIBULI AQUATICI, see *Trapa natans*.

TRIBUTUM LUNARE, Menses—t. Menstruum, Menses.

TRICÆ, Plica—t. Incuborum, Plica—t. Scroforum, Plica.

TRICAGO, Teucrium chamædrys.

TRICAUDALIS, Retrahens auris.

TRICEPS, from *tris* for *tres*, 'three,' and

*caput*, 'head.' A name given to muscles that have three fleshy bundles at one of their extremities.

TRICEPS ADDUCTOR FEMORIS. Under this appellation are comprehended three distinct muscles; *Adductor brevis, A. longus*, and *A. magnus*.

TRICEPS AURIS, Retrahens auris—t. Brachialis, Triceps extensor cubiti.

TRICEPS CRURIS, *Femoralis*, (F.) *Trifimorotulien* (Ch.), *Crural*, *Trifimoro-tibi-rotulien*, *Triceps crural*, *T. de la cuisse*, is situate at the anterior, inner, and outer part of the thigh. It is formed of three bundles at its superior extremity, viz. 1. A middle fasciculus (the *cruralis* of most anatomists.) 2. An external fasciculus (the *vastus externus*) and 3. An inner fasciculus (the *vastus internus*.) It is attached, above, to the anterior, inner, and outer surfaces of the femur, and to the two edges of the linea aspera, from the base of the trochanter to within four fingers' breadth of the knee. Below, it terminates by a large tendon, which is attached to the base and edges of the patella, as well as to the inner and outer tuberosities of the tibia. The triceps extends the leg on the thigh, and conversely.

TRICEPS DE LA CUISSE, Triceps cruris—t. *Crural*, Triceps cruris.

TRICEPS EXTENSOR CUBITI, *Triceps Brachialis*, (F.) *Scapulo-humero-olecranian* (Ch.), *Triceps brachial*. This muscle, which occupies the posterior part of the os humeri, is described as two muscles by Douglas, and as three by Winslow. It arises by three heads. The first or long head,—*long head of the biceps externus* of Douglas, *Anconeus major* of Winslow—arises from the anterior extremity of the inferior cost of the scapula, near its neck, and below the origin of the teres minor. The second head, or short head of the *biceps externus* of Douglas, *Anconeus externus* of Winslow, arises from the upper and outer part of the os humeri, at the base of the great tuberosity—and the third head—*Brachialis externus* of Douglas, *Anconeus internus* of Winslow, the shortest of the three, arises from the back part of the os humeri, behind the flat tendon of the latissimus dorsi. These three portions unite about the middle of the arm, so as to form one thick and powerful muscle, which is inserted at the upper part of the olecranon.—It extends the forearm on the arm, and conversely.

TRICEPS MAGNUS, Adductor magnus—t. Minor, Adductor longus femoris—t. Secundus, Adductor brevis.

TRICHÆ INCUBORUM, Plica.

TRICHANGIECTASIA, *Angiectasia, Trichocirsus*, from *τριχῆ*, *τριχος*, 'a hair,' *αγγιον*, 'a vessel,' and *εκτασις*, 'dilatation.' Morbid dilatation of the capillary vessels.

TRICHIA, Entropion.

TRICHI'ASIS, *Trichiosis*, *Trichosis*, from *τριχῆ*, *τριχος*, 'hair.' *Morbus pilaris*. This name has been given to several affections. 1. To a disease of the kidneys or bladder, in which filamentous substances, resembling hairs, are passed in the urine. This is also called *Pili-mictio*. It must be regarded as a variety of *Catarhus vesicæ*. 2. To a painful swelling of the breasts, in child-bed women, when the milk is excreted with difficulty—a disease attributed, by Aristotle, to a hair swallowed by

accident and carried to the breasts through the circulation; and 3dly, To inversion of the eyelashes. See Entropion.

TRICHILIA, Cathartica.

TRICHINA SPIRALIS. Same etymon. A small species of entozoa discovered in the muscles of voluntary motion. Trichinæ consist of very minute cysts, of an oblong figure, having considerable resemblance in size and colour to young pediculi, and are somewhat allied to the eels found in paste and vinegar. No symptoms have as yet been observed to be pathognomonic of their presence.

TRICHIOSIS, Trichiasis—t. Distrix, Distrix.

TRICHISMUS. Same etymon. *Capilla'tio, Fissu'ra pila'ris*. A capillary fracture, fissure, or crack.

TRICHUURIA, Trichocephalus.

TRICHOCEPHALUS, *Trichocephalus dispar*; from  $\theta\rho\iota\chi$ ,  $\tau\rho\iota\chi$ oc, 'a hair,' and  $\kappa\epsilon\phi\alpha\lambda\eta$ , 'head.' *Trichu'ris, Trichuris vulgaris, Trichuris intestinalis, As'caris trichu'ria, Trichu'ria, Trichocephalus hominis, Mastigo'des hominis, Long thread-worm*. A worm, from an inch and a half to two inches long; the head acute; the body spirally involuted in the male, almost straight in the female. The *trichocephalus dispar* generally inhabits the cæcum and colon, and is rarely met with in the small intestines. It gives rise to no peculiar symptoms, and requires the usual anthelmintic treatment.

TRICHOCIRSUS, Trichangiectasia.

TRICHOLABIS, Madisterium.

TRICHOLABIUM, Madisterium.

TRICHOLOGIA, Carphologia.

TRICHOMA, Capillamentum, Plica.

TRICHOMANES, *Asplenium trichomanoides*.

TRICHOMATIUM, Capillamentum.

TRICHOMATOSE HAIR, Plica.

TRICHOMONAS, *Trichomonad*; from  $\theta\rho\iota\chi$ ,  $\tau\rho\iota\chi$ oc, 'a hair,' and  $\mu\omicron\nu\alpha\varsigma$ ,  $\mu\omicron\nu\alpha\delta\omicron\varsigma$ , 'unity.' An animalcule found by M. Donnè in the mucus of the vagina, where cleanliness has not been attended to, and to which he has given the name *Trichomonas vaginalis*. By some it is considered to be nothing more than separated ciliated epithelium from the uterus.

TRICHONOSUS, from  $\theta\rho\iota\chi$ ,  $\tau\rho\iota\chi$ oc, 'hair,' and  $\nu\omicron\sigma\omicron\varsigma$ , 'disease.' A disease of the hair.

TRICHOPHY'IA, *Trichophytica*, from  $\theta\rho\iota\chi$ ,  $\tau\rho\iota\chi$ oc, 'hair,' and  $\phi\upsilon\epsilon\iota\nu$ , 'to grow.' Remedies that promote the growth of the hair.

TRICHOPHYTON TONSURANS, see Porrigo decalvans.

TRICHOSCHISIS, Schizatrachia.

TRICHOSIS, *Pilo're malum*; from  $\theta\rho\iota\chi$ ,  $\tau\rho\iota\chi$ oc, 'hair.' Morbid organization or deficiency of hair. A genus in the system of Good.

TRICHOSIS, Entropion, Trichiasis—t. Area, Porrigo decalvans—t. Athrix, Alopecia—t. Distrix, Distrix—t. Furfuracea, Porrigo furfurans—t. Hirsuties, Hirsuties—t. Plica, Plica—t. Poliosis, Poliosis—t. Setosa, Hystriasis.

TRICHOTON, Scalp.

TRICHURIS, Trichocephalus.

TRICLISPERMA GRANDIFLORA, *Polygala paucifolia*.

TRICUSPID, *Tricus'pis, Tricuspidalis, Tricuspidatus*, from *tris* for *tres*, 'three,' and *cuspis*, 'a point.' That which has three points.

TRICUSPID VALVES, *Val'vula' Tricus'pides seu triglo'hinae seu trisul'cæ*, are three triangular,

valvular duplicatures, formed by the inner membrane of the right cavities of the heart, around the orifice by which the auricle communicates with the ventricle. The elongated and pointed top of each of these valves is continuous with the chordæ tendinæ, which set out from the columnæ carneæ of the heart. These valves are depressed to allow the blood to flow from the auricle into the ventricle; and are raised to prevent its reflux into the auricle.

TRIENS, *Un'cia qua'tuor*. The third part of a pound. Four ounces, Troy.—Galen.

TRIFACIAL, Trigemini.

TRIFÉMORO-ROTULIEN, *Triceps cruris—t. Tibi-rotulien, Triceps cruris*.

TRIFOLIUM ACETOSUM, *Oxalis acetosella—t. Aquaticum, Menyanthes trifoliata—t. Aureum, Hepatica triloba—t. Cervinum, Eupatorium cannabinum—t. Fibrinum, Menyanthes trifoliata—t. Hepaticum, Anemone hepatica*.

TRIFOLIUM MELILO'TUS OFFICINA' LIS, *Melilotus, Lotus sylves'tris, Ser'tula Compa'na, Trifolium caballi'tum, Coro'na regia, Trifolium odorat'um, Common mel'ilot, (F.) Melilot. Family, Leguminosæ. Sex. Syst. Diadelphia Decandria*. The infusion or distilled water of this plant has been employed in cases of ophthalmia. It has also been used in fomentations, gylsters, &c.

TRIFOLIUM PALUDOSUM, *Menyanthes trifoliata—t. Palustre, Menyanthes trifoliata*.

TRIGASTRIC, *Trigas'tricus, Tri'venter*; from  $\tau\rho\iota\varsigma$ , 'three,' and  $\gamma\alpha\sigma\tau\rho\eta$ , 'belly.' That which has three bellies. An epithet for muscles so circumstanced.

TRIGEMINI, *Tergem'ini*, from *tris*, 'three,' and *gem'inus*, 'double;' 'threefold,' 'triplets.' The fifth pair of nerves, *Par trigem'inum, Nervus divi'si, N. gustato'ris, Nervus quintus, Par quintum nervorum cereb'ralium, N. tremellus, N. mic'tus, N. sympatheticus me'dius, N. sympathicus me'dius, N. anon'yms, N. innominatus, Par trium funiculo'rum, Trifa'cial, (F.) Nerv' gustatif' innominat', Nerv' à trois cordes, Nerv' trijumauu*. This nerve arises below the tuber annulare by one large posterior root from the corpora restiformia, and by two small anterior roots from the corpora olivaria, whence, proceeding forwards to the side of the sella Turcica, the filaments composing the large root form a ganglion—the Gasserian. Emerging from this ganglion, the filaments, of which the large root consists, form, with those constituting the small roots, and which had not passed through the ganglion, two flattened trunks, each of which is soon divided into three branches, in such a manner, however, that the first, or ophthalmic branch, and the second or upper maxillary, are composed exclusively of the filaments that arose from the corpora restiformia and passed through the Gasserian ganglion; whilst the third or lower maxillary branch is composed in part of those filaments, and in part of those that arose from the corpora olivaria, and passed on one side of the ganglion without going through it. The whole, therefore, of the first and second branches, and a part of the third are sensiferous nerves, whilst the remaining part of the third—the manducatory or masticatory—is wholly motiferous, and passes to the pterygoid and other muscles concerned in mastication.

**TRIGONE CERÉBRAL**, Fornix—*t. Visceral*, see Urinary Bladder.

**TRIGONELLA FENUM**, *T. Fœnum Graecum*, *Fœnugreek*, *Fœnugreek*, *Fœnum Graecum*, *Bu'ceras*, *Carphos*, *Ægoc'eras*, (*F.*) *Fœnugrec*. *Family*, Leguminosæ. *Sez. Syst.* Diadelphia Decandria. A native of the south of France. The seeds have a strong, disagreeable smell, and an unctuous, farinaceous taste; accompanied by a slight bitterness. They are chiefly used in poultices.

**TRIGONOS**, Triangular.

**TRIGONUS LIÉTAUDI**, see Urinary bladder.

**TRIJUMEAUX**, Trigemini.

**TRILLIUM LATIFOLIUM**, *Broadleaf* *Beetroot*, *Beetroot*, *Eastlornate root*, *Wakerobin*, *Coughroot*, *Indian Balm*, *Ground Lily*, *Jews' Harp*, *Indian Shamrock*, *Pariswort*, *Truelove*. *Sez. Syst.* Hexandria Trigynia. A plant peculiar to North America, which blossoms in the spring. The root is astrigent.

There are many species of Trillium all of which possess the same properties.

**TRIOCEPHALIA**, Aprosopia.

**TRIORCHIS**, from *ρχος*, 'three,' and *ορχις*, 'a testicle.' One who has three testicles.

**TRIOSTEUM**, *T. Persfoliatum*, *Bastard* *Ipecacuan'ha*, *Fever Root*, *Feverwort*, *Tinker's wood*, *Hors Ginseng*, *Ipecac*, *Wild Coffee*, *White Ginseng*, *Gen'tian*, *White Gentian*, *Sweet Bitter*. In very large doses, the bark of the root proves emetic. It is a good cathartic, in doses of twenty or thirty grains. It sometimes operates as a diuretic.

**TRIBE DU ROCHE**. Different lichens of the species *Gyrophora*, inhabiting the arctic regions of America, bear this name. They are eaten as food by the hunters.

**TRIPHAR'MACUM**, *τριφαρμακον*. A medicine composed of three ingredients.

**TRIPLET**, from *triplex*, 'triple.' One of three children born at the same accouchement or gestation. Also, relating to triplets—as a 'triple conception.'

**TRIPSIS**, Contusio, Trituration.

**TRIPUDIATIO SPASTICA**, Chorea.

**TRIQUETRUM**, (*OS*), Cuneiform (bone.)

**TRISIS**, *Brygmua*.

**TRISMUS**, from *τρισμα*, 'I gnash.' *Ent'sia* *Trismus*, *Cap'strum*, *Tonus Trismus*, *Locked Jaw*, *Spasmus seu Rigor* *seu Tet'anus maxill'is inferioris*, *Gnathospasmus*, *Stomatospasmus*, (*F.*) *Mul de Machevre*. Spastic closure of the under jaw; a partial tetanus. Cullen makes two varieties—*T. nascentium*, *T. neonatorum*, *Sarrête*, attacking infants during two weeks from birth; and *T. traumaticus*, originating from a wound.

**TRISMUS CAPISTRATUS**, *Brédissure*—*t.* *Catarrhalis maxillaris*, *Neuralgia maxillaris*—*t.* *Clo-nicus*, *Neuralgia faciei*—*t.* *Cynicus*, see *Canine laugh*—*t.* *Diastrophe Sauvagesii*, *Paralysis*, *Bell's*—*t.* *Dolorificus*, *Neuralgia faciei*—*t.* *Maxillaris*, *Neuralgia faciei*—*t.* *Nascentium*, see *Trismus*—*t.* *Neonatorum*, see *Trismus*—*t.* *Sardonicus*, *Risus sardonicus*.

**TRISPER'MUM**, from *τρις*, 'three,' and *σπερμα*, 'a grain or seed.' A cataplasm, consisting of three seeds,—*cumin*, *bay*, and *small-ago*. *Gorræus*.

**TRISPLANCHIA**, Cholera.

**TRISPLANCH'NIC**, *Trisplanch'nicus*; from

*τρις*, 'three,' and *σπλanch'nic*, 'viscus.' That which relates to three orders of viscera.

**TRISPLANCHNIC NERVE**, *Great sympathetic*, *Intercostal*, *Ganglion'ic nerves*, *Nerves of organ'ic life*, *Vertebral nerves*;—named by Bichat the *organic nervous system*, in opposition to the other nervous parts, called the *animal nervous system*. Gall terms it, the *nervous system of the automa'tic functions*. It is called *Trisplanchnic*, because it distributes its branches to the organs in the three great splanchnic cavities—the head, chest and abdomen. It is composed of a series of ganglia, united by intermediate branches, and passing along the side of the spine to the lowest part of the trunk; communicating, by a branch, with each of the thirty pairs of spinal nerves and several of the cerebral nerves; and detaching nerves from its several ganglia, which accompany the arteries, and are distributed, particularly, to the organs of involuntary functions. At its upper part, it is concealed in the canalis caroticus and cavernous sinus, and is joined there by a branch of the 6th pair of nerves, and by a twig from the Vidian nerve of the 5th pair. In passing down by the side of the spine, it forms three ganglia in the neck—the *superior*, *middle*, and *inferior*; 12 in the back—the *thoracic*; 5 in the loins—the *umbilic*; and three or four *sacral*. When it reaches the coccyx it unites with its fellow from the opposite side, forming a small ganglion—the *ovary-ganglion*, *Ganglion impar*, *æ'gygus-ganglion*. Meckel divides it into two portions—1. The *central ganglions* or *central part*, composed of the numerous ganglionic plexuses in the abdomen; the centre of which is the *somiticæ* and *solar plexuses*. 2. The *external ganglions*, *Lamitrophes* or *external part*, which comprise the series of ganglions situate at the sides of the spine, from the base of the cranium to the sacrum. The great sympathetic seems to form a distinct nervous system, destined for the organs of involuntary motion; for although communicating with both brain and spinal marrow, it does not seem to be immediately under the influence of either.

**TRISPLANCHNITIS**, Cholera, (spasmodic.)

**TRISSAGO**, *Teucrium chamaedry*—*t.* *Palustris*, *Teucrium scordium*.

**TRISTEMANIA**, Melancholy.

**TRISTER'NAL**. Bèclard has given this name to the third bony portion of the sternum—that which corresponds to the third intercostal space.

**TRISTITIA**, *Athymia*, *Mæror*.

**TRITÆOPHYA AMERICANA**, *Fever*, yellow.

**TRITÆOPHYES**, *Trisæoph'ya*, from *τριταειον*, 'tertian,' and *φωσ*, 'I originate.' A fever, whose type approaches the tertian. Sauvages gave the name *Trisæophya Vratialisovien'sis*, to an epidemic, which broke out in the Prussian army at Breslaw, in the middle of the last century.

**TRITÆUS**, Tertian fever.

**TRITICUM ÆSTIVUM**, 'Summer wheat;' *Triticum Hybern'um*, *Wheat*, *Pyros*, *Frumentum*, (*F.*) *Froment*. *Family*, Gramineæ. *Sez. Syst.* Triandria Digynia. From these plants our wheat flour is obtained, by grinding the seeds; and to them we are indebted for our bread and pastry. The nutritive properties of

wheaten flour are so well known as not to need comment.

**Bread, (F.) Pain**, mixed with milk, constitutes the ordinary emollient poultice;—and the *crumbs of bread, Mica panis*, are a common excipient for pills and boluses.

**TRITICUM FAGINUM**, Polygonum fagopyrum.

**TRITICUM REPENS**, *Gramen caninum, Gramen Dioscoridis, G. repens, Lolium radi-  
ce repente, Dog grass, Couch grass, Quickens*, (F.) *Chiendent*. The roots are sweet, and possess aperient properties. They are said, also, to be diuretic.

**TRITIO**, Contritio, Trituration.

**TRITURA**, Contritio.

**TRITURATIO**, *Trituratio, Tritura, Tritus, Tritio, Tripsis*, from *terere, tritum*, 'to bruise.' The act of reducing a substance to powder.

**TRITURATIO**, Contritio.

**TRITUS**, Contritio, Trituration.

**TRIVELIN**, see Liver.

**TRIVENTER**, Trigastric.

**TROCAR**, *Trochar, Acus paracentica seu paracentatica, A. triquetra vulgaris, Paracentisicium, Paracentesicium*. Corrupted from the (F.) *Troisquarts* or *Trocart*, "three quarters;" so called from the triangular shape of the point, *Triquetrum*:—an instrument used for evacuating fluids from cavities, particularly in ascites, hydrocele, &c. A trocar consists of a perforator or stylet and a cannula, which is so adapted to the perforator, that, when the puncture is made, both enter the wound with facility; after which, the stylet being withdrawn, the cannula remains in the wound and affords the fluid a ready passage outwards.

**TROCART**, Trocar.

**TROCH**, Trochiscos.

**TROCHANTER**, *Trochanter, Rotator*, from *τροχανω*, 'I turn.' Anatomists have given the names—*great* and *little trochanter* to two processes at the upper extremity of the femur. The *great trochanter, glutus*, is the one on the outside; the *less* is lower down and more internally. Both afford attachment to rotator muscles of the thigh, and hence their name. Chaussier, by the word *trochanter*, means the larger process; the smaller he calls *trochantin*.

**TROCHANTERIAN**, *Trochanterianus*, *Trochanterian*. That which belongs or relates to the great trochanter.—Chaussier.

**TROCHANTINIAN**, *Trochantinian*, *Trochantinianus*. That which belongs or relates to the trochantin or lesser trochanter.

**TROCHAR**, Trocar.

**TROCHES OF CARBONATE OF LIME**, *Trochisci carbonatis calcis*—t. of Chalk, *Trochisci carbonatis calcis*—t. Escharotic, *Trochisci escharotici*—t. Gum, *Trochisci gummosi*—t. of Ipecacuanha, *Trochisci Ipecacuanhae*—t. Liquorice, *Trochisci glycyrrhizae*—t. Liquorice, with opium, *Trochisci glycyrrhizae cum opio*—t. of Magnesia, *Trochisci Magnesia*—t. Nitre, *Trochisci nitratis potasse*—t. of Peppermint, *Trochisci menthae piperitae*.

**TROCHIA**, Orbit.

**TROCHILIA**, Trochlea.

**TROCHIN**, from *τροχανω*, 'to turn.' Chaussier has given this name to the smaller of the tuberosities, at the upper extremity of the os humeri; because it gives attachment to one of

the rotator muscles of the arm,—the subscapularis.

**TROCHINIAN**, *Trochinianus*. That which belongs or relates to the trochin.

**TROCHISCUS**, *Phthois, Artis'cus, Collis, Colis, Phthois'cos, Rot'ula, Cyclis'mos*, diminutive of *τροχος*, 'a wheel.' A *troch* or *round table*, (F.) *Trochisque*. See *Pastil* and *Tabella*. A solid medicine, prepared of powders, incorporated by means of mucilage, crumb of bread, juices of plants, &c. In French nomenclature, the *trochisque* differs from the *tablettes*,—the former containing no sugar. This form of preparation is adapted for the purpose of allowing the medicines of which the troch is composed to dissolve slowly in the mouth, and to pass gradually into the stomach.

The Parisian Codex has two formulæ for troches for external use.

**TROCHISCI BECHICI NIGRI**, Tr. glycyrrhizae glabre.

**TROCHISCI CARBONATIS CALCIS**, *Troches of Carbonate of Lime, T. of chalk, Tubella ad asidorem ventriculi, Lozenges for the heartburn, Tabella cardialgica, T. ad sodam, Trochisci cretae, T. cretae* (Ph. U. S.) (Cret. ppt.  $\mathfrak{z}\text{iv}$ , *acacia*, in pulv.  $\mathfrak{z}\text{ij}$ , *myrist.* in pulv.  $\mathfrak{z}\text{ij}$ , *sacch.* in pulv.  $\mathfrak{z}\text{vj}$ . M. Form into troches with water.) Antacid and absorbent.

**TROCHISCI CRETÆ**, Tr. carbonatis calcis—t. Crete, T. carbonatis calcis.

**TROCHISCI VEL PASTILÆ EMETICÆ PECTORALES**, *Pectoral Lozenges of Emetics*. (Sugar,  $\mathfrak{z}\text{iv}$ , *emetins*, 33 grains. Form into lozenges of 9 grains each.) One is a dose.

**TROCHISCI ESCHAROTICI**, *Escharotic Troches*. (*Hydrag. ozymur.* p. 8, *amylis*, p. 16, *mucilag. g. tragac.* q. s. Make into troches to which a few drops of laudanum may be added. Ph. F.) Used in foul ulcers, to remove excrescences, &c.

**TROCHISCI ESCHAROTICI DE MINIO**. (*Ozyd. plumbi. rubr.* p. 16, *hydrarg. ozymur.* p. 32, *mic. panis*, p. 128, *aq. rosa*, q. s. Ph. P.) Used like the last.

**TROCHISCI GLYCYRRHIZÆ GLABRÆ**, *Liquorice Troches, Black pectoral lozenges, Trochisci bechici nigri*. (*Ext. glyc. glabr., gum. acac.* aa p. j. *sacch. purif.* p. ij. Dissolve in warm water; strain; evaporate, and form into troches. Ph. E.) Demulcent. To allay cough.

**TROCHISCI GLYCYRRHIZÆ CUM OPIO**, T. G. et opii, *Trochisci Thebaici, T. sedati'o-bal-samici, T. pectorales regia Danorum, Liquorice Troches with Opium*. (*Opii*, in pulv.  $\mathfrak{z}\text{ss}$ , *Ext. glycyrrhiz.* in pulv., *sacchar.* in pulv., *acacia* in pulv., aa  $\mathfrak{z}\text{x}$ , *ol. anisi*, t.  $\mathfrak{z}\text{ij}$ . Make into troches. Ph. U. S.) Demulcent and anodyne.

*Spitta's Lozenges* for coryza, hoarseness, and sore throat are composed as follows: (*Cubeb. recent.* in pulv.  $\mathfrak{z}\text{ij}$ , *extract. glycyrrhiz.*  $\mathfrak{z}\text{ij}$ , *myrozyli.*  $\mathfrak{z}\text{ij}$ , *acacia*,  $\mathfrak{z}\text{iv}$ , *syryp.* q. s. ut fiant trochisci,—gr. x. singulis.)

**TROCHISCI GUMMOSI**, *Gum Troches*. (*G. acac.* p. v., *amylis*, p. i., *sacch. pur.* p. xij. Make up the troches with rose-water. Ph. E.) Demulcent.

**TROCHISCI IPECACUANHÆ**, *Troches of Ipecacuanha*. (*Ipecacuanh.* in pulv.  $\mathfrak{z}\text{ss}$ , *sacchar.* in pulv.  $\mathfrak{z}\text{xiv}$ , *maranta*, in pulv.  $\mathfrak{z}\text{iv}$ , *mucilag. Tragacanth.* q. s. Make into troches. Ph. U. S.)

**TROCHISCI MAGNÆ SÆ,** *Troches of Magnæ sÆ.* (*Magnes.* ʒiv, *sacchar.* ʒij, *myrist.* pulv. ʒi, *mucilag. tragacanth.* q. s. Make into troches. *Ph. U. S.*) Useful in acidity of the stomach, with constipation.

**TROCHISCI MENTHÆ PIPERITÆ,** *Troches of Peppermint.* (*Ol. menth. piperit.* f. ʒij, *sacchar.* in pulv. ʒij, *mucilag. tragacanthæ.* q. s. Make into troches. *Ph. U. S.*) Used as a carminative.

**TROCHISCI NITRATIS POTASSÆ,** *Nitre Troches.* (*Nitrat. potassæ,* p. j, *sacch. pur.* p. iij. Make into troches with mucilage of tragacanth. *Ph. E.*) In slight inflammatory sore throat and fever.

**TROCHISCI PECTORALES REGIS DANORUM,** *Tr. glycyrrhizæ cum opio*—t. Sedativo-balsamica, *Tr. glycyrrhizæ cum opio*—t. Stibiati, *Tabellæ antimonialæ Kunkelii*—t. *Thebaici,* *Tr. glycyrrhizæ cum opio.*

**TROCHISQUÆ,** Trochiscus.

**TROCHITER,** from τροχίτις, 'to turn.' The larger of the two tuberosities at the upper extremity of the os humeri; so called because it affords insertion to rotator muscles.—*Chaussier.*

**TROCHITERIAN,** in the language of *Chaussier,* means any thing belonging or relating to the trochiter.

**TROCHLEA,** *Trochil'ia,* (F.) *Trochlée* ou *Trochlée.* A pulley; from τροχῶν, 'I turn,'—for example, the articular surface at the lower extremity of the os humeri; so called from its forming a kind of pulley on which the ulna moves, in flexion and extension of the forearm: also, the cartilaginous pulley, over which the tendon of the trochlearis muscle passes, at the upper and inner part of the orbit.

**TROCHLEA LABYRINTHI,** Cochlea.

**TROCHLEARIS,** Obliquus superior oculi.

**TROCHLEATEUR,** *GRAND,* Obliquus superior oculi—t. *Petit,* Obliquus superior oculi.

**TROCHLÉE,** Trochlea.

**TROCHOID,** from τροχός, 'a wheel,' and ἴδος, 'resemblance.' *Trochoides,* *Axæa commissura.* An articulation, in which one bone turns upon another, like a wheel upon its axle; as the *Atloido-axoid articulation.*

**TROCHOIDES,** Axæa commissura.

**TROËNE,** Ligustrum vulgare.

**TROISQUARTS,** Trocar.

**TROKANTER,** Trochanter.

**TROKANTERIAN,** Trochanterian.

**TROKANTINIAN,** Trochantinian.

**TROKLÉE,** Trochlea.

**TROMOMANIA,** Delirium tremens.

**TROMOPARANÆA,** Delirium tremens.

**TROMOS,** see Paralysis agitans.

**TROMPE,** Tuba—t. *d' Eustache,* Eustachian tube—t. *de Fallope,* Tuba Fallopiana—t. *Utérine,* Tuba Fallopiana.

**TROMUS,** Tremor.

**TRONC,** Trunk—t. *Brachial,* Brachial artery—t. *Basilaire,* Basiliary artery.

**TROPÆOLUM MAJUS,** *Indian Cress,* *Nasturtium Indicum,* *Acrivi'ola,* *Flos sanguinæus monardis,* *Nasturtium Peruvia'num,* *Cardamin'dum minus.* Family, Geraniacæ. *Sex. Syst.* Octandria Monogynia. (F.) *Cresson des Indes,* *Cresson du Mexique,* *Capucine.* An antiscorbutic.

**TROPÆOLUM TUBEROSUM,** *Ulluca.* A tuberos plant, cultivated in the Sierra, Peru. It is smaller than the potato.

**TROPHALIS,** Colostrum.

**TROPHE,** Aliment, Cibatio, Pabulum.

**TROPHICAL,** *Troph'icus;* same etymon as *Trophy.* Relating to nourishment or nutrition.

**TROPHIMOS,** Nutrition.

**TROPHONEURO'SIS,** from τροφή, 'nourishment,' and *neurosis.* A morbid condition of the process of nutrition owing to diminished nervous influence.

**TROPHON'OSI,** *Trophon'osi;* from τροφή, 'nourishment,' and νόσος, 'a disease.' Disease of nutrition.

**TROPHY Y,** *Troph'ia,* τροφή, a suffix denoting 'nourishment or nutrition,' as hypertrophy; 'excess of nourishment or nutrition.'

**TROPONU'SI,** *Morbi tropici,* from τροπή, the solstitial or tropical point where the sun turns or alters its course, and νόσος, 'a disease.' Diseases that prevail in the tropics.

**TROSTER,** see Spirit.

**TROU,** Foramen—t. *Anonyma,* Foramen stylomastoideum—t. *Aveugle* ou *Borgne,* Cæcum foramen—t. *Borgne* of the Medulla oblongata, Foramen cæcum of the medulla oblongata—t. *de Botal,* Botal foramen, *Ovale foramen*—t. *Déchiré antérieur,* Lacerum anterior foramen—t. *Déchiré postérieur,* Lacerum posterior foramen—t. *Épineux,* Spinale foramen—t. *Ma-tonnier,* Mental foramen—t. *Optique,* Foramen opticum—t. *Orbitaire supérieur,* Foramen supra-orbitarium—t. *Orbitaire supérieur,* Orbitar foramen superior—t. *Ovale,* *Ovale foramen*—t. *Rond, petit,* Spinale foramen—t. *Sous-orbitaire,* see Suborbital canal—t. *Sous-pubien,* Obturator foramen—t. *Sphéno-épineux,* Spinale foramen—t. *Sus-orbitaire,* Foramen supra-orbitarium.

**TROUS CAROTIDIENS,** Carotica furmina—t. *Condyloidiens,* *Condyloidea furmina*—t. *de Conjugaison,* *Conjugationis furmina*—t. *de Conjugaison,* see *Vertebrae*—t. *Olfactifs,* Olfactory furmina—t. *Rachidiens,* Spinal furmina.

**TROUSSE-GALANT,** Cholera morbus.

**TROUSSEAU,** Fasciculus.

**TROUSSEAUX ARRIÈRE-MÉSÉNTÉRIQUES,** (F.) A name given by Winslow to the nervous plexus situate between the two mesenteric plexuses, of which it is a dependence, and which descends into the pelvis to concur in the formation of the hypogastric plexus.

**TRUBS,** Lycoperdon tuber.

**TRUELOVE,** Paris, Trillium latifolium.

**TRUFFE,** Lycoperdon tuber.

**TRUFFLE,** Lycoperdon tuber.

**TRUMBUS,** Thrombus.

**TRUMPETWEED,** Eupatorium purpureum.

**TRUNCUS,** Trunk.

**TRUNK,** *Truncus,* (F.) *Tronc.* The principal part of the body, to which the limbs are articulated. The trunk has been divided into three parts;—a superior, the head;—a middle, the thorax;—and an inferior, the pelvis. These three regions contain the great splanchnic cavities. They are united by a common stalk—the vertebral column. To the middle are articulated the superior extremities; and, to the inferior, the lower extremities.

The trunk of an artery, vein, nerve, or lym-

phatic is its largest part, which has not yet given off branches. It is, also, applied to the parent vessel, after branches have been sent off.

**TRUSS**; from (F.) *trousser*, 'to tie up.' *Brachiorium*, *Brachiorium*, *Brachii'te*, *Brachiorolum*, *Brachiorolum*, *Amma*, *Hamma*, *Subligadulum*, *Subligatura*, (F.) *Brayer*. A hernial bandage for keeping hernia reduced. The ancient trusses were inelastic. They consisted simply of a pad and strap. At the present day, elastic bandages are alone employed. They possess the advantage of making an equable and continuous pressure on the aperture of the sac; and of yielding to the changes of form in the abdominal parietes. The most important part of these bandages is a piece of narrow steel, flat, and adapted to the shape of the body. This is the *spring*, (F.) *Ressort*. It embraces the body on the side affected; extends from beyond the spine, and terminates opposite the ruptured part, by an iron plate to which it is riveted. The posterior surface of this plate is furnished with a convex pad, (F.) *Pelote*, adapted in shape and size to the aperture which it has to close. The spring is covered with leather, and its inner surface is padded; a strap extends from its posterior extremity; passes round the sound side, and is attached to the plate of the pad. This strap is pierced with numerous holes, which allow the patient to tighten or slacken it at pleasure. Trusses have been variously constructed; and different patents obtained for the modifications. They all act upon the above principle. Sometimes they have a double pad.

**TRYGODES**, Feulent.

**TRYPANON**, Trepan.

**TRYPESIS**, Trepanning.

**TRYPISIS**, Friction.

**TSCHERBET**, Sherbet.

**TSIANA**, Costus.

**TSJAMPACA**, *Michelia champaca*.

**TUBA**, Tube—t. *Aristotelica*, *Eustachian tube*—t. *Cæca*, *Tuba Fallopiana*—t. *Uterina*, *Tuba Fallopiana*—t. *Vocalis*, *Tube*, *vocal*.

**TUBAL RESPIRATION**, see *Murmur*, respiratory.

**TUBE**, *Tuba*, *Trumpet*, *Salpinx*, (F.) *Trompe*. A name given to some parts which are hollow, and have the shape of a trumpet.

**TUBE**, ALIMENTARY, Canal, alimentary—t. *Eustachian*, *Eustachian tube*.

**TUBE**, FALLOPIAN, *Tuba Fallopii*'na seu *Fallopii*, *Hysterosalpinx*, *Oviductus muliebris*, *Vas deferens muliebris*, *Tuba uterina*, *T. cæca*, *Ductus varicosus seu Proccus lateralis seu Meatus seminalis seu Meatus seminarius uteri*, (F.) *Trompe de Fallope*, *T. uterina*, is a canal, floating in the abdomen, and extending on each side from the superior angles of the uterus as far as the sides of the brim of the pelvis. They are 4 or 5 inches long. Near the uterus, they are straight and very narrow; but, in their course, they widen, become tortuous, and terminate by a free, expanded, and fibrillated extremity; called, also, *Folliculum ornamentum*, *Morsus diaboli*, *Infundibulum* seu *Digitatio*'nes seu *Fimbriæ* seu *Vexillæ tubarum Fallopii*, *Lacinis tubarum Fallopii*, (F.) *Morceau frangé*, *Pavillon de la trompe*, *Morceau du diable*. Within, the tubes are hollow and lined by a mucous membrane: the tissue, which it lines, is spongy and erectile. The use of the Fallopian tubes is to conduct the

sperm to the ovarium, and the fecundated ovum back to the uterus. They establish a communication between the cavity of the peritoneum and that of the uterus, the abdominal termination being termed *Ostium abdominale*, the uterine, *Ostium uterinum*.

**TUBE**, INTESTINAL, Canal, alimentary.

**TUBE**, ŒSOPHAGEAL, *Stomach Tube*. A long elastic gum tube, capable of being passed into the œsophagus or stomach.

**TUBE**, RECTAL. An elastic gum tube, similar to the last, which is sometimes passed into the colon, to remove air from that intestine, or to enable enemata to be thrown up into it.

**TUBE**, STOMACH, see *Tube*, œsophageal.

**TUBE**, VOCAL, *Tuba vocalis*. The part of the air passages above the inferior ligaments of the larynx, including the passages through the nose and mouth.

**TUBER**, Hump, *Lycoperdon tuber*, *Tubercle* —t. *Atloido-occipital*, *Rectus capitis posticus minor*—t. *Cibarium*, *Lycoperdon tuber*.

**TUBER** CINE'REUM. A grayish tubercle, seen at the base of the brain behind the commissure of the optic nerves, which is continuous with the infundibulum.

**TUBER** FRONTAL, *Frontal protuberance*—t. *Gulosorum*, *Lycoperdon tuber*—t. *Gutturum*, *Bronchocele*—t. *Ischio-trochanterion*, *Quadratus femoris*—t. *Ischii*, see *Ischiatic*—t. *Pellagra*, *Pellagra*—t. *Tympani*, *Promontory of the tympanum*.

**TUBERA TERRÆ**, *Lycoperdon tuber*.

**TUBERCLE**, *Tuber culum*, *Tuber*, *Strangalion*, *Strangalis*, a *Kernel*, (vulg.), a *Knot* (vulg.), (F.) *Tubercule*. A tumour in the substance of organs, from the production of new matter—sensation null; growth sluggish. In *Pathological Anatomy*, the term is generally given to a species of degeneration which consists of an opaque matter, of a pale yellow colour: this, in its crude condition, has a consistence analogous to that of concrete albumen; it subsequently becomes soft and friable, and gradually acquires a consistence and appears analogous to those of pus. Tubercles may be developed in different parts of the body; but they are most frequently observed in the lungs and mesentery. Pulmonary tubercles, *Pneumophymata*, are the cause of *Tubercular Phthisis*, *Tubercula Pulmonum*, (F.) *Tubercules pulmonaires*. Mesenteric tubercles are often met with in the same affection, but particularly in *Tubes Mesenterica*. Laënnec classes tubercles among the accidental tissues which have no resemblance to the natural tissues, and which never exist except in consequence of morbid action. Others consider them as a scrofulous degeneration. Broussais conceives that they are produced exclusively by inflammation of the white vessels, whose existence, however, is more than questionable. When tubercles in any organ are few in number, they may pass to the state of permanent induration without danger to the patient; but when they are very numerous, they usually cause serious mischief. Dr. Baron considers that they are produced by hydatids. The morbid condition which gives rise to the development of tubercles, *Tuberculization*, is termed *Tuberculo'sis*, *Morbus tuberculosus*, *Serumosis* seu *Phymato'sis pulmonum*, and *Dyscrasia Tuberculosa*. Tubercles are seen of various forms,—to wit, in fine

points, (*Poussière tuberculeuse*), gray and yellow granulations, miliary tubercles; and gray or yellow tubercular masses, softened, and cretaceous.

**TUBERCLE, BLACK, Melanosis.**

**TUBERCULA ARANTII**, *Corpora Arantii*, *Corpuscula Arantii*, *Tubercles of Arantius* or *Aransi*. Small eminences at the middle part of the convex edge of the semilunar valves of the pulmonary artery and aorta.

**TUBERCULA ARTHRITICA**, *Calculi, arthritic*—*t. Cerebri*, *Encephalophymata*—*t. Gonorrhœica*, *Gonorrhœa impura*—*t. Hepatis*, *Hépatostromosis*—*t. Intestinorum*, *Enterophymata*—*t. Nervorum nodosa*, *Ganglions, nervous*—*t. Parvæ duræ matris*, *Glandulæ Pacchioni*—*t. Peritonæi*, *Cœliophymata*—*t. Pulmonum*, see *Tubercles (of the lungs)*—*t. Quadrigemina*, *Quadrigemina Tubercula*.

**TUBERCULAR**, *Tuberulous*, *Tuberculous*, *Tuberculatus*, (F.) *Tuberculeux*. That which relates to tubercles, or which is formed by tubercles.

**TUBERCULAR or TUBERCULOUS CONSTITUTION or DIATHESIS**, *Phthisiosis*, is the habit of body which predisposes to tubercular phthisis; as *Tuberculous Cachexia*, *Tuberculosus*, *Morbis tuberculosus*, *Dyscrasia tuberculosa*, is the condition of one labouring under tuberculosis.

**TUBERCULAR MATTER**. A morbid production, contained in cysts, or loose in the tissue of organs. It varies, in its consistence, at the different periods of the tubercular affection: being, at first, compact, and yellowish; at times, calcareous; afterwards pulvaceous, semi-fluid, and curdy. See *Tubercle*.

**TUBERCULAR PHTHISIS** is that produced by the development of tubercles in the lungs.

**TUBERCULATE**, *Tubercular*.

**TUBERCULATE SARCOMA** of AS'KENETHY, *Empyema Sarcoma tuberculosum*, *Tumor tuberculosus*. Tubercles, firm, round, and clustering; pea-sized or bean-sized; yellowish or brownish-red; when large disposed to ulcerate, and produce a painful, malignant, and often fatal sore. Found chiefly in the lymphatic glands of the neck; often, simultaneously, in other glands and organs.

**TUBERCULATED LIVER**, *Cirrhosis*.

**TUBERCULE**, *Tubercle*.

**TUBERCULES DES GLANDES LYMPHATIQUES**, *Scrofula*—*t. du Foie*, *Hépatostromosis*—*t. des Ganglions mésentériques*, *Tabes mesenterica*—*t. of the Larynx* and *Fauces*, *Pharyngitis, follicular*—*t. Miliary*, see *Granulation*—*t. Pissiformes*, *Mamillary tubercles*—*t. Pulmonaires*, see *Tubercle*—*t. Quadrigemina*, *Quadrigemina corpora*.

**TUBERCULEUX**, *Tubercular*.

**TUBERCULIZATION**, see *Tubercle*.

**TUBERCULOSIS**, see *Tubercle* and *Tubercular Cachexia*—*t. Laryngis et Trachææ*, *Phthisis laryngea*—*t. Pulmonum*, *Phthisis pulmonalis*—*t. Vertebrarum*, *Vertebral disease*.

**TUBERCULOSUS**, *Tubercular*.

**TUBERCULOUS**, *Tubercular*—*t. Disease of the Lungs*, *Phthisis pulmonalis*—*t. Dust*, *Poussière tuberculeuse*.

**TUBERCULUM CINE'REUM**, 'Ash-colored tubercle,' diminutive of *tuber*; *Fasciola cinerea*. A mass of cineritious substance at the top of the calamus scriptorius, which is continuous below with the posterior horn of cineri-

tious substance in the cord, and upon the sides with the corpus restiforme.

**TUBERCULUM LACHRYMALE**, see *Lachrymal puncta*—*t. Loweri*, *Lower*, *tubercle of*.

**TUBEROSITAS**, *Tuberosity*—*t. Tympani*, *Promontory of the tympanum*.

**TUBEROSITÉ BICIPITALE**, *Bicipital tubercle*—*t. Sciaticus*, see *Ischiatic*.

**TUBEROSITY**, *Tuberositas*, from *tuber*, 'a bump.' Anatomists have given this name to an eminence or process, the surface of which is unequal and rough; and which gives attachment to muscles or ligaments.

**TUBI MEMBRANACEI**, see *Villous membranes*.

**TUBULAR**, *Tubularis*, (F.) *Tubulaire*. Same etymon as the next. Relating to or having the form of a small tube.

**TUBULE**, *Tubulus*; diminutive of *Tubo*. A small tube.

**TUBULI BELLINI**, *Uriniferous tubes*—*t. Duræ matris*, *Sinuses of the dura mater*—*t. Pelvis renium*, see *Calix*—*t. Uriniferi Bellini*, *Uriniferous tubes*.

**TUBULUS**, *Cannula*.

**TUBUS ACUSTICUS**, *Ear-trumpet*—*t. Alimentaris*, *Canal, alimentary*—*t. Intestinorum*, *Canal, alimentary*—*t. Nervorum*, *Neurilemma*—*t. Vermicularis cæci*, *Appendix vermiformis cæci*.

**TUCKAHO**, *Lycoperdon tuber*.

**TUE-CHIEN**, *Colchicum autumnale*.

**TULIP TREE**, *Liriodendron*.

**TULIPIER**, *Liriodendron*.

**TULIPIFERA LIRIODENDRON**, *Liriodendron tulipifera*.

**TUMEFACATIO**, *Swelling*—*t. Mollis*, *Puffiness*.

**TUMESCENCIA PITUITOSA**, *Leucophlegmatia*.

**TUMEUR**, *Tumour*—*t. Anomala*, see *Hæmatodes fungus*—*t. Blanco*, *Hydrarthrus*—*t. Coarctatus*, see *Hæmatodes fungus*—*t. Ecephaloids*, *Encephaloid*—*t. Erectile*, see *Hæmatodes fungus*—*t. Hæmorrhagiale circumscribitis*, see *Aneurism*—*t. Lymphaticus des articulationis*, *Hydrarthrus*—*t. Variqueus*, see *Hæmatodes fungus*.

**TUMOR**, *Swelling*—*t. Albus*, *Hydrarthrus*—*t. Anomalus*, *Hæmatodes fungus*—*t. Artuum*, *Obdormitio*—*t. Capitis Sanguineus*, *Cephalæmatoma*—*t. Carneus*, *Sarcoma*—*t. Cysticus*, *Encystis*—*t. Cysticus serosus*, *Hygroma*—*t. Fibrosus*, *Tumour, fibrous*—*t. Ficosus*, *Ficus*—*t. Flatulentus*, *Emphysema*—*t. Fugax*, see *Fugacious*—*t. Fungosus articuli*, *Spina rotulosa*—*t. Fungosus sanguineus*, *Hæmatodes fungus*—*t. Gangliiformis*, *Ganglion, nervous*—*t. Genarum*, *Meloncus*—*t. Genu albus*, *Genocæc*—*t. Glandulæ parotidææ*, *Parotidoncus*—*t. Lacteus*, *Galactoncus*—*t. Lardæus*, *Steatoma*—*t. Malarum*, *Meloncus*—*t. Ovarii*, *Ovarioncus*—*t. Parotidis*, *Parotidoncus*—*t. Prostatæ*, *Prostatidoncus*—*t. Renalis*, *Nephroncus*—*t. Sanguineus*, *Hæmatoma*—*t. Squamiformis carnosus*, *Lepidosarcoma*—*t. Tuberculosus*, *Tuberculate sarcoma*—*t. Tunicatus*, *Encystis*—*t. Uteri*, *Hysteroncus*.

**TUMOUR**, from *tumo*, 'I swell'; *Oncos*, *Oncus*, *Eparma*, *Eparsis*, *Empyema*, *Ezerecensis* (*Sauvages*), *Ecphyema*, (F.) *Tumour*. A rising or prominence, of greater or less size, developed by a morbid cause in some part of the body. Cullen defines a tumour to be "a par-

tial swelling without inflammation." Sauvages restricts the term to a rising formed by the congestion of a fluid; and he calls *exorescences* those which have a fleshy or osseous consistence. Boyer defines it "any preternatural eminence developed on any part of the body." Good uses it synonymously with tubercle. Boyer's is the best general definition. Tumours differ greatly from each other; according to their seat, the organs interested, their nature, &c.

The French use the term *Tumeur blanche* synonymously with *White Swelling*;—see Hydrarthrus. The term is, however, applied by the generality of surgeons to swellings of the greater joints, without change of colour of the skin, and of a more or less firm consistence, which are dependent upon disease of the osseous or of the soft parts about the joint.

Scrofula is the most common cause of these affections.

**TUMOUR, ERECTILE.** A tumour produced by the development of a soft, vascular tissue, which is susceptible of elevation and depression. See Erectile.

**TUMOUR, FIBROUS,** *Tumor fibrosus, Inohylo'ma.* A tumour formed of fibrous tissue.

**TUMOUR, LAMINATED NACREOUS FATTY,** Cholesteatoma.—t. Milk-like, Encephaloid.

**TUMOUR, VARICOSE,** *Tumor varicosus.* A circumscribed, bluish tumour, formed by the dilatation and turgescence of the capillary vessels of a part.

**TUMOUR, VASCULAR,** see Hæmorrhoids.

**TUNAS,** see Cactus opuntia.

**TUNBRIDGE, MINERAL WATERS OF.** A celebrated acidulous chalybeate in Kent, England, a few miles distant from the village of Tunbridge, and thirty-six miles south of London, which is much frequented. It contains carbonic acid, carbonate of iron, and sulphate of magnesia.

**TUNDA OCULI,** Conjunctiva membrana.

**TUNDUS CORDIS,** Mucro cordis.

**TUNIC,** *Tunica, Chiton, a coat.* An envelope. A name given to different membranes, which envelop organs; such are the tunics or coats of the eye, stomach, bladder, &c.

**TUNICA ACINALIS,** Uvea.—t. Aciniformis, Uvea.—t. Acinosa, Uvea.—t. Adnata, Conjunctiva.—t. Agnata, Conjunctiva.—t. Alba oculi, Sclerotic.—t. Albuginea, Albuginea.—t. Albuginea oculi, Sclerotic.—t. Allantoïdes, Allantois.—t. Arachnoides, Arachnoid membrane.—t. Aranea, Arachnoid membrane.—t. Caduca, Decidua.—t. Candida oculi, Sclerotic.—t. Carnosa, Panniculus carnosus.—t. Conjunctiva, Conjunctiva.—t. Costalis, Pleura.—t. Crassa, Decidua.—t. Crystallina, Arachnoid membrane.—t. Dura oculi, Sclerotic.—t. Durior et crassa, Sclerotic.—t. Elytroides, Vaginalis tunica.—t. Erythroïdes, Cremaster.—t. Exterior ovi, Decidua.—t. Extima oculi, Sclerotic.—t. Farcinialis, Allantois.—t. Filamentosa, Decidua.—t. Hortensia, Dianthus caryophyllus.—t. Innominata oculi, Sclerotic.—t. Interna oculi, Retina.

**TUNICA JACOBI.** A highly delicate serous membrane, interposed between the retina and the choroid coat, discovered by Dr. Jacobs, of Dublin.

**TUNICA MUSCULARIS,** Dartos.—t. Nervorum, Neurilemma.—t. Perforata, Uvea.—t. Prætensa abdominis, Peritonæum.—t. Reticularis, Retina.—t. Retiformis, Retina.—t. Rhagoïdes, Choroï-

dea tunica, Uvea.—t. Rubicunda scroti, Dartos.—t. Rubra, Dianthus caryophyllus.—t. Ruyschiana, see Choroid.—t. Subcostalis, Pleura.—t. Thoracis, Corset.—t. Uvalis, Uvea.—t. Uvea, Uvea.—t. Uviformis, Uvea.—t. Vaginalis, see Vaginal.—t. Vaginalis Linguae, see Tongue.—t. Vaginalis Testis Propria, Albuginea.—t. Vasculosa oculi, Choroid.

**TUNICA VASCULO'SA TESTIS,** *Pia mater testis.* An extremely delicate membrane, consisting of minute ramifications of the spermatic vessels united by cellular tissue, which separates the lobules of the testis from each other. It is situate immediately within the tunica albuginea, and encloses the substance of the gland. It sends processes inward that separate the lobules, in the same manner as the pia mater is reflected between the convolutions of the brain.

**TUNICA VITREA,** Hyaloid membrane.

**TUNICULA,** Clitoris.

**TUNIQUE ALBUGINÉE,** Albuginea.

**TUNNYFISH, SALTED,** Omotarichos.

**TUPHLO-ENTERITIS,** Typhlo-enteritis.

**TUPHUS,** Typhus.

**TUPINARIA,** Talpa.

**TURBA HÆMORRHOIDALIS,** see Hæmorrhoids.

**TURBATIONES ANIMI,** Affections of the mind.

**TURBINATED BONES,** *Ossa turbinata.*

Bones shaped like a top; from *turbo* or *turben*, 'a top.' *Ossa spongiosa, Cornua, Conchæ narium, Turbinæ nasi seu narium, Conchylia, Buccina, Lamina spongiosa nasi, Ossa tertia maxilla superioris.* Very thin, bony plates, rolled up in the form of horns, and situate in the nasal fossæ. 1. *Ossa spongiosa superioris,* or *Cornat de Morgagni*;—the highest. 2. *Ossa spongiosum medium,* the middle cornu of French anatomists,—the *ethmoidal cornu* or *Ossa spongiosum superius, Ossa turbinatum,* of English anatomists, *Ossa convolutum superius, Concha, C. narium superius, C. Morgagniana,* (F.) *Cornet Moyses.* This bone projects inwards and downwards into the cavity of the nose, from the ethmoid cells at the side of the nasal lamella, and serves to enlarge the organ of smell. It is convex towards the septum, and concave outwards. 3. *Ossa spongiosum vel turbinatum inferius, Concha inferior, Convolutum inferius os, Os sous-ethmoidal,* (Ch.); projects at the under part of the side of the nose, is convex towards the septum, and concave outwards. It is connected to the os maxillare, os palati, and os unguis. 4. *Sphenoid' al cornu.*

All the turbinated bones extend the olfactory surface.

**TURBINES NASI seu NARIUM,** Turbinated bones.

**TURBITH BLANC,** Globularia alypum.—t. Mineral, Hydrargyrus vitriolatus.—t. Montpellier, Globularia alypum.—t. Plant, Convolvulus turpethum.

**TURBO CEREBRI,** Pineal gland.

**TURGENTIA,** Turgescence.

**TURGESCENTIA,** *Turgescentia, Turgentia, Organismus,* from *turgescere*, 'to swell.' Superabundance of humours in a part. The term *Turgescence of Bile* was formerly used to denote the passage of that fluid into the stomach, and its discharge by vomiting. A vital action of turgescence or expansibility—*Turgor vitalis*—has been presumed to exist in certain

organs, as in the capillaries; but the generality of physiologists do not admit it.

**TURGESCENTIA**, Turgescence.

**TURGESCENTIA VESICULÆ FELLÆ**, *Ascites Hepato-cysticus*, *Physoconia biliosa*, *Hepatalgia Petitiæna*, *Cystocèle biliosa*, *Hydrocholecystitis*, *Hydrops vesicæ fellæ*, (F.) *Hydropisis de la Vésicule du Fiel*, *Distension de la Vésicule du Fiel*, *Cholecystictasis*. Distension of the gall-bladder by bile.

**TURGOR VITALIS**, see Turgescence.

**TURMERIC**, *Curcuma longa*, *Sanguinaria Canadensis*.

**TURNING**, *Versio*, *V. factus*, from (F.) *turner*, 'to turn.' (F.) *Version*. The operation of bringing down the feet, or some part of the lower extremity, when the presentation of the child is such that it cannot be delivered by the natural efforts.

**TURNIP**, *Brassica rapa*—t. Dragon, *Arum triphyllum*—t. Indian, *Arum triphyllum*—t. Pepper, *Arum triphyllum*.

**TURNS**, Menses.

**TURPENTINE**, *Terebinthina*—t. Bordeaux, see *Pinus sylvestris*—t. Briançon, see *Pinus cembra*—t. Chio, see *Pistacia terebinthus*—t. Common, see *Pinus sylvestris*—t. Common, American, see *Pinus sylvestris*—t. Cyprus, see *Pistacia terebinthus*—t. Damarra, see *Pinus damarra*—t. Dombeya, see *Dombeya excelsa*—t. Horse, see *Pinus sylvestris*—t. Strasburg, see *Pinus picea*—t. Tree, *Pistacia terebinthus*—t. Venice, see *Pinus larix*—t. Venice, true, see *Pistacia terebinthus*—t. White, see *Pinus sylvestris*.

**TURPETHUM**, *Convolvulus turpethum*—t. Minerale, *Hydrargyrum vitriolatus*—t. Nigrum, *Hydrargyri oxydum cinereum*.

**TURQUOISE**. This stone has been long imagined to change its colour as the wearer is at the time in good or bad health:—a superstitious notion.

**TURTLE BLOOM**, *Chelone glabra*—t. Green, *Chelonia mydas*—t. Head, *Chelone glabra*.

**TURUNDA**, Tent.

**TURUNDULA**, Tent.

**TUSSACA RETICULATA**, *Goodyera pubescens*.

**TUSSEDO**, Tussis.

**TUSSICULA**, Tussis.

**TUSSICULAR**, *Tussicula'ris*, *Tussiculoides*, from *tussis*, 'a cough.' Relating to a cough, or to a slight cough.

**TUSSICULOSUS**, Tussicular.

**TUSSILAGO**, *T. Farfara*, *Bechium*, *Bechion*, *Calceum equinum*, *Chamaeleucel*, *Chamaezeparon*, *Filius ante patrem*, *Farfarella*, *Galliomarechus*, *Farfara*, *Tussilago vulgaris*, *Farfara Bechium*, *Un'gula caballina*, *Coltsfoot*, (F.) *Pas d'âne*. Family, *Corymbiferae*. *Sex. Syst.* Syngenesia Polygamia Superflua. It is demulcent and expectorant, and has been used in coughs, and pulmonary affections in general, and in some cutaneous diseases.

**TUSSILAGO PETASITES**, *Butterbur*, *Petasites*, *Pestilent-wort*, *Petasites major*, *P. vulgaris*, *P. rubens*. The roots of this plant have been recommended as aperient and alexipharmic.—They have a strong smell; and a bitterish, acrid taste, of the aromatic kind, but not agreeable.

**TUSSIS**—diminutive, *Tussicula*, *Cough*,

*Coughing*, *Begma*, *Bex*, *Tussedo*, *Bezis*, *Tussis nervosa*, *Catar'rhus*, *Pneusis Tussis*, (F.) *Toux*. Violent, sonorous, frequent, and short expirations; by means of which the air, in passing rapidly through the bronchia and trachea, carries along with it the mucus of the parts, which forms the sputa. The cough is said to be *dry*, when unaccompanied by expectoration. It is symptomatic of many diseases. See *Bronchitis*.

**TUSSIS AMPHEMERINA**, *Pertussis*—t. *Bronchica*, *Cough*, *tubal*, see *Bronchitis*—t. *Catarrhalis Simplex*, *Catarrh*—t. *Clamosa*, *Pertussis*—t. *Clangosa*, *Pertussis*—t. *Convulsiva*, *Pertussis*—t. *Delassans*, *Pertussis*—t. *Ferina*, *Pertussis*—t. *Fueros strangulans*, *Pertussis*—t. *Quinta*, *Pertussis*—t. *Senilis*, *Bronchitis (chronic)*—t. *Spasmodica*, *Pertussis*—t. *Stomachalis*, *Pertussis*—t. *Suffocans*, *Pertussis*—t. *Suffocativa*, *Pertussis*—t. *Tussiculosa*, *Pertussis*.

**TUTAMINA**, pl. of *Tuta'men*, 'a defence,' 'a protection,' from *tutare*, 'to defend.' Parts are so called which defend or protect each other.

**TUTAMINA CEREBRI** are the scalp, pericranium, bones of the skull, and the meninges.

**TUTAMINA OCULI** are the eyebrows, eyelids, and lachrymal apparatus.

**TUTENAG**, Zincum.

**TUTHIA**, Tutia.

**TUTIA**, *Pom'pholyx*, *Cadmia*, *Alfara*, *Misera*, *Capnitis*, *Tuthia*, *Oxydum zinci impurum*. The oxyd of zinc that attaches itself to the chimneys of furnaces in which ores of zinc are smelted. It is in the form of gray incrustations; and is sometimes used for making an eye-salve. It is prepared, for this purpose, by levigation.

**TWIN**, Gemellus.

**TWINKLING OF THE EYE**, Nictation.

**TWINLEAF**, COMMON, *Jeffersonia Bartoni*.

**TWINROOT**, *Orchis*.

**TWINS, SIAMESE**. Two brothers, Chang and Eng, connected by means of a ligamentous band passing from the epigastrium of one to that of the other, who were exhibited in various parts of Europe and America, about the year 1830. They are now, (1848,) living in North Carolina: both are married and have children. See *Xiphopages*.

**TWITCHING**, Tic.

**TYCHICA**, from *τυχη*, 'accident.' Fortuitous lesions or deformities. The 7th class of Good's *Nosology*.

**TYLE**, Callosity.

**TYLOMA**, Callosity.

**TYLOSIS**, Callosity.

**TYLUS**, Callosity.

**TYMMA**, Wound.

**TYMPAN**, Tympanum.

**TYMPANIA**, Tympanites.

**TYMPANIAS**, Tympanites.

**TYMPANIC**, *Tympanicus*; same etymon as tympanum. Relating to the tympanum, as 'tympanic canal.'

**TYMPANITA**, Tympanites.

**TYMPANITE**, Tympanites.

**TYMPANITES**, *Emphysema Abdominis*, *Hydrops Tympanites*, *Affectio tympanitica*, *Ectympanon*, *Pneumato'sis Abdominis*, *Hydrops abdominis aëreus*, *Aëro'sis*, *Aëro-entero'tica'sis*, *Physocælia*, *Tympano'sis*, *Physæma*, *Physo'sis*, *Hydrops sicco et flatulentus*, *Tym-*

*pania*, *Tympanias*, *Tympani'ta*, *Tympani'tis*, *Empyos'sma Tympanites*, *E. Tympani'ticum*, *Meteorismus*, *Tympany*, *Meteorism*, (F.) *Tympanite*, *Pneumatose péritonéale*, *Ballonnement*, from *τυμπανον*, 'a drum,' so called because the abdomen is distended with wind, and sounds like a drum when struck. A swelling of the abdomen, caused by accumulation of air in the intestinal tube or in the peritoneum. Tympanites may be idiopathic or symptomatic. The former depends upon exhalation of air from the inner surface of the intestine, or from the decomposition of substances contained in it; the latter is the result of some organic affection, and often depends upon obliteration of the digestive tube, which prevents the gas from escaping. Idiopathic tympanites may be more readily cured. The symptomatic is usually fatal. On dissection in such cases, the stomach and intestines are found enormously distended; with strangulation or disorganization of some part of the mucous membrane of the intestine. Carminatives may be proper when tympanites depends upon atony of the digestive organs: but, in cases of the symptomatic kind, they cannot be productive of advantage, and may do harm.

Sometimes the air is contained in the cavity of the peritoneum—constituting *Tympani'tes abdomina'lis*, *Aéropéritonis*, of some—the accumulation in the intestines being called *Tympani'tes intestina'lis*.

TYMPANITES, UTERINE, *Physometra*.

TYMPANI'TIS, *Inflamma'tio tym'pani*; from *τυμπανον*, 'a drum,' and *itis*, denoting inflammation. Inflammation of the lining membrane of the middle ear. Also, tympanites.

TYMPANOSIS, Tympanites.

TYMPANUM, *τυμπανον*, 'a drum.' The *Drum* or *barrel of the Ear*. The names *Cavity of the Tympanum* or *Cavity of the Drum*, *Cavitas Tym'pani*, *Antrum seu cavitas antro'sa Auris*, *Cavum Tym'pani*, (F.) *Tympan*, *Cavité du tympan*, *Caisse du tambour*—have been given to a cavity of an irregular shape, which constitutes the middle ear, and has been compared to a drum. It is situate in the pars petrosa of the temporal bone, between the meatus auditorius externus and the labyrinth. This cavity is lined by a mucous membrane; and communicates, externally, by means of the Eustachian tube, which is situate between it and the pharynx. The tympanum has six parietes. 1. An *external*, which is almost entirely formed of the *Membrana of the Drum*, *Membrana tympani*, *Diaphrag'ma auris*, *Mediastinum seu Tegumentum auris*, *Myrin'ga*, *Myrin'ga*, (F.) *Membrans du tympan*—a species of thin, transparent, circular septum; convex within, and concave without, which closes the inner extremity of the meatus auditorius. 2. An *internal*, on which are the *Fenestra ovalis*, *Promontory*, and *Fra'trum rotundum*. 3. A *superior*. 4. An *inferior*, on which is the *glenoid fissure*. 5. A *posterior*, on which are the opening of the mastoid cells, and the pyramid. 6. An *anterior*, on which are the *Processus cochleariformis* and the inner orifice of the *Eustachian tube*. The cavity of the tympanum is crossed by a series of four small bones, articulated with each other by diarthrosis, moved by certain muscles, and representing a kind of bent lever extending from the *membrana tympani* to the *fenestra ovalis*. They are called the *Bones*

or *Ossicles of the Ear*, and are the malleus, incus, or orbicular, and stapes.

For the nervous plexus of the tympanum, see *Petrosal Ganglion*, and *Otic Ganglion*.

TYMPANUM MINUS, see *Fenestra*—t. *Secundarium*, see *Fenestra*.

TYMPANY, *Tympanites*—t. of the *Womb*, *Physometra*.

TYPE, *Typhus*, *Periodus morbi*, from *τυπος*, 'a stamp,' itself from *τυπτο*, 'I strike.' The *type* is the order in which the symptoms of a disease exhibit themselves, and succeed each other. It may be continued, intermittent, or remittent.

TYPHA AROMATICA, *Acorus calamus*.

TYPHICUS, *Typhoid*.

TYPHIQUE, *Typhoid*.

TYPHLITIS, *Typhlo-enteritis*.

TYPHLO-ENTERITIS, *Typhlo-enteritis*, *Typhli'tis*, *Typhloteritis*, *Inflamma'tio Cæci*, *Phleg'monous Tumour of the Cæcum*, (F.) *Inflamma'tion du Cæcum*, from *τυφλο*, *cæcus*, and *enteritis*, 'inflammation of the intestines.' Inflammation of the cæcum, occasionally leading to perforative ulceration.

TYPHLOENTERUM, *Cæcum*.

TYPHLOPS, *Cæcus*.

TYPHLOSIS, *Cæcitas*.

TYPHLOTERITIS, *Typhlo-enteritis*.

TYPHLOTERON MONOCOLON, *Cæcum*.

TYPHLOTERUM, *Cæcum*.

TYPHLOTES, *Cæcitas*.

TYPHODES, *Typhoid*.

TYPHOËMIE ENTÉRIQUE, see *Typhus*.

TYPHOËMIA, see *Putrefaction*.

TYPHOID, *Typhoides*, *Typho'des*, *Ty'phicus*, *Typho'vus*, *Lactica*, (F.) *Typhicus*, *Typhoide*, *Typhode*. Appertaining to or resembling typhus; as *Typhoid Fever*. Also, typhus, according to some, *Typhous Fever*. Fuchs has employed the word *Typhoide* for a family of diseases, to distinguish them from *phlogoses*; of this family, *Stomacace*, *Pharyngocæce*, and *Pneumocæce* are examples.

TYPHOID AFFECTION, see *Typhus*—t. *Fever of India*, *Cholera*.

TYPHOMANIA, from *τυφος*, 'stupor,' and *μανια*, 'delirium.' *Delirium with stupor*, *Subdelirium*. The kind of delirium common in typhus.

TYPHOMANIA, *Coma vigil*, *Insomnia*.

TYPHONIA, *Coma vigil*.

TYPHOSEPTO'SES, from *τυφος*, 'stupor,' and *σψις*, 'putrefaction.' *Typhous affections*.

TYPHOSUS, *Typhoid*.

TYPHOUS FEVER, see *Typhoid*.

TYPHUS, *Semipess'tis*, *Typhus*, *Febris Typho'des*, *Febris æthetica* seu *adynamica*, *Athenopy'ra*, (F.) *Fidors adynamique*, *F. ataxique*, *F. adynamique ataxique*, *Typhus d'Étrops*, from *τυφος*, 'stupor.' A fever characterized by small, weak, and unequal, but usually frequent pulse, with great prostration of strength, and much cerebral disturbance; its duration being usually from a fortnight to three weeks or longer. It is continued fever, accompanied with great cerebral irritation and prostration. (See *Fever*.) By most writers, this disease has been divided into two varieties—the *Typhus mitior* and *Typhus gravior*. TYPHUS MIX'TOR, *T. simplex*, *T. nervosus*, *T. comatosus*, *Feb'ris lenta nervosa*, *Blechnopy'rus*, *F. putrida nervosa*, *F. hæctica maligna ner-*

vosa, Nervous Fever, Neurop<sup>g</sup>ra, Neuro<sup>g</sup>g<sup>r</sup>atus, (F.) *Fievre nerveuse*, is characterized by slight shiverings, heavy, vertiginous headache; great oppression, peculiar expression of anxiety, nausea, sighing, despondency, and coma or quiet delirium. TYPHUS GRAVIOR, *Typhus caecorum*, *T. castron<sup>s</sup>is*, *T. anthropophthor<sup>o</sup>acus*, True Typhus, Exanthemat<sup>o</sup>is typhus, Nervous fever with exanthematous eruption, Contagious typhus, *Febris nervosa epidem<sup>o</sup>ica*, *F. nervosa exanthemat<sup>o</sup>ica*, *F. maligna cum sopore*, *F. nervosa petechialis*, *F. pestilentialis Euro<sup>p</sup>ae*, Typhus contagiosus exanthemat<sup>o</sup>icus, *T. nostras*, *T. Europa<sup>o</sup>us*, *T. commun<sup>o</sup>is*, *T. bellicus*, *T. exanthemat<sup>o</sup>icus*, *Pestis bellica*, *Febris pestilens maligna*, *Febris nav<sup>o</sup>ica pestilentialis*, *Febris petechialis*, Typhus petechialis, Porphyro-typhus, *Pulsularia morbus*, *Febris punitularis*, *F. Sapro<sup>g</sup>g<sup>r</sup>ae*, *F. caecorum et nosocomiorum*, *F. Putrida*, *F. continentis putrida*, *F. contin<sup>o</sup>ua putrida*, *Septo<sup>g</sup>g<sup>r</sup>ae*, *Putrid Fever*, Jail Fever, Hospital Fever, (F.) *Fievre des Camps*, *F. nautique*, *F. d<sup>o</sup>Hopital*, *F. nosocomiale*, *F. des Prisons*, *F. lenticulaire*, Typhus contagiosus, is attended with rigors and heat, alternating; little or no perspiration; pulse, tense and hard, usually quick, but fluttering; pain over the forehead and vertex; delirium, succeeded by stupor; signs of incipient putrescency,—as petechiae, vibices, hemorrhages, &c. Typhus, under particular circumstances, seems to be communicable by contagion; but if proper attention be paid to cleanliness and ventilation, there is not much danger of communication. The general principles of treatment, laid down under the head of Fever, are applicable here. All the varieties of continued fever resemble each other in the cardinal points, although they may differ in many of their characters. Ventilation and cleanliness; warm or cold abluion or sponging; keeping the bowels free; and attending to symptoms as they may rise, with the avoiding of all irritation of every kind, are the main indications. When symptoms of great prostration occur, the strength must be supported by wine; and tonics be exhibited, with the mineral acids. Of the tonics, the sulphate of quinia is perhaps as good as any, whilst it is free from the objection which applies to most others,—of being too bulky. In the whole management of this affection, however, the physician has to discriminate carefully between oppression and prostration. The former may require evacuates; the latter cannot.

Of late, certain observers have endeavoured to show, that there is an essential difference between typhoid fever and typhus; that the former is an abdominal affection, and dependent upon, or connected with, an inflamed or ulcerated condition of the mucous follicles of the intestines; hence it has received the names *Fievre mésentérique*, *F. typhoide*, *Maladie ou Affection typhoide*, *F. entéro-mésentérique*, *Entérite typho-hémique*, *Typhoémie entérique*, *Entéro-mésentérite typhoide*, *Exanthème intestinale*, *Dothinentérite*, *Dothinentérite*, &c., *Alco-diclidite*, *Entérite folliculeuse*, *Gastro-entérite* with nervous affection of the brain, *Follicular gastro-entérite*, *F. enteritis*, *Enteritis folliculo<sup>o</sup>sa*, *Typhus abdominalis*, *T. intestinalis*, *T. Sporadicus*, *Enterotyphus*, *T. ganglionaris abdominalis*, *Febris intestinalis ulcero<sup>o</sup>sa*, *F. nervosa gastrica*, *F. nervosa enterica*, *F. enteri-*

*ica*, *F. nervosa mesenterica*, *Entéroémie nervosa*, *Typhus entericus*, *Illo<sup>g</sup>g<sup>r</sup>ae*, *Illo<sup>g</sup>g<sup>r</sup>ae*, *Typhoid affection*, *Enteric fever*. Accompanying this form of fever there is generally a typhoid eruption, consisting of rose-red papulae, which appear mostly on the abdomen. They are distinct from true petechiae, as they can be removed by pressure; and distinct also from sudamina, which are perhaps the universal accompaniments of sweating, and are consequently a variety of miliaria. The common continued fever or synochus of Great Britain, and of this country, has been presumed by some to be this variety: but farther observations are needed to establish the distinctions which have been attempted; and there is reason to believe, that the abdominal affection is a complication, existing in certain cases and epidemics, and not in others. The *Red Tongue Fever* of Kentucky is considered by Professor Bartlett to be typhoid fever.

Certain modern French writers have considered the Typhus of the European continent, *Typhus of Europe*, *Peste d'Europe*, *pestilential fever*, *contagious typhus*, *Hungary fever*, *Hospital fever*, *camp fever*, *jail fever*, *lenticular petechial fever*, &c., to be identical with the typhoid affection. They admit but one fever on the European continent—the typhoid. Typhus, they maintain—but by no means establish the position—to be peculiar to England.

TYPOSES, see Periodicity.

TYPUS, Type.

TYRANNUS, see Critical days.

TYRBASIA, Agitation.

TYRBE, Agitation.

TYREMESIS, *Tyrotom<sup>o</sup>esis*, from τυρος, 'cheese,' and τρεφω, 'vomiting;' *Tyro<sup>o</sup>sis*, *Tyro<sup>o</sup>sis*. Vomiting of curdy matter, in infants especially.

TYREUSIS, Tyremesis, Tyrosia.

TYRIA, Porrigo decalvans.

TYRIASIS, Elephantiasis Arabica.

TYRODES, Cheesy.

TYROMA, Porrigo decalvans.

TYROS, Cheese.

TYROSIS, Tyremesis. Also, the curdling of milk in the stomach; *Tyro<sup>o</sup>sis*.

TYROTREMESIS, Tyremesis.

## U.

ULA, *Gingivæ*.

ULATROPHIA, from *ουλερ*, 'the gum,' and *atrophia*, atrophy. Shrinking of the gums; falling away of the gums.

ULCER, *Ulcus*, diminutive *Ulcusculum*, *Helcos*, *Elco'sis*, *Elco'ma*, *Helous*, *Helco'ma*, a *Sore*, (F.) *Ulcère*. A solution of continuity in the soft parts, of longer or shorter standing, and kept up by some local disease or constitutional cause. Richerand makes four great distinctions between a wound and an ulcer. 1. A wound arises from the action of an extraneous body:—the cause of an ulcer is inherent in the economy. 2. A wound is always idiopathic:—an ulcer is always symptomatic. 3. A wound has essentially a tendency to heal, because the action of its cause has been momentary:—an ulcer, on the contrary, has a tendency to enlarge, because its cause persists. 4. The treatment of a wound is purely surgical; that of an ulcer is medical as well. The immediate cause of an ulcer is an augmented action of the absorbents; and a specific action of the small vessels, which secrete pus from the blood. Ulcers have been variously divided, according to their nature;—into *simple*, *sinuous*, *festulous*, *fungous*, *gangrenous*, *scorbutic*, *sphilitic*, *cancreous*, *inostereate*, *sorofulens*, *phagedenic*, *virulent*, *cacothic*, *sordid*, *carious*, *varicose*, &c. The treatment consists in removing, by appropriate means, the internal and the local causes which keep up the ulceration, and in exciting the vessels of the part, where necessary, by appropriate bandaging, &c.

ULCER, MALIGNANT, Hospital gangrene—u. Putrid, Hospital gangrene.

ULCERA INTESTINALIA, *Gastrelcosis*—u. *Laryngis*, *Phthisis laryngea*—u. *Serpentia oris*, *Aphthæ*—u. *Uteri*, see *Metrophthisis*—u. *Ventriculi*, *Gastrelcosis*—u. *Vesicæ*, *Cystophthisis*.

ULCERATED, *Ulcera'tus*, *Exulcera'tus*, *Helco'des*, (F.) *Ulcéré*. In the state of an ulcer. Affected with ulcers.

ULCERATIO INTESTINALIS, *Enterelcosis*—u. *Ventriculi*, *Gastrelcosis*.

ULCERATION, *Ulcera'tio*, *Exulcera'tio*, *Pyogen'ia corrosi'va*. A superficial ulcer. The formation of an ulcer—*Exulco'sis*, *Elco'sis* and *Helco'sis*.

ULCÈRE, Ulcer—u. *du Larynx*, *Phthisis laryngea*.

ULCEROUS, *Ulcero'sus*, *Helco'des*, *Helco'des*. Having the character of an ulcer.

ULCERS, EGYPTIAN, *Ægyptia ulcera*.

ULCUS, Ulcer—u. *Atonicum*, *Rupia*—u. *Cacoethes*, see *Cacoethes*—u. *Cancerosum*, *Cancer*, *Chancre*—u. *Daeryodes*, see *Daeryodes*—u. *Depascens*, *Phagedenic ulcer*—u. *Fistulosum*, *Hypophora*—u. *Hypulum*, see *Hypulus*—u. *Narium fetens*, *Ozæna*—u. *Pulmonum*, *Phthisis pulmonalis*—u. *Sinuosum*, *Hypophora*—u. *Syriacum*, *Cynanche maligna*—u. *Telephium*, *Telephium*—u. *Tuberculosum*, *Lupus*—u. *Uteri*, *Hysterelcosis*, *Leucorrhæa*.

ULCUSCULA PRÆPUTII, *Herpes præputii*.

ULCUSCULUM, Ulcer—u. *Cancerosum*, *Chancre*.

ULE, *Cicatrix*.

ULETICUS, *Gingivalis*.

ULICUS, *Gingivalis*.

ULITIS, from *ουλερ*, 'solid,' (*σολή ουλερ*, 'solid flesh:') hence *ουλερ*, 'the gum.' *Inflamatio gingivæ*, *Periodontitis gingiværum*, (F.) *Gengivitis*, *Inflammation des Gencives*, from *ουλερ*, 'the gum,' and *itis*, denoting inflammation. Inflammation of the gums.

ULITIS SEPTICA, *Cancer aquaticus*.

ULLUCO, *Tropæolum tuberosum*.

ULMAIRE, *Spiræa ulmaria*.

ULMARIA, *Spiræa ulmaria*.

ULMUS, *U. campestris*, *Ptelea*, *Common Elm*, (F.) *Orme*. *Family*, *Amentaceæ*. *Sex. Syst.* *Pentandria Digynia*. The inner, rough bark of this tree is inodorous; and has a bitter, austere, and mucilaginous taste. It is considered tonic, alterative and diuretic; and has been used, chiefly, in lepra and other cutaneous affections.

ULMUS ALA'TA, *Lynn Wahoo*. The bark of the root has been used successfully as a cataplasm in phlegmonous inflammation.

ULMUS AMERICA'NA, *U. fulva*, *Rough-leaved Elm*, *Red Elm*, *Slippery Elm*. The inner bark is highly mucilaginous, and is used in coughs, diarrhæas, and dysenteries; also, as a poultice for tumours; lacerated and contused wounds, &c.

ULMUS CAMPESTRIS, *Ulmus*—u. *Fulva*, *U. Americana*.

ULNA, *O'leut*, *Fos'hil inferius* seu *majus*, *Canna Bra'chii*, *Os cubiti inferius*, *Os procubital'e*, *Cu'bitus*, *Cubis*, *Arum'do bra'chii major*. Anatomists have given this name to the bone of the forearm, which forms the prominence of the elbow, during the flexion of that joint. It is the longer and larger of the two bones, and is inserted at the inner side. Its upper and larger extremity has, behind, a considerable process, called *olecranon*; and, before, a smaller one, called *coronoid*. These two eminences are separated from each other by the greater *sigmoid* or *semilunar fossa* or *oleo'ranoid cavity*, which receives the articular trochlea of the humerus. The tubercle of the ulna is a small, rough spot, under the root of the coronoid process, for the insertion of the *Brachialis internus*. On the outside of this extremity of the bone is the *lesser sigmoid cavity*. It is articulated with the head of the radius. The inferior extremity of the cubitus, which is much smaller than the superior, and articulated with the radius, has a surface that corresponds to the fibro-cartilage which separates it from the os cuneiforme; and a pointed process, called *styloid*. The body of the ulna is manifestly triangular. It is articulated with the os humeri and radius, and, medially, with the os cuneiforme. It is developed by three points of ossification.

Also, the elbow.

ULNAR, Cubital.

ULNARIS, Cubital—u. *Externus*, see *Cubital muscles*—u. *Gracilis*, *Palmaris longus*—u. *Internus*, see *Cubital muscles*.

ULOCACE, *Cancer aquaticus*, *Stomacace*.

ULON'CUS, from *ουλερ*, 'the gum,' and *εγχοε*, 'tumour.' Swelling of the gums; epulis.

ULORRHAGIA, *Stomatorrhæ'gia*, *Ha-*

*morrh'gia gingiv'arum, Ulorrh'ea*, from *εὐλερ*, 'the gum,' and *ρηγνυμι*, 'I break forth.' Bleeding from the gums.

ULORRHŒA, Ulorrhagia.

ULOTICA, Cicatrisantia.

UL'TIMI-STERNAL. Professor Bèclard has given this appellation to the 6th or last bony portion of the sternum. He calls it also *Ensi-sternal*.

UL'TIMUM MORIENS, 'last dying.' A term given to the part of the economy which dies last.

ULVA CRISPA, Fucus crispus.

UMBIL, YELLOW, Cypripedium luteum.

UMBILICAL, *Umbilical'is, Umbilicatus*, from *umbilicus*, 'the navel.' That which belongs or relates to the navel.

UMBILICAL ARTERIES, which exist only in the fœtus, seem, as it were, continuations of the primitive iliacs. They clear the umbilical ring, and proceed to the placenta, to which they carry the residuum of the blood sent to the fœtus by the umbilical vein. As soon as respiration is established, the blood ceases to pass by the umbilical arteries, which become obliterated, as well as the vein, and are transformed into two very strong ligamentous cords,—the vein forming the *Ligamentum rotundum* of the liver.

UMBILICAL CORD, Funiculus umbilicalis.

UMBILICAL REGION, *R'egio umbilical'is, Mesogastrium, R'egio gastrica seu Mesogastrica*, (F.) *R'egion ombilicale*, is the middle region of the abdomen, in which the umbilicus is placed. The sides of this are called the *flanks* or *lumb'ar regions*. In the umbilical region are the omentum majus; the inferior extremity of the duodenum; the jejunum; and the greater part of the mesentery; the aorta; vena cava; the trunks of the renal arteries and veins; the origin of the spermatic arteries, &c.

UMBILICAL RING, *An'nulus umbilical'is*, (F.) *Anneau ombilical*, is a fibrous ring which surrounds the aperture of the umbilicus, and through which umbilical hernia occurs in children.

UMBILICAL VESSELS, (F.) *Visseaux ombilic'aux*, include the two arteries, and umbilical vein. The umbilical vein arises from the placenta, and terminates at the fissure on the inferior surface of the liver of the fœtus, to which it conveys the blood necessary for its nutrition.

UMBILICALIS, Umbilical.

UMBILICATUS, Umbilical.

UMBILICUS, *Umbo, Om'phalos, Umbilic'um, Radix ventris, Mesomph'alicium, Mesomph'alum, Protom'ois*, (*navel of a new-born child*;) *the navel*; from *umbo*, 'the button or prominence in the midst of a buckler,' or from *ὀμφαλός*, or rather *ομφαλός*, which signifies the same, as well as the navel; (F.) *Ombilic, Nombril*. A round cicatrix, about the median line of the abdomen. It is in the situation of an aperture, which, in the fœtus, affords passage to the vessels of the umbilical cord.

UMBILICUS MARI'NUS; *Cotyle'don marina, Andro'sacè, Acetab'ulum marinum, Andro'sacè Matthi'oli, Fungus petr'æus marinus*. A submarine production, found on the rocks and the shells of fishes, in the south of France. It is reputed to be anthelmintic and diuretic.

UMBO, Elbow, Umbilicus.

UMBRELLA TREE, Magnolia tripetala.

UNCARIA GAMBIR, Nuclea Gambir.

UNCAS, INDIAN, Veratrum viride.

UNCIA, Ounce.

UNCIFORM, *Unciform'is, Uncinatus*, from *uncus*, 'a hook,' and *forma*, 'shape.' That which has the shape of a hook.

UNCIFORM BONE, *Os Unciform'e, Os ham'atum, Os uncinatum*, (F.) *Os crochu*. The fourth bone of the second row of the carpus. Its shape is very irregular. Inwards and forwards, it has a considerable eminence, which is curved upon itself, and gives attachment to the annular ligament of the carpus. It is articulated with the os semilunare, os magnum, os cuneiforme, and the 4th and 5th metacarpal bones. It is developed from a single point of ossification.

UNCIFORM EMINENCE, Hippocampus minor.

UNCINATUS, Unciform.

UNCINUS, Hook.

UNCTIO, Inunction.

UNCTION, Unguentum hydrargyri.

UNCUS, Hook.

UNDERCLIFF, ISLE OF WIGHT, ENGLAND, (CLIMATE OF.) The Undercliff comprehends a tract of country from Dunmore to St. Catherine's Hill, on the south-east coast, about six miles in length, and from a quarter to half a mile in breadth. It is well protected from the colder winds; and the climate is remarkably equable, as well as mild and dry, so that there are not many days during the winter in which the invalid cannot take some exercise in the open air. It is an excellent climate for the pulmonary valetudinarian.

UNDIM'IA. A name given, by Paracelsus, to a tumour, filled with a gelatinous matter, like the white of an egg.

UNDOSUS, Cymatodes.

UNDULATIO, Fluctuation.

UNEDO, Arbutus unedo—u. Papyracea, Arbutus unedo.

UNGEAL MATRIX, see Nail.

UNGUEN, Unguentum—u. Articulare, Synovia.

UNGUENT, ARMATORY, Hoplochrysum.

UNGUENTARIA, see Myristica moschata.

UNGUENTARIUS, *Myrop'arus, Myr'osus, Myrop'oles, Myrop'ulus, Pigmentarius*; from *unguentum*, 'an ointment.' One who makes and sells ointments. A perfumer.

UNGUEN'TUM, *Unguen, Myron*, (F.) *Onguent*, from *ungere*, 'to anoint.' Ointment. Ointments are topical applications, of a consistence more or less analogous to that of lard. They are used, chiefly, as local applications to ulcers and wounds; but are sometimes rubbed upon a part, in cutaneous affections; and especially, where it is desired that the constituents of the ointment should be absorbed. Ointments are of less consistence than cerates, although the terms are often used indiscriminately.

UNGUEN'TUM AC'IDI NITRO'SI, *Ointment of Nitrous Acid, Poma'tum vel Unguen'tum Nitricum vel Oxygenatum*, (F.) *Pommade oxygénée, Graissen oxygénée, Pommade d'Algen*. (*Adip. suille, Bj, acid. nitros. ʒvj*.) Melt the fat and rub in the acid gradually, till cold. Ph. E.) Stimulant. Used in itch and other cutaneous eruptions, and in foul ulcers.

UNGUENTUM ADIPOCERÆ CERORUM, Ceratum

cetacei—u. *Egyptiacum*, *Linimentum eruginum*—u. *Egyptium album*, *Crinomyron*—u. *Album*, *Unguentum cetacei*—u. *Album Resolvens*, *Linimentum ammoniacis fortius*.

UNGUENTUM DE ALTHÆA, *Marshall's low Ointment*, *U. de Terebinthinæ et ceræ*, *Ceratium de Althæa*, *Emplictrum mucilaginosum*, *E. emolliens*, *E. citrinum*, *E. flavum*, *E. de Althæa*, *Unguentum flavum*, *U. citrinum*, *U. resinæ pini sylvestris compositum seu resumptivum seu lenitivum*, (F.) *Onguent de guimauve*, *O. d'althæa*. (*Olei de mucilaginosibus*, 1000 p., *ceræ flavæ*, 250 p., *resinæ terebinthinæ*,  $\text{aa}$  125 p. *Liquefy*; strain and stir till cold. *Ph. P.*) *Common Olive oil* might be substituted for the *Oil of Mucilages*.

UNGUENTUM AMYGDALINUM, *Ceratium Galeni*.

UNGUENTUM ANTIMONII, *U. A. Tartarizati*, *U. A. Potassio-tartratis*, *U. tartari emeticis*, *Ointment of tartarized antimony*. (*Antimon. et potass. tartrat.*  $\text{ʒij}$ , *adipis*  $\text{ʒj}$ .) If a drachm of this ointment be rubbed upon any part, night and morning, it will excite, in a few days, a painful pustular eruption. Hence, it is employed as a counter-irritant. This preparation is also called *Ung. Tartari stibiatum seu emeticum*, *Ung. s. Tartaro stibiatum*, *Adeps Tartaræ stibii medicatus*, *Ung. Tartratis Potassæ stibiatæ*, (F.) *Pommade d'Autenrieth*, *Pommade stibée*.

UNGUENTUM ANTIMONII POTASSIO-TARTRATIS, *Unguentum antimonii*—u. *Antimonii tartarizati*, *U. antimonii*—u. *Antipernium*, see *Antipernius*.

UNGUENTUM AQUÆ ROSÆ, *Ointment of Rose water*, *Cold cream*. (*Aq. Rosæ, ol. amygdal.*  $\text{aa}$  f.  $\text{ʒij}$ ; *catacei*,  $\text{ʒss}$ ; *ceræ albæ*,  $\text{ʒj}$ .) Melt together, in a water bath, the oil, spermaceti and wax; then add the rose water, and stir until it is cold. *Ph. U. S.*) Cooling to irritated surfaces.

UNGUENTUM ARMARIUM, *Hoplochrysa*—u. *Arthanite*, see *Arthanita*—u. *Articulare*, *Synovia*—u. *Basilicon flavum*, *Ceratium resinæ*—u. *Basilicon nigrum*, *Unguentum resinæ nigre*—u. *Basilicon viride*, *Unguentum subacetatis cupri*—u. *Cantharidis*, *Unguentum lyttæ*.

UNGUENTUM CERÆ, (*alba vel flava*) *Wax Ointment*, *Unguentum simplex*, *Linimentum simplex*, *Oil and Bess' Wax*, (F.) *Onguent de cire*. (*Ceræ lbj*, *adipis*  $\text{ʒiv}$ . *Ph. U. S.* or—*ceræ*  $\text{ʒij}$ , *ol. oliv.*  $\text{ʒv}$ .) Emollient. A mild dressing. Also, the basis of most of the compound ointments.

UNGUENTUM CERATUM, *Ceratium Galeni*—u. *Cerussæ*, *Unguentum oxidii plumbi albi*, *Unguentum plumbi subcarbonatis*—u. *Cerussæ acetatæ*, *Ceratium plumbi superacetatis*, *U. plumbi superacetatis*—u. *Citrinum*, *U. de althæa*, *U. hydrargyri nitratis*.

UNGUENTUM CETA'CEI, *Unguentum Spermatæ Ceti*, *U. album*, *Linimentum album*, *Spermaceti ointment*, (F.) *Onguent de blanc de baleine*. (*Cetacei*  $\text{ʒvj}$ ; *ceræ albæ*  $\text{ʒiv}$ , *ol. oliv.* f.  $\text{ʒij}$ . *Ph. L.*) The ordinary dressing for blisters and excoriations.

UNGUENTUM CREASOTI, *Ointment of Creasote*. (*Creasot.* f.  $\text{ʒss}$ ; *adipis*,  $\text{ʒj}$ .) Add the creasote to the lard previously melted with a moderate heat, and stir constantly till cold. *Ph. U. S.*) Used in chronic cutaneous affections.

UNGUENTUM CUPRI SUBACETATIS, *Unguentum subacetatis cupri*.

UNGUENTUM DIGESTIVUM SIMPLEX, *U. Terebinthinæ et ovo'rum vitellii*, *Simple digestive ointment*, (F.) *Onguent digestif simple*. (*Terebinthin. pur.* 64 p. *Vitell. ovor.* No. 2, vel 32 p. *Mix*, for a long time, in a glass mortar, and add, gradually, enough of the *Oil of Hyppuricum* (*Millepertuis*) to make a soft ointment. *Ph. P.*) Detergent. It may be rendered more so by the addition of a little of the *Acetate of copper*.

UNGUENTUM ELEMI, *Balsam of Arcæus*, *Unguentum elemi compositum*.

UNGUENTUM ELEMI COMPOSITUM, *Linimentum Arcæi*, *Unguentum e gummi elemi*, *Ung. de Terebinthinæ et Adipibus*, *U. elemi*, *Ointment of Elemi*, (F.) *Baume d'Arcæus*. (*Elemi lbj*, *terebinthinæ vulgariæ*  $\text{ʒxx}$ , *sevi præparati*  $\text{ʒij}$ , *olivæ olei* f.  $\text{ʒij}$ .) Melt the elemi with the suet; remove it from the fire; and mix in the turpentine and oil. Strain the mixture through a linen cloth. *Ph. L.*) Stimulant and digestive. To keep open issues, &c.

UNGUENTUM EPISPASTICUM DE DAPHNÆ GNIDIO, *Adeps Corticæ daphnæ gnidii medicatus*, (F.) *Pommade de Garou*. (*Adip. præpar.* 320 p., *ceræ*, 32 p., *cort. daphn. gnid.* 128 p. Melt the fat and wax; and add the bark softened in water. Boil until the water is evaporated; then pass through cloth. *Ph. P.*) To keep open blisters, issues, &c. See *Unguentum Mezerei*.

UNGUENTUM EPISPASTICUM FORTIUS, *Cerate of cantharides*—u. *Epispasticum mitius*, *Unguentum lyttæ*—u. *Epispasticum viride*, *Unguentum lyttæ medicatum*—u. *Flavum*, *Unguentum de althæa*—u. *E. Gummi elemi*, *Unguentum compositum*—u. *Hellebori albi*, *Unguentum veratri*.

UNGUENTUM GALLÆ, *Ointment of Galls*, (*Gallæ in pulv.*  $\text{ʒj}$ ; *adipis*  $\text{ʒvij}$ . *M.—Ph. U. S.*) As an astringent in piles, indolent ulcers, &c.

UNGUENTUM HYDRÆ'GYRI, *U. cæri'leum*, *U. Neapolitanum*, *Blus ointment*, *Ceratium mercurialit*, *Adeps Hydrargyro medicatus*, *Mercurial Ointment*, *Uction*, (F.) *Onguent mercuriel ou Napolitain*.

The *Strong Mercurial Ointment*, *Unguentum Hydrargyri fortius* of the London Pharmacopœia, *Unguentum Hydrargyri* (*Ph. U. S.*), is thus made—*Hydrarg. purif.*  $\text{ʒij}$ , *adipis præparat.*  $\text{ʒxxij}$ , *sevi præp.*  $\text{ʒj}$ . Rub till the globules entirely disappear.

The *Milder Mercurial Ointment*,—*Unguentum Hydrargyri Mitius*,—is made by adding, to one pound of the strong two pounds of lard.

Mercurial ointment is antisymphilitic and discutient. It is rubbed on the inside of the thigh, in venereal affections; especially in those cases where mercury, given internally, runs off by the bowels. The *stronger* ointment is used for this purpose. The *weaker* is employed as a dressing, or as an application to cutaneous eruptions.

UNGUENTUM HYDRARGYRI AMMONIATI, *Unguentum hydrargyri præcipitati albi*—u. *Hydrargyri calcis albæ*, *Unguentum hydrargyri præcipitati albi*—u. *Hydrargyri compositum*, *Unguentum hydrargyri nitratis*—u. *Hydrargyri deutoxydi nitrati*, *Unguentum hydrargyri nitrico-oxydi*—u. *ex Hydrargyro mitius dictam cinereum*, *Unguentum oxydi hydrargyri cinereum*.

UNGUENTUM HYDRARGYRI NITRATIS, *U. H. nitri*, *U. supernitrat*is hydrargyri, Ointment of Nitrate of Mercury, Citrine Ointment, Balsamum mercuriale, Ung. hydrargyri compositum, *U. mercuriale citrinum*, Adeps nitratè hydrargyri medicatus, Unguentum citrinum ad scabiam, (F.) Oüguent de nitrate de mercure, O. citrin contre la gale. (Hydrarg. ℥j, acid. nitric. f. ʒx, olei bubuli, f. ʒix; adipis ʒij. Dissolve the mercury in the acid; and, while hot, add the oil and melted lard.—Ph. U. S.)

A milder ointment,—Ung. Nitrat<sup>is</sup> Hydrargyri mitius—is made with triple the quantity of oil and lard. It is stimulant and detergent, and is much used as an application to herpes, porrigo, and cutaneous eruptions. The weaker ointment is sometimes used in ophthalmia tarai, &c.

UNGUENTUM HYDRARGYRI NITRICO-OXYDI, Ung. subnitrat<sup>is</sup> hydrargyri, Ung. Oxydi Hydrargyri rubri, *U. H. oxid<sup>i</sup> rubri* (Ph. U. S.), Ointment of Nitric Oxyd of Mercury, Balsamum ophthalmicum rubrum, Unguentum doutoxydi hydrarg. nitrat<sup>is</sup>, Red Precipitate Ointment, Golden Ointment, Singleton's Eye Salve, *U. Hydrargyri rubri, U. ex Hydrargyro oxydato rubro, U. mercurii rubrum, U. ophthalmicum rubrum, U. subnitrat<sup>is</sup> hydrargyrici.* (Hydrarg. nitrico-oxyd. ʒj, Ung. simpl. ʒviii.) Add the oxyd, reduced to a fine powder, to the melted ointment. Ph. U. S.) Stimulant and escharotic. Applied to foul ulcers, to inflammation of the tarsi, &c., &c.

UNGUENTUM HYDRARGYRI OXYDI RUBRI, Unguentum hydrargyri nitrico-oxydi—u. ex Hydrargyro oxydato rubro, Unguentum hydrargyri nitrico-oxydi—u. Hydrargyri oxydi rubri, Unguentum hydrargyri nitrico-oxydi.

UNGUENTUM HYDRARGYRI PRÆCIPITATI ALBI, *U. Hydrargyri ammoniat<sup>i</sup>*, (Ph. U. S.), *U. submuriat<sup>is</sup> hydrargyri ammoniat<sup>i</sup>*, Unguentum ad scabiam Zelleri, *U. mercuriale album, U. mundificans Zelleri*, Ointment of white precipitate, Ung. e mercurio precipitato, Ung. calcis hydrargyri albæ. (Hyd. præcip. alb. ʒj, adipis suilla seu ung. simpl. ʒiss. Melt the fat, and add the precipitate.) Detergent. Used in cutaneous eruptions, to destroy vermin, &c.

UNGUENTUM HYDRARGYRI RUBRI, *U. hydrargyri nitrico-oxydi—u. Hydrargyri submuriat<sup>is</sup> ammoniat<sup>i</sup>, U. hydrargyri præcipitati albi—u. Hydrargyrici subnitrat<sup>is</sup>, U. hydrargyri nitrico-oxydi—u. Hydrargyri subnitrat<sup>is</sup>, U. hydrargyri nitrico-oxydi—u. Hydrargyri supernitrat<sup>is</sup>, U. hydrargyri nitrat<sup>is</sup>—u. Infusi meloes vesicatorii, U. lyttæ—u. Irritans, U. lyttæ.*

UNGUENTUM IODINI, *U. Iodin<sup>i</sup>*, Ointment of Iodine, (Iodin. gr. xx; alcohol. m. xx; adipis, ʒj.) Rub the iodine first with the alcohol and then with the lard until mixed. Ph. U. S.) Used as a local application to goitrous and other swellings.

UNGUENTUM IODINI COMPOSITUM, *U. Iodin<sup>i</sup> compositum*, Compound Ointment of Iodine. (Iodin. ʒss; Potassii iodid. ʒj; Alcohol, f. ʒj; adipis ʒij.) Rub the iodine and iodide first with the alcohol and then with the lard until they are well mixed. Ph. U. S.)

UNGUENTUM LAURINUM, *Oleum laurinum*, Adeps lauro-medica<sup>tus</sup>, Bay Ointment, (F.) Oüguent on Huile de laurier. (Fol. lauri, 500 p. adip. suilla, 1000 p. Bruise in a marble mor-

tar; evaporate all humidity by boiling; and add Bay berries, in powder, 500 p. Digest and pass through linen. Ph. P.) Reputed to be corroborant and nervine. It is simply emollient.

UNGUENTUM LENTIVUM, *U. de althæa—u. Liliaceum*, Crinomyron.

UNGUENTUM LYTTE, Ung. cantharidis, U. vesicatorium, U. irritans, U. ad vesicæ, Blistering Salve, Ung. infus<sup>i</sup> meloes vesicatorii, Ointment of Spanish Flies, Ointment of Infusion of Spanish Flies, Unguentum epispasticum mitius, Milder blistering Ointment. (Cantharid. in pulv. ʒij; aquæ destillat. On. cerat. resin. ʒviii.) Boil down the water with the Spanish flies to one half, and strain; then mix the cerate with the strained liquor, and evaporate to the proper consistence. Ph. U. S.) It is stimulant and epispastic; and is chiefly used for keeping up the discharge from a blistered surface.

UNGUENTUM LYTTE MEDICATUM, Adeps cantharidibus medicatus, Pomatum seu Unguentum epispasticum viridè stimulans acris, Green blistering Ointment. (F.) Pomade epispastique verte. (Pomati vel unguenti cantharid. 64 p., unguent. populei 168 p., cera alba, 256 p., cupri acetat., est. opii, aa 24 p.) Melt the unguentum populeum, and wax, and add, as they cool, the oxyd of copper, cantharides, and opium. Ph. P.) Use, same as the last.

UNGUENTUM LYTTE MEDICATUM ALBUM, Adeps cantharidibus medicatus albus, Pomatum epispasticum flavum et mitius, Yellow Blistering Ointment, (F.) Pomade epispastique jaune. (Pulv. cantharid. 120 p., adip. præp. 1680 p., aquæ 950 p.) Melt the lard; mix the cantharides, and add the water at the same time; place the whole on a gentle fire; stir continually for two hours, and add a little water to replace that which has been evaporated. Pass through linen and strain. Keep it in a water bath, and add powdered turmeric, 8 p. Let it cool till the superfluous liquid separates; pour off and add yellow wax, 250 p., Oil of Lemon, 8 p. Ph. P.) A complex preparation. Use, same as the last.

An ointment, not very philosophically combined, was used by Dr. Physick, which is known by the name of "*Dr. Physick's Issue Ointment*." It is made by boiling half an ounce of powdered cantharides in two ounces of rose-water, and evaporating until one half of the fluid is driven off, having previously added 15 grains of tartar emetic. The decoction is to be strained, and three ounces of olive oil, an ounce and a half of white wax, and one ounce of spermaceti added to it, and the mixture then boiled till all the water is evaporated.

UNGUENTUM MERCURIALE ALBUM, Unguentum hydrargyri præcipitati albi—u. Mercuriale citrinum, Unguentum hydrargyri nitrat<sup>is</sup>—u. e Mercurio præcipitato, Unguentum hydrargyri præcipitati albi—u. Mercurii rubrum, Unguentum hydrargyri nitrico-oxydi—u. Mundificans Zelleri, Unguentum hydrargyri præcipitati albi.

UNGUENTUM MEZEREI, Ointment of Mezerion. (Mezer. incis. transversim, ʒiv; adipis, ʒxix; cera alba ʒij; moisten the mezerion with a little alcohol, and beat in an iron mortar, until reduced to a fibrous mass; then digest it with the lard, in a salt water bath, for 12 hours; strain forcibly, and allow the strained liquor to cool slowly, so that any undissolved matters

may subside; from these separate the medicated lard; melt it with the wax at a moderate heat, and stir constantly till they are cold.—Ph. U. S.) To keep open blisters, issues, &c.

**UNGUENTUM MURIA'TIS HYDRARGYRI OXYGENA'TO MEDICATUM**, *Adeps muria'te hydrargyri oxygenato medicatus, Cyrillo's Ointment, (F.) Pommade de Cyrillo. (Hydrar. oxymur. 4 p. adipis suilla præp. 32 p. Ph. P.)* Antivenereal and alterative. Used in friction, ʒss at a time.

**UNGUENTUM NARDINUM**, see *Nardus Indica*—u. Neapolitanum, Unguentum hydrargyri—u. Nervinum, Unguentum Sambuci—u. Nitricum vel oxygenatum, Unguentum acidi nitrosi.

**UNGUENTUM OPHTHALMICUM**, *Adeps ox'ido hydrargyri rubro et plumbi aceta'te medica'tus, Regent's Pommade ophthalmique, (F.) Pommade ophthalmique. (Butyr. recent., aq. rosar. lavat. 4j p., camphor., oxyd. hydrarg. rubr., acetatis plumbi, ʒs 0.25 p. Mix intimately. Ph. P.)* In chronic inflammation of the conjunctiva or tarsi.

**UNGUENTUM OPHTHALMICUM**, Unguentum oxidi zinci impuri—u. Ophthalmicum rubrum, Unguentum hydrargyri nitrico-oxydi.

**UNGUENTUM OXIDI HYDRARGYRI CINEREI**, *Adeps seu Unguentum ex hydrargyro mit'ius dictum cinereum, Ointment of gray oxide of mercury, (F.) Onguent gris. (Oxyd. hydrarg. ciner. p. j, adipis suilla, p. iij. Ph. E.)* Properties like the mercurial ointment. It is not much used.

**UNGUENTUM OXIDI PLUMBI ALBI**, *Ung. cerus'ae, Ung. album, Ung. subacetatis plumbi, Ointment of white oxide of lead, White ointment. (Ung. simplicis, p. v., oxyd. plumb. alb. p. j. Ph. E. & P.)* Cooling and desiccative. Applied to excoriated and burnt surfaces.

**UNGUENTUM OXIDI PLUMBI CARBONATI**, U. Plumbi subcarbonatis—u. Oxidi zinci, Unguentum zinci.

**UNGUENTUM OXIDI ZINCI IMPURI**, *Unguentum tur'ia, Ung. ophthalmicum, Eye Salve, Adeps ox'idi zinci medica'tus, Tutty ointment, Ointment of impure oxide of zinc. (Linim. simpl. p. v. oxyd. zino. impur. præp. p. j. Ph. E.)* Generally used in ophthalmia tarsi and atonic ophthalmia.

**UNGUENTUM PICIS LIQ'UÏDÆ**, *Ung. Picis, Ung. s. Picis, Tar Ointment. (Picis liquid., sevi, sing. ℞j. Melt and stir till cold.)* Stimulant and detergent. Used in tinea capitis, and other cutaneous eruptions.

**UNGUENTUM PICIS NIGRÆ**, Unguentum resinæ nigræ—u. Acetatis plumbi, Ceratum plumbi superacetatis—u. Plumbici carbonatis, Unguentum plumbi subcarbonatis—u. Plumbi carbonatis, Unguentum plumbi subcarbonatis—u. Plumbi oxydi carbonatis, Unguentum plumbi subcarbonatis—u. Plumbi subacetatis, Unguentum oxidi plumbi albi.

**UNGUENTUM PLUMBI SUBCARBONATIS**, U. *Plumbi Carbonatis, Ceratum de Cerus'sa, Ung. album, U. album simplex, U. Carbonatis Plumbici, U. Cerus'ae, U. Oxidi Plumbi Carbonatis, (F.) Onguent blanc de Rhasso, O. de Cerusse, O. de Tornomira. (Plumbi Carbonat. in pulv. subtiliss. ʒij; Unguent. simpl. ℞j. Add the carbonate of lead to the ointment previously softened over a gentle fire, and mix.—Ph. U. S.)* Chiefly used as a dressing for burns.

**UNGUENTUM PLUMBI SUPERACETATIS**, U. *acetatis plumbi, Ointment of sugar of Lead, Un-*

*guentum Saturninum, U. cerus'ae aceta'te, Balsamum uniuersal'è. (Olive oil, ℞ss, white wax, ʒiiss, superacetate of lead, ʒij.)* Cooling, desiccative. Called, also, *Balsamum Saturninum, Butyrum Saturni, Linimentum plumbatum, Pomatum saturni, Ung. triphar'macum.*

**UNGUENTUM POPULEUM**, *Adeps papaver'is, hyoscyamo, et belladonn'æ medica'tus. (Fresh buds of the Populus nigra, 500 p., macerated in adeps suilla præp. melted, 1500 p. for 24 hours. Preserve this. Take black poppy leaves, belladonna, hyoscyamus, black nightshade, ʒs 128 p.; bruise in a mortar with the former preparation; boil until all the humidity is evaporated, and strain. Ph. P.)* Anodyne. Applied to local inflammations, hemorrhoids, sore nipples, cancer, &c. Green elder ointment is often sold for this.

**UNGUENTUM POPULEUM**, see *Populus*.

**UNGUENTUM POTASSÆ HYDRIODATIS**, *Potassii Iodidi, Ointment of Hydr'iodate of Potass. (Hydriodate of potass ʒss, hog's lard ʒiiss.)* Half a drachm of this ointment is rubbed on scrofulous glands, goitre, &c.

**UNGUENTUM POTASSII IODIDI**, Unguentum Potassæ Hydriodatis—u. Pulvis meloës vesicatorii, Cerate of cantharides—u. Resinæ flavæ, Ceratum resinæ flavæ.

**UNGUENTUM RESINÆ NIGRÆ**, *Ung. resina nigrum, Ung. basilicon nigrum, Ung. tetrapharm'acum, Black Basilicon, Black resin ointment, Unguentum picis nigra. (Resin. nigr., cera flava, resinæ flav. ʒs ʒix, olei olive Oj. Ph. L.)* Uses, the same as the *Ceratum resinæ of Yellow basilicon.*

**UNGUENTUM RESINÆ PINI SYLVESTRIS COMPOSITUM**, Unguentum de althæa—u. Resinosum, Ceratum resinæ flavæ—u. Resumptivum, Unguentum de althæa.

**UNGUENTUM SAMBU'CI**, *Ung. sambu'cinum, Green ointment, Unguentum nervinum, Elder ointment, (F.) Onguent de sureau. (Sambuci flor. ℞ij, adipis præp. ℞ij. Boil. Ph. L. & D.)* Emollient.

**UNGUENTUM SATURNINUM**, Unguentum plumbi superacetatis—u. Sabinae, Ceratum Sabinæ—u. ad Scabiem Zelleri, Unguentum hydrargyri præcipitati albi—u. Simplex, Ceratum Galeni, Unguentum cereæ—u. Solidum de cicuta, Emplastrum cicutaæ—u. Spermatis ceti, Unguentum cetacei.

**UNGUENTUM STRAMO'NII**, *Ointment of Stramonium. (Stramon. fol. recent. concis. ℞j; Adipis ℞ij; Cera flava ℞ss. Boil the leaves in the lard until they become friable; then strain through linen. Add the wax previously melted, and stir until they are cold.—Ph. U. S.)* An anodyne ointment to irritable ulcers, hemorrhoids, &c.

**UNGUENTUM SUBACETA'TIS CUPRI**, U. *Cupri subacetatis, Ung. dete'gens, Ung. basilicon vir'idè, Ung. ar'uginis, Balsamum vir'idè, Ointment of subacetate of copper, Verd'igris ointment. (Cupri subacet. in pulv. subtiliss. ʒj; Ung. simpl. ʒxv. Add the subacetate to the ointment previously melted with a moderate heat, and stir till cold.—Ph. U. S.)* Detergent and escharotic.

**UNGUENTUM SULPHURATUM AD SCA'BIE'M**, *Adeps sulphur' et ammo'niæ muria'te medica'tus. (Adipis, 120 p. sulph. lot. 60 p. ammo'niæ muriat., aluminis sulphat. ʒs 4 p., fiat Unguentum. Ph. P.)* Antipsoric.

*Bailey's Itch Ointment* is composed of olive oil, lard, nitre, alum, sulphate of zinc, and cinabar, scented with oil of anised, oil of orangeum, and oil of spike, and coloured with alkanet root.

UNGUENTUM SULPHURATUM ALCALINUM AD SCABIEM, *Adeps sulphur et carbonat Potassæ medicatus, Helmerick's Alkaline Sulphurated Itch Ointment.* (Adip. præp. 800 p., sulphur. lot. 200 p., carbonat. potass. 100 p., fiat ungu. Ph. P.) Use, same as the last.

*Bateman's Itch Ointment* resembles this. It is coloured with cinabar and scented with essence of bergamot.

UNGUENTUM SULPHURIS, *Ung. e Sulphure, Sulphur ointment.* (Sulph. sublim. ℞j, adip. præp. ℞ij. Ph. U. S.) Used chiefly in itch and some herpetic affections.

UNGUENTUM SULPHURIS COMPOSITUM, *Compound Sulphur Ointment, Itch Ointment, Unguentum Antiporiticum, Jackson's Itch Ointment, Pommade antiporiquie de Jasser.* (Sulph. sublim. ℞ss, veratri rad. contus. ℞ij, potassæ nitrat. ℞j, saponis mollis ℞ss, adipis ℞ss, ol. Bergamot. m. xxx Ph. L.) The UNGUENTUM SULPHURIS COMPOSITUM of the Pharm. U. S. (1842) is made as follows:—Sulphur. ℞j; Hydrargyri ammoniat., Acid. Benzoic. aa ℞j; ol. Bergamot., Acid. sulphuric. aa f. ℞j; Potassæ Nitrat. ℞ij; adipis ℞ss. To the melted lard, add the other ingredients, and stir till cold. Use, the same as the last; but it is more stimulating.

UNGUENTUM SUSINUM, *Crinomyron*—u. Tartari emetici, U. antimonii tartarizati—u. Tartari stibiati, U. antimonii tartarizati—u. e Tartaro potassæ stibiati, U. antimonii tartarizati—u. Tartratis potassæ stibiati, U. antimonii tartarizati—u. de Terebinthinâ et adipibus, U. elemi compositum—u. de Terebinthinâ et cerâ, U. de althæâ—u. Terebinthinæ et ovorum vitelli, U. digestivum simplex—u. Tetrapharmacum, Basilicon, U. resinæ nigre—u. Tripharmacum, U. plumbi superacetatis—u. Tutiae, U. oxidi zinci impuri—u. ad Vesicata, U. lyttæ—u. ad Vesicatoria, Cerate of cantharides—u. Vesicatorium, U. lyttæ—u. Oxidi zinci, U. zinci.

UNGUENTUM TABACI, *Tobacco Ointment.* (Tabac. recent. concis. ℞j; Adipis, ℞j. Boil the tobacco in the lard over a gentle fire, till it becomes friable; then strain through linen.—Ph. U. S.) Applied to irritable ulcers, tinea capitis, &c.

UNGUENTUM TARTARI EMETICI, *Unguentum antimonii.*

UNGUENTUM VERA'TRI, *Unguentum helleb'ori albi, White hellebore ointment.* (Veratr. rad. pulv. ℞ij, adipis præp. ℞viii, olei limon. m. xx.) Used in cases of itch, where sulphur is objected to. It is not equally efficacious.

The principal ingredients in the EDINBURGH OINTMENT are white hellebore and muriate of ammonia.

UNGUENTUM ZINCI, *Ung. oxidi zinci, U. Zinci Oxidi, Zinc Ointment.* (Zinci oxyd. ℞j, adipis. ℞vj. Ph. L.) Use, the same as that of the *Unguentum tutiæ.*

UNGUENTUM ZINCI OXIDI, U. zinci.

UNGUIS, *Hippocampus minor, Nail, Pterygion*—u. Halleri, *Hippocampus minor*—u. Odoratus, *Blatta Byzantia.*

UNGUIS OS, *Os lachrymæll.* A small, quadrilateral, very thin, and semi-transparent bone,

which has been compared to a human nail, and is situate at the anterior and inner part of the orbit. It aids in the formation of the lachrymal gutter and the nasal duct. It is articulated with the frontal, superior maxillary, ethmoid, and the inferior spongy bones, and is developed by a single punctum ossificationis.

UNGULA CABALLINA, *Tussilago.*

UNGULÆ PALPERRARUM, see *Tarsus.*

UNILOCULAR, *Unilocularis*, from unus, 'one,' and loculus, 'a cell.' Having one cell.

UNIO, Pearl.

UNIOCLUSUS, *Cyclops, Monoculus.*

UNIPARIENS, *Uniparus.*

UNIPARIENT, *Uniparus.*

UNIPAROUS, *Unipariens, Uniparius*; from unus, 'one,' and pario, 'I bring forth.' Producing one at a birth.

UNISEMA DELTIFOLIA, *Pontederia cordata, Shovel Pickerelweed, Pond Shoel, Shovel leaf, Water Plantain.* An indigenous plant, *Sec. Syst.* Hexandria Monogynia, which grows in water, and flowers from June to August. The root is emollient and astringent.

UNITING BANDAGE, (F.) *Bandage unissant.* A bandage for bringing the edges of a wound into approximation. The arrangement of such a bandage differs according as the wound is transverse or longitudinal.

UNOCULUS, *Borgne, Cyclops, Monoculus.*

UNWELL (Being), *Menstruation.*

UPAS. A word used in the Archipelago of Molucca and Surda, and signifying *Vegetable Poison, Ipo, Bohon Upas, Boa Upas, Pohan Antiar, Boom Upas.* A substance used by the natives of those places for poisoning their arrows. The smallest quantity is capable of destroying the largest animal. The tree which produces it is said to be the *Antiaris Toxicaria.* Another species of upas, the *U. Toxicaria*, is the produce of a *Strychnos.* Many idle stories are told regarding the upas, most of which are fabulous.

URACHUS, *Urachus, Urinaculum*, from *ovos*, 'urine,' and *ovos*, 'I contain.' (F.) *Ouragus.* The urachus, in certain animals, is a long membranous canal, which arises from the bladder, makes its exit from the abdomen by the umbilicus, and terminates in the pouch called *allantois.* According to Sabatier, this is the arrangement of the urachus in the human fœtus; but Bichat and other anatomists consider, that when the canal exists in it, it is a malformation. They regard it as a kind of suspensory ligament of the bladder, extending from the top of that organ to the umbilicus; and, at the umbilicus, conjoined with the abdominal aponeurosis.

URACRATIA, *Enuresis.*

URACUS, *Urachus.*

URANA, *Ureter.*

URANE, *Urina.*

URANISCONITIS, from *ουρανιστις*, 'the palate,' and *itis*, denoting inflammation. *Pala-titis.* Inflammation of the palate.

URANISCOPLASTICE, from *ουρανιστις*, 'the roof of the mouth,' and *πλαστικος*, 'forming.' The operation of engraving in case of deficiency of the soft palate.

URANISCORRHAPHIA, *Staphylorrhaphy.*

URANISORR, *Palate.*

URANORRHAPHIA, *Staphylorrhaphy.*

URAPOSTEMA, *Abscessus sinus urinalis, Ure-*

*do'ma*. A tumefaction produced by the escape of urine. An abscess containing urine.

URARI, Curare.

URAS, Urate.

URATE, *Uras, Lithate, Lithas*; from *ουρον*, 'urine.' A generic name for salts, formed by the combination of uric or lithic acid with different bases. *Urats* or *Lithate of Soda* is found in arthritic calculi:—*Urats* or *Lithate of Ammonia* in some urinary calculi.

URE'A, *Uren, Uren'ium, U'ricum, Mate'ria urino'sa, Princip'ium seu Sal urino'sum*, (F.) *Urie*. Same etymon. A white, pearly, brilliant substance, in transparent plates, inodorous, and of a cool taste; very soluble in water; deliquescent, and soluble in alcohol. It exists, in great quantity, in the urine; and is an essential part of it. It has been used as a diuretic.

Dose, gr. xv to ʒj.

UREC'HY'SIS, *Urech'ysis*, from *ουρον*, 'urine,' and *εχυσις*, 'effusion.' Effusion of urine into the cellular membrane.

UREDIO, Urticaria.

UREE, Urea.

UREMA, Urine.

UREN, Urea.

URENIUM, Urea.

URENS, Caustic.

UREORRHEA, Diabes.

URESIAESTHESIS, Diuresisæsthesis.

URESIS, Micturition.

URE'TER. Same etymon. *Utrana, Vena alba renum, Cana'lis ner'veus fistulo'sus renum, Ductus seu Ductor Uri'næ, Vas urina'rium*, (F.) *Ureters*. A long, excretory canal—membranous and cylindrical—which conveys the urine from the kidney to the bladder. It extends, obliquely, between the pelvis of the kidney, with which it is continuous, and the *bas fond* of the bladder, into which it opens. It enters at the posterior and inferior part, for some distance between the coats, and opens into the cavity of the bladder, at the posterior angle of the *Trigone vesical*. The ureter is formed of an exterior, white, opaque, and fibrous membrane; and of an inner, which is mucous.

URETERAL'GIA, from *ουρητηρ*, 'the ureter,' and *αλγος*, 'pain.' Pain in the course of the ureter,—as from calculus, *Ureteral'gia calculo'sa*.

URETERALGIA CALCULOSA, see Ureteralgia—u. Inflammatoria, Ureteritis.

URETÈRE, Ureter.

URETERICUS. An epithet for ischury, &c., arising from an affection of the ureter.

URETERITIS, *Ureteral'gia inflammato'ria, Ureterophlegma'sia*. Inflammation of the ureter; generally caused by calculus.

URETERO-LITH'ICUS, from *ουρητηρ*, 'the ureter,' and *λιθος*, 'a stone.' An epithet applied to ischury or other affection caused by a stone in the ureter.

URETEROLITHUS. Same etymon. Calculus in the ureter.

URETEROPHLEGMASIA, Ureteritis.

URETERO-PHLEGMAT'ICUS, from *ουρητηρ*, 'the ureter,' and *φλεγμα*, 'phlegm or mucus.' Any affection caused by mucus accumulated in the ureter.

URETERO-PY'ICUS, from *ουρητηρ*, 'the ureter,' and *πυος*, 'pus.' An epithet applied to affections caused by the presence of pus in the ureter.

URETERORRHAG'IA, from *ουρητηρ*, 'the

ureter,' and *ρραγη*, 'rupture.' Hemorrhage from the ureter.

URETERO-STOMAT'ICUS, from *ουρητηρ*, 'the ureter,' and *στομαξ*, 'orifice.' That which is dependent upon obstruction of the orifice of the ureter.

URETERO-THROMBOÏ'DES, from *ουρητηρ*, 'the ureter,' *θρομβος*, 'grumous blood,' and *αιδα*, 'resemblance.' Ischury from grumous blood in the ureter.

URE'THRA, *ουρηθρα, Cana'lis seu Mea'tus seu Ductus urina'rius, Urias, Ure'tra, Fistula urina'ria, Iter urina'rium seu Uri'næ*; (F.) *Urèthre, Urètre*, from *ουρον*, 'urine.' The excretory duct for the urine in both sexes; and for the sperm in man. In the latter, it is 8 or 10 inches long; and extends from the neck of the bladder to the extremity of the penis, in which its external aperture is situate. In the male urethra, three portions are distinguished:—1. A *Prostatic portion*, near the bladder, about an inch and a quarter in length, which traverses the prostate gland:—2. A *membranous portion, Isthmus ure'thræ, Pars ure'thræ membrana'cea*, from 8 to 10 lines long, which is separated from the rectum by the cellular tissue only:—3. A *spongy portion*, which expands, anteriorly, to form the glans, and which commences at the *bulb of the urethra*. Before opening externally, the canal has a dilatation, called the *Fossa or Fossic'ula navicularis*. On the interior of the urethra two white lines are perceptible—the one above, the other below. The latter commences at the *verumontanum*; and at the surface of this, the *ejaculatory ducts* and *prostatic ducts* open. The urethra is lined, in its whole extent, by a mucous membrane; on which are seen, particularly at the bulb, the orifices of a number of follicular ducts, called *Sinuses of Morgagni*. The arteries of the urethra are numerous, and proceed from the internal pudic,—the largest branches entering the bulb. The veins follow the course of the arteries. The lymphatics pass into the inguinal and hypogastric plexuses. The nerves come from the pudic and gluteal. In the *female*, the urethra is only about an inch long. It is wider than in man, and susceptible of great dilatation. It is very wide at its commencement; and descends obliquely forwards, to terminate at the top of the external aperture of the vagina by the *mea'tus urina'rius*. In its course, it is slightly curved, the concavity being forwards.

URE'THRA, BLIND DUCTS OF THE, see Cæcus—u. Mucous lacunæ of the, see Cæcus.

URE'THRAL, *Ure'thral'is, Ure'thricus*, from *ουρηθρα*, 'the urethra.' Relating to the urethra.

URE'THRAL'GIA, from *ουρηθρα*, 'the urethra,' and *αλγος*, 'pain.' Pain in the urethra. Gonorrhæa.

URE'THRE, Urethra.

URETHREMPHRAXIS, Urethrophraxis.

URETHRITIS, Gonorrhæa.

URETHROBLENNORRHÆA, from *ουρηθρα*, 'the urethra,' *βλεννα*, 'mucus,' and *ρραγη*, 'I flow.' Gonorrhæa; gleet.

URETHROHÆMORRHAGIA, Urethrorrhagia.

URETHROPHRAX'IS, *Urethrophrax'is*, from *ουρηθρα*, 'the urethra,' and *ορασσω*, 'I obstruct.' Obstruction of the urethra.

URETHROPLASTIC, *Urethroplast'icus*;

from *ουρηθρα*, 'the urethra,' and *πλασσω*, 'I

form.' An epithet given to the operation which supplies defects in the canal of the urethra through which the urine escapes.

**URETHRORRHA'GIA**, *Urethrorrhagia*, *Urethrorrhœmia*, *Catarrhœgia stillati'ia*, *Hæmatu'ria stillati'ia*, from *ουρηθρα*, 'the urethra,' and *εγγυρηται*, 'I break out.' Hemorrhage from the urethra.—Frank.

**URETHRORRHŒ'A**, from *ουρηθρα*, 'the urethra,' and *ρεω*, 'I flow.' A discharge of any kind from the urethra.

**URETHROSTENO'SIS**, *Strictu'ra ure'thræ*, *Urosteno'sis*, from *ουρηθρα*, 'the urethra,' and *στενωσις*, 'narrowness.' Stricture of the urethra.

**URETHROT'OMUS**, (F.) *Urethrotome*, from *ουρηθρα*, 'the urethra,' and *τεμνω*, 'I cut.' An instrument so called by Le Cat, with which he divided the skin, and laid open the urethra, in the operation for lithotomy. Also, an instrument for dividing strictures of the urethra.

**URETHROT'OMY**, *Urethrotom'ia*; same etymon. An operation, which consists in opening the urethra for the removal of stricture. See *Boutonnière*.

**URETHRYMENO'DES**, from *ουρηθρα*, 'the urethra,' and *μεμν*, 'a membrane.' That which is caused by a membrane formed in the urethra.

**URETICUS**, Diuretic, Urinary.

**URETRA**, Urethra.

**URETRE**, Urethra.

**URETRIS**, Urinal.

**URIAS**, Fistula, (urinary), Urethra.

**URIASIS**, Lithia, Uresis.

**URIC ACID**, *Ac'idium U'ricum*, *Ac'idium uro-lith'icum*, *Lithic Acid*, *Acidum lith'icum*. An acid which exists in human urine, and which constitutes the greater part of urinary calculi. It is often deposited from the urine in health. See Calculi, urinary.

**URICUM**, Urea.

**URICUS**, Urinary.

**URINA CEREBELLA**, see *Cerebella*—u. Chyli, see *Urine*—u. Cibi, see *Urine*—u. Diabetica, *Urine*, diabetica—u. Febrilis, *Urine*, febrilis—u. Furfuracea, see *Furfuraceus*—u. Galactodes, see *Galactodes*—u. Genitalis, *Sperm*—u. Jumentosa seu *Jumentaria*, *Urine*, jumentosa—u. Mucosa, *Cystirrhœa*—u. Nephelodes, see *Nepheloid*—u. Oroboïdes seu *Oroboides*, see *Oroboides*—u. Pericardil, see *Pericardium*—u. Potiis, see *Urine*—u. Sanguinis, see *Urine*—u. Vaccæ, *Urine*, cows'.

**URINACULUM**, *Urachus*, Urinal.

**URINÆ PROFLUVIUM**, *Diabetes*—u. *Suppessio*, *Ischuria*—u. *Stillicidium*, *Strangury*—u. *Substillum*, *Strangury*.

**UR'INAL**, *Urinato'rium*, *Chernid'ium*, *U'ranè*, *Ure'tris*, *Urinac'ulum*, *Urodochi'um*, *Urod'ochè*, *Urodoché'um*, *Uratra'cium*, *Matra'cium*, *Mat'ula*, *Matel'la*; from *urina*, 'urine.' A name given, 1. To certain vessels, used to pass the urine into. 2. To reservoirs, of different shapes and character, which are adapted to the penis, in cases of incontinence of urine, and which are intended to receive the urine as it flows off.

**URINALIS**, Urinary.

**URINARIA**, *Antirrhinum linaria*, *Leontodon taraxacum*.

**URINARY**, *Urina'rius*, *Urina'lis*, *Urino'rus*, *Uricus*, *Uret'icus*. Same etymon. That which relates to the urine.

**URINARY BLADDER**, *Vesic'a Urina'ria*, *Cystis*, *Urocy'stis*, (F.) *Vessie*. A musculo-membra-

nous reservoir, intended for the reception of the urine, until the accumulation of a certain quantity solicits its excretion. The bladder is situated in the hypogastric region, between the rectum and pubis in man; and between the pubis and vagina in the female. Its upper region is not covered, except by the peritoneum, posteriorly. From its centre arises the *urachus*. Its lower region is bounded, anteriorly, by the prostate, in man; and rests on the vesiculae seminales and rectum. In the female, it corresponds to the vagina. The lowest portion of this region bears the name *Bas-fond*. The anterior surface of the organ is not covered by peritoneum. It is attached to the symphysis pubis by a fibro-cellular expansion called the *anterior ligament*. The posterior ligaments are duplicatures of the peritoneum on its posterior surface, which extend from this surface to the rectum in the male, and to the uterus in the female. The bladder is composed of a serous membrane, formed by the peritoneum;—of a muscular membrane; of a somewhat thick layer of cellular tissue; and is lined on its inner surface, by a mucous membrane, which is, sometimes, raised up, here and there, in long prominences or *columns* by the muscular fibres beneath. To this condition, the French anatomists give the term—*vessie à colonnes*. In the *bas-fond* the two ureters open, and the urethra commences; and the triangular space, which the apertures of these three canals leave between them, is called, by the French, the *Triangle vésical* or *Vesical Triangle*, *Trigonu' Lacouta'di*. In the orifice of the urethra, which is also called the neck of the bladder, there is, at its lower part, a more or less prominent tubercle, which is formed by the anterior angle of the *Trigonu' vésical*, and is called the *Vesical uvula*, (F.) *Luette vésicale*.

The arteries of the bladder proceed from the hypogastric, umbilical, sciatic, middle hemorrhoidal, and internal pudic. Its veins, which are more numerous than the arteries, open into the hypogastric venous plexus. Its nerves emanate from the sciatic and hypogastric plexuses; and its lymphatic vessels pass into the hypogastric ganglia.

**URINARY CALCULI**. The calculi which form in the urinary passages. See *Calculi*, urinary.

**URINARY PASSAGES**, (F.) *Voies urinaires*. The aggregate of canals and cavities intended to contain the urine and convey it externally. These *ways* are composed of excretory ducts, which form the tubular portion of the kidney; of calices; pelvis; ureters; bladder; and urethra.

**URINATORIUM**, Urinal.

**URINE**, *Uri'na*, *U'ron*, *U'ra*, *Lot'ium*, *Lit'is*, *Lapis au'reus*, *Omich'ma*, *Recremen'ta* seu *Re'trimen'ta vesic'æ*. An excremental fluid; secreted by the cortical part of the kidney; filtered through the tubular portion; poured *guttatim* from the apices of the tubular papillæ into the pelvis of the kidney; and transmitted by it to the ureters; which convey it slowly, but in a continuous manner, into the bladder, where it remains deposited, until its accumulation excites a desire to void it. The excretion of the fluid takes place through the urethra; and is caused by the action of the abdominal muscles and diaphragm and the contraction of the fibrous coat of the bladder. Urine is transparent; of a citron-yellow colour; of a peculiar odour, and

of an acid, saline, and slightly bitter taste. That which is passed some time after taking fluid, is less coloured, and less odorous and dense than that which is voided 7 or 8 hours after eating. The first is the *Uri'na potûs*, (F.) *Urine de la Boisson*, *Urine from drink*:—the latter *Uri'na san'guinis*, (F.) *Urine de la digestion*, *Urine de la coction*, *Urine cuite*, *Cocted urine*, *Urine of digestion*. Three distinct varieties of urine may, according to Dr. Golding Bird, be recognised: *First*. That passed some little time after drinking freely of fluids, which is generally pale, and of low specific gravity—1.003 to 1.009—*Urina potûs*. *Secondly*, That secreted after the digestion of a full meal; s.g. 1.020 to 1.028, or even 1.030—*Urina chyli vel cibi*. *Thirdly*, That secreted independently of the immediate stimulus of food and drink, as after a night's rest, which is usually of average density—1.015 to 1.025, and presents the essential characters of urine—*Urina sanguinis*.

The following are the ordinary constituents of healthy human urine:—urea, uric acid, [hippuric acid;] extractive matters, embracing alcohol extract, spirit extract, and water extract, with their respective constituents; mucus; brown colouring matter of the urine, (hæmaphæin;) red colouring matter of the urine, (uroerythrin;) carbonic, lactic, hydrochloric, sulphuric, phosphoric, silicic, and hydrofluoric acids; soda; potassa; ammonia; lime; magnesia; and peroxide of iron. The proportion of solid matters in 1000 parts of urine may vary from 20 to 70. The following table expresses the relative amounts of the different components in every 100 parts of the solid matter, according to the analysis of different observers.

	Berzelius,	Lakmann,	Simon,	Marchand,
Urea,	45.10	49.68	33.70	48.91
Uric Acid,	1.50	1.61	1.40	1.59
Extractive matter,				
Ammonia, Salts,	36.30	23.05	42.60	32.49
and Chloride of Sodium,				
Alkaline Sulphates,	10.30	11.58	8.14	10.18
Alkaline Phosphate,	6.68	5.96	6.50	4.57
Phosphates of lime and magnesia,	1.50	1.97	1.59	1.81

Its average specific gravity is about 1.015. The quantity passed by the adult in the 24 hours varies. On the average it may amount to two pounds and a half. Sometimes, the urine, in health and disease, exhibits appearances that have received special names. Thus, that which is characterized by a deficiency of solid matters generally, has been called *Hydruria*, ('water,') by a deficiency of urea, *Anazoturia*, (az, privative, and azote,) by a superabundance of urea, *Azoturia*. Urine in which the deposit consists of lithic acid, and the lithates, has been termed *Lithuria*; and that in which the deposit consists of the earthy and earthy-alkaline phosphates, *Ceramuria*, *νεγμυρε*, 'potter's earth,' &c., &c. At times, a *pellicle* forms on the surface (*Cremor urinæ*) which consists of mucus and some salts: at others, there is a *cloud*, (*Nubecula*, *nubes*;) towards its upper part, which is called *Enaors'ema* when it is suspended, as it were, about the middle of the liquid. Occasionally, there is a sediment, to which the names *Hypos'tasis*, *Sedimentum*, &c., have been given. (See these various words.) The urine is often deserving of attention in disease; but it has been considered a matter of more importance than it merits. Some empi-

rics have presumed to pronounce on the nature of disease by simply inspecting it. See Uroscopy.

Human urine was, at one time, considered aperient; and was given in jaundice, in the dose of one or two ounces. Cow's urine, *Urina Vaccæ*, *Allflower water*, was once used, warm from the cow, as a purge, in the dose of Oss.

Urine has been variously designated by pathologists, according to its appearance, &c., for example:—

**URINE, ANÆMIC**, *Uri'na anæ'mica*. Used, but not felicitously, for the form of urine that occurs in anæmia, chlorosis, &c.—Beccquerel.

**URINE ARDENTE**, *Ardent urine*—u. Bloody, *Hæmaturia*—u. *de la Boisson*, *Urine*, hysterical, see *Urine*—u. *de la Coction*, see *Urine*.

**URINE, CRUDE**, (F.) *Urine crus*. Urine that is thin, transparent, and but little coloured, affording neither cloud nor deposit.

**URINE, CRUE**, *Urine*, crude—u. *Cuite*, see *Urine*.

**URINE, CYSTIC**, *Cystinuria*. Urine containing cystine or cystic oxide in solution, or as a deposit.

**URINE, DIABETIC**, *Uri'na diab'etica*. Urine passed in *Diabetes mellitus*, *Melituria*. It contains a large quantity of sugar analogous to that of the grape, which may be separated in the form of crystals. In other respects, the urine is very abundant and very limpid in that affection.

**URINE DE LA DIGESTION**, see *Urine*.

**URINE, DROP'SICAL**, is an ammoniacal urine, often containing much albumen and scarcely any urea.

**URINE, DYSPEP'TIC**, has been found to precipitate tannin abundantly, and to soon putrefy.

**URINE ÉPAISSE**, *Urine*, mucilaginous.

**URINE, FEBRILE**, *Uri'na febr'ilis*. Urine discharged in inflammation and inflammatory fever.

**URINE, FILAMENTOUS**, see *Filamentous*.

**URINE, FLOCCULENT**, (F.) *Urine floconneuse*, is when the fluid is troubled by flocculi, suspended in it.

**URINE, FURFURACEOUS**, see *Furfuraceous*—u. *Floconneuse*, *Urine*, flocculent—u. *des Goutteux*, *Urine*, gouty.

**URINE, GOUTY**, (F.) *Urine des goutteux*, contains much phosphate of lime, and after severe attacks of gout, precipitates a mixture of the uric and rosacic acids.

**URINE HUILEUSE**, *Urine*, oily.

**URINE, HYSTERICAL**, is clear, colourless, and similar to the *Urine de la Boisson*.

**URINE, ICTERIC**, contains bile—u. Incontinence of, *Embrisis*.

**URINE OF INFLAMMATORY DISEASES**. This is, generally, small in quantity, and very high-coloured.

**URINE, INVOLUNTARY DISCHARGE OF, ENURESIS**.

**URINE, JUMENTOUS**, *Uri'na jumentosa* seu *jumenta'ria*, (F.) *Urine jumentouse*. A term used, by the French, for ammoniacal urine, rendered turbid by a substance similar to small grains of dust, which causes it to resemble the urine of herbivorous animals.

**URINE LACTESCENTE**, *U*. milky—u. *Laitouse*, *Urine*, milky.

**URINE, MILKY**, (F.) *Urine lactescente* ou *laitouse*. White and troubled urine.

**URINE, MUCILAG'INOUS, (F.)** *Urine épaisse.* Urine containing much mucus.

**URINE, NERVOUS.** Thin and very liquid urine; such as is passed shortly after the attack of nervous diseases.

**URINE OF NERVOUS FEVERS** is generally very thin; and often deposits a mixture of uric and rosacic acids.

**URINE, OILY, (F.)** *Urine huileuse,* is that which pours like oil, or which has an oily pellicle at its surface.

**URINE, OXALIC, Oxaluria.** Urine containing a salt of the oxalic acid.

**URINE, PHOSPHORESCENT, Phosphoruria, Phosphuria.** Urine which is luminous or phosphorescent.

**URINE, PURPURIC, Porphururia.** Urine containing purpuric acid and its salts.

**URINE, RICKETY,** contains much phosphate of lime.

**URINE, SANDY, Arenosa urina—u.** Stoppage of, Ischuria—u. *Ténus,* Urine, thin.

**URINE, THIN, (F.)** *Urine ténu.* Urine that is transparent, slightly coloured, and but little dense.

**URINIFEROUS, Urinifer,** from *ουρον,* 'urine,' and *fero,* 'I carry.' That which carries urine.

**URINIFEROUS TUBES OR DUCTS OF BELLINI, Tubuli vel ductus uriniferi Bellini, Tubuli Bellini, Bellinia'ni Ductus, Bellinia'ne Fistule.** The collection of small tubes, converging from the cortical part of the kidney to the apices of the papillæ.

**URINODES,** Urinous.

**URINOMETER,** from *ουρον,* 'urine,' and *μετρον,* 'measure.' A hydrometer for taking the specific gravity of urine.

**URINOUS, Urinosus, Urinosus.** Having the character of urine. Similar to urine.

**UROCELE, Cœdema scroti urinosum, Urochœcèle, Oschœcèle urinalis,** from *ουρον,* 'urine,' and *κηλη,* 'a rupture.' A tumour of the scrotum, owing to the effusion of urine into the same, and into the cellular tissue.

**UROCHESIA, Urochesia,** from *ουρον,* 'urine,' and *χεειν,* 'to go to stool.' A discharge of urine by the bowels.

**UROCRASIA, Enuresis.**

**UROCRISIA,** from *ουρον,* 'urine,' and *κρινω,* 'I judge,' *Urocrisition.* A judgment formed either of the urine, or of disease after inspecting the urine.

**UROCRITERION, Urocrisia.**

**UROCYSTITIS, Urinary bladder.**

**UROCYSTITIS, Cystitis.**

**UROCYSTOCATARRHUS, Cystirrhœa.**

**URODIALYSIS,** from *ουρον,* 'urine,' and *διαλυσις,* 'dissolution, loss of strength.' A partial and temporary suspension of the function of the kidney, such as occurs in the course of most acute diseases. A condition of the function of the kidney and of the urine, similar to that observed in acute diseases, but without local mischief or preceding inflammatory fever, has been termed, when occurring in children, *Urodialysis Neonatorum;* in the aged, *Urodialysis Senum.*—Schönlein.

**URODOCHIUM, Urinal.**

**URODYNIA,** from *ουρον,* 'urine,' and *δυνη,* 'pain.' Pain during the excretion of the urine.

**UREDEMA, Urapostema.**

**UROLITHI, Calculi, urinary.**

**UROLITHIASIS, Lithia.**

**UROLITHOLOG'IA;** from *ουρον,* 'urine,' *λιθος,* 'a stone,' and *λογος,* 'a description.' A description of urinary calculi.

**UROLITHOTOMIA, Lithotomy.**

**UROMANTIA,** from *ουρον,* 'urine,' and *μαντια,* 'divination.' The art of divining diseases by simple inspection of the urine; *Uroscopia.* One professing to be able to do this is called *Uromantès.* Vulgarly, a water doctor.

**URON, Urine.**

**URON'CUS,** from *ουρον,* 'urine,' and *συσ,* 'a swelling.' A urinary swelling.

**URONOL'OGY, Uronologia,** from *ουρον,* 'urine,' and *λογος,* 'a description.' The part of medicine which treats of the urine.

**UROPHTHISIS, Diabetes mellitus.**

**UROPLA'NIA,** from *ουρον,* 'urine,' and *πλανη,* 'wandering.' The presence of urine in other parts than the urinary organs.

**UROPOE'SIS, Uropoësis,** from *ουρον,* 'urine' and *ποιω,* 'I make.' *Secreto urinae seu l'ini.* The secretion of urine by the kidney.

**UROPOIESIS, Uropoesis.**

**UROPYGIUM, Coccyx.**

**UROPYGIUM, Croupion.**

**URORRHAGIA, Diabetes.**

**URORRHŒA, Enuresis, Diabetes.**

**UROSCHEOCELE, Urocele.**

**UROSCOPIA,** see *Uromantia.*

**UROSES,** from *ουρον,* 'urine.' Diseases of the urinary organs.—Alibert.

**UROSTEALITH,** from *ουρον,* 'urine,' *στεα,* 'suet,' and *λιθος,* 'stone.' An ingredient of urinary calculi discovered by Heller, which is soluble in carbonate of soda.

**UROSTENOSIS, Urethrostenosis.**

**UROZEMIA, Diabetes—u.** Albuminosa. Kidney, Bright's disease of the—u. Mellitosa. Diabetes mellitus.

**URTICA, U. Dioica; U. major, Pyrrhœa** the Common stinging nettle, *Adicé, (F.) Ortis.* Family, Urticæ. *Sez. Syst.* Monœcia Tetrandria. This plant has been long used for medical and culinary purposes. The young shoots, in the spring are considered to possess diuretic and antiscorbatic properties.

**URTICA DIOICA, Urtica—u.** Iners magna fatidissima, Galeopsis—u. Major, U. dioica—u. Minor, U. urens—u. Mortua, Lamium album.

**URTICA PILULIF'ERA, Pill-bearing Nettle.** U. Pilulosa, U. Romana, (F.) *Ortis Romana.* The seed was formerly given in diseases of the chest. Nettles have been used as stimulant in paralytic limbs.

**URTICA PILULOSA, U. pilulifera—u.** Romæ. U. pilulifera.

**URTICA URENS, U. minor, Dwarf nettle, (F.)** *Ortis brulanta.* A lesser variety of the nettle, possessing similar virtues.

**URTICAIRE, Urticaria.**

**URTICARIA,** from *urtica,* 'a nettle.' *Enanthesis urticaria, Uredo, Scarlata urtica.* *Cnidosis, Urticaria porcellana, Eranthis urticatum, Epinyctis pruriginosa, Fibris urtica'ta, Purpura urticata, Febris rubra pruriginosa, Saltans rosa, (F.) Urticaire, Fiebre Ortis, Porcelaine, Nettle-rash;* from *urtica,* 'a nettle,' because the eruption resembles that produced by the stings of a nettle. A disease distinguished by those elevations of the cuticle called *wheals.* They have a white top, and are

often surrounded by a diffuse redness. They excite intolerable itching, especially when the person is warm in bed. The eruption frequently goes and comes, once or more in the 24 hours, and is generally dependent upon gastric derangement. In some people, nettle-rash is induced by shell-fish, eggs, nuts, &c. It is not usually a disease of any consequence, and its treatment is limited to the use of absorbent laxatives, and simple general means. Willan has described six varieties of the complaint;—*Urticaria febrilis*, *U. evanida*, *U. perstans*, *U. conferta*, *U. subcutanea*, and *U. tuberosa*.

URTICARIA PORCELLANA, Esera, Urticaria.

URTICATIO, *Cnido'sis*, *Urtication*, from *urtica*, 'a nettle.' A sort of flagellation, with nettles;—used with the intention of exciting the skin.

URUCU, Terra Orleansa.

USNEA, Lichen saxatilis.

USTILAGO, Ergot.

USTIO, Burn, Ustion.

USTION, *Us'tio*, *Caustis*, from *urere*, *ustum*, 'to burn.' The act of burning or of applying the actual cautery. Also the effect of cauterization;—a burn.

USTULATIO. An operation by which a substance is dried by warming.

USUALIA, Officialia.

USUS, Habit.

UTER, Uterus.

UTERI ADSCENSUS, Hysteria—u. Anteversio, Hysteroloxia anterior—u. Carcinoma, Metrocarcinoma—u. Convulsivus morbus, Lorind matricis—u. Coryza, Leucorrhœa—u. Exulceratio, Hysterelcosis—u. Flexio, Hysteroloxia—u. Inclinato, Hysteroloxia—u. Obliquitas, Hysteroloxia—u. Pronatio, Hysteroloxia anterior—u. Pruritus, Nymphomania—u. Reflexio completa, Hysteroloxia posterior—u. Retroversio, Hysteroloxia posterior—u. Rheuma, Leucorrhœa—u. Ulcus, Hysterelcosis—u. Versio incompleta, Hysteroloxia.

UTERINE, *Uteri'nus*, from *uterus*, 'the womb.' That which belongs or relates to the womb.

UTERINE ARTERY, *Ar'teria uteri'na hypogastrica*. Its size is always in a ratio with the greater or less state of development of the uterus. It arises from the hypogastric, either separately or with the umbilical, or from the internal pudic; passes upon the lateral parts of the vagina, to which it gives branches; and afterwards ascends on the sides of the uterus, and divides into a considerable number of very tortuous branches, which enter the tissue of the organ.

UTERINE MUSCLE OF RUTSCH consists of some fleshy fibres at the fundus of the uterus, which he regarded as forming a particular muscle.

UTERO-GESTATION, Pregnancy.

UTEROMANIA, Nymphomania.

UTERUS, *Uter*, *Utric'ulus*, *Loci*, *Loci mulie'bras*, *Vulva*, *Venter*, *Arvum natu'ræ*, *Conceptaculum*, *Matrice*, *Agar natu'ræ*, *Hysteræ*, *Metra*, *Stera*, *Angus*, *Dolphys*, *Alvus*, *Epomphal'ion*, *Gaster*, *Mator*, *Nady's*, *Postroma*, the *Womb*. (F.) *Matrice*, *Suin*. The uterus, destined to lodge the fœtus from the commencement of conception till birth, is a hollow symmetrical organ, having the shape of a truncated conoid: it is situate in the pelvis, between the bladder and the rectum, above the vagina, and below the

convolutions of the small intestine. The uterus is flattened from before to behind, and is nearly an inch in thickness. It is two inches broad, at its highest part, and becomes narrower towards the vagina; terminating in a contracted portion, called the *cervix* or *neck*, to distinguish it from the rest of the organ, called the *body*. From its *fundus* or upper portion the Fallopian tubes pass off. The mouth is called *Os Uteri* or *Os Tinco*. The cavity is very small, and its parietes are thick. The portion of the cavity corresponding with the body is triangular and flattened. Its superior angles present the extremely fine orifices of the Fallopian tubes. The cavity of the neck is slightly dilated before opening into the vagina. The uterus is composed, 1. Of a *serous membrana*. This is external, and furnished by the peritoneum; which is reflected upon the uterus from the posterior surface of the bladder and the anterior surface of the rectum. It forms, also, the *broad ligaments of the uterus*, *Ligamen'ta lata*, *Alæ vespertilio'nis*, *Re'tta Uteri*. These contain, above, the Fallopian tube; beneath and anteriorly, the round ligaments; and, behind, the ovary. They are two membranous productions or duplicatures of the peritoneum, sent from the edges of the uterus and posterior extremity of the vagina, in a transverse direction, to be fixed to, and line, the side of the pelvis. 2. Of a *mucous membrana*, which is a prolongation of that of the vagina, and extends into the tubes. 3. Of a *proper tissue*, whose thickness is considerable. It is of a close texture; is grayish and elastic; and resists the instrument that divides it. Its intimate nature is but little known. During gestation it is truly muscular. The arteries of the uterus proceed from the spermatic and hypogastric. Its veins follow the same course, and bear the same name as the arteries. They are very tortuous, and form large sinuses in the parietes of the organ,—called *Uterine Sinuses*. Its nerves proceed from the sciatic and hypogastric plexuses. Its lymphatic vessels are very multiplied; and during pregnancy acquire enormous dimensions. The changes experienced by the uterus during gestation, and after delivery, are very numerous and important to be known. They regard its situation, direction, size, shape, texture, connexions, vital properties, &c.

UTERUS, Abdomen—u. Anteversio of the, Hysteroloxia anterior.

UTERUS BIPIDUS. A double uterus. One separated into two cavities.

UTERUS DUPLEX, Dihysteria—u. Hour-glass contraction of the, *Chaeton*—u. Inclinato, Hysteroloxia.

UTERUS, IR'RITABLE, *Neural'gia of the Uterus*. A disease characterized by deep-seated pain in the lower part of the abdomen, and in the back and loins; generally diminished by lying down, and increased by exercise, and more severe for a few days preceding and during menstruation. On examination *per vaginam*, the uterus is found to be tender on pressure; and the cervix and body slightly swollen, but not usually indurated. It is an obstinate affection, but frequently ends of itself after years of suffering. The treatment must be,—the horizontal posture; local blood-letting to the uterus; emollients; soothing injections; narcotics, warm bath, &c. See *Hysteralgia*.

**UTERUS, INVERSION OF THE, *Inversio Uteri, Matræ*** *trôphè, Adopto'sis Uteri invar'sa, (F.) Inversion de la Matrice, Renversement de la Matrice.* The uterus, displaced and turned inside out. This can only happen through want of caution on the part of the medical practitioner. It is a fatal accident, unless speedily reduced. This must be done by gradually returning the superior part, by grasping it with the hand, and making the rest follow.

**UTERUS OBLIQUUS, Hysteroloxia**—u. Retroversion of the, *Hysteroloxia posterior.*

**UTERUS, RUPTURE OF THE, *Metrorrhæsis, Hysterorrhæsis, Ruptura Uteri, Perforatio Uteri, Laceratio of the Womb, (F.) Rupture de la Matrice.*** This dreadful accident occurs during labour, and is known to have taken place, when the child's head suddenly recedes during a pain, with vomiting, sinking of the pulse, cold sweats, &c. When it is evident that this has occurred, the hand must be passed into the uterus, and the feet of the child be brought down.

Cases are on record, in which partial lacerations of the uterus have healed, and the patient has done well. This is a rare event, and not to be anticipated.

**UTRICLE, see Semicircular canals.**

**UTRICULUS, see Ejaculatory Ducts, Uterus**—u. Communis, see Semicircular canals—u. Lacteus, Receptaculum chyli.

**UVA, Uvula, see Vitis vinifera**—u. Ursi, see *Arbutus uva ursi.*

**UVA CORINTHIACÆ, see Vitis Corinthiaca.**

**UVA PASSÆ, *Rhages, Dried Grapes, Raisins,*** see *Vitis vinifera.*

**UVA PASSÆ MAJORES, see Vitis vinifera**—u. *Passæ minores, see Vitis Corinthiaca*—u. *Passæ sole siccata, see Vitis vinifera.*

**UVATIO, Ceratocele, Staphyloma.**

**UVEA, from Uva, 'an unripe grape.'** *Tu'nica acino'sa seu aciniformis seu uva'lis seu acino'lis seu uviformis, Rhagoï'des, Tu'nica*

*rhagoï'des seu uva seu perforata, Membrana uva, Rhaz, (F.) Uvis.* Some anatomists have given this name to the choroid coat of the eye; others, to the posterior layer of the iris, on account of the black and very thick varnish that covers it.

**UVEA, COMMISSURE OF THE, Ciliary ligament.** *UVÉE, Uvea.*

**UVEITIS; a word of hybrid formation: from uva, 'the uvea,' and itis, denoting inflammation; properly, *Rhagoï'tis.* Inflammation of the uvea.**

**UVIGENA, Uvula.**

**UVIGERA, Uvula.**

**UVULA, diminutive of uva, 'a grape.'** *Pinnaculum fornicis gutturalis, Uva, Staphyl. Tintinnabulum, Columella, Cion, Cioma, Garga'reon, Colum'naris, Gurgulio, Internitum, Processus seu Cartilago Uvular, Uvigena, Uv'igera, Pap of the Throat, Hymas, Plecurus, Subling'ua, Subling'uium, (F.) Luette.* A fleshy appendix or prolongation, which hangs from the middle or free edge of the velum palati. The uvula has a conical shape, and is of a greater or less size in individuals. It is formed, especially, by the mucous membrane of the velum palati; and contains, within it, the aryæ uvulæ muscle. Its use is not clear.

**UVULA, see Vermiform process inferior**—u. *Decidua, Staphylædema*—u. *Relaxata, Staphylædema*—u. *Vesical, see Urinary bladder.*

**UVULAR, *Uvularis, from uvula.*** That which belongs to the uvula.

**UVULAR GLANDS, are small follicles, belonging to the mucous membrane covering the uvula.**

**UVULARIA, *Ruscus hypoglossum.***

**UVULITIS, a word of hybrid formation, from uvula, and itis, denoting inflammation.** *Angi'na uvularis, Staphyli'tis, Cion'tis, Inflammatio u'vula, (F.) Inflammation de la Luette, Falling down of the Palate.* Inflammation of the uvula.

## V.

**VACCINA, *Vaccin'ia, Vari'ola vaccina, V. vaccin'ica, V. tuto'riu, V. tutrix, Ezanthe'ma vaccina, E. antivariolo'sum, Syn'ocha vaccina, Vacci'ola, Vacci'ola vera, Vacci'na primig'ena seu vaccinato'ria seu antivariolo'sa, Vacciola scutellu'ta, Vari'ola tuto'ric, Cow-pox, Kine Pock, Inoculated Cow-pox, Em'phlysis vaccina inser'ta, from vacca, 'a cow;'* (F.) *Vaccine.* The cow-pox is a disease of the cow, arising spontaneously, which, if transmitted to man by means of inoculation, may preserve him from small-pox contagion. The promulgation of this valuable property of the vaccine virus is due to Dr. Jenner. When inoculating for small-pox in Gloucestershire, in 1775, he was surprised to meet with a number of persons in the same district, on whom the insertion of the virus produced no effect; although they had never passed through the small-pox. On investigation, he found that all these persons had previously been affected by a pustular eruption of the cow, which they had taken by milking the animal; and which eruption they called *Cow-pox.* This discovery induced him to in-**

stitute experiments, and he found that such preservative effect actually existed. The *Vaccine Virus*, or the fluid of the eruption, is not now usually taken immediately from the cow; experience having demonstrated, that it is nearly as efficacious when obtained from the human vesicle. The characteristic of cow-pox eruption is:—a semi-transparent, pearl-coloured vesicle, with a circular or somewhat oval base; its upper surface, until the end of the 6th day, being more elevated at the margin than in the centre; and the margin itself being turgid, shining, and rounded, so as often to extend a little over the line of the base. This vesicle is filled with clear lymph; contained in numerous little cells, that communicate with each other. After the 8th or 9th day from the insertion of the virus, it is surrounded by a bright red, circumscribed areola, which varies in its diameter, in different cases, from a quarter of an inch to two inches; and is usually attended with a considerable tumour, and hardness of the adjoining cellular membrane. This areola declines on the 11th or 12th day: the surface of

the vesicle then becomes brown in the centre; and the fluid, in the cells, gradually concretes into a hard, rounded scab or crust, of a reddish-brown colour, which at length becomes darker, contracted, and dry, but is not detached till three weeks after vaccination. It leaves a permanent, circular cicatrix, about five lines in diameter, and a little depressed; the surface being marked with very minute pits or indentations, denoting the number of cells of which the vesicle had been composed. This is the progress of the *genuine cow-pox*. At times, fever occurs about the 9th or 11th day; but, at others, not the slightest indisposition is felt. Aberrations from this progress occur, which must be attended to; as the same preservative influence is not exerted by *irregular* or *spurious cow-pox*. If the eruption runs speedily to a height, has an aureola too early, is irregular at its edges, and contains pus instead of a limpid fluid,—it cannot at all be depended upon.

Small-pox occurs, at times, as an epidemic after vaccination. For a while, the enthusiastic advocates of vaccination would not admit the affection to be small-pox; and, accordingly, they gave it the name Varioloid. It is unquestionably small-pox, but modified, and greatly divested of its terrors by previous vaccination; and it is said to happen less frequently after vaccination than after *small-pox inoculation*. Vaccination is now practised every where, except among those in whom ignorance and prejudice exclude the lights of reason and philanthropy. There is ground, however, for the belief, that for full protection revaccination may be occasionally necessary.

VACCINA ANTIVARIOLOSA, Vaccina—v. Primigena, Vaccina—v. Tutoria, Vaccina—v. Tutoria, Vaccina—v. Vaccinatoria, Vaccina.

VACCINATION, *Vaccinatio*, from *vacca*, 'a cow;' *Cow-pox inoculation*, *Jenns' rian inoculation*. An operation which consists in inserting the vaccine virus under the cuticle, so that it may come in contact with the absorbents. It is extremely simple, and requires merely that the point of the lancet should be held under the cuticle for a short time. The best time for taking the matter for vaccination is about the 7th or 8th day, before the appearance of the aureola, when it ought to be limpid and transparent. The most certain method is, to pass it from arm to arm; but this is not always convenient; and, hence it is taken upon *points* or pieces of quill, or between glasses. It must, of course, be softened for use. This is done by means of a little water, which does not destroy its efficiency. The scab, too, which falls off about the end of three weeks—sooner or later—is capable of communicating the affection, if dissolved in water; and this is the most common method of transmitting the vaccine virus in some countries.

VACCINE, Vaccina.

VACCINELLA. A term employed by some to designate spurious cow-pox.—*Vaccin'ois*, *Vaccin'ola spuria* seu *lepro'sa*.

VACCINIA, Vaccina—v. Palustris, Vaccinium oxycoccos.

VACCINIUM MYRTILLUS. The *Myrtle Berry*, *Vaccin'ia myrtill'us*, *Bilberry*, *Blea-berry*, *Whortle-berry*, *Black Whortle*, *Vaccin'ium nigrum*, (F.) *Airelle Anguleuse*, *Raisin de Bois*. Family, Vaccinee. See. Syst. Octandria Mo-

nogynia. The berries—*Bacca Myrtillo'rum*—are esteemed to be antiscorbutic, when prepared with vinegar. They are also said to possess antiseptic and astringent properties when dried. They are not used in medicine; but are frequently eaten with milk and sugar.

VACCINIUM NIGRUM, V. myrtillus.

VACCINIUM OXYCOCOS, *Oxycoccos*, *Vaccinia palustris*, *Vitis Ida'a palustris*, *Moorberry*, *Cranberry*, *Mossberry*, *Swamp Redberry*, *Sour-berry*, (F.) *Canneberge*. The berries are pleasantly acid and cooling. They make an agreeable preserve.

VACCINIUM VITIS IDÆA, *Red Bilberry*, *Ampelos Ida'a*, *Whortleberry*, *Cowberry*, (F.) *Airelle* ou *Canneberge punctu'e*. A decoction of the leaves has been used in calculous affections. They are astringent. The ripe berries are pleasantly acid, and refrigerant. *Whortleberries* are furnished by different species of Vaccinium.

VACCINOIS, Vaccinella.

VACCIOLA, Vaccina—v. Leprosa, Vaccinella—v. Scutellata, Vaccina—v. Spuria, Vaccinella—v. Vera, Vaccina.

VACILLATIO, *Titubatio*, from *vacillare*, 'to waver.' Staggering; waddling—*claudicatio anati'ca*.

VACILLATIO DENTIUM, Odontoseisis.

VAGIN, Vagina.

VAGINA, 'a sheath.' *Vagina mulie'bris*, seu *uterina* seu *Uteri* seu *Penis*, *Sinus mulie'bris* seu *Pudor'is* seu *Puden'di*, *Col'us*, *Peris*, *Perin*, *Col'pus*, *Vulvo-uterine canal*, (F.) *Vagin*. A cylindrical canal, five or six inches long; situate within the pelvis, between the bladder and rectum. It communicates by one extremity, *Aulos*, with the vulva; by the other, with the womb, the neck of which it embraces. The vagina is lined, internally, by a mucous membrane; and is partly closed, in young females, by the hymen, and carunculae myrtiliformes.—Around the mucous membrane is a layer of spongy, erectile tissue; and a cellulose-vascular membrane. A constrictor muscle; numerous vessels furnished by the vaginal artery, particularly; veins and nerves, proceeding from the sciatic plexus, also, enter into the composition of the organ.

The term Vagina or Sheath, *Theca*, is extended to many parts, which serve as envelopes to others.

*Sheath*, (F.) *Gaine*, is sometimes applied to the fascia enveloping the limbs; to cellular membrane, enveloping the muscles, and entering between their fibres; to that which surrounds the blood-vessels; to the synovial membranes surrounding tendons, and lining the gutters of bones, &c.

VAGINA CORDIS, Pericardium—v. Femoris, Fascia lata aponeurosis—v. Funiculi Umbilicalis, see Funiculus umbilicalis—v. Glissonii, Capsule of Glisson—v. Malleolaris externa, Retinaculum tendinum perinaerum—v. Muliebris, Vagina—v. Nervorum, Neurilemma—v. Penis, Vagina—v. Portæ, Capsule of Glisson—v. Uterina, Vagina.

VAGINA OF THE VENA PORTA, *Sheath of the Vena Porta*, (F.) *Gaine de la Veine-porte*, is the cellular membrane that accompanies the divisions of the vena porta into the substance of the liver; the capsule of Glisson.

VAGINAL, *Vagina'lis*, from *vagina*, 'a sheath.'

**VAGINAL ARTERY.** This exists, as a matter of course, only in the female. It arises from the hypogastric or from the uterine, vesical, internal pudic, umbilical, &c., and sends its branches, first to the lateral parts of the vagina, and afterwards to the anterior and posterior surfaces.

**VAGINAL COAT OF THE EYE,** *Tunica Vaginalis Oculi*, *Submuscular Fascia*, is a membranous coat, which separates the eye-ball from the other structures in the orbit, and forms a smooth hollow surface, by which the motions of the eye are facilitated.

**VAGINAL COAT OF THE TESTICLE,** *Tunica Vaginalis*, *T. Elytroides* vel *Elytroides*, is the serous membrane which envelops the testicles. Before the descent of the testicle, the tunica vaginalis does not exist. It is formed by a prolongation, furnished by the peritoneum to the testicle when it issues from the abdomen, which subsequently contracts; and, ultimately, is entirely separated from it, constituting a distinct coat. The tunica vaginalis forms a close sac, which is reflected over the testicle and epididymis, without containing them in its cavity. Its inner surface is smooth, and lubricated by a serous fluid. Its outer surface adheres to the fibrous coat, common to the spermatic cord and testicle. This reflected portion is the *Tunica vaginalis testis*.

**VAGINAL PROCESS OF THE TEMPORAL BONE,** (*F.*) *Apophysis vaginale* ou *engainante*, *Osse de l'opophyse styloïde*, *Chaton*, is a bony crista, which embraces the base of the styloid process.

**VAGINITIS**, Leucorrhœa (vaginal.)

**VAGISSEMENT**, Cry, Vagitus.

**VAGITUS**, (*F.*) *Vagissement*. The cry of the new-born child. *Squalling*.

**VAGITUS UTERINUS**. The cry of the child in utero.

**VAGUS NERVUS**, Pneumogastric.

**VAIRON** (*F.*), *Dispar oculus*. One who has eyes of different colours. It also means a wall-eyed animal, or one whose iris is surrounded by a whitish circle.

**VAISSEAU**, Vessel—*v. Sanguin*, Blood-vessel.

**VAISSEAU CAPILLAIRES**, Capillary vessels—*v. Chylifères*, Chyliferous vessels—*v. Lactis*, Chyliferous vessels—*v. Lactifères*, Lactiferous vessels—*v. Umbilicaux*, Umbilical vessels.

**VALANIDA**, *Fagus sylvatica*.

**VALERIAN**, **AMERICAN**, *Cypripedium luteum*—*v. Garden*, *Valeriana phu*—*v. Official*, *Valeriana*—*v. Wild*, *Valeriana*.

**VALERIANA**, *V. officinalis*, *Wild Valerian*, *Valeriana minor*, *Officinal Valerian*. *Family*, Dipsacæ. *Sex. Syst.* Triandria Monogynia. The root, *Valeriana*, (*Ph. U. S.*) has been long extolled as an efficacious remedy in epilepsy, and in a variety of nervous complaints. It has been also advised as a tonic, antispasmodic, and emmenagogue. It has a strong, fetid odour; bitterish, subacid, and warm taste; and its virtues are extracted by water and alcohol.

**VALERIANA CELTICA**, *Celtic Nard*, *Spica Celtica*, *S. Alpi'na*, *Nardus Celtica*, *Salium'ca*, *Nardum Gallicum*, *Spica Celtica Dioscoridis*, (*F.*) *Nard Celtique*. The roots of this Alpine plant have been recommended as a stomachic, carminative and diuretic. It has a moderately strong smell, and a warm, bitterish, subacid taste.

**VALERIANA DENTA'TA**, *V. locusta*, *Corn Salad*. A wholesome, succulent plant, cultivated in Europe as a salad. It is antiscorbutic and gently aperient.

**VALERIANA MAJOR**, *V. phu*—*v. Locusta*, *V. dentata*—*v. Minor*, *Valeriana*—*v. Officialis*, *Valeriana*.

**VALERIANA PHU**, *V. major*, *Garden Valerian*, (*F.*) *Grand Valérians*. The root has been recommended in rheumatism; especially in sciatica, and in epilepsy, &c.

**VALERIANA GRAND**, *Valeriana phu*.

**VALET À PATIN** (*F.*), *Volcel'la Patini*. The common ligature forceps is a modification of this instrument invented by one Patin. It consists of two branches, united at the middle by a hinge, which may be separated or approximated by means of a screw or running ring. It is used for seizing hold of vessels that are to be tied.

**VALETUDINARIUM**, Hospital.

**VALETUDINARIUS**, Sickly, Valetudinary.

**VALETU'DINARY**, *Valetudina'rian*, *Valetudina'rius*, *Inval'idus*, from *valetudo*, 'health.'—One of delicate health. One subject to frequent diseases. An *Inval'id*.

**VALETUDO**, *Sanitas*—*v. Adversa*, Disease—*v. Bona*, *Sanitas*—*v. Commoda*, *Sanitas*—*v. Secunda*, *Sanitas*.

**VALGUS**, see *Kylosis*.

**VALIGA**, *Tinctura jalapii*.

**VALITUDO**, *Sanitas*.

**VALLECUA**, Valley.

**VALLEY**, *Vallée'ula*, (*F.*) *Grand Scissure Médiane du Cervelet*. The deep fissure on the inferior part of the cerebellum, which divides it into two symmetrical portions.

**VALLUM**. The eyebrow or supercilium. Also, a species of bandage.—*Galen*.

**VALS**, MINERAL WATERS OF. A French acidulous chalybeate at Vals, six leagues from Viviers, in the department of Ardèche. There are five springs, containing carbonic acid, sulphate of iron, and alum. They are employed in passive hemorrhages, leucorrhœa, &c.

**VALVE**, *Val'vula*, *Di'ctis*, (*F.*) *Valvule*, from *valva*, 'folding-doors,' itself from *volvo*, 'I fold up.' A small door. Any membrane or duplication of a membrane, which prevents a reflux of humours or other matters in the vessels and canals of the animal body. There are some valves, whose functions appear to be,—to retard or to modify the course of substances along canals, &c. See *mitral*, *sigmoid*, *tricuspid*, *ilco-cæcal valve*, &c.

**VALVE OF FALLOPIUS**, *Bauhin*, valve of—*v. Ileocæcal*, *Bauhin*, valve of—*v. Ileo-colic*, *Bauhin*, valve of—*v. of Tulpius*, *Bauhin*, valve of—*v. of Varolius*, *Bauhin*, valve of.

**VALVES**, SEMILUNAR, Sigmoid valves.

**VALVULA**, Valve—*v. Cæci*, *Bauhin*, valve of—*v. Cerebelli*, *Valvula Viessentii*—*v. Coli*, *Bauhin*, valve of—*v. Foraminis ovalis*, *Ovalis fossa*—*v. Guiffartiana*, see *Thebesius*, veins of—*v. Ilei*, *Bauhin*, valve of.

**VALVULA SEMILUNARIS**, *Plica Semilunaris*, *Membrana semilunaris conjunctiva*, *Plica lunata*. A small doubling of the tunica conjunctiva, which lies between the caruncula lacrymalis and the ball of the eye. In birds, this is large, and called *Membrana niditans* vel *Palpebra tertias*.

**VALVULA THEBESII**, see *Thebesius*, veins of—*v. Vaginis*, *Hymen*—*v. Venæ magnæ*, see *Thebesius*, valve of.

**VALVULA VIEUSSENI**, *Velum Vieussenii*, *Valvula cerebelli* seu *Willisia'na*, *Velum interjectum cerebelli*, *V. apoph'ysi vermiformis obtentum*, *Lacunar ventriculi quarti superior*, *Velum medullar'e seu medullar'e anti'cum*, (F.) *Valvula de Vieussens*, *Voile médullaire supérieure*. A thin, medullary lamina, over the under end of the Aquæductus Sylvii, and upper part of the 4th ventricle. At the sides of the valves are two medullary tracts, called *Processus ad Testes*, *Colum'næ Valvulæ Vieussenii*, or *Obliquæ intercerebral Commissuræ*.

**VALVULA WILLISIANA**, *Valvula Vieussenii*.

**VALVULÆ BICUSPIDALES**, Mitral valves.

**VALVULÆ CONNIVENTES**. Numerous circular folds in the intestinal canal from the pyloric orifice through the greater part of the small intestine. They are folds of the mucous membrane; and their chief use appears to be,—to retard the course of the alimentary mass, and to afford a larger surface for the origin of chyloferous vessels.

**VALVULÆ CORDIS**, *Ostiola cordis*—*v. Cordis mitralis*, Mitral valves—*v. Episcopales*, Mitral valves—*v. Triglochines*, Tricuspid valves—*v. Trisulcæ*, Tricuspid valves.

**VALVULE**, Valve—*v. d'Eustache*, Eustachian valve—*v. de Pylorus*, see *Pylorus*—*v. de Vieussens*, *Valvula Vieussenii*.

**VALVULÆ SIGMOIDES** ou **SEMILUNAIRES**, Sigmoid valves.

**VANELLOE**, Vanilla.

**VANILLA**, *Banil'ia*, *Banilas*, *Banilloës*, *Banilla*, *Benzo'ënil*, *Ar'acus aromat'icus*, (F.) *Vanille*, *Baume de Vanille*. The *Vanilloe* is a long, flattish pod; containing, under a wrinkled, brittle shell, a reddish-brown pulp, with small, shining, black seeds. The parasitic plant which affords this pod is the *Epiden'drum Vanilla*, *Vanill'a aromat'ica*. Family, *Orchidææ*. *Sex. Syst.* Gynandria Diandria. *Vanelloes* have an unctuous, aromatic taste, and a fragrant smell, like that of some of the finer balsams; heightened with musk. Although chiefly used as perfumes, they are reputed to possess aphrodisiac virtues.

**VANILLA AROMATICA**, see *Vanilla*.

**VAPEURS**, Hypochondriasis, Hysteria.

**VAPORARIUM**, *Atmist'ion*, *Lacnicum*, *Py'ria*, *Pyriate'rium*, *Suda'rium*, *Sudato'rium*; a *Vapour bath*. A useful remedy in rheumatic and cutaneous affections; and wherever it is important to relax the cutaneous capillaries. In the *Russian Vapour Bath*, the vapour is produced by throwing water over hot stones. Its temperature is from 122° to 145°.

**VAPORARIUM**, *Hypocaustum*, see *Stove*.

**VAPORATIO**, Evaporation.

**VAPORES UTERINI**, Hysteria.

**VAPOUR BATH**, *Vaporarium*.

**VAPOURS**, Hypochondriasis, Hysteria.

**VARA**, *Barra*.

**VAREC**, Kelp—*v. Visciculosæ*, *Fucus vesiculosus*.

**VARENI**, *Ambulo-fatulentus*, Gout (wandering.)

**VARICE**, Varix.

**VARICELLA**, (diminutive of *Variola*, Small-Pox.) *Em'phlysis varicella*, *Exanthe'ma varicella*, *Syn'ochus varicella*, *Chicken pox*, *Variola lymphat'ica*, *V. spu'ria*, *V. sylv'es'tris*, *Variola nothæ*, *V. illegit'ima*, *Pseudo-variolæ*, *V. volat'ica*, *V. puella*, *Boll'ion*, *Æol'ium*, (F.) *Varicelle*, *Petite vérole volante*, *Vérolette*. A disease characterized by vesicles scattered over the

body, which are glabrous, transparent, and about the size of peas. They appear in successive crops; are covered by a thin pellicle; and, about the 3d, 4th, or 5th day from their appearance, burst at the top, and conrete into small, puckered scabs, which rarely leave a pit in the skin. Three varieties have, sometimes, been designated. 1. The *V. lentiformes*, or *lenticular chicken pox*, which are irregularly circular, and flattened on the top; the fluid being at first whitish, and afterwards straw-coloured. This is the common chicken pox. 2. The *Varicella coniformis*, *Conoi'dal-Chicken Pox*, *Pom'phigus variolo'des*, *Variola lymphat'ica*, *Hydrach'nis*, *Swine Pox*, *Water Pox*, *Water Jags*, in which the vesicles are generally acuminated, and the fluid pellucid throughout; and 3dly, the *Varicella globularis* or *Hives*, in which the vesicles are globular and larger; the fluid being, at first, whey-coloured, and afterwards yellowish. These divisions are, however, very arbitrary, for they are generally confounded.

*Variola* has been, sometimes, mistaken for this disease, and conversely. A little attention to the history of the eruption in the two affections will prevent error. *Varicella* is not contagious. At times, it prevails epidemically. It cannot be propagated by inoculation. The treatment is extremely simple; rest, abstinence, and the antiphlogistic regimen, being all that is generally required.

**VARICELLA** VARIOLOIDEA, Varioloid.

**VARICIFORMES PARASTATÆ**. A name given, by some authors, to the ducts of the epididymis, because they seem knotty and varicose.

**VARICOBLEPH'ARON**, from *Varix*, and *βλεφαρον*, 'eyelid.' A varicose tumour of the eyelid.

**VARICOCELE**, from *varix*, and *κύη*, 'a tumour;' *Oscheos'el' varico'sa*, *Hæ'mia varico'sa*, *Rameæ varico'sus*, *Spermatocele*, *Cirsocole*. A varicose dilatation of the veins of the scrotum and spermatic cord. This latter variety of the disease is more common on the left side than the right. It appears under the form of a soft, doughy, unequal, knotty, compressible, and indolent tumour, situate in the course of the cord, and increasing from below upwards. It is less, when the individual is in the recumbent posture, and increases when he is erect. It is, ordinarily, an affection of no moment, and is very common, requiring merely the use of a proper suspensory bandage. It has been advised, in bad cases, to tie the enlarged vein, but the operation is not free from danger induced by phlebitis. Sir A. Cooper has proposed the removal of a portion of the scrotum, so as to render the remainder of the scrotum a natural bandage. This plan has been found effectual.

**VARICOM'PHALUS**, from *varix* and *ομφαλος*, 'the umbilicus.' Varicose tumour of the umbilicus; *cirsomphalus*.

**VARICOSE**, *Varico'sus*, (F.) *Variqueux*. Affected with varix; or belonging to, or connected with, varix;—as a *varicose vein*, a *varicose ulcer*, that is, one kept by *varices*.

**VARICOSITAS CONJUNCTIVÆ**, *Cirsophthalmia*.

**VARICULA**, *Varix parva*. A diminutive of *varix*. Also, a varicose swelling of the veins of the tunica conjunctiva.—M. A. Severinus.

**VARIOLA**, *Variola*, *V. vera*, *Varioli*, *Small-*

*Poz, Empy'sis Variola, Euphlog'ia, Chaspe, Æolæthymæ, Poz* (N. of England), *Pestis variolosa, Febris variolosa; from varius, 'spotted,' or from vari, 'pimples;'* (F.) *Variolæ, Petite Vérole, Picoite.* A disease now of somewhat less interest than before the discovery of vaccination. It is of a very contagious nature, and is supposed to have been introduced into Europe from Asia, at an early period of the middle ages. It is characterized by fever, with pustules, appearing from the 3d to the 5th day, and suppurating from the 8th to the 10th, and it possesses all the distinctive properties of the major exanthemata. It is capable of being produced by inoculation, but this *inoculated small-pox—Variola inserta*—communicates the disease as readily through the air as the *natural small-pox* or that received without inoculation.

Small-pox is distinguished into two classes, according to the character of the eruption, the *discreta* or *distinct*, and the *confluens*. 1. In *VARIOLA DISCRETA, Empy'sis variola discreta, Variola discreta benigna, Variola regulares* seu *discreta, Distinct Small-pox*, the pustules are usually of the size of peas; distinct, distended, and circular; the intervening spaces being red; the fever inflammatory throughout; and ceasing when the eruption is complete. 2. In *VARIOLA CONFLUENS, Empy'sis variola confluens, Variola regulares confluens, Vesiculae Divæ Barbaræ, Vesiculae de Sainte-Barbe, or Confluent Small-Pox*, the pustules are confluent or run together; flaccid and irregularly circumscribed; the intervening spaces being pale, and the accompanying fever typhoid. In children, diarrhœa, and, in adults, ptyalism, with swelling of the hands and feet, generally appear towards the period of the *secondary fever*, which occurs from the tenth to the thirteenth day. The fever that precedes and accompanies the eruption is called the *Eruptive fever*. The prognosis is favourable in the distinct kind, if properly managed. The confluent is always dangerous,—the unfavourable symptoms being—flattening of the pustules, or subsidence of the eruption; the breathing becoming much obstructed or oppressed; or marks of inflammatory and congestive affections occurring in the different viscera. The treatment of the distinct kind is very simple: the antiphlogistic regimen, with cathartics, being all that is necessary. The confluent kind requires the same management as typhus fever.

When the pimples are confluent in patches, the patches being, however, separated by intervals of unaffected skin; it constitutes the clustered, coherent or corymbose variety—*Variola corymbosa*.

*VARIOLA AMBOINENSIS, Framboesia—v. Corymbosa, see Variola—v. Inserta, Variola* (by inoculation)—*v. Lymphatica, Varicella—v. Mitigata, Varioloid.*

*VARIOLA sine VARIOLIS, Variolous Fever.* These terms are applied to cases occasionally observed during the prevalence of variola, in which the constitutional phenomena are present without the cutaneous eruption.

*VARIOLA SPURIA, Varicella—v. Vaccina, Vaccina—v. Vaccinatorum, Varioloid.*

*VARIOLÆ, Variola—v. Illegitimæ, Varicella—v. Modificatæ, Varioloid—v. Nothæ, Varicella—v. Pucillæ, Varicella—v. Sylvestris, Varicella—v. Tutoriæ, Vaccina—v. Veræ, Variola—v. Volaticæ, Varicella.*

*VARIOLATION, Inoculation, (Small-pox.)*

*VARIOLÆ, Variola.*

*VARIOLI, Variola.*

*VARIOLOID, Variolois, Varioloides, Variola modificata, V. mitigata, V. vaccinatorum, Varicella, Varioloides, from variola, small-pox, and ides, 'form,'—resembling small-pox.* This is, really, small-pox, modified by previous inoculation or vaccination; and hence it has been properly called *modified small-pox*. That it is small-pox is proved by the fact, that matter, taken from a varioloid pustule, will communicate small-pox to one who has never had it naturally or by inoculation, or who has never been vaccinated. It is, almost always, a milder disease than small-pox; and this circumstance, with its shorter duration, exhibits the salutary effects of previous vaccination or inoculation. It has appeared epidemically.

*VARIOLOIS, Varioloid.*

*VARIQUEUX, Varicose.*

*VARIX, Phlebotomy'sma, Phlebotasis, Herma seu Ectasis venarum, Angiectasia venosa, Ix'ia, Cirsus, Cedema, Varicose Vein, (F.) Varice,* is considered, by some, to come from the verb *variare*, 'to turn,' 'to twist,'—on account of the sinuosities of varicose veins. Dilatation of a vein. Varices are owing to local retardation of the venous circulation; and in some cases, to relaxation of the parietes of the veins. They are very common in the superficial veins of the lower limbs, especially of pregnant females. The tumour or tumours, formed by varices, are soft, knotty, unequal, indolent, and livid; without pulsation, and yielding readily to the impression of the finger; but returning as soon as the compression is discontinued. Sometimes, the vein bursts and gives rise to hemorrhage. The treatment is usually *palliative*, and consists in exerting a uniform and constant pressure upon the part, by means of an appropriate bandage. The radical cure has also, been obtained by extirpation, division of the vein, or ligature. The second course is apt to be followed by phlebitis.

*VAROLI, BRIDGE OF, Pons Varolii.*

*VARUS, Acne, Ionthus, see Kylosis—v. Mentagra, Sycosis.*

*VAS, Vessel, Penis—v. Deferens mulieris, Tuba Fallopiana—v. Urinarium, Ureter.*

*VASA ABSORBENTIA, Absorbent vessels—v. Capillaria, Capillary vessels—v. Exhalantia, Exhalant vessels—v. Hydragoga, Lymphatic vessels—v. Lactea, Chyliferous vessels, Lactiferous vessels—v. Meninges, Meningeal vessels—v. Sedalia, Hæmorrhoidal vessels—v. Lymphatica, Lymphatic vessels—v. Nutritia, Vasa vasorum—v. Resorbentia, Absorbent vessels, Lymphatic vessels.*

*VASA VASORUM, V. nutritia.* Small vessels that supply larger. However minutely we trace a vessel, we always find its parietes supplied with blood for its nutrition by a smaller vessel.

*VASA VORTICOSA, (F.) Tourbillon vasculaire.* The contorted vessels which creep on the choroid coat of the eye; ciliary veins.

*VASCULAR, Vascularis, Vasculosus, Angiectal, from vas, 'a vessel.'* That which belongs or relates to vessels;—arterial, venous, or lymphatic; but generally restricted to blood-vessels only. Bichat gave the name *Vascular system* to the blood-vessels, and of this he made two divisions. 1. The *Arterial system, or*

*System of red blood, (F.) Système vasculaire à sang rouge*, which commences with the radicles of the pulmonary veins; and includes the pulmonary veins, the left cavities of the heart and the aorta, with all its ramifications. The blood, in this system, is distributed to the general capillary system, where it loses its arterial quality and becomes venous. 2. The *Venous system or Vascular system of black blood, (F.) Système vasculaire à sang noir*, carries the blood from every part of the system to the lungs. It takes its origin in the general capillary system; continues in the veins, right auricle, and ventricle of the heart and the pulmonary artery and its branches, and is finally lost in the capillary system of the lungs. See Circulation.

VASCULAR RADICALS, Radical vessels—v. System, intermediate, Capillary system—v. System, peripheral, Capillary system—v. Tumour, see Hæmorrhoids.

VASCULUM, Penis, Vessel.

VAS'CVLUM ABER'RA'NS, *Appendix to the Epididymis*. A small convoluted duct, of variable length, generally connected with the duct of the epididymis, immediately before the commencement of the vas deferens.

VASE À SAIGNER, Cup.

VASTUS. That which is *vast* or has a great extent.

VASTUS EXTERNUS and VASTUS INTERNUS are two considerable, fleshy masses, which form part of the Triceps crius.

VASUM, Vessel.

VATERIA INDICA, see Copal.

VATICINIUM CHIROMANTICUM, Chiromancy.

VAULT, (old F. *Voulte*), 'a round or turn;' from *volvere, volutum*, 'to turn;' *Fornix, Camera, (F.) Voûte*. A name given by anatomists to several parts which are rounded superiorly; concave and arched inferiorly,—as the *Vault of the cranium*, or the upper part of the skull,—the *Palatine vault or roof of the mouth*, &c., &c.

VAUQUÉLINE, Strychnina.

VECODIA, Idiotism.

VECTIS, Lever—v. Elevatorius, Elevator—v. Triploides, Elevator, triploid.

VÉGÉTATIF, Vegetative.

VEGETATION, *Vegetatio*, 'growing like a plant;' from *vigeo*, 'I flourish.' A morbid part, which rises as an excrescence in syphilis, &c.—as the *Cauliflower excrescence*, &c. The term is also applied to the fleshy granulations or *Hypertroscoses*, which sometimes arise at the surfaces of wounds or ulcers.

VEG'ETATIVE, *Vegetativus, (F.) Végétatif*, same etymon as the last. Having relation to growth or nutrition; hence, the *vegetative* or nutritive functions.

VEGETATIVUS, Vegetative.

VE'HICLE, *Vehic'ulum, Oche'ma, Constit'uens, (F.) Véhicule*, from *vehere*, 'to carry.' Any thing which serves to carry; thus air is the *vehicle* of sound; the arteries are the *vehicles* of the blood, &c. In *Pharmacy*, the name *vehicle* is given to any excipient; or to substances which serve as the media of administration for any medicine.

VÉHICULE, Vehicle.

VEIN, *Vena*, diminutive *ven'ula, Phlebs, Phleps, (F.) Veine*. The veins are vessels for the conveyance of black blood from every part of the body to the heart. They are found wherever

there are arteries, and, altogether, form the *venous system*, which may be subdivided into two distinct secondary systems. 1. The *General venous system*, which commences in all the organs, by very minute radicles; and terminates in the heart by the *vena cava* and the coronary vein. 2. The *Abdominal venous system*, which is limited to the abdominal cavity; commences, also, by a great number of branches, and terminates in the liver by a single trunk, which subdivides in that organ. It is called, also, the *System of the Vena Porta*, or the *Portal System*. See *Porta*. The veins form two sets, one *deep-seated, Venæ satel'lites, V. con-com'ites*, which accompany the arteries; the other *superficial or subcutaneous*. Their parietes, which are thinner than those of the arteries, are composed of two coats; the one, external, loose, extensible, and with parallel, longitudinal fibres—the *proper membrane*; the other, the *common or inner membrane*, which is thin, polished, and has numerous duplicatures or folds forming parabolic valves. These valves are most numerous in the veins of the lower extremities. The coats of the veins are supplied with small arteries or *vasa vasorum*, veins, and lymphatics. They have not as many nervous filaments as the arteries. These filaments are from the great sympathetic.

TABLE OF THE VEINS.

1. VEINS WHICH FORM THE SUPERIOR VENA CAVA.

- |                       |                           |                        |
|-----------------------|---------------------------|------------------------|
| 1. Axillary which     | Receives the              | 1. Posterior ulnar.    |
|                       | 1. Basilic, formed of the | 2. Anterior ulnar.     |
|                       |                           | 3. Median basilic.     |
|                       | 2. Cephalic, forming the  | 1. Superficial radial. |
|                       |                           | 2. Median cephalic.    |
|                       | 3. Circumflex veins.      |                        |
|                       | 4. Inferior scapular.     |                        |
| 5. Long thoracic.     |                           |                        |
| 6. Superior thoracic. |                           |                        |
| 7. Acromial veins.    |                           |                        |

|---|---|----------------------------|
| 2. External Jugular.  | 1. Internal maxillary, composed of the  | 1. Pterygoid.              |
|   |   | 2. Spheno-palatine.        |
|   |   | 3. Alveolar.               |
|   |   | 4. Infra-orbital.          |
|   |   | 5. Mental.                 |
|   |   | 6. Inferior dental.        |
|   |   | 7. Deep temporal.          |
|   |   | 1 Middle temporal.         |
|   | 2 Superficial Temporal, composed of the | 2. Anterior auriculars.    |
|   |   | 3. Transverse of the face. |
| 3. Posterior Auricular. The trunk then takes the name of <i>External Jugular</i> , and, in its course along the neck, receives— |   |                            |
| 4. Cervical Cutaneous.  |   |                            |
| 5. Trachelo-scapular, &c.   |   |                            |

- |                 |          |   |
|-----------------|----------|---|
| 1. Subclaviane. | Receives | 1. Superior Cerebral Veins.             |
|                 |          | 2. Veins of the Corpus Striatum.        |
|                 |          | 3. Veins of the Choroid plexus.         |
|                 |          | 4. Superior Cerebellar Veins.           |
|                 |          | 5. Inferior Cerebellar Veins.           |
|                 |          | 6. Latéral and inferior Cerebral Veins. |

- |   |                                     |                           |
|---|-------------------------------------|---------------------------|
| 3. Internal Jugular.  | 7. Ophthalmic Vein, composed of the | 1. Lachrymal.             |
|   |                                     | 2. Central of the retina. |
|   |                                     | 3. Infra-orbital.         |
|   |                                     | 4. Ciliary.               |
|   |                                     | 5. Ethmoidal.             |
|   |                                     | 6. Palpebral, and         |
|   |                                     | 7. Nasal Veins.           |
|   |                                     | 1. Palpebral, and         |
|   |                                     | 2. Superciliary Veins.    |
|   |                                     | 3. Dorsals of the nose.   |
| 8. Facial Vein, called <i>angular</i> , near the eye, receiving the | 4. Superior { Corona-               |                           |
|   | 5. Inferior { riles of              |                           |
|   | the lip.                            |                           |
|   | 6. Several Buccal and               |                           |
|   | 7. Maxillary Veins.                 |                           |
|   | 8. Ranine,                          |                           |
|   | 9. Submental, and                   |                           |
|   | 10. Inferior Palatine.              |                           |
| 9. Lingual and Pharyngeal Veins.                                    |                                     |                           |
| 10. Superior thyroid.   |                                     |                           |
| 11. Occipital, and  |                                     |                           |
| 12. Veins of the Diploë.  |                                     |                           |

- 2. Right Internal Mammary Vein.
- 3. Inferior Thyroid Vein, opening into the Vena Cava, between the two Subclavians.
- 4. Vena Azygos, which receives the
  - 1. Right Bronchial.
  - 2. Intercostal Veins.
  - 3. Semi-azygos.

2. VEINS WHICH FORM THE INFERIOR VENA CAVA.

- |                  |   |  |  |                         |                                     |                             |                          |                          |                                      |                                       |                   |  |  |                        |                      |                   |  |                                  |  |   |                 |                                |                   |            |               |           |  |

VELAMENTUM ABDOMINALE, Peritonæum—v. Corporis commune, Integument—v. Nativum, Integument.

VELAR, Erysimum.

VELOSYNTHESIS, Staphylotherapy.

VELUM, Velum pendulum palati—v. Apophysii vermiformi obtentum, Valvula Vieus-senii—v. Interjectum cerebelli, Valvula Vieus-senii—v. Medullare anticum, Valvula Vieus-senii.

VELUM MEDULLARÈ INFERIUS, (F.) *Voile médullaire inférieure*. A name given, by Reil, to the medullary band or strip, by which the cerebellum communicates with the medulla.

VELUM PALATI, Velum pendulum palati—v. Palatinum, Velum pendulum palati.

VELUM PENDULUM PALATI, 'Pendulous veil of the palate.' *Velum, Velum Palati nam, Velum Palati, Velum Pendulum, Velum Staphylinum, Palatum pendulum, Pendulum palati, Claustrum Palati, Soft Palate, Palatum Molle, (F.) Sogum Staphylin (Ch.), Voile du Palais*. A moveable, soft, and broad septum, attached to the posterior extremity of the palatine arch, and separating the mouth from the pharynx. Its form is nearly quadrilateral. Its anterior surface corresponds to the mouth; the posterior to the pharynx. Its superior edge is fixed to the palatine arch; the inferior is free, floating, and has an appendix at its middle—the uvula. The lateral margins of the velum are held down by two folds, separated from each other by a triangular space; these are called the pillars; the anterior passes to the base of the tongue, the posterior to the sides of the pharynx. The velum palati is formed of a mucous coat, which contains numerous follicles, and of a muscular stratum, in which are the peristaphylini interni and p. externi muscles, the glosso-staphylini, the pharyngo-staphylini and the palato-staphylinus. The arteries of the velum palati are furnished by the internal maxillary, the labial and the superior pharyngeal. Its veins open into the internal jugular. Its nerves are sent off from the ganglion of Meckel, and come from the palatine branches. The glosso-pharyngeal nerve, likewise, sends it some filaments.

VELUM STAPHYLINUM, Velum pendulum palati—v. Vieussenii, Valvula Vieussenii.

VELVET LEAF, Pareira.

VENA, Vein, Penis—v. Alba renum, Ureter—v. Alba thoracis, Thoracic duct—v. Apoplectica, Jugular vein, internal—v. Arteriosa, Porta vena, Pulmonary artery—v. Capitis, Cephalic vein—v. VENÆSECTIO, see Blood-letting—v. Evulsoria, see Blood-letting.

**VENAL, Venous.**

**VENEFICIUM, Poisoning.**

**VENENATUS, Venomous.**

**VENENUM, Poison, Venom.**

**VENEREAL, Venereus, Aphrodisiacus, Veneream, (F.) Vénérien:** from *Venus*, 'the goddess of pleasure.' That which relates to the pleasures of love. In a more restricted sense the word *Veneréal* is synonymous with *syphilitic*, and also with *syphilis*. Some authors have proposed that those diseases should be called *venereal* which are produced by excess in venery; and that *syphilitic* should be limited to those which are the result of impure connexion.

**VENEREAL DESIRE, Libido—v. Disease, Syphilis.**

**VENERIEN, Venereal.** This term, also, means one labouring under syphilis; as *Hôpital des vénériens*.

**VENERIVAGUS, Libidinous.**

**VENERY, Same etymon.** The pleasures of love. Sexual communication. Coition.

**VENESECTIO, see Blood-letting.**

**VENIMEUX, Venomous.**

**VENIN, Venom.**

**VENOM, Venenum Toxicum, (F.) Venin.** A poisonous fluid secreted by certain animals, as the viper, in a state of health, and which they preserve in a particular reservoir, to use as a means of attack or defence. It differs, according to some, from *virus*, as the latter is always the result of a morbid process, which may be produced by the individuals who receive it, in their turn, and be transmitted to others.

**VENOM, QUICKENING, Sperm—v. Vital, Sperm.**

**VENOMOUS, Venenatus, (F.) Venimeux.** An epithet applied to animals which have a secretion of venom, as the viper, rattlesnake, &c., and, by some, to liquids, in the animal body which have been so perverted by previous disease, that their contact occasions serious mischief in sound individuals; as happens in hydrophobia. *Virus* is more commonly used in this case.

**VENOSITAS, Venosity—v. Sanguinis, Prædominium Sanguinis venosi.**

**VENOSITY, Venositas, Venousness, Venous state, Venous cachexia, Melanæmia, Melanosis universalis, from vena, 'a vein.'** A condition in which, it has been supposed, the blood is moved slowly; is more venous; and the venous blood itself in greater quantity. This state is said to be chiefly observed in hemorrhoids, gout, hypochondriasis, melancholia, &c., &c.—P'uchelt.

**VENOUS, Venal, Venosus; same etymon.** Appertaining to a vein; or to the blood of the veins; as *venous cachexia; venous pulse*.

**VENOUS CACHEXIA, Venosity—v. Hum, Brauit de Diable—v. State, Venosity—v. System, Abdominal, Porta vena—v. System, see Vascular.**

**VENOUSNESS, Venosity.**

**VENT, Wind.**

**VENTER, Uterus—v. Imus, Abdomen, Hypogastrium, Neiræa—v. Inferius, Abdomen—v. Magnus, Ingluvies—v. Medius, Thorax—v. Parvus, Hypogastrium—v. Propendens, Hystero-loxia anterior—v. Renum, Pelvis of the kidney—v. Superius, Cavum cranii.**

**VENTEUX, Windy.**

**VENTILATION, Ventilatio; from ventus, 'wind.'** The act of renewing the air of vessels,

hospitals, and apartments, or of situations where many people are collected together. The utility of such renewal must be evident, when it is considered that atmospheric air loses its oxygen during respiration, and that carbonic acid supplies its place. Stagnant air, also, becomes loaded with numerous impurities; and hence one of the greatest hygienic improvements, of modern times, has been a proper attention to circulation of air. It is, moreover, one of the most valuable additions to our stock of therapeutical agencies in many diseases.

Instruments, used for the purpose of renewing the air, in ships, apartments, &c., have been called *ventilators*.

**VENTOSITÉ, Flatulence.**

**VENTOUSES SCARIFIÉES, Cupping with the scarificator.**

**VENTOUSES SÈCHES, Cupping, dry.**

**VENTRAL, Abdominal.**

**VENTRAL HERNIA, Hernia ventralis.** Direct hernia occurring in any part of the abdomen. It is most frequently found between the recti muscles.

**VENTRALE, Belt, (Russian.)**

**VENTRALE CUTANÆUM, 'Cutaneous apron.' (F.) Tablier.** An elongation of the nymphæ in the Bosjesman female, which hangs down before the vulva like an apron.

**VENTRE, Abdomen—v. Inférieur, Abdomen—v. Resserré, Constipation.**

**VENTRICLE, Ventriculus; diminutive of ventor, 'belly.'** Literally, a little belly. A name given, in anatomy, to various parts.

**VENTRICLE OF ARANTIUS.** A small cavity lined with gray substance, at the point of the calamus scriptorius.

**VENTRICLES OF THE BRAIN, Ventriculi seu Cavitates seu Sinus Cerebri, (F.) Ventricules du cerveau,** are five cavities in the interior of that organ, which are distinguished into the *lateral ventricles, middle ventricle, 4th ventricle or ventricle of the cerebellum, and 5th ventricle.* The *middle ventricle or 3d ventricle, (F.) Ventricule moyen du cerveau,* is situate in front of the pineal gland. It is bounded, *above,* by the tela choroidea and the fornix; *below,* by a portion of cerebral substance, which separates it from the base of the cranium; *laterally,* by the thalami nervorum opticozum; *anteriorly,* by a medullary cord, called the *anterior commissure;* and, *posteriorly,* by another medullary cord, called the *posterior commissure.* It communicates with the lateral ventricles by two openings, situate behind the anterior pillar or crus of the fornix. The *Lateral Ventricles, Ventriculi majores, V. priores, V. superiores, V. tricornes, (F.) Ventricules latéraux,* are two in number. They are large, and owing to their considerable curvature, occupy a great part of the cerebral centre. They are bounded, *above,* by the inferior surface of the corpus callosum; *anteriorly,* by the curved portion of the same body; *posteriorly,* by a considerable mass of cerebral substance; and, *internally,* they are separated from each other by the septum of the ventricles,—a medullary plate, which is given off from the lower part of the corpus callosum. The lateral ventricles have, in their upper and anterior portion, the *Corpora striata, Thalami optici, and Tænia semicircularis:*—their inferior portion contains the *corpus fimbriatum, cornu Ammonis, &c.* The *Fourth Ventricle, (F.)*

*Quatrième ventricule*, is situate beneath the *aqueduct of Sylvius*, by which it communicates with the third ventricle. It extends from this aqueduct to the upper part of the medulla; and is seated in the substance of the tuber annulare. The *Fifth Ventricle*, (F.) *Cinquième ventricule*, is the small serous cavity between the laminae of the septum lucidum; called, also, *Fissure* or *Fossa of Sylvius* or *Sinus of the Septum lucidum*.

VENTRICLES OF THE HEART, *Ventriculi Cordis*, *Specus Cordis*, (F.) *Ventricules du cœur*, are two in number. The *Right Ventricle*, *Pulmonary ventricle*, *Ventriculus anterior*, *V. primus*, *V. pulmonalis*, (F.) *Ventricule droit ou pulmonaire*, is situate at the fore part of the heart, the base and apex corresponding to those of the heart. In it are seen the *Columna carnea* and *Corda tendinea*. The right ventricle communicates with the right auricle by the *Ostium venosum*, and from it the *Pulmonary artery* arises. Around the auricular orifice is a tendinous margin or ring, from which the tricuspid valve is given off. The use of the ventricle is to send the blood, by its contraction along the pulmonary artery to the lungs. The *Left Ventricle*, *Ventriculus aorticus*, *V. posterior*, *V. secundus*, (F.) *Ventricule gauche ou aortique*, is situate at the posterior and left part of the heart. Its parietes are much thicker and stronger than those of the right, owing to its having to send the blood over the whole system. The inner surface has the same general appearance as that of the right. The *Columna carnea* and *Corda tendinea* are, however, much stronger. It communicates with the left auricle by means of the *Mitral valve*; and from it proceeds the largest blood-vessel of the body, — the aorta.

VENTRICLES OF THE LARYNX, *Sacculi laryngos*, *Sinuos of the Larynx*, (F.) *Ventricules ou Sinus du larynx*, are two depressions in the larynx, comprised between the superior and inferior ligaments.

VENTRICLE, PULMONARY, *V. right*.

VENTRICULE AORTIQUE, Ventricle, left—*v. Cinquième*, Ventricle, fifth—*v. Droit*, Ventricle, right—*v. Gauche*, Ventricle, left—*v. Moyen du Cerveau*, Ventricle, middle, of the brain—*v. Pulmonaire*, Ventricle, right—*v. Quatrième*, Ventricle, fourth.

VENTRICULES DU CERVEAU, Ventricles of the brain—*v. du Cœur*, Ventricles of the heart—*v. Latéraux*, Ventricles, lateral.

VENTRICULI CORDIS, Ventricles of the heart—*v. Dilatatio*, Gastroæstasia—*v. Dissolutio*, Gastro-malacia—*v. Duræ matris*, Sinus of the dura mater—*v. Emollitio*, Gastro-malacia—*v. Exulceratio*, Gastrelcolosis—*v. Fluxus*, Gastrorhœa—*v. Inflammatio*, Gastritis—*v. Majores*, Ventricles, lateral—*v. Metamorphosis gelatiniformis*, Gastro-malacia—*v. Perforatio*, Gastro-brosis—*v. Priores*, Ventricles, lateral—*v. Pseudophlogosis resolutiva et colliquativa*, Gastro-malacia—*v. Superiores*, Ventricles, lateral—*v. Tricornes*, Ventricles, lateral—*v. Ulceratio*, Gastrelcolosis.

VENTRICULUS, Stomach, Ventricle—*v. Anterior*, Ventricle, right—*v. Aorticus*, Ventricle, left.

VENTRICULUS CALLOSUS, 'Callous stomach.'

The *gizzard* or *third stomach*, of the gallinaceous bird. It consists of a double-bellied or

*digestric* muscle; is lined by a firm cuticle, and forms a kind of pouch depending from the alimentary tube, in which the second stomach terminates, and from which the duodenum or *Ventriculus succenturiatus* issues. In the interior of the gizzard there are numerous pebbles, which seem to be destined to aid in the trituration of the food. The gizzard is an organ of mastication, and is possessed of great muscular power.

VENTRICULUS POSTERIOR, Ventricle, left—*v. Pulmonalis*, Ventricle, right—*v. Primus*, Ventricle, right—*v. Secundus*, Ventricle, left—*v. Succenturiatus*, Duodenum.

VENTRILOQUE, Engastrimythos.

VENTRILOQUIST, Engastrimythos.

VENTROSITAS, Physconia.

VENTUS, Wind.

VENULA, *Phlebon*, diminutive of *Vena*. See Vein. A small vein. Hippocrates seems to use it in the same sense as *Arteria*.

VENUS, Clitoris, Coition, Cuprum—*v. Crystals of*, Cupri subacetat—*v. Crystaux de*, Cupri subacetat.

VER CUCURBITAIN, *Tænia solium*—*v. Cutané*, Dracunculus—*v. Filaire*, Dracunculus—*v. de Guinée*, Dracunculus—*v. Laisant*, Cicindela—*v. de Médine*, Dracunculus—*v. Solitaire*, *Bothriocephalus latus*, *Tænia solium*.

VERATRIA, Veratrina.

VERATRINA, *Veratrina*, *Veratrine*. A vegetable alkali, found in the seeds of *Veratrum Sabadilla*, *V. officinale*, *Helonias officinalis* and *Asagra* *v. officinalis*, which are known in commerce under the names *Cebadilla*, *Cevadilla*, and *Sabadilla*, and are imported from Mexico. They usually occur, in commerce, mixed with the fruit of the plant, are two or three lines long, of a black colour, and are shining, flat, shriveled, winged and elastic seeds. *Veratrine* is solid, white, pulverulent, and inodorous; of a very acrid taste; decomposable by heat; very soluble in water, and soluble in alcohol. When prepared in the usual manner, it still contains other substances, — *Sabadillin*, *Veratrin*, gum resin of the *Sabadilla*, and black greasy matter. It is extremely poisonous, and is but little used internally in medicine. Magendie has given it as an emetic and drastic in very small doses. Of late, it has been recommended to be applied in the way of friction, or externally, (from gr. v to xx, to ʒj of lard or cerate,) in various neuralgic affections. The following is the formula for its preparation in the Pharmacopœia of the United States, (1842):—Take of *cevadilla*, *Bij*; alcohol 3 gallons; diluted sulphuric acid, solution of ammonia, purified animal charcoal, and magnesia, each a sufficient quantity. Boil the *cevadilla* in a gallon of the alcohol, in a retort with a receiver attached, for an hour, and pour off the liquor. To the residue add another gallon of the alcohol, together with the portion recently distilled; again boil for an hour, and pour off the liquor. Repeat the boiling a third time with the remaining alcohol, and with that distilled in the previous operation. Press the *cevadilla*, mix and strain the liquors, and, by means of a water bath, distil off the alcohol. Boil the residue three or four times in water acidulated with sulphuric acid, mix and strain the liquors, and evaporate to the consistence of

syrup. Add magnesia in slight excess, shake the mixture frequently, then express and wash what remains. Repeat the expression and washing two or three times, and having dried the residue, digest it with a gentle heat several times in alcohol, and strain after each digestion. Distil off the alcohol from the mixed liquor, boil the residue for 15 minutes in water with a little sulphuric acid and purified animal charcoal, and strain. Having thoroughly washed what remains, mix the washings with the strained liquor, evaporate with a moderate heat to the consistence of syrup, and then drop in as much solution of ammonia as may be necessary to precipitate the veratria. Lastly, separate the precipitate. See *Colchicum autumnale*.

**VERATRUM ALBUM**, *Helleborus albus*, *Elleborum album*, *Cherbachem*, *White hellebore*, (F.) *Hellebore blanc*. *Sex. Syst.* Polygamia Monœcia; *Nat. Ord.* Melanthaceæ (Lindley.) The root or rhizoma of this common European plant is indebted to the Veratrine for its properties. It is inodorous: has a bitterish, acrid, nauseous taste, and is violently emetic and purgative, even when applied to an ulcerated surface. It is, also, possessed of errhine properties, and acts, externally, as a stimulant. It is rarely exhibited internally. Sometimes it is given as a *sneezing powder*; but it operates with great violence. It forms, also, an itch ointment. See *Ung. Veratri*.

**VERATRUM SABADILLÆ**, *Sabadilla*, *Sabatilla*, *Canis Interfector*, *Causiticum Americanum*, *Cevadilla Hispanorum*, *Sevadilla*, *Hordeum causticum*, (F.) *Cévadille*. The seeds of this plant have been used, mostly as anthelmintics. Dose, gr. ij to a child, four years old. It possesses the same general properties as the veratrum album.

**VERATRUM VIRIDÈ**, *American Hellebore*, *Swamp hellebore*, *Indian poke*, *Indian Uncas*, *Poke weed*, *Bear weed*, *Itch weed*, *Tickle weed*, *Earth gall*, *Devilbit*, *Wolfbane*, *Puppet root*, is indigenous in the swampy districts of almost every part of the United States. Its properties are like those of the genus.

**VERBASCULUM**, *Primula* *veris*.

**VERBASCUM NIGRUM**, *Black Mullein*, *Candela regia*, *Thapsus barbatus*, *Tapsus barbatus*, *Candalaria*, *Lanaria*; and *Verbascum Thapsus*, *Phlogmus*, *Phlomis*, *Phlox*, *great broad-leaved mullein*, *High Taper*, *Cow's lungwort*, or *Yellow Mullein*, (F.) *Molens*, *Bouillon blanc*. *Family*, Solanæe. *Sex. Syst.* Pentandria Monogynia,—especially the latter,—have been used as emollients, applied externally in the form of fomentation. The large leaves have been chosen for this purpose. Occasionally, the mucilage which they contain has been extracted by decoction or infusion, and administered in pectoral affections.

**VERBASCUM THAPSUS**, *V. nigrum*.

**VERBENA HASTULA**, an American species, is more bitter than the European, and said to be emetic.

**VERBENA OFFICINALIS**, *Verbena*, *Dichromos*, *Verbena ca*, *Peristærium*, *Hierobotanè*, *Herba sacra*, *Vervain*, *Purvain*, (F.) *Verveine*. *Family*, Pyrenæeæ. *Sex. Syst.* Diandria Monogynia. A plant formerly held sacred; used in sacrifices, and suspended round the neck as an amulet. In the form of cataplasm, it is said to

have relieved obstinate headaches, and to have been of service in acrofula. It is not used.

**VERBENA URTICIFOLIA**, an indigenous species, has been used in poisoning from *Rhus Toxicodendron*.

**VERBENACA**, *Verbena officinalis*.

**VERBUS**, *Penis*.

**VERCOQUIN**, *Phrenitis vermino'sa*. A form of phrenitis, attributed to the presence of a worm in the brain !

**VERDET**, *Cupri subacetat*.

**VERDIGRIS**, *Cupri subacetat*.

**VERENDA**, *Genital organat*.

**VERETRUM**, *Penis*.

**VERGE**, *Penis—v. d'Or*, *Solidago virgaurea*.  
**VERGERETTE DE PHILADELPHIE**, *Erigeron Philadelphicum*.

**VERGETURÈS**, *Vibices*.

**VERJUICE**, *Omphacium*, (F.) *Verjus*, *Verjus*. A sour kind of grape. Also, an acid liquor prepared from very sour grapes or crab-apples. It is principally used in culinary preparations; although, occasionally, an ingredient in medicinal compounds. See *Vitis vinifera*.

**VERJUS**, *Verjuice*.

**VERMES**, *Worms—v. Cerebri*, *Choroid plexus*.

**VERMICULAIRE BRULANTE**, *Sedum*.

**VERMICULAR**, *Vermiform*.

**VERMICULARIS**, *Lumbricalis*, *Sedum*.

**VERMICULI SPERMATICI**, *Spermatozoa*.

**VERMICULUM**, *Vermycilum*. An elixir; a tincture.—*Ruland and Johnson*.

**VERMICULUS CAPILLARIS**, *Draucunculus*.

**VERMIFORM**, *Vermicular*, *Vermicularis*, *Vermiformis*, from *vermis*, 'a worm,' and *forma*, 'form' That which resembles a worm.

**VERMIFORM PROCESSES**, *Processus Vermiformes*, *Protuberantix vermiformes*, *Monticuli cerebelli*, *Apennides vermiformes*, (F.) *Eminences vermiformes du cervelet*, are two medullary projections, at the surface of the cerebellum. The superior vermiform process, *Vermis superior cerebelli*, is an elongated projection, at the anterior and middle part of the superior surface of the cerebellum;—and the inferior vermiform process, *Vermis inferior cerebelli*, *Pyramid of Malacarne*, is a somewhat large projection, situate in the depression at the inferior surface of the same organ. The inferior vermiform process is usually described as consisting of three portions—the pyramid, the *uvula*, and the *nodus*. The anterior portion of the superior vermiform process is elevated, and termed *Monticulus*.

**VERMIFUGE**, *Anthelmintic*.

**VERMIFUGE, MATHIEU'S**. This consisted of two distinct electuaries; the one for killing, the other for expelling tape-worm. The former consisted of an ounce of *tin filings*, and six drachms of *fern root*.

**VERMIFUGUS**, *Anthelmintic*.

**VERMILION**, *Hydrargyri sulphuretum rubrum*.

**VERMILLON DE PROVENÇE**, *Antimonii sulphuretum rubrum*.

**VERMINATIO**, *Helminthiasis*.

**VERMINATION**, *CUTANEOUS*, *Malis*.

**VERMINEUX**, *Verminous*.

**VERMINOUS**, *Verminosus*, (F.) *Vermineux*. That which is caused by worms; as a *verminous affection*.

**VERMIS BOMBYCINUS**, *Cornu ammonis*—*v. Cerebelli*, Vermiform process—*v. Cerebri*, Fever, Hungary—*v. Cucurbitinus*, *Tænia solium*—*v. Digni*, Paronychia.

**VERMITIO**, Helminthiasis.

**VERNIX CASEOSA**, The fatty varnish, or deposit, often found on the fœtus, which is secreted by the sebaceous follicles of the skin.

**VERNIX SICCA**, Sandarac.

**VERNONIA ANTHELMINTICA**, *Ascaricida anthelmintica*, *Calagirah*, *Calageri*. A plant which is indigenous in India. Family, Compositæ. *Sex. Syst.* Syngenesia Polygamia superflua. It has great celebrity in the East Indies, and is a bitter tonic; but the seeds are chiefly used as an anthelmintic, in cases of ascarides and lumbrici in children.

**VÉROLE**, Syphilis—*v. Petite*, Variola—*v. Petite volante*, Varicella.

**VÉROLETTE**, Varicella.

**VERONICA**, *Veronica officinalis*, *Veronica mas*, *Thea Germanica*, *Betonica Pauli*, *Chamaedrys*, *Male Veronica*, *Fluellin*, *Official Speedwell*, (F.) *Véronique*, *Thé d'Europe*. Family, Rhinanthodæe. *Sex. Syst.* Diandria Monogynia. This plant was once used as a pectoral.

**VERONICA AQUATICA**, *V. beccabunga*.

**VERONICA BECCABUNGA**, *Beccabunga*, *Anagallis aquatica*, *Laver Germanicum*, *Veronica aquatica*, *Cepç'a*, *Water Pimpernel*, *Brooklime*, *Brooklime Speedwell*, *Water Speedwell*, *Neckweed*, *Water Purslain*, (F.) *Véronique cressonnée*. This plant was formerly used in a variety of diseases. It is, however, almost insipid and inodorous; and has been long banished from practice.

**VERONICA MAS**, *Veronica*—*v. Officialis*, *Veronica*—*v. Purpurea*, *Betonica officinalis*—*v. Virginica*, *Leptandria Virginica*.

**VÉRONIQUE**, *Veronica*—*v. Cressonnée*, *Veronica beccabunga*.

**VERPA**, Penis.

**VERRE**, Vitrum—*v. d'Antimoine*, *Antimonii vitrum*.

**VERRUCA**, diminutive *Verrucula*, *Ephyma verruca*, *Phymatosis verrucosa*, a Wart, (F.) *Verrua*. A small, hard, mammillary tumour, which forms at the surface of the skin, and particularly on that of the hands and face. Warts are generally rugous at the surface, and broad at the base; their roots being implanted in the derma by whitish filaments which are dense, semifibrous, and very numerous.

Warts may be destroyed by caustic, or removed by excision. Their vitality, is, generally, not great.

**VERRUCA CARNOSEA**, *Condyloma*—*v. Formicaria*, *Formica*—*v. Minor*, *Thymion*—*v. Palpebrarum*, see *Hydatid*—*v. Pensilis*, *Acrochordon*—*v. Rhagoidea*, *Thymion*.

**VERRUCARIA**, *Calendula officinalis*, *Heliotropium Europæum*.

**VERRUCULA**, *Verruca*.

**VERRUE**, *Verruca*.

**VERS**, Worms.

**VER-IO**, Turning—*v. Fœtus*, Turning—*v. Spontanea*, Evolution spontaneous—*v. Uteri*, *Hysteroloxia*.

**VERSION**, Turning.

**VERT-DE-GRIS**, *Cupri subacetat*.

**VERTEBRA DENTATA**, *Axis*—*v. Dorsi Prima*, *Lophia*—*v. Lumborum Prima*, *Asphalites*—*v. Magna*, *Sacrum*.

**VERTEBRÆ**, *Spondyli*, (F.) *Vertèbres*: from *vertere*, 'to turn.' This name has been given to the bones, which by their union form the vertebral or spinal column. The vertebrae are short, thick, very angular bones; twenty-four in number, and situate one above another. The body of the vertebra is the middle and anterior portion. Above and below it is articulated, by means of a fibro-cartilage, with the contiguous vertebrae. The Processes, (F.) *Muscles apophysaires*, of each vertebra are—1. The spinous process, situate behind, and in the median line. 2. The two transverse processes, standing off from each side. 3. The four articular processes—two superior, and two inferior—which serve to unite the vertebrae with each other. These transverse and articulating processes are made continuous with the lateral and posterior parts of the body of the vertebra by narrow bony portions or pedicles, on each of which are notches. These, by their union with similar notches in the contiguous vertebra, form the lateral foramina, (F.) *Troncs de conjugaison*, through which the spinal nerves leave the vertebral canal. The different processes are united with each other, so as to form a kind of ring of the lateral and posterior parts of the vertebra; and the foramen, within this,—that is, between the body and processes, concurs in forming the vertebral canal. The vertebrae have particular characters according to the regions they occupy. They are divided into seven cervical, twelve dorsal, and five lumbar. The first cervical is called atlas the second, axis or vertebra dentata; and the seventh, vertebra præminens. The vertebrae are articulated with each other. Those of the back are joined, moreover, to the ribs. The first or atlas is articulated with the occipital bone; and the last lumbar vertebra with the sacrum. The cervical vertebrae are developed by nine points of ossification; the dorsal and lumbar by eight.

**VERTEBRAL**, *Vertebralis*. That which relates or belongs to the vertebrae.

**VERTEBRAL ARTERY**, *Posterior cerebral artery*, (Ch.), is the largest of the branches of the subclavian. It arises from the posterior part of that vessel; is lodged in a canal, (F.) *Petit canal vertébral*, formed by the foramina in the transverse processes; enters the cranium, and proceeds to anastomose with its fellow of the opposite side, and to form the *Basilary artery*. Besides the branches sent to the neck, the vertebral artery gives off the anterior and posterior spinal arteries, and the inferior cerebellous in the cavity of the cranium.

**VERTEBRAL COLUMN**, *Rachis*, *Rhachis*, *Notos*, *Acnes'is*; the spine; the back bone, *Carina*, *C. hominis*, *Spina dorsi seu vertebralis*. *Columna spinalis*, *C. vertebralis*, *C. dorsi*. *Spina Dorsum*, *Tergum*, *Compages Vertebrarum*, *Acantha*, *Sacra fistula*, *Hiera Spinx*. (F.) *Colonne vertébrale*, *Épine du dos*, *échine*. A kind of bony column, situate at the posterior and central part of the trunk; extending from the head to the sacrum; flexible in every direction, yet very solid and hollowed by a canal called vertebral, which gives it lightness without diminishing its strength, and runs through its whole length. The vertebral column is formed by the superposition of the vertebrae. It represents a pyramid, whose base is below.

Anteriorly, it is convex in the neck; concave in the back, and convex, again, in the loins. Behind, the curvatures are of course the reverse of these. There is also, in the dorsal region, a lateral curvature, the concavity of which is towards the left side. Considered as a whole, the vertebral column has an anterior or *prespinal* surface; a posterior or *spinal*; two lateral; a base, and an apex or top. In the nomenclature of Chaussier, the anterior surface, in the neck, is called *trachelian*; in the back, *prodorsal*; and in the loins, *prelumbur*. The dorsal surface has, at its middle, the spinous processes; and, at its sides, the *vertebral gutters*, (F.) *Gouttières vertébrales*, formed by the succession of the *vertebral plates*, (F.) *Lames vertébrales*, which, by their junction, constitute the spinous processes. These are filled by the sacro-spinalis muscle. The sides or lateral surfaces present the foramina resulting from the union of the *vertebral notches*, (F.) *Échanerures vertébrales*. These are called *vertebral foramina*, (F.) *Trous de conjugaison*, and give passage to the *vertebral nerves*. The base of the vertebral column is oblique, to unite with the sacrum; and forms with it an angle, called *sacro-vertebral angle* or *promontory*. The apex or top of the vertebral column is articulated with the occipital bone. Sometimes, the term *vertebral column* includes the whole of the column from the occipital bone to the extremity of the coccyx. The *Vertebral or Spinal Canal*, *Rachid'ian Canal*, *Solen*, *Canalis medullæ Spinalis*, *Specus pro medullâ Spinali seu vertebralis*, exists through the whole of the vertebral column, whose curvatures it follows. It is continuous, above, with the cranium; below, with the sacral canal, if we consider the vertebræ to terminate at the sacrum. It is lined by a prolongation of the meninges, forming the *Theca vertebralis*, and lodges the spinal marrow.

The vertebral column, which unites lightness with solidity, serves to support the head and chest. It is the seat of all the movements of the trunk, the weight of which it transmits to the pelvis. It lodges and protects the spinal marrow, and gives passage to the vertebral nerves, and to numerous vessels.

VERTEBRAL DISEASE, *Rachialgia* (of some,) *Caries of the Vertebrae*, *Spondylarthrocæc*, *Spondylocæc*, *Kyphosis inflammatoria*, *K. paralytica*, *Gibbositas cariosa*, *Caries vertebrarum*, *Spondylal'gia*, *Spondylopyosis*, *Tuberculo'sis Vertebrarum*. The spinal column is liable to distortion, (see *Hump*;) at times, without the vertebræ being much, if at all, diseased. At other times, a more formidable affection is induced; the vertebræ becoming carious, and the intervertebral cartilages ulcerated; followed by a more or less complete loss of power over the lower extremities. In such case, on examining the spine, one or more of the spinous processes is found to project beyond the rest. The disease was first well described by Mr. Percival Pott; and, hence, it has been called, by the French, *Maladie de Pott*;—(*Malum Pot'tii*, *Gibbus Pot'tii*, or *Pott's disease*.) It usually occurs in scrofulous subjects, and the treatment consists in establishing a counter-irritation by blisters, issues, or the moxa, opposite the transverse processes of the diseased vertebræ. The sore must be suffered to remain open and the patient kept in the ho-

izontal posture until the use of the limbs is recovered; employing tonics, the free admission of fresh air, &c., at the same time.

VERTEBRAL LIGAMENTS, (F.) *Ligaments vertébraux*, *Surtouts ligamenteux de la colonne vertébrale*, are distinguished into anterior and posterior. They consist of long, ligamentous coverings; the anterior occupying the anterior part of the vertebral column; and the posterior seeming to arise from the occipito-axoid ligament, and seated behind the bodies of the vertebræ, from the axis to the sacrum.

VERTEBRAL NERVE, *Trisplanchnic*.

• VERTEBRAL NERVES, *Spinal Nerves*, spring successively from the spinal marrow; from its origin to its termination. These nerves—30 pairs in all—arise by two roots; one anterior, from the anterior column of the spinal marrow, and the other posterior, from the posterior column, and afterwards issue by the vertebral and sacral foramina. Each of these roots seems to have a distinct function; the posterior being destined to convey sensation to parts; the anterior, motion. On the posterior root, before its junction with the anterior, there is a ganglion. Of the 30 pairs, 7 are *cervical nerves*, 12 *dorsal*, 5 *lumbur*, and 6 *sacral*. See *Nerves*.

VERTÈBRES, *Vertebrae*.

VERTEBRO-ILIAC LIGAMENT, *Ileo-lumbur ligament*.

VERTEX, *Cor'yphe*, *Aerori'a*, *Spondylus*. The top or highest part of the head. See *Sinciput*.

VERTEX CORDIS, *Mucro Cordis*—v. *Cubiti*, *Olecranon*—v. *Palpitans*, *Fontanella*.

VERTIBULUM, *Trepan*.

VERTICULA, *Articulation*.

VERTICULUM, *Articulation*.

VERTICULUS, *Articulation*.

VERTIGE, *Vertigo*.

VERTIGO, from *vertere*, 'to turn;' *Dinos*, *Ilin'gos*, *Gid'diness*, *Dis'ziness*, *Dinus verti'go*, *Hallucina'tio vertigo*, *Aural'gia vertigo*, *Circumgyrat'io*, *Swimming of the head*, (F.) *Vertige*, *Étourdissement*. A state in which it seems that all objects are turning round; or that the individual himself is performing a movement of gyration. Two varieties have been designated:—*simple vertigo*, where the objects are seen; and *scotodynia*, in which the sight is obscured, and the individual often falls. Vertigo is dependent upon the condition of the brain; and often announces an attack of apoplexy or epilepsy.

VERTIGO TENEDRICOSA, *Scotodynia*.

VERUGAS (S.), from *verruca*. A peculiar disease affecting certain localities of Peru, which manifests itself by sore throat, pains in the bones, and other febrile symptoms. In the course of a few days, an eruption of red pimples or boils appears. These sometimes increase in magnitude till they become nearly as large as an egg, and discharge blood copiously. It is ascribed to the water of certain springs in the valleys, and especially in that of *Surea*: called *Agua de Veruga*.—Tschudi.

VERUMONTANUM, *Caput gallinaginis*, see, also, *Gallinaginis caput*.

VERVAIN, *Verbena officinalis*.

VERVEINE, *Verbena officinalis*.

VESANIA, *Vesania*, 'madness.' Derangement of the intellectual and moral faculties, without coma or fever. Many nosologists have used this as a generic term; under which they have included the different species of mental

alienation, hypochondriasis, somnambulism, and even hydrophobia. See Nosology.

VESANIA MANIA, Mania.

VESANIE, Insanity.

VESICA BILIARIA, Gall-bladder—v. Cordis, see Pericardium—v. Fellea, Gall-bladder—v. Intestinalis, Vesicula umbilicalis—v. Saccata, Stricture of the urinary bladder—v. Urinaria, Urinary bladder.

VESICÆ IRRITABILITAS, Cysterethismus—v. Unguinosa tendinum, Bursæ mucosæ.

VESICAL, *Vesica'lis*, from *vesica*, 'the bladder.' That which belongs or relates to the bladder.

VESICAL ARTERIES vary in number and origin. The umbilical artery always sends off two or three; the middle hemorrhoidal, internal pudic, and obturator furnish others, which ramify and anastomose in the parietes of the bladder; the hypogastric furnishes one which is somewhat larger, the *Vesico-prostatic*, (Ch.,) and proceeds, to the *bas-fond* of the bladder, sending numerous ramifications to it as well as to the surrounding parts.

VESICAL VEINS, much more numerous than the arteries, open into the hypogastric plexus.

VESICANT, Blister.

VESICARIUM, Ovarium.

VESICATOIRE, Blister.

VESICATORIUM, Blister.

VESICLE, ALLANTOID, Allantois—v. Germinal, see Molecule—v. Purkinjean, see Molecule.

VESICLES OF DE GRAAF, Folliculi Graafiani.

VESICO-VAG'INAL, *Vesico-vagina'lis*. Relating to the bladder and the vagina; as *vesico-vaginal fistula*.

VESIC'ULA, *Cystinx*; diminutive of *vesica*, 'a bladder.' A small bladder.

VESICULA, *Vesicle*, *Ecephylis*, *Cystinx*, in pathology, means a small orbicular elevation of the cuticle containing lymph, which is sometimes clear and colourless, but often opaque and whitish or pearl-coloured. It is succeeded, either by a scurf, or by a laminated scab.

VESICULA ENIGMATOSA, Vesicula umbilicalis—v. Alba, Vesicula umbilicalis—v. Bilis, Gall-bladder—v. Blastodermatica, see Molecule—v. Chyli, Receptaculum chyli—v. Erythroidea, Erythroid vesicle—v. Fellis, Gall-bladder—v. Gangrænescens, see Anthrax—v. Germinativa, see Molecule—v. Omphalo-mesenterica, Vesicula umbilicalis—v. Ovalis, Vesicula umbilicalis—v. Prolifera, see Molecule.

VESIC'ULA UMBILICALIS, *Umbilical Ves'icle*, *Vesicula alba seu omphalo-mesenterica seu enigmatica seu ovalis*, *Vesica intestinalis*, *Intestinal Vesicle*, *Vitelline Pouch*. A small, pyriform, round, or spheroidal sac, which, about the fifteenth or twentieth day after fecundation, is of the size of a common pea, and probably acquires its greatest dimensions in the course of the third or fourth week. After the seventh week, it becomes shrivelled and disappears insensibly. It seems to be situate between the chorion and amnion, and is commonly adherent either to the outer surface of the amnion, or to the inner surface of the chorion, but at times is loose between them. The *vitelline ped'icle*, which attaches the vesicle to the embryo, is continuous with the intestinal canal; and, up to twenty or thirty days of embryonic life, is hollow. Its arteries are the omphalo-mesenteric. The *vitelline fluid*, contained

in the vesicle, has been compared, from analogy, to the *vitellus* or yolk of birds; and, like it, is an oleaginous substance, and presumed to be inservient to the nutrition of the embryo.

VESICULÆ constitute the 6th order of Bateman's classification of *Cutaneous Diseases*.

VESICULÆ, see Villous membranes—v. Divæ Barbaræ, Variola confuens—v. Gingivarum, Aphthæ—v. Pulmonales, see Cellule—v. Rotundæ cervicis uteri, Nabothi glandulæ—v. Sanguinis, Globules of the blood—v. Seminales mulierum, Nabothi glandulæ—v. Spermaticæ, Vesiculæ seminales.

VESICULÆ SEMINALES, *V. Seminaria seu spermatica*, *Cap'sula seminales*, *Conceptacula seminaria*, *Gonocystides*, (F.) *Vesiculae seminales*, *Gardouche's*, *Greniers*, are two small membranous sacs, which serve as reservoirs for the sperm, and probably secrete a fluid to be mixed with the sperm. They are situate beneath the bladder, and above the rectum, behind the prostate and to the outer side of the vasa deferentia. They are of an irregular conoidal shape; flattened from above to below; embossed on their surface, and of a grayish tint. Their *posterior extremity* or *fundus* terminates by a round cul-de-sac. Their *anterior extremity* or *neck* is narrow and elongated, and is continuous with the excretory duct of the vesicula. This duct joins the vas deferens, and forms with it the ejaculatory duct. The interior of the vesiculae exhibits several cells, which communicate with each other, and are lined by a very thin, mucous membrane.

VESIC'ULAR, *Vesicularis*. Of or belonging to a vesicle:—full of small interstices. The cortical or gray matter of the brain is sometimes termed *vesicular*. See Cortex cerebri.

VESICULE BILLAIRE, Gall-bladder—v. *du Fiel*, Gall-Bladder.

VESICULES DE SAINTE BARBE, Variola confuens—v. *Seminales*, Vesiculæ seminales.

VESPA, Wasp.

VESSEL, *Vas*, *Vasum*, diminutive *Vasculum*, *Angion*, *Angos*, *Conceptaculum*, from (L.) *vas*, *vasculum*, (F.) *Vaisseau*. A canal, more or less elastic, formed by the superposition of membranes, and distinguished, according to its uses and general arrangement, into *Artery*, *Vein*, and *Lymphatic*. See, also, *Vascular*.

VESSELOUP, Lycoperdon.

VESSIE, Urinary bladder—v. *à Colonne*, see Urinary bladder—v. *Col de la*, Collum vesicæ.

VESTIBULE, *Vestibulum*, *V. labyrin'ithi*, (F.) *Vestibule*. A cavity of an irregular shape, which forms part of the labyrinth or internal ear. The vestibule is situate on the inner side of the tympanum; on the outer side of the meatus auditorius internus; before the semicircular canals, and behind the cochlea. It is lined by a particular membrane, and contains the liquor of Cotunnus and branches of the auditory nerve. There is also another membrane, constituting the *membranous vestibule*, but it is not an exact imitation of the osseous cavity. It is composed of two distinct sacs, which open into each other—the *sacculus vestibuli*, and the *sacculus*. There are three contiguous *cavities* in the vestibule; one of which, the *semi-orbit*, is situate above; another, the *hemispherical*, below; and the third, or *sulciform*, which is the orifice of the aqueductus vestibuli, behind.

**VESTIBULUM**, *V. Vagi'næ, Pronæus, Atrium Vagi'næ, Amb'itus gonitælis mulie'bris*, is also a smooth cavity between the perinæum and nymphæ in the female, which leads to two passages—to the urethra above, and to the vagina below.

**VESTIBULUM LABYRINTHI**, Vestibule—*v. Vaginæ, Vestibulum.*

**VESTIGE** (F.), *Vestig'ium*, 'a vestige,' 'a trace.' A kind of fracture of flat bones, consisting of a simple incision having the mark of the instrument that caused it. The term is also applied to a part of the body, which may have no evident use in man, and yet may be greatly employed in animals. For example, the muscles of the external ear in man are almost devoid of use, or are *vestiges* of what they are in certain animals.

**VESTIGIUM**, Sole, *Vestige*—*v. Foraminis ovalis, Ovalis fossa—v. Pedis, Metatarsus.*

**VESTITUS**, *Esthes'ma, Esthes'is, Clothing, Res vestia'ria, Dress, Vesture*, (F.) *Vêtement*, from *vestire, vestitum*, 'to clothe.' Any substance used for the purpose of covering nakedness, or preserving from atmospheric temperature by being worn on the body. The best clothing in winter is composed of articles that are bad conductors of caloric, and do not admit of ready evaporation of the matter of perspiration. In this respect, woollen vestments deserve the first place, and cotton the second. Colour has likewise to be regarded—the darkest hues transmitting the heat most readily through them. It has been found that the same rule applies to odours—the darker colours retaining a greater amount of odorous particles than the lighter. Hence, the necessity of white walls, white bed-clothes, &c., in the wards of hospitals; for it is probable that the like law applies to contagious miasms.

**VESTURE**, Vestitus.

**VETA**, Puna.

**VETEMENT**, Vestitus.

**VETERANA**, Rubeola.

**VETERINARIUS**, see Hippia'ter and Veterinary.

**VETERINARY**, *Veterina'rius*, (F.) *Vétérinaire*, from *veterinus*, 'that which bears burdens': itself from *votere*, 'to carry.' That which appertains to beasts of burden: hence, *veterinary surgeon*, (see Farrier,) *veterinary college*, and *veterinary medicine*.

**VETERINARY ANATOMY**, see Anatomy.

**VETERINARY ART**, *Ars seu Medici'na veterina'ria, Zoô'asis, Zoiat'ria, Theria'trica, Mulo-medici'na, Zoôtherapi'a, Zoôtherapeu'ticæ, Ars zoiat'rica, Farriery*. The art of treating the diseases, &c., of cattle.

**VETERNOSITAS**, Coma vigil.

**VETERNUS**, Coma vigil.

**VETONICA CORDI**, Beticæ officinalis.

**VETULA**, Sacrum.

**VEXILLA TUBARUM FALLOPII**, see Tube, Fallopian.

**VEXILLUM**, *Drapeau*.

**VIA**, Way—*v. Curandi, Ratio medendi—v. Stomachi et ventris, Œsophagus.*

**VIABILITY**, see Viable.

**VIABLE**, *Viab'ilis*, from *via*, 'way,' or from (F.) *vie*, 'life,' (Orfila.) A word, which may be introduced with great advantage from the French into our language. It is an epithet applied to a fetus whose organs are properly formed, and so developed as to permit its con-

tinued existence. Every fetus is not *viable*. Anencephali have lived ten or twelve days, yet they are not viable;—a part or the whole of the brain being wanting. The older the fetus, the more viable is it. It is an idle prejudice that a child, born at the end of eight months, is less likely to live than one born at the end of seven. The signs of *viability* are drawn from the weight, length, external conformation, &c., of the fetus. It may be laid down as a general rule, that no fetus born before the end of the seventh month is viable.

**VIÆ CHYLIFERÆ**, Chyliferous vessels—*v. Extra ordinariæ lactis, Galactoplia—v. Lachrymales, Lachrymal passages—v. Primæ, Ways, digestive—v. Secundæ, Ways, second.*

**VIAL**, Phiala.

**VIBICES**, *Mol'opes, Stria*, (F.) *Vergetures*. Large purple spots, like the marks produced by the strokes of a whip, which appear under the skin in certain malignant fevers. They are unfavourable indications, as they denote great prostration.

**VIBRAMEN**, Oscillation.

**VIBRANS**, Vibratory.

**VIBRATILE**, Vibratory.

**VIBRATIO**, Oscillation—*v. Cardiaca, Palpitation—v. Cordis, Palpitation.*

**VIBRATIONS OF SOUND**, see Sound.

**VIBRATOR**, Deferens vas.

**VIBRATORY**, *Vibrative, Vibrans*, (F.) *Vibratile*, from *vibrare*, 'to quiver.' An epithet applied to the pain that accompanies some neuralgiæ, which seems to the patient to vibrate among the nerves.

**VIBRATORY MOTION**, see Cilia.

**VIBRATUS**, Oscillation.

**VIBRIO**; from *vibrare*, 'to quiver.' A genus of infusory animalcules, of which different species are met with,—for example, *Vibrio prolifer* in almost all putrescent fluids containing protein, and in the pus of chancres; in which last the *V. lincolns* has likewise been found.

**VIBRISÆ**, from *vibrare*, 'to quiver.' The hairs which grow at the entrance of the nostrils and of other outlets. In the feline tribe, the whiskers.

**VIC-LE-COMTE, MINERAL WATERS OF**. Vic-Le-Compte is a small village in the department of Puy de Dôme, three leagues from Issoire; where there is an acidulous chalybeate, which is aperient.

**VICARIOUS**, *Vica'rius*, from *vicius*, 'change, place.' The place of another:—as 'vicarious secretion,' *Serretio vica'ria*. A secretion which takes place in one part instead of another.

**VICAR'S BRAY, MINERAL WATERS OF**. This spring is situate in Perthshire, Scotland, about two miles from Dollor, and near to Blairgone. The water is one of the strongest chalybeates known.

**VICE**, Cacosis.

**VICHY, MINERAL WATERS OF**. Carbonated alkaline chalybeates, the sources of which are at Vichy, six leagues from Moulins in the department of Allier. The springs are seven in number. Almost all are thermal; give off bubbles of carbonic acid gas, and have a slightly sulphureous odour. They deposit carbonates of lime and magnesia, and a little oxide of iron; and afford, on analysis, carbonates of lime, soda, iron, and magnesia, carbonic acid, sulphate of soda, and chloride of

sodium. They are employed as tonics, particularly in chronic affections of the abdominal viscera, in old catarrhs, diseases of the joints, &c.

**VICHY WATER, FACTIVIOUS, Aqua Viciensis, (F.) Eau de Vichy,** is made of simple acidulous water, impregnated with twice its bulk of carbonic acid,  $\text{Zxxs}$ ; subcarbonate of soda, gr.  $\text{xxxij}$ ; sulphate of soda, gr.  $\text{xvj}$ ; chloride of sodium, gr.  $\text{iv}$ ; subcarbonate of magnesia, gr.  $\text{ss}$ ; chloride of iron, gr.  $\frac{1}{2}$ . Mix. Ph. P.)

**VICIA FABÆ.** The Common Garden Bean, (F.) *Fève ou fève des marais.* Family, Leguminosæ. See Syst. Diadelphia Decandria. A native of Egypt, of which there are many varieties. Beans are not easy of digestion. They are proverbially flatulent, especially when old. When young, they are more digestible and wholesome. Bean meal was one of the four resolvent meals of the ancients.

**VICINITRACTUS, Erysipelas.**

**VICINITRAHA, Erysipelas.**

**VICTORIALIS FEMINEA, Gladiolus vulgaris—v. Longa, Allium victorialis—v. Rotunda, Gladiolus vulgaris.**

**VICTUS RATIO, Diet.**

**VIDANGES, Lochia.**

**VIDIAN CANAL, Pterygoid canal.**

**VIE, Life.**

**VIEILLESSE, Senectus.**

**VIF ARGENT, Hydrargyrum.**

**VIGILANCE, Insomnia.**

**VIGILANTIA, Egregorsis.**

**VIGILATIO, Egregorsis.**

**VIGILIA, Egregorsis.**

**VIGILÆ, Egregorsis—v. Nimis, Coma vigil.**

**VIGILIUM, Egregorsis.**

**VIGNE, Vitis vinifera—v. Blanche, Bryonia alba—v. du Nord, Humulus lupulus—v. Vierge, Bryonia alba.**

**VIGOR, Acme.**

**VILLA FRANCA, (CLIMATE OF.)** This little town is situate immediately to the eastward of Montalbano, which separates the bay of Villa Franca from that of Nice. It is on the southern declivity of a steep and lofty range of mountains; and is more effectually sheltered from the north and north-west winds than Nice, with the climate of which that of Villa Franca closely corresponds.

**VILLI, see Villous membranes.**

**VILLOUS, Villosus, from villus, 'a hair.'**

**VILLOUS MEMBRANES OF COATS, Velamen<sup>ta</sup> Bombycina, (F.) Membranes villosæ, Membranes veloutées,** are such as are covered with soft papillæ or Villi, Flocci, Flocculi, Vesiculae, Cylindri, Tubi Membranae<sup>cei</sup>, constituted of blood-vessels, nerves, and absorbents; or such as are covered with fine down, so as to cause them to feel soft and velvety. The term is, however, chiefly restricted to the former. Chaussier gives the name *simple villos membranes* to the serous membranes; and that of *complicated or follicular villos membranes* to the mucous membranes. On these membranes there are bodies endowed with ciliary motion.

**VIN, Wine—v. de Bordeaux, Claret—v. de Poulet, see Poulet—v. de Quinquina composé, Vinum de kinâ kinâ compositum—v. Sec, Sack.**

**VINAIGRE, Acetum, see Aceticum acidum—v. Scillitique, Acetum scillæ—v. de Bois, Pyroligneous acid.**

**VINAIGRES MÉDICINAUX, Acetia.**

**VINCA MINOR, Vinca peruviana, Clematis daphnoides major, Lesser periwinkle, (F.) Perwenche, Violette des Sorciers.** It has bitter and astringent properties, and has been used in gargles and diseases of the chest.

**VINCETOXICUM, Asclepias vincetoxicum.**

**VINCTURA, Fascia.**

**VINCULA, Fascia.**

**VINCULUM, Bandage, Lien—v. Caninum.**

Le quart<sup>o</sup> tartari emetici, Solution of tartarized antimony, Essentia antimonii seu stibii, Antimonial wine, Vinum benedictum, Vinum armoniatum Huxhami, V. antimoniale, Aqua benedicta Rulan<sup>di</sup>, Vinum emeticum. (Ant. Potass. tart.  $\text{ʒj}$ ; vini f.  $\text{ʒxx}$ . Dissolve the tartarized antimony in the wine. Ph. U. S.) Each fluidounce contains two grains of the tartrate.**

The ordinary Antimonial wine is made with glass of antimony  $\text{ʒj}$ , sherry Oiss. Ward's Red Drop consists of a strong vinous solution of tartarized antimony.

**VINUM ANTISCORBU<sup>ticum</sup>, Antiscorbutic wine. (Rad. armoraciz recent.  $\text{ʒj}$ , fol. rosulariz recent., nasturtii aquat., trifol. aquatici semin. sinap.,  $\text{ʒa}$   $\text{ʒss}$ , ammonia murat.  $\text{ʒij}$ , vin. albi Oij. Macerate for 36 hours; filter.**

and add *tinctura cochlear.* ℞ss. Ph. P.) Stimulant and tonic. Dose, f. ℞ss to f. ℥ij.

VINUM AROMATICUM, *Aromatic wine.* (*Species aromatic.* ℥iv, *vin. rubr.* Oij. Macerate for 6 days and filter. Ph. P.) Stimulant and tonic. Used, externally, in fomentations, embrocations, &c.

VINUM AROMO-ALOETICUM, V. aloes—V. Benedictum, V. antimonii tartarizati.

VINUM CAMPANUM, *V. Campana'ecum.* Champagne wine. A well-known sparkling wine of France.

VINUM CANARINUM, see Wine—V. Chalybeatum, V. ferri—V. Cinchonæ compositum, V. de kinâ kinâ comp.

VINUM COLCHICI, *Wine of Colchicum, V. Colchici Radicis, Wam's Eau d'Husson.* (*Colchic. rad. benè contus.* Oj, *visi,* Oij. Macerate for 14 days, with occasional agitation, and then express strongly, and filter. Ph. U. S.) It may also be prepared by displacement. Diuretic, sedative, and purgative. Chiefly used in gout. Dose, gr. 40 to f. ℥j.

*Reynolds's Specific* for gout and rheumatism consisted of the fresh bulb of *Colchicum* ℥viii, *Sherry wine,* f. ℥xvj. The colchicum was macerated for eight or ten days in the wine, at a gentle heat; coloured with *syrup of poppies* and flavoured with *rum.* Reynolds is said to have killed himself by taking an over-dose of it.

VINUM COLCHICI RADICIS, V. colchici.

VINUM COLCHICI SEM'INIS, *Wine of Colchicum seed.* (*Colchic. sem.* cont. ℥iv; *visi* Oij. Macerate for 14 days, with occasional agitation, then express and filter. Ph. U. S.) Dose, f. ℥j to f. ℥ij.

VINUM CREMATUM, Brandy.

VINUM DIURETICUM AMARUM, *Vinum amarum scillit'icum compositum in Charitatis Nesoomi'o usurpatum, Bitter diuretic wine.* (*Cort. cinchon., Winteran., limon.,* aa ℥ij, *rhus toxicodendr., scilla, sacumina. angelica,* aa ℥ss, *fol. absinth., melissa,* aa ℥j, *buccar. junip., macis,* aa ℥ss, *vin. alb.* Ovij. Macerate and filter. Ph. P.) Stimulant, tonic, and diuretic. Dose, f. ℥ss to f. ℥iss.

VINUM EMETICUM, V. antimonii tartarizati.

VINUM ERGOTE, *Wine of Ergot.* (*Ergota,* cont. ℥ij; *visi* Oj. Macerate for 14 days, with occasional agitation; then express and filter. Ph. U. S.) Dose, m. xx to f. ℥j to produce the peculiar effects of ergot.

VINUM FERRATUM, V. Ferri.

VINUM FERRI, *V. chalybeatum, Steel wine, Wine of Iron, Vinum ferratum, V. Martiatum, V. Martis, Tinctura Martis vino'sa, Tinctura Martis cum vino.* (*Iron,* ℥j, *super-tartrate of Potass,* in powder, ℥vj, *distilled water,* Oij or q. s., *proof spirit,* f. ℥xx. Rub the iron and super-tartrate of potass together, and expose them to the air in a flat vessel, moistened with a fluidounce of water, for a fortnight; agitating every day with a spatula, and sprinkling them with water, to keep them moist. Then dry with a gentle heat, and mix with ℥xxx of *dist. water.* Filter the fluid and add the spirit. Ph. L.) Tonic. Dose, f. ℥j to f. ℥iv.

It is sometimes made by adding *two pints of wine to two ounces of iron filings;* macerating and filtering.

VINUM GENTIANÆ COMPOSITUM, V. Amarum, *Compound wine of gentian, Infusum amarum vino'sum, Vinum amarum cum spiritû vini, Wine bitters.* (*Rad. gentian. lutea* ℥ss, *cort. cinchon. affc.* ℥j, *cort. aurant.* ℥ij, *canella*

*alb.* ℥j, *alcohol. dilut.* f. ℥iv, *visi alb. Hispanic.* Oijss. Ph. E.) Dose f. ℥j to f. ℥vj.

VINUM HIPPOCRATICUM, Claret—V. Hispanicum, Vinum—V. Hordeaceum, Cerevisia—V. Hydatodes, see Hydatoid.

VINUM IPECACUAN'HE, *Ipecacuan'ha wine.* (*Ipecacuan.* cont. ℥ij, *Vini,* Oij.) Macerate for 14 days, express, and filter. Emetic and diaphoretic. Dose, as an emetic, f. ℥iv to f. ℥x.

VINUM DE KINÂ KINÂ COMPOSITUM, V. cincho'næ compositum, *Compound bark wine,* (F.) *Vin de quinquina composit.* (*Cort. cinchon. pulv. Bss, guassia, cort. Winteran., cort. aurant. sicc.,* aa ℥ss, *alcohol.* (12° to 22° Beaumè) Oj. Macerate for 24 hours; and add *visi albi* Ovij. Macerate for four days, and filter. Ph. P.) Tonic, febrifuge, and stomachic. Dose, f. ℥ss to f. ℥ij.

VINUM MARTIATUM, V. ferri—V. Martis, V. ferri—V. Medicatum, see Claret.

VINUM MEDICINALE, *Medicated Wine.* Wine, holding in solution one or more medicines. Medicinal wines are obtained by macerating or digesting medicinal substances in wine. They differ, of course, according to the nature of the medicine employed, the strength of the wine, &c. In a late Pharmacopœia of the London College, all the wines were changed into weak tinctures; but the old names were left unaltered. Sherry is the wine usually employed. The following are medicated wines.

VINUM MERTUM, Acratum—V. Nicotianæ tabaci, V. tabaci—V. Opium fermentatione paratum, Laudanum abbatis Rousseau.

VINUM OPII, *Wine of Opium, Vinum de opio compositum, Laudanum liquidum Sydenha'mi, Laudanum liquidum Hoffman'ni, Tinctura Thebaïca, &c., Ford's laudanum.* (*Opii* in pulv. ℥ij; *cinnam.* cont., *caryophyll.* cont. aa ℥j; *visi* Oj. Macerate for 14 days; express and filter.—Ph. U. S.) Narcotic. Dose, gr. xv to f. ℥j.

VINUM DE OPIO COMPOSITUM, V. opii—V. Picatum, Piesites.

VINUM PORTUGALICUM. Wine of Portugal or of Oporto. Port wine. A strong astringent wine, not much drunk in the United States; but greatly used in England.

VINUM QUININÆ, *Wine of Quinia.* (*Wine* ℥ij, *sulphate of quinia* gr. x. Mix.) Dose, f. ℥iss or more; according as it is used as a stomachic, or to arrest ague. A *Vinum Cincho'næ* may be made in the same way.

VINUM RHEI, V. R. *pilma'ti, Rhubarb Wine. Tinctura Rhabar'bari Vino'sa, Vinum Rhabar'bari, Elizier Rhei dulce, E. R. Compositum.* (*Rad. rhei* cont. ℥ij, *canella* cont. ℥j, *alcohol. dilut.* f. ℥ij, *visi* Oj. Macerate for 14 days; express and filter.—Ph. U. S.) Laxative and stimulant. Dose, f. ℥iv to f. ℥iss.

VINUM RHEI PALMATI, V. Rhei—V. Rhenanum, see Wine—V. Rhabarbari, V. rhei palmati—V. Rubrum Portugallicum, see Wine.

VINUM TABACOI, *Vinum Nicotianæ Tabaci. Tobacco Wine.* (*Tabac.* ℥j, *visi* Oj. Macerate for 14 days; express and strain. Ph. U. S.) Narcotic, diuretic, and antispasmodic. In dropsical cases, colica pictonum, and ileus. Not used. Dose, gr. xx to xxxvj.

VINUM VERA'TRI, V. V. albi, *Wine of White Hel'lebor.* (*Veratri* cont. ℥iv; *Vini* Oj. Macerate for 14 days, express and filter.—Ph. U. S.) In cutaneous affections, and in gout. Dose, ten minims.

VINUM VERATRI ALBI, V. Veratri.

VIOL, Stuprum.

VIOLA, *Viola odorata*, *Ion*, *Matronalis*, *Violaria*, the *Sweet Violet*, (F.) *Violetta à bouquet*, *V. odorata*. The flowers of the sweet violet have a pleasant, peculiar odour, and scarcely any taste. They are slightly laxative.

VIOLA CANINA. The *Dog Violet*. The root of this plant is emetic and cathartic. Dose, ℥j.

VIOLA IPECACUANHA, see *Ipecacuanha*—v. *Lutea*, *Cheiranthus cheiri*—v. *Odorata*, *Viola*—v. *Palustris*, *Pinguicula vulgaris*.

VIOLA PEDA'TA, *Viola*, (Ph. U. S.) This indigenous violet, which grows from New England to Carolina, is regarded by some as a useful demulcent in pectoral affections.

VIOLA TRICOLOR, *Heart's ease*, *Pansies*, *Jack-a, Herba Trinitatis*, (F.) *Pansée*, *P. sauvage*. The decoction of this beautiful little plant has been recommended in diseases of the skin, &c. Its roots are, also, emetic and cathartic.

VIOLARIA, *Viola*.

VIOLET, DOG, *Viola canina*—v. *Bloom*, *Solanum dulcamara*—v. *Sweet*, *Viola*.

VIOLETTE À BOUQUETS, *Viola*—v. *Odorata*, *Viola*—v. *des Sorciers*, *Vinca minor*.

VIOLETTE JAUNE, *Cheiranthus cheiri*.

VIORNA, *Clematis vitalba*.

VIPER, EGYPTIAN, *Aspis*—v. *Grass*, *Scorzonera*—v. *Ten inch long*, *Echidna ocellata*.

VIPERA, *Coluber berus*.

VIPERARIA, *Aristolochia serpentaria*, *Scorzonera*.

VIPERINA VIRGINIANA, *Aristolochia serpentaria*.

VIR, Penis—v. *Effeminatus*, *Gynæcaner*.

VIRAGO, see *Pogoniasis*.

VIRGA, Penis—v. *Cereæ*, *Bougis*—v. *Cerebri*, *Pineal gland*.

VIRGILIA, *Cladrastis tinctoria*.

VIRGINAL, *Virginalis*, from *virgo*, 'a virgin.' The external genital organs in the virgin.

VIRGINIA, MINERAL WATERS OF. There are several celebrated mineral springs in Virginia, on the western side of the Blue Ridge. Two *Thermal* springs exist in Bath county. The *Warm Spring*, as it is called, issues with a bold stream, sufficient to turn a mill, and to keep the water of its basin at the temperature of 97°. The *Hot Spring* is a few miles from the *Warm*. Its temperature is 107°. They are both slightly sulphureous. The *Sweet Springs* are at the eastern foot of the Allegheny, in Botetourt county; 42 miles from the *Warm Springs*. The water has a temperature of 70°, and is highly impregnated with carbonic acid. The *White Sulphur*, as well as the *Red Sulphur*, and *Salt Sulphur Springs*, are also much celebrated. The *Red Spring* is affirmed to exert a sedative influence on the pulse, diminishing the number of its beats. About 15 miles from Staunton are *Scribbling's Springs*—a sulphuretted water; and near Warrenton, in Fauquier county, there is a sulphureous water, called *Lee's Springs*, which is much frequented.

VIRGINIA, Hymen.

VIRGIN'S BOWER, COMMON, *Clematis vitalba*, *Clematis Virginia*—v. *Bower*, upright, *Clematis recta*—v. *Sweet-scented*, *Clematis flammula*.

VIRGIN'S MILK, *Lac Virginitis*, *Lac Virginalis*, (F.) *Lait virginal*. A tincture of benjamin or of any other balsam, precipitated by the addition of water, which gives it a milky appear-

ance. Also, subacetate of lead precipitated by water. It has been used as a cosmetic to remove freckles, &c.

VIRGINITAS DEFLORATA, *Defloratio*.

VIRGO, Girl—v. *Aurea*, *Solidago virgaurea*.

VIRGULA, Penis.

VIRIDE ÆRIS, *Cupri subacetat*—v. *Montanum*, *Cuprum*.

VIRILE, Penis.

VIRILITY, Adult age.

VIROSUS, Virulent.

VIRTUE, Faculty.

VIRTUS FORMATRIX, Plastic force—v. *Plastica*, *Plastic force*.

VIRULENT, *Virulentus*, *Virulentus*, from *virus*. That which is of the nature of a virus or which is caused by a virus.

VIRUS, from *vis*, 'force.' A Latin word, which signifies poison; but which, in medicine, has a somewhat different acceptation. By it is understood a principle, unknown in its nature and inappreciable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the *variolic*, *vaccin*, and *syphilitic virus*. *Virus* differs from *osom* in the latter being a secretion natural to certain animals, whilst the former is always the result of a morbid process;—a *morbid poison*.

VIRUS, Ichor, Poison, Sanies—v. *Vaccina*, see *Vaccina*—v. *Vitale*, *Sperm*.

VIS, Force—v. *Adhesionis*, *Cohesion* (force of)—v. *Attractionis*, *Cohesion* (force of)—v. *Aucta*, *Sthenia*—v. *Cohæsiōnis*, *Cohesion* (force of)—v. *Conservatrix*, *V. medicatrix natura*—v. *Elastica*, *Elasticity*.

VIS EXPULTRIX. The organic force by which it was supposed, the useless was removed from the body.

VIS FORMATIVA, Plastic force—v. *Generatrix*, *Potentia generandi*—v. *Imminuta*, *Asthenia*—v. *Insita*, *Irritabilitas*—v. *Irritabilitatis*, *Irritability*.

VIS MEDICATRIX NATURÆ, *Vis conservatrix*, *Autocrati'a*, *Autonom'ia*, *Autocrato'ria*, *Autogian'sis*, *Autotherape'a*, *Physiat'ric*, *Physiocrati'a*, *Physiocrati'a*. A term, employed by some, to express that instinctive healing power, in an animal or vegetable, by virtue of which it can repair injuries inflicted upon it, or remove disease.

VIS MOR'TUA. Under this name Haller included the mechanical properties of membrane—flexibility, extensibility, elasticity, &c.—which are totally independent of the vital properties. They remain some time after the complete extinction of life in all its functions; seem to be connected with the mechanical arrangement of particles and the chymical composition of the substance in which they reside, and not to be affected until the progress of decomposition has become sensible.

VIS MUSCULARIS, *Myodynamia*—v. *Plastica*, *Plastic force*—v. *Reproductiva*, *Plastic force*—v. *Vita*, *Irritabilitas*.

VIS VITALIS, *Vis seu Fac'ultas Vitæ*, (F.) *Forces vitales*. The vital force which distinguishes living matter from the dead. Also, *Irritabilitas*.

VIS ZORICA, *Vis vitalis*.

VISAGE, Countenance.

VISCERA, Entrails.

VISCERAL, Splanchnic.

VISCERALIS, Stomachal.

VISCERES, Entrails.

VISONIA, *Physconia*.

**VISCUM ALBUM**, *Mist'letoe, Ixos, Ia'ia, Dabach*, (F.) *Gui*. A parasitic plant, which grows on a number of trees. *Family*, Caprifoliaceæ. *Sex. Syst.* Diœcia Tetrandria. That of the oak—*Viscum quercinum*—has been most celebrated, but it does not differ from the others. It was, at one time, much used in epilepsy and other neuroses;—the wood or leaves being given in powder, in the dose of  $\zeta\text{ss}$  or  $\zeta\text{i}$ . The berries, also, called *Pommes hémorrhoidales*, from their supposed virtues, are drastic; and, when applied externally, are maturative.

**VISIO**, Pupil.

**VISION**, *Vis'io, Visus*, from *videre, visum*, 'to see;' *Opris, Omma*, (F.) *Vue*. The action of seeing. The sight. The sight is one of the five senses, and the eye is its organ. By it we distinguish colours and appreciate most of the physical qualities of external objects. The eye is composed of different transparent media, whose curvatures and refractive powers are so combined as to render insensible the aberrations of sphericity and refrangibility, and to concentrate the numerous rays proceeding from more or less distant objects. These rays traverse, successively, the transparent cornea, the aqueous humour, the crystalline, the vitreous humour, and strike upon the retina, on which they impress the figure of the object whence they have emanated; and, in order that no obscurity may arise from the reflections that might otherwise occur, the anterior of the eye is lined by a membrane—the choroid—which is itself covered internally by a dark pigment. This absorbs the light, like the dark pigment in the interior of telescopes, and thus obviates confusion. As the rays proceeding from an object must cross each other in their course to the retina, it follows, that those proceeding from the upper part of an object must fall upon the lower part of the retina, and conversely; so that the object must be impressed upon the retina in an inverted position; yet experience teaches us to appreciate the position accurately.

**VISION, COLOURED**, Chromopsia—v. Double, Diplopia.

**VISORIUM ORGANUM**, Eye.

**VISORIUS**, Visual.

**VISUAL**, *Visua'lis, Viso'rius*. Same etymon. That which concerns the sight or belongs to vision.

**VISUAL ANGLE** is the angle formed by the crossing of two rays, proceeding from opposite points of any body, in their passage through the pupil. It is by the size of this angle, that we judge, to a certain extent, of the size of objects.

**VISUS**, Vision—v. *Acriis, Oxydercia*—v. *Acrior, Nyctalopia*—v. *Coloratus, Chromopsia*—v. *Debilitas, Asthenopia*—v. *Decolor, Achromatopsia*—v. *Dimidiatus, Hemioptia*—v. *Diurnus, Hemeralopia*—v. *Duplicatus, Diplopia*—v. *Hebetudo, Amblyopia*—v. *Juvenum, Myopia*—v. *Lucidus, Photopsia*—v. *Muscarum, see Metamorphopsia*—v. *Nocturnus, Nyctalopia*—v. *Senilis, Presbytia*.

**VITA**, Life—v. *Propria, Irritability*.

**VITAL PROPERTIES**, see *Properties, vital*.

**VITAL PRINCIPLE**, *Flam'mula seu Aera vita'lis, Microcosm'tor*, (F.) *Flamma vitale, Vital Flame*. The principle which, in association with matter, as in organized bodies, controls its manifestations and properties, and distinguishes organized matter from the inorganic. We know

nothing of this principle, except in its connexion with organization.

**VITALBA**, *Clematis vitalba*.

**VITALITY**, *Vital'itas*, from *vita*, 'life.' The vital principle: also used in the sense of vital action, or vital movement.

**VITELLINE**, *Vitellinus*, from *vitellus*, 'the yolk of an egg.'

**VITELLINE DISC**, Proliferous Disc—v. Fluid, see *Vesicula umbilicalis*.

**VITELLINE PEDICLE** is the pedicle which attaches the umbilical vesicle to the embryo. See *Vesicula umbilicalis*.

**VITELLINE POUCH**, *Vesicula umbilicalis*—v. *Vessels, Omphalo-mesenteric*.

**VITELLO-MESENERIC**, *Omphalo-mesenteric*.

**VITELLO OVI**, see *Ovum*.

**VITELLUS OVI**, see *Ovum*.

**VITEX**, *V. Agnus Castus, Agnus Castus*, (F.) *Gattilier, Petit Poivre, Poivre sauvage*. *Family*, *Pyrenaceæ*. *Sex. Syst.* Didynamia Angiosperma. The *Chaste Tree*. The seeds, when fresh, have a fragrant smell, and an acrid, aromatic taste. Formerly, they were celebrated as antaphrodisiacs.

**VITI SALTUS**, Chorea.

**VITIATIO**, Stuprum.

**VITILIGINES**, Ephelides.

**VITILIGO**, *Lepra*—v. *Alphus, Lepra alphonides*—v. *Melas, Lepra nigricans*—v. *Nigra, Lepra nigricans*.

**VITIS ALBA SYLVESTRIS**, *Bryonia alba*—v. *Apyrena*, see *V. Corinthiaca*.

**VITIS CORINTHIACA**. *Family* of the Vines. *Sex. Syst.* Pentandria Monogynia. This plant affords the *Uva passæ minores, Passæ Corinthiaca, Passula minores, Uva Corinthiaca, Currants*, (F.) *Raisins de Corinthe*. They are the dried fruit of the *Vitis Corinthiaca* or *Vitis apyrena*; and are similar, in their properties, to the raisin.

**VITIS IDÆA PALUSTRIS**, *Vaccinium oxycoccos*.

**VITIS VINIFERA**, *Am'pelos, A. Enoph'oros*. The *Grape vine, the Vine*, (F.) *Vigne*. Vine leaves and the tendrils have an astringent taste, and were formerly used in diarrhœa, hemorrhage, &c. The juice or sap, called *Lacryma*, has been recommended in calculous disorders and in cases of chronic ophthalmia. The juice of the unripe fruit is called *Verjuice*. The *Grape, Uva, Botrys, Staph'ylt, Rhaz*, (F.) *Raisin*, when ripe, is a wholesome delicious fruit; and, when dried, forms the *Uva passæ majores, Passula majores, Uva passæ solè siccata, Raisins*. These are inodorous; and to the taste, subacidulous, sweet, and mucilaginous. They are demulcent and nutritive.

**VITIUM**, Disease—v. *Caducum, Epilepsy*.

**VITIUM CONFORMATIONIS**. A disease or fault of conformation.

**VITIUM DIVINUM**, *Epilepsy*—v. *Herculeum, Epilepsy*—v. *Scrophulosum, Scrofula*.

**VITRARIA**, *Parietaria*.

**VITREOUS**, *Hyaline*—v. *Humor, Corpus vitreum*.

**VITREUS**, *Hyaline*.

**VITRINE AUDITIVE** (F.), from *vitrum*, 'glass;' *End'olymph, Liguor of Scarpa, Fluid of Scarpa*. The liquid contained in the membranous labyrinth of the ear, so called from its resemblance to the vitreous humour of the eye.

**VITRIOL**, *Ferri sulphas*—v. *Blue, Cupri sulphas*—v. *Cœruleum, Cupri sulphas*—v.

Green, Ferri sulphas—v. Roman, Cupri sulphas—v. White, Zinci sulphas.

VITRIOLUM ALBUM, Zinci sulphas—v. Ammoniacale, Ammoniz sulphas—v. Cupri, Cupri sulphas—v. Cyprum, Cupri sulphas—v. Ferri, Ferri sulphas—v. Goslariense, Zinci sulphas—v. Martis, Ferri sulphas—v. Romanum, Cupri sulphas—v. Veneris, Cupri sulphas—v. Viride, Ferri sulphas—v. Zinci, Zinci sulphas.

VITRUM, *Hy'alos, Glass, Brancia, (F.) Verre, from videre, 'to see.'* Glass, coarsely powdered, has been sometimes used to remove specks of the cornea.

Powdered glass has been regarded, but erroneously, as a poison. It acts only mechanically.

The saline scum, which swims on glass when first made, has been used in tooth powders. It is called *Sandiver, Sel de verre, Glass Gall, Fel vitri, &c.*

VITRUM ANTIMONII, see Antimonii vitrum—v. Hypoclepticum, Separatorium—v. Oculare, see Spectacles—v. Sublimatorium, Aludel.

VITTA, *Bandelotto, Caul.*

VIVÆSECTIO, Vivisection.

VIVERRA CIVETTA, see Civetta.

VIVIPARITÄ, see Viviparous.

VIVIPAROUS, from *vivus, 'alive,' and pario, 'I bring forth.'* An epithet applied to animals whose young are brought forth detached, without requiring to be hatched, as in the *Oviparous*. The condition may be termed *Viviparousness, (F.) Viviparität.* See Generation.

VIVIPAROUSNESS, see Viviparous.

VIVISECTION, *Vivisectio, Vivisection, Biotomy, from vivus, 'alive,' and secare, sectum, 'to cut.'* The act of opening or dissecting living animals.

VOCAL TUBE, see Tube, vocal.

VOCALIS, Vowel.

VOCE DI PETTO, see Voice—v. *di Testa (I.)*, see Voice.

VOICE, *Voz, Audz, Phoné, (F.) Voix, from vocare, 'to name, to call.'* An appreciable sound produced by the air, when driven from the lungs, throwing the inferior ligaments of the glottis into vibration. The function by which this is effected has been called *Phonation*. It is a function of animal life; and, in animals, is limited to the production of the *simple or instinctive voice*, as well as in the idiot; but, in intellectual man, becomes much more complicated and articulated,—an evidence of his intellectual superiority.

VOICE, ARTICULATED, *Speech, Loque'la, Glossa, Glotta, La'lia, Phrasis, (F.) Parole, Voix articulée*, is the voice as produced by the glottis, modified by the motions of the tongue, lips, and other parts of the vocal tube. Most physiologists agree in regarding the glottis, or the space between the thyro-arytenoid ligaments plus the ligaments themselves, as the part where vocal sounds are formed; but the mechanism of this formation is a matter of dispute. The greater part of individuals regard the glottis and its ligaments, with the *vocal tube*, or the space which the sound has to traverse after it is produced in the glottis, as a reed instrument, like the clarinet, the inferior ligaments of the glottis constituting the reed. In speech, as ordinarily effected, the tongue, lips, teeth, &c., are concerned, but there are some authentic cases on record, where it has been accomplished after the tongue has been removed. In such cases, the articulated voice must have been

produced in the glottis alone, or in it aided by an obscure action of the parts above it.

The singing voice is not limited to the larynx; the pharynx would seem to be concerned also. The notes that are produced in the latter have been termed *supra-laryngeal*, or *notes of the second register*. They constitute the *pharyngeal voice, falsetto or faucette voice or voce di testa, (I.)* The *laryngeal voice, or voice of the first register, is the Voce di Petto, (I.)*

VOICE, BLEATING, Egophony—v. *Cavernosa, Pectoriloquy.*

VOICE, CHOLERIC, *Voz Cholericas*. The peculiar husky voice of those affected with cholera.

VOICE, CONVULSIVE, *Voz Convulsiva, (F.) Voix Convulsive*. A neurosis of the voice, consisting in the production of discordant sounds—acute and grave—which cannot be brought to the natural tones by any effort of volition. It seems to be caused by disordered contraction of the muscles of the larynx.

VOICE, FALSETTO, see Voice—v. *Goat's, Egophony—v. Laryngeal, Laryngophony, see Voice—v. Pharyngeal, see Voice—v. Tracheal, Laryngophony.*

VOIE, Way.

VOIES DIGESTIVES, Ways, digestive—v. *Lachrymales, Lachrymal passages—v. Primaires, Ways, digestive—v. Secondas, Ways, second—v. Urinaires, Urinary passages.*

VOILE DU PALAIS, Velum pendulum palati—v. *Medullaire inferieur, Velum medullare inferius—v. Medullaire superieur, Valvula Vieusenii.*

VOIX, Voice—v. *Articulée, Voice, articulated—v. Articulée, Pectoriloquy—v. Bourdonnante, see Resonance—v. Bronchique, Resonance—v. Cavernouse, Pectoriloquy—v. Chérotante, Egophony—v. Egophonique, Egophony—v. de Pétchinella, Egophony—v. Sésile, Egophony—v. Tabaire, see Resonance.*

VOLA, Palm—v. *Manús, Palm—v. Pedis, Sole*

VOLATICA, Lichen.

VOLATILIZATION, *Volatilisation, Volatilisa'tio, from volare, 'to fly.'* The operation of reducing volatilizable substances into gas or vapour.

VOLATISATIO, Volatilization.

VOLITION, *Volit'io, from volo, 'to will.'* The act of willing. Hence:

VOLITIONAL, relating to volition. Thus the muscles may be moved by a *volitional* or by an *emotional* impulse.

VOLNUS, Wound.

VOLSELLA, Acanthobolus, Forceps, *Medicamentum—v. Patini, Valat à Patin.*

VOLTAISM, Galvanism.

VOLTUS, Countenance, Face.

VOLUNTARY, *Heav'ius, Voluntarius, from voluntas, 'will.'* Relating to the will; as '*voluntary* muscles;' muscles which act in obedience to the will.

VOLUNTAS, *Volentia, Arbitrium, Cupiditas, Boule'sis, Bule'sis, Thel'ma, (F.) Volenté.* Will or desire.

VOLUNTAS SEU CUPIDITAS DESENDERE, *Lab'do intestini.* The desire to go to stool.

VOLVULUS, Ileus—v. *Intestinorum, Intussusceptio.*

VOMENDI CONAMEN INANE, Vomition.

VOMER, 'a ploughshare;' *Os vomeris, Ara'trum, Os maxill'a superioris unilaterale.* One of the bones of the face, so called from its resemblance. It is an sgygous bone, forming

the posterior part of the septum narium. It is thin, flat, and quadrilateral; and is articulated, below, to the superior maxillary and palatine bones; and above, to the sphenoid, ethmoid, and cornets of Bertin.\* It is developed by a single point of ossification. Also, the penis.

**VOM'ICA, Pycocystis**, from *vomere*, 'to vomit,' 'to cast up;' (F.) *Vomique, Crachement de pus*. A term used by some authors for any encysted collection of purulent matter in the interior of a viscus. The acceptance is commonly, however, restricted to purulent collections in the lungs, encysted or not, which may be discharged by the mouth, by breaking into the bronchial tubes. Two kinds of vomice are distinguished; the one caused by the softening or breaking down of pulmonary tubercles; the other, of much more rare occurrence, formed by a circumscribed abscess of the lungs. Instead of opening into the bronchia, the abscess is sometimes discharged into the cavity of the pleura, causing empyema.

**VOMICINE**, Brucia.

**VOMIQUE**, Vomica.

**VOMIQUIER**, *Strychnos nux vomica*.

**VOMISSEMENT**, Vomiting—*v. de Sang*, Hæmatemesis.

**VOMIT, BLACK**, Fever, yellow—*v. Black*, Melæna.

**VOMIT, DRY**, of MARRIOTT. A once celebrated emetic, called 'dry,' from its having been given without solution. It consisted of equal portions of tartrate of antimony and potassa, and sulphate of copper.

**VOMITIF**, Emetic.

**VOMITINE**, Emetine.

**VOMITING, Vomitus, Vomit'io, Vomit'ium, Vom'itum, Evomi'tio, Aëd tropé, Emesis Vomit'io, Palmus vomitus, Agritu'do ventriculi, Puking, Sickness of the Stomach, (F.) Vomissement**, from *vomere*, 'to cast up.' The act by which solids and liquids, contained in the stomach, are ejected by the mouth. Vomiting is the effect of some special irritation of the nerves of the stomach. It is not accomplished solely by the contraction of the stomach, as was for a long time believed. That organ, indeed, assists in the process; but the main cause is the compression exerted upon the parietes of the viscus by the diaphragm and abdominal muscles. Vomiting is a symptom common to numerous diseases. At times, it is sympathetic, as in affections of the kidney, uterus, brain, &c. At others, it is symptomatic, as in gastritis, peritonitis, &c. When very troublesome, it may often be palliated by effervescent draughts, aromatics, sinapisms, or blisters to the epigastric region, &c.

**VOMITING AT PLEASURE**, Regurgitation—*v. of Blood, Hæmatemesis*—*v. Stercoraceous, Copremesis*.

**VOMITIO**, Vomiting—*v. Sanguinis, Hæmatemesis*.

**VOMITIUM**, Vomiting.

**VOMITO NEGRO**, Fever, yellow—*v. Prietio*, Fever, yellow.

**VOMITORIUM**, Emetic.

**VOMITUM**, Vomiting.

**VOMITURION, Vomiturit'io, Emesi'a, Dysemesia, Subver'sio stom'achi, Vomens' di conamen ina'nt, Retching**. Same etymon. Ineffectual efforts to vomit. Some authors mean, by this term, a vomiting of but little matter, or that which is effected almost without effort. The first acceptance is the most general.

**VOMITUS**, Vomiting—*v. Cruentus, Hæmatemesis*—*v. Fæculentus, Copremesis*—*v. Marinus, Nausea marina*—*v. Navigantium, Nausea marina*—*v. Niger, Fever, yellow*—*v. Pituitosus, Blennemesis*—*v. Profusus, Hyperemesis*—*v. Purulentus, Pyemesis*—*v. Sanguinis, Hæmatemesis*—*v. Stercoris, Copremesis*.

**VOÛTE**, Vault—*v. Médullaire, Corpus callosum*—*v. à Trois piliers, Fornix*.

**VOWEL, Voca'lis**, from Latin *vox*, 'the voice,' and *voco*, 'to call;' (F.) *Voyelle*. Physiologically, a continuous breath or sound, produced in the glottis; but more or less modified by the form of the vocal tube, through which it has to pass. In the English language, *a, e, i, o, u, w* and *y*, are vowels.

**VOX**, Voice—*v. Cholericæ, Voice, choleric*—*v. Clangosa, Oxyphonia*—*v. Convulsiva, Voix Convulsive*—*v. Nasalis, Rhinophonia*—*v. Raurca, Raucedo, Rancous voice*—*v. Raucisona, Rancous voice*.

**VOYELLE**, Vowel.

**VUE**, Vision—*v. Courte, Myopia*—*v. Diurne, Hemeralopia*—*v. Faible, Amblyopia*—*v. Longue, Presbytia*—*v. Louche, Strabismus*—*v. Nocturne, Nyctalopia*.

**VULGA, Vulva**.

**VULNERAIRE, Vulnerary**—*v. Suisse*, see Falltranck.

**VULNERARIUS**, Traumatic.

**VULNERARY, Vulnerari'us, Traumaticus**, from *vulnus, vulneris*, 'a wound;' (F.) *Vulneraire*. A name applied by the ancients to medicines, which they considered capable of favouring the consolidation of wounds. The property has been ascribed to various plants.

**VULNERATIO NERVI**, Neurotrosis.

**VULNUS, Wound**—*v. Laceratum*, see Laceration—*v. Sclopetarium, Wound, gun-shot*—*v. Simplex, Cut*.

**VULNUSCULUM**, Wound.

**VULPIS MORBUS**, Alopecia.

**VULTUEUX (F.)**, *Vultuosus*. Corvisart has used the expression, *Face vultueuse, Fa'cie's vultuo'sa*, for the face, when it is more florid and swollen than in the natural state. This appearance, which is observed in active aneurism of the heart, according to Corvisart, is owing to the afflux of blood into the arterial capillaries, and hence differs from the livid and swollen appearance caused by the accumulation of blood in the venous capillaries, constituting the *Face injectæ*.

**VULTUS**, Countenance, Face—*v. Tetricus et Mœstus, Scythopasmus*.

**VULVA, Uterus**, see Vulva.

**VULVA**, from *valva*, 'a door;' *Hortus, Cunnus, Pudendum mulie'bre, Sinus pudoris, Choires, Arvum, Bucca, Bulga, Cadur'cus, Custos, Fomen, An'tulus, Femur summum, Follid'ulus, Fundus, Grœmium, Hiatus, Lanu'vium, Navis, Oppid'ulum, Specus, Vulga, Cymba, Saltus, Clitor'ium, Ostium, Sulcus, Amphicaus'tis, Concha, Porcus, Porta, Interfeminum, Mulie'bria, Fossa magna mulie'bris, Episeion, Es'chara, Hor'tulus cupid'inis, Boubalios, Byssos, Cava, Caver'na, Delphys, Delta, Fossa, Gynæcedum, the female pudendum; the female organs of Generation, the female parts, Loci mulie'bres, (F.) Vulva. A longitudinal opening between the projecting parts of the external organs of generation in the female, extending from the mons veneris to the perineum, and which is called, also, *Fossa magna*. Some*

anatomists, mean, by this term, the whole of the external genital organs of the female:—mons veneris; labia majora, and the cleft or vestibule separating them; the clitoris; nymphæ; meatus urinarius; entrance of the vagina; with the hymen or the caruncula myrtiformes, fossa navicularis and fourchette.

**VULVA**, *Fora'men commu'nè ante'rius, Iter ad infundibulum, Iter ad tertium ventricululum, Rima ad infundibulum, Apertu'ra ante'rior Ventriculi tertii cerebri*. An opening situate at the junction of the optic thalami, in the third

ventricle of the brain, and immediately beneath the anterior crus of the fornix.

**VULVAIRE**, *Chenopodium vulvaria*.

**VULVAR**, *Vulvaris*, from *vulva*. That which relates to the vulva. Chaussier gives this name to the external pudic arteries, because they are distributed to the vulva.

**VULVARIA**, *Chenopodium vulvaria*.

**VULVE**, *Vulva*.

**VULVITIS**; a hybrid word, from *vulva*, and *itis*, denoting inflammation. Inflammation of the vulva.

**VULVO-UTERINE CANAL**, *Vagina*.

## W.

**WAD**, Graphites.

**WAHOO**, see *Euonymus*.

**WAISICOAT**, **STRAIT**, *Indu'cula*, (F.) *Camisole, Gilet de force*. A dress, used for restraining maniacs, or those labouring under violent delirium. It has long sleeves, which are tied behind the body, so that the arms cannot be extricated from it. It ought, of course, to be made of very resisting materials.

**WAKE-ROBIN**, *Aurum maculatum, Trillium latifolium*.

**WALE**, *Wheat*.

**WALKING**, *Grossus, Inces'sus, Deambulatio, Ambulatio, Badis*, (F.) *La marche*. The action by which we change place, by means of a succession of steps in the same direction. In walking forwards, the centre of gravity is constantly altered; and a series of small, parabolic curves is described on the heads of the thigh bones, the extent of which is regulated by volition, under the guidance of vision.

**WALLA-CHIA**, **MINERAL WATERS OF**. There are many excellent sulphureous springs in this country, especially those at Bobotsch, Fineschti, Sibitschiudi Suz, Bräsa, Otschin, Serboneschte, Kimpalungi, Kosia, and Olo-neschti. Chalybeate and saline springs have also been found at Sibitschiudi Suz.—Siller.

**WALLFLOWER**, *Cheiranthus cheiri*.

**WALLRUE**, *Asplenium ruta muraria*.

**WALNUT**, *Juglans regia*—w. White, *Juglans cinerea*.

**WALTON**, **MINERAL WATERS OF**. A mineral spring near Tewkesbury, in Gloucestershire, England. It is an acidulous chalybeate.

**WANT**, from past participle of *Sax.*, *panian*, 'to wane'; 'to fall away.' 'Need of that which is necessary.' (F.) *Besoin*. This word is sometimes used to express the imperious necessity which compels us to take food, drink, &c. (See *Hunger and Thirst*.) In a more general sense, it means the impressions transmitted by the organs to the brain, when it is necessary that they should act: these wants are called *instinctive desires* and *internal sensations* or *stimuli*. Such are the desires or wants to eat, drink, void the urine, breathe, (*besoin de respirer*), &c., &c.

**WANT**, in the sense of *Indigence*, (L.) *Egestas, Indigentia*, is the cause of a number of diseases.

**WARD'S ESSENCE FOR THE HEAD-ACHE**, *Linimentum camphore compositum*—w. White Drops, see *Hydrargyri nitras*.

**WARM SPRINGS**, see *Virginia*, mineral Waters of.

**WARNERA CANADENSIS**, *Hydrastis Canadensis*.

**WART**, *Verruca*—w. *Corneous*, *Cornu*.

**WASH**, **BLACK**, see *Hydrargyri submurias*

—w. *Preventive*, *Lotion*, *Hannay's*—w. *White*, *Liquor plumbi subacetatis dilutus*.

**WASHERWOMAN'S SCALL**, *Psoriasis diffusa*.

**WASP**, *Vespa, Sphecx*, (F.) *Gaûpe*. A genus of gregarious insects, like the bee and the ant. They are armed with a sting, which pours a poisonous fluid into the puncture made by it. (See *Poisons, Table of*.) The best application is the *Sp. ammonis aromaticus*, or some preparation of ammonia.

**WASSERBURG**, **MINERAL WATERS OF**. Wasserburg is a town of Bavaria, seated on the Inn, 28 miles east of Munich. The water, called also, *Aqua Agatii*, contains carbonic acid; carbonates of lime and magnesia: sulphates of lime and magnesia; chloride of sodium, carbonate of soda and oxide of iron.

**WASSERCUR**, *Hydrosudotherapeia*.

**WATER**, *Sax.* *water, Aqua, Hydor, ΰδα, Alma*, (F.) *Eau*. Water was at one time regarded as a simple element. It is now known to consist of eight parts by weight of oxygen and one of hydrogen. It freezes at 32°, and boils at 212°, of Fahrenheit; and is taken as the unit in all tables of the specific gravity of solid and liquid substances.—Water, as we meet with it, is very different in its state of purity: generally, it contains small quantities of saline matter; at other times, as in sea water and mineral waters, it is largely impregnated. The characters of water, as met with under ordinary circumstances, are well compared by *Celsus*. "*Aqua levissima pluvialis est; deinde fontana ex flumine, tum ex puteo: post hæc ex nive, aut glaciæ; gravior his ex lacu, gravissima ex palude.*" Pure water is one of the best diluents that can be used. When cold, and especially when iced, it is one of the most useful refrigerants; and, in the form of the cold, tepid, and warm bath, it is serviceable in numerous diseases.

**WATER OF AIX LA CHAPELLE**, see *Aix-la-Chapelle*—w. *Allflower*, *Urine*, *cows'*—w. *Barley*, *Decoctum Hordei*—w. *Bielli*, *Aqua Biellii*—w. of *Bitter Almonds*, *Aqua Amygdalarum concentrata*—w. *Brass*, *Pyrosis*—w. *Brocchieri*, *Aqua Brocchierii*—w. *Camphor*, *Mistura Camphoræ*—w. *Canker*, *Cancer aquaticus*—w. *Carui*, *strong*, *Spiritus carui*—w. *Cinnamon*, *Aqua cinnamomi*—w. *Cinnamon*, *strong*, *Spiritus cinnamomi*—w. *Cologne*, *Eau de Cologne*—w. *Cure*, *Hydrosudotherapeia*.

**WATER**, **DISTILLED**, *Aqua destillata*, (F.) *Eau distillée, Holy water*, is generally ordered in extemporaneous prescriptions, but is rarely used. In some cases, however, it is absolutely

necessary; as water, containing any saline impregnation—hard water, for example—decomposes certain substances. Distilled water has been recommended as a diet-drink in cancerous affections; and it is used in the religious ceremonies of the Catholic church. In the Pharmacopœia of the United States (1842), it is directed to be made as follows:—Take of *Water*, ten gallons. First distil two pints, and throw them away; then distil eight gallons. Keep the distilled water in glass bottles.

**WATER-DOCTOR**, see *Uromantia*—*w. Epileptic*, of Langius, *Langii aqua epileptica*—*w. Fœnel*, *Aqua fœniculi*—*w. Flag*, yellow, *Iris pseudacorus*.

**WATER, FLORIDA**,—a celebrated perfume, may be made of *Ol. bergami* f.  $\zeta$ iv; *Tinct. bonzoïn*. c. f.  $\zeta$ ij; *Alcohol*. cong.

**WATER, GOULARD**, *Liquor plumbi subacetatis dilutus*—*w. Holy*, *Water*, distilled—*w. Honey*, see *Mel*—*w. in the Head*, *Hydrocephalus*—*w. Hungary*, *Spiritus rosmarini*—*w. Jags*, see *Varicella*.

**WATER, LAKE**, *Aqua ex lacu*, (*F.*) *Eau de lac*, is apt to be impure, from decayed animal and vegetable matters. A great deal will, however, depend upon the magnitude of the collection, and the degree of stagnation.

**WATER, LAUREL**, see *Prunus lauro-cerasus*—*w. Lavender*, *Spiritus lavandulæ*—*w. Lime*, *Liquor calcis*—*w. Lime*, compound, *Liquor calcis compositus*—*w. Magnesia*, carbonated, *Magnesia*, fluid—*w. Magnesia*, aerated, *Magnesia*, fluid.

**WATER, MARSH**, *Aqua paludosa*, (*F.*) *Eau de Marais*, is the most impure of all. It is generally more stagnant, and of course more loaded with decomposing animal and vegetable matters.

**WATER, MINERAL**, *Aqua mineralis*, *A. salubris*, *A. medicata*, *Fons salutaris*, *F. medicinalis*, *F. sotivus*, *Aqua sotivæ*, (*F.*) *Eau minérale*. *Water*, holding in solution different saline and gaseous substances in sufficient quantity to be possessed of medicinal properties, or of a temperature different from that of the ordinary springs of the country.

Mineral waters may be divided into four classes:—1. *Gaseous* or *Acidulous*. 2. *Chalybeate*. 3. *Saline*. 4. *Sulphureous*. These may be *thermal*, or *cold*,—*natural*, or *artificial*. Many of these divisions, however, run into each other; some of the substances, which they hold dissolved, belonging to one class as well as to another.

1. *Gaseous*, *Acidulous* or *Carbonated Mineral Waters*, *Aque minerales acidulæ*, (*F.*) *Eaux minérales gazeuses ou acidules*. The waters referred to this class, are those that contain carbonic acid gas in such quantity as to communicate to it certain sensible qualities. Waters impregnated with free carbonic acid, sparkle when drawn from the spring, or when poured into a glass. They have a sharp, acidulous taste; but become vapid from exposure to the air. Along with the carbonic acid, there are generally present portions of saline, earthy or metallic matter, chiefly carbonates of lime, magnesia, and iron. Waters, highly impregnated with carbonic acid gas, are grateful to the stomach; increase the appetite, and are diuretic; hence, their utility in dyspepsia, hypochondriasis, and gout. Their properties are, of course, modified by the saline matter that may be also contained in them. The most celebrated amongst the acidulous waters are those of Bar, Chateldon, St. Myon, Mont d'Or, Langeac, Seltzer,

Schlungenbad, Sultzmatz, Pymont, Spa, Carlsbad, Cheltenham, Scarborough, Saratoga, Ballston, and the Sweet Springs of Virginia.

2. *Chalybeate* or *Ferruginous Mineral Waters*, *Aque minerales ferruginosæ*, *A. Chalybeatæ*, *A. Martialis*, (*F.*) *Eaux minérales ferrugineuses*, contain iron—sulphate, chloride or carbonate, generally the latter—held in solution by an excess of acid. Chalybeate waters have a peculiar styptic taste. They are transparent when taken from the spring; but, when exposed for some time to the air, a pellicle forms on the surface, and a deposit of the iron takes place. Chalybeate waters are used as tonics in debility of all kinds; in all cases, in fact, where iron is considered to be indicated. They are the most numerous of all the classes of mineral waters. In the present dictionary, those only are specified which have some celebrity; yet there are upwards of ninety; whilst there are more than sixty of the saline, and upwards of thirty-five of the sulphureous. The most celebrated chalybeates are those of Tunbridge, Scarborough, Spa, Bussang, Forges, Vichy, Pymont, Passy, Provins, and Vals.

3. *Saline Mineral Waters*, *Aque minerales salinæ*, *Amna alcalisata* (Paracelsus,) (*F.*) *Eaux minérales salines*. Waters, holding in solution different saline substances in greater quantity than the acidulous waters. They differ in properties, according to the salts contained in them. The salts usually present are sulphates, chlorides, and carbonates; and the bases, with which the acids forming these are combined, are soda, magnesia, and lime. Saline mineral waters are usually aperient; and the most noted are those of Seltzer, Sedlitz, Balaruc, Bourbonne-les-Bains, Baden, Epsom, Cheltenham, &c.

To this class may also be added *Sea water*.  
4. *Sulphureous Mineral Waters*, *Aque minerales sulphurææ*; when warm, termed *Thiothermæ*, *Theothermæ*, *Fontes sulphurei calidi*, (*F.*) *Eaux minérales sulfureuses*, *Eaux sulfurées*, *E. sulfureuses*, *E. hépatiques*, &c. These waters owe their distinguishing character to an impregnation of sulphuretted hydrogen, and are at once recognised by their peculiar fetid smell, resembling that of rotten eggs. They usually contain saline substances, which modify their powers. From the action of the sulphuretted hydrogen, they are useful in cutaneous affections; and, from the combined action of this and the saline matter, they are valuable agents in diseases of the digestive organs. They are also employed in cutaneous eruptions; and the warm sulphur baths have been especially celebrated in such cases, as well as in rheumatic affections. The most renowned sulphureous waters are those of Barèges, Bagnères-de-Luchon, Cauterets, Bonnes, Aix in Savoy, Aix-la-Chapelle, Enghien, Harrowgate, Moffat, Virginia Springs, &c.

Some springs, as those of Bath, Buxton, Dax, Matlock, Warm and Hot Springs of Virginia, &c., are almost pure *Thermal Mineral Waters*. They are valuable agents in rheumatic affections; the warmth being equable during the whole period the individual is immersed in them; which cannot be the case in the artificial thermal bath.

The following Table by Dr. Pereira exhibits the composition of some of the principal mineral waters.

**FIXED CONSTITUENTS**  
ENTERING INTO THE COMPOSITION OF SOME OF THE MORE CELEBRATED  
**MINERAL SPRINGS.**

PROPORTIONS IN 10,000 PARTS OF WATER.

NOTE.—In reducing the analyses contained in this Table to a uniform measure, in order to render them susceptible of direct comparison with each other, the old English gallon is assumed to be as = 58,338 grains; the wine pint = 7305 gra.; the imperial gallon = 70,000 gra.; and the German 16-ounce measure = 7365 gra. The different salts have been reduced to their elementary constituents by Wollaston's scale of chemical equivalents.

**WATER, MINERAL, Acidulous water, simple.**  
**WATERS, MINERAL, ARTIFICIAL, (F.)** *Eaux minérales artificielles ou factices.* These are imitations of the natural; and some of them—as the factitious Cheltenham water, and Sedlitz water—answer the purpose of the natural water tolerably well. The acidulous and chalybeate waters are, however, most easily imitated.

**WATER, NUTMEG, Spiritus myristicæ—w.** Parsnep, creeping, Sium—w. Pennyroyal, spirituous, Spiritus pulegii—w. Peppermint, Aqua menthæ piperitæ—w. Qualm, Pyrosis.

**WATER, RAIN, Aqua pluvialis, (F.)** *Eau de pluie*, when collected at a distance from houses or other elevated objects, is the purest natural water, and has the least specific gravity. The only bodies which it usually holds in solution, are carbonic acid, and minute traces of carbonate of lime and chloride of calcium.

**WATER, RIVER, Aqua fluvialis, is derived from the conflux of numerous springs and rain water.** It is, generally, pretty pure.

**WATER, ROSE, Aqua rosæ.**

**WATER, SEA, Aqua Marina, Humor Doridis, (F.)** *Eau de Mer.* This contains chloride of sodium, magnesium and calcium, and sulphate of magnesia. It is cathartic and forms the usual gylster at sea. It makes an excellent tonic bath; superior in most cases—especially in scrofula—to the fresh water bath.

**WATER, SEYDSCHUTZ, Sedlitz water.**

**WATER, SNOW, Aqua nivæ, (F.)** *Eau de neige*, has usually been deemed unwholesome. It exactly resembles rain water in composition, and is equally salubrious.

**WATER, SODA, Acidulous water, simple—w.** Spearmint, Aqua menthæ viridis.

**WATER, SPRING, Aqua fontana, Hydropsis, (F.)** *Eau de fontaine*, contains, in addition to the substances detected in rain water, more or less sulphate of lime. When this is to such an extent as to curdle soap, the water is said to be *hard*; if not, *soft*. Hard water is, of course, inferior to soft, for domestic and medicinal purposes.

**WATER, STYPTIC, Sydenham's solutio sulphatis cupri composita—w.** Tar, see Pinus sylvestris.

**WATER, WELL, Aqua putealis, (F.)** *Eau de puits, Eau de source*, is the same as spring water, but liable to impregnation, owing to the land springs filtering into the wells, and conveying impurities into them.

**WATERS, DISTILLED, Aquæ destillatæ—w.** Discharged or broken, Profusio aquæ—w. First, Primitiæ.

**WATTWEILER, MINERAL WATERS OF.** Wattweiler is a small town in the department of Haut-Rhin, at the foot of the Vosges. The waters are acidulous chalybeates, and contain carbonates of iron, lime, and soda; chloride of sodium, and free carbonic acid.

**WAX, MYRTLE.** A wax obtained from the fruit of *Myrica cerifera*. It has been prescribed in dysentery.

**WAX, YELLOW AND WHITE, Cera flava et alba.**  
**WAXING KERNELS, Crescentia, (F.)** *Croissances, Croissants, Glandes de croissance.* A popular term for small tumours, formed by an enlargement of the lymphatic glands—in the groins of children particularly. They have been looked upon as connected with the growth of the body,—hence their name.

**WAY, Saxon** *weg, Via, Passage, Odes, (F.) Vois.* A name given to different canals.

**WAYS, DIGESTIVE, Digestive Passages, Prima Via, (F.)** *Voies digestives, Premieres voies*, are the series of hollow organs of digestion, composed of mouth, œsophagus, stomach, and small and large intestines. The term is often restricted to the first three of these.

**WAYS, SECOND, Second Passages, Secunda Via, (F.)** *Secondes voies*, comprise the chyli-ferous, lymphatic and blood vessels.

**WEAKSIGHTEDNESS, Asthenopia.**

**WEAL, Wheal.**

**WEANING, from Saxon** *wenan, 'to wean;'* *Ab lactatio, Apogalactismus, (F.)* *Sévrage.* The act of depriving the infant, permanently, of the breast, in order to feed it on other and more solid nourishment.

**WEANING BRASH, see** Brash, weaning.

**WEATHERCOCKS, Impatiens.**

**WEB, MUSCULAR, Panniculus carnosus.**

**WEB-EYE, Caligo.**

**WEDGED, (D.)** *wegghe, Inclu'sus, In-hærens, (F.)* *Enclavé.* The head of the foetus is said to be wedged in the pelvis, when it remains fixed notwithstanding the uterine efforts.

The condition is called *Incunatio seu In-clavatio foetus, Sphenosis, Inhærens, (F.)* *Enclavement.* See Paragomphosis.

**WEED IN THE BREAST, Mastodynia** *apostematosa—w.* Dyer's, *Reseda luteola—w.* Field, *Anthemis cotula—w.* Horsefly, *Sophora tinctoria—w.* Milk, *Apocynum androsaemifolium—w.* Soldiers', *Matico—w.* Silver, *Potentilla anserina.*

**WEEPING, Fletus.**

**WEIGHT, from Saxon** *wegan, 'to weigh;'* (F.) *Pésantour.* A sensation of heaviness or pressure over the whole body, or over a part,—the stomach or head for example.

**WEIGHTS AND MEASURES, Ponders et Mensura, (F.)** *Poids et Mesures.* The importance of possessing a uniform system of weights and measures has impressed the scientific of all countries, and numerous endeavours have been made to accomplish the object. It is, however, a matter of considerable difficulty, and one not likely to be attained. The new French measures are upon decidedly the best footing, but they are not adopted out of France. The greatest diversity prevails over Europe in the measures both of weight and capacity. Some of the following tables will show, that every subdivision of the pound, as well as the pound itself, differs in England and in France.

**WEIGHTS.**

*Troy Weight, as used by the British Apothecaries.—Pondus pharmaceuticum seu medicinalè.*

The pound ℔	} contains	12 ounces.
The ounce ʒ		8 drachms.
The drachm ʒ		3 scruples.
The scruple ʒ		20 grains.
The grain gr.		

These, and the signs by which they are denoted, are the same in all the British Pharmacopœias, as well as in the American.

lb.	Oz.	Dr̄ms.	Scrup.	Gra.
1 =	12 =	96 =	288 =	5760
	1 =	8 =	24 =	480
		1 =	3 =	60
			1 =	20

*Poids de Marc.*

The pound	} contains	16 ounces.
The ounce		8 drachms.
The drachm		3 scruples.
The scruple		24 grains.
The grain		

*Avoirdupois.*

Pound.	Ounces.	Drachms.	Troy grains.
lb. 1	= 16	= 356	= 7000
	1	= 16	= 4375
		1	= 27,34375

The avoirdupois drachm is sometimes divided into three scruples, and the scruple into ten grains. The pound of 7680 grains avoirdupois = 7000 grains troy, and hence 1 grain troy = .097 grain avoirdupois.

The *Poids de Marc* is that employed by the French Pharmaciens, when the new weights are not.

The following Tables exhibit the relative value of the old French and English weights.

<i>Poids de Marc.</i>	<i>Troy Wt.</i>	<i>Avoird.</i>	<i>Troy gra.</i>
1 pd. ( <i>livre</i> )	= 1.312681b	= 1.080143lb	= 7.561

VALUES OF THE GREECIAN, ROMAN, AND ARABIAN WEIGHTS AND MEASURES IN POUNDS DE MARC.

1. Weights of the Ancient Greeks.

	lbs.	oz.	dr.	gr.
The talent	=	54	2	5 24
The mina	=	14	3	40
The drachm	=		1	11
The obolus	=			13
The ceration	=			4
The chalcus	=			2
The septon	=			1

2. Weights of the Ancient Romans.

	oz.	dr.	gr.
The pound (libra)		16	6 48
The ounce (uncia)			7 16
The duella			2 29
The sicilicus			1 58
The sextula			1 14
The consular denar, denarius			1 3
The imperial denar or drachm, drachm			65
The victoriatius			31
The scriptulum or scrupul			2
The obolus			11
The sitiqua			4

The Greeks divided their obolus into *chalo* and *lepta*: some divided it into 6 *chalo*, and each *chalcus* into 7 *lepta*; others into 8 *chalo*, and every *chalcus* into 8 *lepta* or *minute*.

Dr. Milligan, in his edition of Celsus, gives the following table, exhibiting the Troy weight of measures of capacity and of weight in use amongst the Romans.

	Urna.	Libra.	Uncia.	Denarius.	Scrupulus.	Sextans.	Chalcus.	Grana.
Amphora, —	—4	—40	—960	—1720	—20160	—40320	—403200	—420480
Urna, 1	—40	—40	—330	—1000	—2160	—21060	—210240	
Congius, 1/2	—10	—100	—840	—2540	—5040	—50400	—52920	
Sextarius, 1/3	—3	—30	—140	—420	—840	—8400	—8760	
libra, 1		—12	—84	—252	—504	—5040	—5256	
Hemina,			84.7	—60	—180	—330	—3300	—3759
Acetabulum,			21.7	—15	—45	—90	—909	—939
Sesqui-cyathus,			21.7	—15	—45	—90	—909	—939
Cyathus,			13.7	—10	—30	—60	—600	—626
Secuncia,			1 1/2	—10 1/2	—31 1/2	—63	—630	—657
Uncia,			1	—7	—21	—42	—420	—438
Cochlear,				2 1/2	—7 1/2	—15	—150	—156
Drachma,				1	—3	—6	—60	—62.47
Denarius,				1	—3	—6	—60	—62.47
Scrupulus,					1	—2	—20	—20.23
Scrupulus dimidiatus,					1/2	—1	—10	—10.13
Obolus,						1	—10	—10.13
Sextans,						1	—10	—10.13
Chalcus,							1	—11.30

He gives also the following 'Carmen Mnemonicum,' which exhibits the analogies of the Roman and British imperial weights.

So the congius and gallon, each, ten pounds almost,

On the bushel and amphora eighty bestow;  
Rome's pound, as in Troy weight, twelve ounces obtains,

But her ounce is Abstruption, strictly, in grains:  
Denarii drams, scrupuli scrupuli define,  
Sextarius answers to our bottle of wine,  
And the mina's a short pint—fourteen ounces in fine.

3. Weights said to be of the Arabians, Modern Greeks, and Latins of the barbarous periods of the Middle Ages.

	oz.	dr.	gr.
The alchemion	14	3	40
The manes or ominus	10	6	28
Sacres, aughben, adar, assatli			7 16
The great or royal nut			3 44
The sextarius, stater			3 44
The lesser nut			2 50
Alibonans			2 29
Aureus, Alcolobus			2 14
The hazel nut, bendacata, holca, alchi, darchmi, atogochilos, ologinat, nabach			1 11
The acorn, lupino, Egyptian or Syrian bean, the hazel			49
The Alexandria bean or bromesalis			30
The Greek bean or grammis, the kernat, gannu, karmi, gracchus			21
The ring, cumulus, seminat, molosich, exolassat			11
The danick			8
The kirat, alkilat, kararit.			4

The cyathos	1 4 64
The uncia	6 64
The mystron	2 64
The chama minor	2 64
The cochlearion	1 64

2. Roman Measures of Capacity.

	lbs.	oz.	dr.	gr.
The amphora or cadus	56	9	7 24	
The urna	28	13	3 24	
The congius	7	0	2 48	
The sextarius	1	4	7 44	
The hemina	10	1	7 44	
The quartarius	5	0	2	
The acetabulum	2	4	23	
The cyathus or small glass	1	5	28	
The ligula or spoonful	3	2	34	

3. Measures said to be of the Arabian, Arabick, and Latin Physicians of the Middle Ages.

	lbs.	oz.	dr.	gr.
The misschape weighed	3	8	1 23	
Aben, kirt, ejub, aberia, or Roman mina	1	6	0 8	
The phial, haffilus, or hassitinus	10	1	8	
The calix or rjelati	5	0	44	
The handful, pugillum, cornucum	3	2	8	
The hanuf, acaaso, or anesims	2	4	28	
The conos or coctus, alcantus or alimunt, brialis cubus	1	5	24	
The lesser bachtas	5	5	28	
The largest spoonful	4	4		
A spoonful	1	24		
The colanos or veclanarium	1	24		
A small spoonful or flaggrina, or cyanes	1	24		
The smallest spoonful or fahaid	6			

Besides the weights and measures above mentioned, employed by the moderns, there are modes of estimating the quantities of substances by approximation. For example:—

- A glassful or cupful, ((F.) Verre,) is reckoned to contain 4 or 5 fluidounces.
- A wine-glassful, 1 1/2 ounce or two ounces.
- A table-spoonful, ((F.) Cuiller à bouche) about half an ounce.
- A coffee or dessert-spoonful, about 3 drachms.
- A tea-spoonful, a fluidrachm.

A *handful, manipulus*, (F.) *Poignée*, as much as can be held in the hand.

The *Pugillus* is as much as can be held by the three fingers. (F.) *Pincés*.)

These last quantities are occasionally prescribed by the French practitioners. Their weights must, of course, vary, according to the article. The authors of the Parisian codex have valued them, as regards certain substances.

	French	
	oz. dr.	
A <i>Manipulus</i> of barley weighs	3	24
" linsed	1	4
" linsed meal	3	3
" dried mallow leaves	1	3
" dried chicory leaves	1	0
" flowers of the tilia	1	24
	dr. scr. gr.	
A <i>Pugillus</i> of chamomile flowers weighs	2	
" arnica	1	2
" marsh-mallow	1	1
" mallow		60
" fennel seeds	1	60
" aniseed	1	4

A *hen's egg*, newly laid, weighs about 2 ounces and 2 drachms: when deprived of its shell, 2 ounces. The *white* weighs 1 ounce, 2 drachms, and 57 grains: the *yolk*, 5 drachms and 15 grains.

WELD, *Reseda luteola*.

WELK, *Acne*.

WEMDING, MINERAL WATERS OF.

These waters are situate about four leagues from Donawert in Bavaria. They contain sulphuretted hydrogen; carbonates of lime, magnesia, and soda; sulphates of lime and magnesia; a little chloride of calcium, and oxide of iron; and are much used in asthenic diseases.

WEN, Sax. *ven*, *Lu'pia*, *Tumour*, (F.) *Loup*. A name given to circumscribed, indolent tumours, without inflammation or change of colour of the skin. They may be met with in almost every part of the body. Their magnitude, as well as nature, is very variable. The term is sometimes given to an encysted tumour, and to bronchocele.

WESTERN ISLANDS, Azores.

WEST INDIES, (CLIMATE OF.) The climate of the West Indies has long been regarded as favourable to the consumptive. In confirmed consumption, it appears, however, to be positively injurious. As a prophylactic for those predisposed to consumption, it is generally favourable. The nature of the patient's constitution, in regard to the effects of elevated temperature, has always to be taken into account. In diseases, that are benefited by warm climates, the West Indies afford an appropriate residence. The islands in which the invalid can best obtain all the advantages of the climate, are Jamaica, Barbadoes, St. Vincents, Antigua, St. Kitts, and Santa Cruz.

WHAHOO, see *Euonymus*.

WHEAL, *Weal*, *Wale*. A ridge, or elevation of the skin, produced by a rod or whip; or like that produced in this manner. Such elevations are seen in urticaria.

WHEAT, *Triticum*—w. Indian, *Zea mays*—w. Turkey, *Zea mays*.

WHELK, *Acne*—w. Chin, *Sycosis*—w. Rosy, *Gutta rosea*.

WHFY, *Serum lactis*—w. Rennet, see *Serum lactis*—w. Tamarind, see *Tamarindus*.

WHISKY, see *Spirit*. A spirituous liquor obtained from oats, potatoes, &c., by distillation.

WHISKY LIVER, Liver, nutmeg.

WHISTLING, *Siftment*.

WHITE, Flake, *Plumbi subcarbonas*—w. Ball, *Cephalanthus occidentalis*—w. Leaf, *Pyrola maculata*, *Spiræa tomentosa*—w. Leg, *Phlegmatia dolens*—w. Matter of the brain, see *Cerebrum*—w. Root, *Asclepias tuberosa*—w. Spanish, Bismuth, subnitrate of—w. Swelling, *Hydrarthrus*—w. Swelling of lying-in women, *Phlegmatia dolens*—w. Sulphur, see *Virginia*, mineral Waters of—w. Weed, *Chrysanthemum leucanthemum*—w. Wood, *Liriodendron*, *Tilia*.

WHITENESS OF COMPLEXION, *Paleness*.

WHITES, THE, *Leucorrhæa*.

WHITLOW, *Paronychia*.

WHOOPIG-COUGH, *Pertussis*.

WHORLYWORT, *Leptandria purpurea*.

WHORTLEBERRY, *Vaccinium myrtillus*, *Vaccinium vitis idæa*—w. Bears', *Arbutus uva ursi*.

WHORTS, BLACK, *Vaccinium myrtillus*.

WIDOW-WAIL, *Cneorum tricoccum*, *Daphne Alpina*.

WIESBADEN, MINERAL WATERS OF, see *Wisbaden*.

WIESSAU, MINERAL WATERS OF.

These waters are situate about four leagues from the convent of Waldsassen in Bavaria. They contain carbonic acid; carbonates of lime and magnesia; chlorides of calcium, magnesium, and aluminum; carbonate of soda, and much oxide of iron. The Bavarians consider them to resemble the waters of Pymont.

WILD, Sax. *pilo*, (D.) *Wild*. An epithet given to the countenance, when not in harmony with the condition of the individual, and indicating strong, mental emotion;—a *wild look*, (F.) *Physionomie égarée*.

WILDUNGEN, MINERAL WATERS OF.

Wildungen is situate a few miles from Cassel in Germany. In its neighbourhood are several mineral springs; the chief of which, according to Stucke, contain a bituminous matter; chloride of sodium and sulphate of soda; carbonate and sulphate of lime, &c. They are used, chiefly, as refrigerants.

WILL, *Voluntas*.

WILLOW, *Salix*—w. Herb, common, *Lythrum salicaria*—w. Herb, purple, *Lythrum salicaria*—w. Red, *Cornus sericea*—w. Rose, *Cornus sericea*—w. Sweet, *Myrica* *gale*.

WIND, Sax. *pino*, *Ventus*, *An'emos*, (F.) *Vent*. Winds exert considerable influence on the animal economy; acting by their temperature, which necessarily modifies that of the circumambient air, as well as by their moisture or dryness, and by the emanations of different kinds, which they transport to greater or less distances. The winds which blow over a considerable extent of country, are dry and serene: those which come from the ocean, are moist and chilly.

WIND DROPSY, *Emphysema*—w. Flower, *Anemone*—w. Pipe, *Trachea*—w. Root, *Asclepias tuberosa*.

WINDY, *Flatulentus*, *Flatulent*, (F.) *Ventoux*. That which causes wind or flatulence; also, that which is caused by wind or flatulence; as *windy food*, *windy colic*, &c. Also, one affected with flatulence, or who is 'troubled with the wind.'

WINE, Sax. *vin*, (G.) *Wein*, originally, perhaps, from *ovos*, *Œnos*, *Vinum*, (F.) *Vin*. A name given by chymists to all liquors that

have become spirituous by fermentation. The term is generally, however, restricted to the fermented juice of the grape, or of fruits, the product of whose fermentation resembles, in almost all respects, that of the juice of the grape. Wine is composed of alcohol; saccharine matter; malic acid; tartaric acid; bitartrate of potass; acetic acid; an extractive colouring matter, more or less bitter, and partly resinous; and sometimes of an aromatic substance. The extractive colouring matter is chiefly met with in red wines. All these constituents, except the alcohol, are found ready formed in the grape. The alcohol proceeds from the decomposition of the saccharine matter. A part of the acetic acid is also formed during fermentation.

The following Table, drawn up by Mr. Brande, exhibits the quantity of spirit in different kinds of wine and liquors. It is proper, however, to remark, that many of these wines are prepared for the London market, and are more branded or "reinforced," than the same varieties sold in the United States. This is strikingly the case with port. Dr. Henderson, too, has remarked, that some of the wines analyzed by Mr. Brande were mixed with a considerable quantity of adventitious alcohol. Dr. Henderson's additions and corrections have the letter H. affixed.

PROPORTION OF ALCOHOL, &c. 0.825, IN ONE HUNDRED PARTS BY MEASURE OF THE FOLLOWING WINES, AND MALT AND SPIRITUOUS LIQUORS.

(d) 12.91 H.

The only wine recommended in some pharmacopœias is Sherry, *Vinum, Vinum albus Hispanicum, Leucanus*. It is a dry wine; the least variable in its properties, and agrees best with the dyspeptic. Other wines used officinally are—Canary or Sack wine, *Vinum Canariænum*; Mountain wine, *Vinum album montanum*; Tent wine; Rhenish wine, *Vinum Rhenanum*; and Port wine, *Vinum rubrum Portugalicum*.

The wines, habitually drunk, are almost innumerable. Those that are sweet, or contain a large portion of free, saccharine matter, are decidedly the least wholesome to the dyspeptic.

When wine is good, and of a proper age, it is tonic and nutritive; when new, flatulent and cathartic, disagreeing with the stomach and bowels. In medicine, it is a valuable tonic in the last stage of typhus, when the skin is not too hot and dry. Its use, however, requires great caution; and when once commenced under proper circumstances, it cannot be suddenly dropped without mischief. It is, perhaps, the best permanent stimulus in the catalogue of the materia medica.

WINE, AMINÆAN, *Aminæum vinum*—w. of Aloes, *Vinum aloes*—w. Antimonial, *Vinum antimonii tartarizati*—w. Antiscorbutic, *Vinum antiscorbuticum*—w. Aromatic, *Vinum aroma-*

ticum—w. Bark, compound, Vinum de kinâ kinâ compositum—w. Barley, *Cerevisia*—w. Bitter, diuretic, Vinum diureticum amarum.

WINE BITTERS, *Vinum gentianæ comp.* The formulæ for these may be various. The following is as good and as agreeable as any. (*Rad. gentianæ*, ℞j, *cort. aurant.* ℥x, *sem. cardom.* cont. ℥iv, *cinnam.* cont. ℥iv, *wine*, foreign or domestic, three gallons and a half.) Tonic and stomachic.

WINE, CEDAR, *Cedrinum vinum*—w. Champagne, Vinum campanum—w. Chian, Chium vinum—w. of Colchicum, Vinum colchici—w. of Colchicum seed, Vinum colchici seminis—w. of Ergot, Vinum ergotæ—w. of Gentian, compound, Vinum gentianæ compositum—w. of Hellebore, white, Vinum veratri—w. Ipecacuanha, Vinum ipecacuanhæ—w. of Iron, Vinum ferri—w. Medicated, Vinum medicinale—w. of Opium, Vinum opii—w. Port, Vinum Portugalicum—w. Pullet, *Poulet, vin de*—w. of Quina, Vinum quinis—w. Rhubarb, Vinum rhei palmati—w. Sherry, Vinum—w. Steel, Vinum ferri—w. Tobacco, Vinum tabaci—w. White, see Wine—w. of Wormwood, Vinum absinthites.

WINKING, Scardamygma.

WINTER-BARK TREE, *Wintera aromatica*—w. Berry, Virginia, Prinos—w. Berry, whorled, Prinos—w. Bloom, *Hamamelis Virginiana*—w. Cough, Bronchitis, chronic—w. Green, *Gaultheria*—w. Green, round-leaved, *Pyrola*.

WINTERA, see *Wintera aromatica*.

WINTERA AROMATICA, *Drymis Winteri*, *Winter-bark Tree*. The Bark, *Wintera* (Ph. U. S.), *Cortex Winteranus*, *Cortex Winteranus Magallanicus*, *Cortex Magellanicus*, (F.) *Écorce de Winter*, *Cannelle pivoirée*, is very much allied in its properties to *Canella alba*.

WISBADEN, MINERAL WATERS OF. Wisbaden is a town of Germany, about 6 miles north of Mainz, and 22 west of Frankfort. It has been long celebrated for its hot springs; and is much frequented. There are numerous cold and thermal springs,—the former containing sulphohydric acid; the latter being saline and acidulous. The temperature of the hot springs varies from 117° to 160° Fahr.

WISMUTHUM, Bismuth.

WOAD, *Isatis tinctoria*.

WOLFBANE, *Veratrum viride*.

WOLFSBANE, *Aconitum*—w. Wholesome, *Aconitum anthora*.

WOLFSCLAW, *Lycopodium*.

WOLFSJAW, see Harelip.

WOMANHOOD, *Mulieritas*.

WOMB, Uterus—w. Falling down of the, *Prolapsus uteri*—w. Grain, Ergot—w. Laceration of the, Uterus, rupture of the—w. Tympany of the, *Physometra*.

WOOD, BRAZIL, *Cæsalpinia echinata*—w. Elk, *Andromeda arborea*—w. Fernambuco, *Cæsalpinia echinata*—w. Lice, *Onisci aselli*—w. Nicaragua, see *Cæsalpinia*—w. Peach, see *Cæsalpinia*—w. Pernambuco, *Cæsalpinia echinata*—w. Sappan, *Cæsalpinia sappan*—w. Sappan, *Cæsalpinia sappan*—w. Sorrel, *Oxalis acetosella*—w. Sour, *Andromeda arborea*—w. Waxen, *Genista tinctoria*.

WOODBINE, COMMON, *Lonicera periclymenum*.

WOODROOF, SWEET-SCENTED, *Asperula odorata*.

WOODS, SUDORIFIC, (F.) *Bois sudori-*

*guas*. This term is applied, collectively, to the guaiacum, sassafras, china, and sarsaparilla; which are often used together to form the sudorific decoction.

WOORARA, Curare.

WORM-BARK TREE, *Geoffræa inermis*—w. Cakes, Story's, see Cakes, worm, Story's—w. Disease, Helminthiasis—w. Goosefoot, *Chenopodium anthelminticum*—w. Grass, perennial, *Spigelia Marilandica*—w. Guinea, *Dracunculus*.

WORM LOZENGES, CHING'S. Empirical preparations, which consist of yellow and brown lozenges. The former are directed to be taken in the evening; the latter on the following morning. The *Yellow Lozenges*. (*Saffron*, ℥ss, *water*, Oj; boil, and strain; and add of *white panacea of mercury* (calomel washed in spirit of wine), ℞j, *white sugar* 28 lbs, *mucilage of gum tragacanth* q. s., to make a mass. Divide, so that each lozenge may contain a grain of the panacea.) The *Brown Lozenges*. (*Punacea* ℥vij, *resin of jalap* ℞iijss, *white sugar* ℞ix, *mucilage of gum tragac.* q. s. Each lozenge to contain gr. ss of the panacea.)

WORM LOZENGES, SHERMAN'S, are said to be composed of calomel, gamboge and sugar.

Peter's Worm Lozenges are said to be composed in a similar manner.

WORM ROOT, *Spigelia Marilandica*—w. Seed, *Artemisia antonica*, *Chenopodium anthelminticum*—w. Seed goosefoot, *Chenopodium anthelminticum*—w. Weed, Corsican, *Corallina Corsicana*, *Polanisia graveolens*—w. Weed, white, *Corallina*—w. Wood, common, *Artemisia absinthium*—w. Wood, creeping, *Artemisia rupestris*—w. Wood, lesser, *Artemisia Pontica*—w. Wood, Roman, *Artemisia Pontica*—w. Wood, sea, *Artemisia maritima*—w. Wood, silky, *Artemisia glacialis*.

WORMIANA Ossa seu OSSICULA, *O. epactaria*, *O. raphogeminantia*, *O. trigoneta*, *O. triangularia Bladsi*, *Clavos calvarie*, *O. suturatum*, (F.) *Os Wormians*, *Clefs du crâne*, *Os epactas*, *Os surnumerares*, (Ch.), *Os intercalés*, *Os triangulaires*. Small bones, which are sometimes observable in the sutures of the bones of the cranium, of which they form a part. They were called *Wormiana*, from Olaus Wormius, who is said to have first described them. They had been previously, however, mentioned by G. Andernach, a physician at Strasburg. The Ossa Wormiana exist more commonly in the sutures of the vault of the skull; especially in the lambdoidal, sagittal, and squamous. They are uncommon at the base of the skull. Their size is very variable, and shape irregular. Their structure and development are similar to those of the other bones of the cranium; and, like them, they are bounded by sutures.

WORMS, originally from (L.) *Vermes*; *Intestinal Worms*, *Entozoa*, *Entozoa'ria*, *Enterozoa*, *Endozoa*, *Vermes intestini*, *Entelmintha*, *Entelminthes*, *Helminthi*, *Helminthia Alvi*, *H. podiciis*, *Splanchnelmintha*, *Entoparasites*, (F.) *Vers*, *Vers intestinalium*, *Entozoaires*. Animals whose common character is that of existing only in other animals; hence their name *entozoa*, from *εντος*, 'within,' and *ζωον*, 'animal.' They are met with, not only in the natural cavities, but even in the tissue of the organs. Cuvier, Rudolphi, Brera, Bremser, Laënnec, and others have endeavoured

to classify them,—some according to their shape; others, according to their anatomical characters.

The following table exhibits the entozoa, which have been met with in the human body, and their usual habitat.

<i>Entozoa.</i>	<i>Where Found.</i>
Trichocephalus dispar,	} Intestines.
Oxyuris vermicularis,	
Ascaris lumbricoides,	
Bothriocephalus latus,	
Tænia solium,	
Ditrachyceras rudis,	} Urinary Bladder.
Diplosoma crenata,	
Spiroptera hominis,	
Dactylus aculeatus,	
Distoma hepaticum,	
Strongylus gigas,	} Gall bladder.
Filaria oculi,	
Acephalocystis endogena,	} Kidney.
Echinococcus hominis,	
Polystoma pingucola,	} Liver.
Polystoma venarum,	
Filaria bronchialis,	} Liver, Spleen, and Omentum.
Trichina spiralis,	
Cysticercus cellulosa,	} Ovary.
Acephalocystis multifida,	
Filaria medinensis,	} Veins.
	} Bronchial glands.
	} Muscles.
	} Brain.
	} Cellular texture.

The most common of these are;—the Oxyuris vermiculares, Ascarides lumbricoides, and Tænia, which are found in the intestines. The origin of these worms is extremely singular, and more favourable than any other fact to the hypothesis of spontaneous generation in the lowest tribes of animated nature. They are certainly not identical with any worms out of the body. They are most commonly met with in children improperly fed; but their presence cannot be positively detected by any symptom, except that of the discharge of the worms themselves in the evacuations. They may, of course, give rise to every kind of irritation in the intestinal tube, and to sympathetic disturbance in most of the other functions; but all these signs may be produced by intestinal irritation resulting from other causes.

Anthelmintics or vermifuges, employed, as the name imports, for their removal, may be of two kinds—mechanical and trus. To the first class—the mechanical—belong Emetics, Purgatives, Mucuna, powdered Tin, &c. To the latter—the trus anthelmintics—Turpentine, Chenopodium anthelminticum, Pink-root, Semina Santonici, &c. Of these the best is turpentine.

See Oleum terebinthina. The great object, however, is to prevent their generation. This must be done by generous diet, fresh air, and tonics where necessary.

WORT, Sax. *pyrc*; *Mustum, Infusum By-nas seu Brasii seu Malvi*, (F.) *Motif de la Bière*. An infusion of malt. This has been recommended in scurvy. One measure of ground malt is added to three equal measures of boiling water. The mixture must be well stirred, and left to stand covered three or four hours. Dose. one to four pints, daily. It has, also, been recommended in other cases, where a strong putrescent disposition appeared to prevail in the fluids, as in cancerous and phagedenic ulcers. It is not now employed.

WOUND, Sax. *pynd*, *Vulnus, Volnus*, diminutive *Vulnus'culum, Plaga, Trauma, Trota, Trevis, Trevis Vulnus, Blabé, Tymma*, (F.) *Plaie, Blessure*. A solution of continuity in the soft parts, produced by some mechanical agent. Wounds present innumerable differences, as regards their situation; the parts interested; their direction; size; shape; the nature of the instrument or agent by which they are produced; their more or less simple or complex character, duration, &c. A wound is called *incised*, (F.) *Coupure, Incision*, when made by a cutting instrument;—*punctured*, *Nygma*, (F.) *Piquure*, when made by a pointed instrument;—*lacerated*, (F.) *Déchirure, Plai par arrachement*, when the parts are lacerated or torn by the wounded body; *poisoned*, *Cellulitis venenata, Necusis*, (F.) *Plaie envenimée* when some virulent or venomous substance has been introduced;—and *contused*, (F.) *Plaie contuse*, when produced by a blunt body. *Cursus wounds, Sclopeto-plagæ, Vulnere sclopetaria* (F.) *Plaies d'armes à feu ou d'arquebuse*. *Coup de feu*, belong to the last division.

WOURALI, Curare.  
WRACK, BLADDER, YELLOW, Fucus vesiculosus—w. Sea, Fucus vesiculosus.  
WRENCH, Sprain.  
WRINKLE, Sax. *pyncle, Ruga, Kybis Rhacus, Rhachus, Rhagus, Rhyss'ema, Corregatio cutis*, (F.) *Ride*. A furrow or fold in the skin of the face, forehead, vagina, &c. See Corrugation.  
WRIST, Carpus.  
WRIST-DROP. Paralysis of the muscle of the forearm, induced by the poison of lead.  
WURSTGIIFT, Allantotoxium.  
WRONG HEIR, Cancellus.

X.

XALAPPA, Convolvulus jalapa.  
XANTHIUM, X. *strumarium, Bardana minor, Lappa minor, Lesser Burdock, Burweed, Burthistle, Clotbur*, (F.) *Lampourde, Petit Glouteron, Petite Bardane*. This herb, as one of its names imports, was once esteemed for the cure of scrofula. The seeds have been administered in cutaneous affections.  
XANTHOP'SIA, from *ξανθος*, 'yellow,' and *opsis*, 'vision.' Yellow vision,—as sometimes occurs in jaundice.  
XANTHORRHIZA, Xanthorrhiza apiifolia.  
XANTHORRHIZA APIIFOLIA, Xanthorrhiza, X. *simplicissima, X. Marbois'ca, Zanthorrhiza*

*tinctoria, Yellow Root, Parsley-leaved Yellow Root or Yellow wort, Shrub yellow root*. The root of this American plant—Xanthorrhiza—(Ph. U. S.)—is a strong and pleasant bitter; and in the dose of two scruples, sits easy upon the stomach.  
XANTHOS, Yellow.  
XANTHOXYLUM CLAVA HERCULINA, Prickly Ash, Toothache Tree, (F.) *Clavair a feuilles de frêne, Frêne épineux*. The bark—Xanthoxylum, (Ph. U. S.)—is a very strong stimulant and powerful sialagogue. It has been given, internally, in rheumatism. Another species—Xanthoxylum frazinfolium, Xantho-

*lum fraxin'eum*, Shrubby prickly ash, Toothache bush, Pellitory, Yellow wood, Suterberry,—possesses active powers. A spirituous infusion of the bark has been highly recommended in cases of violent colic. The fresh juice, expressed from the roots of the xanthoxylum, is said to afford relief in the dry bellyache of the West Indies. A decoction of the bark is sometimes used as a wash to foul ulcers.

XANTICA, Carminatives.

XANTOLINA, *Artemisia santonica*.

XENODOCEUM, Hospital.

XENODOCHEUM, Hospital.

XERANSIS, Arefaction, Drying.

XERANTIA, *Siccantia*.

XERASIA. Same etymon; from ξηρος, 'dry.'

A disease of the hairs, which become dry, cease to grow, and resemble down covered with dust.—Galen.

XERION, Cataplasma.

XEROCOLLYRIUM, from ξηρος, 'dry,' and κολλιον, 'a collyrium;' *Collyrium siccum*. A dry collyrium.

XERODERMA, from ξηρος, 'dry,' and δερμα, 'skin.' Diminution of secretion of the sebaceous glands.

XEROMA, Xerophthalmia—x. Conjunctival, Xerophthalmia.

XEROMA, Lachrymal. Suppression of the lachrymal secretion.

XEROMYCTER, Xeromycteria.

XEROMYCTERIA, *Xeromycter*, from ξηρος, 'dry,' and μυκτηρ, 'the nose.' Dryness of the nose.

XEROMYRON, *Unguentum siccum*; from ξηρος, 'dry,' and μρον, 'an ointment.' A dry ointment.—Gorræus.

XEROPHAGIA, from ξηρος, 'dry,' and φαγω, 'I eat.' Excessive use of dry aliment. A kind of regimen to which the ancient athletæ subjected themselves, with the view of increasing their strength.

XEROPHTHALMIA, *Ophthalmia sicca*, *Ophthalmozero'sis*, *Xero'ma*, from ξηρος, 'dry,' and οφθαλμια, 'inflammation of the eye.' An inflammation of the eye, without discharge. The term—as well as *Conjunctival Xero'ma*, and *Cuticular Conjunctiva*—has been given

to cases in which the conjunctiva is so changed, that it presents more of the characters of skin than of mucous membrane. It is incapable of radical cure. Also, lippitudo.

XEROTRIBIA, see Friction.

XEROTRIPSIS, Friction, dry.

XIPHODES, Xiphoid.

XIPHODYMUS, Thoraco-gastrodidymus.

XIPHOID, *Xiphoides*, *Xiphodes*, *Ensisiformis*, from ξιφος, 'a sword,' and σιδος, 'shape;' *Cartilago Xyphoides*, *C. Xiphoides*, *C. Scutalis*, *C. Ensisiformis*, *C. Pelta'lis* seu *pelta'tus*. *En'siform cartilago*, *Furcul'a inferior*, *Mucronatum os*, *Mucronata Cartilago*, *Chondros*, *Processus xiphosternalis*, *P. xiphoides*, *Processus sterni xiphoides*, (F.) *Appendix* ou *cartilago xiphoides*, *C. Mucroné*, *Appendix sous-sternale*, *Palette*. The name of the appendix which terminates the sternum beneath; and which is so called from some resemblance to a sword.

XIPHOD LIGAMENT, *Costo-xiphoid L.* (F.) *Ligament xiphoidien* ou *costo-xiphoidien*, is a small, very thin, ligamentous fasciculus, which passes from the cartilage of prolongation of the 7th rib to the anterior surface of the xiphoid cartilage, into which it is inserted by its fibres decussating with those of the opposite ligament.

XIPHOPAGES, *Didymus*, *Symphyo-epigastrius*; from ξιφος, 'a sword,' and πγγυμι, 'I fix.' A monstrosity, in which twins are united by the epigastrium, as in the case of the Siamese twins.

XYLO-ALOES, *Agallochum*—x. *Balsamum*, see *Amyris opobalsamum*—x. *Cassia*, *Laurus cassia*—x. *Cinnamomum*, *Laurus cinnamomum*.

XYLUM, *Gossipium*.

XYMPATHIA, *Symphathy*.

XYRIS, *Iris fœtidissima*.

XYRUM, *Novacula*.

XYRUS, *Novacula*.

XYSMA, *Lintheum*, *Rasura*, *Scobs*.

XYSMOS, *Rasura*.

XYSTER, *Rasporium*.

XYSTOS, *Lintheum*.

XYSTRUM, *Rasporium*—x. *Ophthalmicum*, *Ophthalmoxyster*.

## Y.

YAM. This esculent root is principally obtained from three species of *Diosco'ra*,—*alata*, *bulbifera*, and *sativ'a*. They grow spontaneously in both the Indies, and their roots are eaten promiscuously, as the potato is with us. Their taste is somewhat like the potato.

YARD, Penis.

YARROW, COMMON, *Achillea millefolium*.

YAUPON, *Ilex vomitoria*.

YAWNING, from Sax. *zeonan*, *Chasmé*, *Chasmus*, *Hæ'tus*, *Oscæ'do*, *Oscitatio*, *Clonus pandiculatio mazilla'rum*, *Gaping*, (F.) *Baillement*. Yawning consists of a deep inspiration, with considerable separation of the jaws, executed slowly and in an involuntary manner, and followed by a prolonged and more or less sonorous expiration. This respiratory movement is preceded by a feeling of oppression in the epigastric region, and in the muscles of respi-

ration and mastication. Yawning has been conceived to be owing to torpor in the pulmonary circulation; the causes producing it being commonly *œnui*, fatigue, sleepiness, monotonous sounds, hunger, sympathy, &c. Yawning often precedes the invasion of certain intermittents, attacks of hysteria, &c., and it may, by its frequency, and obstinacy, become a true disease.

YAWROOT, *Stillingia*.

YAWS, *Frambœsia*.

YEAST, Yest—y. *Plant*, *Torula cerevisiæ*.

YELLOW, *Flavus*, *Lu'teus*, *Xanthus*, from past participle of Sax. *zælan*, 'to burn.' One of the seven primitive colours.

YELLOW ASH, *Cladrastis tinctoria*—y. *Berry*, *Podophyllum montanum*.

YELLOW LIGAMENTS, (F.) *Ligaments jaunes*, occupy the spaces between the vertebral plates, from the interval, which separates the second

vertebra from the third, to that which separates the last vertebra from the sacrum. They are so called in consequence of their colour.

**YELLOW PAINT**, *Hydrastis Canadensis*—y. Root, *Jeffersonia Bartoni*—y. Root, Parsley-leaved, *Xanthorrhiza apiifolia*—y. Root, Shrub, *Xanthorrhiza apiifolia*—y. Star, *Helenium autumnale*—y. Weed, *Ranunculus acris*—y. Wood, *Xanthoxylum fraxineum*—y. Wort, Parsley-leaved, *Xanthorrhiza apiifolia*.

**YELLOWS**, *Cypripedium luteum*, Icterus, *Ranunculus acris*.

**YERBA DEL SOLDADA**, *Matico*—y. *de Huaca*, *Datura sanguinea*.

**YEST**, *Yeast*, Sax. *ȝeft*, from *ȝrf*, 'a storm,' *ȝrfis*, 'stormy;' *Cerevisia Fermentum*, *Spu-ma Cerevisia*, *Barm*, (F.) *Levure*, *Levure de la Bière*. The scum, which collects on the surface of beer whilst fermenting. Yeast is anti-septic and tonic. It has been much extolled in

petrid fevers,—a table-spoonful being given as a dose, in porter, wine, &c. It is, also, applied, in the form of cataplasm, to foul ulcers. In all these cases, it acts by virtue of the generation of carbonic acid gas.

**YEUX ARDENS**, Ardent eyes—y. *d'Écrevisse*, *Cancerorum chelæ*.

**YEW TREE**, *Taxus baccata*.

**YLECH**, Ilech.

**YLIATER**, Ilech.

**YOLK OF EGG**, see *Ovum*.

**YOUTH**, Adolescence.

**YOPON**, *Ilex vomitoria*.

**YPSELOGLOSSUS**, *Basioglossus*.

**YRIDES**, Orpiment.

**YSAM'BRA**, *Pedigamb'ra*. An ancient Spanish poison, of which hellebore formed the greatest part.

**YUCCA**, *Jatropha manihot*.

**Y-WER-A**, see *Spirit*.

Z.

**ZACCHARUM**, *Saccharum*.

**ZAEL**, *Borosail*.

**ZAFFRAN**, *Crocus*.

**ZAMIA INTEGRIFOLIA**, see *Arrowroot*—z. *Pumila*, see *Arrowroot*.

**ZANNA**. A kind of Armenian bole, used by the ancients as a desiccative. It was also called *Zarnacha*.

**ZANTHORRHIZA APIIFOLIA**, *Xanthorrhiza apiifolia*.

**ZANTHOXYLUM CLAVA HERCULIS**, *Xanthoxylum clava Herculis*.

**ZAPANIA NODIFLORA**, *Anacoluppa*.

**ZARNACHA**, *Zanna*.

**ZARSA**, *Smilax sarsaparilla*.

**ZARZAPARILLA**, *Smilax sarsaparilla*.

**ZEA MAYS**, *Indian Corn*, *Corn*, *Turkey Wheat*, *Maize*, *Ador*, *Indian Wheat*, (F.) *Mais*, *Graine de Turquie*, *Blé d'Inde*, *Blé d'Espagne*, *Blé d'Italie*, *Blé de Turquie*. A native of America, and much used over the whole of the continent as an article of diet. It is ground for the same purposes as wheat, and forms an excellent bread.

**ZÉDOAIRE ROND**, *Kæmpferia rotunda*.

**ZEDOARIA**, *Kæmpferia rotunda*—z. *Longa*, see *Kæmpferia*—z. *Rotunda*, see *Kæmpferia*.

**ZEDOARY**, *Kæmpferia rotunda*.

**ZELOPIS**, *Zelotypia*.

**ZELOTYP'IA**, from *ζηλος*, 'love,' and *τυπος*, 'form,' 'model;' *Zelosis*. It has been proposed to apply this name to the violent mental affection produced by the acknowledged or presumed infidelity of a beloved object; and to the consequences of such affection;—melancholy, mania, &c.

**ZEMA**, Decoction.

**ZENICON**, *ζενικον*. Ancient name of a Keltic poison, used for poisoning arrows.

**ZEPHACH**, *Peritonæum*.

**ZERMA**, *Zerna*.

**ZERNA**, *Zerna*. Amongst the barbarous Latin writers it signified ulcerated impetigo, *Impetigo ulcerata*.

**ZERUMBET**, *Cassumuniar*.

**ZESIS**, Effervescence, Decoction.

**ZEST**, see *Citrus medica*.

**ZESTOLUSIA**, Bath, bot.

**ZIBETHUM**, *Civetta*.

**ZIGNITES**, *Zingrites*.

**ZINC**, *Zincum*, *Zinkum*, *Spoltrum*, *Speanter*.

*Tutenag*, *Zinchum*, *Zint*, *Stannum Indicum*. Perhaps formed etymologically from (G.) *Zin*, 'Tin.' A metal obtained from calamine and blende. Its colour is bluish-white; lustre of the fresh surface considerable, but soon dulled, from the facility with which it oxidates; hard; texture striated. S. g. 7.190. Melts at 700° Fah., burns with a bright flame in a higher temperature, and is volatilized in the form of a white, flocculent oxyd. Its use, in medicine, is in the formation of the following preparations.

**ZINC, ACÉTATE DE**, *Zinci acetas*—z. Butter of, *Zinci chloridum*—z. Chloride of, *Zinci chloridum*—z. *Chlorure de*, *Zinci chloridum*—z. Ferrohydrocyanate of, *Zinci cyanuretum*—z. Flowers of, *Zinci oxydum*—z. Hydrocyanate of, *Zinci cyanuretum*—z. Iodide of, see *Iodine*—z. *Oxide*, *de*, *Zinci oxydum*—z. Oxyd of, *Zinci oxydum*—z. *Sulfate de*, *Zinci sulphatum*—z. Sulphate of, *Zinci Sulphas*—z. Valerianate of, *Zinci Valerianas*.

**ZINCHUM**, *Zincum*.

**ZINCI ACETAS**, *Ac'etate of Zinc*, (F.) *Acétate de Zinc*. (*Plumbi acet. Bj*, *zinc. granul. ʒij*, *aqua destillat. Oijj*. Dissolve the acetate of lead in the water, and filter. Add the zinc to the solution, and agitate them occasionally together, in a stopped bottle, for five or six hours, or until the liquid yields no precipitate, with a solution of iodide of potassium. Filter the liquor, evaporate it with a moderate heat to one fifth, and set it aside to crystallize. Pour off the liquid, and dry the crystals on bibulous paper.

Should the crystals be coloured, dissolve them in distilled water, and having heated the solution, drop into it, while hot, a filtered solution of chlorinated lime, until it ceases to let fall sesquioxide of iron; filter the liquor, acidulat.

it with a few drops of acetic acid, evaporate, and crystallize.—*Ph. U. S.*)

Frequently used to form a gently astringent wash in ophthalmia and other local inflammations; and as an injection in gonorrhœa.

ZINCI CARBONAS IMPURUS, Calamina—z. Carbonas præparatus, Calamina præparata.

ZINCI CHLORIDUM, *Z. chloruratum*, *Zincum chloratum*, *Z. muriatum* (*oxydatum*), *Chloride* or *Chloruret* of Zinc, *Butter of Zinc*, (*F.*) *Chlorure de Zinc*. (*Zinc*. in frustulis, ʒijss, *acid. nitric.*, *creta præparat.* aa ʒj, *acid. muriat.* q. s. To the zinc, in a porcelain vessel, add gradually sufficient muriatic acid to dissolve it; strain, add the nitric acid, and evaporate to dryness. Dissolve the dry mass in water, add the chalk, allow the mixture to stand for 24 hours, filter, and again evaporate to dryness.—*Ph. U. S.*) It is very deliquescent in the air, forming the *Butter of Zinc*, *Butyrum Zinci*.

Chloride of Zinc is a powerful escharotic, and has been lately employed as an effective antiseptic.

ZINCI CHLORURETUM, *Z. chloridum*.

ZINCI CYANURETUM, *Hydrocyanas Zinci*, *Zincum Cyanogenatum*, *Z. Borussicum*, *Z. Zobicum*, *Hydrocyanate of Zinc*. This salt is formed by adding sulphate of zinc to hydrocyanate of potassa so long as any precipitate is thrown down. When dried and calcined at a low heat, the product is a mixture of cyanuret of zinc and of potassium. It has been recommended in nervous cardialgia. Dose, from one-sixteenth to one-twelfth of a grain.

It is chiefly used as a caustic; one part of the chloride being mixed with 4, 3 or 2 parts of flour, according to the desired strength, and a few drops of water being added to form a paste.

ZINCI FERROHYDROCYANAS, *Cyanuretum Ferrosinicum*, *Zincum Ferrohydrocyanicum*, *Ferrohydrocyanate of Zinc*. Made by the mutual decomposition of boiling hot solutions of sulphate of zinc and ferrocyanate of potassa. It has been recommended in the same cases as the last preparation.

ZINCI HYDROCYANAS, *Zinci cyanuretum*—z. Nix, *Zinci oxydum*.

ZINCI OXYDUM, *Zincum calcinatum*, *Oxyd of Zinc*, *Flowers of Zinc*, *Nihil album*, *Lana Philosophorum*, *L. philosophica*, *Nix zinci*, *Nihil grisæum*, *Pompholyx*, (*F.*) *Oxide de Zinc*. Procured by burning zinc in a long, deep, crucible, placed so as to collect the sublimate. Also, in the following manner:—*Zinci sulph.* lbj, *ammon. carbon.* ʒvjss, *aquæ. destillat. cong.* iij. Dissolve the sulphate of zinc and carbonate of ammonia separately in twelve pints of the distilled water; strain the solutions, and mix them. Wash the precipitate frequently with water, and expose it to a strong heat, so as to drive off the carbonic acid.—*Ph. U. S.* It is tonic and antispasmodic; externally, detergent and desiccative. Employed in epilepsy, chorea, &c. For its external use, see *Ung. Zinci*.

ZINCI OXYDUM IMPURUM, *Tutia*.

ZINCI SULPHAS, *Sulphate of Zinc*, *Zincum Vitriolatum*, *Vitriolum album*, *White Vitriol*, *V. Goularsien'se*, *V. Zinci*, *Sulphas Zinicum*, *Gilla Vitrioli*, *Gilla Theophrasti*, *Sal vomitorio vitrioli*, *Chalcanthum album*, *White Copperas*, *Sal Vitrioli*, (*F.*) *Sulfate de Zinc*. (*Zinc*. in frustul. ʒiv, *acid. sulphuric.* ʒvj, *aquæ destillat.* Oiv. To the zinc and water,

previously introduced into a glass vessel, add by degrees the sulphuric acid, and, when the effervescence shall have ceased, filter the solution through paper; then boil it down till a pellicle begins to form, and set aside to crystallize.—*Ph. U. S.*) The sulphate of zinc is inodorous; taste, styptic: it is in white, semi-transparent, efflorescent crystals; soluble in three parts of water at 60°. It is emetic, tonic, antispasmodic, and, externally, astringent. A nostrum, sold under the name—*Antiperustis*, and, as its title imports, given in whooping-cough, contains this salt as its chief ingredient. It is emetic. Dose, as an emetic, gr. x to ʒss; as a tonic, gr. j to ij. Used externally as a collyrium, gr. j to water f. ʒj.

ZINCI VALERIANAS, *Valerianate of Zinc*. A salt formed by saturating valerianic acid with freshly prepared carbonate of zinc. It is in pure white, pearly scales, and has been recommended as a tonic in neuralgic diseases, epilepsy, &c. The dose is one or two grains several times a day.

ZINCUM, *Zinc*—z. *Borussicum*, *Zinci cyanuretum*—z. *Calcinatum*, *Zinci oxydum*—z. *Chloratum*, *Zinci chloridum*—z. *Cyanogenatum*, *Zinci cyanuretum*—z. *Ferrohydrocyanicum*, *Zinci ferrohydrocyanas*—z. *Iodatum*, see *Iodine*—z. *Muriaticum*, *Zinci chloridum*—z. *Vitriolatum*, *Zinci sulphas*—z. *Zooticum*, *Zinci cyanuretum*.

ZINGIBER, *Amomum zingiber*—z. *Cassumuniar*, see *Cassumuniar*—z. *Germanicum*, *Arum maculatum*—z. *Officinale*, *Amomum zingiber*—z. *Zerumbet*, see *Cassumuniar*.

ZINGRITES, *Zigni'tes*. A stone, resembling glass; to which the ancients attributed marvelous properties.

ZINKUM, *Zincum*.

ZINT, *Zincum*.

ZINZIBER, *Amomum zingiber*.

ZIPHAC, *Peritonæum*.

ZIRBUS, *Epiploon*—z. *Adipinus*, *Epiploon*, *gastro-colic*.

ZIZANIA AQUATICA, *Wild Rice*; called by the Indians, *Monomene*, grows abundantly on the marshy margins of the northern lakes, and waters of the upper branches of the Mississippi. The grain resembles oats. It furnishes the northern savages, and the Canadian traders and hunters with their annual supplies of grain.

ZIZIPHUM, *Jujube*.

ZOAGRIA, from ζω, 'life,' and αἴμα, 'I catch up.' The saving and preservation of life. *Zobais*. A reward for preserving life; *Sostrium*. A votive offering hung up in the temples for life saved.

ZOANTHROPICIA, *Melanchol'iu zobnthropia*, from ζω, 'an animal,' and ἀνθρωπος, 'a man.' A species of monomania, in which the patient believes himself transformed into an animal. *Lycanthropia* and *cynanthropia* belong to this species of monomania.

ZOARA, *Insomnia*.

ZOE, *Life*.

ZOGRAPHIA, *Zoographia*.

ZOIATRIA, *Veterinary art*.

ZOIATRUS, *Hippiater*.

ZOMIDIUM, *Jus*.

ZOMOS, *Consommé*, *Jus*.

ZONA, *Herpes zoster*—z. *Castitatis*, *Hymen*—z. *Ciliaris*, *Ciliary zone*—z. *Ignea*, *Herpes zoster*.

**ZONA PELLUCIDA**, *Oolemma pellucidum*. The membrane that surrounds the yolk in the mammalia is so called on account of its thickness, and peculiar transparency.

**ZONA SERPIGINOSA**, Herpes zoster—z. Virginitatis, Hymen.

**ZONA TENDINO'SA**. The whitish circle around the auriculo-ventricular orifice of the right side of the heart.

**ZONE**, Cingulum.

**ZONULA CILIARIS**, see Ciliary, and Ciliary zone—z. Hildani, Cingulum Hildani—z. Zinnii, see Ciliary.

**ZOÛCHEMIA**, Chymistry, animal.

**ZOÛCHEMICAL**, *Zoöchymical*, *Zoöchemicus* seu *Zoöchymicus*. Appertaining or having relation to animal chemistry.

**ZOÛCHEMY**, Chymistry, animal.

**ZOÛCHYMY**, Chymistry, animal.

**ZOÛGENIUM**, Azote.

**ZOÛG'ENY**, *Zoögen'ia*, *Zoögen'esis*, from ζῷον, 'animal,' and γενεσις, 'generation.' The doctrine of animal formation.

**ZOÛGRAPHY**, *Zoögra'phia*, *Zogra'phia*, from ζῷον, 'an animal,' and γραφή, 'a description.' A description of animals. The natural history of animals.

**ZOÛHEMATINE**, Hematine.

**ZOÛHYLAS**, from ζῷον, 'an animal,' and ὑλη, 'matter.' Animal matter.

**ZOÛHYLICA CONCREMENTA**. Concretions formed of animal matter.

**ZOÛIASIS**, Veterinary art.

**ZOÛLOGIST**, *Zoölogis'ta*, *Zoölogus*, from ζῷον, 'an animal,' and λογος, 'description.' One skilled in the natural history of animals.

**ZOÛLOGY**, *Zoölog'ia*. Same etymon. The natural history of animals.

**ZOÛMAGNETISMUS**, Magnetism, animal.

**ZOÛMYCUS**, Mucus.

**ZOÛMYXA**, Mucus.

**ZOÛN**, Animal.

**ZOÛNOM'IA**, *Organozoönom'ia*, from ζῷον, 'an animal,' and νομος, 'law.' The laws which govern the organic actions of animals in general.—*Animal Physiolog'ogy*, *Zoöphysiolog'ia*.

**ZOÛNOSOLOG'IA**, from ζῷον, 'an animal,' νοσος, 'a disease,' and λογος, 'description.' The nosology of animals.

**ZOÛPATHOLOG'IA**, from ζῷον, 'an animal,' παθος, 'a disease,' and λογος, 'a description.' The pathology of animals.

**ZOÛPHTHALMUS**, Hydrophthalmia.

**ZOÛPHYSIOLOG'IA**, Physiology, animal, Zoonomia.

**ZOÛPHYTE**, *Zoöph'ytum*, *Phytozoön*, *Animal plant*, from ζῷον, 'an animal,' and φυτον, 'a plant.' A name given to the lowest class of animals, which seem to form the transition between the animal and the vegetable kingdoms.

**ZOÛSIS**, Animation, Zoagria.

**ZOÛSPERMATA**, Spermatozoa.

**ZOÛSPERMES**, Spermatozoa.

**ZOÛT'OMY**, *Zoötom'ia*, from ζῷον, 'an animal,' and τέμνω, 'I cut.' *Theriot'omy*, *Anatom'ia animalis seu comparati'ua seu comparati'ua*, *Compar'ative Anatomy*. The anatomy of animals. Animal anatomy.

**ZOPISSA**, see *Pinus sylvestris*.

**ZOPYRON**, Fomites.

**ZOSTER**, Herpes zoster.

**ZOSTERA MARINA**, *Pila marina*.

**ZOZAR**, Saccharum.

**ZUCARO**, Saccharum.

**ZUCCARUM**, Saccharum.

**ZUCHAR**, Saccharum.

**ZUCHARUM**, Saccharum.

**ZUCHRA**, Saccharum.

**ZULAPIUM**, Julep.

**ZYGOMA**, Malar os.

**ZYGOMATIC**, *Zygomat'icus*, *Jugalis*, *Jugal*. That which relates to the *zygoma* or cheek bone.

**ZYGOMATIC ARCH**, see Zygomatic process—z. Bone, Malar os.

**ZYGOMATIC FOSSA** is the space included between the posterior margin of the outer ala of the pterygoid process, and the crista which descends from the malar tuberosity to the superior alveolar margin.

**ZYGOMATIC MUSCLES** are two in number. 1. *Zygomat'icus major*, *Distort'or Oris*, (F.) *Zygomato-labial* (Ch.), *Muscle grand zygomatique*, which is situate obliquely at the fore part and sides of the face. It is a small, rounded muscle; arises from the outer surface of the os malar, and is inserted at the commissure of the lips, which it raises and draws outwards. It acts principally in laughing. 2. *Zygomat'icus minor*, (F.) *Petit Zygomato-labial*, (Ch.) *Petit Zygomatique*, does not always exist. It is situate on the inner side of the last; arises from the outer surface of the os malar, and is inserted at the corner of the mouth, or rather into the upper lip, which it raises and draws outwards.

**ZYGOMATIC PROCESS**, *Processus zygomat'icus Apoph'ysis Zygomat'ica*, *Malar process*, *Jug' process*, arises from the outer surface of the temporal bone by two roots, one of which is transverse, (*Condyle du temporal*, Ch.) and the other longitudinal: between them is the pinnoid cavity. The process passes forwards, and is articulated with the posterior angle of the os malar, with which it forms a bony bridge, called the *Zygomat'ic arch*, *Pars zygomat'ica*, *Arca zygomat'ica*, (F.) *Arcade Zygomat'ique*. The cavity, beneath this bridge, is sometimes called *Zygo'ma*.

**ZYGOMATIC SUTURE** is placed between the zygomatic parts of the temporal and cheek bones; and slants obliquely downwards and backwards.

**ZYGOMATICQUE GRAND**, *Zygomat'ic major*—z. *Petit*, *Zygomat'icus minor*.

**ZYGOMATO-LABIAL**, *Zygomat'icus major*—z. *Labial*, *petit*, *Zygomat'icus major*—z. *Maxillaire*, *Masseter*—z. *Oriculaire*, *Anterior auris*.

**ZYGOPHYLLUM FAGABO**, (F.) *Fabagelle*. A Syrian and Mauritanic plant, possessed of an acrid and bitter taste. It has vermifuge properties. The Arabs believe that the recently expressed juice of *Zygo'phyllum simplex* is capable of removing specks from the cornea.

**ZYMA**, Ferment.

**ZYMONA**, Ferment.

**ZYMOSIS**, Fermentation, see *Zymotic*.

**ZYMOT'IC**, *Zymot'icus*, from ζυμο, 'to ferment.' An epithet proposed for any epidemic, endemic, or contagious affection. *Zymosis* is used by him to signify such an affection.

**ZYTHOGALA**, Posset.

**ZYTHUM**, Cerevisia.

**ZYTHUS**, Cerevisia.

CATALOGUE  
OF  
MEDICAL, SURGICAL  
AND  
MISCELLANEOUS BOOKS,  
PUBLISHED  
BY  
LEA AND BLANCHARD,  
PHILADELPHIA:  
AND SOLD BY ALL BOOKSELLERS.

---

## TO THE MEDICAL PROFESSION.

The following list embraces works on Medical and other Sciences issued by the subscribers. They are to be met with at all the principal bookstores throughout the Union, and will be found as low in price as is consistent with the correctness of their printing, beauty of execution, illustration, and durability of binding. No prices are here mentioned, there being no fixed standard, as it is evident that books cannot be retailed at the same rate in New Orleans or Chicago as in Philadelphia. Any information, however, relative to size, cost, &c., can be had on application, free of postage, to the subscribers, or to any of the medical booksellers throughout the country.

LEA & BLANCHARD, Philadelphia.

### DICTIONARIES AND JOURNALS.

American Journal of the Medical Sciences, quarterly, at \$5 a year.  
 Cyclopaedia of Practical Medicine, by Forbes, Tweedie, &c., edited by Dunglison, in 4 super royal volumes, 3154 double columned pages.  
 Dunglison's Medical Dictionary, 6th ed., 1 vol. imp. 8vo., 804 large pages, double columns.  
 Hoblyn's Dictionary of Medical Terms, by Hays, 1 vol. large 12mo., 402 pages, double columns.  
 Medical News and Library, monthly at \$1 a year.

### ANATOMY.

Anatomical Atlas, by Smith and Horner, large imp. 8vo., 650 figures.  
 Horner's Special Anatomy and Histology, 2nd edition, 2 vols. 8vo., many cuts, 1130 pages.  
 Horner's United States Dissector, 1 vol. large royal 12mo., many cuts, 444 pages.  
 Wilson's Human Anatomy, by Goddard, 4th edition (1848), 1 vol. 8vo., 258 wood-cuts, 580 pp.  
 Wilson's Dissector, or Practical and Surgical Anatomy, with cuts, 1 vol. imp. 8vo., 444 pages.

### PHYSIOLOGY.

Carpenter's Principles of Human Physiology, by Clymer, 1 vol. 8vo., 758 pp., 317 illustrations, 3d edition, much improved and enlarged.  
 Carpenter's Elements, or Manual of Physiology, 1 vol. 8vo., 566 pages, many cuts.  
 Connection between Physiology and Intellectual Science, 1 vol. 18mo., paper, price 25 cents.  
 Dunglison's Human Physiology, 5th edition, 2 vols. 8vo., 1350 pages, and 370 wood-cuts.  
 Harrison on the Nerves, 1 vol. 8vo., 292 pages.  
 Matteucci on the Physical Phenomena of Living Beings, 1 vol. 12mo., 388 pp., cut.  
 Müller's Physiology, by Bell, 1 vol. 8vo., 886 pp.  
 Roget's Outlines of Physiology, 8vo., 516 pages.  
 Solly on the Anatomy, Physiology and Pathology of the Brain, 1 vol. 8vo., 496 pp. and 118 cuts.  
 Todd and Bowman's Physiological Anatomy and Physiology of Man, with numerous wood-cuts. (Publishing in the Medical News.)

### PATHOLOGY.

Abercrombie on the Stomach, 1 vol. 8vo., 320 pp.  
 Abercrombie on the Brain, 1 vol. 8vo., 324 pp.  
 Alison's Outlines of Pathology, &c., 8vo., 420 pp.  
 Borselius on the Kidneys and Urine, 8vo., 180 pp.  
 Blakiston on the Diseases of the Chest, 1 vol., 352 pp.  
 Bennet on the Uterus, 1 vol. 12mo., 146 pages.  
 Blood and Urine Mixture; by Reese, Griffith and Markwell, 1 vol. 12mo., 463 pages, 6 plates, a new work, 1848.  
 Budd on the Liver, 1 vol. 8vo., 392 pages, plates and wood-cuts.  
 Burrows on Cerebral Circulation, 1 vol. 8vo., 216 pages, with 6 colored plates.  
 Billing's Principles, 1 vol. 8vo., 304 pages.  
 Bird on Urinary Deposits, 8vo., 228 pages, cuts.  
 Hase's Pathological Anatomy, 8vo., 379 pages.  
 Hope on the Heart, by Pennoek, a new edition, with plates, 1 vol. 8vo., 572 pages.  
 Hughes on the Lungs and Heart, 1 vol. 12mo., 270 pages, with a plate.  
 Lallemand on Spermatorrhœa; 1 vol. 8vo., 320 pp.  
 Philip on Protracted Indigestion, 8vo., 240 pp.  
 Phillips on Scrofula, 1 vol. 8vo., 350 pages.  
 Prout on the Stomach and Renal Diseases, 1 vol. 8vo., 466 pages, colored plates.  
 Ricord on Venereal, new ed., 1 vol. 8vo., 256 pp.  
 Vogel's Pathological Anatomy of the Human Body, 1 vol. 8vo., 536 pages, col. plates.

Walshe on the Lungs, 1 vol. 12mo., 310 pages.  
 Wilson on the Skin, 1 vol. 8vo., new ed., 440 pp. Same work, with colored plates.  
 Whitehead on Sterility and Abortion, 1 vol. 8vo., 368 pages.  
 Williams' Pathology, or Principles of Medicine, by Clymer, a much improved edition, 1848, 440 pages, 1 vol. 8vo.  
 Williams on the Respiratory Organs, by Clymer, 1 vol. 8vo., 500 pages.

### PRACTICE OF MEDICINE.

Ashwell on the Diseases of Females, 2d edition, 1848, 1 vol. 8vo., 520 pages.  
 Bright on Fevers, new edition, much enlarged, a complete work on the Fevers of the U. S. Now ready. 650 pages.  
 Benedict's Compendium of Chapman's Lectures, 1 vol. 8vo., 258 pages.  
 Chapman on Thoracic and Abdominal Viscera, &c., 1 vol. 8vo., 384 pages.  
 Chapman on Fevers, Gout, Dropsy, &c. &c., 1 vol. 8vo., 400 pages.  
 Colquhoun de L'Espe on Females, translated and edited by Meigs, 1 vol. 8vo., 720 pages, cuts.  
 Condie on the Diseases of Children, 2d edition, 1 vol. 8vo., 668 pages.  
 Churchill on the Diseases of Females, by Huston, 4th edition, 1 vol. 8vo., 604 pages.  
 Clymer and others on Fevers, a complete work in 8 vols. 8vo., 1600 pages.  
 Dewees on Children, 9th ed., 1 vol. 8vo., 426 pp.  
 Dewees on Females, 9th edition, 1 vol. 8vo., 532 pages, with plates.  
 Dunglison's Practice of Medicine, 3d edition, (1848), 2 vols. 8vo., 1500 pages.  
 Esquirol on Insanity, by Hunt, 8vo., 496 pages.  
 Meigs' Letters on Diseases of Females, 1 vol. 8vo., 870 pages. A new work, 1848.  
 Meigs on Certain Diseases of Infancy, 1 vol. 8vo. A new work, 1848.  
 Thompson on the Sick Room, &c., 1 vol. large 12mo., 360 pages, cuts.  
 Watson's Principles and Practice of Phycic, 3d edition by Condie, 1 vol. 8vo., 1060 large pages.  
 West's Lectures on the Diseases of Infancy and Childhood. (Publishing in the Medical News and Library.)

### SURGERY.

Brodie on Urinary Organs, 1 vol. 8vo., 214 pages.  
 Brodie on the Joints, 1 vol. 8vo., 216 pages.  
 Brodie's Lectures on Surgery, 1 vol. 8vo., 350 pp.  
 Brodie's Select Surgical Works, 780 pp. 1 vol. 8vo.

 Sargent's Minor Surgery, 1 vol. royal 12mo., 380 pages, 128 cuts. A new work, 1848.

### MATERIA MEDICA AND THERAPEUTICS.

Christison's New Dispensary, edited by Griffith, with additions from Gray's Supplement to the Pharmacopœia, and other sources, 1 large vol. 8vo., 216 cuts, over 1000 pages.  
 Dunglison's Materia Medica and Therapeutics, a new ed., with cuts, 2 vols. 8vo., 986 pages.  
 Dunglison on New Remedies, 5th ed., 1 vol. 8vo., 638 pages.  
 Ellis' Medical Formulary, 8th ed., much improved, 1 vol. 8vo., 272 pages.  
 Griffith's Medical Botany, a new work, 1 large vol. 8vo., 704 pp., with over 350 illustrations.  
 Mayne's Dispensary and Formulary, by Griffith, 1 vol. 12mo., 330 pages. A new work.  
 Pereira's Materia Medica and Therapeutics, by Carson, 2d edition, 2 vols. 8vo., 1580 very large pages, nearly 300 woodcuts.  
 Royle's Materia Medica and Therapeutics, by Carson, 1 vol. 8vo., 689 pages, many cuts.

### OBSTETRICS.

Churchill's Theory and Practice of Midwifery, by Huxton, 3d ed., 1 vol. 8vo., 526 pp., many cuts.  
 Dewees' System of Midwifery, 11th ed., 1 vol. 8vo., 660 pages, with plates.  
 Ramsbotham on Parturition, with many plates, 1 large vol. Imperial 8vo., new and improved edition, 520 pages.

### CHEMISTRY AND HYGIENE.

Brigham on Excitement, &c., 1 vol. 18mo., 204 pp.  
 Dunglison on Human Health, 2d ed., 8vo., 454 pp.  
 Fowne's Elementary Chemistry for Students, 2d ed., 1 vol. royal 12mo., 400 pages, many cuts.  
 Gardner's Manual of Medical Chemistry, 4 vols. 12mo., cuts. A new work, 1848; 400 pp.  
 Griffith's Chemistry of the Four Seasons, 1 vol. royal 12mo., 451 pages, many cuts.  
 Knapp's Chemical Technology, by Johnson, Vol. I., 8vo., 504 pp., 214 large cuts.  
 Practical Organic Chemistry, 18mo., paper, 25 cts.  
 Simon's Chemistry of Man, 8vo., 750 pp., plates.  
 Neill and Smith's Analytical Compend of Practical Medicine, Surgery, Anatomy, Midwifery, Diseases of Women and Children, Materia Medica and Therapeutics, Physiology, Chemistry and Pharmacy, with numerous illustrations, 1 vol. 12mo., 900 pages.

### MEDICAL JURISPRUDENCE, EDUCATION, &c.

Bartlett's Philosophy of Medicine, 1 vol. 8vo., 312 pages.  
 Dunglison's Medical Student, 2d ed., 12mo., 342 pp.  
 Man's Power over himself to Prevent or Control Insanity, 18mo., paper, price 25 cents.  
 Taylor's Medical Jurisprudence, by Griffith, 1 vol. 8vo., 540 pages.  
 Taylor on Poisons, by Griffith, 1 vol. 8vo., 688 pp.  
 Traill's Medical Jurisprudence, 1 vol. 8vo., 234 pp.

### NATURAL SCIENCE, &c.

Arnott's Elements of Physics, new edition, 1 vol. 8vo., 484 pages, many cuts.  
 Ansted's Ancient World, Popular Geology, in 1 12mo. volume, with numerous cuts, 388 pages.  
 Bird's Natural Philosophy, 1 vol. royal 12mo., 402 pages and 372 woodcuts.  
 Brewster's Optics, 1 vol. 12mo. 423 pp. many cuts.  
 Babbage's "Fragment," 1 vol. 8vo., 250 pages.  
 Beckland's Geology and Mineralogy, 2 vols. 8vo., with numerous plates and maps.  
 Bridgewater Treatises, with many plates, cuts, maps, &c., 7 vols. 8vo., 3287 pages.  
 Carpenter's Popular Vegetable Physiology, 1 vol. royal 12mo., many cuts.  
 Dana on Corals, being vol. 8 of Ex. Expedition, royal 4to., extra cloth.  
 Hale's Ethnography and Philology of the U. S. Exploring Expedition, in 1 large imp. 4to. vol.  
 Herschel's Treatise on Astronomy, 1 vol. 12mo., 417 pages, numerous plates and cuts.  
 Introduction to Vegetable Physiology, founded on De Candolle, Lindley, &c., 18mo., paper, 25 cts.  
 Kirby on Animals, plates, 1 vol. 8vo., 520 pages.  
 Kirby and Spence's Entomology, from 6th London ed., 1 vol. 8vo., 600 large pages; plates, plain or colored.  
 Müller's Physics and Meteorology, 1 vol. 8vo., 636 pp., with 540 woodcuts and 2 cold plates.  
 Philosophy in Sport made Science in Earnest, 1 vol. royal 18mo., 420 pages, many cuts.  
 Roget's Animal and Vegetable Physiology, with 400 cuts, 2 vols. 8vo., 872 pages.  
 Small Books on Great Subjects, 12 parts, done up in 5 handsome 12mo. volumes, extra cloth.  
 Somerville's Physical Geography, 12mo., cloth.  
 Weisbach's Mechanics applied to Machinery and Engineering, Vol. I., 8vo., 460 pp. 550 woodcuts.

### VETERINARY MEDICINE.

Clater and Skinner's Farrier, 1 vol. 12mo., 220 pp.  
 Youatt's Great Works on the Horse, by Skinner, 1 vol. 8vo., 448 pages, many cuts.  
 Youatt and Clater's Cattle Doctor, 1 vol. 12mo., 282 pages, cuts.  
 Youatt on the Dog, by Lewis, 1 vol. demy 8vo., 403 pages, beautiful plates.  
 Youatt on the Pig, a new work with beautiful illustrations of all the different varieties, 12mo.

### NEW MEDICAL AND SCIENTIFIC BOOKS.

LEA & BLANCHARD have in Preparation for early Publication,

A New Work on the Diseases and Surgery of the Ear, illustrated.  
 Sharpey and Quinn's Elements of Anatomy, edited by Joseph Leidy, M. D. In two handsome octavo volumes, with many woodcuts.—Malgaigne's Operative Surgery, by Britain, in 1 vol. with cuts.  
 Mohr and Redwood's Practical Pharmacy, with many illustrations, revised by W. Procter, Lecturer in the Philadelphia College of Pharmacy.—Griffith's Universal Formulary, 1 vol. 8vo.  
 Meigs' New Work on Midwifery, with numerous woodcuts, 1 vol. 8vo.  
 Churchill on the Management and more important Diseases of Infancy and Childhood, 1 vol. 8vo.  
 Stillé's Elements of General Therapeutics, 1 vol. 8vo.—Brandé's Chemistry, 2 large vols. 8vo.  
 Tomes' Lectures on Dental Physiology and Surgery, with illustrations.  
 Carpenter's Comparative Anatomy and Physiology, revised by the author, with beautiful woodcuts.  
 West's Lectures on the Diseases of Infancy and Childhood. A New Work on Popular Medicine, 1 vol. 8vo.  
 A Cyclopædia of Anatomy and Physiology, based on the large work of Todd, 1 vol. 8vo. illustrated.  
 Todd and Bowman's Physiological Anatomy and Physiology of Man. To be complete in 1 vol. 8vo. with many cuts.—De la Beche's New Work on Geology, with numerous woodcuts.  
 Knapp's Technology, or Chemistry Applied to the Arts and to Manufactures, edited by Johnson, Vol. II., 8vo., with many hundred illustrations.—Barlow on Medicine, 1 vol. 8vo.  
 Weisbach's Mechanics Applied to Machinery and Engineering, edited by Johnson. Vol. II., with 500 illustrations.—Dufon on Deafness, 1 vol. 12mo.  
 Graham's Elements of Chemistry, edited by Bridges, 2d ed., 1 vol. 8vo., with several hundred illustrations.  
 With various other important Works.

PROFESSOR MEIGS' NEW WORK.—Now Ready.

# FEMALES AND THEIR DISEASES; A SERIES OF LETTERS TO HIS CLASS.

BY C. D. MEIGS, M. D.,

Professor of Midwifery and the Diseases of Women and Children in the Jefferson Medical College, Philadelphia, &amp;c. &amp;c.

*In one large and beautifully printed octavo volume of six hundred and seventy pages.*

We think that Dr. M. has done to his class, and to the profession generally, a service for which they will be grateful, and for which he merits the approbation of all. He has endeavored to perform his task, he tells us, in a spirit of "freedom and abandon," very different from the dullness which has hitherto characterized medical writings; and we think he has succeeded in producing a very agreeable, amusing, clever and instructive book, which will be read with pleasure, and be likely to be impressive.—*N. Y. Assaist.*

He has evidently seen almost every form and variety of female disease, and not only seen, but observed and reflected, and if we may judge by the facts and evidence afforded by the volume itself, practiced successfully. His volume contains many practical hints and suggestions which will repay perusal.—*The Charleston Medical Journal and Review.*

The work is written in a free, animated conversational style, and is replete with sound practical instruction.—*The Western Lancet.*

We warmly commend the work of Professor Meigs as a highly interesting and instructive volume.—*N. Y. Journal of Medicine.*

The remaining affections of the womb, included in the volumes before us, are treated of very learnedly, and much valuable instruction is communicated concerning them. Dr. Meigs' views as to the nature and causes of these affections are generally correct, while his long and extensive experience gives to his practical directions no trifling weight. The work contains a very large fund of valuable matter, and will, in all probability, become a very popular one.—*American Medical Journal, Jan. 1848.*

His great reputation, the change in the book from the usual manner of writing, and the intrinsic merits with which the work abounds, will give it a wide-spread circulation, and a very general perusal.—*Northern and Western Medical and Surgical Journal.*

The style is certainly not faultless, but yet it is one which, we venture to believe, will prove acceptable to most of the readers to whom it is especially addressed. It is fresh, buoyant, varied and sprightly, and one is carried along by it without weariness.

"As to the doctrine and the precept of these letters," we think with the author, that "he had a right, at his time of life, to be heard upon them," and we are quite sure that he will be heard with great advantage. Whatever difference of opinion there may be respecting the manner of the letters, there can be no diversity as to the matter. They are full of instruction. It would be difficult to point to a volume containing more valuable information relative to females and their diseases.

We take leave of these Letters with the conviction that they will be productive of great good. They will be read with attention by many who would not have patience to wade through an elaborate, systematic treatise on diseases of females, and there is something in the dashing, random style which serves to impress their sentiments upon the memory. We do not undertake to say that the style is the best; it would probably be hazardous to assert that it is even a proper one for such a subject; but we must say, that it has contributed its share towards the pleasure with which we have read this volume.—*The Western Journal of Medicine and Surgery.*

MEIGS ON CHILDREN—Nearly Ready.

## ON CERTAIN DISEASES OF INFANTS.

BY C. D. MEIGS, M. D.

*In One Octavo Volume.*

New Edition—Revised for this Country, 1848.

## THEORY AND PRACTICE OF MIDWIFERY.

BY FLEETWOOD CHURCHILL, M. D.,

Hon. Fellow of the Royal College of Physicians of Ireland, &amp;c. &amp;c.

WITH NOTES AND ADDITIONS

BY ROBERT M. HUSTON, M. D., &amp;c.

*Third American Edition, Revised and Improved by the Author.*

WITH ONE HUNDRED AND TWENTY-EIGHT ILLUSTRATIONS.

*In one very handsome octavo volume.*

*Preface to the Third American Edition by the Author.*—I have been requested by the American publishers to revise this edition of my book, and to make such additions as the progress of science may have rendered necessary.

This I have done so far as time permitted; and though I confess that this work is far from being as complete as I could wish, yet I see no reason to modify or change the principles therein inculcated. An extended experience will of course, in all such cases, involve the insertion of new matter; and, owing to the industry of my friend Dr. Huston, I feel satisfied that few facts of importance have been omitted.

I owe a large debt of gratitude to my American friends, which I gladly take this opportunity of acknowledging, and also to the profession in America for the flattering reception they have given to my volumes. No reward could be more highly valued by me, nor could anything make me more anxious, by labor and study, to make my works as perfect as possible, than the knowledge that their usefulness may extend to another hemisphere.—Dublin, November, 1847.

As we have formerly called the attention of our readers to the extraordinary merits of this work, we need only add, that it continues to occupy the foremost rank among publications connected with the obstetric art. The author has added also to its utility by pointing up all the new facts and observations which have transpired since the appearance of the last edition.—*N. Y. Journal of Medicine.*

A NEW AND CHEAP ILLUSTRATED DISPENSATORY,  
BY CHRISTISON & GRIFFITH—Now Ready.

**A DISPENSATORY,**

OR

**COMMENTARY ON THE PHARMACOPŒIAS OF GREAT BRITAIN  
(AND THE UNITED STATES).**

COMPRISING

THE NATURAL HISTORY, DESCRIPTION, CHEMISTRY, PHARMACY, ACTIONS, USES AND  
DOSES OF THE ARTICLES OF THE MATERIA MEDICA.

BY ROBERT CHRISTISON, M. D., V. P. R. S. E., &c.

First American, from the Second Edinburgh Edition.

WITH NUMEROUS ADDITIONS, BY R. E. GRIFFITH, M. D.,

AUTHOR OF "MEDICAL BOTANY," &c.

*In One large Octavo Volume of over 1000 pages, with Two Hundred and Sixteen Wood-cuts.*

The profession are already so well supplied with a Dispensatory in the work of Professors Wood and Bacha that in presenting a new claimant to attention, the publishers feel that it should possess some additional attractions. Dr. Christison's work is well known for its clearness, conciseness, and completeness, and for the care with which the author has embodied all the new articles of the Materia Medica. It contains an immense amount of matter in the space of a single volume, furnished at a very low price, and is the only Dispensatory now before the profession which presents illustrations of the principal articles described. The additions of the editor are numerous and important. All the processes of the U. S. Pharmacopœia have been introduced, as well as a full medical, pharmaceutical and botanical history of all articles recognized by our national standard which had been omitted by the author. In addition to this, the editor has made free use of all European and American authorities on Materia Medica, among which may more particularly be mentioned Redwood's Second Edition of Gray's Supplement to the Pharmacopœia, just issued, which has supplied him with much useful information, and from which he has endeavored to convey all that appeared to him to possess especial interest—among other things, some very extended and useful tables, and accounts of various new remedial agents not as yet mentioned in the Pharmacopœias of Great Britain or of this country. In addition to this, over two hundred wood-cuts have been introduced, illustrative of articles of the Materia Medica, while, notwithstanding the immense amount of matter contained in this large volume, and its neat execution, its price has been put so low as to place it within the reach of all to whom it may prove useful.

**GRIFFITH'S UNIVERSAL FORMULARY—Nearly Ready.**

**THE UNIVERSAL FORMULARY:**

**A SYNOPSIS OF THE PHARMACOPŒIAS, DISPENSATORIES AND  
FORMULARIES OF EUROPE AND AMERICA.**

**WITH NUMEROUS MAGISTERIAL FORMULAS FROM VARIOUS SOURCES.**

BY R. E. GRIFFITH, M. D., &c. &c.,

Author of "Medical Botany," &c. &c.

*In One Octavo Volume.*

This work is intended to embrace all that is of practical importance in the numerous Pharmacopœias, Formularies and Dispensatories of Europe and of this country, as well as such formulas as appeared deserving of notice in the Medical Journals, Treatises of Medicine, &c. &c., together with many others, derived from private sources, which have never been hitherto published. It will therefore include all that is really useful in Redwood's Edition of Gray's Supplement to the Pharmacopœias, in Jourdan's Pharmacopœie, and the several works of Ellis, Fee, Paris, Thomson, Beasley, Cotterecq, Cooley, Bouchardat, &c. As, in accordance with its title of a Universal Formulary, it will not be confined solely to medical formulas, the publishers hope that the numerous scientific receipts embraced, will render it of much practical importance to the CHEMIST and MANUFACTURER. It will contain

**UPWARDS OF SIX THOUSAND FORMULAS,**

alphabetically arranged, with copious indexes, pointing out the diseases in which the preparations are to be used, &c. &c., and thus combining the advantages of all the different modes of arrangement and reference.

**NEW AND COMPLETE MEDICAL BOTANY—Lately Published.**

**MEDICAL BOTANY;**

**OR, A DESCRIPTION OF ALL THE MORE IMPORTANT PLANTS USED IN MEDICINE, AND  
OF THEIR PROPERTIES, USES AND MODES OF ADMINISTRATION.**

BY R. EGLESFELD GRIFFITH, M. D., &c. &c.

*In One large Octavo Volume, handsomely printed, with nearly Three Hundred and Fifty Illustrations on Wood.*

The author of the volume is well known to be particularly qualified for this undertaking, by his botanical, as well as medical and pharmaceutical knowledge; and it strikes us, on cursory examination, that it has been prepared with much care and faithfulness, and that it will take its place at once as the standard work on the subject in this country. A succinct introductory chapter is devoted to the anatomy and structure of plants, their classical composition and products, and the outlines of classification. The official plants are introduced under their several natural orders, which, with the general systematic arrangement of De Candolle, are thrown into groups after the manner of Dr. Lindley. The plants which are really important in the Materia Medica are described in full, as well as the official part or production; the others are more briefly noticed; and the references, which are faithfully made, both to the botanical and medical authorities, will serve in all cases to direct the inquirer to the original sources of information.—*Sikhian's Journal.*

Now Complete—THE GREAT SURGICAL LIBRARY.

# A SYSTEM OF SURGERY.

BY J. M. CHELIUS,

Doctor in Medicine and Surgery, Public Professor of General and Ophthalmic Surgery, &c. &c. in the University of Heidelberg.

TRANSLATED FROM THE GERMAN,  
AND ACCOMPANIED WITH ADDITIONAL NOTES AND OBSERVATIONS,

BY JOHN F. SOUTH,  
Surgeon to St. Thomas' Hospital.

EDITED, WITH REFERENCE TO AMERICAN AUTHORITIES,  
BY GEORGE W. NORRIS, M. D.

*Now complete, in three large 8vo. volumes of nearly twenty-two hundred pages, or in 17 numbers, at 60 cents.*  
This work has been delayed beyond the time originally promised for its completion, by the very extensive additions of the translator, and by the size of the very complete Index, extending to over 170 large pages in double columns. In answer to numerous inquiries, the publishers now have the pleasure to present it in a perfect state to the profession, forming three unusually large volumes, bound in the best manner, and sold at a very low price.

The most learned and complete systematic treatise now extant.—*Edinburgh Medical Journal.*  
No work in the English language comprises so large an amount of information relative to operative medicine and surgical pathology.—*Medical Gazette.*

We have, indeed, seen no work which so nearly comes up to our idea of what such a production should be, both as a practical guide and as a work of reference, as this; and the fact that it has passed through six editions in Germany, and been translated into seven languages, is sufficiently convincing proof of its value. It is methodical and concise, clear and accurate; omitting all minor details and fruitless speculations, it gives us all the information we want in the shortest and simplest form.—*The New York Journal of Medicine.*

ENCYCLOPÆDIA OF MATERIA MEDICA.—Amplly Illustrated.

## THE ELEMENTS OF MATERIA MEDICA AND THERAPEUTICS.

COMPREHENDING

THE NATURAL HISTORY, PREPARATION, PROPERTIES, COMPOSITION, EFFECTS AND USES OF MEDICINES.

BY JONATHAN PEREIRA, M. D., F. R. S. AND L. S.,

Member of the Society of Pharmacy of Paris; Examiner in Materia Medica and Pharmacy of the University of London; Lecturer on Materia Medica at the London Hospital, &c. &c.

*Second American, from the last London Edition, enlarged and improved.*

WITH NOTES AND ADDITIONS BY JOSEPH CARSON, M. D.

*In two volumes octavo, containing Fifteen Hundred very large pages, illustrated by Two Hundred and Seventy-five Wood-cuts.*

Notwithstanding the large size of this work, and the immense quantity of matter contained in its closely printed pages, it is offered at a price so low as to place it within the reach of all.

This encyclopædia of Materia Medica, for such it may justly be entitled, gives the fullest and most ample exposition of materia medica and its associate branches of any work hitherto published in the English language. It abounds in research and erudition; its statements of facts are clear and methodically arranged, while its therapeutical explanations are philocephical, and in accordance with sound clinical experience. It is equally adapted as a text-book for students, or a work of reference for the advanced practitioner, and no one can consult its pages without profit. The editor has performed his task with much ability and judgment. In the first American edition he adopted the Pharmacopœia of the United States, and the formulæ set forth in that standard authority; in the present he has introduced an account of substances that have recently attracted attention by their therapeutic employment, together with the mode of forming the characterose and uses of new pharmacæutic preparations, and the details of more elaborate and particular chemical investigations, with respect to the nature of previously known and already described elementary principles; all the important indigenous medicines of the United States heretofore known are also described. The work, however, is too well known to need any further remark. We have no doubt it will have a circulation commensurate with its extraordinary merit.—*The New York Journal of Medicine.*

CONDIE ON CHILDREN.—New Edition, 1847.

## A PRACTICAL TREATISE ON THE DISEASES OF CHILDREN.

BY D. FRANCIS CONDIE, M. D.,

Fellow of the College of Physicians; Member of the American Philosophical Society, &c.

*Second Edition. In One large Octavo Volume.*

The publishers would particularly call the attention of the profession to an examination of this work, which has been extensively introduced as a text-book throughout the Union.

The best treatise on the diseases of children in the English language.—*Medical Examiner.*  
A far more complete exposition of its subject than any other treatise on the diseases of children in the English language.—*American Medical Journal.*

*From Professor Pugh, of the University of St. Louis.*  
"I consider it the best treatise on the diseases of children that we possess, and so much have been in the habit of recommending it as a text-book to my classes."

**HANDBOOKS FOR STUDENTS.***To be ready in time for the Fall Sessions.***AN ANALYTICAL COMPENDIUM  
OF ALL THE VARIOUS BRANCHES OF MEDICAL SCIENCE.**BY JOHN NEILL, M. D.,  
Demonstrator of Anatomy in the University of Pennsylvania,AND  
FRANCIS GURNEY SMITH, M. D.,

Lecturer on Physiology in the Philadelphia Association for Medical Instruction.

CONSISTING OF

ANATOMY,  
With about 160 Illustrations.  
PHYSIOLOGY,  
With about 50 Illustrations.  
SURGERY,  
With about 50 Illustrations.MIDWIFERY AND THE DISEASES OF FEMALES,  
With 40 Illustrations.  
MATERIA MEDICA AND THERAPEUTICS,  
With 30 Illustrations.  
CHEMISTRY AND PHARMACY,  
With 20 Illustrations.

AND THE PRACTICE OF MEDICINE.

*The whole forming One handsome Volume, large royal 12mo., of 900 pages, with about 350  
Wood Engravings.*

These handbooks, though forming a complete series, and bound in one volume, are paged separately, so that they may be done up in divisions, and in paper to be sent by mail, thus presenting in a small compass and at a price unprecedentedly low, convenient manuals for the student preparing for examination, or for the practitioner desirous to recall the elements of his science.

**MANUALS ON THE BLOOD AND URINE:**

CONSISTING OF

I. A PRACTICAL MANUAL, CONTAINING A DESCRIPTION OF THE GENERAL, CHEMICAL AND MICROSCOPICAL CHARACTERS OF THE BLOOD AND SECRETIONS OF THE HUMAN BODY,

AS WELL AS OF THEIR COMPOUNDS, INCLUDING BOTH THEIR HEALTHY AND DISEASED STATES: WITH THE BEST METHODS OF SEPARATING AND ESTIMATING THEIR INGREDIENTS. ALSO, A SUCCINCT ACCOUNT OF THE VARIOUS CONCRETIONS OCCASIONALLY FOUND IN THE BODY AND FORMING CALCULI.

BY JOHN WILLIAM GRIFFITH, M. D., F. L. S., &amp;c.

II. ON THE ANALYSIS OF THE BLOOD AND URINE IN HEALTH AND DISEASE, AND ON THE TREATMENT OF URINARY DISEASES.

BY G. OWEN REES, M. D., F. R. S., &amp;c. &amp;c.

III. A GUIDE TO THE EXAMINATION OF THE URINE IN HEALTH AND DISEASE, FOR THE USE OF STUDENTS.

BY ALFRED MARKWICK.

*The whole forming One large royal 12mo. Volume, of Four Hundred and Sixty Pages,  
With about one hundred figures on five plates.*

The three works embraced in the volume were published in London, separately, but the immediate connection of the subjects treated, and their increasing importance, have induced the American publishers to embody them in a volume suitable for reference and preservation.

Although addressed especially to students, it contains almost all the information upon these matters which the practitioner requires.—*Dublin Medical Press.*

The chemical processes recommended are simple, yet scientific; and the work will be very useful to the medical student for whom it is intended.—*Medical Times.*

The author must be admitted to have attained his object in presenting a convenient bedside companion.—*Dr. Ranking's Abstract.*

CHURCHILL ON FEMALES.—Edition of 1847.

**THE DISEASES OF FEMALES,  
INCLUDING THOSE OF PREGNANCY AND CHILD-BED.**BY FLEETWOOD CHURCHILL, M. D.,  
Author of "Theory and Practice of Midwifery," &c. &c.

FOURTH AMERICAN, FROM THE SECOND LONDON EDITION, WITH ILLUSTRATIONS.

EDITED, WITH NOTES,

BY ROBERT M. HUSTON, M. D., &amp;c. &amp;c.

*In One Volume, Octavo.*

The rapid sale of three editions of this valuable work stamps it so emphatically with the approbation of the profession of this country, that the publishers, in presenting a fourth, deem it merely necessary to observe, that every care has been taken, by the editor, to supply any deficiencies which may have existed in former impressions, and to bring the work fully up to the date of publication.

DISPENSATORY AND FORMULARY—Now Ready.

# A DISPENSATORY AND THERAPEUTICAL REMEMBRANCER, COMPRISING THE ENTIRE LISTS OF MATERIA MEDICA, WITH EVERY PRACTICAL FORMULA CONTAINED IN THE THREE BRITISH PHARMACOPŒIAS.

With Relative Tables subjoined, illustrating by upwards of 600 Examples,

THE EXTemporaneous FORMS AND COMBINATIONS SUITABLE FOR THE DIFFERENT MEDICINES.

BY JOHN MAYNE, M. D., L. R. C. S., EDIN., &amp;c. &amp;c.

Edited, with the addition of the Formulae of the U. S. Pharmacopœia,  
BY R. EGLESFELD GRIFFITH, M. D.,

Author of "Medical Botany," &amp;c.

In One Duodecimo Volume, of over three hundred large pages.

There is no work before the Profession, presenting in the same compass what the author and editor have attempted to embrace in this little volume—namely an *unabridged practical formulary* of the three British Pharmacopœias, and that of the United States; and this in addition to a full amount of collective information as to the uses of the different medicines, and other important points relating to remedial means and appliances.

The various advantages derivable from possession of a clear and *comparative view*—such as is herein submitted—of the official preparations directed by the high authorities referred to, are self-evident, and must be appreciated by the prescriber as well as the dispenser of medicines.

Another feature of originality, which it is expected will prove highly serviceable, is the introduction, wherever deemed requisite, of extemporaneous formulæ into the work. These are separated from the pharmacopœial or continuous text of each page in the form of foot-notes; and it need scarcely be explained, are intended to assist the practitioner's memory, by suggestions of forms and combinations most suitable for the medicinal substances to which they are annexed.

MY DEAR MAYNE:—I have looked over the proofs. Your little work will be exceedingly useful. I shall be very glad to see a copy of it, and to notice my name as you propose to place it. Believe me, &c. &c.

ROBERT LISTON.

CLIFFORD ST., NOV. 3, 1847.

The neat typography, convenient size, and low price of this volume; recommend it especially to physicians, apothecaries and students in want of a pocket manual.

SARGENT'S MINOR SURGERY—A New Work, 1848.

## ON BANDAGING, AND OTHER POINTS OF MINOR SURGERY.

BY F. W. SARGENT, M. D.

In one handsome volume, royal 12mo., with nearly 400 Pages, and 185 Woodcuts.

## CONTENTS.

PART I—Chapter 1, Instruments used in Dressing. Chapter 2, Surgical Dressings. Chapter 3, General Rules for Dressing. Chapter 4, On the use of Water (Irrigation, Douche, Bathing, Water and Vapor Baths), Fumigation, and Disinfecting Agents.

PART II—*Bandages and their Application.* Chapter 1, The Roller or Simple Bandage; Compound Bandages; M. Mayer's System of Bandaging. Chapter II, Regional Bandaging, (head and neck, trunk, upper extremity, lower extremity).

PART III—*Bandages and Apparatus for the Treatment of Fractures.* Chapter 1, General Considerations. Chapter 2, Fractures of the Bones of the Head and Trunk. Chapter 3, Fractures of the Bones of the Shoulder. Chapter 4, Fractures of the Humerus, Forearm, Wrist and Hand. Chapter 5, Fractures of the Bones of the Lower Extremity.

PART IV—*Mechanical means employed in the Treatment of Dislocations.* Chapter 1, Bones of the Head and Trunk. Chapter 2, Bones of the Upper Extremity. Chapter 3, Bones of the Lower Extremity. Chapter 4, Compound Dislocations.

PART V—*Minor Surgical Operations.* Chapter 1, Blood-letting, (General and Topical Bleeding.) Chapter 2, Modes of effecting Counter-irritation, (Rubefacients, Vesicants, Suppurative Counter-irritants.) Chapter 3, Modes of Arresting Hemorrhage. Chapter 4, Dressing of Wounds. Chapter 5, Introduction of the Catheter. Chap. 6, Administration of Injections; Means of Diminishing Pain during Operations. Appendix of Formulae.

LIBRARY OF OPHTHALMIC MEDICINE AND SURGERY—Brought up to 1847.

## A TREATISE ON THE DISEASES OF THE EYE.

BY W. LAWRENCE, F. R. S.,

Surgeon Extraordinary to the Queen; Surgeon to St. Bartholomew's Hospital, &amp;c. &amp;c.

A NEW EDITION,

With many Modifications and Additions, and the Introduction of nearly Two Hundred Illustrations.

BY ISAAC HAYS, M. D.,

Surgeon to WHIT'S Hospital; Physician to the Philadelphia Orphan Asylum, &amp;c. &amp;c.

In one very large octavo volume of near 800 pages, with 12 plates and numerous wood-cuts through the text. This is among the largest and most complete works on this interesting and difficult branch of Medical Science.

ATLAS OF "ANATOMY, for the Medical Student.

*Enter only this Name, to parts.*

## AN ANATOMICAL ATLAS ILLUSTRATIVE OF THE STRUCTURE OF THE HUMAN BODY.

BY HENRY H. SMITH, M.D.,

Fellow of the College of Physicians, &c.

UNDER THE SUPERVISION OF

WILLIAM E. HORNER, M.D.,

Professor of Anatomy in the University of Pennsylvania.

*In One large Volume, Imperial Octavo.*

This work consists of five parts, whose contents are as follows:

PART I. The Bones and Ligaments, with one hundred and thirty engravings.

PART II. The Muscular and Dermoid Systems, with ninety-one engravings.

PART III. The Organs of Digestion and Generation, with one hundred and ninety-one engravings.

PART IV. The Organs of Respiration and Circulation, with ninety-eight engravings.

PART V. The Nervous System and the Senses, with one hundred and twenty-six engravings.

Forming altogether a complete System of Anatomical Plates, of nearly SIX HUNDRED AND FIFTY FIGURES, executed in the best style of art; and making one large imperial octavo volume. Those who do not want it in parts can have the work bound in extra cloth or sheep at an extra cost.

HORNER'S ANATOMY, New Edition.

## SPECIAL ANATOMY AND HISTOLOGY.

BY WILLIAM E. HORNER, M.D.,

Professor of Anatomy in the University of Pennsylvania, &c. &c.

SEVENTH EDITION.

*With many improvements and additions. In two octavo volumes, with illustrations on wood.*

The name of Professor Horner is a sufficient voucher for the fidelity and accuracy of any work on anatomy; but if any further evidence could be required of the value of the present publication, it is afforded by the fact of its having reached a seventh edition. It is altogether unnecessary now to inquire into the particular merits of a work which has been so long before the profession, and is so well known as the present one, but in announcing a new edition, it is proper to state that it has undergone several modifications, and has been much extended, so as to place it on a level with the existing advanced state of anatomy. The histological portion has been remodelled and rewritten since the last edition; numerous wood-cuts have been introduced, and specific references are made throughout the work to the beautiful figures in the Anatomical Atlas, by Dr. H. H. Smith.—*The American Medical Journal for January 1867.*

HORNER'S DISSECTOR.

## THE UNITED STATES DISSECTOR;

BEING A NEW EDITION, WITH EXTENSIVE MODIFICATIONS, AND ALMOST REWRITTEN, OF  
"HORNER'S PRACTICAL ANATOMY."

*In One very neat Volume, royal 12mo., with many illustrations on Wood.*

Anything emanating from the pen of Professor Horner, on anatomical science, is sure to be at once clear and correct. For more than 20 years this valuable little work has been before the profession, and during that period, sustained the high reputation of its author as a great practical anatomist. It is at the same time concise and simple in its arrangement, beginning with the alphabet of the science, and gradually leading the student onward to the more ample part of the study. Every student who wishes to acquire a correct knowledge of Anatomy, should have a copy of this book spread before him on the dissecting table.—*The New Orleans Medical and Surgical Journal.*

Much Enlarged Edition—Now Ready.

## THE HISTORY, DIAGNOSIS AND TREATMENT

OF THE

## FEVERS OF THE UNITED STATES.

BY ELISHA BARTLETT, M.D.,

Professor of the Theory and Practice of Physic in the Medical Department of Transylvania University, &c.

*In One Octavo Volume of 650 Pages, beautifully printed and strongly bound.*

Decidedly the most valuable treatise on Fevers with which we are acquainted. As its title indicates, it contains the "History, Diagnosis and Treatment of the Fevers of the United States," comprehending Typhoid, Typhus, Periodical and Yellow Fevers. The work is remarkably systematic, and written in a clear, perspicuous and easy style. It is eminently calculated to be useful to the profession, and cannot fail to secure to its able author a European reputation, as well as to reflect credit upon the medical literature of our country.—*Southern Medical and Surgical Journal.*

LEA & BLANCHARD'S PUBLICATIONS.

**DUNGLISON'S PRACTICE OF MEDICINE,**

Enlarged and Improved Edition, Brought up to 1848.

**THE PRACTICE OF MEDICINE;**  
A TREATISE ON  
**SPECIAL PATHOLOGY AND THERAPEUTICS.**

THIRD EDITION.

By **ROBLEY DUNGLISON, M. D.,**

*Professor of the Institutes of Medicine in the Jefferson Medical College; Lecturer on Clinical Medicine, &c.*  
In Two Large Octavo Volumes of Fifteen Hundred Pages.

Professor Dunglison's work has rapidly passed to the third edition, and is now presented to the profession as probably the most complete work on the Practice of Medicine that has appeared in our country. It is especially characterized by extensive and laborious research, minute and accurate pathological, semeiological and therapeutical descriptions, together with that fullness of detail which is so important to the student.

The present edition has been considerably enlarged; indeed the indefatigable author seems to have explored all of the labyrinths of knowledge, from which important facts and opinions could be gleaned, for the instruction of his readers. We cheerfully commend the work to those who are not already familiar with its merits.

It is certainly the most complete treatise of which we have any knowledge. There is scarcely a disease which the student will not find noticed.—*Western Journal of Medicine and Surgery.*

One of the most elaborate treatises of the kind we have.—*Southern Medical and Surg. Journal.*

The work of Dr. Dunglison is too well known, to require at our hands, at the present time, an analysis of its contents, or any exposition of the manner in which the author has treated the several subjects embraced in it. The call for a third edition within five years from the appearance of the first, is, of itself, a sufficient evidence of the opinion formed of it by the medical profession of our country. That it is well adapted as a text-book for the use of the student, and at the same time as a book of reference for the practitioner, is very generally admitted; in both points of view, for accuracy and completeness, it will bear a very advantageous comparison with any of the numerous contemporary publications on the practice of medicine, that have appeared in this country or in Europe. The edition before us bears the evidence of the author's untiring industry, his familiarity with the various additions which are constantly being made to our pathological and therapeutical knowledge, and his impartiality in crediting the general sources from which his materials have been derived. Several pathological affections, omitted in the former editions, are inserted in the present, while every portion of the work has undergone a very thorough revision. It may with truth be said, that nothing of importance that has been recorded since the publication of the last edition, has escaped the attention of the author; the present edition may, therefore, be regarded as an adequate exponent of the existing condition of knowledge on the important departments of medicine of which it treats.—*The American Journal of the Medical Sciences*, Jan. 1848.

The Physician cannot get a better work of the kind than this, and when he masters its contents, he will have mastered all that such treatises can afford him.—*St. Louis Med. & Surg. Journal*, June 1848.

**DUNGLISON ON NEW REMEDIES.**

NEW EDITION.

**NEW REMÉDIES.**

By **ROBLEY DUNGLISON, M. D., &c. &c.**

*Fifth edition, with extensive additions. In one neat octavo volume.*

A work like this is obviously not suitable for either critical or analytical review. It is, so far as it goes, a dispensatory, in which an account is given of the chemical and physical properties of all the articles recently added to the Materia Medica and their preparations, with a notice of the diseases for which they are prescribed, the doses, mode of administration, &c.—*The Medical Examiner.*

**THE MEDICAL STUDENT, OR AIDS TO THE STUDY OF MEDICINE.**

A REVISED AND MODIFIED EDITION.

By **ROBLEY DUNGLISON, M. D.**

*In one neat 12mo. volume.*

**HUMAN HEALTH;**

Or, the Influence of Atmosphere and Locality, Change of Air and Climate, Seasons, Food, Clothing, Bathing and Mineral Springs, Exercise, Sleep, Corporal and Intellectual Pursuits, &c. &c. on Healthy Man: Constituting

**ELEMENTS OF HYGIÈNE.**

By **ROBLEY DUNGLISON, M. D.**

*A New Edition with many Modifications and Additions. In one Volume, 8vo.*

## THE GREAT MEDICAL LEXICON.

## A DICTIONARY

OF

## MEDICAL SCIENCE;

CONTAINING A CONCISE ACCOUNT OF THE VARIOUS SUBJECTS AND TERMS; WITH THE FRENCH AND OTHER SYNONYMS; NOTICES OF CLIMATES AND OF CELEBRATED MINERAL WATERS; FORMULÆ FOR VARIOUS OFFICIAL AND EMPIRICAL PREPARATIONS, &c.

BY ROBLEY DUNGLISON, M. D.,

PROFESSOR OF THE INSTITUTES OF MEDICINE IN THE JEFFERSON MEDICAL COLLEGE, PHILADELPHIA, ETC. ETC.

Sixth edition, revised and greatly enlarged. In one royal octavo volume of over 800 very large pages, double columns. Strongly bound in the best leather, raised bands.

The most complete medical dictionary in the English language.—*Western Lancet*.

This work, already so valuable, has been rendered much more so by the publication of the present edition. It has been carefully revised, and many new words introduced, which the gradual progress of science makes so necessary. We recommend it to the profession, and to the student who wishes to have at hand a lexicon where he can seek, without fear of disappointment, every term which has been introduced into the nomenclature of medicine and its various branches. The care which has been bestowed upon it by its author, in correcting the errors which must necessarily appear in the first issue of such a work, and the satisfactory manner in which the present edition has come forth from the press of the publishers, entitles it to much stronger claims on the part of the profession, than its predecessors.—*Southern Journal of Medicine and Pharmacy*.

We think that "the author's anxious wish to render the work a satisfactory and desirable—if not indispensable—Lexicon, in which the student may search without disappointment for every term that has been legitimated in the nomenclature of the science," has been fully accomplished. Such a work is much needed by all medical students and young physicians, and will doubtless continue in extensive demand. It is a lasting monument of the industry and literary attainments of the author, who has long occupied the highest rank among the medical teachers of America.—*The New Orleans Medical and Surgical Journal*.

The simple announcement of the fact that Dr. Dunglison's Dictionary has reached a sixth edition, is almost as high praise as can be bestowed upon it by an elaborate notice. It is one of those standard works that have been "weighed in the balance and (not) been found wanting." It has stood the test of experience, and the frequent calls for new editions, prove conclusively that it is held by the profession and by students in the highest estimation. The present edition is not a mere reprint of former ones; the author has for some time been laboriously engaged in revising and making such alterations and additions as are required by the rapid progress of our science, and the introduction of new terms into our vocabulary. In proof of this it is stated "that the present edition comprises nearly two thousand five hundred subjects and terms not contained in the last. Many of these had been introduced into medical terminology in consequence of the progress of the science, and others had escaped notice in previous revisions." We think that the earnest wish of the author has been accomplished; and that he has succeeded in rendering the work "a satisfactory and desirable—if not indispensable—Lexicon, in which the student may search, without disappointment, for every term that has been legitimated in the nomenclature of the science." This desideratum he has been enabled to attempt in successive editions, by reason of the work not being stereotyped; and the present edition certainly offers stronger claims to the attention of the practitioner and student, than any of its predecessors. The work is got up in the usual good taste of the publishers, and we recommend it in full confidence to all who have not yet supplied themselves with so indispensable an addition to their libraries.—*The New York Journal of Medicine*.

## A NEW EDITION OF DUNGLISON'S HUMAN PHYSIOLOGY.

## HUMAN PHYSIOLOGY.

WITH THREE HUNDRED AND SEVENTY ILLUSTRATIONS.

BY ROBLEY DUNGLISON, M. D.,

PROFESSOR OF THE INSTITUTES OF MEDICINE IN THE JEFFERSON MEDICAL COLLEGE, PHILADELPHIA, ETC. ETC.

Sixth edition, greatly improved.—In two large octavo volumes, containing nearly 1350 pages.

This work has been so long received throughout the Union as the leading text-book on Physiology, that in presenting this edition the publishers deem it necessary only to remark that they have endeavored to render the mechanical execution of the work in some degree worthy its acknowledged merits by an advance in both the number and beauty of the illustrations, and an improvement in the style of printing. The name of the author is sufficient guarantee that each new edition fully keeps pace with the advance of science.

## DUNGLISON'S THERAPEUTICS—New and Much Improved Edition.

## GENERAL THERAPEUTICS AND MATERIA MEDICA.

With One Hundred and Twenty Illustrations.

ADAPTED FOR A MEDICAL TEXT-BOOK.

BY ROBLEY DUNGLISON, M. D.,

Professor of Institutes of Medicine, &c. in Jefferson Medical College; late Professor of Materia Medica, &c. in the Universities of Virginia and Maryland, and in Jefferson Medical College.

Third Edition, Revised and Improved, in Two Octavo Volumes, well bound.

Our junior brethren in America will find in these volumes of Professor Dunglison a "THERAVENTUS MEDICAMINUM" more valuable than a large purse, of gold.—*London Medico-Chirurgical Review*.

New and Enlarged Edition, Brought up to 1848.

**WILLIAMS' PATHOLOGY. Now Ready.**

# PRINCIPLES OF MEDICINE,

COMPRISING  
**GENERAL PATHOLOGY AND THERAPEUTICS,**

AND A BRIEF GENERAL VIEW OF  
ETIOLOGY, NOSOLOGY, SEMEIOLOGY, DIAGNOSIS, PROGNOSIS,  
AND HYGIENICS.

BY **CHARLES J. B. WILLIAMS, M.D., F.R.S.,**

Fellow of the Royal College of Physicians, &c.

EDITED, WITH ADDITIONS, BY **MEREDITH CLYMER, M.D.,**

Consulting Physician to the Philadelphia Hospital, &c. &c.

*Third American, from the Second and Enlarged London Edition.*

In One Volume Octavo.

The delay which has prevented the appearance of this edition until the present time, has arisen from the extensive modifications and improvements introduced by the author, bringing the work fully up to a level with the present state of knowledge on the numerous and important subjects of which he treats. These additions pervade almost every portion of the work, but they preponderate in the following subjects, in which we can mention—in *ETIOLOGY, mechanical, chemical, and dietetic causes of diseases, defective cleanliness, ventilation and drainage. In PATHOLOGY, the tubular viscous of the elements of disease; reflex action and sympathy; elementary changes in the blood; congestion; determination of blood; inflammation, in its various, manifold results, and modes of treatment; degeneration of textures; cancerous and aplastic deposits and their treatment, with a notice of the action of cod liver oil; and the whole chapter on HYGIENICS, comprising food; clothing; air and temperature; exercise; sleep; mental occupation and accretion.* In addition to this, the editor has introduced much new matter in the sections on *ETIOLOGY, DIAGNOSIS OF THE CONSTITUTIONS OF THE BLOOD, STRUCTURAL DISEASES, SEMEIOLOGY, PROGNOSIS AND HYGIENICS, and he has also added a section on the SIGNS OF DISEASE.*

It will be seen from this rapid summary, that the additions to this edition of Dr. Williams' Principles will fully maintain its high reputation, and render it worthy a continuance of the favor which has caused its introduction as a text-book into so many colleges throughout the Union.

It is entitled to claim the reader's best attention, and its perusal and study will be amply remunerative. It is a work calculated to elevate the character of medical science, from its correct and lucid exposition of the great principles of scientific investigation, and its plain, practical character, will recommend it to the student and practitioner of medicine and surgery.—*Am. Medical Journal, July 1848.*

**ROYLE'S NEW WORK.**

## **MATERIA MEDICA AND THERAPEUTICS;**

INCLUDING THE PREPARATIONS OF THE PHARMACOPEIAS OF LONDON, EDINBURGH,  
DUBLIN, AND OF THE UNITED STATES,

WITH MANY NEW MEDICINES.

BY **J. FORBES ROYLE, M.D., F.R.S.**

Late of the Medical Staff in the Bengal Army, Professor of Materia Medica and Therapeutics, King's College  
London, &c. &c.

EDITED BY **JOSEPH CARSON, M.D.,**

Professor of Materia Medica in the Philadelphia College of Pharmacy, &c. &c.

WITH NINETY-EIGHT ILLUSTRATIONS.

*In one large octavo volume of about 700 pages.*

Being one of the most beautiful Medical works published in this country.

This work is ably done—the botanical part with great skill, and the chemical, natural history, and therapeutic department, most perfect and complete.—*Edinburgh Medical Journal.*

This is another of that beautiful and cheap series of manuals published by Mr. Churchill. In the execution of the wood cuts, of plants, flowers and fruits, Mr. Bagg seems almost to have exceeded his former doing. The work is, indeed, a most valuable one. It would be injustice to the learned author not to state that, in addition to what other works on the subject necessarily contained, the reader will find here not a little that is original, or introduced for the first time, more especially in the details of botany and natural history.—*British and Foreign Medical Review.*

## **RAMSBOTHAM'S MIDWIFERY.**

THE PRINCIPLES AND PRACTICE OF

## **OBSTETRIC MEDICINE AND SURGERY,**

IN REFERENCE TO THE PROCESS OF PARTURITION.

ILLUSTRATED BY

*One hundred and forty-eight Large Figures on 55 Lithographic Plates.*

BY **FRANCIS H. RAMSBOTHAM, M.D., &c.**

A NEW EDITION, FROM THE ENLARGED AND REVISED LONDON EDITION.

*In one large imperial octavo volume, well bound.*

It is the book of Midwifery for students; clear, but not too minute in its details, and sound in its practical instructions. It is so completely illustrated by plates (admirably chosen and executed), that the student must be stupid, indeed, who does not understand the details of this branch of the science, so far, at least, as description can make them intelligible.—*Dublin Journal of Medical Science.*

Now Ready, brought up to July 1848,

A New Edition of WILSON'S HUMAN ANATOMY, much Improved.

# A SYSTEM OF HUMAN ANATOMY, GENERAL AND SPECIAL.

BY ERASMUS WILSON, M. D.

FOURTH AMERICAN, FROM THE LAST ENGLISH EDITION.

EDITED BY PAUL B. GODDARD, A. M. M. D.,

Professor of Anatomy in the Franklin Medical College, Philadelphia.

WITH TWO HUNDRED AND FIFTY ILLUSTRATIONS.

Beautifully printed in One large Octavo Volume of nearly Six Hundred pages.

In passing through numerous editions, both in England and this country, this work has received many improvements and modifications, and it may now be confidently presented to the profession as containing all the important facts in general and special anatomy in a clear and lucid manner, fully brought up to the present level of science. It has long been known as the favorite text-book in this department of medical science, and it is now used in a large proportion of the colleges throughout the country, to which it is further recommended by its admirable series of illustrations, its beautiful mechanical execution, its neat and convenient size, and the very low rate at which it is furnished.

Is many, if not all the colleges of the Union, it has become a standard text-book.—*N. Y. Medical Journal.*

From GRANVILLE SHARP PARTISOR, M. D., *Professor of Anatomy in the University of New York.*

"I have a very high opinion of the work of Wilson, and I feel that you have conferred a favor on the profession by the very handsome edition of it which you have published."

From J. N. BYRNE, M. D., *Professor of Anatomy in the Memphis Medical College.*

"I look upon this book as one of the best, if not the very best, in the English language, for the practical anatomist."

From Professor W. R. GRANT, *of the Pennsylvania Medical College.*

"I have heretofore considered Wilson's Anatomy as one of the best books for the use particularly of students, and as such have recommended it to the classes of the Pennsylvania Medical College."

FERGUSSON'S SURGERY—New and Improved Edition of 1848, Now Ready.

# A SYSTEM OF PRACTICAL SURGERY.

BY WILLIAM FERGUSSON, F. R. S. E.,

Professor of Surgery in King's College, London, &c. &c.

THIRD AMERICAN, FROM THE LAST ENGLISH EDITION.

With Two Hundred and Seventy-four Illustrations by Bagg, Engraved by Gilbert.

In One large and beautifully printed Octavo Volume of Six Hundred and Thirty large Pages.

It is with unfeigned satisfaction that we call the attention of the profession in this country to this excellent work. It richly deserves the reputation conceded to it, of being the best practical surgery extant, at least in the English language.—*Medical Examiner.*

Professor Fergusson's work, we feel persuaded, will be as great a favorite as it deserves, for it combines the powerful recommendations of clearness and elegance, with a clear, sound, and practical treatment of every subject in surgical science. The illustrations, by Bagg, are admirable—in his very best style.—*Edinburgh Journal of Medical Science.*

Lately published, a New and Much Improved Edition of DRUITT'S SURGERY.

# THE PRINCIPLES AND PRACTICE OF MODERN SURGERY.

BY ROBERT DRUITT, SURGEON.

THIRD AMERICAN, FROM THE THIRD LONDON EDITION.

Illustrated by One Hundred and Fifty-three Wood Engravings.

WITH NOTES AND COMMENTS

BY JOSHUA B. FLINT, M. M. S. S.

In One very neat Octavo Volume of about Five Hundred and Fifty Pages.

In presenting this work to the American profession for the third time, but little need be said to solicit for it a continuation of the favor with which it has been received. The merits which have procured it this favor, its clearness, conciseness, and excellent arrangement, will continue to render it the favorite text-book of the student who wishes in a moderate space a compend of the principles and practice of Surgery.

An unsurpassable compendium not only of surgical but of medical practice.—*London Medical Gazette.*

This work merits our warmest commendations, and we strongly recommend it to young surgeons as an admirable digest of the principles and practice of modern Surgery.—*Medical Gazette.*

It may be said with truth that the work of Mr. Drutt affords a complete, though brief and condensed view, of the entire field of modern surgery. We know of no work on the same subject having the appearance of a manual, which includes so many topics of interest to the surgeon; and the terse manner in which each has been treated evinces a most enviable quality of mind on the part of the author, who seems to have an innate power of sifting out and grasping the leading facts and features of the most elaborate productions of the pen. It is a useful handbook for the practitioner, and we should deem a teacher of surgery unpardonable who did not recommend it to his pupils. In our own opinion, it is admirably adapted to the wants of the student.—*Provincial Med. and Surg. Journal.*

TAYLOR'S TOXICOLOGY. JUST PUBLISHED.

# ON POISONS

## IN RELATION TO MEDICAL JURISPRUDENCE AND MEDICINE.

BY ALFRED S. TAYLOR, F. R. S.,

Lecturer on Medical Jurisprudence and Chemistry in Guy's Hospital, and author of "Medical Jurisprudence," &amp;c. &amp;c.

Edited, with Notes and Additions,

BY R. EGLESFELD GRIFFITH, M. D.

In one large octavo volume, to match the "Medical Jurisprudence" of the same author.

It is, so far as our knowledge extends, incomparably the best upon the subject; in the highest degree creditable to the author, entirely trustworthy, and indisputable to the student and practitioner, and likely to prove of immense service to the local practitioner, whether engaged in the duty of prosecuting the criminal or defending the innocent from condemnation.—*N. Y. Assaist.*

It is safe to say, that the volume of Mr. Taylor forms one of the most complete treatises on poisons extant, and that it is a work which ought to be in the hands of every physician and lawyer. It is an eloquent epitome of all that is known on the subject of poisons. The subject is one of deep interest. We shall avail ourselves of the earliest opportunity to say more about this excellent treatise.—*The Western Journal of Medicine and Surgery.*

We can most unreservedly recommend Mr. Taylor's treatise to our readers as the most complete, and at the same time, condensed system of Toxicology extant, and as the one which, we feel assured, will henceforth rank in this country as the chief authority on the subject.—*Medical-Chirurgical Review.*

The reputation acquired by Mr. Taylor, by his researches in Toxicology and Legal Medicine, is proved *factis* evidence in favor of anything coming from his hands; and we accordingly find that in the present treatise, he has not fallen short of his reputation. It, moreover, fills up what has been a gap in the science of Toxicology. Dr. Christison and M. Orfila have rather endeavored to elucidate the chemical history, modes of detection, and treatment in cases of poisoning. Dr. Taylor, on the contrary, with fewer chemical details, has directed his inquiries towards a careful review of the symptoms peculiar to each poison, the examination and comparison of the symptoms of each with the other, and with similar symptoms which may be developed by diseased actions in the economy. His work thus, besides being an excellent guide to the medical practitioner, in assisting his diagnosis in cases of poisoning, is also valuable to the medical man who is called upon to give his testimony before a court in criminal cases.—*The Charleston Medical Journal and Review.*

For ourselves, we feel confident that it will be long the table-book of every medical practitioner who has the least regard for his own reputation, and be found in the circuit-bag of the Barrister, in company with Archbold's Criminal Pleadings, and Roscoe's Criminal Evidence.—*The Dublin Quarterly Journal.*

Just Published.

# THE HUMAN BRAIN;

## ITS STRUCTURE, PHYSIOLOGY AND DISEASES.

WITH A DESCRIPTION OF THE TYPICAL FORM OF THE BRAIN IN THE ANIMAL KINGDOM.

BY SAMUEL SOLLY, F. R. S., &amp; C.,

Senior Assistant Surgeon to St. Thomas' Hospital, &amp;c.

FROM THE SECOND AND MUCH ENLARGED LONDON EDITION.

In One Octavo Volume; with One Hundred and Twenty Wood-cuts.

The most complete account of the anatomy, physiology, and pathology of the brain that has hitherto appeared. We earnestly advise all our professional brethren to enrich their libraries with this admirable treatise.—*Medical-Chirurgical Review.*

In the arrangement of this admirable treatise we have, first, an excellent structural anatomy; second, a deeply interesting comparative anatomy, extending over many of the species of the different genera which make up the great classes of the animal kingdom; third, an account of the operative apparatus; fourth, a chapter on the weight; fifth, on the configuration of the brain. We have then an elaborate account of its dissection, and that of the spinal cord, of the cerebral nerves and circulation, of the development of the brain, and lastly some remarks (and here occurs the only deficiency we have to complain of) on the physiology of the cerebro-spinal axis, and some philosophical observations. All the preceding topics being treated of according to the improved mode of dissection of the organ adopted at the present day, assisted by microscopic research, and written professedly in elucidation of its internal structure, &c., by one of the ablest cerebro-anatomists, if we may coin a word, of the day, it is useless to say that this treatise is an unsurpassed guide to the student in his investigations of the delicate and complex structure of this beautiful and curious organ.

The pathological portion of the volume occupies about one half of the whole, and we know of none better, and few as good. The various diseases to which the brain is liable are treated of, as is to be expected, concisely, sufficiently, and ably; and many valuable and well recorded cases are related in illustration of symptoms, effects, and treatment; and the whole is characterized by a profound knowledge of anatomy, and pathological anatomy, descriptive, histological and chemical. We should suppose that neither the encephalons, nor its diseases could be properly studied without reference to this volume.—*The Assaist.*

We have felt great satisfaction in again accompanying Mr. Solly in his lucid description of the exquisite structural arrangements of this wonderful organ; and we can unhesitatingly say, that the student will find comprehended in the first ten chapters of Mr. Solly's treatise, a series of the most comprehensive and interesting anatomical details in the English language. We shall, however, chiefly confine our remarks to the eleventh and concluding part of the treatise, (which, by the by, rather exceeds in quantity of letterpress the whole of the other ten taken together,) containing what the author modestly terms an "outline of the diseases of the brain," but which we do not hesitate to characterize as a very excellent and practical description of this important and obscure class of maladies. . . . This work is one which fully deserves, and will certainly obtain a place among our medical classics. The subjects of which it treats, like almost all questions in anatomy and pathology, will doubtless, as science advances, receive numerous additions and modifications; but the scope of the treatise is so ample, and the arrangement of its various topics so judicious, that we believe it need never be superseded as a standard work of reference.—*London Med. Gazet.*

**WATSON'S PRACTICE.**

A NEW EDITION.

**LECTURES ON THE  
PRINCIPLES AND PRACTICE OF PHYSIC.**

DELIVERED AT KING'S COLLEGE, LONDON.

BY THOMAS WATSON, M. D., &amp;c. &amp;c.

Third American from the last London Edition.

REVISED, WITH ADDITIONS,

BY D. FRANCIS CONDIE, M. D.,

Author of a Work on the "Diseases of Children," &amp;c.

In One Octavo Volume.

Of nearly ELEVEN HUNDRED LARGE PAGES, strongly bound with raised bands.

The rapid sale of two large editions of this work is an evidence of its merits, and of its general favor with the American practitioner. To commend it still more strongly to the profession, the publishers have gone to a great expense in preparing this edition with larger type, finer paper, and stronger binding with raised bands. It is edited with reference particularly to American practice, by Dr. Condie; and with these numerous improvements, the price is still kept so low as to be within the reach of all, and to render it among the cheapest works offered to the profession. It has been received with the utmost favor by the medical press, both of this country and of Europe, some of the notices of which may be seen in the Supplement to the Medical News for June 1847.

**CARPENTER'S HUMAN PHYSIOLOGY.**

LATELY ISSUED.

A NEW, MUCH IMPROVED AND ENLARGED EDITION OF  
**THE PRINCIPLES OF HUMAN PHYSIOLOGY,**

WITH THEIR CHIEF APPLICATIONS TO PATHOLOGY, HYGIENE, AND FORENSIC MEDICINE.

BY WILLIAM B. CARPENTER, M. D., F. R. S.,

Fallerian Professor of Physiology in the Royal Institution of Great Britain; author of "Elements of Physiology," "Principles of General and Comparative Physiology," "Principles of Animal Physiology," &amp;c. &amp;c.

THIRD AMERICAN FROM THE LAST LONDON EDITION,

WITH NOTES AND ADDITIONS BY

MEREDITH CLYMER, M. D.,

Consulting Physician to the Philadelphia Hospital, &amp;c. &amp;c.

Containing Three Hundred and Seventeen Wood-cut and other Illustrations.

In One Large and Beautifully Printed Octavo Volume of over seven hundred and fifty pages, strongly bound.

**THE GREAT MEDICAL LIBRARY.****THE CYCLOPEDIA OF PRACTICAL MEDICINE;**

COMPRISING

Treatises on the Nature and Treatment of Diseases, Materia Medica and Therapeutics, Diseases of Women and Children, Medical Jurisprudence, &amp;c. &amp;c.

EDITED BY

JOHN FORBES, M. D., F. R. S., ALEXANDER TWEEDIE, M. D., F. R. S.,

AND JOHN CONOLLY, M. D.

Revised, with Additions,

BY ROBLEY DUNGLISON, M. D.

THIS WORK IS NOW COMPLETE, AND FORMS FOUR LARGE SUPER-ROYAL OCTAVO VOLUMES.

Containing Thirty-two Hundred and Fifty-Four unusually large Pages in Double Columns, Printed on Good Paper, with a New and Clear Type.

The whole well and strongly bound, with Raised Bands and Double Titles.

Or, to be had in Twenty-four Parts, at Fifty Cents each.

For a List of Articles and Authors, together with opinions of the press, see various Supplements to the Medical News and Library.

**OTHER WORKS**  
 IN  
**VARIOUS DEPARTMENTS**  
 OF  
**MEDICINE AND SURGERY.**  
 PUBLISHED BY  
**LEA AND BLANCHARD.**

- AMERICAN JOURNAL OF THE MEDICAL SCIENCES.** Edited by Isaac Hays, M.D. Published quarterly at \$5 per annum.
- ARNOTT'S PHYSICS.**—The Elements of Physics in plain or non-technical language. A new edition, edited by Isaac Hays, M.D. In 1 vol. 8vo., sheep, with 176 wood-cuts.
- ABERCROMBIE ON THE STOMACH.**—Pathological and Practical Researches on Diseases of the Stomach, Intestinal Canal, &c. Fourth edition, in 1 vol. 8vo., sheep.
- ABERCROMBIE ON THE BRAIN.**—Pathological and Practical Researches on the Diseases of the Brain and Spinal Cord. A new edition, in one octavo volume, sheep.
- ASHWELL ON FEMALES.**—A Practical Treatise on Diseases Peculiar to Women, edited by Goddard. New edition, 1848, 1 large vol. 8vo.
- ALISON'S PATHOLOGY.**—Outlines of Pathology and Practice of Medicine; in three parts; containing Preliminary Observations, Inflammatory and Febrile Diseases, and Chronic or Non-Febrile Diseases. In one neat octavo volume, sheep.
- BENNET'S PRACTICAL TREATISE ON INFLAMMATION, ULCERATION AND INDURATION OF THE NECK OF THE UTERUS.** In one small 12mo. volume, cloth.
- BURROWS ON CEREBRAL CIRCULATION.**—On the Disorders of the Cerebral Circulation, and on the Connection between Affections of the Brain and Diseases of the Heart. With colored plates, 1 vol. 8vo., 1848.
- BIRD ON URINARY DEPOSITS.**—Urinary Deposits, their Diagnosis, Pathology and Therapeutical Indications. In one neat octavo volume, cloth, with numerous wood-cuts.
- BIRD'S NATURAL PHILOSOPHY.**—Being an Experimental Introduction to the Study of the Physical Sciences. Especially intended for the Use of the Medical Student. In one handsome royal 12mo. volume, with 872 cuts.
- BERZELIUS ON THE KIDNEYS AND URINE.** In 1 vol. 8vo., cloth.
- BUCKLAND'S GEOLOGY.**—Geology and Mineralogy, with reference to Natural Theology; a Bridgewater Treatise. In two octavo volumes, with numerous maps, plates, &c.
- BLAKISTON ON THE CHEST.**—Practical Observations on certain Diseases of the Chest, and on the Principles of Auscultation. 1 vol. 8vo., cloth, 1848.
- BRODIE'S SURGICAL LECTURES.**—Clinical Lectures on Surgery. 1 vol. 8vo., cloth.
- BRODIE ON THE JOINTS.**—Pathological and Surgical Observations on the Diseases of the Joints. 1 vol. 8vo., cloth.
- BRODIE ON URINARY ORGANS.**—Lectures on the Diseases of the Urinary Organs. 1 vol. 8vo., cloth.
- \* \* \* These three works may be had neatly bound together, forming a large volume of "Brodie's Surgical Works."
- BUDD ON DISEASES OF THE LIVER.**—In one octavo volume, sheep, with beautiful colored plates and numerous wood-cuts.
- BRIDGWATER TREATISES.** The whole complete in 7 vols. 8vo., containing Reget's Animal and Vegetable Physiology, in 2 vols., with many cuts; Kirby on the History, Habits, and Instinct of Animals, 1 vol., with plates; Prout on Chemistry; Chalmers on the Moral Condition of Man; Whewell on Astronomy; Bell on the Hand; Kidd on the Physical Condition of Man; and Buckland's Geology, 2 vols., with many plates and maps.
- BARTLETT'S PHILOSOPHY OF MEDICINE.**—Essay on the Philosophy of Medical Science. In two parts; one neat octavo volume, extra cloth.
- BRIGHAM ON MIND, &c.**—The Influence of Mental Excitement and Mental Cultivation on Health. In one neat 12mo. volume, extra cloth.
- BILLING'S PRINCIPLES OF MEDICINE.**—The First Principles of Medicine. From the fourth London edition; in one octavo volume, cloth.
- BENEDICT'S CHAPMAN.**—Compendium of Chapman's Lectures on the Practice of Medicine. One neat vol., 8vo.
- CHAPMAN'S LECTURES ON THORACIC AND ABDOMINAL VISCERA.** 1 vol. 8vo.
- CHAPMAN'S LECTURES ON FEVERS, DROPSIES, GOUT, RHEUMATISM, &c. &c.** 1 vol. 8vo.
- CARPENTER'S ELEMENTS OF PHYSIOLOGY.**—For the Use of the Medical Student. One large vol. 8vo., with 180 illustrations.
- CARPENTER'S VEGETABLE PHYSIOLOGY.**—A Popular Treatise on Vegetable Physiology. With numerous wood-cuts; in one 12mo. volume, extra cloth.
- CLATER AND SKINNER'S FARRIER.**—Every Man his own Farrier; containing the Causes, Symptoms, and most approved Methods of Cure of the Diseases of Horses. From the 23th London edition; edited by Skinner; in one 12mo. volume, cloth.
- CLATER AND YOUATT'S CATTLE DOCTOR.**—Every Man his own Cattle Doctor; containing the Diseases of Oxen, Sheep, Swine, &c. Edited by Youatt, and revised by Skinner; with wood-cuts; in one volume 12mo.
- COOPER (SIR ASTLEY) ON THE ANATOMY AND TREATMENT OF ABDOMINAL HERNIA.** 1 large vol., imp. 8vo., with over 130 lithographic figures.

- COOPER ON THE STRUCTURE AND DISEASES OF THE TESTIS, AND ON THE THYMUS GLAND.** 1 vol., imp. 8vo., with 177 figures on 29 plates.
- COOPER ON THE ANATOMY AND DISEASES OF THE BREAST, WITH TWENTY-FIVE MISCELLANEOUS SURGICAL PAPERS.** 1 large vol., imp. 8vo., with 262 figures on 36 plates.
- COOPER ON DISLOCATIONS AND FRACTURES OF THE JOINTS.**—Edited by Bransby Cooper and J. C. Warren. 1 vol., 8vo., with 133 cuts.
- CLYMER AND OTHERS ON FEVER.**—Fever, their Diagnosis, Pathology and Treatment. In one large vol. 8vo.
- DURLACHER ON CORNS, BUNIONS, &c.**—A Treatise on Corns, Bunions, the Diseases of Nails, & the General Management of the Feet. In one 12mo. volume, cloth.
- DEWEES'S MIDWIFERY.**—A Comprehensive System of Midwifery, for the Use of the Medical Student. Eleventh edition, 1 vol. 8vo., with plates.
- DEWEES ON FEMALES.**—A Treatise on the Diseases of Females. Ninth edition, 1 vol. 8vo., plates.
- DEWEES ON CHILDREN.**—A Treatise on the Physical and Medical Treatment of Children. Ninth edition, 1 vol. 8vo.
- ELLIS'S FORMULARY.**—The Medical Formulary, being a Collection of Prescriptions derived from the Writings and Practice of the most eminent Physicians of America and Europe; to which is added an Appendix, containing the usual Dietetic Preparations and Antidotes for Poisons. By Benjamin Ellis, M. D. Eighth edition, with extensive alterations and additions. By Samuel George Morton, M. D. In one neat 8vo. volume.
- ESQUIROL ON INSANITY.**—Mental Maladies, considered in relation to Medicine, Hygiene and Medical Jurisprudence. Translated by E. K. Hunt, M. D., &c. In 1 vol. 8vo.
- FOWNES' ELEMENTS OF CHEMISTRY for the Use of the Medical Student.** In one handsome volume, royal 12mo., with numerous cuts. Second American edition, by Bridges.
- GRIFFITH'S CHEMISTRY OF THE FOUR SEASONS.**—Spring, Summer, Autumn and Winter. One neat vol. 12mo., with cuts.
- GUTHRIE ON THE BLADDER, &c.**—The Anatomy of the Bladder and Uterus, and the Treatment of the Obstructions to which those Passages are liable. In 1 vol. 8vo.
- HARRIS ON MAXILLARY SINUS.**—Dissertation on the Diseases of the Maxillary Sinus. In one small octavo volume, cloth.
- HOPE ON THE HEART.**—A Treatise on the Diseases of the Heart and Great Vessels. Edited by Penneck. 1 vol. 8vo., with plates.
- HARRISON ON THE NERVES.**—An Essay towards a correct Theory of the Nervous System. In one octavo volume, sheep.
- HUGHES ON THE LUNGS AND HEART.**—Clinical Introduction to the Practice of Auscultation, and other Modes of Physical Diagnosis, intended to simplify the Study of the Diseases of the Heart and Lungs. By H. M. Hughes, M. D., &c. In one 12mo. volume, with a plate.
- HOBLYN'S MEDICAL DICTIONARY.**—Dictionary of the Terms used in Medicine. Edited by Hays. 1 vol. royal 12mo.
- HASSE'S PATHOLOGICAL ANATOMY.**—An Anatomical Description of the Diseases of the Organs of Circulation and Respiration. Translated and edited by Swaine. In one octavo volume.
- INTRODUCTION TO PRACTICAL ORGANIC CHEMISTRY;** based on the Works of Brande, Liebig, and others. In one volume 18mo., paper, price 25 cents.
- INTRODUCTION TO VEGETABLE PHYSIOLOGY.**—With reference to the Works of De Candel, Lindley, &c. In one volume, 18mo., paper, price 25 cents.
- KIRBY ON ANIMALS.**—The History, Habits, and Instinct of Animals. A Bridgewater Treatise. In one large volume 8vo., with plates.
- KIRBY AND SPENCE'S ENTOMOLOGY.**—An Introduction to Entomology; or Elements of the Natural History of Insects; comprising an Account of Noxious and Useful Insects, of their Metamorphosis, Food, Stratagems, Habitations, Societies, Motions, Nests, Hybernation, Instinct, &c. &c. In one large octavo volume, neat extra cloth, with plates, plain or beautifully colored. From the sixth London edition.
- LISTON AND MUTTER'S SURGERY.**—Lectures on the Operations of Surgery. One large vol. 8vo., with 216 cuts.
- LALLEMAND ON SPERMATORRHOEA.**—The Causes, Symptoms, and Treatment of Spermatorrhoea. Translated and edited by Henry J. McDougall, M. D. 1 vol. 8vo., 1848.
- LAWRENCE ON RUPTURES.**—A Treatise on Ruptures, from the fifth London edition. In one octavo volume, sheep.
- MILLER'S PRINCIPLES OF SURGERY.** One large vol. 8vo., 2d American edition, 1848.
- MILLER'S PRACTICE OF SURGERY.** One large vol. 8vo.
- MAN'S POWER OVER HIMSELF TO PREVENT OR CONTROL INSANITY.** One vol. 18mo., paper, price 25 cents.
- MAURY'S DENTAL SURGERY.**—A Treatise on the Dental Art, founded on Actual Experience. Illustrated by 241 lithographic figures and 64 wood-cuts. Translated by J. B. Saviar. In one octavo volume, sheep.
- MEDICAL NEWS AND LIBRARY,** published monthly at One Dollar per annum.
- MULLER'S PHYSIOLOGY.**—Elements of Physiology. Translated by Wm. Baly, M. D., and edited and arranged by John Bell, M. D. In one large octavo volume, sheep.
- MEIGS' COLOMBAT ON FEMALES.**—Treatise on the Diseases of Females; and on the Special Hygiene of their Sex. Translated by C. D. Meigs, M. D. In 1 vol. large 8vo., with cuts.
- MATTEUCCI ON LIVING BEINGS.**—Physical Phenomena of Living Beings. Edited by Pereira. 1 vol. royal 12mo., with cuts.
- PRACTICAL ORGANIC CHEMISTRY.** 18mo., sewed, price 25 cents.
- PROUT ON THE STOMACH.**—On the Nature and Treatment of Stomach and Renal Diseases. In one octavo volume, sheep, with colored plates.

- PHILIP ON INDIGESTION.**—A Treatise on Protracted Indigestion. In 1 vol. 8vo.
- PHILLIPS ON SCROFULA.**—Scrofula, its Nature, its Prevalence, its Causes, and the Principles of its Treatment. In one neat octavo volume, cloth, with a plate.
- ROGET'S PHYSIOLOGY.**—A Treatise on Animal and Vegetable Physiology, with over 400 illustrations on Wood. In two octavo volumes, cloth. A Bridgewater Treatise.
- ROGET'S OUTLINES OF PHYSIOLOGY.**—Outlines of Physiology and Phrenology. In one large octavo volume, cloth.
- RICORD ON VENEREAL.**—A Practical Treatise on Venereal Diseases; with a Therapeutical Summary, and a special Formulary. In one vol. 8vo., cloth.
- ROBERTSON ON TEETH.**—A Practical Treatise on the Human Teeth, with Plates. One small volume, octavo, cloth.
- SIMON'S CHEMISTRY OF MAN.**—Animal Chemistry with reference to the Physiology and Pathology of Man. One large vol. 8vo., with plates.
- TODD & BOWMAN'S PHYSIOLOGICAL ANATOMY AND PHYSIOLOGY OF MAN,** with numerous illustrations. Publishing in the Medical News and Library.
- TAYLOR'S MEDICAL JURISPRUDENCE.**—With numerous Notes and Additions, and References to American Practice and Law. By R. E. Griffith, M. D. In one vol. 8vo.
- THE CONNECTION BETWEEN PHYSIOLOGY AND INTELLECTUAL SCIENCE.** 1 vol. 18mo., paper, price 25 cents.
- THOMPSON'S SICK ROOM.**—Domestic Management of the Sick Room, Necessary in Aid of Medical Treatment for the Cure of Diseases. Edited by R. E. Griffith. In one large royal 12mo. volume, extra cloth, with wood-cuts.
- TRAILL'S MEDICAL JURISPRUDENCE.**—Outlines of a Course of Lectures on Medical Jurisprudence. Revised, with numerous Notes. In one octavo volume, cloth.
- VOGEL'S PATHOLOGICAL ANATOMY.**—The Pathological Anatomy of the Human Body. Translated by Day. One large vol. 8vo., with plates.
- WALSHE ON THE LUNGS.**—Physical Diagnosis of the Diseases of the Lungs. In one neat 12mo. volume, extra cloth.
- WILLIAMS AND CLYMER ON THE CHEST.**—A Treatise on the Diseases of the Respiratory Organs, including the Larynx, Trachea, Lungs, and Pleura. With numerous Additions and Notes, by Meredith Clymer, M. D. In one neat 8vo. volume, with cuts.
- WHITEHEAD ON ABORTION AND STERILITY.**—The Causes and Treatment of Abortion and Sterility, being the Result of an extended Practical Inquiry into the Physiological and Morbid Conditions of the Uterus. 1 vol. 8vo., 1848.
- WILSON'S DISSECTOR. THE DISSECTOR, OR PRACTICAL AND SURGICAL ANATOMY.** With 106 illustrations. Modified and re-arranged by Paul B. Goddard, M. D., &c. In one large royal 12mo. volume, sheep.
- WILSON ON THE SKIN.**—Anatomy and Diseases of the Skin. 2d edition, improved, 1 vol. 8vo. \* \* \* Same work, with colored plates; also the plates sold separate.
- YOUATT ON THE HORSE.**—The Horse: containing a full account of the Diseases of the Horse, with their Mode of Treatment; his Anatomy, and the usual Operations performed on him; his Breeding, Breaking, and Management; and Hints on his Soundness, and Purchase and Sale. Together with a General History of the Horse; a Dissertation on the American Trotting Horse, how Trained and Jockeyed; an Account of his Remarkable Performances; and an Essay on the Ass and the Mule. By J. S. Skinner, Assistant Postmaster-General, and Editor of the Turf Register. In one volume octavo, with numerous cuts.

**GARDNER'S MEDICAL CHEMISTRY—Now Ready.**

**MEDICAL CHEMISTRY, FOR THE USE OF STUDENTS:**  
**BEING A MANUAL OF THE SCIENCE WITH ITS APPLICATIONS TO TOXICOLOGY, PHYSIOLOGY, THERAPEUTICS, HYGIENE, &c. &c.**

BY D. PEREIRA GARDNER, M. D.,

Late Professor of Chemistry in the Philadelphia College of Medicine, and of Chemistry and Nat. Philos. in Hampden Sidney College, &c.

In One handsome royal 12mo. Volume, with Illustrations.

This work, while embodying a full course of modern Chemistry, has been prepared especially for the use of the student of medicine. With this view, the author has endeavored not so much to make a treatise on abstract Chemistry, as to present all the applications of the science to the various departments of medicine. There appears to be a necessity for a book of this kind, which has not as yet been supplied among the numerous and excellent textbooks before the profession. The limited time devoted to the study in our medical colleges does not permit the teacher to point out the numerous and important applications of modern Chemistry to Medicine, or enable the student to discover them for himself. These topics, therefore, have been dwelt on at large by the author, while he has passed cursorily over those objects which are known only as chemical or mineralogical curiosities.

**JONES ON THE EYE—Lately Published.**

**THE PRINCIPLES AND PRACTICE  
 OF OPHTHALMIC MEDICINE AND SURGERY.**

BY T. WHARTON JONES, F.R.S., &c. &c.

WITH ONE HUNDRED AND TEN ILLUSTRATIONS.

EDITED BY ISAAC HAYS, M. D., &c.

In one very neat volume, large royal 12mo., with Four Plates, plain or colored, and 66 well executed Woodcuts.

**ILLUSTRATED SERIES OF SCIENTIFIC WORKS,**

NOW PUBLISHING BY LEA &amp; BLANCHARD.

This series comprises works of the highest character on the various branches of practical science. In their illustration and mechanical execution they are prepared without regard to expense, and the publishers present them as equal, if not superior, to anything as yet executed. Each volume is superintended by a competent editor, who makes such additions as the progress of science in this country may require, and at the same time corrects such errors as may have escaped the press in London. The publishers, therefore, hope that these works may attract the approbation of the scientific public by their intrinsic value, the correctness of the text, the beautiful style in which they are produced, and the extremely low rate at which they are furnished.

THE FIRST VOLUME IS

**PRINCIPLES OF PHYSICS & METEOROLOGY.**

BY J. MULLER,

Professor of Physics at the University of Freiburg.

WITH ADDITIONS AND ALTERATIONS BY THE AMERICAN EDITOR.

ILLUSTRATED WITH NEARLY FIVE HUNDRED AND FIFTY ENGRAVINGS ON WOOD, AND TWO COL'D PLATES.

In One large Octavo Volume.

The Physics of Muller is a work superb, complete, unique: the greatest want known to English Science could not have been better supplied. The work is of surpassing interest. The value of this contribution to the scientific records of this country may be estimated by the fact that the cost of the original drawings and engravings alone has exceeded the sum of £2,000.—*Lancet*.

The style in which the volume is published is in the highest degree creditable to the enterprise of the publishers. It contains nearly six hundred engravings executed in a style of extraordinary elegance. We commend the book to general favor. It is the best of its kind we have ever seen.—*N. Y. Courier & Enquirer*.

We can safely say, that, if the forthcoming works be of equal merit, and produced in similar style, the series will prove one of a very invaluable character, which cannot fail to be in universal request.—*North American*.

*From Wm. H. Bartlett, Esq., Professor of Natural and Experimental Philosophy, U. S. Military Academy, West Point.*

I deem this work a most valuable addition to the educational facilities of the country, and a rich source of information to the general reader, as it is truly an elegant specimen of typography.

WEST POINT, March 15th, 1848.

THE SECOND VOLUME IS

**PRINCIPLES OF THE MECHANICS**

OR

**MACHINERY AND ENGINEERING.**

BY PROF. JULIUS WEISBACH.

EDITED BY PROFESSOR W. R. JOHNSON, OF PHILADELPHIA.

Volume I., now ready, containing about 500 pages, and five hundred and fifty wood-cuts.

Volume II., completing the work, will be shortly ready, of about the same size and appearance.

The most valuable contribution to practical science that has yet appeared in this country. The work embraces not only the subjects of Statics and Dynamics, but also Hydrostatics, Hydraulics and Pneumatics—each treated in sufficient detail for every practical purpose, and no demonstration calling in the aid of higher mathematics than elementary geometry and algebra. The work is beautifully got up as to letterpress and illustrations, the diagrams being the most picturesque that we have seen.—*London Athenaeum*.

*From Professor Elias Loomis of the New York University.*

I have examined Weisbach's Mechanics and Engineering with considerable attention, and I am much pleased with it. It is a work prepared with great care and judgment. The Principles of Mechanics are stated in a form which is clear, concise, and easily understood; they are reduced to precise rules or formulae, and are abundantly illustrated with numerical examples. The diagrams are numerous, neat, and well calculated to convey clear ideas.—The portion treating of the dynamics of fluid bodies is particularly rich, and the results both of theory and experiment are given in a brief and perspicuous form. The entire treatise is intelligible to one who is only familiar with the lower mathematics, and it must become a standard work with mechanics and engineers.

NEW YORK, May 6th, 1848.

*From Henry Vethake, Esq., Professor of Mathematics in the University of Pennsylvania.*

I have examined, with some care, the first volume of Weisbach's Principles of the Mechanics of Machinery and Engineering, and I have been not a little gratified in doing so. It is the most comprehensive, accurate, and best executed work, on the subject of which it treats, with which I am acquainted in the English language; and the labors of the American editor have considerably enhanced its original value. Let me say, too, that by presenting it, as well as the other volumes of the series of which it is a part, to the American public, you will, in my opinion, contribute largely to raise the standard of scholarship in our country, especially in respect to the applications of science to the mechanical and chemical arts.

PHILADELPHIA, May 26th, 1848.

**Illustrated Series of Scientific Works--Continued.**

THE THIRD VOLUME IS  
**TECHNOLOGY; OR, CHEMISTRY**  
 AS APPLIED TO THE ARTS AND TO MANUFACTURES.  
 BY F. KNAPP.

TRANSLATED AND EDITED BY  
 DR. EDMUND RONALDS, AND DR. THOMAS RICHARDSON,  
 [Lecturer on Chemistry at the Middlesex Hospital.] [Of Newcastle.]

Revised, with American Additions, by  
 PROFESSOR WALTER R. JOHNSON, OF PHILADELPHIA.

WITH NUMEROUS BEAUTIFUL WOOD-CUTS.

Volume I., now ready, containing about 500 pages, and 214 beautiful wood engravings.

Vol. II., preparing, of a similar size and appearance.

This volume contains complete monographs on the subjects of Combustion and Heating, Illumination and Lighting, Manufactures from Sulphur, Manufacture of Common Salt, Soda, Alkalis, Nitric Acid, Manufacture of Soap, together with an appendix containing various miscellaneous improvements concerning the foregoing subjects. The object of this work is purely practical, presenting in each topic, a clear and condensed view of the present state of the manufacture, with all the improvements suggested by the discoveries of science; the whole illustrated with numerous large and well executed engravings of apparatus, machinery, processes, &c. &c.

One of the best works of modern times.—*N. Y. Commercial*, June 1848.

The original treatise is one of great value; it has been carefully translated by gentlemen themselves well versed in the processes it describes, and consequently familiar with their technical language—and it has received from them numerous important additions in which are described the most recent improvements in the various chemical arts as practised in this country.—*Medical-Chirurgical Review*.

When we say that this volume begins another of the superb "Library of Illustrated Books," republished from the London series by Lea & Blanchard, of which Muller's Physics and Meteorology, and Weisbach's Mechanics and Engineering, (the first volume of the latter) have already appeared; that the present work is on a subject coming home to the business and bosoms, because to the economic interests of Americans; that its American editor is Prof. Walter R. Johnson, who has enriched it with numerous valuable additions, the results of his own industrious researches in the technological sciences; and that it is illustrated and printed in the same superb style which marked the previous works;—we have sufficiently explained to our readers the value of a work which will need no other commendation.—*North American*, June 1848.

To be followed by works on PHARMACY, CHEMISTRY, ASTRONOMY, HEAT, HYDRAULICS, METALLURGY, PATHOLOGICAL ANATOMY, RURAL ECONOMY, &c. &c.

Specimens may be had on application to the Publishers.

**MISS MARTINEAU'S NEW WORK.**  
 Now Ready.

**EASTERN LIFE, PRESENT AND PAST.**

BY HARRIET MARTINEAU.

In One Handsome Crown Octavo Volume.

As a writer, she is eloquent in description, vigorous in persuasion: as an artist, at once minute and comprehensive in noting traits of character, touches of humor, indications of the poetical element. We cannot but profit to this book of travels by an Englishwoman with great satisfaction, and recommend it to the thoughtful, as well meriting perusal and consideration. Though we have confined ourselves to Miss Martineau's pictures, we repeat that hers is no mere picture-book; but one of the most substantial and interesting productions of recent seasons, which may be deliberately pondered and will be widely discussed.—*Athenaeum*.

**SOMERVILLE'S PHYSICAL GEOGRAPHY. Now Ready.**  
**PHYSICAL GEOGRAPHY.**

BY MARY SOMERVILLE,

AUTHOR OF "THE CONNECTION OF THE PHYSICAL SCIENCES," &c. &c.  
 In one neat 12mo. volume, extra cloth.

We have thus followed Mrs. Somerville through her intellectual journey over the globe, delighted and improved by her instructions, and anxious that others should derive from them the same pleasure and advantage. From the extracts which we have made, our readers will see that the work is written in a style always simple and perspicuous, often vigorous and elegant, occasionally rising to a strain of eloquence, commensurate with the lofty ideas which it clothes. In Mrs. Somerville's pages no sentiments are recorded, which the Christian or the philosopher disowns. In associating life with nature—in taking cognizance of man as tenant of the earth-home which she describes, her sympathies are ever with the slave, her aspirations ever after truth, secular and divine, and everywhere throughout her work we meet with just and noble sentiments, the indication and the offspring of a highly cultivated and well balanced mind.—*North British Review*.

**PICCIOLA.—Illustrated Edition.**

**PICCIOLA, THE PRISONER OF FENESTRELLA;**  
**OR, CAPTIVITY CAPTIVE.**

BY X. B. SAINTINE.

A NEW EDITION, WITH ILLUSTRATIONS.

In one elegant duodecimo volume, large type, and fine paper; price in fancy cover 50 cents, or in beautiful extra crimson cloth.

Perhaps the most beautiful and touching work of fiction ever written, with the exception of *Uncle Tom's Cabin*.

**HERVEY'S COURT OF GEORGE H. Now Ready.**  
**MEMOIRS OF THE REIGN OF GEORGE THE SECOND,**  
 FROM HIS ACCESSION  
 TO THE DEATH OF QUEEN CAROLINE.  
 BY JOHN LORD HERVEY.

Edited from the Original Manuscript at Iokwerth,  
 BY THE RIGHT HONORABLE JOHN WILSON CROKER, LL. D., F. R. S., &c.  
 In two handsome volumes, royal 12mo., extra cloth.

Certainly nobody has ever drawn so intimate and familiar a picture of the interior of a court as the world is now favored with in these memoirs of Lord Hervey. But the world has to congratulate itself on the whole, that Lord Hervey's have not been forthcoming for all our queens and kings. The information, though highly instructive, is by no means of the profitable sort. It is a lively picture of a most odious and revolting thing.

These volumes are, in every sense of the word, the greatest accession to our English Historical Literature, made since the publication of Peppys' Diary and Walpole's Memoirs. The style, if we forgive a certain anti-theism of manner, is good, the observations are from the fountain head, and the matter curiously confirmative of Walpole's Reminiscences, Letters and Memoirs. The author was Pope's Lord Hervey, the Sporus and Lord Faun's of the poet's satire—the husband of Molly Lepell, Queen Caroline's Vice Chamberlain and greatest confidante after Sir Robert Walpole, Walpole's faithful and much trusted friend and Privy Seal, and the author of certain pamphlets in defence of the Whigs, which Horace Walpole says, "are equal to any that ever were written." The editor's notes are just what notes should be, short, useful, generally accurate, and always to the point.—*Athenæum*, 1st Notice.

Here, however, we must part (for the present) from two most readable volumes, which even Sir Robert Walpole—who is said to have called all history a lie—would, perhaps, have admitted to be nearer the truth than many works making greater pretensions to historical accuracy.—*Athenæum*, 2d Notice.

**FOWNES' CHEMISTRY FOR STUDENTS.**  
 A NEW AND IMPROVED EDITION.

**ELEMENTARY CHEMISTRY,**  
 THEORETICAL AND PRACTICAL.  
 BY GEORGE FOWNES, PH. D.,

Chemical Lecturer in the Middlesex Hospital Medical School, &c. &c.  
 With Numerous Illustrations. Second American Edition. Edited, with Additions,  
 BY ROBERT BRIDGES, M. D.,

Professor of General and Pharmaceutical Chemistry in the Philadelphia College of Pharmacy, &c. &c.  
 In one large duodecimo volume, sheep or extra cloth.

Though this work has been so recently published, it has already been adopted as a text-book by many of the Medical Institutions throughout the country. As a work for the first class student, and as an introduction to the larger systems of Chemistry, such as Graham's, there has been but one opinion expressed concerning it, and it may now be considered as

**THE TEXT-BOOK FOR THE CHEMICAL STUDENT.**

An admirable exposition of the present state of chemical science, simply and clearly written, and displaying a thorough practical knowledge of its details, as well as a profound acquaintance with its principles. The illustrations, and the whole getting-up of the book, merit our highest praise.—*British and Foreign Med. Rev.*

Remarkable for its clearness, and the most concise and perspicuous work of the kind we have seen, admirably calculated to prepare the student for the more elaborate treatises.—*Pharmaceutical Journal*.

From AMES RENNICK, Professor of Chemistry, Columbia College, New York.  
 "The very best manual of Chemistry with which I am acquainted in the English language."  
 New York, Feb. 12th, 1848.

This work of Fownes, while not enlarging on the subject as much as Graham, is far more lucid and expanded than the usual small introductory works. Professors recommending it to their classes may rely upon its being kept up to the day by frequent revisions.

**BIRD'S NATURAL PHILOSOPHY. NOW READY.**  
**ELEMENTS OF NATURAL PHILOSOPHY,**  
 BEING AN EXPERIMENTAL INTRODUCTION TO THE PHYSICAL SCIENCES.

ILLUSTRATED WITH NEARLY FOUR HUNDRED WOOD-CUTS.

BY GOLDING BIRD, M. D.,  
 Assistant Physician to Gray's Hospital,  
 FROM THE THIRD LONDON EDITION.

IN ONE NEAT DUODECIMO VOLUME.

Containing about 400 pages and 372 Wood-cuts.

This work is confidently presented to students in Natural Philosophy as a text-book, uniting advantages scarcely possessed by any other. By the use of clear small type, a very large amount of matter has been compressed into the limits of a single low priced duodecimo volume, embracing in a concise but intelligible manner the elements of all that is known on the subjects of Statics, Dynamics, Hydrostatics, Pneumostatics, Hydrodynamics, Acoustics, Magnetism, Electricity, Voltaism, Electro-dynamics, Thermo-electricity, Galvanism, Unpolarized Light, Polarized Light, The Eye and Optical Apparatus, Thermotics, and Photography.

"This book is written in a most pleasing style, and gives the results of abstract researches in a form adapted to the comprehension of the common reader. It appears to have been specially designed to meet the wants of medical students, whose circumstances often forbid the study of more complete treatises: and it must prove highly acceptable and valuable to all who seek acquaintance with Natural Philosophy, but have not the leisure or the inclination to devote much time to the mathematics."

ELLIS LOOMIS, Prof. of Nat. Phil. in the Univ. of N. Y.

NEW YORK, May 6th, 1848.

## CAMPBELL'S LORD CHANCELLORS.

Now Complete in Seven Volumes.

# LIVES OF THE LORD CHANCELLORS AND KEEPERS OF THE GREAT SEAL OF ENGLAND,

FROM

THE EARLIEST TIMES TO THE REIGN OF KING GEORGE IV.

BY JOHN LORD CAMPBELL, A. M., F. R. S. E.

*Now complete in seven handsome crown octavo volumes, extra cloth.*

The three first volumes of this work constitute the First Series, and embrace the period from the earliest times to the Revolution of 1688.

The Second Series consists of Vols. 4 and 5, containing the Lives of Lord Maynard, Lord Trevor, Lord Somers, Lord Wright, Lord Cowper, Lord Harcourt, Lord Macclesfield, Lord King, Lord Talbot, Lord Hardwicke, Lord Northington, Lord Camden, Lord Yorke, Lord Bathurst, and Lord Thurlow.

The Third Series comprehends Vols. 6 and 7, and is devoted to the Lives of Lords Loughborough, Erskine, and Eldon. Any Series sold separately.

This is a literary undertaking of great magnitude and interest, and it has been performed by the learned author, in a manner that entitles him to the credit of great closeness of research, and the power of presenting his narratives to the reader with much skill and gracefulness of composition.

On the whole, we can conscientiously recommend these volumes to the reader, as a work from which he will derive much entertainment and profit. Not to the lawyer alone do they possess an interest, but the student of history, as well as the statesman, may consult their pages for abundant sources of valuable information.—*Pennsylvania Law Journal.*

For, in very truth, we have not met with so interesting a book for many a day. Though written by a lawyer and about lawyers, (at least in more recent times,) it can and will be read with pleasure by all whose tastes soar above the trashy cheap publications of the day. It really is, in every true sense of the word, a delightful book, combining in a rare degree instruction with amusement. While it invites the lawyer to go back to the very sources of equity and explore all those nameless rills which, gradually swelling and uniting, have made the great sea of equity jurisprudence, it at the same time charms the general reader by a simple and truthful delineation of the most remarkable men who have figured in English history, as witness Becket, Wesley, More, Bacon, Shaftesbury, Clarendon and Watlington. In the life of the last named chancellor, who perhaps more than any other man is entitled to be called the father of equity, the author incidentally pays the highest compliments to American jurists.—*Western Law Journal.*

In taking leave of the *Lives of the Lord Chancellors* we are bound in justice to mark the merit and the tact both of the conception and execution. The author exhibits great industry in inquiring after and selecting his materials; considerable acuteness and judgment in arranging them, and sufficient skill and cleverness in presenting them to the reader. The execution is workmanlike and clearly arranged; the passages marked for use have been judiciously chosen; they are well introduced, and may either be read or skipped. If its faults were greater than they are, they could not diminish the happiness of that conception which has embraced the whole series of Chancellors in one work; the judgment which measures the length of the treatment in pretty exact proportion to the reader's interest in the subject; the skill which has thrown such a mass of matter into such an attractive form, and the uniring vigor which throughout sustains and animates so vast an undertaking.—*London Spectator, Dec. 18. 1847.*

Of the solid merit of the work our judgment may be gathered from what has already been said. We will add, that from its infinite fund of anecdote, and happy variety of style, the book addresses itself with equal claims to the mere general reader, as to the legal or historical inquirer; and while we avoid the stereotyped commonplace of affirming that no library can be complete without it, we feel constrained to afford it a higher tribute by pronouncing it entitled to a distinguished place on the shelves of every scholar who is fortunate enough to possess it.—*Fraser's Magazine, April 1848.*

A work which will take its place in our libraries as one of the most brilliant and valuable contributions to the literature of the present day.—*Athenaeum, Dec. 1847.*

## STEINMETZ'S HISTORY OF THE JESUITS.—Now Ready.

### HISTORY OF THE JESUITS: FROM THE FOUNDATION OF THEIR SOCIETY TO ITS SUPPRES- SION BY POPE CLEMENT XIV.; THEIR MISSIONS THROUGHOUT THE WORLD; THEIR EDUCATIONAL SYSTEM AND LITERATURE; WITH THEIR REVIVAL AND PRESENT STATE.

By ANDREW STEINMETZ,

Author of "The Novitiate," "The Jesuit in the Family,"

*In two handsome crown octavo volumes of about four hundred pages each, extra cloth.*

"Connected with no party whatever, my object has been to seek, and find, and boldly to express the truth, such, at least, as it has appeared to me after multitudinous consultations. For, intensely interested in the subject, I have spared neither pains nor expense to collect such information as would enable me to put forth a decisive work, not only on the Jesuits, but the religious movement in general, which antagonized the North with the South of Europe.

"To every mind the history of the Jesuits presents subjects of interest. In their exploits, the churchman, the missionary, the preacher, the educator, all who possess influence on the minds of men—may find hints and admonitions—their industry and perseverance are models for all humanity. They labored indefatigably, and received their reward in a world encircling power. From first to last they were never in obscurity. Like Minerva, sprung from the head of Jove, the company of the Jesuits went forth from the head of Ignatius, full grown, ready for battle. In her infancy she was great—the world feared her when she won her position—the lust of conquest supervened—she exemplified the maxims of the very world she went forward to reform—and dug the pit into which she fell, discarded by the popeedom, for whose defence she was established."—*Author's Preface.*

NOW COMPLETE.

## STRICKLAND'S QUEENS OF ENGLAND.

New and Improved Edition.

LIVES OF  
THE QUEENS OF ENGLAND,  
FROM THE NORMAN CONQUEST.

WITH ANECDOTES OF THEIR COURTS;

Now First Published from Official Records, and other Authentic Documents, Private as well as Public.  
New Edition, with Additions and Corrections.

BY AGNES STRICKLAND.

*In six volumes crown octavo, extra crimson cloth, or half morocco, printed on fine paper and large type.*

In this edition, Volume One contains Vols. 1, 2 and 3 of the 12mo. edition; Volume Two contains Vols. 4 and 5; Vol. Three contains Vols. 6 and 7; Vol. Four contains Vols. 8 and 9; Vol. Five contains Vols. 10 and 11; and Vol. Six contains Vol. 12. The whole forming a very handsome series, suitable for presents, prizes, &c.

The publishers have great pleasure in presenting to the public this work in a complete form. During the long period in which it has been issuing from the press, it has assumed the character of a standard work, and as occupying ground hitherto untouched, as embodying numerous historical facts heretofore unnoticed, and as containing vivid sketches of the characters and manners of the times, with anecdotes, documents, &c. &c., it presents numerous claims on the attention of both the student of history and the desultory reader.

Those who have been awaiting the completion of this work can now obtain it, forming a handsome set, twelve volumes in six, in various styles of binding.

## CONTENTS OF THE VOLUMES.

VOLUME I.—Matilda of Flanders, Matilda of Scotland, Adelficia of Louvaine, Matilda of Boulogne, and Eleanor of Aquitaine.

VOLUME II.—Berengaria of Navarre, Isabella of Angouleme, Eleanor of Provence, Eleanor of Castille, Marguerite of France, Isabella of France, Philippa of Hainault, and Anne of Bohemia.

VOLUME III.—Isabella of Valois, Joanna of Navarre, Katherine of Valois, Margaret of Anjou, Elizabeth Woodville and Anne of Warwick.  
*These three volumes make Vol. I. of the New Edition.*

VOLUME IV.—Elizabeth of York, Katherine of Arragon, Anne Boleyn, Jane Seymour, Anne of Cleves and Katherine Howard.

VOLUME V.—Katherine Parr and Mary the First.  
*These make Vol. II. of the New Edition.*

VOLUME VI.—Elizabeth.

VOLUME VII.—Elizabeth (concluded) and Anne of Denmark.  
*These make Vol. III. of the New Edition.*

VOLUME VIII.—Henrietta Maria and Catherine of Braganza.

VOLUME IX.—Mary Beatrice of Modena.  
*These make Vol. IV. of the New Edition.*

VOLUME X.—Mary Beatrice of Modena (concluded), Mary II.

VOLUME XI.—Mary II (concluded), Queen Anne.  
*These make Vol. V. of the New Edition.*

VOLUME XII.—Queen Anne (concluded).  
*Making Vol. VI. of the New Edition.*

It will thus be seen that this work presents an uninterrupted history of the Court of England and of the Royal Families from the Norman Conquest to the accession of the House of Hanover, naturally embracing an immense amount of singular and interesting matter, to be met with nowhere else. As an evidence that the author has done justice to the subject which she has so happily chosen, the publishers submit a few of the numerous commendations which the work has received from the public press.

These volumes have the fascination of a romance united to the integrity of history.—*Times*.

This is the twelfth and last volume of this delightful series. Miss Strickland has brought her successful task to a close with the reign of Queen Anne, and has shown her usual judgment and taste in so doing, as an attempt to trace the Brunswick succession of Queens would have been attended with obvious difficulties. The series is now before the public, therefore, as a complete work, and we do not hesitate to say that, as a whole, few historical works exhibit a more earnest love for truth, or greater anxiety to record facts and not theories. The work is, indeed, alike characterized by industry and impartiality, and will reflect lasting credit upon the author.—*New Monthly Magazine*, May 1848.

Miss Strickland, through the intervention of M. Guizot, has had access to a variety of unpublished documents, deposited in the secret archives of France, and some exceedingly curious details, obviously never intended for the world, have thus been brought to light.—*Court Journal*.

We must pronounce Miss Strickland beyond all comparison, the most entertaining historian in the English language. She is certainly a woman of powerful and active mind, as well as of scrupulous justice and honesty of purpose. And, as we before remarked, the considerable number of new documents to which she has had access, and the curious nature of some of these documents impart to her production a character of which it would be hard to determine whether the utility or the entertainment predominated.—*Morning Post*.

A most valuable and entertaining work. There is certainly no lady of our day who has devoted her pen to so beneficial a purpose as Miss Strickland. Nor is there any other whose works possess a deeper or more enduring interest. Miss Strickland is, to our mind, the first literary lady of the age.—*Chronicle*.

A valuable contribution to historical knowledge. It contains a mass of every kind of historical matter of interest, which industry and research could collect. We have derived much entertainment and instruction from the work.—*Athenaeum*.

This interesting and well written work, in which the severe truth of history takes almost the wildness of romance, will constitute a valuable addition to our biographical literature.—*Morning Herald*.

Miss Strickland has made a very judicious use of many authentic MS. authorities not previously collected, and the result is a most interesting addition to our biographical library.—*Quarterly Review*.

Volumes of the Duodecimo edition still for sale separately, to complete sets.

**FRANCE UNDER LOUIS PHILIPPE—Now Ready.**

# THE HISTORY OF TEN YEARS, 1830—1840: OR, FRANCE UNDER LOUIS PHILIPPE.

BY LOUIS BLANC,

Secretary to the Provisional Government of 1848.

TRANSLATED BY WALTER K. KELLY,

*In two handsome crown octavo volumes, extra cloth, or six parts, paper, at fifty cents.*

A History of the Revolution of 1830, and of the first ten years of Louis Philippe's reign, by a man who has borne so prominent a part in the late events in Paris, cannot fail to possess striking interest at the present moment.

This is a remarkable work. The ten years, 1830-1840, were troubled, stirring and important times to every European nation—to none so much as France. \* \* \* *L'Histoire des Dix Ans* is one of those works so often labelled by being called as interesting as a novel. It is a narrative of events, real, striking, absorbing—the subjects of immense interest to all readers—the style unusually excellent.—*Foreign Quarterly Review*.

This work will be received, at the present moment, with particular pleasure. The last revolution of Paris has revived all the recollections of its predecessor, and awakened an intense interest in everything relating to recent French History. The History of Ten Years will gratify the appetite thus excited, besides furnishing authentic information in regard to the public men who now figure as the chief actors on the stage of the new republic.—*North American*, April 1848.

The interest of the work to the American reader has been greatly enhanced by the recent downfall of the Orleans branch of the House of Bourbon, and "The History of Ten Years" should be read (if for nothing else) to enable one to survey understandingly the events of his own time.

M. Louis Blanc, who was a prominent actor in the Revolution of February last, is a man of brilliant talents. He edited for some time *La Revue de Progrès*, and doubtless acquired, in that capacity, the rhetoric of the journalist, which is a marked feature of the style of his History. He is perhaps the most epigrammatic writer of the day, and in the portraiture of great men is always striking. Thoroughly imbued with the national spirit and living in the midst of exciting scenes, he has given us a rapid and picturesque narrative of occurrences during the period under discussion.—*Southern Literary Messenger*.

No book that we know of would be likely just now to be read with greater attention than this. Apart from the reputation of the work in Europe, the great interest of its subject, and the fact that its author is a prominent member of the present Provisional Government, must cause it at once to be taken in hand by all reading people. The first part, now on our table, contains an exceedingly vivid account of the events of the Revolution of July.—*N. Y. Tribune*, April 1848.

## HISTORY OF THE FRENCH REVOLUTION OF 1789.

BY LOUIS BLANC,

Author of "FRANCE UNDER LOUIS PHILIPPE," &c.

TRANSLATED FROM THE FRENCH.

*In Parts, at Seventy-five Cents.*

"This work, which is in course of publication in Paris, is now for the first time offered to the public in the English language. Its author has recently acquired for himself a world-wide reputation as a leading and active member of the Provisional Government of France. He had previously been known to the literary world by his "France under Louis Philippe," which had procured for him the reputation of an able and brilliant writer, an original thinker, and a powerful delineator. These traits will be found conspicuous in the present volume."—*Translator's Preface*.

Parts 1 and 2, forming Volume First, are now ready.

**Now Ready—ILLUSTRATED DON QUIXOTE.**

# DON QUIXOTE DE LA MANCHA.

TRANSLATED BY JARVIS:

WITH COPIOUS NOTES AND A MEMOIR OF THE AUTHOR AND HIS WORKS,

ABRIDGED FROM VIARDOT BY THE EDITOR.

With Numerous Illustrations after Tony Johannot.

*In Two handsome Crown Octavo Volumes, extra crimson cloth, half calf or morocco.*

Several recent editions of Don Quixote have been issued, but decidedly the best and most valuable of them all is that published by Lea & Blanchard. These publishers have been fortunate in their selection of the translation and illustrations. The former is that of Charles Jarvis, long acknowledged as the best English exposition of the lofty deeds of the valiant Manchegan. It has been somewhat altered to suit the taste of the present day, and it is enriched with numerous notes, explanatory of allusions to persons and events not likely to be known to the general reader. Of the sketches of the well known Tony Johannot it is almost superfluous to speak, for no real admirer of Cervantes will tolerate any other illustrations of his quaint and vigorous ideas. Indeed, we hardly remember to have seen an author's fancies so faithfully and graphically embodied, and married neither by weakness nor exaggeration.

As for the mechanical and typographical execution of the work, we can say that it leaves little to be desired. It is clear and well printed, with fine white paper and comfortably sized type for octogenarian eyes. The binding is showy, but in taste, and the whole is well suited for the centre-table or the library; while its reasonable price places it within the reach of every admirer of the immortal humor of Cervantes.—*Weekly North American*.

The illustrations so prodigally distributed through the two volumes are by Tony Johannot, a pictorial Cervantes himself; they give what without seeing them would seem to be impossible, additional zest to the descriptions of the author. The paper and type are both good; and altogether this is the edition which all they who have read, and they who have yet to read, Don Quixote, will be eager to possess.—*Colonization Herald*.

## THE AMERICAN ENCYCLOPÆDIA.

BROUGHT UP TO 1847.

## THE ENCYCLOPÆDIA AMERICANA:

A POPULAR DICTIONARY,

OF ARTS, SCIENCES, LITERATURE, HISTORY, POLITICS AND BIOGRAPHY.

IN FOURTEEN LARGE OCTAVO VOLUMES OF OVER SIX HUNDRED DOUBLE COLUMNED PAGES EACH.

*For sale very low, in various kinds of binding.*

Some years having elapsed since the original thirteen volumes of the ENCYCLOPEDIA AMERICANA were published, to bring it up to the present day, with the history of that period, at the request of numerous subscribers, the publishers have just issued a

Supplementary Volume (the Fourteenth), bringing the Work up to the year 1847.

EDITED BY HENRY VETHAKE, LL.D.,

Vice-Provost and Professor of Mathematics in the University of Pennsylvania, Author of "A Treatise on Political Economy."

*In one large octavo volume of over 600 double columned pages.*

- Ranke's History of the Ottoman and Spanish Empires, 8vo., price 50 cents.
- Rogers' Poems, a splendid edition, illustrated, imperial 8vo.
- Roget's Outlines of Physiology, 1 vol. 8vo.
- Roscoe's Lives of the Kings of England, a 12mo. series, to match Miss Strickland's Queens.

**Somerville's Physical Geography**, 1 vol. royal 12mo., now ready.

**Steinmetz's History of the Jesuits**, in two crown 8vo. vols., 400 pages each, extra cloth, just ready, 1848.

**Strickland's Lives of the Queens of England**, new and improved edition, 12 volumes in 6, crown 8vo., crimson cloth or half morocco.—*N.B.* This work is now complete.

Same work, in 12 vols. 12mo., paper or cloth.

For the present, any vol. of either edition sold separate.

**Sprickland's Tales from History**, one handsome 18mo. volume, crimson cloth, with illustrations.

**Select Works of Tobias Smollett**, one large vol. 8vo., cloth.

Also, same work, 5 parts, paper, viz., *Peregrine Pickle* 50 cents, *Roderick Random* 25 cents, *Count Fathom* 25 cents, *Launcelot Greaves* 25 cents, and *Humphrey Clinker* 25 cents.

**Simpson's Overland Journey around the World**, crown 8vo., extra cloth.

Same work, 2 parts, paper, price \$1 50.

**Siborne's Waterloo Campaign**, with maps, 1 vol. large 8vo.

**Schmitz and Zumpt's Classical Series for Schools**, in neat 18mo. volumes, in cloth.

**Stable Talk and Table Talk, for Sportsmen**, 1 volume 12mo.

**Spence on the Jurisdiction of the Court of Chancery**, vol. I., large 8vo., law sheep.

Vol. II., embracing the Practice, (nearly ready.)

**SMALL BOOKS ON GREAT SUBJECTS**; a neat 18mo. series, price 25 cents each:—

No. 1. "Philosophical Theories and Philosophical Experience."—No. 2. "On the Connection between Physiology and Intellectual Science."—No. 3. "On Man's Power over himself to Prevent or Control Insanity."—No. 4. "An Introduction to Practical Organic Chemistry."—No. 5. "A Brief View of Greek Philosophy up to the Age of Pericles."—No. 6. "A Brief View of Greek Philosophy from the Age of Socrates to the Coming of Christ."—No. 7. "Christian Doctrine and Practice in the Second Century."—No. 8. "An Exposition of Vulgar and Common Errors, adapted to the Year of Grace 1845."—No. 9. "An Introduction to Vegetable Physiology, with references to the Works of

**De Candolle, Lindley," &c.**—No. 10. "On the Principles of Criminal Law."—No. 11. "Christian Sects in the Nineteenth Century."—No. 12. "Principles of Grammar," &c.

Or the whole done up in 3 vols., extra cloth.

**Taylor's Medical Jurisprudence**, edited with respect to American Practice, by Griffith, 1 vol. 8vo.

**Taylor on Poisons**, by Griffith, a new and very complete work, in one large octavo volume.

**Traill's Outlines of Medical Jurisprudence**, one small vol. 8vo., cloth.

**Thomson's Domestic Management of the Sick Room**, 1 vol. 12mo., extra cloth.

**Token, by Sealfield**, price 25 cents.

**Tucker's Life of Thomas Jefferson**, 2 vols. large 8vo., cloth.

**Virgili Carmina**, 1 neat 18mo. vol., extra cloth, being vol. II. of Schmitz and Zumpt's Classical Series. Nearly Ready.

**Walpole's Letters**, in 4 large vols. 8vo., ex. cloth.

**Walpole's New Letters to Sir Horace Mann**, 2 vols. 8vo.

**Walpole's Memoirs of George the Third**, 2 vols. 8vo.

**White's Universal History**, a new and improved work for Schools, Colleges, &c., with Questions by Professor Hart, in 1 vol. large 12mo., extra cloth or half bound.

**Weisbach's Principles of the Mechanics of Machinery and Engineering**, edited by W. R. Johnson, vol. I. large 8vo., with 550 beautiful wood-cuts, now ready.

Vol. II., same size and appearance, (preparing.)

**William the Conqueror, Life of**, by Roscoe, 1 vol. 12mo., extra cloth or fancy paper.

**Wheaton's International Law**, 1 vol. large 8vo., law sheep, or extra cloth, third edition, much improved.

**Wrazall's Posthumous Memoirs**, 1 vol. 8vo., extra cloth.

**Wrazall's Historical Memoirs**, 1 vol. 8vo., extra cloth.

**Youatt on the Horse, &c.**, by Skinner, 1 vol. 8vo., many cuts.

**Youatt on the Dog**, with plates, 1 vol. crown 8vo., beautiful crimson cloth.

**Youatt on the Pig**, 1 vol. 12mo., extra cloth, with cuts.

Same work, in paper, price 50 cents.

Together with various important works now in course of publication.

**MIRABEAU AND THE NATIONAL ASSEMBLY. Now Ready.**

## MIRABEAU, A LIFE HISTORY, IN FOUR BOOKS.

In one neat royal 12mo. volume, extra cloth.

Book I. The Education by Lettre de Cachet.—Book II. The Husband and the Lover.—Book III. The Travelling Volcano.—Book IV. The King of the French.

"Strange lot! Forty years of that smouldering with soul fire-damp and vapor enough; then, victory over that,—and, like a burning mountain, he blazes heaven high; and for twenty-three resplendent months pours out in flame and molten fire torrents all that is in him, the Pharos and wonder-sign of an amazed Europe; and then lies hollow, cold, for ever!"—*Carlyle's French Revolution.*

This work has been long in preparation, and is the only succinct, complete, and authentic life of Mirabeau yet published. It contains an examination into his supposed connection with the father of the present ex-king of the French, as well as a detailed and veracious sketch of Mirabeau's plans for saving the monarchy. It also comprises a full account of the most important debates in the National Assembly, from its convocation to the death of Mirabeau. As a faithful account of the extraordinary life of an extraordinary man, written in a vivid and picturesque style, it cannot fail to attract much attention.

**Now Ready. POEMS, BY THE AUTHOR OF JANE EYRE, &c.**

### POEMS.

BY ELLIS, CURRIER, AND ACTON BELL.

Authors of "Jane Eyre," "Wuthering Heights," "Wildfeld Hall," &c.

In one handsome volume, small 12mo.

"A fine faint spirit has the latter (Ellis); which may have things to speak which men will be glad to hear and an urgent power of wing which may reach heights not here attempted."—*Atterdown.*

THE  
**AMERICAN JOURNAL**  
 OF THE  
**MEDICAL SCIENCES.**

EDITED BY ISAAC HAYS, M. D.,  
 Is Published Quarterly

ON THE FIRST OF JANUARY, APRIL, JULY AND OCTOBER.  
 Each Number contains about Two Hundred and Eighty Large Octavo Pages.  
 And is appropriately Illustrated with Engravings on Copper, Stone, Wood, &c.

**THE MEDICAL NEWS AND LIBRARY,**

Is Published Monthly, and consists of

**THIRTY-TWO VERY LARGE OCTAVO PAGES,**

Containing the Medical Information of the day, as well as a Treatise of high character on a prominent department of Medicine.

WATSON'S LECTURES ON THE PRACTICE OF PHYSIC,  
 BRODIE'S CLINICAL LECTURES ON SURGERY,  
 AND TODD & BOWMAN'S PHYSIOLOGY

Have thus appeared in it, and the work at present publishing is  
**WEST ON THE DISEASES OF INFANCY AND CHILDHOOD.**

**TERMS.**

THE SUBSCRIPTION TO THE  
**AMERICAN JOURNAL OF THE MEDICAL SCIENCES,**

IS  
**FIVE DOLLARS PER ANNUM.**

When this amount is forwarded by the first of February, free of postage, it is considered in advance, and the subscriber thereby becomes entitled to the

**MEDICAL NEWS AND LIBRARY FOR ONE YEAR,**  
 Without further charge.

For the small sum of

**FIVE DOLLARS,**

therefore, the subscriber can obtain a Quarterly and a Monthly Journal of the highest character, presenting about

**FIFTEEN HUNDRED LARGE OCTAVO PAGES,**  
 With appropriate Illustrations:

**Or, for TEN DOLLARS,**

the publishers will furnish

**TWO COPIES OF THE JOURNAL, AND THREE OF THE NEWS;**

**Or, for TWENTY DOLLARS,**

**FIVE COPIES OF THE JOURNAL AND FIVE OF THE NEWS.**

Thus presenting strong inducements to Clubs. Postmasters and others will also thus find it worth their attention to obtain subscribers and remit their subscriptions for these works, which are among

**THE CHEAPEST OF**

**AMERICAN MEDICAL PERIODICALS.**

When the News is ordered separately, the subscription is One Dollar per annum, invariably in advance.

\* \* A few copies of the Journal and News for 1848 being on hand, the publishers will still supply both periodicals for Five Dollars, if remitted immediately.

In calling the attention of the profession to the high character of the American Medical Journal, the publishers append an extract from the report of "The Committee on American Medical Literature," to the National Medical Association at their meeting in Baltimore, May, 1848. After advertising to other matters, they say:—

"The *Philadelphia Journal*," which has been already mentioned, was succeeded by the '*American Journal of the Medical Sciences*,' established in 1827, and still continued, having reached its forty-first volume. The long standing of this publication, the support which it has received from many of the best writers in different parts of the country, and the elevated literary character and spirit which have distinguished it, have rendered it a favourite organ of the profession. So much of what is valuable in our periodical literature, during the long protracted period of its existence, has found a place in its pages, that it would be going beyond the limits of this report to attempt an analysis of its contents. Here have been recorded many of those daring operations which are dwelt upon with so much pride by the American surgeon. Numerous cases of unusual interest have been here related by their observers, often accompanied by illustrations, for the most part creditable to the art which has furnished them. Many of the reviews which it contains are conceived and executed in a higher spirit than the mere mechanical analyses and Talicottian abstracts which so frequently usurp this department of scientific as well as literary journals. This periodical is so well known through the country, and a complete series of it so generally contained in public libraries, that a general index to it from the commencement would be one of the most acceptable offerings which could be made to the medical reader.

"The committee had prepared an account of the most prominent articles under their several heads, but it proves to be too voluminous for a report like the present. The names of some of its contributors will be enough to show how extensively it has been supported by the ablest writers and practitioners of the country. In *Anatomy and Physiology*, original papers have been furnished by Drs. Horner, Moultrie, Coxe, Mussey, Warren, Earle, Smith, Alison, Harrison, Gardner, Leidy and others. In *Surgery*, Drs. Godman, Mussey, Randolph, H. & J. M. Warren, Coates, Mott, Norris, Kirkbride, Geddings, Nott, Shipman, Markoe, Parrish, Mettauer, Miller, Horner, Pantost, Watson, Atlee, Hayward, are among those who have lent their assistance, some of the best known among them in many elaborate articles. In the department of *Practical Medicine*, a great number of original Reports and Essays have been supplied by Drs. Chapman, S. Jackson, Emerson, Coxe, Horner, Hayward, Ware, Wright, Jackson (of Northumberland), Parrish, Pennock, Gerhard, Fisher, Nichols, E. Warren, Paine, Bigelow, Webber, Lindsay, Forrey, Beck, Flint, Coale, Earle, Stewardson, Kirkbride, Shanks, Parry, Mettauer, Whitney,

Pepper, Hall, Dexter, Jarvis, Bepk, Wharton, Lovett, Nott, Moreton Stillé, Boiling, Tabb, Taylor; Porter, Tucker, J. B. S. Jackson, Peckham, Kneeland, Gardner, Buckler, Mendenhall, Lane, and R. S. Holmes. On *Midwifery, and the Diseases of Women and Children*, among the principal contributors of original papers have been Drs. Dewees, Horner, Bigelow, Hodge, Gerhard, Geddings, Lindsay, E. Warren, Roberts, Lee, Kane, Shanks, Taylor, Bowen, Buel, Barwell, Bond, Sergeant, Sims, and Baldwin. Many other names might be added to these lists, which, however, are sufficient evidence that the journal has been willingly and heartily upheld by the profession."

After enumerating the other Medical Journals published in the United States, the report continues:—

"The committee will now proceed to a brief enumeration of the more important articles, which have, within the past year, or at least recently, been presented to the profession in the medical journals of this country, taking them in the order in which they have been enumerated.

"*American Journal of the Medical Sciences*.—The number for January, 1847, contains one of Dr. Norris's admirable *reviews*, a 'Table showing the mortality following the operation of tying the iliac-arteries.' It is founded upon a hundred and eighteen cases gathered from various sources, which are presented in a condensed form and subjected to a careful analysis. The committee have already fully expressed their sense of the importance of Dr. Norris's labours. The paper which follows, by Dr. Deak, of Brooklyn, N. Y., is worthy of succeeding that just mentioned. Four very full tables containing the history of fifty-three cases of phlegmasia dolens are given in this essay, the final object of which is to establish the pathology of the affection. Articles like the two just cited, are necessarily of permanent value. They cannot be superseded, because they have a solid basis of fact, and even if some of their conclusions were erroneous, the materials would remain as the basis of future results. The increased number of these interesting analytical surveys is one of the most encouraging features of our medical literature. In the midst of interminable discussions upon the value of the tabular system, the simple fact that tabulation affords a final result respecting a given number of facts, which mere perusal fails to do, is making itself felt like every truth which has time and fair play. The next article is one by Dr. Kirkbride on *Hospitality for the Insane*, and the fourth a brief account by Dr. Wilecks, of the epidemic remittent and intermittent of 1846. Then follow four cases of acute affection of the

spinal marrow, with dissections, by Dr. J. B. S. Jackson of Boston, marked by his accustomed accuracy of description. Several other cases are reported in this number, which contains two reviews of some interest, and the usual variety in its minor departments.

The first article in the number for April 1847, is one of great practical interest. It is the 'History of seven cases of Pseudo-membranous Laryngitis or Tracheitis,' by Dr. J. F. Meigs. The fact that recovery took place, in four cases where there was fibrous exudation on the fauces, entitles the history of these cases to the most careful examination, and affords a strong presumption in favour of the general plan of treatment adopted. It is well known, that long series of similar cases have been observed, every one of which has proved fatal, and that the whole question of treatment is considered as involved in perplexity by many able observers. The paper which follows, by Dr. Baldwin, *Observations on the Poisonous Properties of the Sulphate of Quinine*, has been most extensively quoted, and has called out various other communications confirming the results at which he has arrived. In the malarious regions of our country, where the "mangier doses" of this heroic remedy are so commonly given, it is of vital importance that all the risks they involve should be generally known. Then follow various reports of medical and surgical diseases, among which Dr. Earle's eleven cases of general paralysis of the insane cannot fail to be noticed for their psychological and pathological bearings, as well as the happy way in which they are related. A practical essay by Dr. Hildreth, on letting blood from the jugular in diseases of children concludes the list of original communications.

The July number opens with another statistical article from Dr. Norris, on the operation of tying the carotids, of the same high character with those which he has furnished in previous numbers. The next paper is one by Dr. Halliwell, on cholera infantum, which he calls by the singular name of *gastro-follicular enteritis*; which would seem to imply inflammation of the intestines seated in the follicles of the stomach. The essay is an instructive one, based on considerable experience and supported by two reported cases with a tabular analysis of twelve *post-mortem* examinations. A 'Note on the frequency of the pulse and respiration of the aged,' by Dr. Penneck, adds authority to the curious results obtained by Lenoir and Mitivie, who found the average frequency of the pulse in young men to be 65 per minute, while that of the aged was 73; a statement in direct opposition to the prevailing belief on this point. *Hydro-pathy, or the use of cold water for the Prevention and Cure of Disease*, by Dr. Kneeland, is the title of a Boylston prize essay, here published without any allusion to its laureate honours. The key to the author's position is found in the following sentence: "Instead of leading man back to the forsaken paths of nature, physicians

have preferred the easier plan of ministering to this altered condition by the ingenious and stupendous system of modern therapeutics." He appears to believe, and as the Committee think, very justly, that much indirect benefit may result even from the experiments of the hydro-pathist and homoeopathist, notwithstanding the illusions and impositions that surround the fountain of the Silesian boop and the laboratory of the Saxon necromancer. The interest of Dr. Brown's account of his visit to the Cretins, in the institution on the Abendberg, is owing not merely to the novelty of the subject, which is just beginning to attract the attention of philanthropists, but to the agreeable style of the narrative. In a country which has done as much as our own for the insane, the blind and the deaf and dumb it cannot be long before the improvement of the condition of the unfortunate idiot will be felt to be a public duty. Dr. Mettauer, whose name is familiar to the records of operating surgery, reports two cases of vesico-vaginal fistula, with the operations for their relief, one of which was perfectly successful, and the other, though repeated again and again, was but partially so. But this, as Dr. Mettauer thinks, was owing to the patient's amiable indiscretions, and he is decidedly of opinion that every case of vesico-vaginal fistula can be cured. Dr. Harris relates a case of doubtful sex, in connection with which the editor quotes that described by Dr. Barry, in the New York Journal of Medicine for January, 1847. Dr. Boling's new sign of pneumoia of the apex of the lungs, needs confirmation by other observers. The Committee can affirm, at least, that it is not constant. It was extraordinary if, as Dr. Boling asserts, the chest remained still resonant on percussion over the apex of the lung in a state of hepatisation. This number contains a long notice of Dr. Wood's Practice of Medicine, by one of the most searching and skillful reviewers our periodicals have ever enlisted in their service. It may be hinted, that one epithet, however judicious, must not be repeated too often; the accomplished reviewer remembers Gyas and Cloanthus.

The number for October, 1847, has for its leading article a continuation of Dr. Metcalf's *Statistics in Midwifery*, containing the results of 927 cases observed in private practice. It is a most creditable production to the author and the friends by whom he was aided, and may serve as an encouragement and a model to other practitioners situated at a distance from the more active centres of scientific industry. Dr. Michel's history of an early ovum is not without interest, though its illustration is less exquisite than the 'leones' of Wagner, and the style is wanting in the simplicity which should belong to an anatomical description. Dr. Harden's Essay on Isopathia, agrees with the general belief in maintaining the similarity of scrofula and pthiasis, but will hardly be thought to have established the doctrine; that 'Bright's disease is

isopathic with these affections. Why *molluscum* should come under the same head is hard to explain. In the days of isomerism and isomorphism, it is natural enough for a medical observer to be pleased with the thought of introducing some such parallelism of elements into medicine, but it may be questioned, how much is gained by the somewhat promiscuous erudition and finely drawn propositions of this elaborate essay, beyond a harmonious name for a well known principle. Dr. Kelley of Mobile, has given an account of yellow fever as this disease has presented itself to his own notice, written in clear and simple language, and keeping more closely than many writers on this subject have done to the strict results of observation. Some remarkable surgical cases and operations, a case of incision of the os uteri during labour on account of its partial occlusion, some researches on the structure and functions of the ciliary processes, and the case of the murderer Freeman, with a long review of some of the *Boa Vista* fever documents finish the list of original articles. In this number, October 1847, appears a new and distinct head of medical intelligence, entitled *ether inhalation as a means of annulling pain*. It is remarkable, that as so much patient deliberation was shown in preparing the abstract of what was before the public, on this subject, an article like that of Dr. Fickford should be admitted, but more remarkable still, that any sensible reader should have been frightened out of receiving the last great gift of Mercy, by the assertions of such a writer, as would appear to have happened in at least one instance.

"In the number for January, 1848, the leading article is Dr. Leidy's paper on the Comparative Structure of the Liver. This is unquestionably the most exact and complete Essay in the department of microscopic anatomy which has appeared in any American Medical Journal. The patient accuracy of the measurements, the finish and clearness of the numerous illustrations are nothing more than would have been anticipated by those who know the zeal and talent of this exquisite dissector and delineator. The article which follows, by Dr. Frick, is one of the first attempts at the investigation of the chemical changes of the blood induced by disease, made in this country. Most of the conclusions arrived at by the laborious observations which served as its basis, coincide with those of previous observers. One peculiar and novel result arrived at by Dr. Frick is, that the quantity of the chlorides and phosphates of soda and potash is dependent, not upon the particular disease, but upon the *season of the year* in which the examination is made, being much higher in winter and spring than in summer and fall. Dr. Foltz deserves credit for printing his valuable Report on Scorbutus. It could be wished that

all officers in the public service would discharge their professional debt as faithfully. Some of the author's expressions would seem to imply that *proteine exists only in vegetables*, which cannot surely have been what he intended to assert. Dr. Blake's paper appears to be founded on the same experiments which this ingenious physiologist reported some years ago to the British Association, and which have already taken their place in physiological science. The indefatigable Dr. Earle gives a brief analysis of five hundred and ninety-four cases of delirium tremens admitted into the Bloomingdale Asylum. Then follow several reports of interesting surgical cases; under the name of 'Monograph' we have next 'A Statistical Inquiry into the Causes, Symptoms, Pathology, and Treatment of Rupture of the Uterus,' by Dr. Trask, of Brooklyn, whose labours have been already mentioned with commendation.

"The first paper in the April number is an account, by Dr. J. M. Warren, of Operations for Fissure of the Soft and Hard Palate, with the result of twenty-four cases, at the close of which is an important additional note upon the early operation for hare-lip. Dr. Warren proposed, some years ago, and has often executed, a new operation, which is fully described in this paper and the annexed cases. Dr. Peeble's 'Result of cases of Pneumonia, treated chiefly by Tartar Emetic,' may be well calculated to excite attention to the possible ill effects of that remedy, but is deficient in the diagnostic elements of its cases. The third patient, for instance, may have suffered, for all that appears, from phlebitis with ulceration of the bowels. It does not appear from the record that the previous good health had persisted unchanged up to the period of the acute attack. Cases of successful vaginal hysterotomy and delivery by the forceps; of traumatic trismus successfully treated; of a fatal gun-shot wound of the neck; of ligature of both carotids; of the extirpation of a tumour of the uterus, simulating ovarian disease; of cancer of the stomach, and of melanosis, are reported in this number—certainly a very remarkable collection of important medical and surgical histories, and implying an ample supply of materials to allow of such selections. Add to this Dr. Parson's 'Statistics of Large Surgical Operations,' the Midwifery Statistics from private practice, by Dr. Pleasants, and the continuation of Dr. Trask's paper on Rupture of the Uterus, probably the most complete account of that accident to be found in print, and it must be owned that the patriarchal quarterly has not fallen below its own high standard of merit, at the point where the Committee takes leave of it for the present."\*

\* These extracts are from copies of the Report so furnished to the Chairman of that Committee, Dr. Holmes of Boston.
